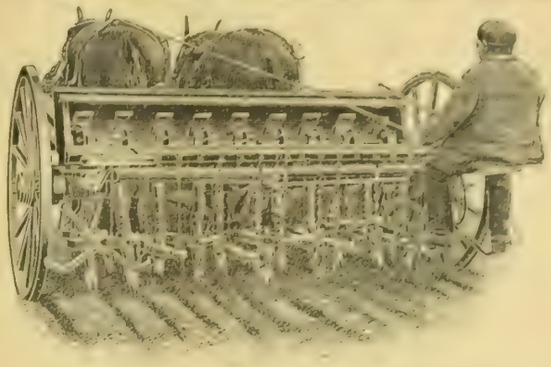
MARTIN'S FOOT-STEERING DRILL,

SAVING 300 PER CENT.

PATENTED IN ALL COUNTRIES AND COLONIES.



TESTIMONIALS.

I am thoroughly satisfied with Martin's Patent improvement in Corn and Seed Drills, Horse Hoes, &c. saving 300 per cent. in labour. GEORGE WATSON,
North Barsham, St. Walsingham, Norfolk.

Ashby Hall, Lowestoft, November 3rd, 1899.

Dear Sir,—I have had one of my Corn Drills altered, and it answers well. I like it. Just what we are requiring. CHAS. S. LEEDS.

Mr. T. E. Martin. Dillington, East Dereham, Norfolk, June 14th, 1900.

Dear Sir,—I am very pleased with my Corn Drill, to which I have had your Foot-Steering Patent affixed. In other years my drilling cost me 7d. an acre, but now it costs 3d. an acre. I should certainly advise every farmer to have his drill altered to your patent.

I am, Sir, yours truly, C. G. WOOD.

T. E. MARTIN, Farmer, Lynn.

BIBBY'S

"CREAM EQUIVALENT" for CALVES.

An Ounce of Fact is worth a Ton of Theory.

A STRIKING FACT.

In our Spring number of "Bibby's Quarterly" we reproduced the photographs of two groups of Calves which are now being reared at the Hornby House Farm, Bedale, Yorks, by his Grace the Duke of Leeds.

One of the groups is being fed on New Milk and the other on Separated Milk and "Cream Equivalent."

We asked our readers to tell us which of these groups were fed on New Milk, and 707 Farmers, Farmers' wives, their sons and daughters competed for a small prize which we offered to those who guessed correctly.

445 selected the wrong, and 262 the right group.

We think the above striking FACT speaks volumes for "Cream Equivalent."

The "Cream Equivalent" can be had at 15s. per cwt., carriage paid to nearest station.

INTERNATIONAL LIVE STOCK CONFERENCES.

Convening a sheep-breeders' conference at the Royal York Show, and inviting the flockowners of all foreign countries to attend it, was a happy idea, for the cordiality with which the invitation was accepted by shepherd kings from all parts of the world, and the highly important proceedings of the conference itself, thoroughly prove that such a convention was urgently needed. If no other good had been the outcome than that of making the flockowners of different lands better known to one another, the conference would not have been held in vain, but several valuable resolutions were passed, calculated to prove mutually advantageous to our home breeders and to those numerous foreign sheepowners accustomed to improve their flocks by drafts from this country. Pre-eminently desirable it is that the identity of animals exported hence should be perfectly preserved—an object apparently which the foreign delegates who spoke at the conference had most at heart. Mr. Austen, of Victoria, stated that he could vouch for the fact that "animals had been imported into his country from England as pedigree animals which were not so." Mr. Abrahams and Mr. Cohen, both from New Zealand, spoke in favour of tattooing as a means to insure identity which should not be overlooked, whilst Mr. R. Miller, from Ontario, suggested a reformed system of registering animals, which our various breed societies will no doubt duly take into consideration.

The details connected with such a magnitudinous subject cannot, of course, be settled offhand. Easy enough is it to declare that this or that ought to be, but very difficult often will be found the determination of the best possible measures for securing the desired object. There is an old maxim that "In the multitude of counsellors is found wisdom," and our breeders have no doubt gained great advantage by having learned the opinions of the foreign gentlemen mentioned and others as to how the perfect identification of sheep sent from one country to another can be ensured. But, fortunately, this is not to be the only international conference we are to have, for a resolution was carried unanimously that there shall be one held every year in conjunction with the Royal Agricultural Society's Show. Thus, if the work sought to be accomplished by this conference should fall short of perfection owing to the varied usages of Flock Book Societies, the latter will have ample time before the conference reassembles at Cardiff next year to see if they cannot bring their rules and regulations more into conformity with those of other societies. Moreover, the disposition on the part of foreigners to regard tattooing as a safeguard against fraud will no doubt be paid due attention to by the National Sheep-breeders' Association.

This was not the only matter, however, dealt with by the conference. Sanitary certificates are to accompany export certificates, which are to declare that the animal or animals are not affected by any disease, and, what is still more important, the vendor is to furnish a sworn affidavit that no contagious disease has existed on his farm for three months, and that the exported sheep have not been in contact with any diseased animals during that time. Thus it will be seen that our home breeders are desirous to give foreign buyers every security that when they buy they can make sure of having animals perfectly healthy.

Exceedingly desirable would it be to have an International Cattle Breeders' Conference annually, for a great many more or less urgent reasons, but it is to be apprehended that this point of furnishing health certificates would be rendered impossible without a previous application of the tuberculin test, to which so many of our Shorthorn breeders unreasonably have strong objections. Fresh will it be in remembrance that a few years since French breeders, through their Minister of Agriculture, made an application, which came before the English Shorthorn Society, that measures should be taken to stamp out the tuberculosis pest, or that French buyers should be guaranteed against loss when they buy English Shorthorns which afterwards are found to be affected by it. The result proved that British and some foreign cattle breeders hold extremely opposite views as to the utility of the tuberculin test, as well as on the prevalence of tuberculosis, consequently were a conference convened, it is to be feared the same unanimity of feeling would scarcely characterise it as was exhibited at the York Conference of Sheep-breeders.

Nevertheless, matters are continually cropping up which could be far better adjusted in a friendly convention of those interested than in any other way. We have only to turn to the Shorthorn Society's annual meeting, held on the showground at York, to prove this. There are restrictions both in the American and Canadian Shorthorn Herd Books preventing the entry of any cattle therein which do not trace to the first twenty volumes of Coates' Herd Book. The Council of the English Society wishing this to be modified, made application to secure that object, and sent invitations to both Transatlantic societies to send over delegates to confer with them at the annual meeting. These invitations were not accepted, but if an international cattle conference had been convened to discuss anything and everything of importance, the foreign breeders would no doubt have responded just as numerously as did the sheep-breeders.

There continues a good foreign demand for Shorthorns. The report presented at the annual meeting stated that 1,149 certificates were issued last year, which was a larger number than had been required for the export of animals in any previous year. The South Americans, at any rate, do not fear to buy British Shorthorns, nor do the Canadians, for 715 of the above certificates were for animals sent to the former, and 334 of them for exports to the latter. Besides this, the foreign trade on the Royal showground was reported exceedingly good both for Shorthorns and Herefords. Nor were the leading sheep-breeders wanting foreign customers.

The Revenue returns for the first quarter of the financial year show a net decrease of £1,144,372, compared with the corresponding quarter of the preceding year. The principal decreases are—Customs, £989.532; Excise, £440,129; and Stamps, £280,000. Against these must be placed the following increases on the quarter: Estate, etc., Duties, £233,433; Property and Income Tax, £330,000; and small increases from the Post Office, Telegraph Service, and Crown Lands. The total revenue for the past quarter was £26,630,226, of which £1,939,592 was paid to the local taxation account.

SAMPLES.

By a Man of Mark Lane.

My attention has been called to an inaccuracy in last week's article on the discussion upon the amendment moved by Colonel Milward on Clause 2, Sub-clause (4), of the Agricultural Holdings Bill. This amendment, the effect of which, as was stated, was to provide that an arbitration should be before two arbitrators unless the parties agreed to a single arbitrator, was *not* accepted by Mr. Long. The right hon. gentleman pointed out that a main feature of the Bill was to cheapen and simplify the procedure, and if this desirable object was to be obtained, he thought a great deal depended upon the adoption of the single arbitrator. He explained that the Bill followed the principle laid down in the Arbitration Act, that a single arbitrator should be employed in the absence of agreement to the contrary, and the amendment was negatived by the Committee without a division. I am sorry this error occurred; but I am very glad Mr. Long did not accept the amendment.

The Bombay Department of Land Records and Agriculture has now issued its final memorandum on the wheat crop in the Bombay Presidency for the season of 1899-1900. The latest reports show the area sown at 1,617,000 acres, or 43 per cent. below last year's, and 42 per cent. below the average of the preceding ten years. Except in parts of Belgaum and Dhárwár, where rains for sowing were favourable and an increased area was placed under wheat, the decrease is general in the Presidency proper, being most marked in Gujarát and the Deccan. Of the total area sown in the British districts of the Presidency proper, about 55 per cent. is reported to have failed altogether to produce any crop. The whole of the surviving area is assisted by irrigation in Gujarát, about 65 per cent. in the Deccan, and only a little over 2 per cent. in the Karnátak. As a natural result of the very large decrease in area and abnormal season, the total outturn on the whole is very unsatisfactory, being only about 24 per cent. of last year's and 23 per cent. of the average.

The Queen has been pleased to issue a Commission under Her Royal Sign Manual, appointing Earl Egerton, Lord Revelstoke, the Hon. Alfred Lyttelton, Q.C., Sir Robert Giffen, Sir John Wolfe Wolfe-Barry, Sir John Hext, and Mr. John Edward Ellis to inquire into the present administration of the Port of London and the water approaches thereto. The Commissioners are also to consider the inadequacy of the accommodation provided for vessels, and the loading and unloading thereof; the system of charge for such accommodation, and the arrangement for warehousing dutiable goods; and to report whether any change or improvement in regard to any of the above matters is necessary for the promotion of the trade of the port and the public interest. Power is given to the Commissioners to examine books and records, to personally inspect such places as they may deem expedient, and to employ such persons as they may think fit to assist them in their inquiries.

The receipts on account of Revenue from April 1st, 1900, when there was a balance of £3,517,047, to June 23rd, 1900, were £23,156,305 against £24,850,763 in the corresponding period of the preceding financial year, which began with a balance of £8,919,173. The net expenditure was £35,896,910, against £22,440,005 to the same date in the previous year. The Treasury balances on June 23rd, 1900, amounted to £3,536,442, and at the same date in 1899 to £8,054,931.

Mr. Channing and some of the Liberal county members are anxious that the report stage of the Agricultural Holdings Bill should be postponed until the special meeting of the Central Chamber of Agriculture which has been called to consider the Bill in its amended form. The hon. member will put a question to Mr. Balfour to-day (Monday) on the subject.

I hear from Wakefield that, owing to his advanced age and failing health, Mr. John Jackson has retired from business, but the firm will be continued under the old style of Dunns and Co. by the remaining partner, Mr. Geo. G. Hein.

AGRICULTURAL POLITICS.

By a Lobbyist.

It has been the duty of agricultural politicians of late, to somewhat vigorously criticise certain agricultural appointments. No criticism is possible of the nomination of Professor Campbell, of the Yorkshire College, Leeds, to the assistant-secretaryship of the Irish Board of Agriculture. It is lauded by every section of politicians. It is hailed as one of the best appointments made since the initiation of an attempt to give a disciplined character to the natural interest in agriculture. His work at Edinburgh, Leipsic, Berne (where, by the way he studied under that famous botanist, Professor Freudenrush), and Leeds, has been reviewed with the utmost satisfaction. It has been remembered by Scotchmen that he has done a great work in connection with the improvement of the cheesemaking industry in their country; and it has been asserted by northern men, who remember his work in connection with the Lancashire County Council (of whose agricultural department he had brief charge) and who know of the valuable experiments he has conducted on the Yorkshire county farm, that his departure from their district will be a great loss to it. It would be impossible to conceive a more enthusiastic chorus of praise.

Shall we have the report of the Royal Commission on Local Taxation this year? The matter is one of the gravest importance to agriculturists. That the report has been under consideration during the last five or six weeks I personally know; but this, however, does not inevitably mean its early presentation. When it is presented it will remove from politicians, and, more particularly, from certain Ministers, the chief ground which they have urged as a justification for evading the promises to seek the reform of the existing system of local taxation.

What is more, the report will enable a definite electoral platform to be formulated. The approaching expiration of the Agricultural Rates Act will lend an added significance to such a platform. I, myself, allude to the matter chiefly because of the last two facts. I thus urge all taxation-reformers not to allow their political interest to be exhausted by exuberant laudation of the war policy. I warn them that it is possible that the report of the Commission will be presented this year.

Sir William Harcourt is moved by all his old antagonisms and fire. The attack on the Irish Tithe Rent-Charge Bill was quite in the style which a few years ago so sorely perturbed the then Sir Richard Webster, and brought the Government perilously near disaster. We had the old visions of a landlordism which is ever avaricious and always grasping presented to us; we had the old story of a Government which is naught but a conspiracy to pilfer on behalf of this same landlordism repeated.

The Bill is not of much importance to the English land interest beyond that it reflects an evident resolve to continue on the line of more generous treatment of that interest which was initiated by this Government three years ago. As I listened to the speeches on Thursday night I wondered whether the same generosity would be exhibited by the Government when the local taxation report comes before the House. This is the matter to which the Parliamentary sympathisers with the agrarian interest would be wise to devote attention. It is well to be anticipatory in these political days.

But for the fact that the affairs in China and in South Africa now absorb political interest and attention the Government would have made a great mistake in persisting with this Irish Bill. The measure would have served to revive all the bitter feeling and prejudiced assertions made in connection with the English Bill, and with the Bill which I need not name (I am sickened unto death at the frequent repetition of its title), which it is asserted takes money brutally out of the pockets of the poor innocent towns for the advantage of the bulky-pursed farmers. It would have served, in a word, to give what Mr. W. S. Gilbert describes an artistic verisimilitude to a used-up election cry.

The old attempt to divide town and country into rival camps, the old assurance that the Government's main purpose is to put money into the pockets of the squires and the parsons, would have been resuscitated in all its unadorned brutality. The Government and the Irish landlords may thus regard the present as a suitable moment for such a legislative endeavour. The infamy of the effort—thus it would have been described under other circumstances—will be neglected because of more lurid political incidents.

Have we heard the knell of the policy of free trade? Naught more significant from the political point of view has happened for many years than the discussion at the congress of Chambers of Commerce of the Empire upon the fiscal policy which ought to be pursued within this Empire. Should not the Zollverein be enacted?—in other words, should not a customs' union of the Empire be created? This was the point at issue. Had a definite answer been made in the affirmative, it would have meant that, in the opinion of the commercial organisations of the country, the day has come when the policy of free trade, which is applied to a non-reciprocating world, should be restricted only to our own colonies.

This definite answer was not given, but the resolution asking the Government to appoint a Royal Commission to inquire into the wisdom of the policy is scarcely less significant. It indicates a doubt. Will the Chambers of Agriculture appreciate this? Will they seek to strengthen this demand by their own adherence to it? Will they see to it that, if this Commission be appointed, agriculture is represented in its membership? It would be criminal to neglect so excellent an economic opportunity.

Had this demand originated with agriculture it would not have had one tithe of the importance now attaching to it. It would have been declared to be an attempt to reimpose the tax on corn, to raise the price of bread, and to give landlords an opportunity of imposing higher rents. The demand now actually represents the very towns which, had the proposal a rural authorship, would be represented as about to be plundered. It represents, in fact, the artisans.

Of course, Manchesterism is greatly irate that the demand should have been preferred at all; but Manchesterism is no longer the economic Sir Oracle of this country. It is about to meet the fate of Dagan. It sees its supremacy not merely endangered, but nigh to an inevitable doom. I am glad of it, because it has used its opportunities—the opportunities which Cobden's free trade as originally concerned would have given it—for a selfish purpose. Protection may not be near, but I repeat that one-sided free trade—one-sided in that it cared for only one of two national interests—is approaching death. Will the Chambers of Agriculture, I again ask, take advantage of an occasion so unexpectedly and excellently created?

Now, I hope those of my Hampshire correspondents who rejoiced—rejoiced, I am sorry, because they were able to exhibit their political animosity—at the conviction of Colonel W. Woods, of Warnford Park, on the charge of starving his sheep are convinced that I was right. I now declare that it will be a poor day for agriculture when agriculturists can rejoice at a conviction on an unfair charge simply because the object of it is a political antagonist. Colonel Woods is the Radical candidate for a northern constituency; but Radical though he be, he was at the moment when this alleged offence was committed engaged in the patriotic duty of sending off to South Africa one of the finest body of Yeomanry cavalry that has done doughty deeds at the instigation of Lord Roberts. He knew no more about the alleged starving than the man in the moon.

Absent from home, with every hour of his time given to his patriotic task, with all his personal business neglected—how could he know whether every ounce of fodder he would himself desire his sheep to have was given them? I am glad that the Colonel has succeeded in quashing what I held at the time to be a very mistaken and unfair conviction. No, my dear Hampshire friends, agriculture will have a better legislative prospect before it when you refuse to chortle over an infliction imposed upon a man who in his own party may render your interest good service. I am certainly not hide-bound by any Radical sympathies, but I shall be glad to be able to welcome Colonel Woods to the House of Commons. At this moment he has all my congratulations.

I am glad to be able to announce that there is a prospect of the local taxation report being presented at an early date. A member of the Committee tells me that he and some of his friends are doing all they can to hurry it forward. There are differences as to certain clauses—differences suggested by the suspicions of men who rather represent the urban than the rural districts. However, they are not unsurmountable, and will be overcome by the exercise of a little patience.

What, however, is more gratifying—and this is the best answer that can be made to one of the questions I have asked in an earlier paragraph—is that already an attempt is being made to secure a dispassionate consideration of the report in the House of Commons. The proposals embodied in the report will not mean a revolution. "But," said to me the member of the Commission to whom I have alluded, "you will find that they are inspired by a genuine desire to remove the taxation anomalies of the counties."

IN PARLIAMENT.

House of Commons.

Compensation for Agricultural Labourers.

On Wednesday Mr. H. S. Foster moved the third reading of the Workmen's Compensation Act (1897) Extension Bill. The measure extended the benefits of the principal Act to agricultural labourers. At the time the 1897 Act was passing through the House it was sought to bring agricultural labourers within its scope; but the proposal was resisted, on the ground that agricultural labourers did not ask for it, and that it would impose a heavy burden on agriculture. Events had disproved those statements as to the burden it would impose on agriculture, by the fact that an employer could insure against its liabilities by 3s. to 3s. 6d. per £100 of wages. He believed that the changes made in the Bill since the second reading were improvements, and that the Bill which they were now asked to finally pass was a better measure than the skeleton introduced to them in second reading. When it went to another place, he trusted Her Majesty's Government would take the same interest in it that they had taken in this House, and that it would be able to finally take its place on the Statute Book as one of the Acts of the present Session.

Mr. Broadhurst desired to join in cordially supporting the third reading of the Bill, and hoped that it would realise the hopes of its friends in its administration. It was a measure belonging to no Party. He hoped that next Session the Government would bring in a measure to consolidate all the laws relating to compensation to workmen, and that they would also include all the industries at present left out. All sailors and fishermen, and a large portion of the building trade were at present beyond the scope of the law of compensation, and he trusted that in view of a General Election these defects would be speedily remedied.

Mr. Grant Lawson, in supporting the third reading, referred to a misunderstanding as to the scope of the Bill. There was an impression that all labourers were not included. That was not so. The Bill only limited the liability of small employers who did not habitually employ labourers. He still did not like the Limitation Clause, and hoped to see some alteration made in that clause in its passing through another place.

Mr. J. Lowther and Mr. Galloway continued the discussion.

Mr. Gedge heartily supported the third reading.

Captain Pretyman repudiated the suggestion that those who voted against the extension of the Act of 1897 to agricultural labourers, were now supporting that proposition in view of a General Election. They had desired in the interests of employer and employed to gather experience, and the result had proved the wisdom of their waiting for two or three years. The fact that the premiums for insurance had fallen from about one pound to three shillings was alone worth waiting for. (Hear, hear.)

Mr. Strachey, Colonel Kenyon-Slaney, and Mr. J. Wilson (Falkirk) having spoken,

The Bill was read a third time amid general cheers.

Spalding June Cattle Fair. — This fair took place on Tuesday, and was largely attended. There was a good supply of cattle. The best bullocks realised about 8s., and inferior quality 7s. 3d. to 7s. 6d per stone. There was not a large show of stores, but for the best trade was good. Bullocks two and two and-a-half years old, made £12 to £15; year and a half old, £9 to £12; maiden heifers for grazing, £13 to £15; in-calf heifers, £15 to £18; and milch cows, £16 to £20 each. Best fat sheep realised up to 60s. a head, and half-bred shearlings 43s. to 50s.; but for lambs there was only a poor trade. Horses of a useful stamp were in demand at high prices.

PRACTICE WITH SCIENCE.

An Experimental Farm for Cambridge University.

The new Chair of Agriculture at Cambridge University is to have an experiment farm attached to it. This is the result of private munificence, the history of which is told in a letter addressed to the Vice-Chancellor of the University by Mr. Macfarlane-Grieve, of Impington Park, near Cambridge. In this letter Mr. Macfarlane-Grieve says:—

"On the foundation of the professorship and the organisation of the department I felt very strongly that there was one principal thing still wanting to its prosperity—a farm. I found that Professor Somerville shared my views as to the extreme desirability of such an appendage to his chair, and, as a farm on this estate of about 145 acres, within three miles of Great St. Mary's, will fall vacant at Michaelmas next, I invited him to inspect it with a view to my placing it at the disposal of the University, for the purposes of the Department of Agriculture. Professor Somerville's report was favourable, but before any action could be taken the question of obtaining the funds necessary for stocking a farm had to be solved. Professor Somerville has met with a liberal response to his appeals, and that sufficient funds for this purpose are now practically assured. I am now prepared to offer the farm in question to the University free of rent till Michaelmas, 1909, the term for which the existence of the chair and department is in the meantime guaranteed."

The offer has been accepted, and the donor of the farm duly thanked for his munificence.

The Cost of Tilling the Soil by Various Means.

Engineering reports trials as to the energy expended on land cultivation. It varies from 20 millions to 159 millions of foot-pounds per acre, according to the nature of the crop in rotation. A close approximation of the expense of producing this energy by different means is as follows, the unit taken being 100,000 kilogrammetres, or about 725,000 foot-pounds:—

Pence.			
From 13	to 18·5	if produced by	hand labour.

FOREIGN AND COLONIAL.

Australian Irrigation Farms.

Some irrigation experiments of an interesting and most remarkable character are at present being conducted in New South Wales. As is generally known, there is an immense inland region, used exclusively for pastoral purposes, embracing an area of several thousand square miles, and graphically described as a waterless country, the rainfall being slight, and the water supply extremely precarious. Yet it was not until within the last few years that it was definitely shown that abundance of water could be obtained, not only from the cretaceous formation, but also from other rocks underlying the soil in this part of the colony.

Artesian boring in New South Wales commenced in 1879, in which year operations were begun at Kallara, a station lying between Bourke and Wilcannia. The supply was tapped at a depth of 140ft., and the effluent water rose to a height of 26ft. In 1884, the Colonial Department of Mines put down its first bore in search of water, a small supply of which was reached at 89ft. Since then much work has been done, both by the Government and by private enterprise. On the 30th November, 1899, there were seventy-three completed Government bores, while twelve were in progress, and contracts had been let for others. Of those completed, there are forty-eight flowing, yielding a supply of approximately 29,000,000 gallons per diem, and sixteen from which a supply of 750,000 gallons per diem can be pumped; but in the remaining eight bores the search for water suitable for drinking purposes has been unsuccessful.

The deepest bore sunk in the colony is that at Dolgelly, on the road from Moree to Boggabilla, which is down 4,086ft., yielding a flow of 745,200 gallons per diem. The next in depth is the Bancanya bore on the Silverton-Cobham road, being 3,615ft. deep. The largest flow has been obtained at the Toolora bore, on the road from Walgett to Coonamble, which yields approximately 3,000,000 gallons per diem. The water from the Government bores, over and above that required for travelling stock and domestic use, is being used for irrigation purposes, and much has already been accomplished in this direction.

At the Pera bore, eight miles from Bourke, on the Wanaaring road, an area of 68¾ acres has been reserved for an experimental farm. The remainder of the land has been cut up into 20-acre blocks, all of which have been let under the homestead selection provisions of the Crown Lands Act of 1895. Good results have attended the work of irrigation at this place, as well as at other bores, especially those on the Bourke to Barringun road, but the work is still largely in the experimental stage. Should future results realise the anticipations formed by those who have carefully studied the question, it is possible that the vast expanse of treeless, waterless country, at present given up to sheep, and which is a source of heavy loss to pastoralists during prolonged periods of drought, may become studded with richly fertile spots, each an oasis in the wilderness, and assisting in changing the whole face of the country. The primary idea was to encourage the cultivation of drying fruits, such as apricots and raisins, but a couple of years were lost in experimenting with Californian methods of irrigation, which proved futile, the periodical flooding of the land causing it to cake down to the subsoil.

The system of soil aeration now adopted has proved successful in every respect, and where, only a few years ago, there was nothing but dry, burnt-up country, may now be found beautiful gardens, filled with the choicest flowers, growing in luxuriant profusion, and orchards filled with healthy trees giving the rich promise of future abundant crops. But there have been varying results on the irrigation farms. Several have been successful, and others only partially so. This, however, has been occasioned largely by the character of the tenants.

Those possessing real agricultural experience, and willing to turn it to the best account, have found irrigation-farming a remunerative enterprise. Where such experience is lacking, there will inevitably be disappointment. Now that the principles on which irrigation agriculture in the New South Wales dry country can be most effectually conducted are becoming better understood, it is probable that the number of irrigation farms will become considerably increased, and many million gallons of water at present unavoidably running to waste, become utilised in a most advantageous manner.

The Crops in Germany.

The subjoined report of the growing crops throughout the Empire was issued in the middle of June by the Imperial Bureau of Statistics. No. 1 represents very good; No. 2, good; No. 3, an average; No. 4, below an average; No. 5, bad.

* Winter. † Spring.

The weather has been favourable to the development of the crops since our last report. Cool weather intervened, and about the end of May frost occurred, causing much damage in places. Since then it has been warm. Rain fell plentifully about the beginning of June, followed by dry weather, which increased to drought in the eastern provinces of Prussia. Reports are therefore very varied, but on the whole slightly improved against last month for winter and summer wheat and rye, summer barley and oats. The note for summer rye and lucerne is the same, but not so good for clover and hay. In comparing the June note for the seven years from 1893 to 1899 we find the prospects for winter wheat, winter rye, clover, and hay were better. Prospects for oats and potatoes are better than in five out of the seven years. Complaints of ravages of field mice have ceased, but injury from hailstorm and waterspouts are reported.

The rain which fell at the end of May was too late to improve the condition of winter rye; the haulm is short, but the period of bloom went off well, and grain is well formed. Reports from Alsace-Lorraine are not satisfactory with regard to summer rye and oats. Summer crops are likely to be a failure in Prussia and Posen. They are generally well developed in South Germany. There are many complaints of weeds. Potatoes were not yet up in Prussia and Saxony, also in some districts of South Germany, in the middle of June. The condition is generally good. Clover fields are quite dried up in East and West Prussia, and had to be used as pasture. In places where rain fell, it came too late to improve the condition. It is very thin and short, owing to ravages of field mice, drought, frosts, and cold winds. The yield will be very small. The quality was good in Hesse and Wirtemberg, although a small crop. Clover fields are well developed in Bavaria and Thuringia. Lucerne has suffered much from cold, ravages of mice, and droughts, and is not well developed. The first crop will be small but of good quality. The condition is more favourable in Bavaria and Thuringia.

Some meadows will yield well, while others which suffered from night frosts in May will yield only a small crop. Hay harvest has begun in many places, and the hay was carried dry in June.

French Agriculture.

Engineering, in dealing with agricultural exhibits at the Paris Exhibition, states that the entire area of France is 132,500,000 acres, of which 125 million acres is cultivable lands; this includes about eighty-seven million acres actually under cultivation, the remainder being occupied by woods and forests. The estimated value of the land, exclusive of buildings, is £5,600,000,000, and the annual revenue it yields is about £280,000,000 sterling. This represents an average return of about 2½ per cent. Agricultural buildings throughout France represent a further value of 400 millions sterling, and agricultural machinery is estimated at 140 millions. There are in France about 64 million acres under the plough, 37½ millions being under cultivation for cereals, 21 million acres specially devoted to growing forage, not including pasture lands; over 6 million acres devoted to growing roots; while the vine cultivation occupies about 5½ million acres. An average year's production is 259,000,000 tons of cereals, 940,000,000 tons of grain, 165,000,000 tons of straw, 155,000 tons of hay, and 150,000,000 tons of roots, not including the crops sold direct to factories, sugar works, and distilleries. The inventory of agricultural implements in France shows a minimum 3,670,000 ploughs, 3,000,000 harrows, scarifiers, and cultivators; 52,000 drills and other sowing machines, 251,000 horse hoes, 38,000 mowers, 51,000 horse-rakes, 23,000 reapers, 234,000 threshing machines, and nearly 6,000,000 carts and other appliances for transport. On an average, there is thus one plough for each 17.5 acres of cultivated land; one drill for each 830 acres put down to cereals or roots; one hoe for 22.5 acres in roots; one mower to every 530 acres of grass field, not including pasture; one reaper for every 1,400 acres of cereals; and one threshing machine for every 150 acres of cereals, exclusive of maize. The agricultural population is recorded at 18 millions, of whom about 7 millions are farm labourers. In France (as in most other countries), this class of labour is steadily diminishing.

New Agricultural Patents.

Specially compiled for the MARK LANE EXPRESS by Mr. G. D. Howard (Hughes, Son, and Co.) Patent Agent, 38, Chancery Lane, London, W.C., of whom all information relating to Patents, Designs, and Trade Marks may be obtained free of charge.

10632.—Adam Carlisle Bamlett, London, for an invention of "Improvements in mowing and reaping machines."

10721. Isidor Podwinetz, London, for an invention of "Improvements in manufacturing a food for cattle."

10759.—George Leadbeater, Manchester, for an invention of "Improvements in garden shears."

10802.—Williams Hornsby and John Lawson, London, for an invention of "Improvements in or connected with ploughshares."

10823.—William McBride, Cork, Ireland, for an invention of "A turnip and mangold gapping and thinning machine."

10871.—Francis Fordham, King's Lynn, for an invention of "Improved cultivator."

10922.—Amos Burson, Henry Miles Thompson, William Mathew Harrison, and Samuel Gamble, London, for an invention of "Improvements in lawn weeders."

10954.—Alfred Lewis, King's Lynn, for an invention of "A machine for 'cutting out' turnip plants and the like."

10997. Dietrich Otto Julius von Gerlach, London, for an invention of "Improvements in potato digging and ploughing machines."

The Great Northern Railway Company announce many important alterations in their train service, commencing July 1st, among the most important of which are the running of additional dining car express trains (first and third class) on weekdays, leaving London at 11.20 a.m. for Edinburgh, Glasgow, Perth, Aberdeen, etc., and at 6.15 p.m. for Wakefield and Bradford direct. Additional express trains for the East Coast watering places will leave King's Cross on weekdays at 10.15 a.m. and 1.10 p.m. for Sheringham, Cromer, and Mundesley-on-Sea, and 11.30 a.m. for Scarboro', Whitby, Filey, Bridlington, etc. A through train will be run from London to Harrogate *vid* York, leaving King's Cross at 1.50 p.m. A special Highland sleeping car express will, from July 25rd to August 10th (Saturdays excepted) leave King's Cross at 7.45 p.m. for Perth and Inverness. It is also announced that commencing on August 1st, dining accommodation will be given on the 10 a.m. express from King's Cross to Edinburgh and other parts of Scotland. A special express for Norway tourists leaves King's Cross for Hull at 10.55 a.m. on Tuesdays, Thursdays, Fridays, and Saturdays until August 18th.

HOPS.

By Lupulin.

Home Notes.

The Condition of the Plantations

and the prospects of the new crop occupy the first place in the minds of all who are interested in the hop trade. Therefore I give preference this week to the reports I have received, from which I condense the following:—

HORSMONDEN.—Recent rains have at last made the hops grow faster than the aphis can bleed the bine, so that a slight improvement can be noticed, but in spite of washing fresh fly keep coming, and honeydew is to be seen in most plantations, which are in a critical state.

PEASMARSH.—The prospects for 1900 are not over bright. I have washed my hops, but the fly has returned as bad as before, and there is also mould. This weather is much against the hops.

BENENDEN.—Washing is in full operation, but the attacks of the fly are repeated. The downfall of rain has enabled the bine to make progress, except in gardens which are backward. The vermin remains in great quantities, and the prospect of a crop is far from good.

ASHFORD.—We have had sufficient rain, and should welcome fine weather to enable us to persevere in washing, which is rendered necessary by the persistent presence of vermin. Mould is also becoming serious, and the general appearance of the gardens is hardly so good as a week ago, growth being very slow.

BIDDENDEN.—While the hops have benefited by the rain, the low temperature at night checks advancement of growth. In many gardens the bine looks weak and unhealthy, but some are in better condition. As the fly attack is serious and persistent, washing must be continued, or the results will be disappointing.

LAMBERHURST.—A large proportion of the bine is weak, and grows very slowly. The heavy crop of last year appears to have almost exhausted the roots, and this, added to the sharp attack of aphis blight, from which all the gardens are now suffering, makes the probability of a full crop very remote.

TEYNHAM.—Though the gardens are all infested with fly the bine is generally strong, and is giving signs of healthy growth. The backward bine is being stimulated by the rain where the land has been properly cared for.

BRENCHLEY.—Unless the condition improves very soon, there can be but slight prospect of even an average crop. Vermin is most persistent, and does not yield to repeated washing, and mould has appeared in some places.

CANTERBURY.—Dry, warm weather is now needed, as the state of the ground renders necessary operations very difficult, and the increase of blight calls for perseverance in washing. The appearance of mould also creates further anxiety, although recent rains have strengthened the bine, and growth is very perceptible during the last week.

MAIDSTONE.—The bine is growing rapidly, and looks fairly well in most gardens in Mid Kent, although the young shoots are still covered with fly, which return apparently undiminished by copious washing. All the plantations now require warmer weather, and if this does not soon arrive our outlook cannot be satisfactory.

WORCESTER AND HEREFORD.—In the best cultivated yards the bine is making rapid progress, despite the increase of aphis blight, which is everywhere evident. Washing is now general, and must be persisted in, or the condition of the plants would soon become very serious. The effects of the sharp attacks by wireworm and flea in the spring are seen in the weakness and backwardness of some yards.

A General Survey.

of the information before me induces me to conclude that, while the present condition of the English plantations is sufficiently risky to create anxiety and to arouse every grower to action, there is thus far no permanent injury, and if we are favoured with suitable weather during the next two months, we may anticipate a crop somewhere about the average, which may be set at 7cwt. to 8cwt. per acre, or about 350,000cwt. for our total. Such a yield will be quite sufficient for the market, and should remunerate planters, as, if quality is good and the hops are well managed in the kiln, the market of 1900 will probably be much more satisfactory to my country friends than they have experienced for some time past.

In the Borough.

the demand was quiet during the early part of the week, but inquiries are again numerous today (Saturday). Though prices have not been tangibly influenced by the unfavourable news from the plantations, a strong tone of firmness is maintained, and the tendency of the trade is certainly in favour of holders. The amount of business done during the past month or so must have reduced stocks to a considerable extent, and have brought them into so small a compass that their capacity for supply for the next two months can be fairly estimated. I hold the opinion (which is supported by the views of several hop traders) that all the sound hops now in hand will be disposed of before the new growth is available, and that if holders are firm in demanding advanced prices, they will be able to realise them. There is no evidence of speculative buying, as merchants operate only from hand to mouth, their purchases being in proportion to their sales. There is some advantage in this state of affairs, as thereby the market is kept steady, and we are able to gauge the actual requirements of consumers more correctly. Growers who have hops to sell, should therefore carefully watch the transactions of each week and shape their course accordingly.

A Rumour is in the Air

that the attention of certain capitalists is being directed towards our present position, and I am informed that it is not unlikely that we shall hear of a clean sweep being made of all unsold hops of good brewing quality, by which process the small remaining stocks will be concentrated, and their value raised by the complete control which will thus be established. I cannot vouch for the correctness of this information, but it is not improbable that advantage may be taken of the favourable opportunity now presented. I have long ago pointed out the possibility and advisability of such action, and have urged growers themselves to imitate it. If, however, they decline to do so, I hope that outsiders may step in to accomplish the same result.

It is gratifying to hop growers to know that

The 14th Battalion of Imperial Yeomanry,

commanded by our President, Colonel Brookfield, has been doing good work in South Africa. In the course of an action near Kroonstad, reported on June 11th, Surgeon Captain Vidler, of Rye, who is on the Battalion staff, was unfortunately captured by the enemy, and although it was expected that his imprisonment would only be temporary, no further intelligence has since been heard of him. Colonel Brookfield himself was all right a few days ago, a telegram having then been received from him to that effect. He had the satisfaction of leading his command to the relief of Colonel Bullock, when the latter was surrounded the other day by the Boers at Honing Spruit. Our Colonel has been promoted to the command of a Brigade, and we may safely assume that this step has been given him in recognition of valuable service, which we were all confident he would render when opportunity offered.

Foreign Notes.

Nuremberg.

The diminution of stocks in the hands of dealers, and the practical impossibility of obtaining further supplies, naturally limit the volume of business in the markets. But there is sufficient enquiry to make it quite clear that all the hops at present available will be exhausted before the new crop arrives. Brewers are fully aware of the position, and are willing purchasers of any lots that meet their ideas of quality. But their choice is now much reduced, and as holders are not anxious to sell, values of all kinds are gradually increasing. It is confidently expected that an important upward movement will shortly be developed, and that the opening of the trade in the new growth will be marked by extensive operations at much higher rates than the present currency.

Recent Quotations

may be approximately given as follows:—Marktwaare, 80s. to 100s.; Alsace, 90s. to 105s.; Baden, 100s. to 110s.; Wurtemberg, 105s. to 115s.; Hallertau, 110s. to 120s.; Wolnzach, 115s. to 125s.; Spalt, 125s. to 135s.; Saaz, 145s. to 155s.

The New Growth

has profited by the showers, alternated with sunshine, which have recently visited the plantations. The backwardness and weakness of the bine, which was general a short time ago, have to a great extent disappeared, being replaced by strength and vigour, which promise well for further development, although it must be admitted that the plant as a whole is yet in arrear of its normal growth at this period, and still requires all the help that favourable climatic conditions can afford.

Spalt (Bavaria).

Weather having improved since the beginning of the month, there is perceptible development in most hop grounds. The young shoots were attacked in some places by flea, and much of the foliage is perforated by these pests, but most of the bine is growing well, and a good yield is anticipated.

Hersbrucker.

The bine has grown fairly regular, and is climbing the poles at a rapid rate. High winds have hindered tying, and rain is much needed.

Aischgrund.

The condition of the plants is generally good, the bine being well advanced by recent favourable weather. Some grounds have suffered from the ravages of flea, and are consequently rather backward.

Wolnzach.

The growth is progressing well, owing to the genial influence of warmer weather. The attacks of flea have now ceased, and no other insect hindrances have as yet appeared; therefore the plants are healthy and the prospect is fairly good.

Au (Lower Bavaria).

The hop plant seems to have outgrown the checks caused by the cold weather in May, and the attack by the flea. The condition is now generally satisfactory.

Kindinger.

There is much variation in this district. Some of the plants are very backward owing to the flea pest, which was very severe, but in other grounds the bine is growing strongly, and presents a healthy appearance.

Wurtemberg.

Much damage was done in the early stages of growth by the persistent attack of flea; consequently the plantations are far from uniform in their present state, but the warm weather is doing much to remedy the evil, and the general condition is improving daily.

Siebenburgen.

A good yield is promised, if there should be a continuance of suitable weather. The plants stood the winter well, and the spring cultivation was not delayed. The bine is sound, the foliage of good colour, and no vermin has thus far appeared.

Upper Austria and Styria.

The plants are somewhat backward in their growth, in consequence of the long continuance of cold, wet weather. They have not made normal progress, and their development appears to be very slow. Fortunately, there is no disease, insect pests being absent, but there is much need for more congenial atmospheric conditions.

Belgium.

The hop market remains exceedingly firm for 1899 growths. Alosts are now quoted and sold at 63 to 65 francs per 50 kilos (51s. to 52s. 6d. per cwt.), and holders are not pressing thereat, as they are looking for still higher prices as the summer progresses. Offers are being made for the coming crop at 72½ to 75 francs, but growers are not at present disposed to contract at these figures.

Although the plantations give evidence of progress during the past fortnight, the weather having been helpful to the growth of the bine, their general appearance is not by any means satisfactory, as much irregularity is apparent, and the plants are still in arrear of the usual condition for the season. They are also hindered by the presence of the aphis blight, which is causing great anxiety amongst growers, who, being mostly of the smaller or peasant class, have not the means of applying remedies which are used by men with larger capital. It is hardly expected that an average yield will be gathered this year.

America.

There is not much tangible improvement in the hop trade in New York, although a slight enlargement of demand has given a firmer tone to the market. The receipts of hops at New York from September 1st, 1899, to June 5th last totalled 102,549 bales, compared with 142,575 bales during same period last year. Exports to Europe have fallen from 102,332 bales in 1898—1899 to 43,377 bales this season, while imports have more than doubled. These figures demonstrate that there could not have been an excessive production last year, and point to the possibility of a complete clearance of old stocks by the time the new crop is brought forward.

Concerning the Present Growth

I have but very limited information. The old yards in New York State are reported as showing signs of weakness, but the younger plantations appear to be coming on fairly well. Much depends on the cultivation. Where attention has been given to it, good progress in the plant is evident, their strength having been assisted by recent rains. A report from Cobleskill says that an annual large acreage has been ploughed up, and growers are so much discouraged by their unprofitable experience of late years that they refuse to pay the advanced prices now demanded for twine and other necessaries, and that consequently many yards will be entirely neglected. I have no further news from the Pacific Coast districts, but have reason to believe that general good progress is being made, and that the present prospect of the probable yield is sufficiently favourable.

From the Plantations.

THE FARLEIGHS.—There is a decided improvement in the look of the bine, notwithstanding the present ungenial weather; hot sun is much required. There is less vermin than there was, but still there is too much hanging about to be pleasant, and mould may appear at any time; in fact, spots can be found now, and it will be very dangerous to sulphur. The bine grows but very slowly, and the healthy grounds do not make the growth they ought to this time of year. Unless we get a hot July and August the crop must be a short one.—June 30th.

(*For Hop Market Reports, see pages* 15, 17.)

* *All official reports and notices of the National Association of English Hop Growers will be printed in the* MARK LANE EXPRESS, *which will also contain all current information likely to be of interest and benefit to the members of the Society.*

BARLEY AND MALT.

By Hordeum.

Crops at the Royal.

The Royal Show at York possesses a melancholy interest, as it has practically settled the question of the proposed cessation of the existing arrangement of showing. To many people the annual show is the chief end and aim of the Royal Agricultural Society, and for such a delusion the action of the executive of the Society is chiefly to blame.

To anyone carefully noting the steps now being taken as they follow one by one, it is evident that a very large proportion of the members are lethargic and apathetic, whilst a small minority is active and working for a set purpose.

Is that aim for the good of the Society and of agriculture in general?

It seems a pity to have to refer to the matter in such a manner that the question is raised, but the responsibility rests with those whose action causes the query not with the critic.

Frank Criticism of the Society

must not be confounded with condemnation of the officials, permanent or otherwise.

A very grave change in the general conduct of the most prominent feature in the Society's action has been proposed. This is now generally understood to be accepted if not irrevocably fixed, but in such a way that the opinion of the members has not been taken. Many, indeed, are found to complain that no attempt has been made to ascertain the real opinion of members, and much dissatisfaction is expressed that the opportunity was not offered at York of free discussion.

To practical men it seems incredible that so grave a point should be determined piecemeal. It is first settled after singularly inadequate discussion, that the time-honoured practice of showing in carefully selected centres shall be abandoned. It is now under consideration if the new practice shall be located in the Provinces or in the Metropolis, but as to the nature of the new practice, as little seems to be known as of the suggested centres (if any) or the

Frequency of Occurrence

or period of the year during which the show or shows shall be held.

With permanent buildings and offices at a fixed point it would be very undesirable to continue holding one show a year only, and the sad onesidedness of the Society's action must most certainly disappear. It is very curious that with a Society so alive to the importance and value of competition that arable cultivation of land has not had the stimulus of full shows and varied but rich prizes offered to corn and corn-growers. Improvements in grain involve the application of the best rules and practices of agriculture generally, and from every point of view are fully as important as any of the matters now approved and encouraged by the Society.

It is probably impossible to ascertain how far the neglect of barley growing by the Society contributed to the falling away in numbers of visitors to the show at York.

Our greatest Barley County

is occupied by a large class of most intelligent farmers, to whom successful barley culture means a great deal. It is quite obvious a good many of these kept away from the show, as did also numbers of others who would have attended had there been something to learn about improved barley culture other than the things shown by the various seedsmen who held stands.

All this points to the necessity for the show to embrace grain on a liberal basis. The absurdity of an agricultural show of almost any type ignoring cereals would have been manifest to everyone long ago but for the pernicious example of the Royal. As it is now considering the desirability of adopting a new policy and improving practices, on of the most useful and necessary reformations it can possibly effect will be the fullest utilisation of its great power for effecting good to the sundry sections depending upon grain-growing.

There are many reasons both natural and artificial why

Barley-growing should Flourish

in Great Britain. The downward tendency of prices is a distinct disadvantage, which can only be combated by the growth of first-class barleys fit for the maltster's use. This is a national industry in which we ought never to be beaten excepting in those rare seasons when the elements are against us.

Thoughtful men tremble to think of what will happen to us the next time we meet with a distinctly bad season. It is disheartening, as it is, to find that even in such a season as the one just ended the price has had so persistent and uniform a drop of nearly half-a-crown a quarter. It is quite certain that when so large a proportion of the grain marketed is fit for malt that the average price ought not to fall under 25s. per qr. Yet that figure has only twice been reached since February last. Naturally the average prices are affected by the ratio of grinding to malting sorts, so when we get a large proportion of inferior grain there will be a fall which will bring out the dangers of the whole position in an alarming manner.

One of the chief bulwarks against this danger should be its recognition forthwith by the Royal Agricultural Society.

FRANK RICHARDSON AND CO., successors to J. TOPHAM RICHARDSON BROS. AND CO., Importers of Selected Foreign Malting Barleys, 6, Duke Street, Southwark, London, S.E. Telegrams, "Escourgeon, London." Telephone, 787, Hop, London; and at Liverpool and Burton-on-Trent.—[ADVT.]

LITERARY NOTICES.

"The Reclamation of Land from Tidal Waters," a handbook for engineers, landed proprietors, and others interested in the work of reclamation, by Alexander Beazeley, M.I.C.E., has just been issued by Messrs. Crosby Lockwood and Son, 7, Stationers' Hall Court, Ludgate Hill. The author states in the preface that it was contemplated to issue a new and revised edition of the late Mr. John Wiggins's book (which is now out of print) on "The Practice of Embanking Lands from the Sea"—the most important work in English dealing exclusively with that subject published since Dugdale wrote—but that in view of the extensive alterations of the text needful in order to bring it even fairly into line with present knowledge and practice, the publishers invited him to prepare a new work, which while retaining such of the matter in the former one deemed to be of permanent value, should bring the subject thoroughly up to date, and be of a severely practical character. The result of the author's labours is an octavo book of some three hundred pages, containing much information on the subject. It is published at half a guinea nett.

At a very opportune moment Sir Walter Gilbey, Bart., has written a book on "Small Horses in Warfare," in which he puts forward some facts which go to prove the peculiar suitability of small horses for campaigning work which requires animals of staying power, hardiness, and independence of high feeding. Sir Walter Gilbey makes some remarks on the horses used in the Crimean war, and on the ponies of India, Northern Africa, Morocco, Eastern Asia, Australia, America and Texas, and in the Soudan; whilst he describes the post horses of Siberia and the war horses of the future; but perhaps the most important chapter of all is that in which he gives some sound and practical advice on the breeding of small horses. Sir Walter points out that we possess in England foundation stock from which we may be able to raise a breed of small horses equal to or better than any that we are now obliged to procure from abroad. The book, which is nicely illustrated and bound, should be in the hands of all horse breeders and others interested in the subject. Messrs. Vinton and Company, Ltd., 9, New Bridge Street, London, E.C., are the publishers.

From the Government of India Department of Revenue and Agriculture there has come to hand a large volume of about seven hundred foolscap pages of tables showing the trade carried by rail and river in India in the official year 1898-99 and the four preceding years. It is compiled under the supervision of the Director-General of Statistics, and is published at the office of the Superintendent of Government Printing, Calcutta.

The Royal Lancashire Agricultural Society's Journal for 1900 has just been issued. The greater part of it is taken up with a list of the awards at last year's show, and the list of prizes for the exhibition to be held at Rochdale on July 26th, 27th, and 28th. The Council's report for the year ending October 31st last is given, and also the Adulteration Inspector's report for 1899. He states that he submitted 90 samples of butter and margarine for analysis, and obtained 74 convictions (two of which were for fraudulent excess of water in margarine, viz., 19 per cent. and 21 per cent.) out of 78 prosecutions. A list of the names and addresses of shopkeepers, the county analyst's report of analysis, and the result of the prosecution is given. The Journal also contains an interesting account of Lancashire farming in 1899, a paper on "Variations in the Composition and Feeding Value of Purchased Feeding Stuffs," by Alfred Smetham, F.I.C., F.C.S., and an article on "The Art of Butter-making," by Frederick J. Lloyd. There are seven capital portraits of the horses and cattle which won the principal special prizes at the Society's last show.

A paper on "The Relation of the Ash to the Height of Plants," by Messrs. E. J. Mills, D.Sc., F.R.S., J. Imrie, A.I.C., and Archibald Gray, which was read before the Philosophical Society of Glasgow, has now been published in pamphlet form by the Society mentioned.

The annual report of the field experiments carried out by the Agricultural Department of the University College of Wales, Aberystwyth, during 1899, has just been issued. It was written by Mr. J. Alan Murray, B.Sc., Lecturer on Agricultural Chemistry, and Mr. T. H. Middleton, B.Sc., Lecturer on Agriculture, who conducted the experiments.

We have received a copy of a pamphlet entitled "The Revival of British Agriculture," which is a reprint of the discussion which appeared in the *Echo* (London) on a letter written by Mr. Thomas C. Read.

The Technical Instruction Committee of the East Sussex County Council have published a report on the valuation of manures, based on the analyses and unit value, written by W. J. Malden, Principal of the Agricultural and Horticultural College, Uckfield. The report is in the form of a pamphlet consisting of some twelve pages, and a copy can be had on application to Mr. Malden or the Organising Secretary for Technical Instruction, County Hall, Lewes, Sussex.

A translation by W. Arnold of the Maritime Code of the German Empire has just been published by Mr. Effingham Wilson, 11, Royal Exchange, E.C. It is a neatly printed and bound work of about two hundred pages, and is published at six shillings nett.

Mr. Effingham Wilson, of 11, Royal Exchange, E.C., has lately published "Food and Drugs," which is a manual for traders and others, being a consolidation of the Sale of Food and Drugs Act, 1875, Sale of Food and Drugs Act Amendment Act, 1879; Margarine Act, 1887, and the Sale of Food and Drugs Act, 1899. The compiler of the work is Mr. Charles James Higginson, of the Inner Temple, barrister-at-Law, who has taken the Act of 1875 as a basis, and the provisions of the subsequent Acts he has embodied in it, so as to show at a glance in how far they modify or enlarge its operation. In the introduction there is a short summary of the more important provisions of the Act of last year, whilst the four Acts are printed *in extenso* at the end of the book, as well as the general orders issued by the Local Government Board regarding the registration of manufactories and premises and the regulations as to competency of public analysts. The work, which is published at 2s. 6d. net, should prove a most useful one to all who are in any way affected by the Acts mentioned.

There has just come to hand a copy of the fifteenth statistical report of the Agricultural and Commercial Department, Tokio, Japan, for 1900. It is rather a bulky volume, and is printed in Japanese.

We have received a copy of a pamphlet entitled "Agriculture in Canada," written by William Saunders, LL.D., Director of the Canadian Experimental Farms. This pamphlet, which gives some interesting facts, accompanied by illustrations, concerning farming in Canada, is being distributed at the Paris Exhibition, by the direction of the Canadian Commissioners.

Agricultural Imports.

The following is an account showing the quantities of certain kinds of agricultural produce imported into the United Kingdom in the week ended June 23, 1900, together with the quantities imported in the corresponding week of the previous year :—

	1899.	1900.		1899.	1900.

Outbreak of Anthrax near Inverness.—An outbreak of anthrax has occurred near Inverness. Four Highland cattle were missing from the farm of Balvonie, Leys, tenanted by Mr. Alexander Cameron, and in course of a search their dead bodies were found in a wood near the farm. Mr. Logan, V.S., examined the carcases at the request of the authorities, and he has reported that the animals had died of anthrax. The bodies were immediately destroyed by fire, and Mr. Cameron's herd has been isolated.

Visit of Agricultural Students to Lord Wantage's Farms.

About thirty students of the Agricultural Department of Reading College, accompanied by Mr. Douglas Gilchrist (Director of the Agricultural Department), Mr. P. Hedworth Foulkes, Mr. Frank P. Walker (Agricultural Department), Dr. Luxmoor (Chemistry), Mr. M. Benson (Dairy Institute), etc., paid a visit to the farms of Lord Wantage, at Lockinge, on the 22nd ult. The day was fine and bright, and the students had a most pleasant time of it, and they doubtless saw and heard much that should help them in their study of agriculture.

The party was met at the station by Lord Wantage and his farm steward (Mr. C. H. Eady), and were first conveyed to Grove Wick, close to the station, where some two-year-old horses and "Elephant" cattle were inspected. At Grove Park, a broad expanse of pasturage, a herd of over 100 fine Hereford beasts engaged the attention of the company. Mr. Eady answered questions respecting the cost, keep, condition, and worth of the animals. It was explained that the water from the soil on this spot was salt, so that the cattle were supplied by Wantage Waterworks Company from the chalk hills three and a half miles away. On the way through the park some more Shire horses and store cattle were examined. Herds of cattle could be seen scattered in different meadows. A fine group of bullocks feeding on excellent pasturage came in for inspection, and descriptions were given by Lord Wantage and the farm steward. Continuing the drive through meadows full of fine crops of mowing grass, the party soon reached Ardington, around which place, in the meadows, horses, foals, and cattle were feeding. Here are a number of labourers' cottages, and also covered yards and feeding stalls, where the cattle are kept in winter. Situated in the midst of a range of grazing meadows, the boxes, although empty during the summer, sometimes serve for the shelter of young foals when there is promise of a wet night. Towards Ardington exceptionally fine crops of corn and roots were seen.

Reaching the village, where they were joined by Lady Wantage, the party entered a field just above the Shire horse stables, where, peacefully grazing with their foals, were the magnificent mares Buscot Queen, Tatton Flower, Blackpool Breeze, Forest Queen, Blush Rose, and Bounce. These animals were very much admired. In an adjoining meadow a magnificent yearling, Forest King, son of Forest Queen, by Lockinge Manners, came in for admiration. It was a handsome animal, and took second prize at Northampton Show, where several offers of £500 were refused. The handsome mare Blythwood, by Gilda Rose, which took third prize at Winchester recently, was also admired. Passing to the stables, the company took a hasty look round. Buscot Park, a most noble animal, with proud bearing, was brought out in the yard. The last animal brought out was the famous Prince William, which was for so many years the champion Shire stallion of England, and which finished his show-yard career by winning the gold medal given by the Queen for the best animal of the Shire horse breed at the Windsor Show in 1889.

Leaving the stables, adjoining which are the estate works, where a large number of hands are employed and a steam-saw was humming through a massive tree, the party next inspected the stores and the dairy, and then drove to Lockinge House, the beautiful home of Lord and Lady Wantage, which is just now surrounded with a wealth of foliage and beauty. Here the party were entertained in the dining-room to lunch. At the conclusion Mr. Gilchrist, in thanking Lord and Lady Wantage, on behalf of the students, for their kind hospitality, said they highly valued the privilege of being able to visit a farm like Lord Wantage's, to see the practical working and co-operation, and to inspect such high-class animals. They had witnessed a practical demonstration of what could be done on a large farm, which would help them to understand it better. They all knew the great interest which Lord Wantage, as President, took in their College, and how much he has done for it. He therefore desired, on behalf of the students, most heartily to thank Lord and Lady Wantage for their kindness. (Applause.)

Mr. A. T. Judd seconded, and the motion was carried with applause.

Lord Wantage, in responding, said they would understand that his object in inviting them to Lockinge was for the benefit of those interested in agriculture, and especially those young people who were preparing themselves for their future vocation in life in the agricultural profession. He very much wished that Reading College had been more kindly understood by the University of Oxford, and that certain men of the College might be able to get into the University. They had not had that support which was was given by the University of Cambridge, which appeared to have realised more speedily than Oxford had done the importance attached to agriculture, and had given it its foremost place in the teaching of this country. (Hear, hear.) For, in his opinion, there was nothing more important than the teaching of agriculture, on which most of the commercial and agricultural greatness of the country depended. Therefore he was pleased to see at Lockinge those who were seeking to go forth into life properly equipped as farmers and agriculturists. He believed that observation through one's own eyes was far more useful than knowledge gained from books. He advised them to acquaint themselves with things, to study the difficulties, and see how they could be overcome. They had practical men in that room. They had Mr. Gilchrist, the head of their staff, and also his friend Mr. Eady. (Applause.) The more they could learn from them the better. He might say without exaggeration that they had that day seen some of the best Shire horses in England. (Applause.) That particular breed of Shire horses was the most paying for farmers and agriculturists to take up. They had seen their merits, qualities, and drawbacks. They had seen their magnificent qualities, for the breeding of which England was specially adapted. They could not walk through the streets of London without seeing those strong horses in drays and vans, as people preferred to have their work done by one horse rather than two. With all the facilities for breeding in England, he would strongly recommend farmers to rear one or two mares and see what could be done. A good breed must have a good hold, and if they could raise such animals they would get a good market for them. £70 or £80 would not be at all an extravagant price. He congratulated the students on their prospects in life, and wished them every success. (Applause.)

After lunch and a walk round the grounds the party took a two-mile drive through waving corn fields to the north side of the ridge of the Downs, where at an altitude of about 700ft. some experiments on Down pasture are being carried out. Several plots were laid off in January, 1896. The object of the experiments is to test how far it is possible to improve pastures on this poor, exposed land by various top-dressings of artificial manures. Another half-mile drive along the breezy Downs, where a magnificent view was obtained, brought the party to the highest point of this elevated spot, where Lord Wantage showed his guests a large reservoir which he has had made at great expense. A large sheet of water 40yds. square and 12ft. deep in the centre, lies between chalk banks, and is pumped up from the valley by a windmill, except when replenished by dew and rain. Pipes and drinking fountains are provided, and 3,000 acres are supplied from this source, all the outlying farms, cottages, and farm buildings being dependent on it. The water is pure and good. The return journey to Lockinge was then made by way of Betterton, where tea was provided. Cheers having been given for Lord and Lady Wantage, the party returned to Reading.

THE GARDEN.

The warm, showery, and very forcing weather mentioned in my last continued up to Sunday last (the 24th), when a heavy storm of wind and rain prevailed all day, and continued during Monday and part of Tuesday. This has knocked about peas, and even potatoes badly in many places, the growth having been very rapid of late. It has also laid the hay rather badly, and will probably render cutting a difficult matter.

We are now past the longest day, and soon—too soon—the evenings will begin to "draw in" again—the forerunner of autumn. The spring work of sowing and planting is, or ought to be, all done now, and most of the necessary operations in the vegetable garden will now be of a routine character. At any rate the "rush" is over, and though there is still plenty to do in this as in other departments the work will not be quite so hard or constant, and already the ingathering of at least some crops is commencing, and this I always think is easier and usually more satisfactory work than the out-putting, or preparing and sowing, or planting operations.

Celery for the main winter and early spring supplies should be planted out at once now, in well-manured trenches. Leeks also ought to go out as soon as possible, as the plants, if sown in good time, will be quite strong enough by this time. There are various ways of planting and growing leeks, but if large and well-blanched stalks of the finest quality are desired, the best way is to set them out in well-manured trenches prepared in the same way as for celery, but scarcely so wide or deep. In these the plants may be placed about 9in. apart, or rather more to obtain extra large leeks for exhibition, etc., but for ordinary purposes two rows may as well be got in each trench as one, and in this case let the rows be 10in. or 12in. apart, and the plants 8in. or 9in. A rather easier way is to draw V-shaped drills about 6in. deep in some good, well manured ground, and put the plants out in the bottom of these at 8in. or 9in. distance. In either case the plants must be earthed up as they grow, in order to blanch the stems, but do not cover the growing point of the heart.

Yet another way is to make holes 3in. to 4in. in diameter, and 10in. or 12in. deep, with a large, blunt dibber, in some good ground, dropping a plant in each, with just enough earth after to cover the roots and give it a start. As the plants grow, fill up the holes, supposing that this does not occur by other means. Some cut off the long, sharp points of the leaves now and then during growth. I cannot say whether this is really advisable or not, but it does not appear to check the growth of the plants in any way. Lastly, however rich the soil, the more liquid manure, etc., they get in dry weather, the finer will the stalks be.

Finish thinning beds of onions, carrots, both of the long and short or stump-rooted kinds, parsnips, etc. Beet should also be ready for thinning by this, and should be left at about 9in. apart. Egyptian or turnip-rooted beet, if sown early, will soon be fit for use. Turnips, too, will need thinning, and more seed should be sown. The plants are growing grandly now, and there is scarcely a sign of the troublesome flea or beetle.

Plant out Autumn Giant and other cauliflowers of this type—the Walcheren is good—for use during the late autumn months; also more broccoli of sorts, savoys, and kale. Brussels sprouts ought to be all out ere this. The others may be planted, in part at least, on the space vacated by early potatoes, as these are dug. More lettuce had also better be planted out for succession, and a good batch of endive also; sow more seed of this last, of both the curled and Batavian kinds.

The potato crop still appears to be unusually late, and the tubers are scarce and dear. Hereabouts the haulm is unusually fine and strong, even where the soil is by no means rich, but so far there is very little in the way of tubers beneath. Warm, dry weather is wanted now for this crop.

THE WEATHER.

MONDAY (June 25th).—The weather was very stormy and unsettled in many parts of our islands, and gales occurred at several places on our west and south coasts. Rain was measured in the morning over the entire country as the result of the fall in the previous twenty-four hours, and in many places the fall was heavy. The weather was generally cool, and in London the highest temperature was sixty-three degrees, or ten degrees below the average. A sharp thunderstorm passed over London shortly after one o'clock in the afternoon, accompanied by a hail squall and a heavy downpour of rain.

TUESDAY (June 26th).—Fine weather prevailed generally over the British Islands, but there was still a great deal of cloud in most parts of the country. The winds were north-westerly and light over the whole of the United Kingdom. Rain was measured in the morning as the result of the fall in preceding twenty-four hours at all but a few of the western stations, but the amounts were small, except in the east of England. In London the day was fine, although the sky was for the most part cloudy, and the temperature did not exceed sixty-four degrees.

WEDNESDAY (June 27th).—The weather was fine over the British Islands, but there was still a good deal of cloud. In most parts of the country no rain had fallen in the preceding twenty-four hours, and the conditions had generally become more settled than of late. The type of weather was anticyclonic, and the barometer readings were fairly high, and had recovered considerably since the previous day. The winds were mostly northerly, and they were everywhere light. The temperatures were rather low during Tuesday night in many parts of the country, and the midday readings were much below the average. The day was fine, but rather cloudy in London, and the highest temperature was sixty-six degrees.

THURSDAY (June 28th).—The weather was fine over our islands, and the air was generally warmer than on several previous days. Slight rain was measured at a few places in the morning, as the result of the fall on Wednesday, but in most parts of the country the weather had been dry. In Great Britain the winds were light and variable. The morning was dull and cloudy in London, but the sky cleared considerably in the afternoon, and the shade temperature rose to sixty-eight degrees.

FRIDAY (June 29th).—Fine weather prevailed over the greater part of England, but the conditions had become unsettled again in Scotland and Ireland, where rain fell in places during the day. The winds had everywhere become southerly, and had freshened somewhat on the west coasts. The midday readings were somewhat low in many places, owing to the prevalence of cloud. The morning was very fine in London, and the sheltered thermometer rose to 71deg., but the sky became overcast in the afternoon.

SATURDAY AND SUNDAY (June 30th and July 1st).—Cloudy weather prevailed over our islands during the two days, and rain fell in nearly all parts of the country. The amounts measured in the morning on both days were large in many places. It was only in the extreme east of England that the temperature on Saturday touched seventy degrees, while Sunday was generally cooler. The wind was everywhere south-westerly, and it blew strongly in places on our coasts. A thunderstorm occurred at Wick on Saturday, and the sky on Sunday was very threatening at times in places. No appreciable rain fell in London, but there was a great deal of cloud, and the temperature for the two days did not exceed sixty-seven degrees.

FARM PROSPECTS.

Denbigh.

In the Vale of Clwyd we have had a long spell of dry weather, so much so that all the crops are suffering. Root crops are about at a standstill, very few turnips having been singled. Those done are making no headway until they get a heavy soaking. The clover hay crops where cut need a continuation of fine weather, while I have

An Exceptionally Heavy Crop

of clover and rye grass on highly manured land which was not grazed during the spring, all up in big cooks, which we started to carry this afternoon, but have been stopped by a heavy downpour, which is much needed by turnips and grass land.

Cattle

are keeping healthy and doing well. Beef finds a ready market at 7d. and 7½d. Store cattle are a slower trade in consequence of the dry and cold season. Sheep have had a most trying winter and spring, and there have been a good deal above the average losses, many deaths from pneumonia, and on the whole it will not be a profitable sheep season throughout the district; 108 of my Shropshire ewes brought 180 lambs.

The Labour Question

is becoming more serious as the harvest advances. Railway companies, the Army, and others are taking many of our men, and in other ways the ranks of agricultural labourers are being seriously seen, so that it is difficult to see where it is going to end. Farming is becoming more troublesome each year, and the patience and forbearance of farmers generally have been put to the severest tests.

Corn Harvest Prospects

are not favourable at present, unless this rain is sufficient to fetch up the crops. Wheat is 20 per cent. less than last year, barley 25, and oats 50. Roots have scarcely made a start; very few singled, and those that are have been quite at a standstill. The same may be said of potatoes, and it will be a long time before any field potatoes are ready for raising. Hay crops on all the drier lands are very short, not more than half a crop.—T. W. B. (June 29).

East Suffolk.

About a week of showery and stormy weather has proved good for our light lands. Barley especially is very promising and roots are flourishing. On the heavy land the rain has been too much. Barley is looking yellow and can hardly recover. Wheat is more independent, but much is not looking well. There is a good plant of roots, but in danger of being smothered by weeds. A good crop of clover has been cut, only to be hopelessly damaged by wet. A little of the early grass and sainfoin has been secured in the last day or two. Plenty of patience is a fine thing for a farmer to be endowed with. Every now and then things unexpectedly come all right, and anyhow he has the same luck and the same weather as his neighbours. Wheat has had a sudden rise in price, but soon down again. Yankee reports seem not to be trusted. The Royal Show did not attract a full number from East Suffolk. The railway companies would do better to put on special trains for the half-crown days rather than invite people into the crush of the cheap days. Wheat is blossoming well, and the wild roses are out, so that it should be about six weeks to harvest. The prospect now is of plenty of labour. Machines are now so common that with the master riding the machine twenty or twenty-five acres a man are talked of as a rule for harvest work.—J. Y. (June 29th).

Mid Staffs.

The month ends under conditions which show a marked improvement in our crops of almost every kind. The rains of June have filled up the grass in all meadows in good condition so much that we are likely to have an average bulk of hay, a thing which seemed improbable a fortnight ago. It is true that we are beginning to cut our seeds and grass at a period later by some ten days than has been usual of late years; but, as the seed-bearing grasses are as late comparatively as the undergrowth, the quality of the hay, if saved in good condition, will be satisfactory. Some of the earlier-sown fields of swedes were so damaged by fly that they are deficient in plant. Their condition appeared almost hopeless before the late spell of showery weather. Mangolds and cow cabbage—the latter being a favourite crop with the dairy farmers of the district—are now doing well. Until the last days of June corn was not only late, but was very slow in shooting. With the warm sunshine which has now come, the ears are making their appearance rapidly. As we are in the habit of reckoning six full weeks between the time of shooting and ripening, it is fair to expect that it will need a plentiful allowance of forcing weather during July in order to have our corn ready for cutting by the middle of August. It is some years since our pastures were as full of grass as they now are.—T. C. S. (June 28th).

Northamptonshire

Unsettled weather still prevails, though in this immediate neighbourhood (Kettering district) we escaped the terrific hailstorms which did such fearful damage in many places. I can truly say that with the exception of winter beans every single corn crop will be

Much Under an Average.

Wheat, which at one time promised well, may be the best (next to winter beans), but barley everywhere here has a sickly hue and a weakly growth. Oats are a very light crop. Mangolds, as a rule, are a good plant, and there is every prospect of a full turnip crop. Clovers have come down very light, and the same remark applies generally to the hay crop. Beef and mutton make a good price, but stores will be very dear.

Wool is Lower

in price than has ever been known, the average at our wool fairs being about 17s. per tod. Certainly there is just now nothing pleasant to say as to agricultural prospects, excepting that about here stock are healthy and doing fairly well.—June 29th.

North Somerset.

Nearly too busy to write. Haymaking, delayed, has now come on with a rush; a few of the early cut pieces are stained, but not much damage done as yet, unless it is rushed in to rick too quickly, and some have done this to have the pleasure of turning. Better spoil in the field than in the rick. Pastures are rather bare considering the rainfall, but the hay crop will be a good one, except on hillsides, where all the finer grasses were killed by last year's drought. Wheat is rather short, but looking well, though it was backward in coming into ear. Oats are badly patched by wireworm, whilst barley is rather late. Potatoes, though late, are strong, whereas mangels are variable, some of the fields being very shardy. Swedes will soon be showing above ground, and, judging by early experiences, the fly is quite ready to receive them. Fruit trees are much blighted, and the pear trees promise to yield a very light crop. Apples, though not over thick on some trees, are very large considering the lateness of the blossom. With farmers busy haymaking, the store trade for all kinds of stock is naturally dull. The only business now that is thriving is that of the implement agent; but, singularly, the run is not on mowers or horse rakes, but on haymakers and swath turners, orders for 103 of which were booked in the Bath Showyard. Elevators of the less expensive kind are also much in request. It will be noticed that the run is on essentially labour-saving appliances. Wages, considering the scarcity of labour, are not over high, ranging from 20s. to 22s. per week, with cider, for the harvest quarter of thirteen weeks.—North Somerset.

North Wilts.

Cost of Haymaking.

In this district, which consists principally of pasture land, the beneficial showers have had the effect of producing a most excellent crop of grass, but of late have much hindered its conversion into hay. Hands are scarce, and the price of labour has increased so much as to render it an expensive affair, and but for the ingenious labour-saving machines, which are now so much in use, the process for all of it would be next to impossible. The writer can remember when there were a few farms without any of these appliances in this district, the work being all done with the fork and rake; but in those days labour was plentiful and cheap, but the more elaborate process then was somewhat expensive. According to a record presented as to the cost of a little over ninety acres on a farm in this district, the expense in 1817 of mowing, haymaking, and ricking (also including beer) was £94 16s. 10d.; in 1820 it cost £84 10s., and in 1821 £105 5s. 6d. As might be expected in such an abundance of keep and cool weather, stock of all kinds, whether dairy, grazing, or store, have done surprisingly well, but the prices have been somewhat disappointing as regards beef; still, altogether there is much to be thankful for. The cereal crops do not appear to be equal to those of the last two years. There is a most wonderful crop of apples in this district, and a fair quantity of other fruit.—W. F. P. (June 29th).

Shropshire.

Weather fine, but cloudy. After the showers and the sunshine, some growing weather. Yet the crops are rather disappointing, but may pluck up yet with more heat.

West Cornwall.

Owing to a cold spring and so much rain in June all crops are late. Wheat is looking fairly well, but below the average. Oats and barley are all right, and the straw will be a big crop. Hay is a fair crop, but not heavy. A lot has been out in the rain for a fortnight, and the quality will be bad. Farmers are now very busy cutting, and a few days' hot sun are badly wanted to save it. Beef selling very well, 58s. to 60s. per cwt. The early potato crop is about finished; crops have been fairly plentiful and prices good. On the whole, it has been a good season. Most of the broccoli are planted. The fruit crop is late, but a fair yield all around. Strawberries are in full swing, and prices are fair. Gooseberries are a drug in all markets. Apples and pears are a good crop.—F. C. (June 29th).

York.

The tropical heat and drought of a fortnight ago have been succeeded by a series of thunderstorms, copious rains, and cooler weather. Crops have improved, and harvest prospects, so far as can be judged at this early date, are very promising. Turnips have had a trying time, but, on the whole, they are doing fairly well, though there has been extensive resowing. Potatoes are coming up strong and healthy.

Prices of beef and mutton have been good, but have fallen off a little of late, particularly the last-named. Grain is still low. There is not much wheat in farmers' hands, and the recent rise has only as yet (June 27th) affected local markets to the extent of 2s. per qr.

Many are discussing the attendance at the recent Royal Show. The consensus of opinion is that the society has failed to adapt itself to the times, and is out of touch with its members. No misgivings are felt as to the attendance at the coming Yorkshire Show.—W. P. (June 27th).

Foreign Prospects.

France.—At the weekly Paris market, the opinion was expressed that a remarkable improvement has taken place in wheat crop prospects during the past fortnight.

Holland and Belgium.—Crop prospects, in the main, are regarded with satisfaction. The markets have moved in sympathy with American fluctuations.

Germany.—Weather lately has been propitious and crop prospects are better. After considerable activity the markets of Berlin, Hamburgh, etc., have become quieter, for, supplies being ample, there is no special object to be gained in providing for autumn requirements before they can be ascertained.

Hungary.—The wheat crop, with slight exceptions, presents a favourable appearance, and a good harvest is expected. After responding to the rise in foreign markets, wheat, at Budapest, became easier, in consequence of large offerings.

Spain.—The condition of the wheat fields continues to be very favourably spoken of, and cutting will soon begin in the southern latitudes. The barley crop is yielding better than was expected.

Italy.—During the last ten days the weather has been favourable to agriculture, and the condition of the crops has much improved. Wheat, generally speaking, has a promising appearance, and reaping has begun in many localities, while the harvesting of barley and oats is in full progress. The maize fields look in satisfactory condition.

Roumania.—Wheat cutting will begin next week. Recent rain has improved the cereals in Upper Moldavia. The appearance of the crop is said to be fairly good. Rye will yield a middling result.

Russia.—Advices from Southern departments indicate crop results as likely to exceed the average. Weather continues moderately warm and favourable.

United States.—The *Cincinnati Price Current* says the spring wheat crop will not be over 200 million bushels, and possibly somewhat less. The winter wheat crop indicates a total yield of 350 million bushels. The reserves now equal those of a year ago. These reserves, with new crops, will furnish a quantity equal to the past year's consumption and the exports. The world's wheat crop will practically equal last year's production, and will be 5 per cent. over the five years' average.—*Dornbusch.*

Scottish Chamber of Agriculture.—A meeting of directors of the Scottish Chamber of Agriculture will be held within No. 5, Saint Andrew Square, Edinburgh, on Wednesday, 4th inst., at 10.30 a.m. The agenda is as follows:—(1) Agricultural Holdings Bill: letters from Mr. Long and other members of Parliament. (2) "Louping ill": letter from Mr. C. J. Grieve. (3) Letter from Mr. J. M. Martin, of Auchenlearan. (4) Evidence before Agricultural Returns Committee: report by witnesses. (5) Agricultural Seeds Committee: witnesses. (6) Damage by sparks from railway engines: letter from Mr. J. B. Young. (7) Importation of cattle at Liverpool: letter from Mr. C. Rintoul.

CORN MARKETS.

LONDON.

Mark Lane, Monday.—Malt: We continue to have a slow trade. Barley advanced 3d to 6d per qr. Wheat was 4s per qr dearer on the week. Oats made 6d per qr more money. Maize improved about 1s per qr. Flour, 2s to 3s per sack dearer.—NIXON, GOWER AND CO.

Mark Lane, Wednesday.—Home-grown wheat now comes up in rather better supply, and the quality continues all to be desired, but sales were found difficult to effect, even at a decline of 6d since last Monday. Fine white, 33s 6d, and good heavy red, 32s 63lb delivered. American descriptions 6d to 1s easier during the above period, without inducing operators. No. 1 Northern Spring quoted at 34s ex ship, 35s landed. No. 1 hard Manitoba, 34s 6d; and hard Duluth none offering. Although holding for same, sellers of flour were rather more inclined to entertain consumers' views and accept rather less money, in order to induce business. The London Millers' Association kept prices at last Monday's advance. Grinding barley steady, with attention still centred upon Persian, Black Sea being seemingly unobtainable, and American very scarce. Maize rather easier since last Monday, but the supply is kept down.

Mark Lane, Friday.—Country millers take most of the English wheat on offer, very little being submitted here to-day, with only a slow trade passing. Quotations were again reduced 6d, making the decline 1s 6d from the recent highest. Fine white, 33s; and good red, 32s 6d per qr 63lb, delivered. American descriptions shared in a further reduction of 6d, but holders were not pressing. The flour market was again less regulated by sellers while ruling 6d lower. The London millers kept quotations at last Wednesday's advance. Town household, 26s 6d; whites, 29s 6d per sack. English patents quoted at 25s 6d to 27s 6d; whites 23s 6d to 24s 6d; stone, 21s 6d to 22s 6d. American first patents, 27s 6d to 28s 6d; second ditto 24s 6d to 25s 6d. First bakers, 22s to 23s: and second, 19s 6d to 20s 6d. Hungarian up to 31s per sack. Australian nominal. Among feeding stuffs, grinding barley unaltered, and Persians still forms the chief source of supply, with Black Sea unobtainable. The supply of maize is still kept down, and the present situation favours holders, a rather steadier tone pervading flat. American mixed held for 21s ex ship, and 21s 6d landed; Odessa, 25s 6d landed. Beans and peas remain featureless markets. Egyptian splits, 20s 6d ex mill; Mazagans, 20s landed. New Zealands, 32s 6d to 33s 6d ex store, 504lb. Of peas, Maples, 35s to 36s, 504lb ex store, and Canadian white 29s 6d ex ship, and 30s ex granary. The supply of maize germ meal is now in a very small compass, and holders remain indifferent. American, £4 17s 6d ex mill; English, £4 15s per ton, ex wharf. Arrivals of grain this week: English and Scotch: Barley 800; oats, 210; beans, 180 qr. Foreign: Wheat, 37,020; oats, 126,760; peas, 3,200; beans, 490; maize, 4,660 qr. Flour, 78,460 sacks.

COUNTRY.

Ashford, Tuesday.—Wheat rose pretty well 4s more, and white samples were quoted at 32s to 34s, and red at 30s to 33s per qr. Maize was also dearer on the week, flat corn making 23s to 24s and round 27s to 28s per qr. All other sorts of corn remained without change, and the amount of business passing was very small.

Aylesbury, Saturday.—The wheat trade ruled slow, and prices were not so good by 1s per qr. All other articles without change in price. Wheat, 28s to 30s per qr.

Boston, Wednesday.—A small show. Wheat, 30s to 31s; grinding barley, 24s 6d; oats, 20s to 22s; beans, 31s; maize, 23s. to 25s; flour, 22s to 28s.

Bristol, Thursday.—There has been rather more trade since our last, but there was little business at to-day's market, the attendance small, farmers being busy haymaking. There was little English wheat offering, 2s to 3s advance being asked by dealers, which prevents business. Foreign 1s to 1s 6d higher. Grinding barley and round maize without change. Flat maize and oats 3d dearer. Flour 2s 6d dearer.—GRACE BROTHERS.

Cambridge, Saturday.—During the week the wheat trade has been irregular. Farmers are unwilling sellers and supplies are very limited. The weather is very unsettled, and haymaking is protracted. At this market to-day there was only a small supply, and farmers held out for higher prices. A small business was done at about 1s over last Saturday's rates. Red wheat, 20s to 31s; and white up to 32s per 504lb. Oats firm. Beans 6d. dearer.

Chester, Saturday.—There were few samples of English grain offered at this market. The increase in wheat was again maintained, but oats and beans were quiet. Quotations:—Wheat, white and red, 4s 4d to 4s 6d per 75lb; grinding barley, 3s to 3s 6d per 64lb; beans, 4s 8d to 5s 6d per 80lb; oats, new, 2s 8d to 2s 11d; old, 2s 9d to 3s per 46lb; Indian corn, 10s 9d to 11s 9d per 240lb.

Chichester, Wednesday.—There was again a very short supply of wheat, and though prices have dropped from the highest point, a rise of from 2s to 3s per quarter on the week was recorded. Flour also moved upwards in sympathy with wheat. Feeding stuffs met a quiet trade at unaltered prices.

Colchester, Saturday.—Very little wheat offering, and the market was firm at fully last week's prices. Beans, peas, and oats scarcely offered, and rather more money obtainable.—FRANCIS AND CO.

Dorchester, Saturday.—There was less buoyancy in the wheat trade, in which there has been a marked reaction since last week, accompanied by a corresponding decline in prices. Other articles underwent but trifling change.

Glasgow, Wednesday.—Wheat held for fully 1s advance, but the demand is slow. Flour from 2s to 2s 3d per sack more money asked. Indian corn met a fairly good demand at an advance of 1½d per boll. Canadian peas held for 3d advance on spot and to arrive. Grinding beans firm and 1½d to 3d dearer. Canadian oats unchanged, but held for 3d advance for shipment. Barley, oatmeal, and home oats firm but quiet.

Glasgow, Wednesday.—Wheat held for fully 1s per boll advance on the week, but the demand is slow. Flour from 2s to 2s 3d per sack more money asked, but the advance checks sales. Indian corn meets a fairly good demand at an advance of 1½d per boll. Canadian peas held for 3d per boll advance, both on spot and to arrive. Grinding beans firm, and 1½d to 3d per boll dearer. Canadian oats unchanged on spot, but held for 3d per boll advance for shipment. Barley, oatmeal, and home oats firm, but quiet. Bran and thirds firm and unchanged.—GIBSON AND CLARK.

Hereford, Wednesday.—Very few farmers' parcels of wheat on offer. The collapse in the American market caused buyers to somewhat hold aloof, and values are hard to fix. Barley, nothing doing. Oats steady, without quotable change. Maize quotations nominal, delivery being unobtainable in consequence of the dockers' strike in the Bristol Channel. Wholesale prices: Wheat—white, 3s 6d to 3s 9d; and red, 3s 5d to 3s 8d; barley, 3s to 3s 6d; oats, 2s 3d to 2s 9d; beans, 3s 9d to 4s; maize, 3s to 3s 3d; vetches—winter, 4s to 6s; and spring, 3s 6d to 5s.

Ipswich, Tuesday.—Fair supply of wheat. Trade slow, at an advance of fully 3s per qr. Reds, 31s to 32s 6d; white, 34s. Grinding barley firm. Oats, 31, and maize 9d to 1s dearer. Beans and peas firm.

Leeds, Tuesday.—There has been a great deal of excitement in the trade during the past week, with rapid fluctuations of values, but the tendency has been mainly to a higher el. Millers have been less free buyers of wheat than speculators, and although the demand is less pronounced to-day, an advance of 2s to 3s on the week is paid on the business doing. Maize, 1s; beans, 9d; and oats, 3d dearer. Flour has been raised 4s per sack from the lowest point.—DUNNS AND CO.

Leeds, Friday.—There is no further advance in prices of wheat from Tuesday's quotations, which are with difficulty maintained, the feeling of buyers being that for the present top prices have been reached, and that they have nothing to gain thereby in speculation. Flour also remains without change from the late advances of 4s per sack. Peas, beans, oats, maize, and barley firmly held.

Leicester, Saturday.—Small attendance, and only a small quantity of wheat on offer. A fair trade was done at an advance of 1s on the week—reds, 32s to 33s; and whites, 33s to 34s per quarter. Small supply of oats, at an advance of 1s per quarter. Beans 6d per quarter advance. Flour: Superfine, 28s; fine, 26s; seconds, 23s per sack.

Lincoln, Friday.—Small supply of English wheat. Scarcely anything doing. Prices may be quoted firm at last week's rise. Reds, 30s to 31s; whites, 31s to 32s. Foreign wheats 1s dearer on the week. Maize 1s higher. Oats, beans and peas firm.

Liverpool, Friday.—Wheat firm at a decline of 3d to 4d from Tuesday's prices, at which a fair business has been done. Flour is only in small demand at about 1s per sack under last Tuesday's prices for foreign. Maize has had a moderate inquiry at ½d decline since last market day. European and Plate steady at unchanged prices. Barley quiet and little doing for malting; feeding firm at a ½d advance, with a moderate demand. Beans firm, and fully 3d per qr dearer with a fair inquiry. Peas firm but quiet. Oats are firm with rather more doing for English; foreign steady with a quiet trade. Oatmeal firm, but quiet. Oilcake firm, but only a moderate demand at about unchanged prices.—SEGAR AND TUNNICLIFFE.

Maidstone, Thursday.—Our trade to-day at the market was not of an excited character; the advance in wheat during the last week at Mark Lane and various parts has just about put the increased value to-day at 2s to 3s per qr rise from last report. Barley and oats are about as before. Maize 6d to 1s, per qr over previous value. No other alteration of importance in the cost of other grain.

Manchester, Thursday.—Owing to the upset in the States, this market has been very irregular during the past week. To-day's rates for English wheat show that sellers require from 1s to 1s 6d per qr more money, whilst foreign is quoted 4d to 6d more. Flour is firm, indeed strong, at last week's rates, but any advance is unworkable. Foreign oats are ½d per bushel dearer. Beans and peas unchanged.

Newark, Wednesday.—Only a very small show of wheat, farmers asking an advance of 3s a quarter, which buyers are unwilling to give. Oats and beans are scarce, and fine oats are worth more money.

Newcastle-on-Tyne, Saturday.—The holidays this week have had the usual effect on business. To-day's market was fairly well attended, and wheat, which has had a pretty good time of it these past ten days, received a partial check in the way of advancing prices, and at the close lower figures were necessary to meet buyers' views. Flour a shade down. Oats steady—unchanged. Beans and peas nominally the same. Maize remains firm, but not active.—GEO. W. WATSON AND CO.

Newcastle-on-Tyne, Saturday.—English and foreign wheat exchanged hands at 1s per 504 lb over last Saturday's prices. Maize firm at 6d advance. Oats, pease and barley steady at late rates. Beans scarce and 1s per 504 lbs dearer. Flour made 1s per 280 lbs over last week's prices.—JOSEPH POLLARD AND CO.

Northampton, Saturday.—There was but a thin attendance of farmers, and the supply was limited, and demand quiet, at about 30s to 32s. Millers only bought for immediate wants. Flour, 24s to 28s; oats dearer; and beans, 30s to 32s. The impression is that wheat will fall in value.

Norwich, Saturday.—There was a moderate supply of wheat on offer to-day with an upward tendency. The weather still remains dull and unsettled, and bright sunshine is much desired for the hay making which is now in full swing. Wheat, red, 29s to 31s per qr weight, 63lb per bushel imperial. Corn inspector's return for the week ending June 25, 1900: Wheat, 1716 qrs, at 25s 11d.—J. ARTHUR MILLS.

Oxford, Saturday.—Wheat in good demand, at 1s to 2s over last week, 30s to 33s. Oats and beans good demand, at rather more money.

Peterborough, Saturday.—There has again been very little wheat on offer, prices were 6d to 1s dearer than last week but trade slow at the advance. Oats and beans both the turn dearer.—THOMAS HILL AND SON.

Plymouth, Thursday.—The market to-day was fair. Wheat, 34s; maize, 22s 6d; Irish oats, 17s 3d; Libau oats, to arrive, 16s; barley, 21s 6d to 21s 9d, very scarce.—ORLANDO DAVIS AND CO.

Reading, Saturday.—Business to-day ruled very quiet, and where sales took place they were at a still further increase in price than those of the last market, best samples selling at 1s to 2s per qr more money. The supply of wheat was small, and the demand for other sorts of corn also limited.

Shrewsbury, Saturday.—Wheat is generally shooting forth well-formed ears of above the average size, and with favourable blooming time will no doubt produce a good crop of well-developed berries. Three-fourths of the barley is putting out heads of unusual length, and looks healthy and strong, but the remainder is too short in the straw to produce a full crop, and in places the wire-worm has been very destructive. Oats in many instances are very deficient in straw, and at the best cannot but be a poor yield, although they may yet receive every encouragement from atmospheric conditions. Peas and beans look well, and the roots and pastures, when compared with their parched condition at the same time last year, are encouraging to the farmer. Trade has been quiet, and the recent rise in wheat has been partly lost. Oats have remained firm, and for milling offals the demand has been active and prices steady.—W. L. BROWNE AND CO.

Spalding, Tuesday.—Trade was excited, owing to the boom in wheat. There was a very small show of corn, and that sold changed hands at 31s to 32s per qr, which was an advance of 2s to 3s on the week. Farmers having stocks were disinclined to sell, believing that prices will go higher. During the past two weeks there have been 1s and 1s 6d advances in price, and compared with the prices current three weeks ago there has been an increase of 6s per qr. Oats have advanced 1s, selling at 21s 6d, whilst for all other articles more money is asked.

Stockton, Wednesday.—Very few samples of farmers' wheat were showing, and these made 1s per qr advance farmers refraining from offering in anticipation of higher prices. During the week the trade in foreign wheat has been more or less influenced by the reports from America, and as high as 2s per qr advance over last Wednesday was asked, but with quieter advices from America prices were somewhat easier. Oats and maize 6d per qr dearer.

Sunderland, Saturday.—Wheat firm at last week's full prices. Little doing in spring corn. Arrivals coastwise: oats, 400 qrs; foreign nil.—E. AND F. RICHARDSON.

Taunton, Saturday.—Steady trade for wheat, prices about 1s per qr. higher than last week, and very little offering. All feeding stuffs quiet. Very poor market, the farmers of the district being busily engaged in haymaking.

Wakefield, Friday.—Our market is generally quiet to-day. We quote American wheats 2s, and others 6d to 1s per quarter dearer since our last report, and there has been a brisk trade doing during the past week. Maize 6d per quarter dearer, and other feeding stuffs firm.—MICHAEL SANDERSON AND SON, LIMITED.

Wakefield, Friday.—The trade has become very unsettled since Tuesday, being apparently dominated by speculators both in this country and America, and under these circumstances it is only natural that millers prefer to look on until the future is more clearly defined, when wheat can again be dealt in on its own merits.—DUNNS AND CO.

Winchester, Saturday.—Slow trade for English wheat at 1s to 2s advance on the week.—FEAR, COLEBROOK, AND CO., LIMITED.

Wisbech, Saturday.—A short supply of grain. A few lots of wheat changed hands at 1s advance on the week. Red, 30s; white, 31s; oats, 19s to 22s; beans, 31s to 33s.—JAMES FLETCHER.

Wolverhampton, Wednesday.—There was a moderate attendance, and a flat market. Foreign qualities of wheat were 2d lower in price. The following were the quotations:—Oats, 13s to 14s; beans (new), 12s 9d to 13s 6d; beans (old), 14s to 15s per 196lb; flat maize, 21s 6d to 22s per 480lb.

Worcester, Saturday.—Wheat was sparingly offered, and holders asked more money than buyers were prepared to pay. English and foreign qualities sold at a small advance on last Saturday's prices. Flat maize and oats 3d higher; round maize and barley unchanged. Wheat, white, 28s to 29s; red, 26s to 28s 6d.

York, Saturday.—The excitement has about gone out of the wheat trade, and prices are scarcely as good as last week. Fine white wheat realised 29s to 31s., and red and mixed 29s to 30s per qr of 36 stones. Feeding barley, 20s to 25s per qr of 32 stones. Oats rather dearer; white Tartary, 18s to 19s; black ditto, 19s to 20s; and short oats, 20s to 23s per qr of 24 stones. Rye 8d to 8½d, and beans 10d to 11d per stone.

FOREIGN.

The Antwerp wheat market has ruled firm, there having been a regular current of business on consumptive account. The weather during the last few days has been favourable for the French crops, and the wheat ears are now stated to be well filled. There have been occasional rain storms, and these have been highly beneficial. The harvest is about to commence in the Bouches-du-Rhône, the Vaucluse, the Gard, and some parts of the Drome. Notwithstanding the improvement in the French agricultural situation, wheat quotations have hardened upon the French country markets, as earlier estimates as to the American crops are not now likely to be realised. Business in wheat has been quiet at Paris, but holders have secured an advance of 2½d per quintal. Flour for consumption has also been tending upwards at Paris. The Konigsberg wheat market has been quiet and unchanged; at Dantzic, also, business has exhibited a quiet tone. The condition of the Spanish wheat crops is favourable, and harvest will commence shortly in the south of Spain. The Russian provincial wheat markets have presented, upon the whole, a quiet aspect; in the Baltic ports prices have shown little change. Rains have fallen in the south-west of Russia, and the crops exhibit a more promising appearance. The quantity of wheat now en route for Europe is returned at 1,760,000 qrs, as compared with 1,580,000 qrs at the corresponding date of 1899. The total of 1,760,000 qrs representing the quantity of wheat now en route for Europe is made up as follows: France, 445,000 qrs; Belgium, 365,000 qrs; Holland, 380,000 qrs; Germany and the North, 235,000 qrs; and Italy, Spain, etc., 335,000 qrs.

Hamburg, Saturday.—Barley report: There has been a good deal of rain now all over Germany, and in Austria and Hungary it has been unsettled too. Fine sunny days are now rather badly wanted to ripen the crops, the appearance of which so far is satisfactory. In Hungary cutting will commence first part of next month, and will be general towards the end. The result will probably be behind that of last year as regards quantity, whilst quality entirely depends upon the further course of the weather.—FRANCIS M. TH. DUHNE.

Hamburg, Saturday.—We had much rain this week, which, if it continues, will deteriorate our already deficient crops of wheat and rye. Potatoes look well. Animating reports from foreign markets caused holders to raise their prices, but buyers in general acted with caution and hesitatingly followed the advance. The imports during the week amounted to:—5,685 tons wheat; 1,246 tons rye; 4,513 tons barley; 17,743 tons maize. Fine red Holstein and Mecklenburg wheat is held at 30s 6d to 31s 3d; Saal wheat at 30s 6d to 31s per 504lb f.o.b.; fine River Plate, 28s 6d to 29s; Hard Winter 2, 28s to 28s 9d per 480 lb, c.i.f. Hamburg. Rye quiet; spot parcels move off slowly. 60-61 Ka. South Russian floating is offering at 24s per 480lb. c.i.f. The growing crop of barley has benefited from the wet weather, and so far looks promising, but now farmers wish for more dry and sunny weather. There is no business doing in malting sorts, stocks being about cleared. Feeding firm: 60-61 Ka. South Russian floating is held at 19s 9d 48lb; American prompt shipment at 18s 6d per 400lb c.i.f. Hamburg. Mixed maize in fair request; prompt shipments are selling at 20s 3d. July held at 20s 6d, River Plate floating at 26s 9d per 480lb c.i.f. Hamburg.—JOHN TATLOCK.

BUTTER.

Tuesday.—Bedale : 1s to 1s 3d per roll of 24oz. Gainsborough : 1s per lb. Leeds : Danish, 108s to 115s per 112lb ; York lump, 12s to 12s 9d per stone ; ditto long rolls, 11½d, 1s 3d to 1s 6d ; fresh butter in 1lb prints, 11d per lb. Settle : 9¾d to 10½d per lb. Sheffield : 1s 3d per lb. Spalding : 1s per lb.

Wednesday.—Barnsley : 1s to 1s 1d per lb. Boston : 10d to 1s per lb. Colne : 1s per lb. Goole : 11d per lb. Keighley : 1s per lb. Kirbymoorside : 8d to 9d per lb. Knaresborough : (wholesale). 1s to 1s 1d ; ditto (retail), 1s 2d to 1s 4d per roll of 24oz. Louth : 10d per lb. Market Weighton : 10d per lb. Masham : 1s to 1s 1d per roll of 24ozs. Northallerton : 1s to 1s 2d per 24oz. Stockton : 11d to 1s per lb. Whitby : 9d to 10d per lb. Worksop : 11d per lb.

Thursday.—Liverpool : The advance in the official quotation for Danish was not obtained in this market, prices for best qualities ranging from 114s to 116s. Values of Irish creamery have declined, whilst dairy butter remains unchanged. Bristol : Butter is dearer, and the market is certainly not overstocked. Best Irish centrifugal is worth about 108s ; best Waterford creamery about 105s. Cardiff : There is an excellent demand for Irish, and the supplies coming forward are scarcely sufficient to meet all demands, with the consequence that prices are about 2s higher than last week. Dorset butters range from 94s to 100s and Welsh from 88s to 96s. In Danish there has been an advance of 2s, best brands being from 115s to 116s, and unbranded 2s less. Brigg : 11d to 1s per lb. Driffield : 9d per lb. Penistone : 10d per lb. Ripon : 1s 1d to 1s 6d per single roll of 24oz. Scarborough : 10d to 1s per lb. Wetherby : 10d to 1s per lb.

Friday.—Altrincham : 1s to 1s 2d per lb. Crewe : 1s per lb. Chester : 1s per lb. Easingwold : 8d to 9d per lb. Helmsley : 8d to 9d per lb. Leeds : Danish, 112s to 115s per 112lb ; York lump, 12s to 12s 9d per stone ; ditto long rolls, 11½lb, 1s 3d to 1s 6d. Leyburn : 1s to 1s 1d per roll of 24oz. Lincoln : 11d to 1s per lb. Otley : 1s to 1s 3d per roll of 24oz. Manchester : The market was dragging, and at the close a moderate quantity was left over. Irish creameries were in more plentiful supply, and did not quite clear. Birmingham : A slow market, the recent advances having checked the demand and large stocks have to be carried over. Irish creameries have experienced a dragging sale at from 5s to 6s decline. Newcastle-on-Tyne : The market has been decidedly slow, buyers only taking for their immediate requirements and prices really very little advance has been made on last week's prices ; quotations now are 111s to 113s. Glasgow : Late advances have checked demand for Danish, and market not cleared at last week's prices ; choicest, 109s to 111s ; secondary, 106s to 108s ; Irish creameries quiet and easier. Leith : The advance for Danish and Swedish tended to limit the sales this week, and as arrivals were comparatively small there was not much left over. Finest Danish, 112s to 115s ; fine, 98s to 108s.

EGGS.

Tuesday.—Bedale : 17 for 1s. Gainsborough : 15 to 18 for 1s. Leeds : Yorkshire, 8s 9d to 9s 3d per 120 ; Irish 6s 6d to 7s ; Danish, 6s 6d to 7s ; Settle : 16 to 17 for 1s. Sheffield : 12 to 15 for 1s. Spalding : 15 for 1s.

Wednesday.—Barnsley : 12 or 13 for 1s. Boston : 14 or 15 for 1s. Colne : 1s 3d per score. Goole : 15 for 1s. Keighley : 13 for 1s. Kirbymoorside : 16 for 1s. Knaresborough : 13 or 14 for 1s. Louth : 16 for 1s. Market Weighton : 16 for 1s. Masham : 16 or 17 for 1s. Northallerton : 15 or 16 for 1s. Stockton : 14 for 1s. Whitby : 13 for 1s. Worksop : 1s 3d per score.

Thursday.—Brigg : 15 to 16 for 1s. Driffield : 17 for 1s. Penistone : 14 for 1s. Ripon : 15 or 16 for 1s. Scarborough : 14 for 1s. Wetherby : 14 or 15 for 1s. Liverpool : Supplies continue plentiful, there is a fair demand, and prices remain unchanged. Cardiff : Prices have advanced 1d, selected Irish being from 6s 6d to 6s 8d ; Welsh, 6s 6d to 6s 10d.

Friday.—Crewe : 14 to 15 for 1s. Easingwold : 16 or 17 for 1s. Leeds : Yorkshire 8s 6d to 9s per 120. Danish 6s 6d to 7s. Leyburn : 16 for 1s. Lincoln : 14 or 15 for 1s. Otley : 14 or 15 for 1s. Manchester : Finest goods are in fair demand, and prices have kept firm. The cheaper kinds have given way slightly. Manchester : Finest goods are in fair demand but prices for others is irregular. Newcastle-on-Tyne : Best Danish are offered at 6s 3d to 7s per 120. Glasgow : The demand continues on a moderate scale, and supplies being large quotations are easier. Irish 5s 10d to 6s 0d. Danish 6s to 7s ; Russian, 4s 3d to 5s 3d. Leith : Prime Danish, 6s 3d per 120 for 16lb.

POULTRY AND PROVISIONS.

Smithfield, Saturday.—Although supplies were larger this morning, an improved demand prevailed, and the market cleared with firmer tone. Quotations :—Fowls : Yorkshire, 2s 9d to 3s 6d ; Essex, 2s 6d to 3s ; Surrey, 3s 6d to 5s ; Boston, 2s 3d to 3s ; Welsh, 2s to 2s 6d ; Irish, 2s to 2s 9d ; Russian, 1s 3d to 1s 9d ; Sussex, 3s to 4s 6d ; Aylesbury ducklings, 3s to 3s 6d ; country ducks, 2s 6d to 3s ; goslings, 4s to 5s ; Egyptian quail, 10d to 1s 3d ; Bordeaux pigeons, 10d to 1s 1d ; feathered ditto, 7d to 8d ; tame rabbits, 1s 2d to 1s 4d ; wild ditto, 7d to 9d each ; Australian ditto, 7s 6d to 9s 6d per dozen.

Glasgow, Wednesday.—More cheese coming forward than going out, and as a consequence prices are again easier. Quotations, 50s to 56s per cwt. Fine grass Canadian and States cheese now forward ; inquiry moderate ; prices fair.

Liverpool, Saturday.—Bacon.—Under improving cable advices from Chicago, the market has a firm tendency, but demand is still of a retail character. Hams are in moderate request at a shade easier values. Lard is somewhat dearer and in good demand. Beef rules steady at recent quotations. Pork firm, with good trade passing. Cheese.—The demand has been less active, and with liberal arrivals and cables reporting lower markets in America and Canada, values are reduced, but the tone is now steadier. Butter.—Finest qualities are a slower sale, and rather easier to buy.—Hodgson Brothers.

FRUIT AND VEGETABLES.

Covent Garden, Saturday.—Good arrivals of vegetables were in fair demand. Moderate supplies of potatoes experienced good support. A fair supply of fruit met a fair inquiry. Greenstuffs : Cabbages, 4s to 5s ; beet, 2s 6d to 3s ; cauliflowers, 7s 6d to 10s per tally ; spinach, 2s per sieve ; greens, 1s 6d to 2s per bag ; leeks, 3s per dozen bunches ; horseradish, 1s to 1s 6d ; asparagus, 2s 6d to 3s 6d per bundle. English spring onions, 5s to 6s per dozen bunches ; Egyptian onions, 4s 6d to 5s per bag ; peas, 2s 6d to 3s per sieve. Old potatoes : Maincrops, Reading Giants, Bruce, and Up-to-dates, 120s to 130s per ton. New potatoes : New Jersey, 10s to 10s 6d ; Teneriffe, 6s to 7s 6d ; Canary, 5s to 6s per cwt ; Lisbon, 4s 3d per case. Fruit : English grapes, 1s to 3s ; Belgian, 9d to 1s 6d per lb. English cherries, 1s to 2s ; French, 4s to 8s per half-sieve ; English strawberries, 6s to 8s per dozen punnets ; French, 1s 6d to 3s per basket ; gooseberries, 2s to 3s per half-sieve ; Valencia oranges, 12s to 15s ; Murcia, 12s to 16s ; lemons, 9s to 10s per case.

POTATOES.

Borough and Spitalfields, Saturday.—Arrivals of old potatoes almost nil, but stocks on hand sufficient for demand, with prices rather better. English Up-to-dates, 100s to 110s ; ditto Belgian Giants and Browns, 105s to 115s per ton. German and Belgian Magnums, 4s to 4s 6d, ditto ; and 3s 9d to 4s per bag.

HOPS.

Canterbury, Saturday.—The crack of opics begins sometimes very severe, and a great deal of washing is now going on. Where this is not prevented by the plant is threatened with black blight. The hops have improved [illegible] and fine weather is needed.

Worcester, Saturday.—There has not been much doing in hops this week, but prices are very firm. Reports from the plantations are not so favourable ; the cold weather at the beginning of the week checked the growth of the bine, which in most places is covered with vermin, and washing is now becoming general.—Pierce and Co.

HAY AND STRAW.

Whitechapel, Saturday.—[illegible] Best clover, 95s to 100s ; inferior ditto, 60s to 70s ; [illegible] packed hay, 75s to 85s ; and [illegible] [illegible] [illegible] 38s per load.

FOREIGN HAY AND STRAW.

London, Saturday.—Our market this week has been very quiet and little passing. Straw is still [illegible] [illegible] are low and prices asked are above [illegible] —Canadian mixture, 90s ; Dutch and [illegible] 82s 6d to 85s. Dutch and French [illegible] good Dutch hay, 90s to 95s ; inferior [illegible] large bale French wheat straw, 47s 6d ; small bale wheat and oat straw, 44s. All these prices are per load [illegible] side.—Fuller and Prentis, 9 and 10, Great Tower Street, E.C.

Review of the British Corn Trade

DURING THE PAST WEEK

Written exclusively for the Mark Lane Express.

The wheat fields are coming nicely into bloom in Hampshire, Sussex, and the Isle of Thanet. The weather is propitious, and more hopefulness is manifest among farmers than has been seen since Easter. The crop will be a full fortnight late, even if there be no lack of temperature in July, but the yield should, with five to six weeks' real summer weather from now, attain thirty bushels to the acre. In France the aspect of affairs is also better than it was a fortnight ago, though we doubt if the very eminent authority quoted by a daily paper on Saturday really did state that no wheat imports would be required by France on the year's production. What he may have said seems to be that, *with stocks of old wheat*, which are very good, the crop of 1900 might suffice. But this is very different from stating that a crop estimated at the most at 38,000,000 qrs. would suffice for the wants of a country eating 43,000,000 qrs. at least. The news from the American north-west indicates that the yield of spring wheat will not be nearly an average, and we fear that Manitoba is likely to have not more than two-thirds of last year's yield. On the other hand, the American winter wheat States have full average crops.

The excited market at Mark Lane on Monday, June 25, was so fully reported by us that further details are needless, but since the excitement has been mainly due to America and to American influences our readers will probably appreciate a full account of changes there. The community of languages does not prevent a use of different weights, money, and standards, rendering prompt comparisons impossible, and the Governments of the two countries unhappily make no effort to take steps for an uniformity which would do more than anything else to make the two branches of the Anglo-Saxon people feel as one nation. Meanwhile we convert bushels, cents, and centals into English market equivalents as nearly as may be, though the daily fluctuations in the value of the dollar in English pence render such quotations approximate only.

American changes daily have been as follows :—

NEW YORK PRICES.

	Spring wheat.	Winter wheat.
June 25	32s 8d per qr.	32s 10d per qr.
,, 26	32s 4d ,,	32s 7d ,,
,, 27	32s 1d ,,	31s 6d ,,
,, 28	31s 9d ,,	31s 10d ,,
,, 29	30s 9d ,,	30s 0d ,,
,, 30	30s 6d ,,	30s 6d ,,

Before the rise winter wheat was at 30s. 6d., and spring at 30s. per quarter. The actual advance with which the week began was 2s. 4d. on winter and 2s. 8d. on spring wheat. The advance on spring wheat is 6d. net, but winter wheat in unchanged. Wheat freights from Atlantic ports average 2s. 6d. per quarter. Maize at New York is steady at 17s. to 17s. 6d. per quarter. San Francisco prices have been as follows :—

	Cal. Wheat.	Brewing Barley.
June 26	21s 4d per qr.	16s 0d per qr.
,, 28	23s 4d ,,	15s 6d ,,
,, 30	23s 0d ,,	16s 6d ,,

Freights are about 8s. per qr. from California.

The American visible supply, in millions of bushels, is cabled as follows :—

	June 28 : 1900.	1899.
Wheat	58	44
Maize	22	18
Oats	12	10

This increase on the year has had a sobering effect upon trade in the three staples indicated. The totals, however, do not include California, Oregon, Canada, or Manitoba, from which regions advices come, somewhat irregularly, to hand.

The English market sales of wheat have been :—

	Qrs.
Foreign wheat	417,000
,, flour	135,000
,, breadstuffs	552,000
English wheat	122,000
Total	674,000
Wants	567,000
Surplus	107,000

These figures are for the United Kingdom.

The following return shows that during the recent excitement at Mark Lane English wheat and oats were almost "sold out"; in fact, old stores were called upon. But for English barley the demand continues dismally small.

LONDON TRADE IN BRITISH PRODUCE.

	Deliveries. Qrs.	Sales. Qrs.
Wheat	2,014	2,081
Barley	1,300	55
Oats	889	983

The country markets with their excess of sales over requirements of fully one-sixth seem to have been proportionately busier than London, but the figures for London in the absence of foreign wheat sales are fallacious. A weekly Government return of *all* sales at Mark Lane is a crying need.

The London supplies of breadstuffs for the third week of June were expected to "cut the record," but this did not actually occur, as the following figures will show :—

	Qrs.
June 22, 1900	196,116
Feb. 18, 1899	204,974

But it is probable that the fortnight's record has been surpassed, as

	Qrs.
June 15-29, 1900	338,301
February 11-25, 1899	313,247

are figures which show that the work of unloading was accomplished more quickly a year or so back. The partial strike at the docks caused some slight delay last month.

The details of imports into London as received from Government inspectors are as follows :—

LONDON FLOUR IMPORTS, JUNE 18-23.

	Cwts.
Wheat flour	211,100
Maize flour	1,050
,, germ meal	11,000
Rye flour	125
Rice flour	560
Oatmeal	2,300

The "London arrivals," a private venture, only give the receipts of wheat flour, and other forms of flour and meal are not regarded. This used to be of very little consequence, but such is no longer the case. The Government figures, unfortunately, are five days later than those of the private list, but the fuller detail and the verification of items render the delay inevitable.

The imports of spring corn into the United Kingdom last week were as follows :—

Maize, 176,000 qrs.—a moderate supply.
Barley, 85,000 qrs.—a small supply.
Oats, 165,000 qrs.—a good supply.

Maize is 1s. dearer for round and yellow, and 2s. for flat corn, but barley has failed to respond to the situation. Oats are a trifle dearer, despite the good arrivals, but liberal offers in June seldom fail to cause slackness in this trade, and the feeling to-day is not strong.

The following quantities of spring corn are on passage :—

Maize : 485,000 qrs ; less than usual.
Barley : 225,000 qrs ; less than usual.
Beans : 7,500 qrs ; extremely small.

These figures should help holders of all these staples.

Pressure on our space forbids the usual details of prospective breadstuffs' supplies being given, but the total on passage June 30 was 2,080,000 qrs. of wheat and 366,008 sacks of flour.

Some special sales of secondary staples may be signalised. Egyptian split beans have made 21s. per 320lb.; mutter from India has been quoted at 24s. per 504lb.; fine German mawseed, 24s. per cwt.; rubsen, 50s. per 416lb.; Saffi canaryseed, 33s. per 464lb.; Dutch carrawayseed, 33s. per cwt.; La Plata Sorghum, 23s. per qr.; Canadian buck wheat, 25s. per qr.; sago flour, 9s. per cwt.; tapioca flour, 10s. per cwt. French Lucerne has been selling in handy bales at 72s. 6d.; Dutch hay at 65s.; Friesland at 60s.; and inferior at 57s. 6d. Large bales of French wheat straw are to hand, and make 50s.; small bales, 45s. The finest Belgian rye straw makes 65s. The rise in wheat has not helped potatoes, but prices are substantially higher from last year. Fine Spanish lentils have touched 17s. per cwt., but split Egyptian are to be had at 10s. 6d. to 11s. per cental.

In reply to inquiries from buyers whose operations are not so wholesale as those dealt with in the Mark Lane quotations, we may mention that where small quantities are purchased, wheat is now selling at 4s. 6d. per bushel of 60lb., feeding barley at 3s. per bushel of 50lb., old tick beans at 24s. per sack of 264lb.; split beans, English, at 12s. 6d. per bag of 160lb., round maize at 3s. 6d. per bushel of 60lb, pigeon mixture at 21s. per sack of 224lb., condiments for horses at 10s. to 14s. per cwt., and barleymeal at 12s. per bag of 168lb. We do not wonder at country gentlemen who do not keep a regular bailiff grumbling at the extraordinary diversity of weights and measures. But the remedy is with the Legislature. Poultry mixture (we may answer a fancier) should weigh 336lb. to the quarter. The price should be from 20s. to 24s. per quarter. It may also be observed that the difference between ordinary and crushed oats is usually 2s. per qr. The crushing of the oats is recommended by the best authorities.

THE INDIAN WHEAT CROP.

[BY CABLE.]

CALCUTTA, June 30.

Following special figures are published to-day :—

	Qrs.
1900 crop	22,987,000
1899 ,,	29,798,000

The 1900 yield is the smallest on record since the English rule was established. It is 1,100,000 qrs. smaller than that of the famine year, 1897. At the same time it is not so small as had been expected from the exceedingly gloomy reports.

THIS DAY'S MARKETS.

MARK LANE, MONDAY.

[FIRST REPORT.]

The gloomy and unsummerlike weather, together with the serious news from the Far East, unite to make the market firmer from Friday last. English wheat has made 34s. for 64lb. white and 32s. 6d. for 63lb. red. The demand is not very brisk, but holders are exceedingly firm. There was a certain reaction on the 29th ult., but the feeling to-day is to hold old grain of the home crop. Some fine wheat from Victoria has fetched 34s. per qr., but for the majority of foreign wheat samples the prices of last Monday are no longer obtainable. The demand is very moderate. Canadian barley at 21s. 6d. is in some request, but English and Russian sorts are neglected. Oats are not so strong as on Friday. The obsolete policy of publishing no returns of supplies on passage has been abandoned by other branches of business, but in oats it still prevails, and the result is that figures are much exaggerated. The quantity "nearly due" from Russia is said to be "extremely large," and few buyers will do anything. English oats are held for rather high prices, but the same are not often obtained. Caucasian maize early to-day made 23s., and there are still buyers at this price. American is irregular, 20s. 6d. to 21s. 6d. per qr. Round is also irregular, with a still wider range. Fine Italian millet to-day made 55s. per qr. Best English peas (Marrowfat) command 75s. per qr., while Wisconsin come at 48s. and finest Australian at 42s. per qr. The market for beans, rye, and lentils is firm but not active. Liverpool telegraphs Manitoba wheat at 6s. 9d. per cental, Argentine at 6s. 4d. Maize at 4s. 1d., for American, 4s. 5d. for Argentine, and 4s. 11d. for Odessa.

CLOSE OF THE MARKET.

By Telephone, 2 p.m.

The market closed about 1s. lower for wheat from the best prices at the excited close of Monday last. These prices were about 4s. up, so that the net rise on the fortnight averages about 3s. per qr. Other staples were not changed from our earlier advices.

THE FLOUR TRADE.

MARK LANE, July 2.

The market for flour is not nearly so good as it was on Monday last, but it is better from Friday, when reaction seemed likely to set in. To-day fine London white flour is held for 27s., and households for 25s.; for the latter 24s. 6d. is offered by bakers. American sorts show extreme variation, and the prices are individual to each patent and the advices received by the agents from America. We may quote Pillsbury's best at 25s. 6d. per sack, Washburn's superlative at 26s. 3d., Morrison's superlative at 26s., Ceresota at 27s., Gold Medal at 26s., Gold Medal at 27s. 6d., and Kansas Dazzle at 26s. 3d. per sack. These are the finest qualities of American. Good secondary qualities realise about as follows:—Ceres 21s., Iron Duke 21s. 6d., Bread Winner 20s. 6d., and Improved Nicollet 20s. 9d. per sack. The commonest kinds come at 16s. 6d. for Phœnix, 19s. for Manhattan, and 16s. 9d. for Violet. Hungarian flour is worth over 30s., but how much is difficult to say. Perhaps 32s. would be a fair average to quote. French flour is not much dearer, but 1s. net rise on the week may be regarded as current. Milling offals are 1s. 3d. to 2s. 6d. per ton dearer on the week. The flour market closed 1s. to 1s. 6d. below the 3s. to 4s. rise of Monday last, but still substantially dearer on the week.

THE BALTIC, Monday, 1 p.m.

State of Trade.

Cargoes are firmly held. Wheat is 3d. better from Saturday. Argentine maize cargoes are held above buyers' ideas, but for barley, oats, and oil-seeds there is a fair agreement between parties. American maize cargo holders are ready to meet buyers at former terms.

Business Done.

Wheat.—Walla Walla, 29s 6d on passage; Duluth, 32s, on passage; No. 1 Northern spring, 32s 6d Aug. shipment; New Zealand, 31s, August shipment; Odessa Ghirka, 32s 6d, August shipment; hard Manitoba, 33s, July shipment.

Maize.—American, 21s, July shipment; Roumanian, 21s 9d, July shipment.

Barley.—Persian, 17s 6d on passage; Azoff, 18s, October shipment.

Oats.—Clipped white American, 15s 3d, August shipment; South Russian, 14s 6d, prompt shipment.

Linseed.—Calcutta, 55s 3d, August shipment; Bombay, 58s 3d, August shipment.

Rapeseed.—Ferozepore, 43s 9d, July shipment; Guzerat, 46s, July shipment.

Cottonseed.—Egyptian, £6 2s 6d, due; Egyptian, £5 18s 9d, December shipment.

SEEDS.

London, Monday.—Messrs. John Shaw and Sons, seed merchants, of Great Maze Pond, Borough, London, S.E., write that the close of the half year finds stocks of red cloverseed in surprisingly moderate compass, and values all round exceedingly firm. Indeed, the general outlook of the seed trade has lately much improved, and an early advance in prices for all descriptions is confidently expected. Trustworthy accounts just received from the United States indicate an exceedingly bad promise for the new crops of red seed. The market for mustard and rapeseed is quiet, but steady. Canaryseed, whilst more talked about, is not quotably dearer. Hempseed, meantime, favours holders. Some saffior seed is now obtainable on very low terms. Haricot beans being in strong demand and small supply, are dearer; whilst blue peas find buyers at full prices.

PROVISIONS.

London, Monday.—The arrivals from Ireland last week were 3,206 bales bacon, and from foreign ports 7,488 bales bacon. Although more doing in the bacon market last week at moderate rates, clearances did not keep pace with the arrivals, and there was a fair stock left over at the close of the week. Irish, 54s to 60s up to 68s; Danish, 46s to 58s up to 66s; Canadian, 50s to 54s up to 60s; American, 47s to 50s. The butter market was steady, but quiet, the trade waiting for easier rates, prices having been pushed too high. French, 88s to 104s; Danish, 100s to 114s; Russian, 88s to 104s; Dutch, 98s to 100s; Irish, 90s to 104s. Lard steady. Irish, 43s to 50s; Danish, 46s; American, 37s to 38s.

GRAIN AND FLOUR FACTORS' REPORTS.

Flour.—A quiet trade at 1s. to 1s. 6d. under last Monday's prices.—T. S. Medill, Mark Lane.

The demand for all qualities of milling offals is on a liberal scale, and prices are strong.—Richard Doggett, Mark Lane.

Wheat to-day had a slow sale, and prices were 1s and 2s. per qr. lower than last Monday. Flour 1s. and 1s. 6d. per sack lower. Maize 3d. per qr. lower. Barley and oats unchanged.—Coventry, Mark Lane.

Only a limited trade in foreign wheat to-day, at 1s. to 1s. 6d. below the inflated values of last Monday. Maize and barley are unchanged in value, and oats tend in favour of buyers. In flour patents are 1s. 3d. and bakers 9d. cheaper on the week.—W. P. Wood and Co., Mark Lane.

There is very little now doing in seeds for present use, but Continental and American advices about the growing crops of red cloverseed are so unfavourable as to lead to a continuance of speculative purchases at improving prices. Alsike and trefoil are also inquired for. Canaryseed continues dull. Haricots and blue peas are in very small compass and firm.—John Picard and Co., Mark Lane.

Bran and feeding stuffs in moderate request. Prices are firmer owing to the increased speculative demand. Weather continues showery.—Greenhill Brothers, Belfast, June 30.

Wheat firm at the decline of 3d. to 4d. per cental from Tuesday's prices, at which a fair business has been done. Flour is only in small demand at about 1s. per sack under last Tuesday's prices for foreign. Maize has had a moderate inquiry at ¼d. per cental decline since last market day. European and Plate steady at unchanged prices. Barley quiet and little doing for malting; feeding firm at ½d. per cental advance, with a moderate demand. Beans firm, and 6d. per qr. dearer, with a fair inquiry. Peas firm but quiet. Oats are firm with rather more doing for English; foreign steady with a quiet trade. Oatmeal firm, but quiet. Oilcake firm, but only a moderate demand at about unchanged prices.—Ross T. Smyth, Liverpool, June 30.

LONDON TERM MARKET.

This market is held twice a day at South Sea House, and is open to elected members only. No business except for future delivery is done, and the smallest quantity that can be purchased is 1,000 quarters or 4,800 centals.

The name of the month stands for guaranteed delivery (if required) on or before the last day of that month, and the following have been the prices per cental recently made:—

Wheat.—	June.	Aug.	Oct.	Dec.
	s. d.	s. d.	s. d.	s. d.
June 25 noon	7 2	7 3	7 4	7 4
4 p.m.	7 2	7 3	7 4	7 4
June 26 noon	7 1	7 2	7 3	7 3
4 p.m.	7 1	7 2	7 2	7 3
June 27 noon	7 0	7 1	7 1	7 2
4 p.m.	7 0	7 0	7 0	7 2
June 28 noon	—	7 0	6 11	7 1
4 p.m.	—	7 0	6 10	7 0
June 29 noon	—	7 0	6 9	6 10
4 p.m.	—	7 0	6 9	6 10
June 30 noon	—	7 0	6 9	6 10
To-day noon	—	6 9	6 10	6 10

Maize makes 4s. 3d. for July delivery. June sales of wheat were 29,000,000 centals for future delivery, and 187,000 centals for actual June supply.

The Term Market standard wheat is No. 1 Northern Spring American sold on the Duluth certificate. Other sorts of wheat can be bought at the above prices plus or minus agreed difference between the other sort and the standard quality. Quotations are by the "true hundredweight" or cental of 100lb. We do not give fractions of a penny per cental. Delivery is understood as being guaranteed on or before the last day of the month named in the quotation. The maize quoted on the Term market is flat grain from the United States.

FEEDING STUFFS.

London, Monday.—Linseed Cake: Market tending dearer, owing to shortness of supplies and rise in linseed; cotton cake, decorticated, unchanged, ordinary rather dearer. Linseed firm and 1s. up.

English linseed cake	£7	15	0	to	7	17	6	ex mill
American Western linseed cake	7	7	6	to	7	10	0	ex quay
Russian oil cake	7	5	0	to	7	7	6	ex quay
Feeding cake, Samuelson's S.P.F. (10 to 12 p.c. oil)								ex warehouse
Decorticated cotton cake	6	5	0	to	6	7	6	ex quay
Decorticated cotton meal	6	7	6					ex quay
London made cotton cake (best)	4	5	0	to	4	7	6	ex mill
Egyptian cotton cake (in bags)	4	2	6	to	4	5	0	ex quay
Burton decorticated ale grains (bags included)	4	6	0					on rail, Burton
Rangoon Rice Meal	4	5	0					ex warehouse
Calcutta linseed in bags, per 410 lbs	2	15	0	to	2	17	6	ex warehouse

—Robt. and John Hewetson

Professor John R. Campbell, [illegible] Agricultural Department of the [illegible] Leeds, has just been appointed [illegible] Assistant Secretary of the Board of Agriculture for Ireland. [illegible] years [illegible] Chief Inspector [illegible] Leeds. Mr. [illegible] this week [illegible] Preston.

LIVE STOCK AND MEAT TRADE REVIEW.

(WRITTEN SPECIALLY FOR THE "MARK LANE EXPRESS.")

Trade in London.

We note during the week a much smaller supply at the Islington Market, this being due to shorter arrivals from Norfolk, as well as from the south-western counties, these latter chiefly consisting of middling quality cows, with a few fat bulls and rough cattle. Trade for fat beasts of both prime and second quality ruled rather slower, though no alteration in regard to value can be noted, a practical clearance on the chief market day being made. On the second day very few transactions were recorded. Fat bulls and butchering cows, with a light supply, met with a readier sale at a slight advance in value, though Thursday's sales were of a very limited nature. At the Foreign Cattle Market (Deptford) the number on offer was rather smaller, business being rather disorganised through holding three market days instead of the usual two, and was of a rather slower nature, with a downward tendency in value, clearance on each sale day being more or less forced. The total number of beasts on offer at both markets was 2,938, consisting of 990 British (decrease 530), and 1,948 foreign, these latter comprising 1,844 from the United States and 104 from Canada. The following were the top rates paid per 8lb. (sinking the offal):—95-stone Herefords, 4s. 10d.; 90-stone polled Norfolks, 4s. 9d.; 100-stone Shorthorn ditto, 4ss. 6d. to 4s. 7d.; 100-stone Lincolns, 4s. 6d.; 110-stone ditto, 4s. 4d.; 90-stone States, 4s. 4d.; 95-stone Canadians, 4s. 2d.; 90-stone fat cows, 4s.; 100-stone fat bulls, 3s. 4d. So far as sheep and lambs were concerned, trade confined to the Islington market was of a slower nature, wethers upholding last week's quotations, whilst ewes were bought on easier terms. Rates for lambs on Monday were firm, with a slight advance on all Thursday's transactions. On both market days all on offer found buyers; the total number penned was 12,240, as against 12,010 during the preceding week. Best pens of sheep made per 8lbs. as follows (sinking the offal):—7½ to 8-stone Downs, 6s. 4d.; 9-stone Downs, 6s. 2d.; 8-stone Scotch, 6s. 4d.; 10-stone Downs, 6s.; 10-stone half-breds, 5s. 8d. to 5s. 10d.; 12-stone Lincolns, 5s. 6d.; 10-stone Down ewes, 4s. 8d. to 4s. 10d.; 11-stone halfbred ditto, 4s. 6d.; 5-stone fat grass lambs, 6s. 4d. to 6s. 8d.; 6-stone halfbred ditto, 6s. to 6s. 2d. Calves were rather stronger in number and met a duller trade; they numbered 115, best of which were quoted at 5s. to 5s. 2d. per 8lbs.

Trade in the West.

Pastures having come on rapidly, a great stimulus has been given to the store stock business, barreners almost of every kind going up from £1 to £2 apiece. The milch beast trade was affected almost to a similar extent, the best classes advancing from £1 to 30s. each, and in some few cases bringing £20 to £22 apiece, the greatest difficulty being still experienced in meeting the demand for town dairies. More ordinary runs of dairy beasts now sell from £16 to £20. In-calvers are likewise in request at from £18 to £24 per pair. Fat bullocks have likewise been influenced by the upward trend of prices, and with a very keen demand best beef has again touched 12s. per score (or from £22 to £24 apiece for the best heifers), secondary grades making about 11s. to 11s. 6d. Store sheep are still marketing very well, prices at this week's fairs being fully maintained with, if anything, a slightly hardening tendency, good ewes making from 35s. to 42s. apiece, and lambs from 22s. to 29s., with a very brisk sale at the quoted prices, whilst fat sheep are as dear as they have been at any time this season, the best class of ewes and wethers bringing fully 8d. to 9d. per lb. in most cases, and lamb from 9½d. to 10½d., and in many cases even more. Veal is a good steady trade, though prices are scarcely so high, from 7½d. to 8d. being the best market values at present, but pigs are quite as firm as they have been at all, especially the best weights, which bring 9s. to 10s., according to quality, and other grades 8s. to 8s. 6d.

Trade in Ireland.

Thursday's market in Dublin was a very large one, and if it had not been for increased supplies it would have been a very dear one. As it was cattle were a turn higher, while prices for sheep were well maintained. The trade for well-meated heifers and bullocks was a strong one, with prices favouring sellers, and in some instances from 10s. to 20s. per head of a rise was obtained. Butchers complained of the "soft" quality of the beef lately bought, as beasts weigh deceptively. A large number of fat cows met with rather a dragging sale, at a shade under last week's figures. All classes of cattle were satisfactorily cleared out early. Prime ox and heifer beef made from 62s. 6d. to 65s. per cwt.; second quality, 55s. to 60s.; inferior, 44s. to 52s. 6d. The market of sheep and lambs was the largest of the season, or it may be said for the last couple of years, so that it speaks well for trade that there was no fall in price on average sheep, while for mountain wethers and good hoggets the turn was in favour of sellers. Prime wether mutton made 7½d. to 7¾d. per lb.; prime ewe, 6½d. to 7d.; inferior, 5d. to 6d. Medium hoggets were worth from 32s. to 42s., and heavy from 44s. to 52s. each. There was a very strong enquiry for good lambs, and prices for best were fully 2s. per head up, though there was no change to note in medium or inferior qualities; the latter having to be sold at low figures to effect a clearance. Choice fat lambs made from 28s. to 37s. 6d. for some extra good lots; medium sorts fetching from 20s. to 26s. Veal calves in small supply with good demand for prime quality at from 8d. to 8½d. per lb. The milk department was fairly well supplied, and with a good enquiry for best springers and fresh calved cows these were worth from £18 to £21 per head, while inferior and middling could be had from £9 upwards. An average market of hogs, but though there was a fair attendance of shippers, buying was of a cautious and weak nature, prices having again to be written down from 1s. to 2s. per cwt. on heavy pigs; the nicer qualities of baconers maintaining last week's terms. A good demand for stores.

Trade in Scotland.

John Swan and Sons, Limited, in their weekly report on above, give the following:—There have been much shorter supplies of fat cattle offered throughout the country this week. There has been an exceedingly sharp local demand, and plenty from England. Trade has been quite the highest of the season, and all classes of cattle have been remarkably dear, those of the best quality in some cases making over the extreme rates of last week. Fat sheep and lambs have also been forward in fewer numbers, and there has been a decided improvement in quality of those offered. For young sheep and good lambs trade has been good, at prices generally a little higher than last week. Fat ewes, however, have met no improvement. A smaller number of calves, but a good show, met a dearer market, while an average lot of pigs would sell similarly to last week. In the store market there has been an exceedingly small number of sheep forward, and, with a good demand, prices still keep high. Cattle, however, have been sent in larger numbers, the majority being Irish. There is plenty of inquiry, and most of the best sorts, both bullocks and stirks, have been sold; but though prices are good, the excessive cost at the other side tends to check ready sales. There have been fewer milch cows on offer, and these met a very good trade. Quotations:—Top price best beef, 9s. 3d. to a little over 9s. 6d.; current, 8s. 6d. to 9s. per stone. Mutton from 8½d. to 9¾d. per lb.

LONDON.

London Central, Wednesday.—Fair supplies offered, and trade ruled rather firm. Arrivals of beef included 340 Liverpool sides, 2,400 hindquarters, and 900 forequarters American refrigerated. Quotations:—Beef: English, 4s to 4s 2d; Liverpool, 3s 8d to 3s 10d; American Deptford killed, 3s 10d to 4s; American refrigerated hindquarters, 3s 6d to 3s 8d; forequarters, 2s 5d to 2s 6d. Mutton: Scotch, 6s to 6s 4d; English wethers, 5s 8d; ewes, 4s to 4s 2d; English lamb, 5s to 5s 8d. Veal: English and Dutch, 4s to 4s 4d. per 8lb.

London Central, Friday.—Good supplies offered, but trade ruled generally slow. Arrivals of beef, included 80 tons Scotch, 500 Liverpool sides, 3,500 hindquarters, and 2,500 forequarters American refrigerated. Quotations.—Beef: Scotch, short sides, 4s 10d to 5s 2d; long, 4s 2d to 4s 6d; English, 4s to 4s 2d; American, Deptford killed, 3s 10d to 4s; Liverpool, 3s 8d to 3s 10d; American refrigerated hindquarters, 3s 6d to 3s 10d, average 3s 8d; forequarters, 2s 8d to 2s 10d. Mutton: Scotch, 5s 2d to 5s 6d; English wethers, 5s 2d to 5s 4d; ewes, 3s 8d to 4s; Canterbury, 3s 1d to 3s 4d: Wellington, 3s to 3s 2d; Sydney and River Plate, 2s 8d to 2s 10d. Lamb; English, 4s 8d to 5s 4d; New Zealand, 3s 6d to 3s 10d. Veal: English and Dutch, 4s to 4s 4d. Pork, English, 3s 8d to 4s; and Dutch, 3s 4d to 3s 6d per 8lb.

Islington, Thursday.—Supplies principally consisted of fat bulls and rough cattle. Sheep entries were heavier than on Thursday last, by 810 head, and trade for wethers ruled quiet at late rates, ewes, however, meeting with fair support. 7½ to 8-stone Down wethers, 6s 2d to 6s 4d; 9-stone, 6s to 6s 2d; 10-stone half-breds, 5s 8d to 5s 10d; 10-stone ewes, 4s 8d to 4s 10d; 11-stone half-bred, 4s 4d to 4s 6d. Lamb trade steady. 5-stone fat Downs, 6s 2d to 6s 4d. Calves met a slow sale. Top price, 5s 6d per 8lb, to sink the offal.

COUNTRY.

Ashford, Tuesday.—Trade quiet in most departments. Mutton was nominally unaltered, but sales were rather difficult after the first hour in the morning. Small neat half-bred wethers made up to 5s 6d per 8lb, and barrens 4s to 4s 8d. Beef was a little over-supplied, and trade was dull. Best steers and heifers made 11s to 11s 6d per score, but rough cows and bulls were unsaleable. Pork sold at low rates, but store pigs of good quality commanded higher prices than last week. Store sheep sold fairly well.

Basingstoke, Wednesday.—At Raynbird and Sons' sale-yard there was a fair attendance of buyers, to meet a supply of 38 fat beasts, 64 calves, 495 fat sheep and lambs, 196 pigs, and 110 head of dairy and store cattle, for which the following prices were realised:—Fat beasts, £15 to £23 10s; fat calves, 80s to £5 10s; smaller, 25s to 55s; fat wethers, 39s to 59s; fat ewes, 30s to 38s; fat lambs, 26s to 48s 6d; fat porkers, 30s to 55s; small, 24s to 32s; store pigs, 8s 6d to 15s 6d; dairy cows, £9 to £22 15s. The show of fat beasts included some prime quality Devons, Aberdeens, and Shorthorns, for which there was a good enquiry at fully late rates. Prime quality Devons were sold at £23 10s and £21 5s; prime young Shorthorn steers reached £22; young polled Aberdeen heifers, £18 10s, etc., etc. Fat sheep and lambs realised full figure and a clearance made. Half fat and inferior sheep and lambs were worse to sell and prices lower. Prime Hampshire Down wethers and ewes made 52s 6d, 59s, 39s 6d, 44s, 42s. 43s 6d, 61s 6d, 52s 6d, 44s 6d; eighteen months old ditto, 52s, 41s, 51s, 50s. 59s, 52s 6d, 46s 6d, 50s. 43s: Southdowns, 46s. 40s, 48s; black fair Scotch, 27s, 35s 6d; Dorset ewes, 36s; old ewes, 34s, 34s 6d, 33s 6d, 30s, 37s, 38s; six months old lambs, 40s 6d, 38s, 48s, 37s, 40s; three months old sucking lambs, 32s, 19s, 34s, 26s, 32s, 25s 6d, 30s. 29s 6d, 27s, 32s. With a small entry of dairy cattle on offer trade ruled brisk for all the best quality milch cows and heifers. Store cattle of the better class met a good enquiry. Fat calves are making less money. The pig trade throughout was of a quiet tendency. Ruling values:—Prime Devon and Aberdeen beasts, 7d to 7¼d; ditto Shorthorn ditto, 6¾d to 7d; bulls, cows, and inferior ditto, 5½d to 6d per lb. Best quality sheep and big lambs, 9d to 9½d; second ditto, 8d to 8½d per lb; old ewes, rams, and inferior, 6d to 7d; choice fat sucking lambs, 9d to 10d per lb. Fat calves, 5½d to 8d per lb. Porkers, 8s to 10s per score.

Boston, Wednesday.—A poor show and a slow trade. Stores, £10 to £13; growing stores, £7 10s to £9 10s; drapes, £9 to £11; milch cows, £16 10s to £20 10s; in-calf heifers, £16 10s to £18 10s; calves, 60s to 65s each; best beef, 7s 9d; and cow beef, 7s to 7s 3d per stone. Wether mutton, 8d; ewe mutton, 6d; and lamb, 8½d to 9d per lb.

Calne.—Present prices for prime pigs, in lots of not less than 10, on rail within 100 miles of Calne:—

Prime stores.	Thickness of fat in any part of the back.	Price per sc.
6 sc 10 lbs to 9 sc 10 lbs	2½ in. and under..	9s 6d
Under 10 sc 10 lbs	Not exceeding 2½ in.	9s 0d
Under 11 sc 10 lbs	Not exceeding 2¾ in.	8s 6d
Under 12 sc	Not exceeding 3 in.	—

Any pigs outside these limits at their value. Half truck, 12 pigs. Whole truck, 25.—CHARLES AND THOMAS HARRIS AND CO., Limited, Calne, Wilts.

Cambridge. Monday.—Beast, 290; sheep, 499; pigs, 149; horses, 5. Beef, 7s 9d to 8s 6d; mutton, 5s 2d to 6s; pork, 5s 3d to 6s. Small show store beast, owing to horse fair. Fat beast, a fair show and prices unchanged. Fat sheep, a good number to hand, and prices quite up to last week. Stores, very few shown. Fat and store pigs short supply.

Canterbury, Saturday.—Sheep in short supply. Strong tegs forward in condition made from 40s to 44s; rough barren ewes, 19s to 21s; and a few ewes and lambs, 34s. Among the bullocks some good heifers sold at from £9 to £10 17s 6d; small rough yearlings, £4 to £6 10s; and useful cows and calves from £14 to £17 10s. Trade generally slow.

Carlisle, Saturday.—The supply of Irish store cattle was similar to that of last week, between 500 and 600 heifers of a good description being offered. There was a large attendance of buyers, and a fairly brisk sale was experienced at £5 5s to £3 10s for small beasts, and from £10 10s to £12 10s and up to £17 for the best specimens. Young pigs were a large show and met a slow sale at 21s to 25s.

Chichester, Wednesday.—Rather small supply of fat sheep and cattle, and with business quiet there was no change in prices. The recent improvement in feeding prospects led to a better inquiry for store sheep, and a good business was transacted in this department at rising prices.

Dorchester, Saturday.—With a good delivery, prices were again well maintained both for fat and store stock. Milch beasts met a capital demand at full prices. Mutton maintained late rates.

Dublin, Thursday.—Numbers in market: Beasts, 1,727; increase, 339; sheep, 12,450, increase, 2,706; calves, 51, decrease. Fair trade for all classes of cattle, prices showing scarcely any variation from last week. Stores in good demand at this day's auction, the improvement in the weather conditions seeming to have an appreciable effect on buyers. Sheep and lambs in better demand, best qualities favouring sellers; others easier sold. Cattle (best), 34s to 38s per cwt; other descriptions, 30s to 33s per cwt. Mutton, 6½d to 7½d per lb. Lambs, 17s to 40s each.—GANLY, SONS, AND CO.

Dumfries, Wednesday.—Average supplies of beef, and good demand at late rates. Polled bullocks, to £19 10s; horned bullocks, to £19 5s; horned heifers, to £16 15s; Galloway bullocks, to £18 5s; blue-grey bullocks, to £17 10s; Ayrshire bullocks, to £21 10s; cows, to £12 10s. Small show of sheep, which made fully late prices.

Edinburgh, Wednesday.—Smaller supplies of sheep, larger of cattle, and good demand. Half-bred hogs (clipped), best, 32s to 33s; grey-faces, to 31s; polled bullocks, £11 11s to £15 15s; stirks, £9 9s to £11 11s; best shorthorn cows, to £26; secondary, £20 to £23; Ayrshires, £18 10s; and Irish, £21.

Glasgow, Wednesday.—Supplies short and prices firm. Best Scotch cattle maintained extreme prices of last market day quotations, 67s to 70s. per cwt; secondary, 64s to 66s; top Irish, 62s to 64s; States and Canadians, 58s to 62s, with choice descriptions up to 64s. Sheep firm, with prime lambs in demand. Best sheep, 9d to 9½d per lb; lambs, 10d to 1s.

Hereford, Wednesday.—Return of stock brought to the cattle market this day:—Bullocks and cows 410, calves 160, sheep 1,348, lambs 1,071, pigs (fat and sows) 10, sucking pigs 55, pigs (stores, not more than ten) 235, pigs (stores, more than ten) 88, horses 3, colts 2. Prices of stock: Best beef, 6d to 7d per lb; wether sheep, 6½d to 8d per lb; ewes, 5½d to 6d per lb; veal, 7d to 8d per lb; lamb, 9½d per lb; pork, 4½d to 5d per lb: bacon, 4d to 5d per lb.

Ipswich, Tuesday.—Messrs. Robt. Bond and Sons report a large supply of fat cattle, for which the trade was somewhat slow and prices a trifle lower, the best animals making up to £21 15s. The fat sheep pens were well filled and sold much on the same lines as last week. Trade was slow for store sheep and lambs. Calves were fairly represented; the best bred animals for weaning were very dear, up to 55s; those for killing were slow and cheaper. Several lots of well bred stores were well competed for. Fat swine were short. Cows and heifers showing milk were in demand and dearer, up to £21 10s. A good entry of store cattle for the season and plenty of buyers, which caused a fair trade at rather more money. Numbers at sales and market: Beasts, 666; calves, 40; sheep, 3,146; pigs, 1,355; horses, 56.

Leeds, Tuesday.—There was a fair average number of cattle penned to-day—526, against 511 last week, which included several choice pens from Norfolk, together with some well finished animals from Scotland, Ireland, and the North of England. A good demand was experienced for all classes of beef, the primest quality meeting with a ready sale at firm prices. Choicest heifers and bullocks made 7¼d to 7¾d per lb; good useful beef realised 6¾d, and cow and inferior beef about 6d. Sheep supplies were on a fair scale, but below those of last week, numbering 2,390, compared with 2,840. There was an improved enquiry for all classes of sheep, prices having a firmer tendency all round, good quality realising rather more money. Choice small shearlings fetched 8½d to 8¾d; large and heavy sheep, 7¾d; and ewes, etc., 6d per lb. Prime lambs were in request, and met with a ready sale at 9d to 9½d per lb, prices having a hardening tendency. Calves show an increase compared with last week, the best veal qualities making about 8d per lb. Dairy cattle were an average show, a fair amount of business being done. The best milkers realised from £15 to £21. Numbers at market:—Cattle 526, sheep 2,390, calves 14.

Leicester, Saturday.—Very heavy supplies of stock. In excellent condition. Good attendance and trade brisk at firm prices. Milch cows, £15 to £22; cows, £13 to £22 per head. Bullocks £11 to £20 per head. Young stock a slow trade.

Lincoln. Tuesday.—The supply of fat stock was not so large, and prices were higher. There was only a moderate show of beasts, but a fair trade was experienced. Good beef, 7s 6d to 8s 6d; inferior, to 7s 0d per stone. The number of sheep was less, and trade was good. Mutton, ewes, 7d to 7½d; wethers sold to 8d. lamb, 9½d to 10½d per lb.

Lincoln, Friday.—Good show, but only trifling trade. Milch beasts, £14 to £20; drapes, between £8 and £12; three-year-old bullocks realised up to £16; two-year-old, from £8 to £12; and yearlings, £5 to £8. No sheep penned. In pig department trade a little more satisfactory. Suckers sold at from 14s to 19s, and stores from 27s to 47s each.

Newcastle, Tuesday.—Larger supply of cattle, slow trade. Pork slow and heavy. Prices (sinking offal): —Beef, 5s 6d to 8s 9d; pork, 5s to 7s 6d per stone; mutton, 6d to 10d; lamb,

9d to 11d; veal, 5d to 8d per lb. In market:—Cattle, 1,850; sheep and lambs, 6,782; calves, 99; pigs, 727.

Norwich, Saturday.—The supply of store beasts here to-day was large, and in excess of the demand, and a complete clearance was not made; prices showed no material change, but were, upon the whole, slightly in favour of buyers. The supply of fat beasts was somewhat larger than usual; trade was scarcely so firm at 7s 6d to 8s per 14lb. Store sheep and lambs were in large supply, and trade was generally quiet; lambs brought 18s to 32s, and ewes 25s to 55s per head. Fat sheep, which were in moderate supply, made 9s to 10s per 14lb. Keep prospects are fairly good in Norfolk.

Preston, Wednesday.—Good attendance, and average supplies of both cattle and sheep. Trade was somewhat quiet. Beef, heifers and bullocks, 7d to 7½d; cows and bulls, 5d to 6d; mutton, hogs, 7¾d to 8d; tups and ewes, 5d to 6d; lambs, 7½d to 8d; calves, 7d per lb. At market: 170 cattle, 2,350 sheep, and 106 calves.

Sheffield, Tuesday.—The show of milch beasts was small, and trade was quiet. The best lots made from £17 to £21; secondary, £12 to £15.

Shrewsbury, Tuesday.—Mutton and lamb slightly lower. Pigs steady all round. Store cattle ditto. Fat cattle brisk at high prices. Cows with calves good. Small supplies all round. Quotations:—Lamb, 7d to 9d; beef, 6d to 7½d; mutton, 6d to 7½d; and veal, 7d to 8d per lb. Porket pigs, 9s 6d to 10s; and bacons, 8s 6d to 9s per score. Cows, with calves, up to £20 12s 6d. Hay up to £2 10s, and straw up to £2 per ton. Beef made up to 42s per live cwt. Number offered:—485 lambs, 451 cattle, 64 cows with calves, 1,173 sheep, 116 calves, 32 fat, 101 porket, and 337 store pigs.

Spalding, Tuesday.—Best beef to 8s per stone; secondary, 7s 3d to 7s 6d. A good trade for stores, at £10 to £15. Milch cows and in-calf heifers in demand. In the sheep market there was a fair show, and a brisk trade. Best mutton, 7d to 8d per lb. Poor trade for lambs.

Stockton, Wednesday.—There were on offer 173 cattle, 3 calves, 320 sheep, 100 lambs, and 264 pigs. Only a few customers for a small show of best cattle, and trade was very slow, at 8s 6d to 9s per stone; rougher kinds, 7s to 7s 6d; calves, 6d to 8d; young sheep, 8½d; lambs, 9½d; ewes, 7d; tups, 5d to 6d per lb.

Thame, Tuesday.—The market was full of life on Tuesday, and with a large supply of stock, and an excellent attendance of buyers, including the principal riverside butchers (Henley Regatta being near at hand), trade throughout was very fast at improved prices all round, being the best selling trade this season, and a clearance was quickly effected. Mr. Bond's sale comprised 74 fat beasts, 426 fat sheep and lambs and stores, 65 fat and weaning calves, 267 fat and store pigs, and 3 horses. Fat bullocks made £17 to £23; fat heifers, £15 to £20 15s; fat wethers, 48s to 60s; fat ewes, 37s to 50s; fat lambs, 29s to 40s; store lambs, 26s 6d to 30s; fat calves, £3 to £4 17s; cow calves, 28s to 32s; bull calves, 23s to 60s; fat pigs, 10s 6d per score. Stores easier.

Wakefield, Wednesday.—Smaller supplies of all kinds of stock, but even these were quite equal to the demand. Better trade in mutton and lambs, the former making from 6d to 8¾d per pound, and the latter 9d to 10d. Beef moved off slowly at 6d to 7½d per pound. Numbers at market: Beasts, 1,345; sheep, 487.

Wolverhampton, Wednesday.—Beasts a fair supply, but trade slow. Sheep a fair supply, but a bad trade. Lambs a moderate supply, and trade good. There was a small number of calves on offer, and trade was quiet. Milch cows a very large supply, a clearance being made. Dairy cows were very cheap. Beef, 5½d to 7½d per lb; mutton, 6d to 8¾d; lamb, 8¾d to 9½d; veal, 6½d to 8d; bacon pigs, 9s 6d per score; porkets, 9s 6d to 10s; sows, 7s.

Worcester, Saturday.—The market was well supplied with cattle, sheep, and pigs, but trade ruled quiet all round. Except for best qualities, beef was scarcely so dear. Mutton sold slowly at late rates. Fair trade for fat calves and lambs. Pig trade quiet, except for stores, which sold well.

Worksop, Wednesday.—Very fair supply of stock. Good trade for best beef, at 8s to 9s; inferior, 7s to 8s per stone; best shearling mutton, 8d to 8½d; ewe and other mutton, 5d to 6½d; lamb and veal, 8d to 9d per lb.

York, Friday.—Calves, 8d to 8½d; small sheep, 8½d; large sheep, 8d; and ewes, 6d to 7d per lb; lamb, 9d to 10d ditto; small pork pigs, 6s 6d; and large ditto, 6s to 6s 3d per stone.

FOREIGN.

Deptford, Thursday.—Only a small number of beasts from the United States were offered, and met a firm sale at 4s 3d to 4s 4d per 8lb, to sink the offal.

Yorkhill, Monday.—The weekly sale of American cattle was held in the afternoon, when there were in the lairages 249 cattle landed by the Salacia (s), from Baltimore. Bullocks, as is generally the case, formed the greater proportion of the total number, but there were also a number of bulls. The cattle as regards quality were rather above the usual standard, many of the bullocks being prime beasts in a well-finished condition. Bulls were fully up to the average, and showed well. There was a good attendance of buyers, both wholesale and retail, and business during the sale was of a very satisfactory character. The deadweight quotations are as follow:—Best bullocks, 66s per cwt; secondary, 63s; bulls, 54s to 57s, according to quality and finish.

Yorkhill, Monday.—At a sale of Canadian sheep there were penned in the sheds 629 sheep landed by the Tritonia (s), from Montreal. The sheep were of a very handy sort, good, useful weights, and were very suitable for the requirements of the trade. There was only a small attendance of buyers, and trade was very slow throughout. The deadweight quotations may be given as follows:—Best yearlings, medium weight, 7¾d per lb; secondary, 7¼d; best wedders, 7¼d; secondary, 7¼d; best tups, 5½d; secondary, 8d.

WOOL.

London, Friday.—Wool, English, per pack of 240 lb—Fleeces, Southdown hoggs, £8 to £11 10s; half-bred hoggs, £7 to £8 10s; ditto wethers, £6 10s to £7 10s; Kent fleeces, £6 to £7; Southdown ewes and wethers, £8 to £11 10s; Leicester ditto, £6 to £7. Colonial, per lb: Victorian, fleece, superior, 1s 9d to 1s 10d; scoured good, 1s 10d to 2s; scoured average, 1s 8d to 1s 9d; greasy average to fair, 11d to 1s; New South Wales, scoured average, 1s 5½d to 1s 6½d; greasy average, 9d to 10d; South Australian, greasy average, 7d to 8d; New Zealand, scoured average, 1s 6½d to 1s 7½d; greasy average, 9d to 10d; Cape scoured superior, 1s 8d to 1s 10d; fleece average, 10d to 11d; greasy average, 7½d to 8d; Natal, scoured, 1s 4d to 1s 4½d; greasy average, 8d to 8¼d. Crossbreds, greasy, Victorian, good to superior, 11¼d to 1s 0½d; New Zealand fine, 10d to 10½d; ditto medium, 8½d to 9d; ditto coarse, 5½d to 7d.

Bradford, Thursday.—Practically no business to-day in fine wools. With the recent fall in prices and the approach of the London sales, both holders and users hold aloof, and the position is one of extreme caution all round. English wools remain very cheap, with few transactions, despite the stiffness of sellers at country auctions. Mohair and alpaca continue firm, with steady consumption.

Canterbury, Saturday.—A considerable trade doing, notwithstanding the low prices. Kent wool is quoted up to 6½d per lb, but seldom makes more than 6d; lambs' wool, 4d to 5d; half-bred wool ranged up to 7¼d; and Downs from 8d to 10d per lb.

Leicester, Saturday.—The wool market continues in a quiet state, in view of the London colonial wool sales, which open to-morrow. The general feeling is that there will be a drop in prices.

FEEDING STUFFS.

London, Thursday.—Linseed has continued to improve and the market closes firm; it is reported that American shippers are buying back their contracts. Calcutta to London spot 54s 9d, near 54s 9d, June-July 55s 3d, July-August 55s 3d. Hull.—Calcutta, afloat, 56s. Azoff, Black Sea, September-October, 49s. Duluth, October-November 43s. To the Continent we quote Bombay, June-July, and July August 55s. Calcutta, June-July 54s 6d. Linseed oil. Spot and near positions remain steady, and forward oil is in good demand at improved rates. We quote spot pipes £34 10s, barrels £34 15s, July-August £34, September-December £30 15s, January-April £28 2s 6d. Hull spot naked month £34 12s 6d, July-August £33 15s, September-December £29 12s 6d, January April £27 5s. Linseed cakes quiet and unchanged. Rapeseed continues to be firmly held, but busines is not very active. Brown Calcutta to London, 43s 6d sellers, 42s 6d buyers. To the Continent, we quote, yellow Cawnpore, July-August 46s 3d; brown Cawnpore, 44s 6d; brown Calcutta, April-June 43s 6d. Danubian, July-September 41s. Ravison, October-November, Hull, 29s. Cottonseed continues neglected in London, but Hull continues firm. London, June £6 2s 6d sellers, July £6 2s 6d, August £6 3s 9d, November-January £5 18s 9d. Hull, spot £6, passage and June £6, July £6 2s 6d, August £6 3s 9d, November-January £5 17s 6d buyers.—THE PRODUCE BROKERS COMPANY LIMITED.

Mark Lane, Monday.—Linseed Cakes: The market continues to be only sparingly supplied, and, with a better demand, values are again higher, and have a tendency to further improve. Russian offers are scarce and beyond the views of buyers, but landed parcels meet a good enquiry at last week's full prices. Americans: There are very few obtainable either in warehouse or to arrive with the result that spot holders are asking more money. London made are in better request, and crushers have raised their limits 2s. 6d. per ton. Cotton cakes: There is a check to the downward tendency, and a fair trade has been done in spot Egyptian, while in forward positions an advance of 2s 6d per ton is now asked. English remain unchanged and steady. Decorticated are getting into a small compass, and the limited quantity on hand is firmly held. Rape cakes: Quiet. East India still offering; price unchanged. Maize germ meal: Supplies continue extremely small, and American is again fully 5s. per ton dearer, while English finds a ready sale at 2s 6d per ton more money. Rice meal: Rangoon in warehouse is dearer, and July-August shipment offers at an advance of fully 1s 3d per ton.

—PINNOCK BROS., Mark Lane.

Hull, Tuesday.—Linseed.—The market is firm to-day at the advance on the week of 2s to 3s per qr on both home-grown and foreign wheat, but buyers are less eager to go into stock at the advanced prices demanded. Barley unaltered. Oats command full prices. Beans, 6d per qr. dearer from scarcity. Maize in less compass, and both flat and round are 1s per qr. dearer than last Tuesday. Linseed.—Market has been firm throughout the week, with a gradual improving tendency. Cottonseed has shown more activity since our last, and good business done in old and new crop at improved prices. Linseed Cakes: Firm spot, and dearer forward.—Cotton Cakes, are 2s 6d cheaper spot, and 2s 6d dearer forward. Hemp.—Firm fine qualities scarce.—KEIGHLEY MAXSTED AND CO.

WATERLOO ROUND FEEDING CAKES, £6 12s 6d PER TON; WATERLOO ROUND 97 PER CENT. PURE LINSEED CAKES, £8 17s. 6d. PER TON; WATERLOO ANGLO SHAPE 97 PER CENT. PURE LINSEED CAKES, £8 15s. 0d. PER TON; WATERLOO 97 PER CENT. PURE EGYPTIAN COTTONSEED CAKES, £4 7s 6d PER TON. ALL F.O.R. HULL.

MANURES.

Liverpool, Friday.—The market for fertilisers and feeding stuffs is inactive, as is usual at this period. Values are unchanged, excepting American linseed cakes, which are slightly higher on account of the firmness of holders at the ports of shipment in America; quotations subscribed. Nitrate of soda, best quality, i.e., guaranteed 95 per cent., pure, in bags, £8 to £8 5s per ton; East India bone meal, in bags, £4 15s per ton; kainit, prime 23 per cent., in bags, £2 7s 6d to £2 8s 9d per ton; linseed cake, American thin oblong, fair to prime, in bags, £7 2s 6d to £7 10s per ton; ditto, English, prime, in bulk, £8 to £8 2s 6d per ton; ditto, foreign round, prime, soft and oily, in bags, £7 17s 6d to £8 per ton; cottonseed cake, N.A., decorticated, prime, fairly soft, in bags, £6 11s 3d to £6 15s per ton; ditto, English, decorticated, prime very soft, in bags, £6 16s 3d to £7 per ton; ditto, English, undecorticated, prime, in bulk, £4 5s to £4 7s 6d per ton; cottonseed (crushed), 20 to 25 per cent. oil, prime, in bags, £6 15s to £6 17s 6d per ton; maize germ meal, English, prime, in bags, £5 to £5 2s 6d per ton; rice meal, Rangoon, as imported, in bags, £4 5s to £4 7s 6d per ton; Indian meal, coarse to fine grinding, prime, in bulk, 11s to 11s 6d per 240lb; linseed, fine bold feeding, in bags, £2 18s to £3 per qr. 416lb; N.A. cloverseed, new red, fair to good, in bags; D.N.S. brand, superphosphate of lime, guaranteed, 25 to 27 sol., in bags; ditto, ditto, 30 to 31 sol., in bags; ditto, ditto, 35 to 36 sol., in bags, basic slag, prime quality, guaranteed, 30 to 35 per cent. phos., in bags, per ton, nominal.—H. JONES LANGAR AND CO.

Winsford (Cheshire), Saturday.—Current prices for salt at the works:—Common white salt, 11s per ton; fine screened rock salt, 8s 6d per ton, for truck loads in bulk.—THE SALT UNION, LIMITED.

Destructive Farm Fire.—Early on Sunday morning last a disastrous fire occurred at Mollanbowie Farm, situated about a mile north-east of Balloch Station, and occupied by the Misses Miller. On the north side of the farm steading is the stable, in which were four horses. The hayloft was above, and at the east gable end the bothy occupied by the man servant. About 4 a.m. the crackling of the woodwork of the stable and hayloft awoke the man servant. By this time three of the horses were suffocated.

THE BALTIC.

A supplementary committee election at the London Corn Trade Association has resulted in the return of Mr. Alexander Blyth. The Association has made up four standards of Argentine wheat. As the quality and state of wheat from the River Plate have been a matter of much concern to millers, we strongly advise them to keep these type samples in their bureaux. They may be bought at the Association offices, 2, Lime Street Square, at a moderate price.

The work at Jeffreys Square is going on very rapidly, and the new "Baltic" will be a feature of St. Mary Axe from the beginning of the new century.

The arrivals of grain and seed laden vessels at ports of call for the week were nil.

The sailings of grain and seed laden vessels from ports of call for the week were:—7 wheat (1 Birkenhead, 1 Dublin, 2 Glasgow, 1 Hull, 1 Laurvig, 1 North Shields), 1 flour (Sligo), 1 bean (Irvine); total, 9.

Since January 1, 1900, the total arrivals have been 180 wheat, 13 wheat and barley, 6 flour, 8 maize, 1 maize and oats, 21 barley, 13 beans, 6 locust beans, 1 linseed, 2 canary-seed, 5 valonea; total, 256.

Last year during the same time the arrivals were 148 wheat, 8 flour, 3 maize, 6 barley, 1 barley and beans, 6 beans, 1 locust beans, 4 linseed, 4 canary seed, and 7 valonea; total, 188.

Wheat cargo sales of the week include Californian at 31s. 3d. on passage, 32s. 3d. July shipment; Walla Walla, 30s. 3d. on passage, 30s. 6d. July shipment; Argentine, 29s. 6d. July shipment; No. 1 Northern, 33s., July shipment; Manitoba, 33s. July shipment; Odessa Ghirka, 32s. 6d. July shipment; and fine Azima, 34s., also July shipment.

Maize cargo sales embrace Roumanian at 22s.; American, 21s.; Argentine at 21s. 6d.; and Caucasian at 21s. 9d., all for July shipment. For American nearly due 20s. has been accepted. Sales of other cargoes have been inclusive of Persian barley, 17s., July shipment; Saida beans, 27s.; July clipped white American oats, 15s. 3d., July; Calcutta linseed, 54s., July; American linseed, 49s. 9d., Oct.; Bombay linseed, 57s. 9d., July; Guzerat rapeseed, 46s., July; Egyptian cottonseed, £5 17s. 6d., Nov.; Azoff rye, 24s. 6d., Aug.; Azoff barley, 18s., Sept.; Syrian dari, 22s. July; and Wisconsin peas, 47s. July. The name of the month indicates shipment to be made before the last day thereof.

POULTRY.

The Management of Game Chickens

There are more Game chickens die when brought up in confinement than perhaps is the case with any other breed; not because they are delicate chickens, but because they are not managed properly. Game chickens require feeding rather differently from other breeds; if not they grow too much feather, which becomes very loose and fluffy. When they have a good range Game chickens should not be fed upon soft food, unless it is once or twice a week, and they are better without any. It is given them sometimes for the sake of putting a little bonemeal in the food, which often prevents them from getting weak in the leg, and, of course, the bonemeal cannot be given unless it is mixed in a little soft food.

French buckwheat and barley are the two finest grains for Game chickens, and a little hemp seed occasionally. The former should be used far more than the barley, as nothing tends to harden the feathers more. When Game chickens are brought up in confined runs almost every grain they eat ought to be buried in the soil so that they will have to scratch for it; as no chicken requires so much exercise to get them in good form as do Game. They are almost sure to go wrong when they are brought up in confined runs and fed as most people feed them, as they are so long in the legs, which get very weak unless they get plenty of exercise.

Some professional Game breeders, even where they have plenty of room, put them in long, narrow, wire runs, to give them a deal of walking about. They have the wire runs from 2ft. to 36in. high, and often feed them through the top of the wire to make them reach up. They will hold little pieces of dry bread along the top of the run as they walk up the side, the birds following them, always on the look out with their head right up to the sun, which gives them a very upright appearance. Those who visit the exhibitions are surprised to see how erect the Game birds stand. This is greatly owing to training them for that purpose from the time when they are quite young chickens. Game chickens should always have a little meat when kept in confinement; when they are not they can and [illegible] as they range so widely.

LIVE STOCK.

OUR PLATES.

For our plate this week we give a portrait of the first prize Longhorn bull at the show of the Royal Agricultural Society at York last month. Wootton Wonder, who is the property of, and was bred by, Mr. Jasper Selwyn, Kenilworth, is a dark brindle, born on January 30th, 1897, his sire being Pretender 2nd, and his dam Pink, by Baddesley.

STOCK AND SHOW NOTES

By Herdsman.

At a Council meeting of the Yorkshire Agricultural Society, held on Thursday, it was decided to accept the invitation of the Mayor of Bradford to hold the society's show at that town next year. The society had also been invited to Scarborough, but in consequence of the great expense of dealing with the traffic at that town, it was considered impracticable to accept the invitation. The testimonial to Mr. Marshall Stephenson, the late secretary, was considered, and it was stated that the subscription list will close on July 31st.

"It is reported that Wollaton Park is likely to be selected as the permanent show ground of the Royal Agricultural Society. It is the property of Lord Middleton, and Wollaton House is one of the finest mansions of the Holland House type in England; but the great manufacturing town of Nottingham is now almost at its doors, and hence it has been deserted by both Lord Middleton and his father before him. Its probable fate is to become to Nottingham what Aston Hall is to Birmingham, and some arrangement could probably be come to between the Royal Agricultural Society and the town of Nottingham by which the people of Nottingham should enjoy the place, save on the rare occasions when needed by the society." Thus says the *Birmingham Post*.

Messrs. John Thornton and Co. have just issued a new number of their Record of Shorthorn Transactions, which contains particulars of sales from January 1st to March 31st of this year, and particulars of forthcoming sales of Shorthorns.

Bertram, considered to be one of the best light weight hunters in England, was bought by Mr. J. N. Grey, of Peterstone, Cardiff, at the Peterborough Show on Wednesday for 1,000gs. Bertram, who was shown by Mr. J. H. Stokes, of Great Bowden, Market Harborough, won the first prize in his class, and was reserved for the championship to Gendarme, the Richmond champion, who is also now the property of Mr. Grey, who purchased him recently from Mr. T. D. John for £800.

Messrs. John Thornton and Co. will sell by auction on Tuesday, September 11th, at Trescowe, four miles from Bodmin and four from Wadebridge Station, both on the Great Western and London and South-Western Railways, Mr. R. S. Olver's extensive and old-established herd of pure-bred Hereford cattle, numbering about 100 head, as Mr. Olver's declining health compels him to retire from active work. The two-year-old and yearling steers, as well as the dairy cows and cross-bred stock of about fifty head, will be sold afterwards. This famous herd was founded in Mid-Cornwall by Mr. Olver's father about 1844, from stock of the Hewer blood brought into the county by the Earl of St. Germans. Mr. G. Lobb's herd, of Lawhitton, in the county, also supplied some good animals by Rory O'More 1711, a celebrated bull bred by Mr. Philip Turner, of the Leen, Herefordshire, the blood of whose excellent stock has been continued in the herd to the present day.

The strain of old Walford 871, first prize bull at the R.A.S.E. at Windsor, 1851, and winner of the first prize and the gold medal for the best bull of any age or breed at the International Show at Paris in 1855, was brought in with stock obtained from Mr. T. Longmore, of Walford, Ludlow. Daisy, bought from Mr. R. Davey, of Polsue House, Grampound, was by J. Rea's Zippor 2354, who was a son of the celebrated bull Sir Benjamin 1387. The herd now almost entirely consists of these strains, and will be found entered in the Herd Book from the fourth volume, when females were for the second time recorded.

First-class bulls were selected from eminent breeders, and if they proved good sires, were kept for many years. The herd is remarkably even and uniform, true to type, and of a very high character. Disease is unknown on the farm. Prizes have been always won at the county show, but it has not been the custom to exhibit elsewhere.

Trescowe is not alone famous for its herd of Hereford cattle. A breed of large black lop-eared pigs have been kept since the family occupied the farm in 1842. Their history is unknown. Mr. Olver's father used to speak of them as the long Leicesters, and as Leicester sheep were kept in the county since the last century, it is presumed they may also have had a Leicestershire origin. They are numerous in the county and have been as carefully and judiciously bred as the cattle, so that whenever exhibited they have been prize winners. Their hardy nature, early maturity, prolific character, and great feeding properties—pigs nine months old having been killed weighing upwards of 350lbs.—have made them fashionable Cornishman, first prize and champion boar at the Royal Cornwall Show, is now in service. A select stud of Shire horses and a first-class stallion have been kept on the farm for many years. Prizes have been won at the Royal Cornwall and local shows, and rarely have they been exhibited without honours. The horses and pigs will be sold on Tuesday, September 18th, and the sheep, poultry, and farm implements on the following day. The tenancy expires at Michaelmas. Catalogues will be issued in due time, and may be had of Mr. Olver, Trescowe, Washaway, R.S.O., Cornwall, or of the auctioneers, 7, Princes Street, Hanover Square, London.

The Oxford Down Sheep-breeders' Association have just issued Vol. XII. of the Oxford Down Flock Book. It contains the entry of seventy-four flocks, as against seventy-seven in Vol. XI., and individual entries of 247 rams—Nos. 3088 to 3335, and 121 ewes—Nos. 1187 to 1308. In the preceding volume there were entries of 346 rams and 134 ewes, so that the entries of both males and females have this year fallen off.

Messrs. Alfred Mansell and Co., the well-known live stock exporters of Shrewsbury, shipped on June 14th, per ss. "Westphalia," from Hamburg, eighteen Rambouillet Merinos, viz., nine rams and nine ewes, personally selected from one of the leading flocks of Merinos in France, which took the premier position at the recent Paris Exposition. These were consigned to Messrs. George Harding and Son, of Waukesha, Wis.

The entries for all stock and horses, butter, poultry, etc., of the Tring Agricultural Society's show will close on Friday next, July 6th, and as the amount of prize money offered is far in excess of anything yet put before the members, it ought to be a strong inducement to make a good entry, especially in the local classes for which the committee cater so liberally. There are first, second, and third prizes in all classes, and in some more important ones four prizes are offered. The secretary (Mr. T. J. Brown, 41, High Street, Tring) points out that there is still an opportunity to become a member of the society, and make entries for this year's show on August 9th, if attended to at once.

In reply to a question by Mr. Runciman as to the cost of conveying horses to South Africa, Mr. Macartney, in the House of Commons on Monday evening, stated that in the few cases in which it has been possible to arrange for the conveyance of horses from this country to the Cape on freight, the cost has averaged £25 10s. per horse landed. The charge of the Union Castle Line for the passage of a horse to Capetown was £35. Owing to the difference in the ships as to the rate of time, speed, consumption of coal, cost of fitting, the number of horses and men respectively which they carry, and the number of voyages which they make, it is impossible, without elaborate and lengthy calculations, to say what has been the average cost of conveying horses by transport.

The Highland and Agricultural Society have drawn up an attractive programme, which has just been issued, for their show at Stirling on Tuesday, July 17th, and three following days. The first day is devoted entirely to the judging of the stock and exhibition of implements. On each of the following days there will be parades of the prize animals, and also jumping. The general meeting of members will take place in the pavilion on the second day of the show at 12.30 p.m. The showyard will open each day at eight o'clock and close at 6.30 p.m., except on the last day, when the proceedings will be brought to an end at six o'clock. To add to the enjoyment of visitors, there will be a band, and also pipers.

The eighth annual sale of Messrs. Robertson and Son's Kerry and Dexter cattle will take place at the Church Farm, Babraham, Cambridge, on Wednesday, July 11th. Messrs. Robertson's herds are so well known all over the country that it is needless to give a descriptpion of them. As is well known, of late the animals have been exhibited with great success. In 1898 the herd achieved the great honour of winning, among many other prizes, both the fifty-guinea challenge cups presented by Lord Ashburton for the best Kerry bull and the best Dexter bull at the Royal Counties Show at Portsmouth (the sire and dam to be entered in the Royal Dublin Society's Herd Book), and as these cups had been won three years in succession, they both became the property of Messrs. Robertson. Last year, at the Bath and West of England Show at Exeter, first prize was won with the Kerry cow Eyvind-an-Treas; she was sold at the sale last year, and again won a first prize at the Oxfordshire Show this season, although eleven years of age. At the meeting of the Royal Counties Society at Windsor no less than four firsts, one champion prize, and the silver challenge shield offered by the Kerry and Dexter Cattle Society were obtained. This year at the Royal Bath and West and Royal Counties Shows numerous prizes have again been won. The catalogue includes the bull La Mancha Union Jack, which has carried everything before him this year, winning first and championship at the Royal, Royal Counties, and Bath and West exhibitions. The sale will commence after a one o'clock luncheon, and will be conducted by Messrs. J. Thornton and Co.

The third large consignment of boars and sows for Riga, Russia, left the Millwall Docks, London, on the 25th ult., instead of on the day following, owing to the dockers' strike. Mr. Sanders Spencer also shipped four fine young Large White sows on Thursday from Dover for France. These were some of the best specimens from the Holywell Manor herd.

For the convenience of those attending the sale of Miss Alice de Rothschild's Shorthorns at the Home Farm, Waddesdon, Bucks, on the day of sale the Great Central Railway will stop the following trains at Waddesdon Manor Station: The 8 a.m. from Leicester and the 8.15 a.m. and the 4 p.m. from Marylebone.

CATTLE.

Sale of Shorthorns and Southdowns at Sandringham.

On Friday a number of Shorthorn cattle and Southdown sheep from the Sandringham herd and flock, the property of H.R.H. the Prince of Wales, was held at Wolferton, Norfolk. As usual at the periodical sales of the live stock productions of the Royal estate in Norfolk, there was a very large and influential attendance, not only from various parts of the country, but from the Colonies, for whose comfort and convenience every possible arrangement was made, on each side of the ring being a temporary canvas covering with tiers of seats, while on the left was a special marquee for the Prince of Wales and his guests. The sale was fixed for two o'clock, and at that hour the Prince of Wales entered the enclosure, and was lustily cheered by the large number of visitors who had already assembled. His Royal Highness was accompanied by a number of distinguished people, amongst those having a seat in the Royal Pavilion being the Maharajah of Cooch Behar, the Marquis of Waterford, the Earl of Feversham, the Earl of Crewe, Lord Rathdonnell, Lord Brougham, Lord Lilford, Sir Nigel Kingscote, Sir Jacob Wilson, Sir John Gilmour, Sir Oswald Mosley, Captain Duncombe, Sir Saville Foljambe, Mr.

Gordon, Mr. Russell Colman, Sir Ernest Clarke, and Mr. Crutchley.

Mr. John Thornton, in opening the sale, remarked that on the occasion of the last Shorthorn sale they had the honour of congratulating the Prince of Wales on the great success of Persimmon. This year another Shorthorn sale was taking place, and they had again to congratulate his Royal Highness upon the success of Diamond Jubilee—(applause)—a double event, both horses bred upon that estate, bearing out the truth of the old adage, "Good blood will tell."

The sale opened with the Shorthorns, of which there were catalogued forty-one cows and heifers, two calves, and thirteen bulls. The highest price obtained was 250gs., paid by Her Majesty the Queen for Moss Rose, a handsome red, calved in March, 1897, of which Pensive was the sire and Red Rose the dam. The next highest price was 230gs., given by Sir John Gilmour for Spring Rose, the sire being that famous bull Celt and the dam Rose of Brougham. The Queen was a purchaser for 47gs. of Ruling Beauty, a roan, calved last December. In the bull classes Ringmaster, calved last November, fetched 200gs., being acquired for exportation to South America. Following upon the disposal of the Shorthorns came the turn of the Southdowns. The 140 yearling ewes offered produced £454 10s., or an average of nearly £3 5s. Ten yearling rams subsequently put under the hammer realised £159, or an average of £15 18s. The highest price paid in this class was 52gs., given for a magnificent animal purchased by Mr. Drummond for exportation to Canada. Ewes and rams together fetched just under £4 2s. per head.

Sale of Jersey Cattle at Ashwicke Grange.

The entire choice herd of Jerseys belonging to Mr C. H. Bramley Firth were sold by auction on Wednesday, at Ashwicke Grange, Marshfield, Chippenham, by Messrs. John Thornton and Co. A few animals from the old-established herd bred by Mrs. Peel at Pembridge, Herefordshire, were also sold. The cattle had never been exhibited, but were a hardy and well-grown lot, mostly greys and fawns, several of the cows being in full profit. The average for thirty-six head was just over £16.

The following is a list of the principal prices realised:

COWS AND HEIFERS. Gs.

Brown Bet 2nd, Vol. vi., p. 76, whole colour, c May, 1892, s Rosy's Duke 3738 ..... Mrs. Kennedy 21

Purseproud, whole colour, c Feb., 1899, s Persimmon 5693
Mr. J. F. Hall 17

Sale of Mr. Antony Gibb's Jerseys.

An important sale of Jersey cattle took place on Tuesday at Tyntesfield, near Bristol, when Messrs. John Thornton and Co. offered nearly all the entire herd belonging to Mr. Antony Gibbs. The animals were a good, useful lot, and included a number of prize winners at the Royal, the Bath and West, Devon County, and also local shows. Moreover, prizes have been won for butter, and two years in succession the first prize for butter had been won at the Royal Show at Maidstone and York. The fact that butter could be sent from a farm such as that to two such different districts as Kent and Yorkshire, and take first prize in each case, proves that it must have been a good class article. There was a good attendance of buyers, but the majority of the animals were obtained at cheap prices, and the forty-three head only realised a total of £656 15s. 6d., or an average of £15 5s. 6d. The top figure of the sale was 30gs., paid by Lady de Rothschild for Matilda, the winner of several awards at various shows. Below will be found particulars of the principal lots sold, together with their purchasers, prices, etc.:—

COWS AND HEIFERS. Gs.

Mayfair 2nd, Vol. x., p. 291, nearly whole colour, c April, 1893, s Frivol 2454 ..... Mr. C. C. Tudway 15

Matilda, Vol. x., p. 290, whole colour, c Jan., 1896, s Director 5524 ..... Lady de Rothschild 30

Rose of Weston 7th, whole colour, c May, 1896, s Blackie 5478 ..... Mr. A. Baker 29

Arlina 2nd, Vol. xi., p. 197, whole colour, c Nov., 1896, s Visitor 5763 ..... Mr. H. J. Savory 16

Lady Blanche, whole colour, c Dec., 1896, s Skip Jack 5397 ..... Mr. W. P. Bridgman 17½

Patchwork 2nd, broken colour, c Dec., 1896, s Kruger 5615 ..... Mr. T. Dyke 27

Good Prices for Jerseys in America.

Some splendid prices were obtained for Jerseys at a sale of animals belonging to Mr. T. S. Cooper, of Coopersburg, Pa., U.S.A., held on May 30th. The animals were a grand lot, and the bidding for them was very keen, eighty-three realising an average of over £70 each. The top figure of the sale was 1,600 dols., or about £320, and this was paid for a heifer calved on February 1st 1898, named Golden Sultana, by Mr. S. H. and H. Scott, who also paid £200 each for Lady Vista and Velasquez, calved June 20th 1898, and Golden Lad's Solid Gold, calved February 25th, 1897. Golden Lad's Pretty Rose, calved in June 1897, realised £265, the purchaser being Mr. M. S. Beltzhoover. Several other animals were sold at prices well over £100, and below we give particulars of them, together with purchasers' names etc.

Shorthorn Sales in the United States.

Shorthorns still continue to make good prices in the United States. In the first week of June a sale of Shorthorns from the herds of various well-known Indiana breeders—the first of its kind—was held at Indianapolis, and very good results were obtained. The animals were mostly young ones, and were all of good quality. The highest price reached was £150, for the imported Cruickshank cow Sunflower, purchased by Mr. E. E. Souers, Warren, Ind., whilst the highest price bull, Cherub of Ashburn, was bought by Mr. L. E. Jones, Rob Roy, Ind., the figure being £100. No other animal made three figure prices, but several realised over £60, the nearest approach to the century being £96, which was given for a yearling heifer named Marshal Abbotsburn. Altogether fifty-four animals were sold for an aggregate of £2,294, or an average of about £42 10s.; forty-one females realised £1,837, and thirteen bulls £457.

On the day after the above sale (June 7th), a number of Shorthorns belonging to Mr. J. W. Harper, La Fontaine, Indiana, were disposed of, but though there was a good attendance of buyers, who were eager to purchase, prices did not rule so high as on the preceding day. Here the top figure was £60, given for Miss Lancaster, a red cow calved in August, 1896, and her calf. Only one other animal realised £50 or over, and that was also a female—Gilberta, a red, calved December 14th, 1893. £41 was the top price for bulls, this being given for Baron Success, a red, calved on January 15th, 1896. Forty-one head were sold altogether, for a total of £1,165, thirty-one females making £963 and the ten bulls £202.

The Foot-and-Mouth Disease Restrictions.

At a meeting of the magistrates of the Loddon Petty Sessional Division held at the Town Hall, Loddon, on Wednesday morning, the following resolution in reference to the recent foot-and-mouth restrictions was unanimously adopted:—"That in view of the serious loss sustained by farmers during the late outbreak of foot-and-mouth disease, by reason of whole Petty Sessional Divisions being included in the prescribed area instead of a circle of parishes surrounding the infected place, and of the extreme stringency of the Orders made, the Government be earnestly and respectfully requested that in view of any future outbreak of cattle disease the Committee of the County Council should be consulted both as to the area and nature of the proposed restrictions before they take action in the matter." The Justices present were Messrs. Henry Smith, George Holmes, John Holmes, J. G. Kenyon, E. T. de Poix, and R. H. Denny. A copy of the resolution was ordered to be forwarded to the Prime Minister, and also to the Clerks of the various Petty Sessional Divisions in the county affected by the recent restrictions.

Transactions in Store Stock.

[*From the Irish Department of Agriculture and Technical Instruction.*]

There was only a small supply of both cattle and sheep at Elphin Fair, co. Roscommon, on Monday. The cattle met a good demand, especially for calves, but sheep sold poorly. Prices:—Calves, first class, £3 5s. to £6 5s.; second class, £2 10s. to £4 10s. Yearlings, first class, £8 10s. to £9 10s.; second class, £7 to £8. Two-year-olds, first class, £12 to £12 15s.; second class, £9 to £11 5s. Springers, first class, £18 to £21. Lambs, first class, £1 5s. to £1 8s.; second class, £1 to £1 4s. Hoggets, first class, £2 to £2 5s.; second class, £1 12s. to £1 14s. Two-year-olds and over, second class, £2 3s.

At Wicklow Fair, which was held on Tuesday, there was a medium supply of cattle. A fair demand prevailed for two-year-olds in condition, but a number of younger cattle which were mostly in poor condition remained unsold. Prices:—Yearlings, second class, £5 5s. to £7 5s. Two-year-olds, first class, £11 5s. to £13 10s.; second class, £8 to £11 5s. Three-year-olds, second class, £13. Springers, second class, £14 15s.

At Navan Fair (co. Meath), held on Monday, there was only a very small supply of cattle. A good demand prevailed except for springers, a number of which remained unsold. Prices:—Calves, first class, £6 5s. to £7; second class, £5. Yearlings, first class, £8 15s. to £9 5s.; second class, £6 17s. 6d. to £7 15s. Two-year-olds, first class, £11 to £12; second class, £9 5s. Three-year-olds, first class, £15 10s. Springers, first class, £14 10s. to £16 10s.; second class, £11 15s. to £12 10s.

HORSES.

Sale of Hunters at Albert Gate.

Some remarkably good prices were obtained for hunters at Messrs. Tattersall's sale at Albert Gate, Hyde Park, on Monday. Two belonging to Mr. C. E. Hay changed hands at 280 guineas each, whilst one of the Belvoir Hunt horses, sent up by Sir Walter Greenall, made 270 guineas. Of the Irish horses from the stud of Mr. J. C. Dun Waters M.F.H., Becky's Boy, by Delight, realised 250 guineas. Another owner that sold off was Mr. H. Cumberland Bentley, a talented writer of sporting prose and sonnets, who obtained 200 guineas respectively for Black Prince and Baronet. As showing the value of a good horse from the Emerald Isle, an offer of 270 guineas was accepted for Mr. H. Lindsey Fitzpatrick's Killeen, a brown gelding by Deramfield.

SHEEP.

Wool Fairs and Sales.

Birmingham.

The annual wool sale, conducted by Messrs. Lythall and Walters, in conjunction with the Butchers' Hide, Skin, and Wool Company (Limited), was held at their extensive warehouses on Thursday. There was a large attendance of buyers. Competition for the better class wools was very brisk. Both Shropshire and Southdown sold up to 9¼d. per lb., while the majority of the lots sold at 9d., 8¾d., and 8½d. Unwashed made up to 7½d., Welsh and Cheviot 6¾d., and Scotch 4¾d. A thorough clearance was effected.

Wool Sale at Loughborough.

The annual wool sale at Loughborough took place on Monday on the Nottingham Road Football Ground, Messrs. German and German being the auctioneers. There were about 5,000 fleeces on offer, comprising Shropshires, crossbreds, and longwools. The highest price obtained was 8¼d. per lb., and the lowest 4¼d. per lb. The chief contributors were Lord Belper (Kingston Hall), the Rev. J. Martin (Charley Hall), Messrs. S. Wells and Sons (Kegworth), J. W. Taylor (Shelthorpe), A. Martin (Stanford), Collington (Sileby), J. Griggs (Mountfields), J. Tansley (Long Whatton), W. Hayes (West Leake), H. Beeby (Quorn), W. E. Porter (Normanton-on-Soar), Farmer (Belton), J. Sim (Hoton), J. H. Bowley (Donington Park), J. Handley (Barrow), Frekelton (Shepshed), Spence (Park Grange), W. H. Blunt (Belton), F. Keightley (Hathern), G. Hibbert (Rempstone), Holwell (Wymeswold), Moody (Longcliffe), Sharp (Seagrave), and Green (Springbarrow Lodge).

Ipswich Wool Sale.

Messrs. Robert Bond and Sons' June wool sale took place at the Drill Hall, Ipswich, on the 22nd ult., when about 45,000 fleeces were entered. The attendance of buyers was the largest ever attracted to the town, and the bidding was very brisk, the catalogue of nearly 400 lots being run through in just two hours. The top price of the day was 11½d., given by Messrs. William Walton and Sons, of Halifax, for two sheets of Southdown hogget from Mr. W. E. Long, the same consignor's Southdown ewe going at 11¼d. to Messrs. J. and T. Beaven, of Holt, Trowbridge, who also gave the like figure for the like breed of wool from Sir Savile B. Crossley, Bart. Southdown ewe from Mr. J. A. Hempson, Mr. William Biddell, and Mr. F. Penn realised 10¼d., as did Southdown hogget from Sir S. B. Crossley, Mr. C. H. Berners, and Mr. William Biddell; whilst Southdown ewe from Captain E. G. Pretyman, M.P., Mr. A. H. E. Wood, and Mr. C. T. Partridge fetched 10d. Black-faced hogget from Messrs. Flick and Son, Mr. R. Stedman, Mr. H. Hurren, Mr. C. Sewell, and the executors of Mr. W. N. Waller, made 9¾d.; black-faced ewe and hogget from Mr. P. J. Read, 9½d.; and black-faced ewe from Mr. J. J. Creasey, 9½d. The black-faced variety of wool, of course, formed much the largest portion of the consignment, and it was a matter of remark that a much greater proportion of the wool than in some former years was sent in its unwashed state. The top prices for half-bred wool were: Ewe 9d. and hogget 8¾d., a material advance on the corresponding sale of last year. It will, indeed, be seen by reference to the table of comparison which we give below that all descriptions of wool showed a very appreciable rise since June, 1899.

The following table shows the prices realised this year and the three preceding years for the principal washed and unwashed wool:—

	1897.	1898.	1899.	1900.
	Washed.			
	d. d.	d. d.	d. d.	d. d.
Southdown hogget ..	10½ to 8½	10 to 7¼	10 to 7½	11½ to 8¾
Southdown ewe	9½ to 8½	9¾ to 8	10 to 7¾	11½ to 8¾
Black-faced hogget....	9½ to 7¾	8½ to 7¼	8½ to 7	9¾ to 6¾
Black-faced ewe	8¾ to 6½	8½ to 7¾	8½ to 7	9½ to 6½
Half-bred hogget.....	9 to 8¼	8½ to 7¾	8 to 6¼	8¾ to 7¼
Half-bred ewe	9 to 8¼	8¼ to 7¾	7½ to 6¼	9 to 6
	Unwashed.			
Black-faced hogget ..	6 to 5½	5¾ to 5½	6 to 5½	7 to 5¾
Black-faced ewe	5¾ to 5½	5¾ to 5½	6 to 5½	6¾ to 5¾
Half-bred hogget	6½ to 5½	6 to 5½	5¼	6¼ to 5½
Half-bred ewe	6½ to 5¾	5¾ to 5½	5½ to 5½	6 to 5½

Southdown unwashed wool sold as follows:—Hogget 7d. to 6d., and ewe 6¾d. to 6¼d.

Northampton.

The annual wool fair in connection with the Northamptonshire Agricultural Society, was held in the Market Square, Northampton, on Thursday, when the pitch was not up to that of last year. The number of fleeces pitched was 24,342 against 28,600 last year. In 1898 it was just over 23,000, in 1897 25,383, and in 1896 26,630. The chief contributors were Messrs. Whiting Brothers, Castlethorpe, 1,933; Messrs. Fairey and Sons, Harrold, 1,168; Mr. W. Whitehead, Shelton Hall, 1,112; the Exors. of Mr. G. Savage, Stoke Bruerne, 1,038; Mr. J. O. Adams, Whitehall, Weldon, 774; Mr. J. H. Pike, Haversham, 600; Mr. R. Britten, Abington, 576; Mr. T. W. Montgomery, Woodford, 494; and Mr. C. Sargeant, Brafield, 420. Though the pitch was not nearly so large as last year, the prices showed a splendid and gratifying advance. The highest price obtained was 20s. per tod against 18s. 9d. last year, and the lowest price 12s. 9d. against 8s., while the average price was 18s. 5¾d. against 16s. 8d., or only 3¾d. less than the highest price last year. The auction sale was, as usual, conducted by Mr. T. C. Woods (Messrs. Woods and Co.), who offered about 15,000 fleeces, and the bidding was generally brisk and the prices good.

Huntingdon.

The wool fair at Huntingdon was held on the Commons, on Wednesday, and was well attended. Trade was brisk, and prices in advance of last year. A larger number of graziers and farmers exhibited, but the weight of wool proved below the average. Total quantity shown, 981 tods 27lbs., the average price being from 16s. 9d. to 18s. per tod. There was a good sprinkling of buyers from the north and midland counties at the sale.

Leicester.

Leicester wool fair took place on Tuesday, in dull weather. There was an average attendance of buyers, and the total pitch was 32,000 fleeces, or upwards of 8,000 tods. The quality was the poorest for some years past, and the wool was not in good condition. Longwools made from 6d. to 7d. per lb., half-breds 7d. to 8d., and Shropshires 8d. to just over 9d. per lb. for the best. The demand was active.

PIGS.

Mr. Long on the Stamping Out of Swine Fever.

In the course of the debate on the Civil Service Estimates in the House of Commons on Friday week, some remarks were made respecting swine fever and cattle disease. Mr. Price criticised the restrictions enforced by the Board of Agriculture in places where disease among animals broke out, and moved to reduce the vote of £11,028 for salaries and expenses of the Board by £100.

Mr. Strachey asked what success the Government had had in their endeavour to stamp out swine fever, and Mr. Martin urged the necessity of greater care being exercised in the feeding of the animals.

Dr Farquharson defended the restrictions of the Board of Agriculture in connection with the outbreak of disease among cattle. Isolation, he said, was the only way to stamp out foot-and-mouth disease. Hydrophobia had been practically stamped out by the Muzzling Order, and he congratulated the right hon. gentleman (Mr. Long) on the vigour, tenacity, and courage with which he had carried out an unpopular policy. Mr. H. Foster also heartily supported the policy of the President of the Board of Agriculture.

Mr. Long said there had been a considerable decrease in the cases of swine fever, especially during the past sixteen weeks of the present year, and he believed that if his Department was supported by the local authorities the disease would be as satisfactorily dealt with as had other diseases affecting animals. The disease was more insidious than any other disease. As to the character of the disease there was no doubt. The remarks of magistrates upon the legislation which they had to administer in dealing with these cases had been referred to. No one more deprecated such remarks than he did, and it was deeply to be regretted that when magistrates found infectious diseases of this kind prevalent in their districts they seemed disposed to shirk their responsibilities on account of the unpopularity they were likely to incur in carrying out the law. (Cheers.) These magistrates seemed desirous of throwing all their responsibilities on the officers of the Department. There was no country in the world at this moment which stood in such a satisfactory position in regard to diseases of animals as did the United Kingdom, and this was due to the vigorous policy of the officers of his Department, who had done their work most admirably. (Cheers.) He regretted that farmers were called upon to make such sacrifices in the loss of their stock by disease; but the loss was infinitely less than it would be if disease was allowed to run riot among their flocks or herds. If hon. members could induce the Treasury to give larger compensation he should be delighted, but he feared that any effort in that direction would be useless, no matter which party was in power. (Cheers.)

Mr. Channing congratulated the Board of Agriculture upon the vigorous manner in which their policy for stamping out cattle disease had been carried out, but thought that there should be greater promptitude in dealing with fresh outbreaks.

The amendment was negatived without a division, and the vote was then agreed to.

Some Experiments in Pig-Feeding.

In continuation of the reports of various experiments on pig-feeding for bacon which have recently appeared in this Journal,* it may be interesting to notice here the results of an experiment undertaken by the Agricultural Department of the Yorkshire College, and also some practical observations made by Mr. John M. Harris, in an article published in the Journal of the British Dairy Farmers' Association, on the results of a series of experiments in pig-feeding carried out by a local committee at Calne, Wilts.

The object of the experiment carried out at Garforth under the direction of Professor Campbell, of the Agricultural Department of the Yorkshire College Leeds, was to determine the value as flesh formers of sharps and maize respectively mixed with barley meal, and also the effect of feeding the rations in a sloppy and in a dry condition. To one lot of pigs gluten was also given with the ordinary food for the purpose of determining the effect of a higher albuminoid ration. Before entering upon the main experiment the pigs were tested over a certain period in order to secure as far as possible uniform lots. On August 10th last, twenty-four pigs, each about seven weeks old, were separated into lots of six each and fed uniformly for 124 days on a mixture consisting of one part barley meal, one part bran, and two parts sharps, served with about four times its weight of water in which it had been previously steeped. At the conclusion of this preliminary test it was found that, taking the whole period of 124 days into consideration, the average live weight increase per head per day was practically the same for each lot. From this result it appears that, on the whole the individuality of the animals may be overcome by taking a sufficient number in each lot, and by exercising due care at the outset in their selection. The practice of making preliminary tests of the character described is therefore commended by Professor Campbell to all engaged in experimental work in the feeding of animals; that such precautionary trials are necessary is, he thinks, amply proved by the merited scepticism with which reports on feeding experiments have been so often received by farmers.

The main experiment began on December 19th last, when the pigs in each lot were fed on the following rations:—Lot 1, two parts barley meal, two parts sharps, and one part gluten; Lot 2, one part barley meal and one part maize; Lot 3, one part barley meal and one part sharps. In each of these three lots the ration was given with four times its weight of water. In the case of Lot 4 the ration was similar to that of Lot 3, one part barley meal and one part sharps, but it was given with only twice its weight of water, so that while the food given to Lot 3 was in the usual sloppy condition, that given to Lot 4 was of the consistency of oatmeal porridge. The pigs in each lot were given as much as they

* From the "Journal" of the Board of Agriculture for June

LONGHORN BULL, "WOOTTON WONDER."

THE PROPERTY OF AND BRED BY MR. JASPER SYLVYN, KENILWORTH.
WINNER OF FIRST PRIZE AT THE YORK ROYAL SHOW, 1900.

would eat. The experiment was continued for eight weeks, and the principal results are shown below :—

—	Lot. I.	Lot II.	Lot III.	Lot IV.
	c. q. lb.	c. q. lb.	c. q. lb.	c. q. lb.
Weight on Dec. 12	9 2 12	9 2 0	9 3 14	10 0 0
Weight on Feb. 6	12 3 6	12 1 4	12 3 12	14 0 10
Total increase in live weight during experiment	3 0 20	2 3 4	2 3 26	4 0 10
Increase per head per day	1·1	0·9	1·1	1·4
Total pork, in stones of 14 lbs.	77·1	74	77·9	85·2
Lbs. food consumed during the experiment	1,904	1,904	1,904	2,254
Lbs. food consumed per head per day	5·7	5·7	5·7	6·7
Lbs. food for 1 lb. increase in live weight	5·3	6·1	5·7	4·9

The effect of adding maize and sharps respectively to the ordinary ration of barley meal is shown by the results obtained with Lots 2 and 3. The pigs receiving sharps yielded a higher percentage of pork, and each pound of increase in live weight was obtained with 0.4lb. less meal than when maize was substituted. If Lot 1 is contrasted with Lot 3, it will be seen that the higher albuminoid ration given to the former yielded a greater increase in live weight, but the total pork was about the same in each case.

The most marked feature of the experiment is, however, the contrast in the results obtained with Lots 3 and 4. The pigs in each of these lots received the same kinds of food, but the quantity of water mixed with the ration of Lot 3 was double that given with the food of Lot 4. It will be noticed that the pigs which received the drier ration yielded 124lbs. more increase in total live weight, 7.3st. more pork, and produced each pound of increase with a consumption of 0.8lb. less meal. The extra food taken by Lot 3 was therefore, as Professor Campbell points out, evidently wasted in heating up the large supply of water which the pigs were obliged to consume.

The conclusions drawn from the experiment are "that the mixture of barley meal and sharps is better than barley meal and maize; that the latter mixture may be somewhat improved by the addition of a highly nitrogenous meal; and, finally, that a great deal of food may be wasted, particularly in winter, when pigs are fed upon food containing more water than is necessary for the requirements of the body."

It appears that the ration given to Lot 4 cost about 19s. more during eight weeks than that given to Lot 3, but the value of the increased weight of pork of Lot 4 was 42s. 6d., thus leaving a balance of 23s. 6d. in favour of the drier food. Professor Campbell points out that the period during which the pigs were on different diets was only eight weeks, and that had the experiment been prolonged the results would undoubtedly have been more marked.

The feeding experiments with which Mr. Harris' article deals were caried out at Calne with the aid of the Wilts County Council and with other local assistance. Up to the present sixty-four experiments, involving twenty-four diets, have been undertaken with 640 pigs, and of these twenty-four diets nine have been employed on an average three times each, so that the results obtained, which are embodied in the table given below, may be regarded as fairly reliable.

In a few prefatory remarks, Mr. Harris expresses the opinion that the breed of pig which has been found by bacon curers most suited for the production of lean bacon is the Large White Yorkshires, either pure or crossed with pure Berkshires; and that a pig for profit should weigh at six or seven months of age from 130lb. to 170lb. dressed weight.

Rations.	Cost of Producing 20lbs. Increase — Dressed Weight.	Value of Diet as Determined by	
		Suitability of Flesh Produced for Bacon.	Suitability and Quantity of Flesh Produced, and by rate of Increase in Dressed Weight.
	(1) s. d.	(2) Points.	(3) Points.
Barley meal ad lib., separated milk and 3 lbs. potatoes per diem	4 7½	967	1,000
Barley meal and separated milk	5 3	988	903
Maize meal and separated milk	4 2	945	877
Three parts of maize meal, one part bean meal	4 11	951	590
Barley meal	5 1¾	974	519
Three parts of maize meal, one part pea meal	4 7½	908	486
Maize meal	4 6¾	939	484
Two-thirds barley meal, one-third bran	5 0¾	990	449
Two-thirds maize meal, one-third bran	4 5½	964	404

The separated milk was fed at the rate of one gallon per pig per diem.

The first column of the table shows the actual cost, as shown by the Calne experiments, of obtaining 20lb. increased dressed weight, irrespective of the quality of the flesh and the rate of increase, the prices of food being taken at the following rates, viz. :—Barley meal, £5 ; maize meal, £4 10s. ; bran, £4 ; pea meal, £6 3s. 4d. ; and bean meal, £7 15s. per ton ; separated milk 1d. per gallon ; and potatoes, 2s. per sack of 240lb. In the second column the diets are compared solely from the point of view of the suitability of the flesh obtained for the production of the best bacon : the best quality being indicated by 1,000 points. In the third column the foods are compared from the point of view not only of the quality of the increased dressed weight, but also of the time required for its production, 1,000 points being assigned to the diet which gave the best results.

It will be seen from the third column that, judged from the standpoint of general efficiency, the three diets first mentioned were found to be more profitable than any of the others. The chief factor in determining the position of the different foods when compared for their general efficiency is the rate of increase in dressed weight ; thus, while the average weekly increase in dressed weight with a diet of barley meal, separated milk, and potatoes, was 15½lb., that with barley meal and separated milk was 10¾lb., with maize meal 7lb., and with maize meal and bran only 4¾lb. Hence it arises that bran, while standing first among the supplementary foods for the production of the best bacon (see column 2), occupies a low position for general efficiency (col. 3) on account of the slow rate at which the pigs fed on it increased in live weight, and because a high percentage of the increased live weight was lost when the pigs were killed and dressed.

Arranged in order of merit for cheapness, in conjunction with efficiency, the nine diets mentioned above fall as follows :—

Barley meal, separated milk, and potatoes.
Maize meal and separated milk.
Barley meal and separated milk.
Maize meal and bean meal.
Maize meal and pea meal.
Barley meal,
Maize meal.
Maize meal and bran.
Barley meal and bran.

The net results of the experiments show, in Mr. Harris's opinion, that it is advisable to use barley meal, soaked in cold water, as a staple food, and to supplement this as far as possible by fresh, separated, skim, or butter milk, at the rate of one gallon per pig per day, and when procurable by boiled potatoes also, not more than 3lb. or 4lb. for each animal ; while barley meal and whey (where cheese is made) might be usefully supplemented by about 1lb. of bean or pea meal per day. As regards the comparative values of barley and maize, the experiments are held to have demonstrated that the former is rather more valuable than the latter as a staple food for pigs intended for lean bacon ; though when barley is much dearer than maize—say, 10s. per ton—maize may prove to be more economical, especially when fed in conjunction with a suitable proportion of food rich in albuminoids, such as separated milk or bean meal. Where dairying is not carried on, bran, toppings, bean meal or pea meal may, it appears, be used with care as a substitute for milk, but the dairy farmer is held to possess a great advantage in the profitable production of the class of pig required for making the best quality lean bacon.

Sale of Mr. J. P. King's Berkshires.

On Thursday, Mr. J. P. King's famous herd of pure-bred Berkshire pigs, one of the oldest established and most noted breeds in the kingdom, was submitted to public auction by Messrs. Franklin, Gale, and Newton, and the sale brought together most of the leading breeders of Berkshire pigs, as well as many of the principal agriculturists of the immediate neighbourhood. On the farm buildings were displayed some dozens of prize cards, showing the many honours the herd had taken at leading shows in all parts of the country. Some 300 Hampshire Down sheep were also penned, which were also offered for sale after luncheon.

Mr. J. J. Gale, who officiated at the sale ring, in a terse and business-like speech, said the fame of Mr. King's pigs was known not only in every part of the United Kingdom, but also in every part of the inhabited globe, and he called attention to the remarks that well-known judge, Mr. Heber Humfrey, has written respecting the herd, which accompanied the catalogue. Very many prizes had been won by the herd during the last forty years, and it was with a feeling of deep regret that Mr. King was dispersing it. He felt, however, that the keeping up its standard of excellence was too great a strain on his health, and that if he could not do it in its entirety he should give it up altogether, and every pig he possessed was in the catalogue, except one or two that had met with accidents. Speaking of the celebrated Ruby strain, which was the foundation of the herd, Mr. Gale said the whole tribe was before them that day, of the sixty-nine pigs on offer only eleven being of other blood. He remarked upon the special features of the sale and the great importance of preserving a strain that had furnished first prize winners not only at the leading shows at home, but also in Canada and America.

The different lots were then submitted to competition, with the following result :—

		£	s.	d.
Lot 1, sow, 8 years old	Mr. A. D. Wells	3	3	0
Lot 2, ditto, 6 years	Mr. A. D. Wells	3	3	0
Lot 3, boar, 4 years	Mr. Kimber	5	.	0
Lot 4, sow and 11 pigs	Mr. Barnes	12	12	0
Lot 5, sow, 5 years	Rev. G. Moore	6	16	0
Lot 6, sow, 6 years	Mr. Austen Legh	11	11	0
Lot 7, boar, 2 years	Mr Benjafield	4	14	0
Lot 8, boar, 2 years	Herr A. W. Brauer	7	7	0
Lot 9, sow, 2 years	Mr. Barnes	21	0	0
Lot 10, sow and ten pigs	Mr Bevan	11	11	0
Lot 12, young sow	Mr. Midwood	10	0	0
Lot 13, ditto	Mr Richards	12	12	0
Lot 14, ditto	Mr. Midwood	7	17	0
Lot 15, sow	Mr Palmer	14	14	0
Lot 16, young boar	Mr Carter	10	10	0
Lot 17, ditto	Mr. Fawcett	10	10	0
Lot 18, ditto	Mr Palmer	7	17	0
Lot 19, young sow	Mr. King, jun.	5	5	0
Lot 20, ditto	Mr. Hope	4	4	0
Lot 21, sow	Mr. McCalmont	5	15	0
Lot 22, ditto	Mr. Hayter	7	7	0
Lot 23, ditto	Mr. Bevan	6	16	0
Lot 24, young boar	Duke of Westminster	6	16	0
Lot 25, ditto	Mr. Bevan	6	16	0
Lot 26, sow	Mr Pilling	5	15	0
Lot 27, ditto	Mr Pilling	3	13	0
Lot 28, ditto	Mr. Bevan	7	17	0
Lot 29, ditto	Mr. de Vitre	9	9	0
Lot 30, boar	Mr. King, jun.	3	3	0
Lot 31, sow	Mr. Bevan	4	14	0
Lot 32, ditto	Mr. Austen Leigh	6	6	0
Lot 33, ditto	Mr. Bevan	3	3	0
Lot 34, boar	Mr. Pilling	7	17	0
Lot 35, sow	Sir Wm. Ingram	4	4	0
Lot 36, ditto	Mr. Fawcett	6	6	0
Lot 37, boar	Mr. Jas. Lay	2	12	6
Lot 38, sow	Mr. McCalmont	12	12	0
Lot 39, ditto	Mr. Ninis	3	13	6
Lot 40, ditto	Duke of Westminster	4	4	0
Lot 41, ditto	Mr. Bevan	2	2	0
Lot 42, ditto	Rev. G. Moore	5	5	0
Lot 43, boar	Mr. Barnes	4	14	0
Lot 44, sow	Duke of Westminster	5	15	0
Lot 45, ditto	Admiral Brand	8	8	0
Lot 46, ditto	Mr. Green	4	4	0
Lot 47, ditto	Mr Bevan	7	7	0
Lot 48, boar	Mr Hope	3	13	6
Lot 49, sow	Admiral Brand	5	5	0
Lot 50, boar	Mr. McCalmont	4	14	6
Lot 51, sow	Admiral Brand	4	14	6

From the above it will be seen that the first fifty lots realised the most satisfactory average of £7.

The very young pigs fetched from three to one guineas. As will be seen, very excellent prices were made, and the biddings were well maintained till the end, the sale being very successful.

In sheep the shearling rams made from £3 to £4 5s. ; two-tooth ewes from 40s. to 47s. 6d. ; four-tooth, from 37s. to 44s. 6d. ; six-tooth, from 37s. to 42s. 6d. ; full-mouth, from 31s. to 40s. 6d. ; ewe lambs, from 18s. to 25s. 6d. ; and wether lambs, 22s., the principal buyers being Messrs. T. W. Finch, J. P. Franklin, F. Shrubb, J. Blake, Beaven, and the Rev. J. W. Gedge.

N.B.—The figures for the current year are approximate only.

For the small supply of cattle at Clifden Fair, co. Galway, on Monday, there was a brisk demand and a good clearance effected. Prices :—Calves, second class, £3 to £3 15s. ; third class, £1 6s. 3d. to £2 5s. Yearlings, second class, £5 2s. 6d. to £5 15s ; third class, £3 5s. to £4. Two-year-olds, second class, £7 15s. to £8 12s. 6d. ; third class, £4 5s. to £6 10s. Three-year-olds, second class, £9 7s. 6d. to £10 ; third class, £6 15s. to £8 10s. Springers, third class, £6 15s. to £8 15s.

SHOWS.

Peterborough Show.

The Peterborough Agricultural Society's summer exhibition is usually one of the most successful country shows, and that which has been held during the past week proved no exception to the rule. The handsome sum of £1,400, exclusive of numerous specials, was offered for competition, and drew the record entry of 918, an increase of 104 on last year, whilst the numbers for the preceding five years, commencing with 1898, were 780, 685, 773, 802, and 892 respectively. The last-mentioned figure, obtained in 1894, is the nearest approach to the record of this year. The increase was evenly distributed over each department, with the exception of the sheep section, where there was a decline of three. Horses always constitute the main feature at Peterborough, and this year they numbered 635, against 568 in 1899. There were 125 cattle (principally Shorthorns), compared with 97; 60 sheep, against 63; and 90 pigs, or four more.

The following gentlemen officiated as judges:—Hunters (breeding and young classes): Mr. E. H. Barlow, Sigsworth, Pateley Bridge, Yorks., and the Rev. Cecil Legard, Cottesbrooke, Northampton. Hunters (riding classes): The Earl of Orkney, Leighton Buzzard, and Sir Gilbert Greenall, Bart., Walton Hall, Warrington. Hackney, harness horses, and ponies: Mr. A. Fewson, Hedon, and Mr. Joseph Morton, Stow, Downham Market. Polo ponies: Mr. John Hill, Church Stretton, Salop. Shire horses: Mr. F. B. Barling, Amberley Court, Monmouth; Mr. John Nix, Alfreton, Derbyshire; and Mr. Henry Smith, Cropwell Butler, Notts. Shorthorn cattle: Mr. J. P. Terry, Berry Field, Aylesbury; and Mr. Robert Wright, Nocton Heath, Lincoln. Aberdeen Polled Angus cattle: The Rev. C. Bolden, Preston Bissett, Buckingham. Sheep: Mr. J. R. Kirkham, Biscathorpe House, Lincoln (Lincolns); Mr. P. A. Evans, Sherlow, Wellington, Salop (Shropshires); Mr. William Newton, Crowmarsh Battle, Wallingford (Hampshires); and Mr. F. N. Webb, Babraham, Cambs. (Southdowns). Pigs: Mr. R. Fowler, Broughton, Aylesbury.

Hunters.

The catalogue commences with the hunters, mares with foal at foot, up to 14 stone and upwards, being the first class. There were seven entries of these, and Mr. Barker's Stella had a good look in for the first place, Mr. Swallow's Beatrice, and Mr. Linnell's Snowflake, a fine class of hunter brood mare, taking the second and third places. Mr. Barker's foal, by Swallowfield, also proved to be the best in his class, Mr. Harold Martin providing a good well bred second in a foal by his good-looking thoroughbred stallion Upsilon. The lighter weight (14 stone) class of mares brought out thirteen entries, nine of these coming forward. Mr. Wilkinson's Lady Grosvenor, a charming mare in quality, and certainly able to breed stock well up to the weight, was the winner here, as at York. Mr. John Cooper, who always has some good mares of this kind, came second with the old favourite, Sweetbriar, and Mr. Wilson's Anxiety was third, several others receiving honours. The best foals in this class were Mr. Sedgeley's, by Mountain Dew, and Mr. Wilson's, by The Dale. Mr. Roe, Mr. Steward, and Mr. Carter won in the tenant farmers' classes, and a colt foal of Mr. Percival's, by Foscano, was the best in the class. The Hunters' Improvement Society's gold medal went to Mr. Wilson's Anxiety. The young stock classes, yearlings, two-year-olds, and three-year-olds were exceptionally good both in quality and growth, some of them very big for age. Mr. Barker, Mr. Fenwick, and Mr. Wickham were the winners in yearlings, the animals being by Herbertstown, Craig Royston, and Havoc respectively. Mr. Lett's Eclat was the best two-year-old, Mr. Ward, Mr. Wilkinson, and Mr. Kelway Bamber following close up in a nice class; and in three-year-old geldings Messrs. Ward's Blackthorne, Mr. Brigham's Conrad, and Mr. Darrell's Silverdale carried off the money. There were a lot of strong good geldings. Three-year-old fillies were a small class. Mr. Wickham's Victoria, Mr. Darrell's Golden Ruby, and Mr. Long's Lady Smith had matters to themselves, and were placed as named. The champion prize for the best hunter in these classes was awarded to Messrs. Ward's Blackthorne, Mr. Lett's Eclat being the reserve.

The made hunters were a rattling good lot. Space will not admit of referring to all the leaders, but amongst the best were those well-known horses of Mr. Stokes's, Ironstone and King Bronze, Mr. Clarke's Ruby, Mr. Gray's Gendarme, once more champion, Mr. Stokes's Good Health, Briton, Benedictine, and Bertram, Mr. Hanbury's Goldmint, Mr. Drage's gelding by Coco, and many others. The tenant farmers' classes were very strong in this section, as many as nineteen entries being made in one class.

Hackneys.

These classes contained a few useful animals, but generally speaking there was a want of size, the majority being more of the cob stamp than harness Hackneys of size and carriage horse stamp. Mr. T. Hall's St. Thomas, by Garton Duke of Connaught, was the best two-year-old stallion, Mr. Livesey's Dessater being second best, the position of these two horses being reversed from London. Mr. Galbraith's Atbara was reserved. Mr. Livesey's Surprise (London winner), Mr. Johnstone's Alert, and Mr. John Rowell's Bury Belle were the winning mares, the second possessing certainly a little more substance than the first, but perhaps less of quality. The best foals were Mr. How's by Gentleman John and Mr. Rowell's by Bury Connaught. Lord Middleton's Daisy Belle, by the champion Rosador, won the first prize in the two-year-old filly class. Like many of the others, she lacks size, though her action is pleasing. Mr. Johnstone's Qui Vive, placed second, a daughter of Garton Duke of Connaught, is also a showy, nice class of filly. Mr. Hussey's Puzzle, by Alwick Surprise, Mr. Edmondson's Knowle Bronde, and Mr. John Rowell's Bury Danegelt were the winners in the yearling colt class of nine entries. There were in addition to the classes mentioned some very good entries of weight-carrying cobs, Hackneys in saddle, etc., and ponies suitable for polo.

Harness.

The harness classes were also capitally supported, and included many of the stars of this class to be found in the country to-day, but the judging of these classes being made more an opportunity for increasing gate money than for encouragement of breeding harness horses causes the time of making the awards to extend over three days, and therefore does not admit of visitors from a distance remaining to witness the judging.

Shires.

This breed of horses has long been the great attraction at Peterborough Show, since the days when Shire breeding first began, and people from other parts of the country made long journeys to select brood mares out of the farmers' teams. Up to the present time both the tenant farmers and other breeders in the district have entered into the pursuit with so much enthusiasm that at the present time the show of this breed at Peterborough is only equalled annually by that at the Agricultural Hall at Islington in February. The stallion classes are first on the list, and are quite the weakest part of the display, as, to begin with, classes were only scheduled for yearlings and two-year-olds, and these were not over well filled, though the quality could not be complained of, upon the whole. Two-year-olds were judged first, and Lord Egerton's colt, showy and stylish, with size (Tatton Victorious), came well to the front, other very good ones being shown by Mr. James Forshaw (second), Mr. P. A. Muntz (third), and Mr. Hudson, Mr. James Eadie, and H.R.H. the Prince of Wales.

Yearling stallions were rather numerous, the open and restricted classes together bringing out over twenty entries. Some, however, were in duplicate. Mr. John Parnell, Mr. Muntz, and Mr. Griffin were the winners in the open, and Mr. Griffin, Mr. Rowell, and Mr. Topham in the tenant farmers' class. The first colt was bred by Lord Wantage, and is of the Prince William make and character; the other colts are growing and classy, with plenty of time before them and a good deal to do in it.

Geldings did not make a big show, two-year-olds having five representatives, and older horses but two. The young ones were certainly of good class, and were shown by Mr. Hudson, Capt. Duncombe, and Mr. Andrew, and the older ones included that magnificent horse of Mr. James Eadie's, Bardon Extraordinary, whose size, weight, feet, and general character are proverbial, and have certainly not been excelled if equalled. The second horse in this class was a good quality and weighty one for his age, and would have shown to much greater advantage farther away from such a horse as the leader.

Yearling fillies had a total entry of thirty-one in their two classes, and several of these were quite of tip-top calibre. The winner in the open was Lord Egerton's Lockinge Athenia, bred by Lord Wantage and sired by Prince William, a superb class of filly both in shape, quality, and Shire character, and also a capital mover. Sir W. H. Wills came second with the very good filly that was first in her class and gold medallist at Bath, and Mr. P. A. Muntz was placed third. Very good fillies and rewarded with honours were also shown by Mr. Parnell, Sir J. B. Maple, H.R.H. the Prince of Wales, Mr. Hudson, and Mr. Griffin, the latter second in the restricted class, where the first honour was carried off by Mr. Bradley. Mr. Howell was also third and reserve with very good fillies. Two-year-olds were perhaps the class of the day; they were big, full of weight, quality, and character, and calculated to commend the breed to the notice of strangers in a more than ordinary manner. Sir J. B. Maple, Mr. Yerburgh, Mr. P. A. Muntz, Captain Duncombe, Mr. Crisp, Mr. Towgood, Mr. Bradley, Mr. Frier, and Mr. Griffin were amongst the chief; Mr. Topham, Mr. McTurk, and Mr. J. Rowell also.

Three-year-olds were not as numerous as the twos, but they were fillies of immense substance and good quality. Sir J. B. Maple, Lord Egerton, and Mr. James Forshaw were the judges in the open classes as named, and Mr. Topham, Mr. Griffin, and Mr. Bellamy in the tenant farmers' class.

Mares with foal at foot had sixteen entries in each class, and competition was very keen. Sir J. B. Maple, Mr. P. A. Muntz, Mr. Forshaw, and Mr. Smith Carrington were the best in the open class, and Mr. Griffin, Mr. Bradley, and Mr. Poles in the tenants. Foals were generally of very good class, though not quite as forward as usual, perhaps. The best of these were Lord Rothschild's by Anchorite, Captain Duncombe's by Duke of Worsley, and Mr. P. A. Muntz's by Dunsmore Combination. Mr. Neaveson, Mr. Griffin, and Mr. Bradley had the winning foals in the restricted class by Lockinge Harold, Stroxton Tom, and Markeaton Royal Harold.

The class for pairs of mares was altogether remarkable for its great excellence. Mr. Crisp's Southgate Charm and Queen of the Shires, a magnificent pair for size, weight, and quality, carried the day, Sir J. B. Maple having a big and weighty pair second in Grand Duchess and Cui Bono, both well known. Then Mr. Forshaw, Lord Rothschild, and Mr. P. A. Muntz were capitally represented. In the single class for the best mare or filly in the yard Southgate Charm again came to the top easily, Lord Rothschild being second, Lord Egerton third, and Mr. Crisp's entry and a grand mare of Lord Wantage's also receiving h.c.'s.

The Shire horse gold medal and Messrs. Barford and Perkins's champion prize were both awarded to Mr. Crisp's Southgate Charm, Lord Rothschild being second; and the tenant farmers' champion was Mr. Topham's Thorney Floss, with Mr. Bradley's Halstead Violet as reserve.

Cattle.

The show of cattle was a most creditable one, but there was some grumbling with the judging. Miss A. de Rothschild, of Aylesbury, won in the class for bulls between two and five years, with Bashful Youth, by Brave Archer, and Mr. Deane Willis, of Codford, Wilts, scored in the class for younger animals with Granite Chip, by Granite City, but in this case the opinion prevailed that a great mistake was made, and that Mr. Philo L. Mills, of Ruddington Hall, Nottingham, ought to have been first with St. Swithin, by Best of Archers, which took honours at the Notts show. Mr. Willis was again in front in the bull calf class with Bapton Marquis, by Proud Duke of Gloucester, but the champion prize went to Bashful Youth. In the class for cows Miss de Rothschild again secured the premier award with Miss Belladrum 6th, by Lord Violet, a capital cow; but the second, Mr. Willis's White Heather, by Merry Mason, is more of the Smithfield than the breeding type. Mr. Willis was also successful with Victorine, by Bapton Victor, in the class for heifers between one and two years, Lord Middleton's Lady Waterloo B 2nd, by Merry Merlin, being second. Mr. Atkinson, of Weston St. Mary, Spalding, was fortunate with his heifer calf Weston Surprise 2nd, by Pippin's Pride, and it is hard to understand how it was that Mr. Mills's Countess Farewell 5th, by Best of Archers, which carried off two first prizes at the Notts show, was passed over.

Sheep and Pigs.

There were not many sheep, but they were of excellent quality. In the classes for Longwoolled sheep Mr. Dudding, of Riby Grove, Stallinborough, appropriated all the prizes, and the placings for shearling Shropshire ewes were as at the Royal, Mr. Inge, of Tamworth, being first, and Mr. Mills second. The pig classes were strong numerically as well as in quality, nearly all the well-known breeders being represented.

Prize List.

HORSES.

HUNTERS.

Mare, up to 14st. and upwards, suitable for hunting purposes, with foal at foot, got by a thoroughbred stallion or registered hunter sire: 1, J. Barker, Bishop's Stortford (Stella); 2, W. B. Swallow, Wootton Lawn, Ulceby, Lincs (Beatrice); 3, G. Linnell, Sulby, Ruzby (Snowflake).

Foal in Class 1: 1, J. Barker; 2, H. Martin, Wainfleet, Lincolnshire.

Mare, up to between 12st. and 14st., suitable for hunting purposes, with foal at foot, got by a thoroughbred stallion or registered hunter sire: 1, F. B. Wilkinson, Edwinstowe, Newark (Lady Grosvenor); 2, J. Cooper, East Haddon, Northampton (Sweetbriar); 3, H. M. Wilson, The Kennels, Ledbury (Anxiety).

Foal in Class 3: 1, J. H. Sedgley, Church Langton, Market Harborough; 2, H. M. Wilson

To tenant farmer residing within thirty miles of Peterborough, for mare for hunting purposes, with foal at foot, got by a thorough-bred stallion or registered hunter sire: 1, H. R. Roe, Cranoe, Market Harborough (Finale); 2, J. S. Steward, Barrow, Oakham (Countess); 3, W. Carter, Ailesworth, Peterborough (Georgiana).

Foal in Class 5: 1, F. Perceval, Thornhaugh, Wansford; 2, J. H. Sedgley; 3, H. R. Roe.

Yearling (colt or filly): 1, J. Barker; 2, R. L. Fenwick, Wymondham, Oakham; 3, H. Wickham, Barnwell Castle, Oundle (Hannah).

Two-year-old (gelding or filly): 1, J. Lett, Rillington, York [illegible]; 2, T. and H. Ward, Pinchinthorpe, Great Ayton, Yorkshire (Blackbird); 3, F. B. Wilkinson

Three-year-old gelding: 1 and champion, T. and H. Ward, Blackthorne; 2, T. S. Brigham, Harpham Grange, Burton-Agnes, Driffield (conrad); 3, J. S. Darrell, West Ayton, Yorkshire (Silverdale).

Three-year-old filly: 1 and silver medal H. Wickham (Victoria); 2, J. S. Darrell (Golden Ruby); 3, R. Long, Upper Stanton, Sheffield, Bedfordshire (Lady Smith)

Weight-carrying hunter (mare or gelding), of any age, calculated to carry 12 st. 7 lbs. and not less than 15 stone: 1, J. H. Stokes (Great Britain), Market Harborough (Ironstone); 2, J. H. Stokes (Bertram); 3, C. E. Clark, North Ferriby, Yorkshire (Ruby)

Mare or gelding, any age, calculated to carry 12 st. 7 lbs. and not less than 13 stone and under 14 stone: 1, J. N. Gray, Peterborough, Cardiff (Gendarme); 2, J. H. Stokes (Good Health); 3, J. H. Stokes (Briton)

Mare or gelding, any age, calculated to carry not less than 12 stone and under 13 stone: 1, J. H. Stokes (Benedictine); 2, E. Hanbury, Braunston, Oakham (Goldmint); 3, J. E. Drage, Chapel Brampton, Northampton

Four-year-old mare or gelding: 1, J. H. Stokes (Treasure); 2, E. Hodgson, Bridlington, Yorkshire (Volunteer); 3, J. N. Gray (Huntsman)

[illegible] the winner (being a bona fide tenant farmer residing within the limits of the Essex, Suffolk and North Pytchley Hunts, of the best mare or gelding four years old and upwards which has never taken a first prize at any show previous to June 22nd, since it was three years old: 1, F. W. Cooley, Brightlee

Lodge, Market Harborough (Huntsman); 2, W. J. Chaney, Gidding Grove, Peterborough (Cribbage); 3, H. Burgess (Big Gun).

HACKNEYS.

Two-year old registered hackney stallion: 1, T. Hall, Langton, Malton, Yorks (St Thomas); 2, H. Livesey, Rotherfield, Sussex (Dissenter).

Hackney mare with foal: 1, H. Livesey (Surprise); 2, E. J. Johnstone, Rougham Hall, Suffolk (Alert); 3, J. Rowell, Bury, Huntingdon (Bury Belle).

Foal in previous class: 1, A. B. How, Broughton, Huntingdon; 2, J. Rowell.

Hackney mare with foal at foot, owner being a bona fide tenant farmer residing within thirty miles of Peterborough: 1, J. Rowell (Bury Belle); 2, A. B. How (Limasol).

Foal in previous class: 1, A. B. How; 2, J. Rowell.

Two-year-old hackney filly: 1, Lord Middleton, Birdsall House, York (Birdsall Daisy Bell); 2, E. J. Johnstone (Qui Vive).

Yearling hackney colt or filly: 1, R. Hussey, Eastfield, Lichfield (Puzzle); 2, E. Edmondson, Knowle, Birmingham (Knowle Brounley); 3, S. Flanders, Burnt Fen, Soham, Cambs (King Forest).

Weight-carrying cob, between 13½ and 14·3 hands: 1, F. J. Batchelor, Alvechurch, Worcestershire; 2, W. Lawson, Blackpool; 3, H. T. Parke, Chorley.

Tenant farmers' hackney mare with foal at foot: 1, J. Rowell, Bury, Huntingdon; 2, A. B. How, Broughton, Huntingdon.

Foal: 1, A. B. How; 2, J. Rowell.

Two-year-old hackney filly: 1, Lord Middleton; 2, E. J. Johnstone, Rougham Hall, Suffolk.

Yearling hackney colt or filly: 1, R. Hussey, Eastfield, Lichfield; 2, E. Edmondson, Knowle, Birmingham; 3, S. Flanders, Burnt Fen, Soham, Cambridge.

Hackney mare or gelding, in saddle: 1, E. A. Evans, Wrexham; 2, A. L. Goodson, Heathfield, Knutsford; 3, E. Godsell, Stroud.

Pony, stallion, mare, or gelding, adapted for polo: 1, W. Staplee, Peterborough; 2, J. A. Bouverie, Northampton.

HACKS.

Hack (of the hunter type, and to be judged by the hunter judges), mare or gelding not over seven years old, not to exceed 15.2 hands or less than 14.2 hands: 1, J. H. Stokes, Market Harborough; 2, T. Stokes, Oundle.

HARNESS CLASSES.

Horse, mare or gelding: 1, E. Godsell, Stroud, Gloucestershire; 2, H. T. Parke; 3, E. A. Evans.

Pair of horses, mares or geldings, in double harness: 1, G. C. Waud, Baildon; 2, G. J. Johnson, Woodbridge, Suffolk; 3, F. J. Batchelor.

Horse, mare or gelding, not less than 14 hands, being the property of a bona-fide tenant farmer or tradesman residing within thirty miles of Peterborough, exhibited in harness: 1, W. Flanders, Ely; 2, J. H. Dennis, Boston; 3, G. S. Johnson, Whittlesea.

Tandem team: 1, E. Godsell; 2, F. J. Batchelor.

PONIES.

Pony, not exceeding 14 hands, to be driven: 1, G. E. Franklin, Derby; 2, E. Godsell; 3, A. S. Day, Crewe.

Pony, not exceeding 14 hands, to be ridden: 1, E. Godsell; 2, G. E. Franklin.

Pony, not exceeding 13 hands, to be driven: 1, A. S. Day; 2, G. C. Waud; 3, Mr. Hollins, Mansfield.

Pony, not exceeding 13 hands, to be ridden: 1, A. S. Day; 2, G. C. Waud.

JUMPING.

Horse, mare or gelding, 15 hands or upwards, which shall jump the artificial fences in the best manner, to carry not less than 11 stone: 1, Mr. Grange, Chester; 2, Mrs. Blockley; 3, F. W. Foster, Brailsford.

SHIRES.

Stallion, foaled in 1898: 1, Earl Egerton, Tatton Park, Cheshire (Tatton Victorious); 2, J. Forshaw, Carlton-on-Trent, Newark (D'Arcy Albert); 3, P. A. Muntz, M.P., Dunsmore, Rugby (Dunsmore John o' Gaunt).

Two-year-old gelding: 1, R. W. Hudson, Danesfield, Great Marlow, Bucks (Danesfield Meteor); 2, Capt. W. H. O. Duncombe, Waresley Park, Hunts (Waresley Prince).

Gelding, three years old and upwards; 1, J. Eadie, Barrow Hall, Derby (Bardon Extraordinary); 2, A. Fuller, Ramsey, Hunts.

Yearling entire colt: 1, J. Parnell, Rainsbrook, Rugby (Lockinge Lord); 2, P. A. Muntz, M.P.; 3, F. W. Griffin, Boro' Fen, Peterborough (Boro' Warrior).

Yearling entire colt (open to tenant farmers residing within thirty miles of Peterborough): 1, F. W. Griffin (Boro' Warrior); 2, J. Rowell (Bury General White); 3, J. Topham, Thorney Park, Peterborough (Thorney Royal).

Yearling shire filly: 1, Earl Egerton (Lockinge Athena); 2, Sir W. H. Wills, Bart., Coombe Lodge, Blagdon, Somerset (Rickford Lass); 3, P. A. Muntz, M.P. (Luck).

Yearling shire filly, the owner being a tenant farmer residing within thirty miles of Peterborough: 1, J. Bradley, Halstead, Tilton, Leicester (Halstead Violet); 2, F. W. Griffin; 3, F. W. Horrell, The Grange, Thorney, Peterborough (Heroine).

Two-year-old shire filly: 1, Sir J. Blundell Maple, Bart., M.P., Childwick, St. Albans (Saxon Talent); 2, R. A. Yerburgh, M.P., Woodfold Park, Blackburn (Lily of the Valley); 3, P. A. Muntz, M.P. (Dunsmore June Rose).

Two-year-old shire filly, the owner being a tenant farmer residing within thirty miles of Peterborough: 1, J. Bradley (Halstead Lady Harold); 2, G. Frier, Deeping St. Nicholas, Spalding (Deeping Jewel); 3, F. W. Griffin, Peterborough (Girton Lucigen).

Three-year-old shire filly: 1, Sir J. Blundell Maple (Grand Duchess); 2, Earl Egerton (Tatton Godiva); 3, J. Forshaw (Whaplode Countess); r, J. Parnell (Rokeby Judith).

Three-year-old shire filly (the owner being a tenant farmer residing within thirty miles of Peterborough): 1, J. Topham (Thorney Floss); 2, F. W. Griffin (Boro' Charm); 3, W. Bellamy, Doddington (March).

Shire mare, with foal at foot: 1, Sir J. Blundell Maple (Stanney Commotion); 2, P. A. Muntz, M.P. (Lady Franklin); 3, J. Forshaw (Daisy).

Foal in previous class: 1, Lord Rothschild; 2, Capt. W. H. O. Duncombe; 3, P. A. Muntz; 4, Lord Middleton.

Shire mare, with foal at foot: 1 and special, F. W. Griffin (Boro' Model); 2, J. Bradley (Duchess 2nd); 3, S. Poles, Thorney, Peterborough (New Cut Wonder).

Foal in previous class: 1, S. Neaverson, Glinton, Market Deeping; 2 and 4, F. W. Griffin; 3, J. Bradley.

Pair of shire horses, mares or geldings, three years old and upwards: 1, F. Crisp, Girton Stud Farm, Cambridge (Southgate Charm and Queen of the Shires); 2, Sir J. Blundell Maple (Grand Duchess and Dunsmore Cui Bono); 3, J. Forshaw (Whaplode Countess and Daisy).

Pair of shire horses, mares or geldings, three years old and upwards, the owner being a tenant farmer residing within thirty miles of Peterborough: 1, J. Topham (Thorney Floss and Thorney Star); 2 and 3, J. Rowell, Bury, Huntingdon.

Shire horse, mare or filly, of any age: 1, champion, gold medal, Childwick cup, and challenge cup, F. Crisp, Girton Stud Farm, Cambridge (Southgate Charm); 2, Lord Rothschild (Alston Rosy); 3, Earl Egerton (Tatton Godiva).

CATTLE.

SHORTHORNS.

Bull, above two years: 1 and champion, Miss A. de Rothschild, Waddesdon, Aylesbury, Bucks; 2, D. A. Green, Fingringhoe Hall, Colchester.

Bull, above one year: 1, J. D. Willis (Baron Mereer, Cirencester, Wilts; 2, P. L. Mills, Ruddington Hall, Nottingham.

Bull, not to exceed two years old, the property of a tenant farmer residing within thirty miles of Peterborough: 1, W. G. Atkinson, Weston St. Mary's, Spalding; 2, J. L. Stockburn, Kettering.

Bull calf: 1, J. D. Willis; 2, T. Stokes, Warmington, Oundle; 3, Lord Middleton, Birdsall House, Yorkshire.

Cow: 1, champion, and special, Miss A. de Rothschild; 2, J. Deane Willis.

Heifer, above one year and under two years old: 1, J. Deane Willis; 2, Lord Middleton.

Heifer, above one year and under two years old, the property of tenant farmer residing within thirty miles of Peterborough: 1 and special, J. A. Preece, Dereham, Thrapston; 2, W. G. Atkinson.

Heifer calf: 1, W. G. Atkinson; 2, Marquess of Exeter, Burghley House, Stamford.

Shorthorn cow or heifer for dairy purposes: 1 and 2, J. T. Spencer, Hornsey Lane Farm, Highgate, London; 3, Mrs. E. R. Nutt, Peterborough.

ABERDEEN POLLED ANGUS.

Bull, calved on or after December 1st, 1897, and before December 1st, 1898: 1, Sir J. B. Maple; 2, W. B. Greenfield.

Bull, calved on or after December 1st, 1898: W. B. Greenfield, Haynes Park, Bedford; 2, J. F. Johnson, Goscote, Leicester.

Cow (in calf or in milk), calved previous to December 1st, 1898: 1, and cup, F. Crisp, New Southgate, London; 2, W. B. Greenfield.

Heifer, calved on or after December 1st, 1898: 1, F. Crisp; 2, R. W. Hudson.

SHEEP.

Long-woolled shearling ram: 1 and 2, H. Dudding, Riby Grove, Stallingborough, Lincolnshire.

Pen of three long-woolled shearling ewes: 1 and 2, H. Dudding.

Shearling Shropshire ram: 1, Mrs. M. Barrs, Odstone Hall, Atherstone; 2, R. P. Cooper, Shenstone Court, Lichfield.

Pen of three shearling Shropshire ewes: 1, W. F. Inge, Thorpe Hall, Tamworth; 2, P. L. Mills, Ruddington Hall, Nottingham.

Hampshire ram lamb: 1 and champion, T. F. Buxton, Waters Place, Ware, Herts; 2, C. A. Scott Murray, Hambledon, Henley-on-Thames.

Pen of three Hampshire ewe lambs: 1, T. F. Buxton; 2, C. A. Scott Murray.

Southdown shearling ram: 1, Earl of Ellesmere, Stetchworth Park, Newmarket; 2, Earl Cadogan, Culford Hall, Bury St Edmunds.

Pen of three Southdown shearling ewes: Earl Cadogan.

Pen of three cross-bred lambs: 1 and 2, F. J. Matthews, Bircham Newton, Lynn.

PIGS.

Boar of the Large White breed: 1, Sir Gilbert Greenall, Bart., Walton Hall, Warrington; 2, J. Barron, Borrowash, Derby.

Breeding sow of the Large White breed: 1, F. Allmand, Wrexham; 2, D. Gibson, Harbury, Leamington.

Pair of young boar pigs of the Large White breed (farrowed in 1900: 1, S. Spencer; 2, D. R. Dayhell, Bottesford, Nottingham.

Pair of yelts of the Large White breed, farrowed in 1900: 1 and 2, T. Diggle, Ewerby, Sleaford.

Boar of the Middle White breed: 1, Sir Gilbert Greenall; 2, S. Spencer.

Breeding sow of the Middle White breed: 1 and 2, Sir Gilbert Greenall.

Pair of young boar pigs of the Middle White breed, farrowed in 1900: 1, Sir Gilbert Greenall; 2, S. Spencer.

Pair of yelts of the Middle White breed, farrowed in 1900: 1 and 2, S. Spencer.

Boar of the Berkshire breed: 1, R. W. Hudson, Danesfield, Great Marlow, Bucks; 2, J. Jefferson, Peel Hall, Chester.

Breeding sow of the Berkshire breed: 1 and 2, R. W. Hudson; 3, Sir H. de Trafford, Bart., Hill Crest, Market Harborough.

Pair of young boar pigs of the Berkshire breed, farrowed in 1900: 1, P. L. Mills; 2, J. Tindall, Louth.

Pair of yelts of the Berkshire breed, farrowed in 1900: 1, R. W. Hudson; 2, P. L. Mills.

To owner, being a tenant farmer or tradesman, residing within thirty miles of Peterborough, of breeding sow in pig or suckling, of any breed: 1 and 2, S. Spencer.

Ashton-under-Lyne.

The Ashton-under-Lyne Agricultural Society's Show took place at Hurst, near Ashton-under-Lyne, on the 23rd ult., in beautifully fine weather, and was attended by a very large number of people. The number and quality of the exhibits were quite up to the average, and altogether it was a most successful show. The cattle were a useful collection, with a few animals that stood out from the rest by reason of their superior merit. The silver cup, offered by Messrs. J. Barlow and Sons, Droylsden, for the best animal in the local classes, was won by Mr. G. Bowers's handsome dairy cow, but the medal for the best dairy cow went to a beast with rare scale and quality, owned by Mr. W. S. Bardsley. The open class for bulls was won by Mr. W. S. Bardsley's Captain Webb, by Rupert, and a useful sire came next for Mr. Jos. Saxon. Mr. Edwin Clayton, however, beat Mr. Bardsley in the in-milk cows, and in the local competition Mr. Saxon's bull headed the line, with Mr. E. Saxon's representative next. Mr. Bardsley could only again get second honours in the barren cows, first card being secured by Mr. Frank Gee, but Mr. Bardsley's three-year-old heifer was at the top, with that entered by Mr. Thomas Fogg next. Mr. Frank Gee won with a useful yearling heifer, to which Mr. George Bowers's heifer stood second, but Mr. Gee's two-year-old was beaten by that owned by Mr. Ernest Saxon, who also showed the successful yearling bull. Mr. R. Travis took second honours. The heavy horses displayed great improvement on that which was seen at Ashton a few years ago. In the over 16-hands class Mr. Sam. S. Raingill, Altrincham, won easily with Rednal Lass, by Regent II., which won the championship at Darwen, and which was now awarded Mr. Kenworthy's challenge cup as the best carthorse in the show. Next to her stood Desford Pride II. by Sopwell Duke, owned by Mr. A. Nicholson Leek, a mare on a smaller scale. As Rednal Lass had previously won the Shire Horse Society's medal, these honours were now given to Desford Pride II., which was considered the next best on the ground, although the raw looking three-year-old Cumbleforth Snip, by Faceur II., which won for Mr. Raingill in her class, might, in the opinion of some, fairly have received the trophy. In the three-year-olds, the nearest rival to Cumbleforth Snip was Mr. Robert Jeff's Horbling Duffield by Horbling Conqueror. In the under 16 hands class three useful horses, owned respectively by Mr. S. Holden, Messrs. I. Greenhalgh and Sons, and Mr. T. Ogden, were the winners, and in brood mares Mr. John Whalley's Ringway Mignonette, by Royal William II., was preferred to Mr. Eli Pennington's Emblem, another daughter of Royal William II. Mr. E. Gee's mare by Surprise came next. In the class for two-year-olds a rangy roan won for Mr. Robert Dodd, Mr. Pennington's Adlington Emblem, by Moor's Confidence, following. In yearlings, Mr. J. Sutcliffe and Mr. C. F. Day were the winners, and in foals Mr. Eli Pennington won easily with a sappy youngster by Bury Victor Chief, which had more weight than Mr. John Whalley's foal by Conquering Harold. A number of classes were devoted to carthorse turnouts, the finest show in which was made by Mr. J. W. Pollitt's pair, Bowler and Thumper, fresh from the success at the Royal Show at York. The light horses made a good show. Mr. Harris-Thompson's Lord Balmain was an outstanding winner in the stallions, for he was more in accordance with Hackney tradition than any of his rivals. The second horse was Mr. M. E. Shaw's fiery little black Duke of Bardsley, and next came Mr. W. H. Cresswell's Watton Squire, by Garton Duke of Connaught. Mr. T. B. Sykes's Poulton secured the first card in brood mares with Florina, by General Gordon, which went better off her hock than Mr. R. M. Birley's Lady Maud, a daughter of Danegelt, from the Breeze Hill stud. Mr. A. Winterbottom's piebald mare was third. In the three-year-olds Mr. Cresswell's Garton Charity went with her usual liberty, and was placed above Mr. J. W. Bousfield's Duffield Squire, whilst in two-year-olds the advantage of height gave precedence to Mr. R. Byrom's Mafeking, by Monk, over Mr. Mr. E. Shaw's son of Duke of Bardsley. Mr. R. Berry's chestnut by Duke of York led the yearlings, with Mr. W. H. Munro's bay by Dr. Syntax next. Great interest centred in the open competition for roadster mares or geldings, in which, after a fine struggle, Mrs. Fred Holmes's chestnut Pickwick was placed before Mr. Sykes's Zaisan, Mr. A. H. Dixon's Acidity being third. Mrs. Holmes's well-known bay, Love Letter, had no difficulty in winning in the cobs, her nearest rivals being Mr. M. E. Shaw's Daisy Bell and a representative of Mr. Harris-Thompson's; but in the under 14 hands class Mr. Shaw won with Young Swell and Acquisition, both of which moved more attractively than Mr. Harris-Thompson's Belmain Empress. Daisy Bell also won in the roadster saddle class, in which Mr. J. Wrigley took second prize and Mr. S. Milward third for Lady Peggy, by Goldsmith.

Pocklington Horse Show.

The annual Horse Show, at Pocklington, took place on Friday, and in the opinion of one of the judges, who has attended for over ten successive years, it was one of the best yet held. As heretofore, the show was open to the United Kingdom, but by one of the conditions of the schedule animals that had won a £10 prize were debarred from the ring. This restriction applied to the whole of the classes, with four exceptions, and as a consequence the "Royal" element was not in great force. All told, there were 247 entries (in thirty-seven classes), as compared with 221 a twelvemonth ago, and the money prizes amounted to £250, while two silver trophies were also presented. The weather was not all that could be desired, a heavy shower of rain falling just as the judges were about to start their work, but the remainder of the day was fine, though somewhat cloudy. It is to be hoped the show proved a financial success as the committee decided to give the surplus to one of the War Relief Funds, an example which might well be followed by other societies who have a good balance in the bank.

The quality of the young stock was particularly pleasing. The first attractive hunting class taken in hand was that for yearling colts and fillies. Two rivals met in Mr. R. Hornsey's Shancrotha colt and Mr. J. E. Wray's bay gelding, by Gordon, and they were placed in the order named, thus reversing the positions which they held here last year as foals. The two-year-olds were of the right calibre, and the hunters of any age were likewise meritorious. The leading winner, Mr. T. Hall's four-year-old gelding, sired by Gordon, is a beautiful horse, and own brother to Johnnie Roe. Brood mares, showing all the signs of maternity, formed a nice ring picture, the central figure in which was Mr. H. Brown's chestnut daughter of Sherbrooke. There was a capital show of coaching horses. The foals constituted a fair class, of the yearlings the pick was Messrs. Beckett's unnamed Barnaby colt, which has size, quality, and action to aid it in any company; while in a good lot of brood mares the principal winner was a deep, wide, short-legged dam, with plenty of quality, the property of Mr. J. Hulse, of Brough. Mr. R. Tasker's bay Kuniss, the second prize taker, is also a taking mare. The three-year-old bay Elegance, belonging to Mr. S. Leaf, of Beverley, had no difficulty in

winning, the bay son of Stour-on-Avon combining in an exceptional degree rich quality with fine action.

The Hackneys brought out upheld the reputation of Pocklington and surrounding country. Good material was found among the colt foals, but the quality was a trifle better in the filly foal class. The leaders of the two sexes were entered by Mr. R. Brigham, of Millington, and Mr. C. Moore, of Upper Helmsley. The latter breeder had forwarded a most promising yearling colt, which not only headed his class, but also won a ten guinea silver bowl, given as a special prize by Mr. A. P. Woodruff for the best yearling roadster colt or filly bred within a radius of ten miles of Pocklington. The yearling fillies, like the colts, were well up to the average, and the two-year-olds of Mr. J. Jebson and Mr. F. H. Carr, first and second respectively, commanded attention. The young stallion class was one of the strongest of the day. A successful début was made by Mr. F. W. Buttle's Garton Sirdar, by Rosador—Miss Connaught Cook, and this handsome chestnut was in every way worthy of the prominence assigned to him in the prize list. Mr. W. T. G. Young came second with Garton Grand Duke, a well-developed son of Connaught, and Mr. G. A. Brown supplied the third winner in Lord Kipling, sired by Domby. The Rillington stud again asserted itself in the class for stallions of any age, Mr. Buttle's Rosinous beating two formidable opponents in Mr. H. Moore's Bridlington and Mr. A. A. Haley's Merry Pioneer. Mrs. F. Holmes was successful in a driving class with the pony mare Love Letter, and the chief lady's Hackney was a good looking chestnut mare, possessing fine quality and nice manners. That the attention of breeders in the district is not wholly occupied with hunters and Hackneys was apparent by the excellent display of cart horses.

Prize List.

Hunting colt or filly foal: 1, F. J. and H. Grainger, Thornholme, Burton Agnes; 2, W. Nutt, Aughton, York; 3, H. Brown, Strensall.

Coaching colt or filly foal: 1, J. Hulse, Brough; 2, Smith Brothers, Sand Hutton.

Roadster colt foal: 1, R. Brigham, Millington; 2, W. Richardson, Bonwick, Seaton, Hull.

Roadster filly foal: 1, C. Moore, Upper Helmsley; 2, J. Oxtoby, Millington.

Pony colt or filly foal: 1, J. H. Wheelwright, Gribthorpe, Howden; 2, H. Illingworth, Shipton Thorpe; 3, G. Overend, Harrogate.

Agricultural colt or filly foal by either of the Pocklington Shire Horse Company's horses: 1, G. English, Pocklington; 2, R. Nutt, Selby; 3, C. Atkinson, Melbourne.

Yearling hunting colt or filly: 1, R. Hornsey, Bishop Burton; 2, J. E. Wray, Breighton, Howden.

Yearling coaching colt or filly: 1, Beckett Brothers, Deighton, Escrick; 2, J. Reader, Holme.

Yearling roadster colt: 1 and silver bowl, C. Moore; 2, J. Scott, Burnby; 3, J. Brigham, Yapham.

Yearling roadster filly: 1, D. Nicholson, Watton, Cranswick; 2, H. Watson, Newton Kyme; 3, G. A. Brown, Middleton-on-the-Wolds.

Yearling agricultural colt: 1, T. Burton, Felliskirk, Thirsk; 2, S. Leaf, Escrick; 3, J. J. Dunnington-Jefferson, Thicket Priory.

Yearling agricultural filly: 1, T. Bentley, Skerne Road, Driffield; 2, W. and J. Webster, Warthill; 3, J. J. Dunnington-Jefferson.

Two-year-old hunting gelding or filly: 1, G. A. Brown; 2, W. M. Harrison, Stamford Bridge.

Two-year-old harness gelding or filly: 1, J. Jebson, Yapham Grange; 2, F. H. Carr, Kexby.

Two-year-old agricultural gelding: 1, A. Bristow, Wilberfoss; 2, R. Smeeton, Bolton Grange, Scorton; 3, J. Houlden, Barmby Moor.

Two-year-old agricultural filly: 1, R. and J. Davison, Welham, Malton; 2, T. W. Allison, Gowthorpe; 3, W. and J. Webster, Warthill.

Agricultural colt or filly foal, by a Stud book Shire stallion: 1, T. H. Sowden, Clifton, York; 2, J. T. Wright, Great Hatfield, Hull; 3, A. Bell, Burn, Selby.

Hunter, any age, to be ridden in the ring: 1, T. Hall, Langton, Malton; 2, J. Y. Catton, Routh, Beverley; 3, A. J. Brown, Marr Grange, Doncaster.

Hunter, under four years, to be shown in hand: 1, W. Blyth, Huggate, York; 2, Sir J. H. Walker, Sand Hutton.

Hunting brood mare: 1, H. Brown, Strensall; 2, F. J. and H. Grainger, Thornholme.

Roadster stallion, under three years: 1, F. W. Buttle, Rillington; 2, W. T. G. Young, Garton, Driffield; 3, G. A. Brown.

Roadster gelding or mare, under six years, to be ridden in the ring: 1, T. Bentley, Driffield; 2, A. Fewson, Hedon; 3, Exors. of late J. H. Clark, Tibthorpe, Driffield.

Roadster gelding or mare: 1, W. P. Kirby, Watton; 2 and 3, Exors. of late C. Hutchinson, Sancton.

Roadster brood mare, that has produced a foal: 1, H. Brown; 2, J. Taylor, Low Catton, Stamford Bridge; 3, J. Allan, Waplington.

Roadster stallion, any age: 1, F. W. Buttle; 2, H. Moore, Burn Butts; 3, A. A. Haley, Holmfield, Wakefield.

Carriage horse (gelding), under four years, to be shown in hand: 1, S. Leaf, Escrick; 2, Beckett Bros.; 3, J. Jebson.

Lady's hackney, to be ridden in the ring: 1, F. J. and H. Grainger; 2, Mrs. Syd. Powell, Pocklington.

Coaching brood mare: 1, J. Hulse, Brough; 2, R. Tasker, Naburn; 3, J. Reader, Holme, York.

Agricultural stallion, any age: 1, T. H. Bland, Roall Hall, Whitley Bridge; 2, Pocklington Shire Horse Company.

Agricultural gelding or mare, any age, the property of a tenant farmer occupying not less than eighty acres: 1 and 3, R. and J. Davison, Welham, Malton; 2, R. Wilson, Youlthorpe.

Agricultural gelding or mare, under four years, the property of a tenant farmer residing within a radius of ten miles of Pocklington: 1, A. Bristow, Wilberfoss; 2, W. and J. Webster, Warthill, York; 3, T. W. Allison, Gowthorpe, York.

Pony, not exceeding 14 hands 2ins., to be ridden in the ring: 1, F. Coverdale, Beverley; 2, T. Hall.

Pony, not exceeding 12 hands 2ins., to be ridden in the ring: 1, R. Whitworth, Londesborough Stud, Market Weighton; 2, F. J. Fawcett, Bolthorpe; 3, H. Jessop, Northolme, Cottingham.

Pony, not exceeding 14 hands 2ins., to be driven: 1, Mrs. F. Holmes, Staveley Grange, Shipley; 2, F. Coverdale, Beverley; 3, F. Riley-Smith, Saxham Hall, Bury St. Edmunds.

Jumper of any description, open to the world: 1, C. Tomlinson, Cliffe, Selby; 2, W. Holmes, Selby; 3, Mr. Waddington, Easingwold.

Stands at the Royal Show.

Owing to great pressure on our space last week we were unable to print the whole of our remarks on the principal stands at the Royal Show at York, and those left over we give below.

At Stand No. 73, Messrs. Joseph Fison and Co. Limited, of Ipswich, were showing samples of their special fertilisers for all crops, agricultural, horticultural, and tropical; they also had on view photographs of some record crops grown by their use and samples of Canary guano, Union disinfectants, fluids, powders, etc. Their samples of first prize barleys from fourteen different counties, produced with their extra quality barley fertiliser last season, attracted much attention.

Among the many firms exhibiting oil engines was that of Messrs. R. Cundall and Sons, Limited, Airedale Iron Works, Shipley, Yorks, who had at Stand No. 339, a 4, 10, and 20 brake horse power Cundall's patent oil engine, a combined oil engine and pump, and a 10 brake horse power portable oil engine, all of which are well known to agriculturists and others.

What is claimed to be the oldest drill manufactory in the world, namely, that of Messrs. James Smyth and Sons, at Peasenhall, Suffolk, was represented at Stand No. 257. The firm are the manufacturers of the celebrated Nonpareil corn-drills, which now contain all the valuable improvements which a century's experience has suggested, and among them are the following:—The patent hoppers can be tilted aside, consequently do not require to be removed when the cup barrel has to be taken out, and obviate all danger of hoppers being torn out by the cup wheels; the cup barrel is reversible, and can be changed in two or three minutes, and drill ready for work again. The patent cog work avoids the necessity of raising or lowering the box when changing cog wheels, is exceedingly simple and gives a much larger range of seeding than formerly attainable with a larger number of cog wheels; the patent telescopic conductors effectually exclude all dirt and wet, and being cylindrical are much better adapted for peas and beans than old-fashioned conductors. Also, being made of tinned metal do not rust. The coulter blades are extra long and have a far greater clearance fore and aft than ever before attained, and the levers are of wrought iron and so formed that the coulter blade is bolted directly thereto, thus avoiding the expense of wrought iron coulter-stalks.

Prominent amongst Messrs. Blackstone and Co.'s exhibits was their new patent Swath Turner. In this machine, as in the older swath turner made by this firm, the forks work at an angle to the line of draught, and have practically the same motion, although it is obtained in a different and simpler way. The two turning forks in the new implement are suspended from the opposite extremities of an oscillating beam, which works at a suitable angle to the main axle, giving the forks their necessary vertical motion. The horizontal movement of the fork is obtained by connecting each of them by means of rods attached at a suitable distance from their point of suspension to two of the pins of a three-throw crank, the third pin of which by similar means is made to oscillate the beam. The two movements described above, combined with the forward motion of the machine, result in an action of the tine bars eminently suited to turn the swath in an efficient manner. The frame of the machine is very compact, as the working parts only require support at one point, and the whole of the movement is derived from one crank shaft driven by a single pair of bevel gears. They also had a good display of horse rakes and haymakers, corn grinding mills, etc., of their well-known patterns.

Among the exhibits of Messrs. Drake and Fletcher, Kentish Engineering Works, Maidstone, who occupied Stand No. 243, was their famous "Drake" oil engine. The extreme simplicity of this engine is very marked, and makes it specially suitable for use on the farm. The engine works with the same ease and regularity as a gas engine at less cost, and it makes its own gas, a rich oil-gas, more powerful than ordinary coal gas. The oil-fuel is more easily carted and stored than coal, whilst it is cleaner, and there is no waste, dirt, ashes, nor stoking required. The exact quantity of oil required is regulated by a screw down sight-feed valve, through which the oil is drawn by the suction of the piston, causing a partial vacuum in the vaporiser. This is an important advance on the usual methods of oil-feed, and accounts partly for the extreme simplicity of the engine. The feed is controlled by the governor, and can only be drawn in when required, so that there is no waste of oil, and the combustion is so perfect that the exhaust is quite invisible. The vaporiser and ignition tube are heated and kept at the required temperature by a self-acting blow-lamp, which is a fixture to the engine and not a movable lamp such as is commonly used, when once started it requires little or no more attention, and is absolutely safe. The "Drake" portable oil engine has all the special features and improvements of the fixed type, and is compact, simple, and well designed. It is perfectly self contained, with cast iron oil tank forming the base of engine bed, and self-acting lamp, which, being a fixture prevents all risk of fire. The framing is of steel girder construction, with water tank enclosed, mounted on stout steel road wheels of ample size. The leading wheels, instead of being mounted on the usual fore carriage, are hung on swivel axles, connected with the shafts, allowing the weight to be placed low down for stability. Clips are provided, fixed to the framing, by means of which the wheels can be firmly bolted to the body when the engine is at work, thus preventing oscillation.

Stand No. 325 was a very interesting one, Mr. J. Wallis Titt, Woodcock Ironworks, Warminster, Wilts, exhibiting one of his Simplex wind engines for pumping. The Simplex wind engines are used for numerous purposes, and are most useful for the farm and also driving farm machinery. We may mention that one of Mr. Titt's thirty feet diameter Simplex wind engines and set of pumps are in use for the supplying of water to the villages of Great and Little Brington, in Northamptonshire. It has been in use for several years, and it has proved in every way satisfactory, and has sustained but trifling damage even from the strongest winds. One of the principals of the waterworks mentioned states that in the days when the water was by horse power for a part only of Great Brington the cost was £28 per annum, but since using the wind engine the supervision and oiling does not cost more than 1s. 6d. per week. When there is sufficient wind the engine works days, nights, and Sundays if required. The same gentleman further states that "At the time our pumps were put down my belief in wind-power was not what it is now, and I had a driving wheel put on to the driving shaft of the pumps, so that in case the wind failed us we could pump by steam power. We have never yet had to resort to this power, and unless anything very unforeseen happens we never shall." This goes to prove that wind power is much better than steam power.

t

A haystack of this season's growth, belonging to Mr. Jesse Finch, builder, of Haywards Heath, and situated on land at the back of the Mill Green Road, was almost totally destroyed by fire on Wednesday. A quantity was saved, but it will only be fit for litter. The damage is estimated at about £20, which is not covered by insurance.

COMING SHOWS.

Norfolk Agricultural Association at Downham Market.

The annual summer show of the Norfolk Agricultural Association will take place at Downham Market, on Wednesday and Thursday next, July 4th and 5th, under the presidency of Mr. Thomas Leigh Hare, M.P., when it is expected a big company will assemble to view the various attractions which will be carried out under the auspices of this popular Society.

The Society's visits to Downham have been very few and far between, in fact only two shows have been held there since the Society started. The show which opens there next week will be the third occasion, and the growth of the Association is at once made apparent on referring to the difference as shown in the comparative statement of entries given below. For the sake of comparison last year's entries are given as well:—

Year.	Town.	Horses.	Cattle.	Sheep.	Pigs.	Total.
1868	Downham	243	163	82	23	511
1880	Ditto	202	146	102	34	584
1899	Diss	277	127	273	53	730
1900	Downham	320	140	249	49	758

The Society's prize list has been greatly increased this year, and considerably over £1,200 will be offered. The Local Committee, which include all the principal residents of Downham and the neighbourhood, with Mr. L. Hawkins as hon. sec., are working very energetically to give the Society a warm welcome, and are doing everything possible to make the visit of the Society a success. The townspeople are also combining their efforts to give the town as gay an appearance as possible by displaying as much bunting as they can.

The show will open at nine o'clock a.m. each morning—admission, first day, 2s. 6d.; second day, 1s.—and judging will commence in all sections punctually at that hour on Wednesday, at which time also catalogues may be obtained at the stand, inside the entrance. The public luncheon (at which the President of the Association, Mr. Thomas Leigh Hare, M.P., will preside, and to which ladies are invited) will take place on the opening day at 1.30 o'clock.

A very convenient and particularly pleasing ground has been secured by the Lynn Road and within easy distance of the station. On entering the grounds, the public are led by various avenues through the implement and machinery departments, on the left being found the machinery in motion, on each side of the central avenue the farm implement manufacturers have their stands, and on the right are various manufacturers' tents. To the end of the right avenue will be found the secretary's, Press, and reporters' and judges' and stewards' offices, and on entering a meadow to the right of this one faces the big horse ring, against which is erected a large grand stand capable of accommodating several hundred people. This meadow is encircled on the west and north fences by the shedding for Hackneys and hunters, whilst on the east and south are long ranges of covered shedding, in which the manufacturers of cattle food, animal medicines, etc., etc., from all parts of England have their stands. In the adjoining meadow, at the end of the covered shedding on the south fence of the meadow before-mentioned, one finds onseself amongst long ranges of cattle, sheep, and pig shedding, and another long range of horse shedding. Here also are the several judging rings for the various breeds of horses and cattle. The Technical Education Committee of the Norfolk County Council's horse-shoeing and butter-making competitions will also be carried on in separate buildings in this meadow. The entries for these competitions are very numerous, and in excess of previous years. In addition to this, the Technical Education Committee have also arranged for demonstrations and lectures, to be given by experts in their respective professions on butter and cheese-making, poultry-fattening, trussing, cramming and dressing, bee-keeping, driving, etc., during each day of the show. By kind permission of Col. Hyde and officers, the band of the 3rd V.B.N.R. will play selections of music during each day. The Great Eastern Railway Company are running special trains at special fares to and from the show both days.

Wirral and Birkenhead Agricultura Society.

The fifty-eighth annual show of this society has been fixed to take place on Friday, Saturday, and Monday (Bank Holiday), the 3rd, 4th, and 6th August, at Bidston. The president for the year is Mr. W. H. Lever, of Thornton Manor, Cheshire, while Mr. Walter Glynn, of Bromborough, is the vice-president. The committee have now issued the prize list, which includes many new classes for implements, machinery in motion, etc., for which valuable cash prizes are offered, in addition to the Society's medals, for machinery in motion. In consequence of the prevalence of swine fever, no classes are provided for pigs, but many additional classes are included for sheep, cattle, and horses. The prize money in all sections has been considerably increased, besides which several new challenge bowls are offered for competition for the first time. As usual, prizes are offered for pigeons, poultry, dogs, butter, cheese, eggs, honey, and bee appliances, in addition to the

horticultural section, which is always one of the most popular features of this society's exhibition. The valuable prizes offered for leapers on each day, including a champion prize of £20, which will be competed for on the Bank Holiday, ought to attract a record entry. The total prizes for this year's show exceed £2,800. Extensive alterations are now in progress at the society's show-yard, and the two adjoining fields will also be utilised. The band of the Queen's Own Royal Yorkshire Dragoons and the Widnes Prize Band have been engaged to play. Messrs. Milburn and Company, St. Anne Street, Liverpool, have been again entrusted with the catering. Messrs. Peck and Company, Wigan, have secured the contract for canvas, and Messrs. Eldred, Mottram, and Co., Shrewsbury, will supply the whole of the tents. Messrs. Wilkinson and Co., Liverpool, provide the decorations, and the cloak-rooms, parcels office, and cycle stables will, as usual, be in charge of Mr. Barlow, of Huddersfield. Messrs. Spratts Patent, London and Liverpool, will bench, pen, and feed the dogs, poultry, and pigeons, and the Sanitas Disinfectants Company will disinfect the showyard, under the superintendence of Mr. Gamble, of Liverpool, and a smoke's supply stores, provided by Mr. Nicholls, also of Liverpool. An open-air service will be held in the showyard for the herdsmen on the Sunday afternoon, when a collection will be made in aid of the Royal Agricultural Benevolent Fund for assisting deserving farmers in reduced circumstances. A supper will be provided for those remaining in the yard in charge of stock, etc., on both the Saturday and Sunday evenings. The various railway companies will issue cheap tickets to Liverpool and Birkenhead on each day of the show, and season tickets of admission to the yard and other information will be supplied on application to the secretary, Mr. Arthur H. Edwardson, 6, Hamilton Square, Birkenhead. Entries for implements, machinery, etc., close on July 14th, and for all other sections on July 19th.

Additional special prize of £5 presented by F. Johnson, Esq., of South Grove Nurseries, Woodchurch, R.A. Oxton, for the best Shire filly foaled in 1898 belonging to a tenant farmer in Wirral.

SOCIETIES.

Bath and West.

Council Meeting.

The Council of the Society met on the second day of the show in the Council Pavilion in the showyard, under the presidency of the Marquis of Bath, and approved of their report, which was to be presented at the annual meeting on the following day. In their report the Council congratulated the members upon meeting once more at Bath, the birthplace and headquarters of the Society, and where it has always been sure of a cordial and hospitable welcome. The closing days of 1899, fraught with sorrow to the nation generally, brought a special sadness to the Society in the death of Sir John Lennard. As a trustee and vice-president, as a chairman of committees, and especially as senior steward of stock, he rendered invaluable service, and the Council desire to place on record their deep sense of the great loss which the Society has sustained by his death. The Council have appointed the Marquis of Bath as a trustee of the Society, in succession to Sir J. F. Lennard. Death has also deprived the Society of two other of its vice-presidents, viz., the Marquis of Winchester, who died fighting for his Queen and country in South Africa, and Sir G. S. Stucley, an old and staunch supporter of the Society. During the past year the Council have continued their efforts for the promotion of technical education in agriculture by organising and conducting, on behalf of the Somerset County Council, a cheese and a farriery school, which are being continued during the current year. The Council have also followed up the practical and scientific investigations, initiated by the Society a few years since, in connection with cider making, the experience of previous years having fully satisfied them of the value of these researches. The experiments upon the improvement of grass land, which were set on foot in 1895, are in progress, and attention is especially being directed to the cause and effect of "teartness" in land. The Board of Agriculture has once more borne testimony to the utility of the experimental and research work of the Society by awarding a grant in aid of it. The Council have arranged to carry out, in conjunction with the Board of Agriculture, an additional experiment having for its object to show the influence of various manures upon the production of mutton. The Council believe that such an experiment is likely to be an extremely useful one.

During the past year the Society's research work in dairying, which had for some years been conducted at the joint expense of the Society and the Board of Agriculture, has been in abeyance, owing to the Board not having been prepared to make a further grant in aid. The matter is still under the consideration of the Board, and as the utility of these investigations has been so generally acknowledged, and as the Cheese School carried on by the Society provides so excellent a field for observation, it is to be hoped that the Board may be induced to give such financial support as may enable the Society to continue its researches in this direction. The value of them has been recognised by the Somerset County Council, which recently passed a resolution expressing its desire to support the Society in urging the Government to continue its grant in aid of such work.

The Council acknowledges the friendly co-operation in promoting the success of the Bath meeting of the Somerset County Agricultural Association, who have suspended their show for the year, and have contributed £100 in prizes. They also gratefully acknowledge the receipt of special prizes from other societies, etc. His Royal Highness the Duke of York, K.G., has kindly consented to honour the Society by accepting the office of president for the ensuing year. The Council recommended that Mr. E. J. Saunders be elected a vice-president of the Society; and that the gentlemen named on the agenda paper be elected members of the Council for the years 1900-1902, in room of those retiring by rotation.

Annual General Meeting.

The annual general meeting of the members was held in the Council Chamber on the third day of the show, the Marquis of Bath again presiding. His Lordship proposed the adoption of the Council's report, and referred to the loss the Society had sustained by the death of Sir John Lennard and the Marquis of Winchester. He thanked the Council for the honour they had done him in electing him a trustee of the Society in succession to Sir John Lennard, though he regretted the occasion for it. A paragraph in the report dealt with a fresh experiment which the Council had undertaken at the invitation of the Board of Agriculture. He only wished to assure the members of the Council that, although it was worded in the form that they were carrying on additional experiments, having for its object "to show the influence of various manures upon the production of mutton," they did not intend to feed the sheep with that valuable article. (Laughter.) It was to be applied to the land, but they had accepted the definition which had been given them by the highest authorities in the country. (Laughter.) With regard to the paragraph dealing with the Society's research work in dairying, they would notice that the matter had been lately in abeyance owing to the fact that they had yet not a further grant in aid, but he was glad to be able to announce that since the report had been circulated a conference between the Society's scientific representative and the scientific experts of the Board of Agriculture had been held, and a scheme was in course of being formulated, so that he hoped the research work would not be entirely dropped. (Applause.) He thought he might take it upon himself to congratulate the Society upon the show now being held. (Hear, hear.) He trusted that the excellence of the exhibits and their number would be correspondingly backed up by the receipts. (Hear, hear.) They owed their thanks to the County Association for the steps they took to meet them on their again coming into Somerset. It would, he thought, be extremely regrettable in the interests of agriculture if any real or serious rivalry were to exist between the different agricultural societies. Their area was not the same, and he most sincerely trusted that the good feeling which had hitherto existed between them might long continue. (Applause.) They also gratefully acknowledged the receipt of special prizes from a large number of associations, and also from individuals, including the Duke of Marlborough, Captain Best, Sir James Blyth, and Colonel Helyar. They had received a most cordial welcome from the city and Corporation of Bath, and it was only what they would expect, knowing the intimate connection which existed between the Bath and West of England Society and that ancient city. (Applause.) They regretted that owing to failing health Mr. E. J. Sanders was unable to continue his services as a steward, and the proposal to elect him a vice-president was only a suitable recognition of his valuable work for many years. (Hear, hear.) Now he came to that portion of the report which he thought under the circumstances was perhaps the most important. The Society had been greatly honoured by the fact that the Duke of York had graciously consented to allow his name to be brought forward for election as president next year. (Applause.) He knew that every member of the Society would most cordially welcome his Royal Highness in that important office. (Applause.) Might he venture to urge upon them the desirability of increasing the membership? He trusted that every member would do his best in that direction in that memorable year, and make the Duke of York's term of office one of the greatest success, both in the showyard and also with regard to membership. (Hear, hear.) They had reason to be thankful to the members of the Bath and West Society for the interest they showed in their operations. The expenses of the Society were constantly increasing. He hoped they would continue to do so, as it would be an evidence of an increase in the valuable work which the Society had done now for so many years past, but of course to carry on the work with increased expense meant also the necessity of increased membership. (Applause.)

Mr. J. E. Ward seconded the motion, and said thanks were due to the secretary for the obituary notice of Sir John Lennard, published in the Society's journal.

Mr. Geoffrey Howard said he believed there had been a correspondence between the Agricultural Engineers' Association and the Council with reference to the curtailment of the number of days of the show. The matter was one of great importance to exhibitors that the Society should reduce the number of days to four, so that they might not have to keep the members of their staff in the yard over Sunday. He believed the stock exhibitors shared the views of the implement exhibitors in that respect. He hoped the matter would receive careful consideration, and he did not think the Society would suffer financially.

The President said the matter had been brought before the Council, and referred to the Finance Committee, who, after careful investigation, recommended that no alteration should be made. The Council subsequently unanimously endorsed the recommendation.

Mr. Harrison endorsed the remarks of Mr. Howard, and suggested Tuesday and Friday as the period during which the show should remain open

Mr. J. G. S. W. Stroud supported the action of the Council.

Mr. Algernon S. Ayre was of opinion that Monday was a bad day for closing, and suggested that the show should not be continued over the Sunday.

Captain Best said that for many years he had been on the Show Dates Committee, which had to settle the matter. He was, personally, strongly in favour of the old plan of opening on the Monday and closing on the Friday, but he had on every occasion seen the necessity of adhering to from Wednesday to Monday when the matter had to be determined.

The President said the Council were glad at all times that matters of this kind should be ventilated, and they would always pay due respect to the views expressed.

The report was then adopted.

The President next moved that His Royal Highness the Duke of York, K.G., be elected President of the Society for the ensuing year, mentioning that His Royal Highness had been graciously pleased to accept the position. (Applause.)

Sir R. H. Paget, in seconding the motion, said it would be a matter of the greatest satisfaction to the Society to have such direct evidence that a leading member of the Royal Family took such a lively interest in the greatest industry of the country. They were, however, unable to excuse His Royal Highness from the ordeal which so many of them had had to go through, viz., the ordeal of an election. (Laughter.) It was an ordeal which he could approach in this case without the slightest fear, and he ventured to predict that the election would be unanimous. (Applause.) He emphasised the noble President's remarks, and urged that a special effort should be made during the year to increase the roll of members.

The motion was carried by acclamation.

On the motion of Mr. G. E. Martin, seconded by Mr. Story-Maskelyne, Mr. E. J. Sanders, of Stoke House, Exeter, was elected a vice-president.

On the proposition of Sir Thomas Acland, seconded by Mr. Lloyd Thomas, a number of Councilmen were then elected.

Mr. G. E. Lloyd Baker proposed: "That the thanks of the society be presented to the Right Worshipful the Mayor of Bath and to the members of the local committee for the cordiality with which they had received the Society, and for their efforts to promote the success of the meeting."

Mr. T. Dyke seconded the motion, which was unanimously carried.

Thanks were voted to the judges, on the proposition of Mr. J. E. Ransome, seconded by Mr. W. B. Roderick. The latter said that as an unsuccessful exhibitor he was quite satisfied with the awards. (Hear, hear.)

On the proposition of Captain Best, seconded by Mr. H. B. Napier, a vote of thanks was passed to the directors and officials of the railway companies who had afforded facilities in connection with the exhibition.

Mr. E. T. D. Foxcroft, in moving a vote of thanks to the retiring president, said that they knew how well Lord Bath continued the honourable traditions of his family for useful public work, and, after his zeal and assiduity in the interests of the society, it was only natural that he should have been elevated to the distinguished position which he had occupied during the past year. (Applause.) He could only say that the choice of the society in electing Lord Bath had been abundantly justified, and that his lordship had filled the office to the satisfaction of everyone. (Applause.)

Mr. R. Neville Grenville seconded the motion, which was carried by acclamation.

The President, in reply, said his term of office had been one of real pleasure.

Hunters' Improvement Society.

Mr. J. C. Straker, M.F.H. (President), occupied the chair at a meeting of the Council of this Society, held in the Royal showyard at York on Wednesday, June 20th. The secretary presented the financial statement since the last meeting as follows: Balance at bank, £220 11s. 3d.; receipts, £20 5s. 6d.; arrears of subscription, £86 2s.

Army Remounts.

The secretary submitted the correspondence which has passed between the War Office and himself with

reference to encouraging the breeding of horses suitable for the Army, and it was resolved to ask the Inspector-General of Remounts to kindly receive a small deputation from the Council with a view of considering the whole question and submitting several suggestions made by members of the Council.

The Council then adjourned till Tuesday, October 16th.

Hackney Horse Society.

A meeting of the Council of the Hackney Horse Society was held (by permission) in the large tent on the R.A.S.E. show-ground at York, on Tuesday, the 19th ult., Mr. F. Wrench in the chair.

The secretary announced the receipt of a letter from Mr. James Fulton, of Strathbungo, Glasgow, accepting the invitation of the Council to act as steward of the London Show for the ensuing three years. It was also reported that the following medals had been applied for to date by various societies, under the terms of the different schemes under which they are offered, viz., seventeen gold medals for Hackney stallions and mares of the value of £10 each, three gold medals for harness horses, and eighty-five silver medals.

Prefixes.

The exclusive right to the use of the following prefixes was granted to the various applicants:—

Prefix.	Applicant.
Hilden	Benjamin Oakes.
Langford	Sidney Hill.
Leek	Arthur Nicholson.
Sandall	George Clark.
Saughall	James Storrar, jun.
Stourton	Walter Showell.
Swinfen	Col. Swinfen-Broun.

Future Meetings.

It was arranged to hold a special meeting of the Horse Show Committee at the London offices on Tuesday, October 11th, at 11 a.m., to consider in detail suggested improvements in the classification at the next London show, the Finance Committee to hold a meeting prior to that hour to report concerning the financial aspect of the question. The next meeting of the Council was fixed for Wednesday, November 7th.

Shire Horse Society.

Mr. P. A. Muntz, M.P. (past president), occupied the chair at a meeting of the Council, held in the Royal Showyard at York, on Tuesday, June 19th. Mr. Salt stated that Sir Walter Gilbey had been re-elected chairman of the Finance Committee for the ensuing year. The balance on current account at the bank was £416 13s. 7d., with accounts for payment amounting to £831 8s. The report was adopted.

Editing Committee.

Mr. Kenworthy reported that Mr. A. C. Duncombe had been elected chairman, with himself as vice-chairman. The committee had approved the photographs of the 1900 champions at the recent Spring Show, and passed the following prefixes and affix:—

Prefixes and Affix.

Prefix.	Applicant.
Adforton	Richard Hughes.
Apethorpe	E. Lucas.
Appleby	C. T. Moore.
Ashley	H. Cottrell.
Bennington	W. H. Bingham.
Besthorpe	W. Roe.
Biddulph	T. Walley.
Bingham	Hardstaff and Brown.
Branston	W. Wrench.
Buttington	W. Edwards.
Cayton	W. P. Crosland.
Cockerington	J. W. Needham.
Connington	W. Selby.
Crankwell	Walter Ward.
Flint Mill	J. T. Moore.
Gayton	C. Bloor.
Gifford's [and Affix.]	J. W. Brittain.
Grendon	C. Raven.
Grindley	S. H. Allen.
Guthram	T. S. Gray.
Harkstead	W. Wrinch.
Hinton	C. C. Church.
Hollies	G. Lomas.
Houndhill	Joseph Cottrell.
Huntsham	J. Gunter.
Ingestre	J. W. Shelley.
Kelvedon	Maj.-General Sir Henry Ewart.
Marney	J. C. Peache.
Newboro'	John Sisson.
Oakenhurst	J. Smith.
Overa	F. W. Bernard.
Plumpton	Hugh Tomasson.
Priory	W. Oxley.
Rainton	J. Bailey.
Roothing	H. Turner.
Rosewood	N. Thompstone.
Roughwood	J. Colclough.
Shotley	H. W. Packard.
Southdown	C. R. W. Adeane.
Springs	T. Lea.
Styrrup	W. Camm.
Thornhaugh	Walter Close.
Toucham	J. Hopper.
Tythby	R. Henshaw.
Vale	J. Hopkins.
Wensley	Lord Bolton.
Wildsworth	R. Waterhouse.
Worlick	Mrs. Everitt.
Wrekin	W. H. Davies.
Yorton	S. F. M. Nevett.

Horse Show Committee.

Mr. Kenworthy reported that Sir Walter Gilbey had been re-elected chairman for the ensuing year. The Judges Selection Committee had been reconstituted as follows:—Sir Walter Gilbey, Bart., Lord Hothfield, Mr. Joseph Martin, Lord Middleton, Mr. Parnell, Mr. W. Cecil Salt, and Mr. Joseph Topham. Messrs. Sexton, Grimwade, and Beak were re-elected auctioneers, and the committee recommended the offer of a gold medal under Scheme A to the Montgomeryshire Agricultural Association.

This report was adopted.

Next Council Meeting.

The Council then adjourned till Tuesday, November 8th.

Suffolk Horse.

A meeting of the Council of the Suffolk Horse Society was held at the Town Hall, Ipswich, on Tuesday, Sir Cuthbert Quilter, Bart., occupying the chair. The Secretary read the minutes of the last meeting, and remarked, with regard to the fixing of the date for the annual sale, that that matter was referred back to the Committee on the understanding that they were to fix some date before the 1st of September. It was thought that the matter could be arranged without calling a Council meeting by fixing the 31st of August, but subsequently it transpired that a prominent member of the Society and supporter of the sales would be unable to be present, and it was thought that a Council meeting should be called to deal with the matter.

In the course of a good deal of conversation, the Chairman observed that it was necessary, as far as possible, to secure the attendance at the sale of gentlemen most concerned and interested in the Suffolk horse. This was a sale that needed the active and general support of breeders and owners of Suffolk horses. From the remarks which had been made in the papers in reference to the Royal Show at York, and at other exhibitions, it was pretty evident the Suffolk horse was making satisfactory progress. It had been stated, amongst other things, that of all the Suffolks which underwent veterinary examination at the York Royal Show, there was not a single case of unsoundness. (Applause.) That was a fact upon which all interested in Suffolks might congratulate themselves. (Hear, hear.) He had seen a good many notices in the papers with respect to the prominent position which the Suffolks took at the Richmond Show, and the great amount of praise bestowed upon them as a distinctive breed. All this must be very satisfactory to them, and patent to anybody outside who was unprejudiced, that, at any rate, the Suffolks had held their own during the past year. (Hear, hear.) As to the date of the proposed sale, it had been suggested that there should be two sales each year, one in the early autumn and the other in the spring. He did not know whether the suggestion would meet with the approval of the Council.

In the discussion which took place, several dates were proposed, strong feeling being expressed in favour of September 7th, but it was eventually left to the chairman to decide later on whether it should be held on Thursday, August 30th, or Friday, September 7th. As to the question of the advisability of holding a second sale for Suffolks of all kinds in the spring, it was resolved, on the motion of Mr. Alfred J. Smith, seconded by Mr. Edward F. Quilter, to refer the matter to the Sale Committee for them to report to the Council.

The Chairman brought forward the question of the rules and regulations adopted by the Council in May in respect to the Produce Stakes. The proposals were published at the time, and it will be remembered that it was resolved that the Produce Stakes should be limited to foals entered by members of the Society, the subscription for each foal entered being £1 5s., the payment to be made by instalments. It was also resolved that each year members wishing to enter should forward to the secretary the name of the mare, the name of the sire used, and the first payment; all foals entered for the Produce Stakes to be put up for public auction at the Society's sale, subject to the usual conditions, and judged by the judges appointed by the Council of the Suffolk Horse Society. It was also provided that three-fourths of the total stakes subscribed should go to the first-prize foal, while the owner of the second-prize foal would have his fees returned. Sir Cuthbert Quilter added that this scheme, if it did not directly tend to the improvement of the breed, would add greatly to the interest of the annual sale. There were several gentlemen who would doubtless be proud of being the winner of the Produce Stakes.

Mr. W. Toller considered that it would be advisable to have more than one prize.

Several gentlemen expressed their concurrence with this suggestion, and on the motion of Mr. Herman Biddell, seconded by Mr. W. H. Hewitt, it was resolved to adopt the report, and that the question of the number of prizes should be left to be decided later on.

We are asked to state that an issue of special war stamps, to celebrate the first appearance of Victorian troops on the battlefield, has been sent for disposal to the office of the Agent-General for Victoria, 15, Victoria Street, Westminster, S.W., to whom application should be made. There are two varieties, penny and twopenny, the prices of which are 1s. and 2s. respectively.

National Pig-Breeders' Association.

The annual general meeting of this Association was held, by permission of the Council of the R.A.S.E., in the large tent of the showground, York, on Tuesday, June 19th, Mr. P. L. Mills in the chair. There were also present Sir O. Mosley, Messrs. Ascroft, Barron, Daybell, Duckering, A. S. Gibson, Hall, Hallas, Hanson, Ibbotson, Lawson, Norman Philip, Howard-Taylor, George White, and the Secretary.

The minutes of the last meeting were read and confirmed and the report and balance-sheet adopted.

In the course of their report the Council state that the membership of the Association consists of twenty-two life and 109 annual members. The financial position of the Association still continues satisfactory, the balance in hand being £153 1s. 4d., with the sum of £410 4s. 6d. invested in securities; only five members being, at the present time, in arrears with their subscriptions for 1899. A further purchase of stock has been made at a cost of £102 8s. 6d.

The entries for Vol. XVI. are very satisfactory, viz., 594. Eighty-two breeders and 149 owners are represented. The entries, 215 boars and 379 sows, are divided as follows:—Large White, boars 140, sows 243; Middle White, boars 26, sows 29; Small White, boars 4, sows 9; Tamworth, boars 36, sows 86; Berkshires, boars 8, sows 9; Small Black, boar 1, sows 3.

The conditions of entry for Vol. XVII. are as follows:—That the sire and dam are registered, or that the pig proposed to be entered, if a boar, has five crosses of registered blood, viz., that the sire, sire of dam, sire of grand dam, sire of great-granddam, and sire of g.g.granddam are registered boars; and if a sow has four crosses, viz., that the sire, sire of dam, sire of grand dam, and sire of great-granddam are registered boars. Also that the produce of sows be accepted (which produce must be by a registered sire) if the said sows have produce entered in Vols. XI., XII., XIII., XIV., XV., or XVI. The name, age, and breeder of the dam, granddam, greatgranddam, and g.g.-granddam, when not registered, must be given.

The Council again wish to call particular attention to Bye-law 32, which reads thus:—"It shall be incumbent on all members desirous of entering their stock, to make a return of the birth of all pigs born, alive or dead, during the month of January in each year, within one month of the date of birth of such pigs, and of all other pigs born during that year as soon as possible, but in any case on or before the 31st December, on birth forms, to be supplied by the secretary, who will forward the same on application."

The scrutineers declared the following gentlemen duly elected members of the Council, viz., Lord Moreton, Messrs. P. L. Mills, P. Ascroft, Henry Smith, and C. Howard-Taylor.

Mr. P. L. Mills was elected president, Sir O. Mosley president-elect, and Mr. Henry Smith auditor for the coming year. Mr. Gibson moved the following resolution:—"That Bye-law 2 be altered as follows: Life members shall pay on election a subscription of £15 15s., but members of five years' standing may become life members by a payment of £10 10s., members of seven years by a payment of £8 8s., and members of ten years and upwards by a payment of £5 5s." This was seconded by Mr. Barron, and after some discussion was carried unanimously. The Secretary was instructed to call an extraordinary general meeting at the Smithfield Show to confirm the resolution.

Mr. Daybell brought forward the question of dentition of pigs at county and other shows, and suggested that the Association take some action in the matter. After considerable discussion Mr. Philip proposed, and Mr. Daybell seconded, that the Secretary write to the principal societies asking them to enforce the dentition regulations.

Mr. Barron then moved:—"That no entries for the Herd Book be received from any member who had not complied with Bye-law 32." Mr. Hall seconded.

Mr. Ibbotson moved that it be referred to the Council for further consideration, and to this Mr. Barron agreed and withdrew his motion.

A vote of thanks was accorded to the Chairman for his services, and to the Council of the R.A.S.E. for the use of the tent.

Council Meeting.

A meeting of the Council was held at the conclusion of the general meeting, the president, Mr P. L. Mills (in the chair), Messrs. Ascroft, Barron, Daybell, Duckering, A. S. Gibson, Hallas, Ibbotson, Philip, C. Howard, Taylor, and the Secretary being present.

The minutes of the last meeting were read and confirmed, and Mr. R. P. Cooper and the Rev. W. H. Illingworth elected members.

Messrs. Barron, Heaton, and Norman were elected the Finance Committee; and Messrs. Barron, D. Gibson, A. S. Gibson, Ibbotson, Norman, and Henry Smith were elected the General Purposes and Editing Committees.

The revised entry form was examined and passed and ordered to be printed.

A letter was read from the secretary of the Great Yorkshire Agricultural Society saying that in consequence of the Swine Fever Regulations pigs would not be exhibited at their forthcoming show.

The next meeting will take place at the Smithfield Show.

FARM.

Soiling and Ensilage.*

"Soiling" is the title of a second and revised edition of "Soiling, Summer and Winter," by Frank Sherman Peer. In this work the author, who farms not for pleasure, but for a livelihood, relates his experience, and gives in an interesting manner some of the latest and most economical methods of summer and winter feeding and management of farm stock. The subject of soiling, which is dealt with in a practical manner, occupies most part of the volume, but there are interesting chapters on ensilage and some useful hints on barn construction and stable management, whilst instructions are given for building a silo. The work is really for American farmers, but there is a great deal in it that will also prove of great service to agriculturists on this side of the Atlantic, and it will well repay them for a perusal of its pages. It appears that American farmers are also suffering from the scarcity of labourers, for this work is dedicated to the farmers' sons of America, "with the hope that within its pages they may find encouragement to pursue agriculture as a business, instead of leaving the farm for some so-called higher pursuits."

We make the following extract from a chapter showing the better condition and greater comfort of farm stock when animals are soiled:—

"On this question there is no chance whatever for argument. The difference in the condition of cattle soiled and those at pasture is decidedly and positively in favour of soiling. In the first place, all animals that chew the cud are particularly adapted to the soiling system, for several reasons. The very nature of their digestive organs shows that they are best provided for when they can have their feed in abundance and near at hand. Their habit is to collect their food quickly until the first stomach or paunch is full. This first stomach is used as a basket or receptacle into which they store their food. When full, they lie down, and it is then that the feeding proper begins. When a cow or sheep or other ruminating animals are grazing, they are not, as many suppose, in the act of eating. They are simply gathering or collecting their food. The sooner they can do this collecting the better, because they do not like to begin eating until the basket is well filled. Besides, the less time it takes to fill the basket, the more time they have to eat and convert it into the desired product.

"Again, if they must waste a lot of energy and muscular force carrying themselves about, as they do when required to fill their baskets from a scanty pasture, that wasted energy, which is all at the expense of the food, might better be employed in producing milk or butter. After the animals have filled this first paunch or basket, their habit, as before stated, is to lie down and then the feeding proper begins by bringing up from this first stomach a cud at a time, which they proceed to masticate thoroughly, after which it is sent to the second stomach, and so on to the third and fourth stomachs, where it becomes digested and assimilated with the blood until the basket is emptied, when the cow is ready to collect it full again. Looking at the cow as a machine, it will be seen that when she does not have to seek her food by walking miles for it in the hot sun, annoyed by the flies, etc., she is able to convert the largest amount of feed into the product her owner requires at the least possible outlay of her strength, and the more basketfuls of grass or forage she can make way within a day the more profitable a machine she must become.

"A few years ago, when the Mohawk Valley was the principal dairy section of the State, we are told that it was the custom of the farmers and dairymen to cut down all the shade trees in their fields, so that the cows would not be wasting time lying under them, when, as their owners thought, they should be up and at work. They also had boys going about to drive their cattle up when they attempted to lie down. They said truthfully that milk was made from grass, and a cow was a machine, and she must eat so much to supply her own wants. The more she can be induced to eat in a day the greater will be her returns to her owner. But they based their reasoning on a mistaken notion—*i.e.*, that a cow was feeding or eating when she was grazing or collecting her food. While they were perfectly correct in assuming that their cattle were machines, and the owners' profit depended upon the amount of food the animals could be made to consume above what they required to heat their blood and supply their waste, they were entirely wrong in supposing that a cow was serving their best interests by being kept on her feet. The next thing is to provide them with the greatest possible comfort, so that when a cargo is ready for the mill, the mill will be in as perfect running order as possible. That is to say, when the cow lies down and the milling begins, she will have a comfortable resting-place, clean, dry, and easy. No one would think of starting a factory without first oiling the machinery, and so adjusting its parts that it will run with the greatest possible ease. The tie should be such as will enable her to lie in a perfectly natural condition.

"When you have provided the raw materials and everything is oiled and ready, your cow then is in the best possible position to do business as a profitable member of the farm household. With a well-contented mind and a well-filled stomach, she can work up several times as many cargoes a day as if her time was being spent chasing about the pasture, looking for sweets and fighting flies. At any rate, you, as manager and proprietor of the mill, have done your part, and there is no excuse whatever for the cow, and no inclination, you will find, except to do her best and attend strictly to business. Nor is the question of the collection of their food with the least possible labour and a good, comfortable place in which to lie down, the only thing which adds to the greater comfort and better condition of stock soiled. By keeping them in their stables daytimes they are protected from the enervating heat of the sun. They are also sheltered from storms, secured from jumping into fields of growing grain or fruit orchards. They are protected from drinking muddy, impure water and against thirst.

"This last is an item that is not, as a rule, given the attention it deserves. Milk is 84¼ per cent. water, and a supply of good, fresh water, close at hand, is a very important item, because, when a cow is turned to pasture, and has to go to a distant part of the field to help herself, she waits until great thirst drives her to it. Finally, when she does go, instead of getting a drink and returning to business, she overloads her stomach with water, and stands about in the stream or pond until absolute hunger drives her out again. So she lives on from day to day, eating only when she is very hungry, and drinking only when she is very thirsty. The soiling system, with a good well or spring at the barn, prevents all this annoyance, and is no small matter in adding to the comfort and also to the credit account of the animal.

"Lastly, and, perhaps, most important of all, so far as the animal's comfort is concerned, by a proper system of soiling the cattle are protected from flies, those awful pests that sap their blood and drive them to a state little short of frenzy. How can cattle so tormented be expected to do a good day's work? Living in the best of pastures after the middle of June is simply living to exist. To show sceptical people that cattle preferred being shut up in their stables in fly-time to roaming at will in pastures, I have turned my cattle out—away they would go, with their tails over their backs, until the flies got after them, when back they came to their stalls as fast as they went.

"If the reader could see the difference in the condition of cattle soiled and those pastured after the beginning of fly-time, he would see such a contrast as would require no further argument to convince him of its value. Look at that poor, gaunt cow, as she comes from a pasture field after a hard day's work, fighting flies until she is desperate, and sometimes until she has given up in despair, too exhausted to battle any longer against them, or attempt to dislodge them as they cluster on her neck and back undisturbed. Notice her shuffling gait and melancholy face, the picture of despondency, her hair standing on end. Turn out into the same barnyard a cow that has been properly soiled in stables darkened to exclude the flies. She is as plump as partridges after wheat harvest. She acts like a schoolboy from his books—eyes bright, head erect, step sprightly, hair sleek, stomach full, and ready for a frolic. This is no fancy sketch; indeed, I feel as if I have failed fully to represent the great contrast, as I have often witnessed it. I feel safe in saying that no candid farmer, however prejudiced he may be against stabling his cows in summer, would need any other proof to convince him that, so far as the greater comfort and healthy condition of his stock is concerned, the soiling system affords the most gratifying results, and adds materially to the profits."

* "Soiling: Soiling Crops, and Ensilage: Barn, Stable, and Silo Construction," by Frank Sherman Peer. New York: Mr F. Mansfield; London: Messrs Laughton and Co., 1, Essex Street, W.C. Price 5s.

THE DAIRY.

Preston Cheese Fair.

The June Cheese Fair at Preston was held on Tuesday. There was a large attendance of farmers and buyers, and a clearance was effected within an hour from the opening of the fair, a brisk demand being experienced at the extreme prices of last fair. The pitch consisted of 129 lots, comprising 1,803 cheeses, a decrease of one lot and 19 cheeses compared with the corresponding fair last year. Quotations:—Common, 37s. 6d. to 42s. 6d.; medium, 45s. 6d. to 50s. 6d.; and best, 52s. 6d. to 57s.

Bath and West and Southern Counties Society.

The first draft (29cwt.) of this year's cheese made from March 27th to the end of April at the Cheese School, carried on by the Bath and West and Southern Counties Society for the Somerset County Council, at Vale Farm, Batcombe, near Evercreech, has just been sold to Messrs. Hill Bros., of Evercreech, at 63s. per cwt. of 112lbs. 3,651 gallons of milk made 3,505lbs. of green cheese, which when sold weighed 3,292lbs., showing a shrinkage of about 6 per cent. Twenty-four students have already entered for instruction at the school, and other applications are being received.

Where shall we Spend our Holidays?

This is a question which is probably interesting many of our readers at the present time, and to assist in solving this problem the Great Eastern Railway are again to the fore with their series of useful holiday pamphlets. Those unacquainted with the East Coast may be tempted to try it after reading some of the eulogiums heaped upon it for its bracing air and general attractions. "Holiday Haunts on the East Anglian Coast" is a collection of articles from the pens of various writers (including that well-known contributor to *Punch* and the *Daily Telegraph*, Clement Scott); a host of other useful information for intending visitors is also given as to places of interest in the neighbourhood of each resort, hotel, and boarding house accommodation and other facilities. "The Waterways of Norfolk and Suffolk" describes a holiday cruise on the "Broads." East Anglia's lake district, with particulars of the facilities for yachting and fishing, including list of yachts and boats for hire. Those preferring a quiet country holiday "far from the madding crowd" should consult the list of "Farmhouse and Country Lodgings," it is prefaced by an article descriptive of the principal places of interest in the Eastern Counties, well illustrated, and includes also a list of whole houses to be let furnished at the watering places and country villages, and the names of house agents at the seaside places. All should be able to find some place or other to suit their particular tastes; "pony and trap," "near sea and golf links," "large garden, lawn tennis," "garden and orchard," "bathing river," "good fishing," "boats to let," are a few of the remarks taken at random from its pages. Then there is a leaflet describing "Quiet Nooks on the North Coast of Norfolk," and yet another neatly got up booklet is now in the press, entitled "East Anglian Golf Links." All the above are issued gratuitously, and can be obtained of the Superintendent of the line, Liverpool Street Station, London, E.C., by sending a post-card stating which is required. And if our readers do make up their minds to visit Cromer, Yarmouth, Lowestoft, Clacton, or other of the east coast resorts, then we would advise them to obtain an annotated time table of the journey to the place they intend visiting; it will serve to while away the time and interest them in the passing objects as they whirl along in the express which carries them to rest and change and bracing air. If, on their return, they would like to have their eggs, poultry, fruit, and vegetables direct from the country, the "Farm and Dairy Produce" pamphlet will give them the names of farmers and others willing to supply them.

"Mark Lane Express" Diary.

July.

3 Sale of Suffolk Lambs and Ewes, at Gippeswyk Park, Ipswich.

THE SOUTHFIELDS AND CHURCHES WOOLLEN MILLS,

situated within two miles of Stroud, and containing an area of about 10¼ acres, upon which are erected mill buildings, engine and boiler houses, manager's house, etc. At the same time and place will also be offered in lots in detail the

PLANT AND MACHINERY,

including a steam boiler, beam engine, 14 carding engines, eight picking and cleaning machines, Willey's and dusting machines grinding, balling, and spooling machines, etc., thread condenser, fire mules, two doubling frames, warping mills, 18 power looms, size mixing and sizing machines, brushing machines four Fuller's, hydro-extractor, dye copper and backs, tentering machine, hydraulic press and pumps, engine boiler, and other effects. May be viewed by orders and particulars of the property and catalogues of the machinery had of Messrs. SNOW, FOX, and HIGGINSON, Solicitors, 7, Great St. Thomas Apostle, Queen-street, London, E.C.; of Messrs. WINTERBOTHAM and SON, Solicitors, Stroud; and of FULLER, HORSEY, SONS, and CASSELL, Auctioneers, 11, Billiter-square, E.C.

HAMPSHIRE DOWN SHEEP.

THE TRING PARK FLOCK,

The property of the Right Hon. Lord ROTHSCHILD.

THE ANNUAL SALE OF

70 HAMPSHIRE DOWN RAM LAMBS AND EWES

will take place at the HOME FARM, TRING, HERTS, on TUESDAY, JULY 24TH, 1900, At One o'clock.

In addition to the numerous prizes won on former occasions, the flock has added the distinction of winning the Championship, offered by the Hampshire Down Breeders' Association at the Royal Show this year, for the best Hampshire Down Ram. Twenty-five ram lambs from this flock were bought for the Continent and South America last year, and gave every satisfaction.

Catalogues may be obtained of RICHARDSON CARR, Esq., who will be pleased to show the flock to anyone making an appointment at the Home Farm, Tring, and of

W. BROWN & CO., Auctioneers
Tring, Herts.

Tring Station is 30 miles from London, via L. & N. W. Ry. (Euston).

WARE, HERTS.

FINE INVESTMENT. VALUABLE MERCANTILE PROPERTY, well situate in the Town of Ware, near good wharfage upon the River Lea, comprising Three Well-built Maltings, with 210 quarter steeps, substantially erected, brick and tile built, and in excellent repair, with barley stores, outbuildings and garden ground, as now in the occupation of Messrs. C. and E. H. Hitch, at a rental of £400 per annum, under lease dated 1889 for 21 years, determinable at the end of 7 or 14 years; also adjoining a valuable piece of Accommodation Pasture Land, ripe for building purposes, containing 3 acres, 3 roods, 5 perches, with early possession.

ALFRED PRESTON is favoured with instructions from the Exors. of the late Richard Oakes, Esq., to SELL by AUCTION, at the Saracen's Head Hotel, Ware, on WEDNESDAY, the 18th day of July, 1900, at 3 o'clock precisely, the above Valuable Properties, in Two Lots.

Particulars and Conditions of Sale may be obtained of Mr. Sydney Matthews, Solicitor, Swaffham, Norfolk; and of Alfred Preston, Worlingworth, Wickham Market, and Ipswich, Suffolk.

TO FLOCKMASTERS AND OTHERS.

CHILWORTH, near GUILDFORD, SURREY.

Important Sale of a draft from the well-known Albury Park Flock of pure-bred Southdown Sheep, the property of His Grace the Duke of Northumberland.

MESSRS. HEWETT and LEE are favoured with instructions to SELL by AUCTION, in a Field near Chilworth Station, S.E.Ry.,

On TUESDAY JULY 31st, 1900, at Two o'clock precisely.

A selected draft from the Albury Park Flock of Pedigree SOUTHDOWNS, comprising:—

203 FLOCK EWES (all ages),
14 RAMS,
82 EWE LAMBS,
31 RAM LAMBS, and
65 WETHER LAMBS.

The Albury Park Flock enjoys an excellent reputation as one of the most noted pure Southdown Flocks in the kingdom. It has been established with great care by judicious selection from the best and purest strains in the country, and has invariably received favourable notice whenever exhibited in the showyards of the principal Agricultural Societies both at home and abroad.

Catalogues may in due course be obtained of A. PEEBLES, Esq., Estate Office, Albury, near Guildford, and of Messrs. HEWETT and LEE, Auctioneers and Estate Agents, Guildford, Surrey.

CHICHESTER ANNUAL SALE AND SELLING OF SOUTHDOWN SHEEP.

The above annual Sale will be held by

HOBGEN BROS.,

at their Repository in the Chichester Cattle Market, on Wednesday, August 8, 1900, at one o'clock precisely.

Entries for the Sale have already been made from the celebrated flocks belonging to His Grace the Duke of Richmond and Gordon, K.G., the Pagham Harbour Company, Messrs. Hugh Penfold, Alfred Heasman, and F. N. Hobgen.

The Catalogue will include several prize-winners at the various summer Agricultural Shows.

On view the morning of Sale.

Catalogues may be obtained of HOBGEN BROS., Auctioneers, Valuers, and Estate Agents, East Street, Chichester, and Midhurst.

BIBBY'S

"CREAM EQUIVALENT" for CALVES.

An Ounce of Fact is worth a Ton of Theory.

A STRIKING FACT.

In our Spring number of "Bibby's Quarterly' we reproduced the photographs of two groups of Calves which are now being reared at the Horuby House Farm, Bedale, Yorks, by his Grace the Duke of Leeds.

One of the groups is being fed on New Milk and the other on Separated Milk and "Cream Equivalent."

We asked our readers to tell us which of these groups were fed on New Milk, and 707 Farmers, Farmers' wives, their sons and daughters competed for a small prize which we offered to those who guessed correctly.

445 selected the wrong, and 262 the right group.

We think the above striking FACT speaks volumes for "Cream Equivalent."

The "Cream Equivalent" can be had at 15s. per cwt., carriage paid to nearest station.

SOLE MANUFACTURERS:—
J. BIBBY & SONS,
Exchange Chambers, Liverpool.

FRANK MILLER'S LIQUID HARNESS DRESSING

Frank Miller's
HARNESS COMPO

Larger Box, better value than any other make, does more work with less labour, blacks, oils, and finishes with one application. Suitable for all users of heavy harness. Saddle Soap, Axle Oil, Hoof Dressing, Harness Oil.

LABOURERS' COMPENSATION: FARMERS' MUTUAL INSURANCE.

Perhaps the most notable fact about the debate upon the third reading of the Workmen's Compensation Act (1897) Extension Bill in the House of Commons was that it was thoroughly one-sided. It was not made a party question, and everyone who did speak seemed extremely anxious to take some amount of credit for having assisted to pass the measure. Some speakers were also eager to point out that they were not supporting the Bill in view of the general election, and that the reason they had opposed the inclusion of agricultural labourers in 1897 was only because the labourers had not asked for the benefits of the measure. All these statements sound very nice, but we cannot help prognosticating that they will be heard of again—and perhaps in a somewhat modified form—when the general election does arrive. Perhaps the most ingenious, as well as ingenuous, suggestion was that it had been worth waiting three years, as insurance premiums had in the meantime become reduced from somewhere about a pound to as low as three shillings on each hundred pounds of wages paid. When the Bill was introduced we did not feel at all enthusiastic upon the subject, and we have not since seen any reason to alter the view which we then took. It may be reasonably assumed that now that it has gone from the House of Commons it will pass through the House of Lords in time to receive the Royal Assent by the close of the present Session, and so find a place in the Statute Book during this year. It is true that it is provided, as the Bill stands at present, that a considerable amount of breathing time is to be allowed to the farmer before he is to be compelled to accept the liability which the measure will impose upon him.

The chief point which the farmer will have to consider will be as to whether he will insure or not. Probably, in the great majority of cases, it will be the wiser course to insure, although it might pay a well-to-do farmer to take the risk himself, just as some of our largest steam shipping companies have found from experience that it pays them to form their own insurance fund. But when the farmer has made up his mind that he will insure, he has by no means got to the end of the trouble and worry that he will have. In the first place, he may make up his mind that he will be besieged by a number of agents, each of whom will be absolutely certain that his own company is not only the best, but that it is, in fact, the only possible one. It may safely be asserted, that the first company offered should not be accepted, no matter how rosy its statements. It may be the best, but further enquiries should be made, and prices should be compared. Further, it is of the utmost importance that the financial position, as well as the reputation of the companies, should be looked into. There are good and bad companies. Some have a reputation for quibbling, raising every possible objection, and never paying until compelled, while others are known as promptly paying all proper claims, and even waiving points which might have been properly raised in their favour. These matters can only be ascertained by making enquiries. For our own part, we should like to see the formation of a Farmers' Mutual Insurance Company. We should imagine that this could be done under the auspices of the Central Chamber of Agriculture, or the Farmers' Club, or both. There would be two advantages in such a course, for the secretaries of the various local Chambers could act as agents at less cost than the ordinary agent; and if it should be found that the charges were too high, some part of the balance, after the formation of a proper reserve fund, could be returned as a bonus. The details would necessarily take some amount of consideration; but a small committee, with the assistance of an insurance expert, ought to be able to formulate a scheme. They would, surely, have no difficulty in finding the necessary amount of capital.

SAMPLES.

By a Man of Mark Lane.

At the shareholders' meeting of the Anglo-Chilian Nitrate and Railway Company (Limited) in London the chairman, Mr. William Macandrew, said that the world's consumption of nitrate having now overtaken the shipments they ought to have a higher range of prices for the next season than the last. But beyond that there was the possibility of the long-talked-of combination being carried out. To a large extent, more so than in previous years, this company was independent of such a combination, but if it came it would be so much the better. The directors had always supported any reasonable and fair combination to reduce the quantity to what the markets could take. They were still of that opinion, and therefore quite ready to support the efforts made in various quarters to bring this about.

The Departmental Committee on Scottish Agricultural Prices held three meetings in Edinburgh during the past week, Major Craigie, of the Board of Agriculture, in the unavoidable absence of the chairman, presiding. Evidence was heard from thirteen witnesses on questions relating to the regulations of Edinburgh Corn Market, the procedure adopted in striking fiars prices in various counties, and the existing methods of obtaining and publishing prices of live stock. The committee will take further evidence at a future date.

An undertaking which most people will regard as a forlorn hope (says the *Standard*) has been started on a scale which denotes a considerable degree of confidence in its authors. An association under the name of the International Office for the Regulation of Grain Prices has been started in Switzerland, under the leadership of Dr. Ruhland, Professor of Political Economy at the University of Fribourg; and the first number of a periodical, described as the "Monthly Report" of this Association, has been issued in English, French, and German. Dr. Ruhland, the editor, who is well known as a vigorous denunciator of the option system of trading, sets forth his programme in an introductory article. He contends that "the right of the farmer to obtain prices covering the cost of production is nothing more than the ancient and ever-misunderstood right of the labourer to the full proceeds of his labour"; and he adds that it is strange to find that enlightened and leading men, who outbid each other in their efforts to assist the labouring classes, "have scarcely an idea as to the right of the farmer to prices for his grain which convey the full reward of his labour by covering the cost of production."

In answer to the question whether there is not a danger that, by establishing such prices in central Europe, over production in the cheaper exporting countries would be brought about, Dr. Ruhland says that, "if there is a difference in the cost of production in the various countries, as also in different parts of the same countries, this difference is not antagonistic to that price level brought about by the natural movement in the grain trade and its carrying charges." It is easy to calculate such differences in the cost of production, he argues, and to regulate the price-level accordingly. Admitting that a change of price is most quickly attained by the [illegible] of the, he objects that the effects of protective laws are not always in accordance with the intentions of their authors. What should be done, according to Dr. Ruhland, is to form a great international organisation of farmers for the purpose of regulating the visible supplies of grain, which, he contends, mainly determine the prices at any given period. Such an organisation, too, should fix the daily prices at which, he thinks, producers have a right to sell. It is, then, in order to promote such an organisation that he has started his monthly paper.

In short (continues the *Standard*) Dr. Ruhland has formed the modest idea of forming a gigantic international "trust" of grain producers. That he will fail may be regarded as a foregone conclusion; for, apart from the fact that farmers are of all classes least disposed to combine for a common purpose, their neediness is an absolute bar to the holding of their produce and the regulation of its marketing, which would be indispensable to the success of his scheme.

The receipts on account of Revenue from April 1st, 1900, when there was a balance of £3,517,047, to June 30th, 1900, were £24,690,634, against £25,893,778 in the corresponding period of the preceding financial year, which began with a balance of £8,919,173. The net expenditure was £42,308,282, against £26,099,477 to the same date in the previous year. The Treasury balances on June 30th, 1900, amounted to £1,404,399, and at the same date in 1899 to £5,638,474.

The International Congress on Agriculture gave a grand closing banquet on Saturday evening, all the foreign delegates being present. M. Méline, after thanking the foreign delegates for their assistance, expressed the hope that the Exhibition would bring about the general disarmament of passions which was desired by all peoples. M. Jean Dupuy, Minister of Agriculture, proposed the health of the foreign delegates, and of the heads of the States represented by them, and expressed the hope that foreign agriculturists would follow the example set by the agriculturists of "*la belle* France." The meeting broke up amid cheers for agriculture and the country's guests.

A Reuter's telegram from Budapest says:—"A firm of millers here have entered into a contract with the British Government to supply a large quantity of flour for South Africa. The first consignment of 3,500 tons is at present being shipped at Fiume."

AGRICULTURAL POLITICS.

By a Lobbyist.

Now, the methods to be pursued by the Liberals are sufficiently indicated by the tactics adopted in the Lords towards the Agricultural Labourers' Compensation Bill. "I do not understand," said Lord Kimberley, "why the Government left the agricultural labourer out of the Act of 1897." That is the line that will be followed towards the measure. It will be declared in a word that the omission of the labourers from the measure of 1897 was an act of treachery, and that the inclusion by a special enactment now is only an act of fair and [illegible] reparation.

Hence it will be asserted that the labourers owe the present Ministers no gratitude, and that this last is a method of [illegible] which I am never prepared to follow—it would be better to vote for the Liberals. This frank assurance is the meaning of Lord Kimberley's speech last week, and it will be the assurance pressed [illegible] the labourers in the counties. Of course, from the electoral point of view it will be [illegible]; but when are ever electoral methods honest?

But beyond this the Liberals will [illegible] that the Bill is designed in the interests of the masters rather than of the labourers. "The legislation," says the *Daily News*, "is likely to do much benefit [illegible] it, but the prospects of the labourers are less rosy." The original Bill is declared to be hopeless, and [illegible] to be repealed; and the inclusion of agricultural labourers will [illegible] as a delusion, a snare, and a sham. Of course, there may be men with long memories who will remember that the fact that agricultural labourers

were originally excluded was averred to be a wicked, and even a criminal shame.

But this will suffice nothing with these critics. They will go on replying, heeding not the retaliation that was possible for a particle of good to the agricultural labourer to ooze through, and that it was thus they advocated the extension of the Act to them. That particle of good will, however, prove so expensive, and the oozing process will be so slow and dilatory, that it would be better that the agricultural labourers were really outside the Bill. This is not cynicism, but the actual argument that has been employed in the House of Lords this week. It is the argument which will also be employed in the rural constituences.

I have already been proved to be right in reference to the Irish Tithe Bill. Its introduction was a mistake. It will simply mean the fashioning of a new rod for the Tory back. Already it is being declared to be nothing less than an attempt to relieve Irish landlords, who are also taxpayers, from their legal obligations. This, as applied to Ireland, would not be of much importance, were it not declared to be a sample of the method pursued in recent years in dealing with England and English landlords.

The method of diminishing the Irish Church Fund for the benefit of the Irish landlords is declared to have its reflection in the manner in which the towns are under the Rating Act pillaged —this is the word used for the benefit of the English landlords under the Rating Act. The manner in which, in the Irish case, the fund, which is the property of the Irish nation, is being robbed for the benefit of only one class, is held to be a simple following of actual precedent. Men who are held not to be public benefactors are being released from their legal liabilities, at the public expense, and this is averred to be in harmony with the English example.

This is the line of argument which has been pursued in the House of Commons this week, and it is the line of argument which will be pursued in the country when the national mind is not fascinated by the glamour of war and patriotism. It is held that Lord Salisbury has redeemed his promise of compensating the Irish landlords for the reduction in their rents—notwithstanding that Sir Edward Fry's Commission brought out the fact that those rents have not been reduced further by the Irish Land Courts than English rents have been reduced by natural causes—out of public funds.

It is this contention, a most ill-omened one, which gives the real force to Sir William Harcourt's blows and philippics. It is this contention which gives force to the Radical assertion that the chief purpose of the Government is to, in the intervals of war, make raids upon the public purse in the interests of the privileged classes. Just as the Tithe Rent Charge Act of England is held to have relieved the ecclesiastical tithe-owners of half their rates at the public expense, so, it is said, a raid is being made upon the secular tithe fund of Ireland in the interest of a class who neither deserve nor need this relief.

Of course, it is easy in a dining-room debate to refute this assertion; but it will be another matter when it is given with all the rotund and rhetorical force of an oratorical occasion—when the utterer of it gives to it passion and nerve. I anticipate that it will have a great effect on the towns; and hence it is that I perceive that Mr. Herbert Gladstone is wise in sedulously storing, as he is storing, all the florid tit-bits uttered in the debate of this week. When the war-drum throbs no longer, these tit-bits will be of value.

The latest reading of the electoral barometer: The election will take place in March. The hospital scandals have sufficed to postpone it four months.

Rat Plague.—Alarm prevails at Bocking, Essex, owing to the presence of a large number of rats in the streets and houses. At the residence of a baker named L. was two girls of eight and six years, whilst lying in bed, were attacked and badly bitten about the face, arms, and legs by a number of rats, and for some time one child remained insensible owing to the shock. Both children are still under medical treatment. Meanwhile great difficulty is experienced in ridding the town of the vermin.

LETTER TO THE EDITOR.

How to Save the Cereal Industries

Sir,—Referring to the discussion initiated by Mr. Read, with regard to the imposition of a duty upon foreign wheat, and the encouragement of home-grown wheat by means of a bounty, there is no doubt but that it is a bold suggestion to save agriculture and milling to the home farmers and millers, no less than a means of warding off a national disaster, in the event of our transport being attacked in war.

I observe that Edward J. Edwards replies to the effect that a bounty or an import duty will not benefit farmers nor millers generally, but will chiefly go towards swelling the rents of landlords.

When the Corn Laws were abolished in 1846, that was the great argument that was used, and theorists have subsequently been of opinion that the contention was correct.

On the other hand, it might be suggested that if private property in land were abolished, that the arguments against an import duty would no longer be of avail, and this is true to a certain extent.

Of course, to schemes of confiscation, such as Henry George proposed, no honest man wishes to lend a hand. The national calamity entailed by such a procedure would be greater than the benefits obtained.

The moral and political bases for making an innovation in the institutions of the country are stated by Sidgwick in the following propositions:—

No institution is to be deemed irremovable because it has existed for a long time, nor is it to be considered an institution that should be abolished merely because it was founded by some unjust proceedings. There is such a thing as conservative justice, as well as distributive justice.

If, however, the land can be transferred to the ownership of the State, without confiscation, the increased rental that would accrue from a bounty could be used in mitigation of taxation, and so the same objections to a bounty would not apply.

It is possible to give full compensation to the landlords, and yet make the transaction a paying one.

The present price of land is twenty years' purchase, so that a farm yielding £5 a year rental would be worth £100. The Government can borrow at 2¾ per cent. (Glasgow can borrow at 2½ per cent.), so that there would be a saving of 2¼ per cent. upon every £100 borrowed.

The central organisation of land management under the Board of Agriculture would ensure the adoption of the best methods of cultivation. In this way, a farm that is now yielding £5 would soon be made to yield £6 and £7.

There is a great waste in the management of land at present. Estate agents, who are often solicitors, require 100 times more in fees than would be required at a central bureau.

These economies would enable the Government to repay the money borrowed within twelve years. The agricultural rental of the country is £67,000,000; the capital required to buy that annuity is £1,340,000,000.

It would not be necessary to raise all this at once nor to raise the whole of it. Indeed, it would be unnecessary to raise any at all.

All that is necessary is to authorise the Government to purchase land as they deem expedient, but not to make it obligatory upon them to buy. I would not make it obligatory upon landowners to sell; indeed, it is not necessary that all the land should be bought.

There are landowners to be found at the present day who would gladly hand over a £5 rent to the Government in exchange for 2¾ Consols, and by the time the Government had got into working order it would have saved sufficient to purchase the equity of redemption of bankrupt noblemen's estates from the trustees. The Agricultural Bureau would be able to pay off the capital borrowed out of their savings, and the whole rental would thereafter be a nest egg accumulating like compound interest.

Of course, if speed were desired a vote for a million on account would materially expedite matters.

In any event the £67,000,000 would be such a contribution to the treasury that farmers and millers would soon benefit thereby in the abolition of the Income Tax and the reduction of all taxes and rates. Some urban owners would also wish to realise.

In this way agriculture would be saved indirectly without the necessity of imposing any tax or granting any bounty.

Certainly prices would tend to rise through the greater purchasing power of the people, but that would not affect bread prices, and it would only be temporary at the most. On the other hand, prices would tend to fall because of the increased output through improved agriculture, and farmers and millers would be better able to stand competition if they had no taxes to pay.

It is proposed that the Royal Agricultural Society and the National Association of Millers should send deputies to the Bakers' Exhibition on Tuesday, September 11th, at 3 o'clock, for the purpose of devising schemes to repel the common enemy. Mr. Dale, the managing director of the exhibition, has kindly consented to provide the necessary accommodation.

It is to be hoped that you will continue to allow your columns to be used to thresh out this subject, and that all your contributors will attend the proposed convention.

The above matter has been taken up by the agricultural and milling papers, and is now being discussed to-day and to-morrow by the millers at their convention at Scarborough.—Yours faithfully,

LORIMER MORTIMER.

Lincoln's Inn, July 4th.

PRACTICE WITH SCIENCE.

How Agriculture may be Helped.

Engineering has a very interesting article on the work done by the French State Agricultural Department, which carries out valuable experiments and tests for the advantage of the farmer, in order to assist him in the solution of the problems—how to increase crops and how to reduce the cost of labour. The former result is attained by means of improved seed, chemical fertilisers, and good methods of agriculture; a reduction in cost of labour can only be obtained by the employment of machinery. For half a century there has been a steady progress in the improvement of agricultural implements and processes, under the influence of many economical conditions, such as alterations in the system of renting land, increase in wages, and reduction in home prices, owing to competition from abroad.

In order that the intelligent agriculturist might have facilities for obtaining reliable information on the value of the fertilisers, seed, or food products, laboratories and agronomic stations have been established in France; there did not, however, until recently, exist any place for testing the machinery which he required to use in his calling. So far as this was concerned he had to trust to his own judgment, or to be guided by the catalogues of manufacturers and the list of prize-winners at various agricultural shows. *Engineering* hints that prospectuses are often misleading, and that the hasty tests of implements at competitive meetings do not afford sound information as to the practical value of the implements dealt with.

Some time since the French Agricultural Department, acting on a report of Mr. Ringelmann, a well-known agricultural engineer, created in Paris a testing station for agricultural machinery. The efficient testing of agricultural machinery is very difficult and somewhat tedious; according to the method applied by Mr. Ringelmann, the experiments ought to be conducted in such a way that the results obtained should give definite records of the value of the machine tested. To arrive at this, continues *Engineering*, many elements are required, the principal of which are as follows: The quantity and quality of the actual work done under varied conditions. The amount of mechanical energy required for a certain duty of the machine. The probable life of the machine tested; this conclusion being based on an examination of the design, the workmanship, and the character of the materials employed. The knowledge of these three principal data allow a close estimation to be made of the cost price of the work done and the value of the machine.

The programme has led to a large amount of scientific and practical research, carried on by means of the testing instruments with which the laboratories are equipped. Experiments made have to be carried on over a relatively extended time, and according to all the different working conditions. Under each of the conditions the tests are frequently repeated, in order to ascertain definitely if the results obtained are reliable. In all these experiments it is necessary that the machines fitted up with the testing apparatus should work under a regular *régime*, and in normal conditions of practice. The testing station, which is placed under Mr. Ringelmann's direction, is established at Paris, and occupies about 43,000 square feet of ground.

Nitrate of Soda Report.

In their half-yearly nitrate of soda report, issued on June 30th, Messrs. W. Montgomery and Co., of 63, Mark Lane, E.C., state that the nitrate season now closed has been dependent, more than is usually the case, upon the price current and upon the state of the weather—the one constantly reacting upon the other. The market opened in January with the spot value for cargoes at about 7s. 9d. per cwt., and with no apparent excess of supply prices maintained a hardening tendency during January and February, resulting in a net advance to 8s. 10½d. per cwt. Floating supplies being well held, prices throughout March fluctuated between 8s. 9d. and 9s. In April, however, they graduated downward from 9s. to 8s. 1½d., whilst cargoes in May changed hands at from 7s. 9d. to 8s. 3d. per cwt. These serious fluctuations were chiefly caused by the irregularity and unseasonableness of the weather, a comparatively mild winter being followed by a cold, dry, and late spring, which circumstances were not conducive to an increased application of nitrate of soda for the nitrogen feeding crops. The lower prices reached in April and May were speedily amended by the increasing demand which showed itself in the months of May and June, and which has this year been upon a record scale.

After all the doubts and uncertainties of the season the actual consumption in Europe for the six months

now closed amounts to 343,000 tons, which is almost precisely the same quantity as that of last year, and this without taking into account the fact that the interior stock on the Continent in the hands of dealers at the beginning of the season, was at least 20,000 tons more than was the case twelve months previously. The visible supply to-day amounts to 298,000 tons, as compared with 326,000 tons last year.

The market closes firm at 7s. 11d. to 8s. per cwt. for due cargoes, with summer and autumn shipments at 8s. 1d. to 8s. 3d. per cwt.

The consumption in the United States has continued good, and amounts to 75,000 tons for the half-year, as against 65,000 tons in the same period of 1899. Production in Chili shows the small increase of 30,000 tons since 1st January, but the equilibrium between production and the consumption of the world is fairly maintained.

Producers have this year been somewhat loud and constant in their complaints of bad times, and state, we fear with a great deal of truth, that the cost of production has, owing to dearer fuel, costlier labour, a rising exchange, and seriously enhanced freights, left them in a position much worse financially than they were enjoying twelve months ago, at which time many of them alleged they could barely exist. This state of things has led to renewed searching for a remedy. That which comes most readily to hand is our old friend "combination," by the adoption of which it is hoped to so curtail the shipments that a drastic effect upon the prices in Europe will speedily result.

Poor prices, with attendant small profits, usually tend to rectification of the statistical position of great articles of produce, and this rectification has not been wanting in the case of nitrate, and would certainly have its effect in matters of price also, provided producers exercised a little more patience, but the spirit of the age is to produce rapid changes, and the determination has been evinced by many of the producers to perforce effect this change. Disaster to "combination" proposals has usually come from within, and once more a centralisation scheme for the sale of the entire manufacture through one channel has been proposed, which, if persisted in, will of itself prevent the alliance being carried out.

The public have been informed, in one of the nitrate presidential speeches, that such a scheme would lend itself to cheaper chartering, insuring, etc., but producers may as well remember that they form only one unit in the work of laying down nitrate in the consuming centres of the world, and that, if need be, other interests could, and probably would, be able to effectively make themselves felt, so as to shake off the exercise of any undue control.

Apart from the proposed combination, the outlook for consumption is undoubtedly good, both for agricultural and industrial purposes, the tendency being towards an increase from all countries. In our issue of 30th June, 1899, we estimated the consumption of the world for the succeeding twelve months at not less than 1,300,000 tons; it has actually amounted to 1,350,000 tons. For the year ending 30th June, 1901, we reckon upon a total requirement in the world of not less than 1,400,000 tons, and this figure might, if prices continued moderate, be considerably increased. To-day the visible quantity available for consumption in Europe and America from now until October amounts to 350,000 tons, thus leaving 1,050,000 tons to be brought to consuming markets between October and June next. What would the producers say to a combination on the part of shipowners to put the freight rates up on such figures as these?

Trade in Fertilisers During the Past Six Months.

Mr. Thomson Aikman, jun., 6, East India Avenue, Leadenhall Street, E.C., issued his half-yearly report on Saturday. He states that there is little calling for special note in the situation of the chemical industry. Agricultural prospects throughout the spring have been unsatisfactory, as a late season with delayed farm work, retarded vegetation, and depressed values of agricultural produce combined to dishearten agriculturists. More satisfactory weather and an important advance in the value of cereals in the closing weeks impart a more cheerful outlook. The sugar beetroot crop on the Continent has been sown at an unusually late period this season, but with a larger area devoted to it, and with recently more satisfactory weather, prospects of a liberal crop have kept prices at about 9s. 6d. to 9s. 9d. per cwt. for new crop, whereas old crop is worth over 11s. per cwt. Last year at date 10s. 6d. to 10s. 9d. per cwt. was value. The reports of the cereal crop prospects in the United States, Canada, and other countries are less satisfactory than last year, in some quarters very serious shortcomes being anticipated.

The fertiliser trade in Europe has been generally unsatisfactory, and considerable stocks of raw and manufactured material remain in manufacturers' and dealers' hands, while prices generally have declined. Nitrate of soda shows in some quarters a slight falling off in the extent of deliveries during the half year, which was chiefly noticeable in the middle of the spring months, when bad weather delayed sowing and speculative influences centralised holdings, and forced up prices to the detriment of consumption. Its later application to the crops, with the recent fall in price, has, however, brought up the arrears. In the United States and other countries a steady increase in its use is recorded. Production has again been but slightly in excess of consumption owing to the check of prices and labour difficulties. Should the efforts again being made among producers to mutually insure such a check, irrespective of price and other temporary vicissitudes, be successful, much more satisfactory results to them might be assured. Any unnecessary obstruction of such efforts by fiduciary representatives of the large capital involved is to be deplored.

Sulphate of ammonia shows a falling off in consumption in many quarters, but the increasing demand from sugar colonies, Spain, and outside consuming centres, has absorbed production and maintained price generally at and slightly over its parity with nitrate. Production shows but a normal rate of increase. Other sources of nitrogen have been influenced in sympathy. Peruvian guano imports have been small in the spring months owing to delay in the loading of ships, which, coupled with the onerous conditions of its sale, have interfered with its consumption. Phosphates show a relapse in value from the high prices at the close of last year. Potash salts remain at their former level. Freights generally have been at a higher level than for several years past.

Nitrate of Soda.

The half-year's deliveries of nitrate of soda from direct imports into consuming countries throughout the world, reach about 92,000 tons from United Kingdom ports, about 747,000 tons from Continental ports, about 85,000 tons from United States ports, and about 13,000 tons from direct imports into other consuming countries, or a total of about 940,000 tons against about 915,000 tons same six months last year. Stocks at date are estimated at 23,000 tons in United Kingdom, about 77,000 tons in Continental, and about 10,000 tons in United States, etc., with a quantity afloat for Europe about 200,000 tons, and for United States, etc., about 45,000 tons, or a total visible supply of about 355,000 tons, against a total of about 370,000 tons at date last year, and 255,000 in 1898. From July to December last year, deliveries from European ports reached about 315,000 tons, and from the ports of United States and other countries about 90,000 tons.

The total exports from all the nitrate ports for the six months reach about 430,000 tons to Europe, and 100,000 tons to United States, etc., against 490,000 and 65,000 last year, and 365,000 and 75,000 tons in 1898 during the same period. The production during the six months is approximately 680,000 tons, against 650,000 last year and 610,000 tons in 1898. Stocks in Chili are estimated to be about 50,000 tons in excess of those at date last year.

The opening price in January was about 7s. 9d., and to-day's spot price is about 8s. per cwt. Early in January powerful speculative buying of the bulk of the available floating supply forced prices up to close on 9s. in February, and, after the absorption of the previous purchases of dealers and consumers their abstinence from purchasing, and backward weather caused a serious diminution in delivery in the principal spring months. Firm holding, however, maintained price at between 8s. 6d. and 8s. 9d. till end of April, when a rapid break took place, and at between 7s. 7½d. and 8s. per cwt., the arrears of February, March, and April have been nearly made up in May and June. Forward shipment cargoes of ordinary quality have ruled at from 7s. 6d. to 8s. 3d. per cwt., the market being firm at the close. Refined quality has commanded 1½d. to 6d. per cwt. above ordinary.

Freights throughout have been firm, as high as 37s. 6d. having been paid in May, the close being 35s. per ton. Cost of nitrate has ruled from 4s. 10d. to 5s. 4d. per quintal, as compared with 4s. 6½d. to 5s. 2d. last year, 4s. 6d. to 5s. in 1898, and 6s. to 5s. 2d. in 1897 during first six months. Exchange has ruled between 16d. and 17½d., the close being 17¼d., against a range of 11½d. to 16d., with a closing rate of 15d. at date last year. The export duty remains at 2s. 4d. per quintal, and a reduction of 1d. to 1½d. on railway freight has been in operation since January. The higher exchange, higher labour, and high cost of coal represent in most cases an increased cost, considerably in excess of the reduced railway freight, and the results to producers are still generally unsatisfactory. For the past few weeks efforts, said to be supported by the Chilian Government, to effect a combination of producers for regulating production, have been actively pursued, but their measure of success is yet uncertain, owing to individual jealousies and interests still outweighing the interests involved.

Sulphate of Ammonia.

The opening price was £11 5s. per ton, and the close is about £10 15s. A difference of £2 to £3 per ton, or about their relative values in proportion to the nitrogen contents, has generally been maintained between sulphate and nitrate of soda during the consuming season, but speculative influences have occasionally changed this position. The market has shown little animation, but stocks have never accumulated to any extent, the falling off in the consumption in nearer European markets being counterbalanced by increased demands for the more distant centres. At date last year the nominal price was £12 5s. to £12 10s. per ton, but the average spring price was about £10 15s., as compared with £9 per ton for nitrate of soda, while this spring the relative average prices were about £11 5s. and £8 10s. per ton, the higher unitary price being in both seasons, if anything, largely on the side of nitrate. Production shows a comparatively moderate increase.

Guano.

Delay in loading at the Peruvian Deposits has interfered with expected outputs, the total imports being about 23,000 tons to U.K. and 17,000 to Continent. A few cargoes of other description have been imported, but consumption has been small; the imports of guano of all kinds, according to Board of Trade returns, for the five months ending the May being about 17,000 tons, with an average value slightly over £5 10s. per ton.

Bones and Bone Ash.

Imports have been on a reduced scale, the Board of Trade Returns for the first five months showing of bones and bone material, about 29,000 tons against 33,000 tons for the same period last year. Values have slightly receded since the beginning of the year.

Mineral Phosphate.

The falling off in the consumption of superphosphates and other manufactured materials, estimated in some quarters at nearly a fifth on that of last year, has affected values of raw material, which marks a reduction of 1d. to 1½d. per unit in some classes, and consumers generally carry considerable stocks. In the United States the consumption is reported to have been exceptionally large this season. With regard to potash, the different salts maintain late values.

THE DAIRY.

Nantwich Cheese Fair.

Compared with last month's fair, a better tone prevailed at Nantwich on Thursday. The pitch was fifty tons, the bulk of which was in healthy condition. There was a good demand for finest lots, and a much sharper market for medium qualities than at last fair. The best lots made from 48s. to 55s. per cwt., and medium down to 40s. Last year's quotations were 34s. to 50s.

Lancaster July Cheese Fair.

This fair took place on Wednesday, in the covered market, Lancaster, and was well attended. For the first time for some months the pitch showed a decided increase, there being 56 dairies and 908 cheeses, as compared with 43 dairies and 685 cheeses at the corresponding fair last year. The quality, however, showed a general decline, and prices consequently had a downward tendency, although buyers were willing to pay top figures for really good cheese. The top price was 56s., and prices ranged anywhere between that figure and 45s. There was a quick market.

Agricultural Imports.

The following is an account showing the quantities of certain kinds of agricultural produce imported into the United Kingdom in the week ended June 30, 1900, together with the quantities imported in the corresponding week of the previous year :—

BARLEY AND MALT.

By Hordeum.

Barley Show Regulations.

The preliminary schedules of the next Malting and Seed Barley Competition at the twenty-second Annual Brewers' Exhibition have been issued, and some of the alterations to old regulations, together with innovations in the rules and additional or new classes, have been the subject already of considerable discussion and some criticism.

One new class has given very general satisfaction. This is, strangely enough, connected with our premier barley county, Norfolk, and is associated with the greatly honoured and esteemed name of Mr. Clare Sewell Read, who for so many years has acted as one of the judges. The first prize of ten guineas is generously offered by Messrs. F. and G. Smith, Limited, and in this class (Class X.) the second prize is five guineas, whilst the third is a bronze medal, so Norfolk growers can send up their best samples with the certainty that a number of handsome prizes are bound to go to the county in any case.

Very Good Prizes

of considerable value may go to any county which, like Norfolk, has had few special county prizes offered. It must be borne in mind that all East Anglia can benefit from the generous offers of The Colchester Brewery Co., Fison and Co., Limited, Mr. Mumford (R. Boby and Co., Limited), and others too numerous to specify. Still, it is better for each county to have its own distinct prizes, and everyone interested must fervently hope that the weather for the next few weeks may prove of the kind that will favourably suit our Eastern Counties. It is a long while now since this side of the island has received much benefit, and it is still time for good results to be wished for, and hoped, even if not expected. Still, it takes a lot of misfortune to stamp out hope and good principles from sturdy East Anglians.

One of the distinct improvements in this year's schedule is the determination with clearness of the

Recipient of Every Prize

Many of the prizes go to growers only, whilst the remainder can go to any person making entry, provided he is the *bonâ fide* owner of the grain at the time of making entry.

Naturally, the grower ought to make entry in all cases, and many of the best prizes, such as the splendid champion cups of the MARK LANE EXPRESS, the challenge cup offered by Ind, Coope and Co., Ltd., and a number of the rich prizes (each of £25) by the Permanent Nitrate Committee, the Sulphate of Ammonia Committee, Joseph Fison and Co., Ltd., can go only to growers. Still, it is almost astonishing to note the rich amount that any merchant or factor can score if only he makes entry of a tip-top sample.

In any case, it is now difficult to see how any misconception can hereafter arise as to the right person to receive any and every prize after the awards are once made and confirmed.

A Gigantic Puzzle

for the judges is most certainly in store when the awards are made in the last new class (No. xxvii.). This is most curiously worded, for it stands on offer "to the maker of the best threshing machine," sundry medals of silver and bronze, etc., "offered for the machine which has been used for threshing the largest percentage of barleys which secure awards in every class." It seems self-evident that this rule cannot be absolute, as the makers of one machine only stand a chance of getting the highest percentage of awards. Fortunately, any difficulty experienced can be smoothed away by common-sense application of Rule 14, which gives power to the judges to modify and alter any of the conditions at their own sweet will. It will be very surprising if they find their present ingenious but most cumbersome or difficult plan workable. It is safe to foretell that it most certainly will not if taken literally as it stands.

A Very Questionable Change

is made in the quantity of barley which has to be submitted for approval if demanded by the judges in the colonial and foreign classes. It has been the custom hitherto to make this amount exceed the quantity demanded from British growers. For some reason which very few people know anything about (although some ignorant cacklers have been very industrious in circulating fallacies concerning it), the foreign classes last year had to be prepared to show on demand a hundred quarters.

This year all classes are reduced to the simple and uniform basis of twenty quarters. As a question of absolute fairness this is strictly correct, and it is very commendable on the part of the judges that they have had the courage to take the step. No doubt some of the chronic grumblers will make it the occasion for venting a little spleen, but, after all, it won't hurt anyone very much. Very few men will handpick twenty quarters of barley, and should they do so, and the worst comes to the worst, no great harm will be done, for there is nothing in the conditions to specify the character of the screen used, moral or otherwise.

MILLING.

The Treatment of Break Stock Previous to Purification.

The market is not nearly so firm as when these notes last appeared. Both wheat and flour have been reduced in price, while the demand for the manufactured product in most parts is very limited, bakers having so recently stocked themselves. The supply of English wheat has only been small, but what has been on offer has generally made good prices. A steady demand for offals still exists in many centres at prices which must be regarded as very good for this time of the year.

What scalpers to use.

In building a new mill, as well as in overhauling one which has become out of date, an important question which arises is as to the kind of scalpers which should be employed to make a separation of the break products. With the introduction of the new system, millers had only the choice between reels and centrifugals, but now a great number of machines are upon the market for the purpose indicated. Under the millstone system the product from several pairs of stones was usually sent to a long reel, through the cover of which the flour dressed, while the overtail was regarded as offal. Even when higher grinding came into vogue and some efforts were made to make a further separation of millstone stock, the reel, usually round, and

The Reel only, was the Machine upon which the Miller relied.

But with gradual progress and the inception of gradual reduction came also gradual dissatisfaction with the reel. It took up too much room, and it was too slow. Hence the advent of the centrifugal, which many millers of the old school maintained was too violent upon the stock. For this reason it made little headway for a time, and, in fact, the battle between reels and centrifugals was a long-drawn-out one.

Sixteen to eighteen years ago the dispute was as keen between the advocates of these two machines for scalping as it is between the advocates of the centrifugal and the sieve to-day. If in the old days there were no centrifugal mills as opposed to plansifter mills the same nice points were observed between the reel and the centrifugal for making the necessary separations. Each had its patrons, and the intelligence was by no means all on one side. Able millers championed both sides for a time, but the centrifugal ultimately won the battle, only, however, to be replaced in turn (for the purpose of making the separations on all the breaks except the last) by the sieve. It is true the centrifugal still holds the sway in regard to the products from the last pair of corrugated rolls, because no other machine has yet been found to deal with them so well, and if it is violent it must also be remembered that at this point in the milling process there is

Practically no Stock of Good Quality to Spoil.

As already stated, the miller of to-day has the choice of a great many types of machines from which to select when choosing his scalpers, though practically they can all be broadly classed under the head of centrifugals and sieves, for they are very un-up-to-date mills in which the reel is still used for scalping, although a sort of hybrid machine between the latter and the centrifugal, the inter-elevator reel, can be most beneficially used on some products. This machine is fitted with lifters, by the aid of which the stock fed into it is distributed over a much larger area than was possible with the reel, with the result that its capacity is double that of the latter. In the opinion of the writer the inter-elevator reel is at its best when grading the separated chop, as there seems to be just enough friction to remove half loosened particles of flour without unnecessary scouring. There is a kind of stock which will be found grouped in every mill for which the gentle action of the sieve is not violent enough, and it is just at this point where a little force is necessary that the inter-elevator is of use. For this purpose the slow-running reel would be useless, while the centrifugal—or at least those machines of the usual make—is too rough. Here, then, steps in the inter-elevator reel, and combines the merits of both.

For the reasons already stated, the sieving machine

Supplanted both the Reel and the Centrifugal,

and now, for the purpose of scalping all the breaks but the last, it is used in various forms. Some machines of the kind have only one sieve, and in this case, while the overtails go to the next pair of break rolls, the throughs contain all kinds of stock between twelve and 120 meshes to the inch, which will need dusting and grading on a subsequent machine or machines. Other sieves make more separations, until the climax is reached in the case of the plansifter, which usually divides the break chop into semolina, middlings, dust, break-flour, and overtails, thus rendering the use of any following machine unnecessary.

This seems to speak volumes in favour of the plansifter, but "things are not always what they seem." If much can be said for this Continental machine, it has its drawbacks, not the least of which is the vibration caused by its movement and the non-possibility of examining its sieves without stopping the mill, or, at least, disconnecting the machine. Ordinary rotaries, with two sieves, do not possess these drawbacks, while one of them in particular, which is made by a leading firm of milling engineers, and which is called the "Vibromotor," is, owing to its mechanical arrangements, singularly free from vibration, while its action is simple and without the complication of the plansifter. In other words, for the purpose of scalping, the rotary sieve is set only a certain amount of work to do,

And that work it do s well.

If, by way of example, a double rotary sieve, covered with eighteen and thirty-four wire, be taken, it is evident that the tail-over of thirty-four consists of middlings for purification, while the throughs of that number should go to the machine best fitted to deal with them, the inter-elevator reel, which has already been mentioned. At this point it may be said that the rotary sieve, excellent machine as it is for the purpose of scalping, seems destined once more to have to fight its erstwhile vanquished foe, the centrifugal. But the latter in its new forms will be again referred to.

The clothing of scalpers, too, is a part of practical milling which is often not sufficiently studied, but the subject is a wide one and will be continued in another article. It must not be thought from these remarks that the writer lays more stress upon scalping than upon grinding. On the contrary, he is one of those who is very particular about the latter, fully believing that as he grinds the raw material and its products so will he scalp and bolt. Of all the departments in milling none has so much depending upon it as the grinding department. A miller may have the cleanest wheat possible, but if it is not properly reduced good results cannot follow. This article, however, which will be continued, deals more exclusively with the separation of the stock coming from the breaks.

MILLER-FARMER.

Motor Haulage for Millers.

At the Conference of the National Association of British and Irish Millers, at Scarborough, on Thursday, Mr. E. C. Skurray, of Swindon, read an interesting paper on "Motor Haulage for Millers." He argued that motor haulage must be adopted by millers who wish to keep to the front in the fight against imported flour and that sent by rail from distant mills. Comparing the cost of motor haulage with railway charges within a radius of twenty or twenty-five miles of a mill, Mr. Skurray presented figures showing a saving by the use of motors of nearly 20s. on a day's work.

The president (Mr. Sidney Leetham, of York) announced that the following gentlemen had been elected on the Council for the next three years:—Messrs. Joseph Wragge, Hull; E. Leetham, York; J. B. Whitworth, Wellingborough; H. Ibbotson, Sheffield; W. F. Vernon, Liverpool; and S. Humphries, Bristol.

New Agricultural Patents.

Specially compiled for the MARK LANE EXPRESS by Mr. G. D. Howard (Hughes, Son, and Co.), Patent Agent, 38, Chancery Lane, London, W.C., of whom all information relating to Patents, Designs, and Trade Marks may be obtained free of charge.

11050.—A. Priess, of High Holborn, London, for an invention for "Improved machine for spreading dung."

11154.—J. Grace, of Rainford, near St. Helens, for an invention for "New and improved screens for attachment to potato diggers to prevent potatoes being buried or covered with soil."

11198.—W. Hornsby and J. Lowson, both of South Street, Finsbury, London, for an invention for "Improvements in or connected with ploughshares."

Patents Sealed.

4714.—A. Wenck, of Magdeburg, Germany, for an invention for "Maures."

4735.—R. H. Fowler and T. Benstead, of Steam Plough Works, Leeds, Yorkshire, for an invention for "Improvements relating to agricultural ploughs.

4921.—L. P. Rasmussen, of Edgebjerg, Denmark, for an invention for "Crops, cut, stacking."

Sheep Worried by Dogs.—At Otley County Court on Wednesday, before Judge Bompas, Charles Holmes, farmer, Menston, sued Thomas Buck, gentleman, Menston, for £30 as damages for loss sustained through defendant's dogs chasing plaintiff's sheep. The plaintiff stated that he had thirty Wensleydale purebred ewes in lamb last spring. Twelve of the lambs died or were born dead. One of the ewes also died, and the other ewes were deteriorated in value. The damage was caused by the ewes being chased almost daily by the defendant's dogs. He had often complained to the defendant, but he only replied "Oh, the dogs won't hurt your sheep." His Honour found for the plaintiff, and gave judgment for the amount claimed and costs.

Home Notes.

Trade in the Borough

during the last week has held on the "even tenor of its way," as the activity which was anticipated by the revival of inquiry a few days ago is not yet apparent. A few transactions have been concluded, in which buyers have found holders willing to meet their views, and so long as such weak-kneed waverers have hops to sell the stronger men will find difficulty in realising their legitimate demands. One pliant seller does more to damage the tone of the market than can be counteracted by a dozen determined holders. It is strange that growers do not appreciate the power they place in the hands of merchants by the absence of co-operation and agreement as to the value of their produce, especially when the circumstances which at present surround them are so favourable to united action, and so suggestive of its desirability. It is, however, satisfactory to know that values have not receded, but that they remain firm at the level of the previous week, with some slight indication of a tendency towards higher prices being realisable.

Plantation Reports

have not changed for the better. The extraordinary climatic experience of the past week cannot be favourable to the progress of the growth. Heavy rain, bright sunshine, downfalls of hail, and thunderstorms, are but a few of the alternations through which we have passed, and as for the winds, they have blown from almost every point of the compass in succession, culminating in strong, cold northerly breezes, which have been chilling us lately, causing us to turn to the almanack to ascertain if we are really passing through one of the summer months. The weather is favourable to the development of fly and mould, and from most districts I hear that these troubles are creating increased anxiety, being apparently too persistent to be cleared off by the means that are usually effective. It goes without saying that the passage of every week intensifies the risks of the growing crop, and that dangers which might have been regarded with equanimity a month ago now assume a very different aspect. I append a few of the reports I have received from growers, whose remarks I have condensed on account of space: –

PADDOCK WOOD.—After an absence of a few days, during which washing has been persevered in, I found my garden looking worse than when I left home, the fly attack being so persistent, and the spread of mould now getting serious.

HORSMONDEN.—Hop plantations barely hold their own, except where repeatedly washed. There is more bine, but also more vermin.

SUTTON VALENCE.—Hops are full of fly and vermin, stopping the growth where not washed. Wet weather hinders washing.

MAIDSTONE.—Weather is against progress of growth, and washing has been so much hindered by rain that the fly attack has increased. There is evidence of mould. Warmer and dryer weather is urgently needed.

CANTERBURY.—Bine in well-cultivated gardens is growing well, and strong laterals are being thrown out. Vermin is much reduced, but we want warmer and more seasonable weather. There is too much irregularity in the growth.

SALEHURST.—Our perseverance in washing is but poorly rewarded, as lice appear again as quickly as they are destroyed.

HANTS.—The continuance of wet weather is a serious obstacle. We cannot proceed with watering, and all gardens that are left are smothered with fly and lice. Our prospects are far from good.

HEREFORD AND WORCESTER.—The very severe attack of aphis blight continues, despite repeated washings. The cold winds and continuous rains, with occasional hailstorms, are serious hindrances to the progress of the bine, which is generally growing only slowly, being much behind its normal condition at this season.

Foreign Notes.

Nuremberg.

Without any notable change in the position of affairs, the tone of the trade continues to be very firm, although sales are limited in quantity. That the present range of values is greatly advanced from the prices at which the season opened is forcibly illustrated by the quotations for first quality Marktwaare hops, which were obtainable in September last at 60s. to 65s., whereas they can be now sold without difficulty at 85s. to 90s., and when the difference in actual quality is taken into account, it will be seen that the advance is even greater than is expressed by the mere figures. It should also be noted that this increased value has been attained by steady and regular progress, with an entire absence of all excitement or speculative disturbance. We may, therefore, safely conclude that it is due to the enlarged consumption of beer, and remembering the attenuation of present available stock, we may reasonably expect that during the period that remains before the new crop is gathered values will still further improve, and that the opening of the next season will be characterised by higher prices than have been seen for some time past.

Reports from the Plantations

continue to be fairly favourable, though slow growth is still apparent in most districts, and the plants have not yet attained to their normal condition for the season.

HERSBRUCK.—But little progress has been made during the past ten days owing to the wet cold weather.

ALTDORF.—Hailstorms have damaged the plants in some grounds, but generally the progress of the growth is satisfactory.

KINDINGEN.—All the plantations are free from vermin, and most of them present a promising appearance.

HALLERTAU.—The bine is backward as compared with this time last year, but is sound and healthy generally.

WURTEMBERG.—Good progress is evident, and thus far there has been no hindrance by vermin.

BADEN.—Recent heavy rains have checked the growth somewhat, although the plants are strong and vigorous, but they need warmer weather to assist their progress.

PRUSSIA.—Some warm rain is wanted, as the plants have suffered from drought, but in spite of this they are generally looking well, being free from insect pests.

Belgium.

The market has experienced a slight check, having become less animated during the past few days. Quotations have, however, not been reduced at present, although buyers are rather more reticent. Alost hops still stand at 65fr. or thereabouts. There is an increasing willingness on the part of growers to contract for their 1900 growth, in which some important transactions have been concluded at about 80fr. per 50 kilos., but buyers are now withdrawing, and the quotations for future delivery are a little more in their favour.

The Aspect of Belgian Plantations

has not changed much, and is not at all satisfactory. The growth is in arrear, and shows great irregularity. The weather has assisted the progress of the bine, and growers are now anxiously looking for improvement, which is so slow to arrive. Insect pests are prevalent in most grounds, and on the whole the outlook is far from satisfactory, and the conviction is increasing that only a limited crop can result.

America.

Trade in hops in New York is but moderate, and though prices remain very firm there is not much interest shown by consumers, who are buying just sufficient for immediate requirements. Not many contracts have yet been placed for the new growth, as both planters and dealers are waiting for further developments, reports from the country being at present only partial and irregular.

The Organisation of Hop-Growers

in Oregon has been accomplished, with a subscribed capital of 100,000 dollars, and has been followed by a similar movement in the Sacramento Valley, California, where a strong association has been formed on the lines proposed by Mr. Brewer in his circular in the MARK LANE EXPRESS a fortnight ago. With reference to the advantages to be gained in certain industries by combination and co-operation, the *American Agriculturist* writes as follows concerning the hop-growing section of agriculture:—

"A few big concerns, producing large quantities of hops themselves, are in a position to manipulate the market to their own advantage, so as to force outside growers to accept the terms dictated by the syndicate, or force them out of the business. In other words, the little fellows have got to combine to fight the trust that seeks to monopolise them. A single hop-grower is alone unable to accomplish much, but united with his fellows, and controlling, say, two-thirds of the supply, hop-growers will be able to protect themselves against further extortion and gradually to improve their returns and prospects. A federation of State hop-growers' corporations would enable the American producers of this special crop to absolutely control its distribution, and to some extent its price. Of course, the latter, in the long run, will be mainly governed by the world's supply. Nor is there anything fanciful or impractical about this idea. The hop crop is one that lends itself to such a scheme."

From the Plantations

THE EASTERN DISTRICTS.—No doubt there is an increase of fly and lice; fresh fly can be counted four and five on a small leaf, and multiply exceedingly. Some growers having washed once or twice, even three times, left off to try and make hay while the sun shone, but alas! no sun, and the weather most favourable to the increase of vermin; and now growers are washing again the expenses are enormous, and it is a great question whether it will ever pay to spend so much money, but they all live in hopes the prices will go up shortly and keep up for new hops. Hobbies [illegible] it out.

(For Hop Market Reports see page 47.)

All official reports and notices of the National Association of English Hop Growers will be printed in the MARK LANE EXPRESS, *which will also contain all current information likely to be of interest and benefit to the members of the society*

LITERARY NOTICES.

We have received a copy of a little [illegible] entitled "The Art of Cycling," by [illegible] It sets forth the advantages of cycling [illegible] objections to the exercise, how to [illegible] cycling, and [illegible] operation. It is published by M. [illegible] W. H. Park, Hay, London, and M[illegible] Russell and Co., London, price threepence.

The July number of the *Badminton Magazine* opens with a story by Wirt Gerrare, entitled "[illegible] the North West," which describes a trip [illegible] yacht in Russian [illegible] other contributions, namely, "Sport [illegible] the Indian Turf, by George Paul Dr[illegible] Life of a Dog," by K. F. Purdon. For cricketers there are two interesting articles. H. D. Leveson Gower discusses "Fielding," and Hon. C[illegible] some Get-at-able Players," and A[illegible] find "Trouting from a Coracle," by A. G. Bradley, interesting reading. For [illegible] M. [illegible] contributes a chapter on "Fine Weather Golf Passes," whilst golfers are also catered for, being a review of ladies golf (with illustrations) by L. Mackern and E. M. Boys. "Pages from a Country Diary" is continued, and a [illegible] something to say concerning the [illegible] Agricultural Society's show at York. Here [illegible] he chanced to meet an old Scottish friend much devoted to farming, and learning that he was exhibiting a Galloway bull, he accompanied him to view the animal, "which we found in charge of his head cattleman, a grey-headed old gentleman from Ayrshire. Having duly admired the bull I [illegible] attendant if he was enjoying his visit to England. He answered that he liked the show 'weel aneuch, but that he 'could nae thole' (put up with) the sleeping accommodation provided for him, and which, it appeared, he absolutely declined to make use of. 'But you must sleep [illegible] 'where did you sleep last night?' 'Wi' the bull,' rplied the man in a most matter-of-fact tone." This the writer gives as a [illegible] combination of sleeping partners will surprise most people, but this incident is not, we thing, altogether unique.

There [illegible] of which a [illegible] classes of cattle. Prizes: Yearling [illegible] £6 2s. 6d. to £6 16s. 8d.; third class, £4 12s. 6d. to £5 6s. 8d. Two-year-olds, first class, £11 5s.; second class, £7 10s. to £10. Springers, [illegible] £10 to £11; second class, £9 10s. to £10; third class, £9 15s. to £10 7s. 6d.

AGRICULTURAL LAW.

Damages for Miscropping.

In the Court of Session on Friday judgment was pronounced in an action at the instance of Henry Calender, Prestonhaugh, and Westertown, proprietor of the farm of North Elphinston, Tranent, against David Wyatt Ewart Smith, formerly tenant of that farm, and now residing at Cockenzie. The pursuer asked decree for (1) £700, being one year's rent of the farm under the lease which terminated at Martinmas, 1899; (2) £270 in name of additional rent for miscropping part of land in 1899, the last year of the lease; and (3) £442 unpaid interest on improvement expenditure, at the rate of £34 a year, under an agreement dated in December, 1881. The defender consigned the amount of rent, and denied being in breach of the cropping clauses in his lease. He also maintained that the pursuer had waived all claims for payment under the minute of agreement since Martinmas, 1886. The defender said that although the lease provided that in each year not more than one-half of the farm should be in white crop, and that the remainder should be in grass, fallow, or green crop, he had during the last fourteen years used part of the farm for fruit cultivation, with the knowledge and consent of the pursuer, and of the successive farmers on the estate, and that no objection was taken to that cultivation during the whole period. Lord Kyllachy said he was of opinion that there had been miscropping. He was unable to hold that strawberries and raspberries were either grass, fallow, or green crop. Grass, of course, was out of the question. Fallow, although it sometimes meant green crop, here obviously meant bare fallow. And the term green crop had a well understood meaning as used in agriculture. It was in his opinion impossible to hold that it included either raspberries or strawberries. The latter, although not an annual crop like turnips or potatoes, might perhaps, if manured yearly in a special manner, and also cleaned in a special manner, leave the land no worse than if it had been in grass or green crop. But however that might be, fruit was not green crop. It involved a quite different kind of cultivation, which was not in his opinion permitted by the lease. It was said that the landlord permitted fruit culture for a number of years, at least, that he did not object. But the claim was only made for the last year of the lease, and early in that year the landlord did object, having notified the tenant on 28th February, 1899, that the provisions of the lease must be observed, and the fruit ground brought back into the prescribed rotation by the term of Martinmas. In these circumstances he failed to see how the landlord's acquiescence in previous contraventions could avail the defender. There was no agreement to vary the lease, and acquiescence operated only while it continued. The question as to the interest on improvement expenditure was more difficult, and he did not profess to have formed a confident opinion about it; but his view was that here also the landlord's claim must be confined to the last year of the lease. His Lordship found that the defender was due the pursuer £700, being the rent of the farm for the last year of the defender's occupancy, and that the defender was also due the sum of £130 of additional rent for miscropping during the last year of the lease, and that interest at the rate of five per cent. was due on both of these sums since Martinmas, 1899. He also found that the pursuer's claim for improvement expenditure was barred by the series of receipts for rent produced, except for the interest due for the last year of the lease, which interest amounted to £34, and was still due and undischarged. As there had been divided success, no expenses were found due to or by either party.

British Dairy Farmers' Association.

A meeting of the council was held at 12, Hanover Square, London, W., on Wednesday, July 4th. Present: Mr. G. F. Roumieu, J.P. (in the chair), Mr. A. L. Alexander, Mr. Ernest Mathews, Mr. S. P. Page, Mr. H. S. Holmes Pegler, Mr. A. Tisdall, and the secretary (Mr. Wm. C. Young). A report was presented upon the society's financial position, and cheques amounting to £54 17s. were passed for payment. The Show Committee brought up recommendations as to advertising and other matters relating to the forthcoming dairy show, which was adopted, subject to slight modification; and it was decided to allocate the grant of fifty guineas made by the Corporation of the City of London towards the prize fund in ten champion cups, value five guineas each, respectively for best Shorthorn in the milking trials, best Jersey or Guernsey in the milking trials, best cow of other breeds in the milking trials, best exhibit in the cheese test, best prize winner in the champion butter-making contest, best exhibit in the goat classes, best exhibit of bacon, best exhibit of hams, best exhibit in certain classes of poultry, and best exhibit in certain classes of pigeons. Reports were also received from the Selection Committee making further nominations of judges and stewards, and from the Poultry and Pigeon Committee. The next meeting of the council was fixed to be held on Wednesday, September 5th.

FARM PROSPECTS.

Bedfordshire.

I am afraid my report will not be pleasant reading for those good people who (in ignorance, we will charitably assume) look upon farming as a pleasant pastime, and who consider that a lean year only slightly lessens the strange delight which a farmer feels, as he knows that, even when the harvest is good, he grows corn at a loss, still he is unselfishly doing it for the benefit of the community outside of agriculture. The June rains have much improved the starved, miserable-looking crops, but hay, wheat, barley, and especially oats, are

Much Under Average;

in fact, it is only on the good land where a decent crop can be seen. I have none of that, and there is far more bad land than good in this county. The best crop of wheat I have seen is at Bramham, and the best crop of barley at Pavenham.

I dare not say any more, sir, or, possibly our popular local *Times* will be saying, "'T. S.' is giving us his usual and expected grumble." I may be wrong; in fact, there are some people about here who think that whatever "T. S." writes is wrong.

If the coming harvest proves that I am wrong, I will own it, like a man. Cattle and sheep are selling well, also good cart horses. Our

Wool Fair,

last Tuesday, was a very small one. I believe the average price was 18s. 6d. Our two successful local ram breeders—Mr. H. H. Green and Mr. B. Howkins—obtained the highest price (19s. 6d.) for their Hampshire and Oxfordshire Down fleeces. This would be about two shillings per tod more than last year.—T. S. (July 6th).

Cumberland.

Abundance of grass and green crops. Potatoes have recovered from the early cold weather, and turnips are very healthy. Some farmers fear that the meadow hay will lack in quality for what it gains, owing to the rain, in quantity. The Cumberland County Council is now giving more attention to gardening and fruit culture than previously, and in Mr. Berry, of Morpeth, have got a teacher who takes with big and small agriculturists. This is what the Vicar of Plumpton says of his recent lectures in the Penrith district: "The Cumberland County Council, in providing Mr. Berry, sent a good man among us to teach all about fruit culture. Yesterday, at Penrith Market, several spoke to me of the useful information given, and since applied by some of the hearers. But we want more, and want it quickly. The fruit is coming in abundance, but how are we to keep it with full flavour? The answer is, in bottles, like in principle, but not in formation, to those for keeping, in full flavour, sterilised milk. Let us have, at reasonable price, wide-joled bottles, with porcelain stoppers that will automatically and hermetically close themselves during the pan-heating process. I last season used successfully my milk bottles for small fruit. The joles, however, are too small, even for currants. I have been recently in communication with the Scottish Dairy Co., and at the London office was told that suitable bottles could be made if the demand were sufficient. Well, the need is great, and if the C.C.'s for the various counties clubbed to teach it, we would soon have the bottles. At present, as to fruit, it is first feast, and then famine. With the cure suggested we could have fresh, full-flavoured fruit all the year round. The case tempts me to parody lines I remember. These are they:—

'You're a grand hand at fishing, said Kate,
It's yourself that knows how for to hook them.
But when you have caught them, agra,
Don't you want a young woman to cook them?'

Parody.

You're great at fruit culture, C.C;
Well you teach how to sow, grow, and reap them
But to perfect your utility,
Get fit bottles in flavour to keep them."

As to these automatic fastening bottles, it surely should be possible to obtain them in various sizes.—H. M. K. (July 6th).

Carmarthen.

Glorious weather for everything but haymaking. Many have commenced and are at it busy every fine day, and a good deal has been carried in fair condition, but the weather has been very changeable.

The Crops are Heavy.

Haymakers are scarce on a fine day to make it, so we depend on our teams, which ought to be well fed to work all the implements which are well designed for the different purposes, that is cutting, spreading, turning, gathering, pitching, etc., which are done more effectually by those newly invented implements than by hand. Corn as ten days or

A Fortnight Later than Usual.

The cold spring has kept corn of all kinds late, which appear to be under an average, and the ears are only now making their appearance. Mangels are very late, but are now growing well this damp weather. Swedes are slow, and the fly has been busy on late-sown crops; the early-sown are looking better. Potatoes appear healthy and strong; with a little more warmth we shall expect a full crop. It seems to be

A Good Year for Fruit

of all kinds. Apples and plums are very plentiful, and are large, considering the lateness of the blossom. Pears are not so plentiful; the cold winds we had when they were in bloom must have affected them. Store stock are in request at our fairs. Two-year-old steers fetch from £11 to £13. Fat stock are scarce at about 7d. per lb. Cows with calves slow. Fat sheep sell about 8d. per lb., and fat lambs about 9d. per lb.—D. P. (July 5th).

Durham.

Farm prospects are fairly good, but settled weather is now very needful. Frequent and heavy rain in June improved most crops, and an average may be reached. Hay harvest has commenced, but little progress made yet. Wheat is looking well, and winter sown has been in ear a week or more. Barley and oats are somewhat irregular, and need sunshine. Turnips and potatoes are promising.—E. and T. R. (July 6th).

Gloucestershire.

Since the beginning of July all crops have made steady progress, yet there is

No Hope of an Average Corn Crop,

except winter beans. Wheat will be quite 30 and barley and oats about 20 per cent. under last year. Clover and mixtures are fairly good, but much of it was carried more or less out of condition, as the rain we had was enough to damp the fodder without doing good to the land, except on low land.

The Hay Crop will be Light.

A lot will be got up this week, as the weather is fine, but dull. I think this is the only part of Gloucestershire where hops are grown. One grower has about fifty acres looking well; he has been busy washing the last fortnight. Now they seem quite free from aphis. Root plants are promising, although many fields had to be re-sown. Those drilled since the 12th ult. have escaped the fly.

Fruit Prospects Have Fallen off.

About half a crop is the most we now expect, but apples are large for the time of year. Cattle are doing well, but the price of store stock is very disappointing, as beef sells well and keep is plentiful. Labourers are plentiful enough, but wages are high, and, worse than all, the men are so indifferent to their masters' interest; no use trying to push when the weather is catchy.—J. H. W. (July 5th).

Mid Essex.

Wheats are very thin on the ground, and must therefore be a light crop. Barleys are also a light crop, but recent rains have very materially helped them. Early pulling peas are generally very bad, with a very few chance fair pieces. Winter beans do not look well, but spring beans and peas are making a good show.

A Lot of Hay is Lying About

that must be spoilt, but there is a very light and bad crop of clover hay generally, and grass is very short; recent rains are helping them somewhat. Swedes, kohl rabi, and mangolds are not good in many places. Swedes, etc., have had to be drilled two and three times on account of the fly taking them. Wheat has risen in price, touching, in fact, 34s. per quarter last week, but as to whether it will continue so is a problem which no one can solve. The labour question will in time in rural districts be a more vexed question with all our young men going into the towns and a birth rate, as in this district, reduced three per thousand on an average of ten years.

Fat Beasts

have gone out much better this spring than last year, although the trade has slackened considerably the last two weeks. Good fat mutton and lamb has sold fairly well, but on account of the sultriness food was no lighter than could be expected. Store lamb trade bad. Fat hogs have sold well. Boar-pigs and store pigs have sold fairly well, but the trade has again gone back very considerably.

Fruit.

Strong fruit shows for a plentiful crop, and apples for an average one, but everything feels the want of sun. I should say we have not had such a sunless year for several years.—C. V. B. (July 3rd).

West Suffolk.

A fortnight's showery weather has made it impossible to secure anything saleable, except early grasses for hay. A fine crop of grass is now waiting to be cut. We have had a good deal of rain, and there will be [illegible] but

Sunshine is Essential

now more than to harvest, and indeed for everything else. All sorts of peas and beans never had a better promise, and [illegible] the most abundant blossoming ever remembered. Mangels [illegible] especially dear; beef a fair price, and pork fluctuates from 6d. to 4d. in the pound. Eggs and poultry always sell;

sometimes the market is overdone with butter, and price varies from 6d. to 1s per pound.

The Great Increase of Rates

has brought about ratepayers' defence associations. Much good may they do. We have been training the poor for generations to pauperism, and the vested interest of the Local Government Board, and a great army of officials, with their big houses to farm, banish the poor to Stow Union. Christ said, "The poor ye have always with you"; but we have got ahead of that, and send them away from us. What amount of pauperism should we have if

Old Age Pensions

were to be had by all who care to take them? I say it would foster thrift and independence if all felt sure of some provision for old age, without first making themselves needy. Some one has said old age pensions are nothing beside an extended form of out-door relief, and what else is it which the sailor and soldier gets, or hopes to get, also post office and telegraph officials, not to mention highly-paid Government officials and professional men. And why should not the great army of labour enjoy the comfort of old age which they above all others have done so much to earn?—W. Y. (July 3rd).

North Devon.

From the Bideford district wheat is reported to be a full plant and vigorous, as is also barley, oats, mangels, and swedes. Potatoes are good. Common turnips now putting in with a good seed bed. Hay good crop, not much ricked yet. Grass plenty. All kinds of fruit great crop. Cattle, sheep, and pigs, both fat and store, selling well, at fair prices. The want of labour is much complained of. In some districts the wire worm in the wheat. If a remedy could be given, it would be highly valued.—J. H. (July 6th).

Shropshire.

Weather dry, with a few spots of rain; wind strong, north-west. Carrying hay still going on. Clover and rye grass nearly secured. Heavy rain now would be a serious disappointment.—July 6th.

Worcestershire.

Wheat scarcely up to average, few really heavy fields. Barley will be a light crop, but has much improved since the rain. Oats: Early-plated ones looking well, late ones very uneven. Beans looking well, very few grown in this district. Peas, a very light crop, nearly all grown for picking while green. Mangolds, as a rule, looking well. Swedes and turnips nearly spoilt with fly. Hay not a heavy crop, but a large acreage will be mown; weather has been awkward for sowing it. Corn and fodder crops will be light, and at present low prices do not promise to be remunerative. Beef and mutton selling much better than last year. R. B. (July 7th).

York.

I am sorry that I cannot from the West Riding report very favourably on the prospects of agriculture at present. I don't think in this district that there is a single crop that comes up to the average at present, with the exception of potatoes, and it is impossible to say yet what the crop will be.

Turnips, as a rule, have in this district suffered very much from "fly," although I have dressed mine with turpentine as recommended. Labour seems one of the greatest difficulties we have to contend with; we cannot get what we require, and I know of several farmers who have either given or are going to give notice to quit their farms next spring because of the difficulty of obtaining labour. Wages have increased, although farmers cannot afford it. How can they at the recent prices of farm produce?—A. M. (July 4th).

Foreign Prospects.

FRANCE.—Compared with a few weeks ago, the present condition of the wheat crop shows a remarkable improvement. Over a large area the crop has come into ear in favourable weather; the heads are long and well filled, and the relative thinness of the plant will prevent lodging should thundershowers be heavy.

GERMANY.—Finer weather has been experienced lately; the cereal crops are coming on apace, but the yield of wheat and rye is not expected to be more than average. The potato fields look well.

SPAIN.—The weather has continued favourable to the crops, and the hope of a good harvest is becoming more and more assured. The ripening of the crops is in general a little backward this year. In most parts of the country barley is quite ripe, and an abundant yield is promised.

HOLLAND AND BELGIUM.—Crop conditions remain without marked change. Dry hot weather is greatly desired.

HUNGARY.—The wheat crop is ripening in a very promising manner. Rye cutting is now pretty general, and the new corn is distinguished for fine heavy quality, so that a most bountiful yield is expected.

ITALY.—Favourable reports continue to be received of the wheat crop, and harvest operations are progressing with generally auspicious weather.

SERVIA.—The crops look well in all directions. Rye has bloomed, and notwithstanding its patchy appearance, promises a good average yield. Barley is ripening, and cutting is about to begin.

RUSSIA.—Weather, on the whole, is favourable, but in some districts the rain excessive. Our correspondent in Novorossisk says: "Rye cutting has begun, and in a few days that of barley will follow. Wheat prospects are fair, and linseed promises a good average crop." Weather during and just after harvest is so important a consideration that it would be premature to form opinions as to the result of the harvest.

ROUMANIA.—The harvesting of rapeseed is terminated, and that of barley and rye has begun, and wheat reaping will shortly follow, and good results are expected. Maize stands well, the plants in general being in good condition.

BULGARIA.—The condition of the autumn-sown cereals is highly satisfactory. Winter barley is already cut in many localities, and the crop, both in quality and quantity, is very good. A large wheat yield is anticipated.

UNITED STATES.—The *Cincinnati Price Current* says that the drought has been broken in the north-west, and, while much of the spring wheat crop is beyond relief, a considerable portion of the late wheat will be benefited, and the general downward tendency in condition will be checked. The chief benefit from the rains has been derived by small-grain crops and by the maize crop. The harvesting of winter wheat is nearing completion; threshing is now in progres, and the crop is generally equal to now in progress, and the crop is generally equal to expectations. The maize crop maintains its high

Fruit Prospects in West Cornwall.

In the West of Cornwall the apples are disappointing. About six weeks ago, when they set, there was a superabundance. The rain came too late to help the thinning out that was required, and now the apples have grown in thick clumps, which will hamper maturing, and in many cases these clumps have not grown perceptibly since the setting. Where there have been only a few on the trees they have grown remarkably well, but in many cases where the crop promised to be abnormal they will be thrown away. This applies more particularly in the case of the earlier sorts. Pears set for a heavy crop, but a good many have fallen since the rain came, and the crop is not so large as it promised to be by about one-third. The sudden change has been too much for them, and there will only be a moderate crop. Gooseberries are abundant. They were a fair size before the heavy rains, so that they were not affected like the bigger fruit. But the price is low. Last week a lot from West Cornwall were sold in Sheffield market for as little as £4 10s. a ton. The average price, however, is about £5 per ton. This refers to the sorts used principally for preserving, and in all probability the ripe fruit will realise a little more money. The cherry crop is only light. Currants are a good crop. The rain came just in time for raspberries, and there ought to be a heavy crop. Peaches and plums set well, but it is rather early to make sure of good crops, as the stoning period is a hazardous time.

In the Truro district fruit is extremely plentiful. Apples are an abnormally heavy crop. In some cases the trees are suffering from blight, attributed to the cold nights. Peaches and figs are plentiful. Pears and plums are better than for three years. In the experimental gardens of the County Council at Truro young trees planted as recently as the winter of 1897 have required a good deal of thinning. With few exceptions gooseberries are a remarkably fine crop, whilst currants and raspberries are showing well. Strawberries are up to the average in quantity. Two of the earlier varieties were very fine, and one or two of the later sorts appear to be a heavy crop. *Royal Cornwall Gazette.*

THE WEATHER.

MONDAY (July 2nd).—Rainy and unsettled weather prevailed over the greater part of our islands. The conditions had become somewhat complex, although the main current of air was south-westerly, blowing from the Atlantic. The temperature was high during Sunday night, the thermometer in places not falling below fifty-five degrees, while the highest readings during the day were in places below sixty degrees. The forenoon was dry in London, but rain set in shortly after noon, and continued throughout the afternoon and evening. Thunder and lightning occurred in London at about four o'clock in the afternoon.

TUESDAY (July 3rd).—Fine weather prevailed over the greater part of England, but the conditions were still far from settled, and a series of thunder showers passed over the Metropolis. The morning was very fine in London, but a sharp thunderstorm was experienced shortly after noon, accompanied with a thorough downpour of rain and hail. Other slighter disturbances occurred during the afternoon. The highest temperature in London was sixty-eight degrees, and in many parts of England the midday readings were lower by several degrees. A brisk north-west wind has spread over the whole country in the rear of the storm area, which occasioned the heavy rain on Monday.

WEDNESDAY (July 4th).—The weather was fine in most parts of England, and the temperature in the eastern districts was somewhat higher than of late. Rain was measured over a large portion of the country in the morning, as the result of the fall in the preceding twenty-four hours, but the amounts were nowhere large. Tuesday night was cold in Scotland, where the thermometer fell fully ten degrees lower than in most parts of England, and at Wick the sheltered thermometer fell to within two degrees of the freezing point. The winds were northerly in the north and east, but they were very variable in Scotland and Ireland.

THURSDAY (July 5th).—The weather was generally fine over England, and there was an increase of temperature in many parts of the country. Rain was measured in the morning, as the result of the fall since the previous day, at nearly all except the south-eastern stations, but it was only in Ireland that the fall was heavy. A cyclonic disturbance was passing eastwards to the north of Scotland, and the weather was unsettled and rainy in the Scotch and Irish stations. The winds were westerly over the entire country, and they were, for the most part, light. The day was fine in London after the early morning, and the weather was bright and sunny in the afternoon.

FRIDAY (July 6th).—A cool north-west wind was blowing over our islands, and, in places, a moderate gale was experienced. The weather was generally fair over the southern portion of the country, although there was still a good deal of cloud. In Scotland the weather was mostly overcast, and the mid-day temperatures were very low for the time of year, the readings in most places failing to touch sixty degrees. Rain was again measured in the morning, as the result of the fall during the preceding twenty-four hours, at nearly all the northern and western stations. The day was cloudy in London, and the thermometer stood ten degrees lower than on Thursday, the highest temperature being sixty-six degrees.

SATURDAY AND SUNDAY (July 7th and 8th).—Fine weather prevailed in nearly all parts of our islands during the two days, and the rainfall was scarcely appreciable anywhere. A cool northerly wind prevailed over the whole kingdom, and the midday readings were everywhere much below the average. In London no appreciable rain fell before Sunday evening, but the midday temperatures registered several degrees below the average.

Dairy Trade and Can Protection Society.

The monthly meeting of the Council of this Society was held at their offices, 57, Chancery Lane, on the 4th inst., Mr. J. T. Horner in the chair. The following members were present:—Messrs. E. G. Easton, J. Wyman, J. P. Brumbridge, H. Summers, T. R. Lawrence, F. Ramsay, G. S. Taylor, J. D Jones, and J. Griffiths.

The minutes of the last meeting were read and confirmed.

The Working Committee's report was read and adopted. The secretary informed the Council that during the month of June he had received into the Exchange 162 cans and three churns, that a number of non members had been applying to him for advice under the new Adulteration Act, who he had advised to consult their solicitors. The analysts, Messrs. Redwood and De Hailes, reported that during the month of June they had received from members of the Society 113 samples of milk for examination, thirteen of which they returned poor quality, and forty as adulterated. Their inspector had taken samples (at various railway stations during the same period), of 152 farmers' milk, and seventeen were found to be of poor quality and twenty-six adulterated, thus showing how necessary it is for dairymen to have samples frequently taken of their milk, and the Council wish most earnestly to impress this upon the members.

A number of reports of the secretaries on complaints were then presented, in most of which the property had been recovered, and also a number of letters were read from farmers and others who were not members, requesting the Society's assistance in recovery of churns.

Bath and West and Southern Counties Society.

THE CROYDON MEETING.

At a meeting of the Society's Show Dates Committee, held at Croydon on Friday last, it was unanimously resolved to recommend to the Council that the Society's 1901 exhibition at Croydon be held on Wednesday, Thursday, Friday, Saturday, and Monday, May 22, 23, 24, 25, and 27, these dates being, for local and other reasons, the most suitable that could be selected.

A meeting of stewards was afterwards held upon the site selected for the Croydon Show, and the position of the principal departments was settled. The erection of the Art galleries will be proceeded with shortly. The site is exceptionally well situated in close contiguity to the town.

CORN MARKETS.

LONDON.

Mark Lane, Monday. - Malt a quiet trade. Barley firm. Wheat declined 1s 6d per qr on the week. Oats steady. Maize 3d to 6d per qr cheaper. Flour about 1s 6d per sack lower.—NIXON, GOWER AND CO.

Mark Lane, Wednesday.—The few samples of home-grown wheat submitted go directly to the country millers, and conditions continue to give every satisfaction. Fine white, 32s, and good heavy red, 31s 6d 63lb delivered up. American descriptions were not pressed, but sellers fail to regulate prices. Although the flour market manifested a dragging course, quotations were not altered since last Monday, being nominally as follows:—American first patents, 25s to 27s; second ditto, 24s 6d to 25s. First bakers, 22s to 23s; and second, 20s to 21s. Hungarian up to 31s. The London Millers Association made no further reduction at their meeting this afternoon. Of feeding stuffs, the demand for grinding barley is still directed almost exclusively to Persian, which, with Black Sea unobtainable and American very scarce, continues to form the chief source of supply, 17s 9d ex ship, 18s 3d ex quay being named. English scarce, and 1s to 1s 6d dearer on the week. American oats continue in sellers' favour, notwithstanding a slow consumptive demand. Maize rather firmer, and supplies continue to be kept down. American mixed new held for 21s ex ship, 21s 6d landed. Odessa, 24s 3d ex ship to come. Beans remain neglected.

Mark Lane, Friday.—Home-grown wheat continues in good condition, and in limited supply, being about steady. Fine white, 32s, and good heavy red, 31s 63lb delivered up. American descriptions tend easier since last Friday, while supply and demand fail to become properly regulated. No interest was attached to the flour market. Consumers continue to buy only for actual requirements, and quotations were nominal. The London Millers' Association made no alteration. Town household, 26s; whites, 29s per sack. Reverting to feeding stuffs, grinding barley is distinctly steady, Black Sea being exhausted, and American very scarce. Persian continues to form the chief source of supply, and is plentiful, 17s 9d being named ex ship, and 18s 3d ex quay. Oats fairly steady, although slowly supported. American mixed clipped held for 14s 9d ex ship, 15s 3d ex quay. No attempts were made to press either beans or peas, and, pending the opening season next autumn, both cereals remain stationary, while steady.

COUNTRY.

Ashford, Tuesday.—Wheat fell 2s per quarter as compared with the previous market, the best white samples being offered at 32s per quarter, and the best reds at 30s. Maize was 1d to 1s lower on the week, flat being quoted at 22s 6d to 23s 6d and round at 26s to 27s per quarter. There was very little doing in other sorts of corn.

Aylesbury, Saturday.—Wheat dull at about last Saturday's quotations. All other articles unchanged. Wheat, 28s to 30s.

Banbury, Thursday.—Wheat (white), 29s 6d to 30s per qr; wheat (red), 29s to 30s per qr; beans (new), 30s to 32s per qr; oats (new), 21s to 23s per qr; oats (old), 20s to 21s per qr. Wheat markets are quoted slightly lower on the week, but holders will not submit to any reduction.

Boston, Wednesday.—Very few samples of wheat shown. Last week's price of 32s per qr. was maintained. Grinding barley, 25s 6d; oats, 20s to 22s; beans, 31s to 32s; maize, 23s to 25s 6d.

Braintree, Wednesday.—An average supply of wheats, prices declining 1s per qr since last week; small business done. Reds made from 29s to 31s, and whites, 32s to 33s.

Bristol, Thursday.—Trade has been quiet since our last. At to-day's market we again had a very small attendance. There was not enough English wheat offering to test the market. Foreign, in some instances, was 6d lower. Barley, maize, and oats very firm, at late rates. The demand for flour is almost nil, consumers working down stocks, not having confidence in markets.—GRACE BROTHERS.

Cambridge, Saturday.—The wheat trade during the week has been fluctuating. Supplies have been smaller, and the depression of the middle of the week has been recovered. The weather has continued showery, and hay making is progressing slowly. At this market to-day there was a very small supply, and farmers refused to take less money than last week. A small business was done at unaltered prices. Red wheat, 30s to 31s; and white up to 32s per 504lb. Beans hardening in price.

Canterbury, Saturday.—Wheat in short supply and very firm. Oats quiet. Ruling prices:—White wheat, 30s to 32s; red ditto, 29s to 31s; grinding barley, 20s to 22s; white oats, 18s to 21s; black ditto, 18s to 20s 6d per quarter.

Carlisle, Saturday.—Small supply of oats in our market to-day; good sale at late rates, 22s to 23s 6d per 336lb.—THOMAS ROBINSON.

Chester, Saturday.—A good hay-making day kept many farmers at home, and there was little trade passing in English grain. Oats and beans were in better demand, and Indian corn being in smaller supply, was 3d per sack dearer. Quotations:—Wheat, white and red, 4s 4d to 4s 6d per 75lb; grinding barley, 3s to 3s 6d per 64lb; beans, 4s 10d to 5s 6d per 80lb; oats, new, 2s 8d to 2s 11d; old, 2s 9d to 3s per 46lb; Indian corn, 11s to 11s 9d per 240lb.

Chichester, Wednesday.—Very small supply of wheat, the price of which was quoted 1s lower on the week. No material change in feeding stuffs. Flour tending downwards. Attendance very sparse.

Colchester, Saturday.—Very little wheat offering, and needy millers had to pay last week's prices. Nothing offering in spring corn.—FRANCIS AND CO.

Dorchester, Saturday.—Tone very firm, wheat being held for full values, and grinding barley for 3d per qr more. Other feeding stuffs made fully late rates.

Glasgow, Wednesday.—There was a small attendance at our corn exchange to-day. Wheat and flour quiet, and prices tending in buyers' favour. Indian corn meets a slow sale at last Wednesday's prices. Canadian pease firm, and scarce on spot. Grinding beans firm, but unchanged. Canadian oats dull, and the turn cheaper. Home oats firm, but quiet. Barley and oatmeal firm, but in small request. Bran and thirds quiet and unchanged.—GIBSON AND CLARK.

Gloucester, Saturday.—The market is exceedingly quiet, the improvement of the last two weeks having quite subsided. English wheat was mostly 6d to 1s per qr lower. Foreign held for late rates. Grinding barley steady. Maize and oats quiet at previous prices. Wheat, white, 28s to 30s 6d; red, 26s to 28s 6d; American, 31s to 33s; Plates, 30s to 31s; Flat maize, 21s to 21s 3d. Azoff barley, 21s per qr.

Hereford, Wednesday.—English wheats firmly held, but concessions were necessary to do business. Foreign wheats 1s down on the week. Barleys nothing doing. Oats very quiet, 1s to 2s dearer. Beans dearer. Maize quietly steady. Prices: Wheat,—white, 3s 6d to 3s 9d per bushel; red, 3s 5d to 3s 8d; barley, 3s to 3s 5d; oats, 2s 3d to 2s 9d; beans, 3s 9d to 4s; maize, 3s to 3s 3d; potatoes—white, 4s to 6s; red spring, 3s 6d to 5s.

Ipswich, Tuesday.—Moderate supply of wheat, trade quiet at barely last week's rates. Reds, 28s to 29s; white, 30s per qr. Grinding barley firm. Oats unaltered. Beans and peas slow.

Leeds, Tuesday.—The American markets continue extremely unsettled, bulls and bears alternately getting the upper hand; business on this side has consequently become very quiet and with fairly heavy stocks of wheat in the ports, both millers and speculators prefer resting on their oars and waiting the chapter of events. White wheat must be quoted 6d to 9d, reds 1s to 2s lower from the extreme prices of last Tuesday. Maize, beans, and oats firm and unchanged.—DUNNS AND CO.

Leeds, Friday.—The advance in prices obtained for wheat on Tuesday have not since been maintained, and on the little business passing to-day buyers have a decided advantage, both as regards English and foreign descriptions. Flour is also easier on the week to the extent of 1s to 2s per sack. Maize, oats, beans, peas, and grinding barley firmly held.

Leicester, Saturday.—Good average attendance, with moderate supplies of home-grown wheats, which sold slowly at 30s to 32s per 33 stone. Beans steady. Fine oats in good demand.

Lincoln, Friday.—Small attendance. Very little English wheat on offer. Trade slow, at barely last week's rates. Reds, 29s to 30s; whites, 30s to 31s. Foreign wheats quiet. In oats, beans, peas, and maize the trade was slack, at late rates.

Liverpool, Friday.—Wheat firm, with a fair business; spring wheats 1d dearer, other sorts unchanged. Flour has had a moderate trade since last Tuesday and no change is made in the values of either foreign brands or home milled. Maize: Mixed American has again moved well into consumption and holders are firm at ½d per cental over last Friday's prices; European is quiet but shows little quotable change in prices; River Plate has however been in active request at full rates. Barley quietly steady at late rates. Beans in moderate demand and firmly held at recent prices. Peas quiet, about ½d per cental lower. Oats have had a better demand, and are firmly held at full prices. Oilcake firm at an occasional advance in prices, but buyers do not encourage any improvement in values. Oatmeal firmly held at the quotations, but inactive.—SEGAR AND TUNNICLIFFE.

Maidstone, Thursday.—From last week no alteration in the value of wheat, the tone to-day firm, sellers albeit not eager to quit samples. In barley and oats no change. Maize 3d per qr cheaper. Beans and peas as before.

Manchester, Thursday.—English wheat is nominally as last week in quotation, but actual prices in some instances show a decline of about 1s per qr. Foreign descriptions are 1d for white and 2d for red per cental lower. Flour meets with a continued slow demand at late rates. Barley and oats are quiet with the tendency however against the buyer. Indian corn is pretty much as seven days ago.

Newcastle-on-Tyne, Saturday.—Wheat at our to-day's market ruled steady at last week's prices. Maize firm and in sellers' favour. Barley, peas, and beans unaltered. Scotch oats, 3d to 6d per 336 lbs dearer. Foreign steady at late rates. Flour unchanged.—JOSEPH POLLARD AND CO.

Newcastle-on-Tyne, Saturday.—The weather now seems more settled and suitable for hay-making, at present in progress. Trade in wheat has had a check, prices having receded 1s per qr, and the same per sack almost applies to flour. Oats, beans, and peas remain steady, and will doubtless hold their own this side of harvest. Maize has had a wonderful time of it this year, and keeps as firm as ever.—GEO. W. WATSON AND CO.

Newport (Mon.), Wednesday.—Wheat, after the rapid and big advance, has declined 1s per quarter, and is now firm. Maize an l offal dearer. Barley firm. Beans 6d dearer. Oats unchanged.

Norwich, Saturday.—A very small supply of wheat on offer to-day with a firm trade, and last week's prices were fully maintained. No improvement in the weather, which remains most unseasonable for all the growing crops. Wheat, red, 29s to 31s per qr, weight 63lbs per bushel imperial. Corn inspector's return for the week ending 2nd July, 1900:—Wheat 1623 4 26s 5d.—J. ARTHUR MILLS.

Nottingham, Saturday.—Wheat very small supply, firm at last week's rates. Oats, small supply, good demand, 6d advance. Beans, good demand, 6d dearer on the week.—ROBERT HUBBLE.

Oxford, Saturday.—Wheat firm, but quiet, at last week's prices, 29s to 32s.; holders disinclined to sell.

Peterborough, Saturday.—There has been very little wheat offering to-day, and trade was rather irregular, but prices on the whole were about the same as last week. Good oats scarce, and values have an upward tendency. Beans firm.—THOMAS HILL AND SON.

Plymouth, Thursday.—Fair trade and moderate attendance at to-day's market. Oats, 16s, Libau; Irish, 17s 3d; wheat, 24s; maize, 22s 6d; barley, 21s 3d ex ship now discharging.—ORLANDO DAVIS AND CO.

Reading, Saturday.—We had only a poor attendance in the Exchange to-day, hay harvest being in full swing, thanks to the fine weather experienced in this district during the past day or two. Wheat came to hand in limited quantities only, but trade proved very quiet, few sales taking place. Other sorts of corn changed hands at late figures.

Ripon, Thursday.—There is a slight reduction in wheat. The excitement has fallen off very much this week. Moderate attendance. Wheat, English, 28s 6d to 29s 6d; ditto foreign, 32s to 36s; barley, grinding, 24s to 25s; oats, 21s to 24s; round maize, 25s to 27s; flat maize, 23s per qr; beans, 11½d per stone.

Romford, Wednesday.—Wheat was 1s to 1s 6d per quarter cheaper than last week. There was a very small supply on offer. Red wheat made 30s to 31s, and white wheat 31s to 33s per qr.

St. Neots, Thursday.—Small attendance and not much wheat offering, but it was not so much in request, and last week's prices were scarcely maintained.—ELGOOD AND SON.

Shrewsbury, Saturday.—Although the temperature has been low during the past week, the growing crops have made fair progress, and taking them all round they look more promising than they did. Hay harvest has become general. Rye grass and clover cut up a heavy crop, but meadow grass is not up to an average in quantity. Wheat has been an uninteresting trade, and values have remained unchanged from a week ago. Oats, peas, and beans have been firm. Flour has gone into consumption but slowly, but prices have been steady. For milling offals there has been a good inquiry, and former quotations have been maintained.—W. L. BROWNE AND CO.

Spalding, Tuesday.—Wheats were 2s lower on the week, selling at 29s 6d to 30s per qr. There was a small supply, and not much doing. Oats were unchanged, at 21s per qr. Beans 1s. No peas showing.

Stockton, Wednesday.—There were very few samples of farmers' wheat showing, which made 29s to 30s per qr. The foreign wheat trade keeps extremely quiet owing to the collapse in the American markets, and prices may be quoted fully 1s below last week. Feeding stuffs unchanged.

Sunderland, Saturday.—Wheat in small supply, late rates about maintained. Barley and oats steady, unchanged. Arrivals coastwise: Wheat, 365 qrs.; malt, 515 qrs.; foreign nil.—E. AND F. RICHARDSON.

Taunton, Saturday.—Wheat quiet, but firm at last week's prices. Maize and barley about 3d dearer; other articles unchanged.

Wakefield, Friday.—A quiet tone prevails on our market to-day generally, and we quote wheats 1s per quarter easier on the week, with practically no business doing, millers being almost. No alteration in feeding stuffs.—MICHAEL SANDERSON AND SON, LIMITED.

Wisbech, Saturday.—A short supply of grain. Wheat sold at full prices of Saturday last. Red, 30s; white, 31s; spring corn unchanged.—JAMES PEARSON.

Wolverhampton, Wednesday.—A fair attendance, but poor business. Oats, 13s to 14s; beans (new), 15s 9d to 15s 6d; beans (old), 14s to 15s per 140lb; flat maize, 21s 6d to 22s per 480lb.

Worcester, Saturday.—Recent improvement in wheat not maintained, values being generally 6d to 1s lower. Foreign held for last week's prices. Beans and grinding barley firm. Maize quiet at late rates. Wheat, white, 28s to 29s; red, 26s to 28s per qr.

York, Saturday.—The few samples of wheat offered sold slowly at rather under last week's prices. Fine white wheat realised 29s to 30s; and red and mixed, 28s to 30s per quarter of 36 stone. Feeding barley, 23s to 26s. per quarter of 32 stone. Oats dearer and scarce. Fine white Tartary, 18s to 19s; black ditto, 19s to 20s; and short oats, 21s to 23s per quarter of 24 stone. The official corn return averages of the week have been:—Wheat, 27s 9d; and oats, 18s 7d per quarter.

FOREIGN.

The Antwerp wheat market has been inactive, but prices have been pretty well maintained. The harvest has been commenced in the south of France. Rye is being cut in the district round Lyons, and the cutting of wheat will follow, as the crop has reached an advanced stage of maturity. If the weather during the next two or three weeks is not unduly hot, a relatively satisfactory yield is anticipated, and the grain will be of good quality and well filled out. In the north of France also fewer complaints are now being heard from farmers; the wheat crop will be a smaller one this year but the quality will be good if the weather continues favourable. A recent advance in wheat at Paris, in consequence of the upward tendency of the American market, has been scarcely maintained; a slight improvement has, however, been established, upon the whole, in Parisian wheat quotations. French farmers have also shown no great eagerness to sell, as, although the appearance of the French wheat crops has improved of late, there must still be deficit this year as compared with 1899. Last week's imports of wheat at Marseilles amounted to 70,294 quintals. Flour for consumption has shown little change at Paris. Disposable wheat has been dull at Konigsberg and Dantzic. Odessa advices state that, while a few weeks since there were complaints of persistent drought in Southern Russia, there has now been too much rain. This is unfortunate, as the crops will soon be ready for harvesting. Wheat harvest has commenced in some of the districts watered by the Danube, but it will only become general during the next few days. The quantity of wheat now en route for Europe is 1,505,000qr.

Hamburg, Saturday.—Barley report: At the beginning of the week the weather was more settled but since there have been torrents of rain, with a rather low temperature, which surely cannot be in favour of our barley crops, which badly want sunshine now, or the prospects will not be good. So far there are satisfactory reports from the Saale districts, Bohemia, and Moravia; whilst in Hungary the barley is nearly ripe, and cutting will commence next week; the quantity will turn out below the average, and quality will depend upon harvest weather.—FRANCIS M. TH. DUHNE.

Hamburg, Saturday.—Rainy weather continues, sadly interfering with haymaking. The imports during week amounted to:—6,035 tons wheat; 7,937 tons rye; 8,945 tons barley; 17,095 tons maize. Wheat quiet, but firm. Fine red Holstein and Mecklenburg is held at 29s 6d to 30s 9d per 504lb f.o.b.; fine River Plate, 27s 9d to 28s 6d; Hard Winter, 28s per 480 lb, c.i.f. Hamburg. There is not much demand for rye, but at the same time offers are scarce, and 9 10-15 South Russian floating is held at 23s 3d per 480lb. c.i.f. The growing crop of malting barley so far looks promising, except perhaps in Silesia and some parts of Hungary, where the plant was affected by drought. Stocks being well cleared, the new season is likely to commence with a good demand. Feeding barley firm. 6 6-8 Ko South Russian is held at 19s 6d per 400lb. c.i.f. Hamburg. Mixed maize is offered mostly cheaper here from second hand than direct offers from America, which is not a sign of a sound state of the market, and in fact the demand from the consuming districts is not brisk. July and August shipments are offering at 20s 3d, River Plate floating at 20s 6d per 480lb c.i.f. Hamburg.—JOHN TATLOCK.

POULTRY AND PROVISIONS.

Smithfield, Saturday.—Good demand prevailed for the fair supplies on offer. Fowls: Yorkshire, 2s 3d to 3s 9d; Essex, 2s to 2s 6d; Surrey, 3s to 4s 3d; Sussex, 2s 9d to 3s 6d; Boston, 1s 10d to 2s 4d; Irish, 1s 6d to 2s 3d; Welsh, 2s to 2s 9d; Russian, 1s 3d to 2s; Aylesbury ducklings, 3s to 3s 6d; country ducks, 2s to 2s 9d; goslings, 3s 6d to 4s 6d; Bordeaux pigeons, 11d to 1s 2d; feathered, 9d to 11d; wild rabbits, 1s 2d to 1s 8d; tame, 1s 2d to 1s 8d each; Australian ditto, 6s 6d to 8s 6d per dozen.

Glasgow, Wednesday.—Arrivals of cheese were fair. All grades are now in the market. The demand, however, is very moderate, as many are inclined to hold off from buying, believing that prices will not hold. Cheddars and Dunlops are quoted from 50s to 56s per cwt. American parcels are arriving freely, and the quality is improving. The demand is moderate, with values steady.

Liverpool, Saturday.—Bacon.—Market rules fairly firm, advices from Chicago being steady, but the demand is only moderate, and there is some accumulation of stock. Hams meet with more inquiry, and the tendency is to an improvement in values. Lard is in good demand, and prices are higher. Beef dull and easier to buy. Pork is steady at recent values. Cheese.—There has been but a moderate demand, and values are again easier, with buyers holding off. Butter.—The market is quieter, with a small trade passing.—HODGSON BROTHERS.

BUTTER.

Tuesday.—Bedale: 1s 3d to 1s 4d per roll of 24oz. Gainsborough: 1s 1d per lb. Settle: 10d to 11d per lb. Spalding: 1s per lb.

Wednesday.—Barnsley: 1s to 1s 1d per lb. Boston: 10d to 1s per lb. Colne: 1s 0d per lb. Gordale: 1s 1d per lb. Keighley: 1s to 1s 1d per lb. Kirbymoorside: 8d to 9d per lb. Knaresborough: 1s 3d to 1s 4d per roll of 24oz. Louth (wholesale): 10d to 11d per lb. Market Weighton: 10d per lb. Masham: 1s to 1s 2d per roll of 24ozs. Northallerton: 1s 3d to 1s 4d per roll of 24oz. Stockton: 10d to 11d per lb. Whitby: 9½d to 10d per lb. Worksop: 1s to 1s 1d per lb. Hereford: 1s to 1s 2d per lb. Market Drayton: 11d to 1s per lb. Uttoxeter: 1s to 1s 1d per lb.

Thursday.—Devizes: Wholesale 11½ to 1s, retail 1s 1d to 1s 2d. Birmingham: 1s to 1s 2d per lb. Brigg: 1s per lb. Driffield: 10d per lb. Penistone: 11d per lb, to 1s 5d to 1s 6d per roll of 24oz. Scarborough: 11d to 1s per lb. Wetherby: 1s to 1s 1d per lb. Liverpool: Danish, finest 112s to 116s, secondary 106s to 110s; Irish creameries, 100s to 104s. Bristol: Irish butters are a shade easier. Irish centrifugals, 105s to 107s. Cardiff: Supplies are increasing, and prices gene-

rally are 1s to 2s lower. Irish creameries [illegible] lots a few [illegible] Waterford [illegible] to the Dublin [illegible] Newcastle: [illegible] but market [illegible] and rather weaker. Leith: Demand limited, but supplies less and little [illegible] Belfast: [illegible] per lb. Shrewsbury: [illegible] Helmsley: [illegible] of 24oz. [illegible] roll of 24oz. Derby: [illegible] sold to 1s 1d per lb. Wincanton: [illegible] ter: 1s 1d to 1s 2d per score.

Thursday.—Devizes: 16 to 18 for a shilling. Birmingham: 12 for 1s. Brigg: [illegible] Penistone: 14 for 1s. Ripon: [illegible] 15 for 1s. Wetherby: 14 or 15 for 1s. Liverpool: The demand is slow and supplies [illegible] unchanged. Cardiff: [illegible] 68 to 70; Welsh ex [illegible] Friday. Manchester: [illegible] classes not pressed for sale [illegible] demand for best kinds [illegible] castle-on-Tyne: Best Danish [illegible] per 120. Glasgow: Eggs: [illegible] to 3s 6d; Danish 6s to 7s; Russian, 4s 3d to 5s 3d. Leith: Prime Danish [illegible] 120. Sandbach: 14 to 15 for 1s. Lincolnwold: 16 to 18 for 1s. Helmsley: 16 or 17 for 1s. Leyburn: 16 for 1s. Lincoln: 14 or 15 for 1s. Otley: 14 or 15 for 1s. Derby: 15 for 1s. [illegible] score. Whitchurch: hen eggs 14 and 15 for 1s; duck eggs 10 and 11 for 1s.; turkey [illegible]

FRUIT AND VEGETABLES.

Covent Garden. Saturday.—Fair arrivals [illegible] and fruit [illegible] supply, and met a good demand. Greenstuffs:—Cabbages, 4s per [illegible] sprouts, 2s per [illegible] to 2s 6d per [illegible] asparagus, 1s 6d to 2s per [illegible] 4s to 6s per dozen bunches. Potatoes [illegible] Kidneys, 6s to 6s 6d; [illegible] Rounds, 5s to 5s 6d; [illegible] Early Puritans, 6s 6d [illegible] Rocks, 8s to 8s 6d; [illegible] Ford Regents, 4s to 5s per [illegible] English [illegible] sieve; English [illegible] French, 1s 6d to [illegible] dozen; [illegible] 6d to [illegible] onions, 1s to 1s 4d [illegible] bunches, 2s to 2s 6d per [illegible]

POTATOES.

Borough and Spitalfields. Saturday.—The [illegible] demand [illegible] Regents: [illegible] 8s; [illegible] Reading: [illegible] 9s; [illegible] Kidneys, 6s 6d to [illegible] 7s 6d; [illegible] to 6s 3d per [illegible]

HOPS.

Canterbury. Saturday. [illegible] some, and the [illegible] to [illegible] the growth [illegible] at 5s to 5s 5s per [illegible] duce are [illegible]

Worcester. Saturday. [illegible] all [illegible] less favourable crop prospects. One growth of over 500 pockets changed hands this week, and some other sales have taken [illegible]

Worcester. Saturday. Reports [illegible] continue [illegible] blight leave [illegible] which is very uneven and backward for this time of the year. The trade is rather quiet, but prices remain very firm, with a tendency to harden, and good sound lots are becoming scarcer. [illegible]

MANURES.

Liverpool. Saturday. [illegible] changed in value excepting East India bone meal, which has [illegible] shipment parcels. There is a quiet demand for feeding stuffs, and the following are the current rates. American linseed cakes are, however, fairly held, and the late advance in linseed [illegible] bid and refused for 100 tons Metzger brand American linseed cake. [illegible] cwt. [illegible] meal, in bags, £4 to £4 5s per ton; kainit, prime 25 per cent. [illegible] £7 10s per ton; linseed cake, English, prime, in bulk, £8 to £8 5s per ton; linseed cake, foreign, round, prime, soft and [illegible]

Winsford Cheshire [illegible] at the works [illegible] rock salt, 8s 6d per ton, for truck loads in bulk.—THE SALT UNION, LIMITED.

Review of the British Corn Trade

DURING THE PAST WEEK

Written exclusively for the Mark Lane Express.

The season is not developing very rapidly or very well. The solar heat of Friday reached 120 degrees *in vacuo*, but the temperature of the week ending the 7th inst. was not quite an average, and the critical period of fertilisation being with us the anxieties of the wheat grower are excited by every high wind or "washing" storm of rain. The fall of the latter for the past half of the year was as follows :—

	This Season.		Fifty Years' Average.
January	2·75	.....	1·89
February	3·81	.....	1·62
March	1·10	.....	1·63
April	0·72	.....	1·80
May	0·98	.....	2·10
June	2·73	.....	1·99
Half-year	12·09	.....	10·94

Since July came in the fall has been just 1 inch, against a daily mean for fifty years of ·071 per diem, or ·497 for seven days. The total fall, therefore, from January 1 to July 7 inclusive, was 13·090 inches, as compared with an average of 11·437 inches. The excess is not at all heavy, but it makes a dry period from July 8 to August 8 of vital importance for the hardening of the grain within the ear. Soft and weak wheat, bad to grind and poor in gluten, would be a far greater calamity to the farmers than a smaller yield per acre if of good milling quality for commanding a prompt sale to millers. This is a feature which agricultural returns cannot give, but is of the greatest importance to farmers.

The recent excitement over the poor prospects of the growing wheat in the American North-West has been mainly due to the need there is of the hard, strong grain grown by this region. The wheat is largely of the Fife variety, and came from Scotland through Canada, but it is grown as a spring crop, and not as a winter one, the severe winter in the North-West being fatal to October or November-sown corns. The price of this wheat ranges 1s. 6d. to 3s. above that of English, and the difference of climate, which adds this important premium to the American, may well be considered for a moment.

The great wheat State of Minnesota is about the size of England, but its climate differs in the colder winter, spring, and autumn, and in the much hotter summer. The following are the average temperatures :

	England. Deg.	Min.		Minnesota. Deg.	Min.
January	38	50	.....	18	45
April	47	20	.....	45	50
July	62	40	.....	70	49
October	50	00	.....	44	14

The finer milling wheat of Minnesota is not the product of a dryer air, as the average rainfall in the State is seven inches more than in England. The importance to quality in wheat of a rapid increase of temperature from April to July appears to be indicated as also the value of 70 degrees, as against 62 degrees, in the July temperature itself. It is possible, however, that more might be done by our own farmers so cultivate types of wheat giving strength and milling quality on a comparatively low summer temperature. The fact of the Scotch type of winter-sown wheat having been converted into an American type of spring sown argues that much may be done. Millers complain that English farmers often neglect the essential requirements of the mill, but we fear that a summer temperature about 70 degrees is the ideal of the wheat plant, and that the regions enjoying that temperature, neither much more nor much less, will continue to have the call on the rest of the wheat-producing world.

The wheat markets from the 3rd to the 7th have been very quiet, but as the week wore on firmness was regained, and the reactionary tendency of June 30th and July 2nd was eliminated, and import on the 6th advanced a penny per cental for some sorts of wheat. The world's crop promise is not good enough to warrant any sound wheat being sold under a thirty shilling level. Present prices thus compare with a year ago :—

Wheat.	London.		Paris.	New York.
1900	31s 0d	....	36s 0d	30s 9d
1899	27s 0d	....	35s 0d	26s 0d

The stocks in the twelve great ports are thus returned :—

1900.	January 1. Qrs.	April 1. Qrs.	July 1. Qrs.
Wheat	1,492,000 ..	802,000 ..	1,380,000
Barley	666 000 ..	513,000 ..	474,000
Oats	604,000 ..	471,000 ..	390,000
Maize	833,000 ..	333,000 ..	392,000
	Sacks.	Sacks.	Sacks.
Flour	863,000 ..	815,000 ..	852,000

The holdings of flour are somewhat formidable for the time of year, as few care to hold much flour in hot weather. The other totals are moderate, and in the case of maize the figures are unexpectedly small. London holds the following quantities of grain :—Wheat, 133,329 qrs. ; barley, 90,099 qrs. ; malt, 1,677 qrs. ; oats, 238,000 qrs. ; rye, 3,199 qrs. ; beans, 7,414 qrs. ; peas, 16,654 qrs. ; maize, 49,962 qrs. ; tares, 542 qrs. ; lentals, 266 qrs. ; linseed, 1,291 qrs. ; rapeseed, 732 qrs. ; cottonseed, 2,327 qrs. ; oilcakes, 6,530 tons ; and flour, 365,000 sacks. As compared with a year ago, the following changes are shown : Increased reserves, rye, beans, peas, tares, cottonseed, and flour ; diminished stocks, wheat, barley, malt, oats, maize, linseed, rapeseed, and oilcake.

The following supplies are now on passage to the U.K. :—

Wheat.	Qrs.
Californian	965,000
American	420,000
Argentine	415,000
Russian	20,000
Australian	240,000
All other countries	15,000
1900—Total for July	2,075,000
1899 " "	2,510,000
1898 " "	2,585,000
1897 " "	781,000
1896 " "	1,731,000

Expectations of spring corn are as follows :—

	Maize. Qrs.	Barley. Qrs.
July 7, 1900	605,000	235,000
"	912,000	175,000
"	679,000	262,000

Of beans there are 9,000 qrs. on passage, of linseed 132,000 qrs., of rapeseed 11,000 qrs., and of cottonseed 36,665 qrs.

The following return shows the shipments o linseed from the four leading sources of supply :—

LINSEED SHIPMENTS.
Half-year Jan. 1 to June 30.

	Qrs.
From Russia	305,000
" America	5,000
" India	986,000
" Argentina	1,116,000
Total	2,412,000
	Qrs.
Same period, 1899	2,724,000
" 1898	2,094,000

The market for spring corn has been dull, but not weak. Cheap and light oats from Russia have been out of favour, and in beans, peas, and lentils nothing worth speaking of has been doing. Maize, however, continues to command a steady retail enquiry ; Persian barley is taken off the hands of importers as soon as it arrives, and even Californian barley, so long neglected, is now not quite so depressed as formerly.

THE BALTIC.

The sales of wheat cargoes have not been numerous, but the following transactions have occurred :—Californian, 31s. 6d. on passage, 32s. prompt shipment ; Walla Walla, 30s., arrived ; New Zealand, 30s. 9d., August shipment ; Argentine, 29s. 3d., August ; Odessa Ghurka, 32s., August, and fine Azima, 34s., October. A cargo of Siberian wheat now loading has been sold for 30s. per qr., and 32s. 3d. is said to be obtainable for No. 1 Northern for August shipment. Maize cargoes are a little firmer, with 24s. paid for Odessa, 19s. 9d. for American, 21s. 3d. for La Plata, and 22s. 3d. for Roumanian. Barley cargoes are in improved request ; 18s. 6d. is paid for Azoff, 17s. 6d. for Persian, and 27s. for fine Californian. Other cargo sales include Larache beans at 27s. 6d., Canadian white peas at 28s., brown Cawnpore rapeseed at 45s., Canadian linseed at 54s., and Bombay poppyseed at 47s. 6d. per qr.

The arrivals of grain and seed-laden vessels at ports-of-call for the week were 1 beans (Larache).

The sailings of grain and seed-laden vessels from ports-of-call for the week were :—1 wheat (Limerick), 2 barley (1 Leith, 1 Mistley) ; total, 3.

Since January 1, 1900, the total arrivals have been 180 wheat, 13 wheat and barley, 6 flour, 8 maize, 1 maize and oats, 21 barley, 14 beans, 6 locust beans, 1 linseed, 2 canaryseed, 5 valonea ; total, 257.

Last year during the same time the arrivals were 166 wheat, 8 flour, 3 maize, 6 barley, 1 barley and beans, 6 beans, 1 locust beans, 4 linseed, 4 canaryseed, and 7 valonea ; total, 206.

FOREIGN CORN TRADE.

The shipments of grain from the chief exporting countries last week were as follows :—

	Wheat. Qrs.	Flour. Sks.	Maize. Qrs.	Barley. Qrs.	Oats. Qrs.
United States ..	240,000	147,000	515,000	40,000	132,000
Russia	111,000	—	45,000	60,000	192,000

Chili	—	—	—	—	—
India	—	—	—	—	—
Australasia	15,000	—	—	—	6,000
Miscellaneous	20,000	5,000	20,000	20,000	10,000
Total ..	694,000	167,000	770,000	124,000	330,000

THIS DAY'S MARKETS.

MARK LANE, MONDAY.

[FIRST REPORT.]

The market to-day was very firm, and at the same time very dull, for, while holders are confident that present prices can, and should be, maintained, buyers do not regard the height of summer as a period when purchases should exceed absolute wants from work to week. All sorts of English and foreign wheat and barley were fully as dear as on the 2nd, but were not dearer from then. Maize was 3d. up for all kinds. Oats were a quiet trade. Muttor peas from India had buyers at 23s., while good Smyrna millet made 38s., and the best French 46s. per qr. Torrified barley has a small sale at 22s. 6d. per 336lbs., and there are a few buyers of Dutch linseed at 54s. per qr. Split Egyptian tentils made 10s. 6d. to 11s. per cental, while the finest Scotch gores (tares) command 64s. and even 66s. per qr.

CLOSE OF THE MARKET.

By Telephone, 2 p.m.

THE MARKET CLOSED WITHOUT FURTHER CHANGES. THERE WERE FAIRLY FREE PURCHASERS OF MAIZE, OF ENGLISH WHEAT AND OATS, AND OF HEAVY NEW ZEALAND OATS, BUT OTHER ARTICLES SOLD SLOWLY.

THE FLOUR TRADE.

MARK LANE, July 9.

There were few changes on hand in flour to-day. Top price 30s., Town Whites, 27s. 6d., made 28s. often asked. Households firm at 24s. 6d. Country flour was very firmly held, finest special patents being quoted at 26s. A fine mixture of 80 per cent. Norfolk with 20 per cent. stronger North-western was probably cheap at 22s. 6d. per sack. The week's arrivals of American include 6,000 sacks or Morrison's Superlative, 2,000 of Ceresota, 6,700 of Washburn's Superlative, and 2,000 of "Star." The first might possibly be quoted at 24s. 6d., Washburn's at 25s. 6d. The popular brand of Iron Duke was firm at a guinea per sack. The general tone of the market for American flour was not very strong, as the fresh shipments cabled are considerable. Hungarian flour offerings include six anchors at 30s. 6d. to 31s., five Roses at 31s., Victoria Empress at 32s., and Five Arrows at 30s. 6d. to 31s. per sack. Finest English makes by Hungarian process come at 28s. 6d. to 29s. per sack. The market for bran and pollard was dull. Rye flour made 20s. 6d. per sack for best, and ground rice had some sale at 9s. 9d. to 10s. per cwt.

LONDON TERM MARKET.

This market is held twice a day at South Sea House, and is open to elected members only. No business except for future delivery is done, and the smallest quantity that can be purchased is 1,000 quarters or 4,800 centals.

The name of the month stands for guaranteed delivery (if required) on or before the last day of that month, and the following have been the prices per cental recently made :—

WHEAT.—		July. s. d.	Aug. s. d.	Oct. s d.	Dec. s. d.
July 2	noon	—	6 9	6 10	6 10
	4 p.m.	—	6 9	6 10	6 10
July 3	noon	—	6 9	6 10	6 10

July 4	noon	—	6 9	6 10	6 10
	4 p.m.	—	6 9	6 10	6 10
July 5	noon	6 9	6 9	6 10	6 10
	4 p.m.	6 8	6 9	6 10	6 10
July 6	noon	6 8	6 9	6 10	6 11
	4 p.m.	6 8	6 9	6 10	6 11
June 7	noon	6 9	6 10	6 11	6 11
To-day	noon	6 9	6 9	6 11	7 10

Maize is firm at 4s. 4d. per cental for July and August deliveries.

The Term Market standard wheat is No. 1 Northern Spring American sold on the Duluth certificate. Other sorts of wheat can be bought at the above prices plus or minus agreed difference between the other sort and the standard quality. Quotations are by the "true hundredweight" or cental of 100lb. We do not give fractions of a penny per cental. Delivery is understood as being guaranteed on or before the last day of the month named in the quotation. The maize quoted on the Term market is flat grain from the United States.

SEEDS.

London, Monday.—Messrs. John Shaw and Sons, seed merchants, of Great Maze Pond, Borough, London, S.E., write that a quiet tone, as usual at this season, now characterizes the seed trade. Further accounts received from America speak badly of the prospects for the new cloverseed crop. Meantime, with German inquiries still prevailing, a very firm feeling for seeds generally pervades the London market. Trefoil favours holders; and higher prices are also asked for Italian ryegrass. Samples continue to arrive of new French trifolium, but hardly any business has resulted therefrom. There is nofresh feature in the trade for birdseeds; mustard and rapeseed unchanged. Blue peas and haricot beans meantime command full rates.

GRAIN AND FLOUR FACTORS' REPORTS.

Wheat moderate arrivals, a slow trade at prices of last week. Flour unchanged. Maize 3d per quarter dearer. Barley and oats unchanged.—COVENTRY, Mark Lane.

The trade for London made offals is firm at full prices, although our country buyers stand off somewhat over the recent advance. However, sellers here are firm for all qualities.—RICHARD DOGGETT, Mark Lane.

Flour.—A quiet trade at last week's prices.—T. S. MEDILL, Mark Lane.

The wheat trade has been very firm at last week's currencies. Feeding stuffs are firm and 3d. dearer on the week. Flour held for rather higher values.—W. P. WOOD AND CO., Mark Lane.

The past has been an exceedingly quiet week in our trade, but all farm seeds are held with much firmness and stocks are unusually light. New French trifolium is of fine quality, but the price asked at present is above the views of buyers. Birdseeds continue dull. Haricots and blue peas are scarce and firm.—JOHN PICARD AND CO., Mark Lane.

Offals: The consumptive demand is very quiet. The improved quotations by millers have lessened the speculative purchasing. Weather warmer and showery.—GREENHILL BROTHERS, Belfast, July 7.

Flour: Since Wednesday the tone of the market has improved, but buyers are still awanting. Quotations for flour are very irregular. Grain: Indian corn firm at 1½d. advance. Beans held for full prices. Canadian oats pressed for sale at 3d. per boll decline. Pease still very scarce. Oatmeal unchanged. Mill stuffs, dull, owing to pressure for deliveries. MCKINNON AND MCDONALD, Glasgow, July 7.

Wheat firm, with a fair business; spring wheat is per cental 1d. dearer, other sorts unchanged. Flour has had a moderate trade since last Tuesday and no change is made in the values of either foreign brands or home milled. Maize, mixed American has again moved well into consumption and holders are firm at ½d. per cental over last Friday's prices; European is quiet but shows little quotable change in prices; River Plate has, however, been in active request at full rates. Barley quietly steady at late rates. Beans in moderate demand and firmly held at recent prices. Peas quiet, about ½d. per cental lower. Oats have had a better demand, and are firmly held at full prices. Oilcake firm at an occasional advance in prices, but buyers do not encourage any improvement in values. Oatmeal firmly held at the quotations, but inactive.—ROSS. T. SMYTH, Liverpool, July 7.

THE BALTIC, MONDAY, 1 p.m.

STATE OF TRADE.

Californian wheat cargoes are rather weak, and white wheat is not so good a trade as red. The best American spring wheat is firmly held, and red Winter for any September shipment is hardly offered. Cargoes of Argentine wheat are steady despite the big shipments since July 1. Maize and barley cargoes are not sought after, and oats are rather depressed. Cottonseed cargoes are better, linseed and rapeseed are unchanged.

BUSINESS DONE.

WHEAT.—No. 1 Northern, 32s, prompt shipment; No. 1 Californian, 31s, prompt shipment; Walla Walla, 30s, prompt shipment; Argentine 28s 6d, August shipment.

MAIZE.—Roumanian, 22s, August shipment; Argentine, 21s, August shipment; American, 19s 9d, August shipment; Odessa, 24s, on passage.

BARLEY.—Persian, 17s 6d arrived, 17s 3d, on passage; Odessa, 19s October shipment; Salonica, 19s 6d, on passage.

OATS.—White Canadian, 15s 6d, July shipment.

PEAS.—White Canadian, 27s 9d, on passage.

COTTONSEED.—Egyptian, £6 7s 6d, prompt shipment.

HOPS.

London (Borough), Monday.—Messrs. W. H. and H. Le May, hop factors, 67, Borough High-street, London, S.E., report: There is more enquiry on the market this morning for hops, and the smallness of the stocks makes it difficult for merchants to find hops to suit their requirements. The aphis blight still continues.

FEEDING STUFFS.

London, Monday.—Linseed Cake: Market for American and Russian is 2s 6d to 5s up. London made 2s 6d dearer. Decorticated cottons are scarce, and 5s up; undecorticated 2s 6d dearer. Linseed is 3d lower on the week.

English linseed cake	£7 17 6	to	8 0 0	ex mill
American Western linseed cake	7 7 6			ex quay
Russian oil cake	7 8 9	to	7 15 0	ex quay
Feeding cake, Samuelson's S.P.F. (10 to 12 p.c. oil)	—			ex warehouse
Decorticated cotton cake	6 12 6	to	6 15 0	ex quay
Decorticated cotton meal	6 10 0			ex quay
London made cotton cake (best)	4 10 0			ex mill
Egyptian cotton cake (in bags)	4 7 6			ex quay
Burton desiccated ale grains (bags included)	4 6 3			on rail, Burton
Rangoon Rice Meal	4 5 0			ex quay
Calcutta linseed in bags, per 410 lbs	7 15 0	to	7 16 0	ex warehouse

—ROBT. AND JOHN HEWETSON.

CATTLE.

Metropolitan Market, Islington.

Monday, [illegible]

	British.	Foreign.
Beasts	1,080	1,080 — 135
Sheep and lambs	—	—
Calves	10	10 — 10
Milch cows	[illegible]	[illegible]

Quotations per stone (cattle this week).

ENGLISH.	Inferior. s. d.	Second. s. d.	First s. d.
Beasts	3 4 —	4 4 —	5 0
Sheep	[illegible]	—	[illegible]
Lambs	5 6 ..	5 10 ..	6 4

Milch cows, per head, £15 to £21 10s.

British arrivals include as follows: [illegible] Counties, 237; Midland, Home and Western Counties, 726; Devon, 30; and Ireland, 87.

There was a [illegible] supply of [illegible] with an increase from the Midlands. [illegible] was firm in value for [illegible] Fat bulls and [illegible] steady demand, [illegible] offers were difficult to [illegible] 59 stores, for which there was little inquiry.

The following are top [illegible] offal):—

	To-day	Last week	Year ago
Herefords	[illegible]	[illegible]	[illegible]
Norfolks	4s 7d to 4s 8d	4s 4d to 4s 8d	[illegible]

5-stone Down lambs	6s 2d to 6s 4d	6s 2d to 6s 4d	[illegible]
8-stone half-bred ditto	5s 10d to 6s 0d	5s 10d to 6s 0d	[illegible]

Calf and pig trade [illegible]

London Central, Monday.—Moderate supplies; trade slow. Beef (carcases), 3s 11d to 4s; hindquarters, 4s 4d to 4s 8d; roastings, 5s to 5s 4d. Sheep: Ewe, 3s 10d to 4s 2d; wether, 4s 10d to 5s 4d; hindquarters [illegible] wether, 5s 10d to 6s 2d. Pigs: Large, 2s 8d to 3s; small, 3s 4d to 3s 8d.

St. Ives (Hunts), Monday.—Beasts 382, sheep and lambs 1,917, pigs 378, horses 3. Beef, 7s 8d to 8s 3d; mutton, 7s 7d to 9s 4d; lamb, 9d to 10d; pork, 6s to 6s 6d. Fat beast good demand, stores slow, fat and store sheep flat; fat and store pigs better trade. Milch cows, fair prices, £13 to £22.

FOREIGN CATTLE.

Liverpool Monday. Trade slow for cattle at [illegible] favour of buyers for all classes. Larger supply of sheep and lambs, slow demand, and prices lower all round. Beef, 7d to 5d; mutton, 8¼d to 5½d per lb; lambs, 8½d to 7d per lb. At market: 631 cattle and 14,638 sheep.

PROVISIONS.

London, Monday.—The arrivals from [illegible] were 2,894 bales bacon, and from foreign ports 10,127 bales bacon. The supply of bacon continues somewhat in excess of demand, and last week prices, although not officially altered, were much in buyers favour [illegible] easier. The market was [illegible] stock left over at the close. Irish, 50s to 60s up to 68s; Danish, 46s to 58s up to 66s; Canadian, 48s to 54s up to 58s. Butter market was slow, and [illegible] generally was quiet, all considering, butters yet too high in price and looking for further reductions. French, 88s to 100s; Danish, 100s to 110s; Irish, 90s to 100s. Lard quiet, unchanged. Irish, 43s to 50s; Danish, 46s; American, 36s to 38s.

The L.C.C. and Spitalfields Market. — After hearing the arguments of Mr. Littler, Q.C., for the Corporation of London, who did not, however, call evidence, a Committee of the House of Lords [illegible] decided over the Bill of the [illegible] claimed to [illegible] County Council of Spitalfields Market, [illegible] vesting the [illegible] Houses of Commons [illegible]

At Athenry, co. Galway, on Monday, there was an average sized [illegible] vailed for bullocks; but heifers met a slow, dragging trade, and a good many [illegible] Calves, best lots, £4 [illegible] class, £3 2s. 6d. to £4; third class, £1 17s. 6d. to £3. Yearlings, second class, £5 5s. to £6 10s.; third class, £3 10s. to £4 5s. Two-year-olds, first class, £10 7s. 6d. to £12 5s.; second class, £7 15s. to £9 10s.; third class, £4 15s. to £6 10s. Three-year-olds, second class, £10 10s. to £12 17s. 6d.; third class, £7 5s. to £9. Springers, second class, £11 to £13; third class, £7 15s. to £9.

LIVE STOCK AND MEAT TRADE REVIEW.

(WRITTEN SPECIALLY FOR THE "MARK LANE EXPRESS.")

Trade in London.

At the Islington Market there was a slight increase in the number of fat beasts on offer, the supply from the Eastern counties, however, being shorter, compensated for with a larger number from the Midland counties, these latter firmly establishing the season for grass-fed beasts, which are now the pick of the market. Fat butchering cows and bulls were in light supply, as also were rough cattle, these latter being most difficult to cash, owing to so many being seized on account of tuberculosis, and for which the buyer gets no compensation; several cases also occurred as regards fat cows, in which no signs whatsoever were noticeable at time of sale. Both prime and second quality fat beasts met with a slow trade, the previous week's rates governing all transactions, business being confined to Monday, there being no demand on Thursday, though a few fresh arrivals were notified. Fat bulls, owing to the small number on sale, fully maintained late rates and early on both market days. At the Foreign Cattle Market (Deptford) there was a fair average supply in regard to number, but best quality to dress about 720lbs. were shorter in number, notwithstanding which no higher rates were obtainable, trade being of a slower nature all round, chiefly owing to the congested state of the dead meat market. The total number of beasts offered for sale on both markets was 4,289, consisting of 1,090 British and 3,199 foreign, these latter comprising 2,450 from the United States and 749 from Canada. The following were the top rates paid per 8lbs. (sinking the offal): -95-stone Herefords, 4s. 10d.; 90-stone polled Norfolks, 4s. 8d.; 100-stone Shorthorn ditto, 4s. 6d. to 4s. 7d.; 100-stone Lincolns, 4s. 6d.; 100-stone ditto, 4s. 4d.; 90-stone States, 4s. 4d. to 4s. 5d.; 110-stone ditto, 4s.; 90-stone Canadians, 4s. 3d.; 100-stone fat cows, 3s. 10d.; 100-stone fat bulls, 3s. 4d. There was a larger supply of both sheep and lambs, especially of the latter, which in consequence met with a slower sale at a decline of from 6d. to 8d. per 8lbs. on Monday, with a still further reduction on Thursday. Best quality wether sheep were steady in value, and met with a steady trade, but other grades favoured the buyer and did not clear on either market day. Ewes were in slacker demand and easier in price; the total number penned at both markets was 13,360 (increase 1,120), consisting of 13,170 British and 190 foreign, these latter arriving from Canada. Best pens made per 8lbs. as follows (sinking the offal):—7½ to 8-stone Downs, 6s. 4d.; 8-stone Scotch, 6s. 4d.; 9-stone Downs, 6s. 2d.; 10-stone ditto, 6s.; 10-stone half-breds, 5s. 8d.; 10-stone Irish, 5s. 6d.; 12-stone Lincolns, 5s. 6d.; 8-stone Canadians, 4s. 2d. to 4s. 4d.; 5-stone fat grass lambs, 6s.; 6-stone halfbreds, 5s. 8d. Calves were in fuller supply and numbered 155, the best of which were firm in value, but other qualities were lower in price and more difficult to cash. Top value 5s. 4d. per 8lbs., sinking the offal.

Trade in the West.

A very satisfactory business continues to be done in the western district, and the big sheep fairs have opened under very encouraging auspices, the prices at Blandford on Thursday, where about 9,000 were penned, followed by the still more important fair next day at Doncaster, when about 16,000 were penned, showing a considerable advance, compared with this time last year, after allowing for the difference in the condition of the sheep, which is by no means so good this season as last, good judges giving it as their opinion that this may be fairly stated at 34s. to 43s. or 44s. And prices were in some respects a trifle better at Dorchester, on Friday, for particular classes of sheep, best lots making another 1s. to 2s. a-head more money. The best flock ewes make about from 45s. to 51s. 6d., and seconds from 3s. to 5s. rise per head. Mutton keeps at 8d. per lb., or a trifle more for the best, and 7½d. for coarser sheep. Lamb, although the season is going on, is showing but little symptoms of giving way in price, best Downs and cross-breds still commanding 9½d. to 10d., with ready sale at the price. The abundance of keep everywhere has given considerable stimulus to the trade in all kinds of store cattle, barreners being eagerly bought up at from £26 to £33 or £34 per pair for useful bullocks in high condition, and miloh beasts are also much dearer, the best milchers being now worth £18 to £22 each. Veal has been scarcely so buoyant as of late, but the pig trade is unusually firm at prices ranging, according to quality, from 8s. 6d. up to 10s. per score for exceptional weights.

Trade in Ireland.

Local and cross-Channel buyers were in good force at last Thursday's Dublin market, but trade was of a disappointing nature. This might be accounted for in the beef department by increased supplies neutralising trade, while values were correspondingly affected. For the nicer qualities of bullocks and heifers no quotable depreciation in prices could be noted, but in heavy and coarse cattle there was a distinct fall of from 10s. to 20s. per head under last week's currencies. But wethers managed to hold their own, but for the other classes of sheep the market was fully 2s. per head down on the week, while wasty, bad sorts were even more depressed. Best wether mutton was worth from 7d. to 7½d.; ewe, 6d. to 6½d.; and inferior, 5d. to 5½d. per lb. Lambs met with a bad market, and reduced values had to be accepted. Pigs in small supply, and with a good attendance of buyers trade was active for all classes of pork at a smart advance in rates.

Trade in Scotland.

John Swan and Sons, Limited, give the following as their report on the above for the current week. The supplies of fat cattle this week have not been quite so large. For the best class of bullocks trade has again been very dear, but the extreme rates of last week have not been maintained. There is not so much demand now from the north and midland English markets. Irish fat cattle are beginning to come over now, and are of good quality. Secondary cattle this week have been 10s. to 20s. a head cheaper, but trade all over has been satisfactory. There have been smaller supplies of fat sheep and lambs offered, and with a good demand young sheep and hoggs have been dear at fully late prices. Ewes, however, have been considerably cheaper. A very good demand for fat lambs has caused higher prices. A small show of fat calves have met a dear trade, while pigs have sold at much more money. In the store market there have been small supplies of sheep, but more than last week, and they have been easily disposed of at late rates. Store cattle have been a very good show, but the excessive price in Ireland is a drawback, farmers being unwilling to pay the high prices. Consequently trade has been slow, and a considerable number left unsold. Some of the best lots of good bullocks and stirks, however, have been sold at good prices. A smaller number of milch cows met a fairly good trade, at about late prices. Quotations:—Top price best beef, 8s. 9d. to 9s. per stone; current, 8s. to 8s. 6d. per stone; mutton from 8½d. to 9½d. per lb.

LONDON.

London Central. Wednesday.—Trade again ruled slow, supplies being on a fair scale. Beef: English, 4s to 4s 2d; American Deptford-killed, 3s 10d to 4s; Liverpool, 3s 8d to 3s 10d; American refrigerated hindquarters, 3s 6d to 3s 10d, average, 3s 8d; forequarters. 2s 8d to 2s 10d. Mutton: Scotch, 5s 4d to 5s 8d; English wethers. 5s 4d; ewes, 4s to 4s 2d; English and Dutch. 4s to 4s 4d per 8lb.

London Central. Friday.—Supplies were on a good scale, but trade remains without improvement. Beef: Scotch, short sides, 4s 8d to 5s; long, 4s 2d to 4s 6d; English, 4s to 4s 2d; American, Deptford killed, 3s 10d to 4s; Liverpool. 3s 8d to 3s 10d; American refrigerated hindquarters, 3s 4d to 3s 10d; forequarters, 2s 7d to 2s 9d. Mutton: Scotch, 5s 2d to 5s 6d; English wethers. 4s 10d to 5s 2d; ewes, 3s 8d to 4s; Canterbury, 3s to 3s 4d; Wellington, 3s to 3s 2d; Sydney and River Plate, 2s 7d to 2s 8d; English lamb, 4s 8d to 5s 4d. Veal: English and Dutch, 4s to 4s 4d. Pork, English, 3s 6d to 3s 10d; and Dutch, 3s 4d to 3s 6d per 8lb.

Islington, Thursday.—A moderate demand was experienced, and prices ruled generally unchanged. Sheep entries were of good extent, but a quiet inquiry existed for both wethers and ewes, at about current rates. 7½ to 8-stone Down wethers, 6s to 6s 2d; 9-stone, 5s 10d to 6s; 10-stone half-breds, 5s 6d; 10-stone Down ewes, 4s 6d to 4s 8d; 11-stone half-bred, 4s 2d to 4s 4d. Lambs met with slow support. 5-stone fat Downs, 5s 10d to 6s. Calves were in good supply, and the best on offer made 5s 4d per 8lb, to sink the offal. Pig trade quiet.

COUNTRY.

Ashford, Tuesday.—Beef trade good at 12s to 12s 6d per score for best steers and heifers, and 11s to 11s 6d for second quality. Small half bred sheep made 5s 4d to 5s 8d per 8lb, and Kents 5s to 5s 4d, while barrens made 4s to 4s 4d per stone. Veal about 5s per stone. Pork a rather better trade, 3 to 8 score animals making 9s to 10s per score.

Basingstoke, Wednesday.—At Raynbird and Sons' sale-yard there was an average attendance of buyers, to meet a supply of 31 fat beasts, 96 calves, 550 fat sheep and lambs, 151 pigs, and 96 head of dairy and store cattle, for which the following prices were realised:—Fat beasts, £14 to £22 10s; calves, 80s to £5; small, 20s to 50s; fat wethers, 41s 6d to 60s; fat ewes, 36s 6d to 42s; fat lambs, 26s 6d to 47s 6d; fat porkers 36s to 51s 6d; store pigs, 11s to 20s; dairy cows, £8 to £19 5s. The short supply of fat beasts included some prime Devon steers, polled Angus heifers, and Shorthorn steers and heifers, which were cleared at about last week's figures. Devon steers made up to £22 15s; Shorthorn steers, £21 5s; do heifers, £17 10s; polled Angus heifers, up to £18 10s; bulls, to £18 10s. There was a good demand for prime quality fat sheep and fat lambs, at fully late rates, and a clearance made; for inferior sheep and lambs there was less demand. Prime quality Hants Down wethers and ewes made 52s, 60s, 52s 6d, 49s, 43s, 44s; 18-months old ditto, 54s 6d, 49s 6d, 56s, 51s 6d, 47s, 50s, 41s, 46s; Southdown ditto, 50s, 40s; 6 months old Hampshire lambs, 35s, 33s, 31s, 36s. 46s 6d, 38s, 44s, 6d, 40s, 47s 6d, 37s, 32s 6d; 3 months old sucking lambs, 24s, 32s, 30s, 29s 6d, 20s 6d; old ewes, 38s 6d, 36s 6d, 35s 6d, 32s, 34s 6d; Exmoor ewes, 36s; Dorset ewes, 36s 6d; rams, 42s. With an average supply of milch cows on offer, prices ruled high for the best quality cows and heifers. Store cattle were shown in small numbers that met a good demand; fat calves met a fair trade; porkers were cleared at late rates; store pigs, with a better demand, made more money. Ruling values:—Prime Devon and polled Angus beasts, 7d to 7½d; ditto Shorthorn 6½d to 7d; bulls, cows, and inferior 5½d to 6d per lb. Best quality sheep 9d to 9½d; second ditto, 8d to 8½d per lb; old ewes, rams, and inferior sheep, 6d to 7d; choice fat sucking lambs, 9d to 10d per lb. Fat calves, 6d to 8d per lb. Fat porkers, up to to 10s per score.

Boston, Wednesday.—Best beef, 7s 9d; cow beef, 7s to 7s 3d per stone; stores, £10 to £13; growing steers, £7 10s to £9 10s; drapes, £9 to £11; milch cows, £16 10s to £20 10s; in-calf heifers, £16 10s to £18 10s; calves, 60s to 65s; wether mutton, 8d; ewe mutton, 6d; and lamb, 8½d and 9d per lb.

Braintree, Wednesday.—An improving trade was found at Messrs. Balls' auction mart. Prices: Beef, 4s 8d; and mutton, 5s 8d to 6s per stone; pork, 10s 6d per score. Numbers penned: Beasts 45, fat sheep 237, hogs and Londoners very scarce. Store cattle sold well, and store lambs made up to 23s.

Calne.—Present prices for prime pigs, in lots of not less than 10, on rail within 100 miles of Calne:—

Prime stores.	Thickness of fat in any part of the back.	Price per sc.
6 sc 10 lbs to 9 sc 10 lbs	2½ in. and under..	9s 6d
Under 10 sc 10 lbs	Not exceeding 2½ in.	9s 0d
Under 11 sc 10 lbs	Not exceeding 2¾ in.	8s 6d
Under 12 sc	Not exceeding 3 in.	—

Any pigs outside these limits at their value. Half truck, 12 pigs. Whole truck, 25.—CHARLES AND THOMAS HARRIS AND CO., Limited, Calne, Wilts.

Cambridge, Monday.—Beasts, 472; sheep, 345; pigs, 249; horses, 5. Beef, 7s 9d to 8s 3d; mutton, 5s 2d to 6s; pork, 5s 9d to 6s 3d. Larger show. Store beast trade not quite so good. Fat beasts, a fair number to hand, prices not quite so good as last week. Fat sheep, a brisk trade, late rates fully maintained. Stores, short supplies. Fat pigs, a little better trade. Stores, a fair trade all round.

Canterbury, Saturday.—Supply short. A few rough ewes and lambs sold at about 27s; young barren sheep ranged up to 6s 6d, and a particularly good lot of lambs averaged 20s 6d. Small offering and slow trade for horned stock.

Carlisle, Saturday.—The supply of Irish store cattle showed a considerable falling off in numbers, but among the beasts shown were some heifers of extraordinary proportions. The attendance of buyers was about the average of the past few weeks, and a good demand was experienced. Small beasts changed hands at £5 5s to £8 10s; better sorts to £10 10s, and the best specimens to £17. Fair show of young pigs, and a quieter sale at 23s to 26s each.

Dorchester, Saturday.—Rates firm. Best fat bullocks, 1s 6d per score, or up to £23 each. Wethers up to 50s each, or 8d per lb; ewes 7d to 7½d. Best lamb, 10d to 10½d per lb., or 36s 6d each. Store cattle £24 per pair for barreners, and up to £20 for milchers.

Dublin, Thursday.—With 321 more cattle on offer, and a weaker report of trade from across the Channel, the prices showed a drooping tendency this morning, and buyers secured their wants on better terms. Slow trade for sheep and lambs at lower prices; choice aged wethers and fancy light weights only bringing late rates. Cattle (1st class), 32s to 36s per cwt. Rough descriptions, 28s to 31s 6d per cwt. Mutton, 5½d to 7½d per lb. Lambs, 16s to 36s each.—GANLY, SONS, AND CO.

Dumfries, Wednesday.—Beef in good demand at rates similar to late markets. Horned bullocks, to £17; ditto heifers, to £14 10s; polled bullocks, £19 17s 6d; ditto heifers, to £16 10s; blue-grey bullocks, to £21; Ayrshire cows and heifers, to £14. A small show of sheep made late prices.

Edinburgh, Wednesday.—Store sheep good show, fair sale, Cheviot hoggs selling at 28s to 32s 6d; grey-faced ditto, 32s to 38s; half-bred ditto, 34s to 40s. Cattle, good demand; bullocks made to £17, and stirks to £8 10s; shorthorn cows sold to £26 10s; Ayrshires, to £17 10s.

Glasgow, Wednesday.—At market, 731 cattle, 5,763 and lambs. Trade quiet, owing to the hot weather, and the near approach of the Glasgow holidays. Top hogs, clipped, 9d to 9½d; secondary, 8d to 8½d; ewes, 6d to 7½d; lambs, 9½d to 10d per lb. Top Scotch cattle, extreme 70s per cwt; current, 66s to 68s. Dead meat easier; best States beef, 5½ to 6d per lb.

Hereford, Wednesday.—Return of stock brought to the cattle market this day:—Bullocks and cows 510, calves 175, sheep 1,469, lambs 980, pigs (fat and sows) 6, sucking pigs 40, pigs (stores, not more than ten) 145, pigs (stores, more than ten) 49, horses 79, colts 55, donkeys 2. Prices of stock: Best beef, 6d to 7d per lb; wether sheep, 6½d to 8d per lb; ewes, 5½d to 6d per lb; veal, 7d to 8d per lb; lamb, 9½d per lb; pork, 4½d to 5d per lb; bacon, 4d to 5d per lb.

Ipswich, Tuesday.—Messrs. Robt. Bond and Sons report a short supply of fat cattle and a good attendance of distant and local buyers. Trade was brisk, and all the best qualities commanded more money, other descriptions obtained recent values up to £23 15s. Fat lambs sold freely up to 47s. About 3,000 store lambs were offered, and prices ruled firm, making more money than they have hitherto this season. Fat calves sold well up to £4 12s 6d, whilst store calves sold freely up to 65s. Fat swine were short in supply, and more money was obtained. There was a good entry of cows and heifers. A poll cow and calf made up to £21. Numbers at sales and market:—Beasts, 573; sheep, 4,307; calves, 51; swine, 782; horses, 23.

Leicester, Saturday.—Good supply of stock. With fair attendance, trade was steady and prices firm. Choice bullocks made £18 to £20 per head; secondary, £12 to £15; milch cows, £15 to £22. Young stock a slow trade.

Lincoln, Friday.—July fair, but very little more stock than at ordinary market. Milch beasts, £14 to £20; drapes, £8 to £12; three-year old beasts up to £16; two-year-olds, £8 to £12; and yearlings, £5 to £7. The few sheep penned made from 28s to 36s each

Newcastle, Tuesday.—Shorter supply of cattle, prices ranging from 5s 6d to 9s per stone. Fair trade for pork, which rules from 5s to 7s 6d per stone. Sheep, dull trade, averages 6d to 9d; lambs, 8d to 9½d; veal, 5d to 8d per lb. In market:—Cattle, 1,600; sheep and lambs, 8,591; calves, 75; pigs, 475.

Norwich. Saturday.—There was about an average supply of store cattle on offer here to-day, the lots brought forward being principally Shorthorns and Irish. Fat beasts moved off steadily at 7s 6d to 7s 9d per 14lb. Store sheep, which were freely offered, made about former terms, lambs being quoted at 18s to 32s, and keeping shearlings at 36s to 40s per head. Fat sheep were in moderately good demand at 9s to 9s 6d and 10s per 14lb.

Romford, Wednesday.—There was a short supply of fat beasts, and trade was a little better. Best animals made 4s 6d to 4s 8d, and middlings 4s 2d to 4s 4d per stone. Calves were in rather larger supply, and trade was slow, 4s 8d to 5s per stone. Sheep were in short supply, and trade was a little better, best sheep making 5s 8d to 5s 10d per stone. Lambs were in average supply, and trade was very slow, 5s 8d to 6s per stone. A fair demand for the few store beasts on offer. Pig trade was about the same.

Salford, Tuesday.—There was a larger supply of cattle, and a fair demand at late rates. There was a large increase in the number of sheep and lambs on offer, the bulk of the increase being in lambs. Choice small sheep were scarce, and in good demand at last week's rates, prices for other kinds being rather in favour of buyers. Lambs met with a fair sale, but prices were lower. An average show of calves and a slow trade at rather lower prices. Quotations: Cattle, 5d to 7½d; sheep, 7d to 9½d; lambs, 8½d to 9½d; calves, 5½d to 7½d per lb. At market—Cattle, 1,437; sheep and lambs, 14,876; calves, 164.

Shrewsbury, Tuesday.—Store stock better with good demand. Fairly good trade all round with small supplies. Quotations:—Lamb, 7½d to 9½d; beef, 6d to 7½d; mutton, 7½d to 9d; and veal, 7d to 8½d per lb. Porket pigs, 8s to 9s 6d; and bacons, 7s 6d to 9s per score. Cows, with calves, up to £20 10s. Straw up to £2 5s per ton. Number offered:—797 lambs, 465 cattle, 71 cows with calves, 1,304 sheep, 133 calves, 16 fat, 18 porket, and 375 store pigs.

Spalding, Tuesday.—A better supply of beef and a brisk trade, the best making up to 8s 6d per stone. A large number of inferior store beasts, for which there was a slow sale. A clearance was not effected. A good supply of sheep, and plenty of customers. Wether mutton, to 8d: ewe mutton, 6d to 6½d per lb. A short supply of lambs and trade dull.

Stockton, Wednesday.—There were on offer 180 cattle, 10 calves, 370 sheep, 140 lambs, and 221 pigs. Very few good cattle which sold at 8s 6d to 9s 6d per stone: rougher kinds, 7s to 7s 6d; young sheep, 8½d; lambs, 9d to 10d; ewes, 6d to 7d; tups, 5d to 6d; calves, 6d to 7d per lb.

Taunton, Saturday.—Short supply, small attendance, medium trade. Quotations:—Fat wethers, 37s 6d to 42s; fat

ewes, 38s to 40s ; grazing ewes, 32s 6d to 35s ; fat heifers, £14 10s to £17 5s ; fat steers, £15 10s to £18 ; barrens, £5 10s to £11 5s ; cows and calves £11 to £16.

Thame, Tuesday. -This market was rather thinly attended. Farmers remaining at home for hay making, and consequently the supply of stock was not large, but trade was very firm, especially for beef and lamb, and the prices realised were in advance of last week. Mr. Bond's sale comprised 57 fat beasts, 374 fat sheep and lambs and stores, 46 fat and weaning calves, and 136 pigs. Fat bullocks made £17 to £20 2s 6d ; fat heifers £14 to £20 10s ; fat wethers, 45s 6d to 64s ; fat, ewes, 38s to 56s ; fat lambs, 30s to 43s 6d ; store lambs, 26s to 32s 6d ; fat calves, £3 to £4 5s ; cow calves, 31s to 60s ; bull calves, 18s to 52s. Fat pigs, 10s per score. Stores made late prices.

Wakefield, Wednesday.—Slow trade for both beef and mutton, butchers hanging back. Best beef made 7½d per lb ; other qualities 5d to 6d. Lambs, 9d to 10½. Choice small sheep, 8d. Ewes and tups, 6d to 6½d. Fat calves, 5½d to 8d. Fat beasts penned, 1,387 ; sheep and lambs, 4,825.

Wolverhampton, Wednesday.—Beasts a fair supply ; slow trade. Sheep and lambs a large supply ; bad trade. Calves a small supply, fair demand for best. Milch cows a very large supply ; rather slow trade. Good dairy cows from £11 to £16. Beef, 6d to 7½d per lb ; mutton, 6d to 8½d per lb ; lamb, 8d to 9d ; veal, 6½d to 8d. Bacon pigs, 9s 6d to 9s 9d per score ; porkets, 9s 9d to 10s per score ; sows, 7s 6d per score.

Worcester, Saturday.—Fair supplies, but trade quiet. Beef, 6d to 7d ; mutton, 6½d to 8d ; veal, 8d ; and lamb, 8d to 9d per lb.

Worksop, Wednesday.—A large supply of stock all round. Good attendance of buyers, the Sheffield butchers being strongly represented. Beef made fully last week's prices ; best 8s to 9s ; secondary, 7s to 7s 6d per stone. Best shearling mutton, 8d to 8½d ; ewes and other sorts, 5d to 7d. Veal, and lamb, 8d to 10d per lb.

York, Thursday.—Sixty sheets pitched. Trade still slow at last week's rates, namely, good-bred hogg, 8s 6d to 9s ; ditto ewe, 7s to 7s 6d ; twice-crossed hoggs, 8s ; ditto ewe, 7s ; cross-bred hogg, 6s to 7s ; ditto ewe, 5s 6d to 6s. Scotch wool, 4s to 4s 6d a stone of 14½lb.

WOOL.

London, Tuesday. —The fourth series of London sales of Colonial wool commenced to-day, with catalogues comprising — 7,357 bales out of an available total of 283,000 bales. There was an average attendance of buyers and moderate competition. The catalogues consisted mostly of crossbreds, the lowest classes of which met with good demand at barely 5 per cent. decline from May rates. Medium and fine crossbred showed a fall ranging from 5 to 10 per cent. Merino wools were but poorly represented and as far as the small selection allows one to judge sold about 10 to 15 per cent. lower. For Capes there was but little demand, and a large proportion was withdrawn. What was sold ruled 10 to 15 per cent. lower. The list was closed on the 24th May, when the fresh arrivals amounted to 154,813 bales (147,563 bales Australasian and 7,250 bales Cape). Deducting what has been forwarded direct, but adding the wools held over from last series, the total available amounts to 283,000 bales, of which about 95,000 bales are crossbred. As at present arranged the sales will last until the 28th July.—HELMUTH SCHWARTZE AND CO.

London, Wednesday.—Two catalogues were brought forward at public sale this evening, jointly amounting to 6 809 bales and consisting of 357 New South Wales and Queensland, 2,587 Victorian, 119 West Australian, 2,407 New Zealand, 336 Cape and Natal, 972 Falkland Islands, and 30 Punta Arenas. Competition was fair, from a good attendance of buyers, and prices remained at the opening level of yesterday. Queensland greasy combing, G F over Barcaldine, 9d to 9½d. Victorian greasy lambs, marked Salt Creek, 10d to 1s ; greasy combing, W Tulla, 8¾d to 9½d ; lambs, 8¾d ; greasy crossbred Kenilworth, 7d to 10½d. New Zealand—greasy combing Balmoral, 9d to 10¾d ; ditto, of the mark Wor, 1s to 1s 2d.

London, Thursday.—Three catalogues were brought forward at public sale this evening, and together totalled 7,530 bales, comprising 1,157 New South Wales and Queensland, 889 Victorian, 66 South Australian, 19 West Australian, 5,010 New Zealand, and 334 Cape. Good competition was experienced from a full attendance of buyers, and the opening level of prices was fully upheld. Victorian scoured clothing, of the mark Dunlop, 1s 9d to 1s 10d ; broken, 1s 8½d ; combing, marked Toorale, 1s 8½d ; clothing of the same mark, 1s 8½d to 1s 9½d ; scoured lambs, Gibb over Port Phillip, 1s 0½d to 1s 6½d. New Zealand—greasy combing, Marchburn, 9d ; greasy cross-bred, G P D, 6½d to 8¾d. Queensland—greasy combing, A P Co over Bullamon, 7¾d to 9d.

London, Friday.—Two catalogues were brought forward at public sale this evening, jointly amounting to 13,200 bales, and comprising 2,623 New South Wales and Queensland, 353 Victorian, 739 Tasmanian, 6,775 New Zealand, 202 Cape, and 2,509 Punta Arenas. Competition from a good attendance of buyers ruled generally brisk at fully late rates. Punta Arenas, however, ruled easier. New South Wales and Queensland greasy combing, of the mark Cocketgedong, sold 9d to 9½d ; ditto marked Paika, 7½d to 9½d ; ditto N.Z. and A. Land Co. over Walhallow, 8½d to 10d ; broken of the same mark, 8d to 9d ; greasy combing Curragundi, 10d. New Zealand—greasy crossbred, Tokomaru, 5¾d to 7½d ; Lincoln, 5¾d to 6½d. Tasmanian—greasy combing, A. Parker, 8½d to 9½d ; crossbred, 6d to 8½d ; combing, Truelands, 8½d to 10d ; ditto H. R. Logan, 9d to 1s.

London, Friday.—Wool, English, per pack of 240 lb—Fleeces, Southdown hoggs, £8 to £11 10s ; half-bred hoggs, £7 to £8 10s ; ditto wethers, £6 10s to £7 10s ; Kent fleeces, £6 to £7 ; Southdown ewes and wethers, £8 to £11 10s ; Leicester ditto, £6 to £7. Colonial, per lb : Victorian, fleece, superior, 1s 9d to 1s 10d ; scoured good, 1s 10d to 2s ; scoured average, 1s 8d to 1s 9d ; greasy average to fair, 11d to 1s ; New South Wales, scoured average, 1s 5½d to 1s 6½d ; greasy average, 9d to 10d ; South Australian, greasy average, 7d to 8d ; New Zealand, scoured average, 1s 6½d to 1s 7½d ; greasy average, 9d to 10d ; Cape scoured superior, 1s 8d to 1s 10d ; fleece average, 10d to 11d ; greasy average, 7½d to 8d ; Natal, scoured, 1s 4d to 1s 4½d ; greasy average, 8d to 8½d. Crossbreds, greasy, Victorian, good to superior, 11½d to 1s 0½d ; New Zealand fine, 10d to 10½d ; ditto medium, 8½d to 9d ; ditto coarse, 5½d to 7d.

London, Saturday.—At public sales this afternoon 7,915 bales were offered, being made up as follows :—769 New South Wales and Queensland, 1,867 Victorian, 168 Tasmanian, 4,709 New Zealand, 379 Cape, and 22 Natal. A fair amount of buyers attended, and good competition prevailed at full prices. New South Wales and Queensland—scoured lambs, 1s 0½d to 1s 2d ; pieces, 1s 6d ; and locks 8½d to 1s 0½d ; greasy combing 7½d to 9d ; pieces, 7¾d to 9d. Victorian—scoured combing 1s 2½d to 1s 6d ; lambs 10½d to 1s 5d ; greasy combing, 7d to 10d ; lambs, 5d to 11d ; clothing, 7¾d ; broken, 7½d to 9d ; crossbred, 7d to 11½d ; Lincoln 6¾d ; necks, 9d to 10d ; bellies, 5½d to 6¾d ; pieces, 5½d to 8d ; locks, 3d to 3½d. Tasmanian—greasy combing, 9d ; crossbred, 6½d to 8½d ; lambs, 8½d ; locks 4d. New Zealand—greasy combing, 5½d to 7¾d ; lambs, 6½d to 7½d ; hoggets 7¾d ; clothing, 6½d ; Lincoln, 5¾d to 6¾d ; necks, 6d ; bellies, 4d to 5½d ; pieces, 3½d to 5½d ; locks, 3½d to 3¾d. Cape—super snow white, 1s 3d to 1s 5½d ; scoured extra snow white, 1s 4½d to 1s 6d ; black, 1s 3d ; grey, 1s ; greasy combing, 6½d to 7d ; super 6d ; and washed fleece super, 8d to 8½d per lb.

Bradford, Thursday.—No improvement in this market. Top makers cannot do business on the present basis, and on the strength of the decline in London, users are asking extravagant things. Wool in the country is so dear that buyers here are not disposed to touch it. In all departments there is quietness and weakness. The same applies very largely to yarns and pieces.

Canterbury, Saturday. Fair amount of business, but prices show no improvement. For Kent fleeces 6d per lb is the top price ; lambs' wool, 4d to 5d per lb ; half-breds, 6d to 7d ; and Downs, from 8d to 10d per lb.

Leicester, Saturday.—Wool market under the influence of the recent London wool sales. At London the prices for the finest qualities have fallen. Spinners keep well employed on old contracts.

FEEDING STUFFS.

London, Thursday.—Linseed.—Moderate shipments, a good demand from crushers, and an advancing oil market have all contributed to advance prices for seed, but at the close the market is 6d below the highest point reached. Linseed oil.—Quiet at slightly improved rates. Linseed cakes are firmer. Rapeseed. Business continues on a limited scale owing to the advanced prices asked. Cottonseed. —Old crop to London in better demand. New crop has also met with some inquiry.—THE PRODUCE BROKERS COMPANY LIMITED.

Mark Lane, Monday. Linseed Cakes : Imports of foreign are small and likely to continue so, whilst the Russian and American markets remain as at present fully 5s per ton above values here. Stocks on spot are nearly exhausted, and holders have again raised quotations in view of the short supply, Russian, American, and English all being held at advanced prices. Cotton cakes.—Spot and forward Egyptians are now quoted at 2s 6d per ton more money, but do not find a ready sale ; English meet a better enquiry at last week's prices. Decorticated only offer in limited quantity, and holders ask an advance of 7s 6d per ton. Rape cakes quiet and unchanged. Maize germ meal.—Arrivals continue small, and needy buyers have to pay last Monday's full prices for American, while English is slightly dearer. Rice meal — Rangoon, in warehouse, is unchanged, as is also July-August shipment.

—PINNOCK BROS., Mark Lane.

Hull, Tuesday.—The trade is rather dull and unsettled to-day. English wheat, though scarce, is 1s per qr lower than last Tuesday, and foreign averages about the same decline in values where business is done. Barley, oats, and beans without alteration from last week. Flat maize scarce and 1s per qr dearer than last Tuesday. Round corn maintains late rates. Linseed.—The market has been firm throughout the week, with gradually improving values. There have been slight fluctuations only in cottonseed since our last. Oil seed cakes.—A quiet market at practically previous rates. Hemp. —No change, firm.—KEIGHLEY MAXSTED AND CO.

WATERLOO ROUND FEEDING CAKES, £6 12s 6d PER TON ; WATERLOO ROUND 97 PER CENT. PURE LINSEED CAKES, £8 17s. 6d. PER TON; WATERLOO ANGLO SHAPE 97 PER CENT. PURE LINSEED CAKES, £8 15s. 0d. PER TON ; WATERLOO 97 PER CENT. PURE EGYPTIAN COTTONSEED CAKES, £4 7s 6d PER TON. ALL F.O.R. HULL.

HAY AND STRAW.

Whitechapel, Saturday.—Arrivals were on a small scale, and evidenced a sustained demand at steady rates. Best clover, 85s to 100s ; inferior, 60s to 75s ; specially picked hay, 87s 6d ; good, 70s to 80s ; inferior, 45s to 60s ; mixture and sainfoin, 50s to 85s ; straw, 25s to 36s per load.

FOREIGN HAY AND STRAW.

London, Saturday.—With a very dull trade and shipments light there is very little doing this week. We quote:—Canadian mixture, 80s ; Dutch and French first cut clover, 82s 6d to 85s ; Dutch and French second cut, none offering ; good Dutch hay, 60s to 65s ; inferior Dutch hay, 57s 6d to 60s ; large bale French wheat straw, 47s 6 l ; small bale French wheat and oat straw, 44s. All these prices are per ton delivered alongside.—FULLER AND PRENTIS, 9 and 10, Great Tower Street, E.C.

POULTRY.

Seasonable Poultry Jottings.

The full strength of the summer sun reminds us that care must be taken to keep the young chickens out of the long grass, especially if it is wet. This gives them colds so soon, and all sorts of evils are likely to arise, such as diarrhœa, roup, and other diseases that are sown in that fatal chill and wet and clammy condition of body which a thorough wetting reduces a chick to.

In spite, however, of this, when the sun has dried the grass, etc., the chickens might be allowed out so that they might range over the ground to pick up any insect life that may be abroad, as although the early morning is the very best time to catch these things in plenty, yet a good many bugs and beetles are abroad during the day, and these and flies the little chickens might do well upon.

Very hot weather is expected just now, and care must be taken or any sudden change, either hot or cold, might upset those chickens that have left the hen, as these are comparatively unprotected, and are not sufficiently strong to bear the strain these changes put upon them.

One thing must be guarded against if the chickens are to do well, and that is the little chicks must not be allowed to roost with the older birds, as this stunts them in their growth, and is fatal to their proper development into strong, healthy birds. These little chickens should have separate sleeping places provided for them, as this will make all the difference in their growth and maturity.

Every poultry house should have a wood fire lighted during the wet weather, so that proper ventilation is provided during the long nights, as a stuffy atmosphere is never good for birds that in their native trees would be subject to only a shelter which provided protection, but not the stifling closeness of a closed up house.

If the young chickens are looking rough, a feather and drooping ; they should be caught and examined, as generally the cause of things is a case of the presence of vermin often in large numbers. Chickens will never do well if infested with the pests as this, and it is well to dust them with insect powder at once, so as to relieve the little things of a cause of much weakness and constant irritation and loss of power.

In spite of the many warnings given we find the question of sharp grit is still sadly neglected, and the poor little chickens suffer most of all through lack of this, because being only very frail they soon fall victims to the clogging of the parts and die off very rapidly. A good supply of sharp grit is really at the source of much of the well-being of the feathered tribes. For the little chickens a little fine grit should be mixed with the soft food in the morning, especially if they do not seem very well, for with that strange fatality of choice that so often accompanies sickness, when not very well the chickens do not pick up this most useful thing, and so perish die for want of it.

It is a capital thing for chickens to give them nettle tea. This is made by boiling up stinging nettles and giving the birds the liquid in which they have been boiled. Of course, town poultry keepers cannot get nettles so well, and these should substitute Epsom salts, a teaspoonful to every seven birds, once in ten days. This cools the chickens' blood and prevents many very tiresome affections, such as feather plucking and other irritant affections that so often pester people who keep fowls in confined runs.

Where covered or open runs are used perches should be put up, about 18in. or 2ft. above the bottom, as the birds like to sit on these and plume themselves, especially when the sun shines in on them, and this prevents them crowding together in little knots all over the run, which is not good for them. Anyone who has been on a farm will have observed how fond the fowls are of perching on a gate, hurd'e, or fence, and pluming themselves, as we have said, and there is a good deal of good in all these habits, which show the instinct of the fowls towards healthy conditions of life.

But low perches are better even than these improvised ones, as hens often break eggs in the oviduct and fowls often have bumble feet through coming down with a "bump" off some high point of vantage.

The fowls should have an abundance of green food during the summer months, as nothing cleanses the blood and gives tone to the systems of live stock like vegetable food of this description.

Contagious Diseases of Animals.

Summary of Returns issued by the Board of Agriculture for the week ending June 30th, 1900.

LIVE STOCK.

OUR PLATE.

The team of horses which form the subject of this week's plate are the property of Mr. F. V. Smythe, of Dunbar Wharf, Limehouse, London, the driver being David Jones. At the London Cart Horse Parade, held in Regent's Park, on June 4th, this team was awarded a first prize. The two pole horses, which are about 20 years old, were bought from the late Mr. Thomas Pain, the well-known horse dealer, at Romford, and have been fourteen years in the firm. The leader has been in the firm's service about five years. That these horses should have worked on the London stones almost continuously for such a long period is very remarkable, and speaks well for the original soundness of constitution and limb. Although they show signs of work, still their appearance is highly satisfactory under the circumstances, and they are even now in good working condition.

STOCK AND SHOW NOTES

By Herdsman.

There is every prospect of the annual show of the Tunbridge Wells and South-Eastern Counties Agricultural Society on the 19th and 20th inst. proving a great success, the weather being now the only uncertain element. The entries in the stock and implement departments have now closed. The large increase in the amount offered in prizes (which will include several handsome and valuable cups) has naturally had the effect of attracting additional entries, and there are gratifying increases in every section, but more especially in the cattle classes, which will include (for the first time at this show) the Aberdeen-Angus breed. Nearly all the former exhibitors have again made entries, and among the new names that will be found in the catalogue we are pleased to notice that of Sir Walter Gilbey, Bart., whose exhibits may be expected to add not a little to the attractions of the horse classes. In this department Mr. H. Livesey, who has not exhibited at this show for the past few years, will again be a competitor, and from the Leyswood stud of Hackneys (which was not represented last year in consequence of the death of its owner, the late Mr. J. W. Temple) a good number of competitors will be forthcoming. A high degree of excellence in the popular Hackney classes is thus already assured.

The Earl of Derby, as president, has made numerous entries, and among other well-known contributors at the Tunbridge Wells Show may be mentioned the Duchess of Newcastle, the Duchess of Marlborough, Countess De La Warr, etc. In the poultry and a few other sections the entries have not yet closed, but we hear they are coming in most satisfactorily. In the implement department there is also a large increase, including several new and interesting features. Mr. A. Blackie will exhibit his patent hop-drying apparatus, and at Messrs. Jesse Ellis and Company's stand will be found a motor trade waggon, and numerous novelties in agricultural and other carts will also be on view. Large collections will also be contributed by Messrs. Bartlett and Fraser (Tunbridge Wells), Mr. J. Baldwin (Wadhurst), Messrs. S. E. Haward and Company, Mr. A. Fowler, and many others, while the carriage section will include such well-known exhibitors as Messrs. Rock, Hawkins and Thorpe, Blyth Bros. (Canterbury), Mr. Ascough, and others. It is also gratifying to learn that through the energy and personal influence of the new secretary (Mr. W. Roper), who is well-known in the district, over a hundred names have been added to the list of members, and altogether things appear to be going well with this old-established society.

I would remind intending exhibitors at the Durham County Agricultural Society's Show that the entries close to-day (Monday), and that there will be no late entries. The show will be held on the racecourse, West Hartlepool, on Wednesday, July 25th, and a very liberal prize schedule has been drawn up. There are classes for Shorthorns, Polled Angus, and dairy cattle; Border Leicester, half-bred Cheviot and Leicester, and Black-faced sheep; agricultural, hunters, Hackneys and harness horses, and ponies, as well as one or two other minor classes. The secretary is Mr. W. Chrystal, Houghton-le-Spring, R.S.O., co. Durham.

The thirty-third annual show of the Merionethshire Agricultural Society will be held at Harlech, on Friday, September 14th, and the prize schedule has just been issued. Liberal class prizes are offered, and, in addition, a number of specials. The entries for stock, etc., close on August 30th, and for jumping and trotting, on September 7th. From the balance sheet for 1899, I see that the society is in a flourishing condition financially, for they have a balance in hand of £161 8s. 3d. The secretary is Mr. E. M. Roberts, Cefntreforisaf, Talsarnau, R.S.O.

I have received a copy of the programme of arrangements for the Lincolnshire Agricultural Society's Show, at Spalding, which opens on Wednesday next, and continues on Thursday and Friday. Given fine weather, the show should prove very successful, as the programme is a most attractive one, and I believe the entries are up to the average. To add to the enjoyment of visitors, the band of H.M. Royal Engineers will give a good selection of music on each day.

I have received a copy of the prize schedule for the Wirral and Birkenhead Agricultural Society's fifty-eighth annual show, which takes place at Birkenhead on Friday, Saturday and Monday, August 3rd, 4th, and 6th. A sum of over £2,800 is offered for competition, which extends over the whole of the usual classes seen at this society's show, the only exception being that owing to the prevalence of swine fever there will be no exhibition of pigs this year. The entries for implements close on Saturday next, July 14th, and for stock, etc., on the following Thursday. Entry forms, prize schedules, etc., can be had of the secretary, Mr. Arthur H. Edwardson, 6, Hamilton Square, Birkenhead.

The tenth annual horse show at Richmond, Surrey, will be held on Friday and Saturday, June 14th and 15th, 1901. Captain Gerald Fitz-Gerald is the secretary and manager.

The Duke of Portland has just added to his stud of thoroughbreds at Welbeck seven pure-bred horses known as Leipzani. These have been procured from the Emperor of Austria, who a short time ago presented the Duke with a couple of mares of the breed named, both pure white. The peculiarity about this breed of horse is that at birth they are iron grey, and gradually turn lighter, until at the age of six years they become pure white. It is the Duke's intention to lay the foundation of a new stud with these horses, which are intended to be used in this country as in Austria as carriage horses only. Those now secured comprise four two-year-olds, two three-year-olds (including one entire), and one mare aged four years. They are beautiful animals, and are as docile as lambs.

Entries for Vol. XXII. of the Shire Stud Book close on Wednesday, August 1st, but post entries at double fees will be received up to Saturday, September 1st. Applications for entry forms, stating the number required for both stallions and mares, should be made to the secretary of the Shire Horse Society, Mr. J. Sloughgrove, 12, Hanover Square, London, W.

On Tuesday, the 24th inst., Messrs. Sexton, Grimwade and Beck, will dispose of a number of pedigree hackneys, belonging to Mr. John Barker, at The Grange Stud, Bishop's Stortford. This will be Mr. Barker's first unreserved sale, and the catalogue comprises all this year's foals and all the fillies up to four years old. Few studs have been more prominently to the front at the leading shows than Mr. Barker's, and this dispersal of all his young stock is sure to be taken advantage of by all those on the look out for show animals. The best known strains of blood are represented, and this year's crop of foals, several of which are by the home stud horse, Wyngelt, are very promising. Wyngelt is by Dangelt out of Lady Wymondham, g dam—2016 Dorothy by Lord Derby II. The animals will be on view, on July 18th, 19th and 20th, or at any time by appointment with the stud groom at the Grange, Bishop's Stortford.

On the day following the above sale, the same auctioneers will dispose of some of Mr. W. Hollin's pedigree hackney ponies, at Berry Hill, Mansfield. Strangely enough, this also is Mr. Hollin's first unreserved sale, and bearing in mind the high prices paid for the mares forming its foundation, and that it has been invariably well represented at the Royal and other leading shows, the sale of so many of the young stock and all the recent winners in saddle and harness should prove attractive. The Sir George strain of blood brought into prominence by Mr. C. W. Wilson occurs on most pages of the catalogue with that of Little Wonder II., the son of his famous mare Snorer. The ponies made to harness are a particularly smart lot and amongst them are some extremely well matched pairs. The sale will commence immediately after a twelve o'clock luncheon.

CATTLE.

Sale of Shorthorns at Waddesdon.

On Thursday Mr. John Thornton conducted a sale of Shorthorns from the famous Waddesdon herd, the property of Miss Alice de Rothschild. The weather was fine, and a fairly good number of buyers put in an appearance at the sale ring. Some remarks on the herd have already appeared in our columns, so that there is no need to enter into details. It will therefore suffice if we say that the herd has been kept hardy and in excellent condition, and that amongst the animals put up for sale were a large number of robust, heavy-fleshed young stock in a good breeding state, suitable either for founding herds or for exportation. Mr. Thornton, before commencing the sale, remarked that he had hoped to have seen a larger company, but haymaking and other things had probably kept them away. The construction of this magnificent estate was the work of the late Baron Ferdinand Rothschild, for twenty-five or twenty-six years ago the whole district around was cut up into larger or smaller farms, and no pains had been spared to construct the magnificent estate which they saw around them. Unique farm buildings had been erected, and a flock of sheep established, thanks to Mr. John Treadwell's stock. The herd of Shorthorns was also established, and was a great credit to Mr. Sims and Mr. Ronald, who was in charge of it. The untimely death of the Baron was a national calamity, for his geniality and kindness endeared him to high and low, rich and poor alike, and his loss had been felt nowhere more acutely than in that village. Mr. Thornton then gave some particulars of the herd, and remarked that Mr. Ronald had had charge of it for twelve years, and it did him great credit to see the manner in which the animals were put forward, not only there, but at the shows. (Hear, hear.)

The total amount realised was £1,752 10s. The brisk bidding for the bull Bashful Youth excited some enthusiasm, and when he was knocked down for 455gs. to go to South America there was considerable applause. The heifer Jessie Elmhurst, which fetched 120gs., also goes to South America. The eighteen cows and calves averaged £34 1s. 3d. each, the twenty heifers £26 4s., and the six bulls £99 4s. 6d. The average for the whole forty-four head was £39 7s. 6d.

The following is a list of prices realised, purchasers' names, etc.: —

COWS AND HEIFERS

Prize, red, c Feb., 1894, s Colossus 58677	Mr. E. Harper	16

Winsome Lord, red and white, c July, 1899, s Lord Ross 72919 .....Mr. Adderbury 14½

Sale of Mr. A. J. Sherriff's Shorthorns

The extensive herd of Shorthorns at Leaside, Hatfield, was dispersed on Friday last, Messrs. J. Thornton and Co. being the auctioneers. The sale took place in fine weather, though there was a high wind. The company was large and representative, including several South American and other agents. The bidding was brisk, especially for the best lots, the "plum" of the sale being Kaserin, a six months old heifer calf, which, after an exciting competition, Sir Blundell Maple secured at 80gs. The sale realised £1,587 12s., which was generally considered very satisfactory. The following are the principal prices:—

COWS AND HEIFERS.

Gs
Lady Fanny, red, c Dec., 1892, s Lord Violet 56103 Capt. Duncombe 27
Jessie Elmhurst 22nd, white, c May, 1894, s Earldom 4th 52811 .....Mr. W. Jackson 17

Transactions in Store Stock.

[*From the Irish Department of Agriculture and Technical Instruction.*]

The fair at Templemore, co. Tipperary, on the 28th ult., was a small one, and very good demand prevailed. Prices: Yearlings, first class, £11 10s.; second class, £5 10s. to £6 15s.; third class, £4 15s. to £5 10s. Two-year-olds, first class, £12 10s. to £13 10s.; second class, £9 10s. to £11 10s.; third class, £7 5s. to £8. Three-year-olds, first class, £15 12s. 6d.; second class, £12 to £12 10s.; third class, £9 10s. Springers, second class, £12 10s. to £14 10s.; third class, £9 10s. to £11 15s. Lambs, first class, £1 8s. to £1 9s.; second class, £1 2s. to £1 6s. Hoggets, first class, £2 to £2 4s.; second class, £1 15s. to £1 19s. 6d.

The fair at Thurles, co. Tipperary, on Tuesday, was rather a small one. There was a good demand for cattle with quality and condition, but thin rough animals were hard to sell. The small supply of lambs met a good demand. Prices: Calves, first class, £3 10s. to £4; second class, £2 5s. to £3. Yearlings, first class, £8 to £9; second class, £6 5s. to £7 15s.; third class, £5 to £5 7s. 6d. Two-year-olds, first class, £11 5s. to £13 10s.; second class, £8 8s. 4d. to £11; third class, £7 to £7 10s. Three-year-olds, second class, £11 10s. to £13 15s. 6d. Springers, first class, £15 to £18 10s.; second class, £12 15s. to £14 10s.; third class, £8. Lambs, first class, £1 6s. to £1 10s.; second class, £1 1s. to £1 5s. Young pigs, eight to ten weeks old, sold at from 18s. to 22s. each.

The fair at Collooney, co. Sligo, on Monday, was a very small one, composed chiefly of springers and calves. There was a good demand for young calves. Prices: Calves, first class, £4 to £5; second class, £2 10s. to £3 10s. Yearlings, first class, £7 15s. to £9; second class, £6 to £7 10s. Two-year-olds, first class, £10 10s. to £12; second class, £8 10s. to £10 5s. Springers, first class, £16 10s. to £18 5s.; second class, £13 15s. to £15 5s. Lambs, first class, £1 6s. to £1 10s.; second class, £1 2s. to £1 4s.

HORSES.

Newmarket Sales.

Several Continental buyers were present this week at the Newmarket bloodstock sales. On Monday many lots changed hands at four figures, and at 3,000gs. Astrology (the dam of Star Shoot and other winners) was knocked down to Mr. Sievier, but it subsequently transpired that the mare was bought in. Among the consignment sent up by the Duke of Westminster, the stallion Grey Leg changed hands at 2,600gs. to Mr. Lewison, the brood mare Sandiway to Mr. Larnach at 2,200gs., and Bright Alice went to the Duke of Devonshire for 1,150gs. For Sterling Merit (with a Persimmon foal) Mr. M. Gurry obtained 2,600gs. from Lord Penrhyn, and Mr. Foxhall Keene went to 2,200gs. for Sandiway (also with a Persimmon foal). Of Mr. J. A. Miller's brood mares, Mr. Sievier was the buyer of St. Ilma (with a Crafton foal) for 1,300gs.

On Tuesday the chief attraction was the dispersal of Mr. J. A. Miller's horses in training. For Innocence there was some smart competition, and she was secured by Mr. Charles Morbey for 3,100gs. Good prices were obtained for most of the other lots. La Uruguaya and the two-year-old daughter of Sainfoin and Miss Preston were booked to Mr. Portman, at 1,700gs. and 1,800gs. respectively, while Mr. W. T. Jones was the last bidder for Nano at 1,700gs.

Perhaps never in their history have the Newmarket sales been associated with such sensational proceedings as those which characterised the disposal of the yearling belonging to the late Duke of Westminster. On Wednesday, all previous records were put in the shade by the stupendous price of 10,000gs. paid by Mr. Robert Sievier for the filly by Persimmon out of Ornament, and 9,100gs. by the Duke of Westminster for the colt by Orme out of Kissing Cup. Mr. Sievier also gave 5,600gs. for the colt by Orme out of Gantlet, and 5,550gs. for the filly by Trenton out of Sandiway, while the Duke of Westminster gave 5,700gs. for the colt by Orme out of Vampire, own brother to Flying Fox. Altogether it was a memorable and extraordinary sale, and the dozen yearlings sent into the ring brought the huge sum of 45,300gs.

The Crabbet Park Arabs.

The twelfth annual sale of the pure Arab mares and mares imported into this country or bred by Mr. Wilfrid Blunt was held on Saturday afternoon in pleasant circumstances at Crabbet Park, where, as usual, Mr. and Lady Anne Blunt entertained a large number of guests to luncheon.

Among the 300 who accepted the invitation were the Marquis and Marchioness of Ailsa, the Comte and Comtesse d'Antigne, the Duke and Duchess of Bassano, Sir William and Lady Boord, Mrs. and Miss Baden-Powell, Lord and Lady Davey, Lady Mary Sackville, Sir Richard and Lady Fortune, Lady Louisa and Miss Fielding, Viscount Hampden, the Dean of Hereford, Susan Countess of Malmesbury, Mr. Lecky, M.P., Lord and Lady Napier of Magdala, Sir Weetman and Lady Pearson, Lady Sherborne, Lord and Lady Windsor, Sir Charles and the Hon. Lady Rivers Wilson. In replying to the toast of his health, which was proposed at luncheon by Viscount Hampden, Mr. Wilfrid Blunt took occasion to refer to Sir W. Gilbey's recent work upon the value of small horses as cavalry remounts. In doing so Mr. Blunt expressed his cordial appreciation of Sir Walter Gilbey's services to horse-breeders and his entire concurrence with the opinions given in his book. For his own part experience had convinced him that the Arab was by far the most suitable cross for the majority of common mares, and especially for the South American type of animal, when the question of military remounts was under consideration, as the pure-bred Arab was above all other members of the equine race possessed of a capacity for enduring privation and fatigue, whilst as a pleasant saddle-horse he knew no superior. Mr. Somerville Tattersall, who conducted the sale, was scarcely so successful as usual in obtaining purchasers for the animals submitted for disposal, as out of the fifteen lots which represented Mr. Blunt's stable only three changed hands, these being the bay stallion Radwan, purchased by Mr. Tooth for 105gs.; the bay stallion Marel, bought by Mr. W. J. Evelyn at 90gs.; and the bay mare Bushra, which went very cheap to Mr. Huested for 100gs. At the same time it must not be supposed that the remaining dozen animals failed to find favour with those present, the truth being that several failed to reach the very substantial reserve prices put upon them. Thus the bay mare Rose Diamond was bought in at 200gs., the bay mare Morjana at 120gs., the two-year-old bay stallion Farsany at 145gs., and the three-year-old bay stallion Mubarah at 110gs., whilst many other almost equally high reserves were reached.

SHEEP.

Sheep Fairs and Sales.

Barnham.

The thirtieth annual lamb sale at Barnham, near Thetford, was held by Messrs. Biddell and Blencowe, on Monday, when about 6,000 sheep and lambs were penned. The consignments were from all the best known and most successful sheep breeders in the district, the lambs being of the high quality for which this sale is noted, some very fine lots of first-class half-breds being included. The consignors included the Duke of Grafton, K.G., his Excellency Earl Cadogan, K.G., Lord Iveagh, Messrs. C. S. Wolton (Ixworth), J. D. Saver (Troston and Hengrave), J. Vavasseur (Kilverstone), H. Smith (Euston), J. Musker (Rushford), G. Symonds (Euston), R. S. Hatten (Hepworth), and Mrs. Palmer (Icklingham). The demand, except for the best lambs, lacked the animation of last year, trade being quite 2s. a head on the year in favour of buyers, of whom the number in attendance was not so large. From two farms of Lord Iveagh's came the best two lambs, which made 35s. 2d., and the next best was his other farm 33s. 6d., whilst from Earl Cadogan's two leading entries the leading figures were respectively 31s., 30s. 6d., and 28s. 6d. The range of prices for lambs were as follows:—First cross, 27s. 6d. to 17s. 2d.; Southdowns, 25s. to 15s. 6d.; Suffolks, 33s. to 16s. 4d.; half-breds, 25s. 6d. to 15s. 2d.

Blandford Summer Fair.

This fair, which has long been regarded as one of the most important for the best class of Dorset

in the country, was held on Thursday, in very favourable weather, when there was an exceptionally heavy supply on offer, nearly 9,000 being penned at sales held by Mr. Ensor (Dorchester) and Messrs. Senior and Godwin (Sturminster and Gillingham). Buyers from over a wide district were very largely represented, and keen competition for the sheep prevailed, and, although the condition compared unfavourably with last year, prices were from 3s. to 5s. in advance of last year's rates. Prices improved materially as the fair advanced. Mr. E. W. Cave (Shapwick) won the chief prize of £5 5s. for best Down ewes penned, Mr. F. W. Castleman (Chettle) securing first of £3 3s. in another class. The best drafts of ewes made 45s. to 49s. 6d., the top price being secured for a grand lot penned by Mr. R. G. Cave, who is serving with the Imperial Yeomanry at the front; plainer drafts, 35s. to 42s.; lambs, best, going up to 33s. 6d., and others as low as 27s. It was an exceptionally good all-round fair, the sheep being all cleared at highly satisfactory rates.

Burgess Hill.

On Thursday St. John's Fair was held at Burgess Hill. The number of sheep and lambs penned was 6,000, some hundreds fewer than last year. There were not many sheep among the number. The lambs, generally speaking, came in good condition, a fine strong lot, speaking well for the season. In the morning many pens sold freely, and some of the best animals were hardly in the wattles before they were sold. Flockmasters were inclined to hold tight to their prices, and the farmers waited in the hope that prices would ease a bit, and thus trade was slow. Those who sold well said it was a capital fair, while those who held tight complained that things were dull. The top price was about 34s., ranging down to 13s.

Diss.

Mr. T. W. Gaze's annual lamb sale at Diss took place on Thursday, when there was the heaviest consignment ever received at this sale, there being catalogued between 15,000 and 16,000 lambs and ewes. Trade was good throughout, the dispersal attracting many buyers from a distance, and it seemed as if the increased entry was followed by a proportionate growth in the demand. Below we give a few of the transactions, which will show the range of prices:—

First-cross: Mr. T. W. Gaze, 100 ewe 32s 9d (top 50, 35s), 90 wether 34s, 60 mixed 27s; Mr. Wilson, Redgrave, 200 mixed 30s 6d (top 100, 32s); Mr. Harris, Brome, 300 mixed 24s 6d; Mr. Blaskett, Fersfield, 300 mixed 31s 10d, 10 ram lambs, 52s 6d; Mr. Barker, Thurston, 80 ewe 25s 6d, 80 wether 26s 6d; Mr. Symonds, Wortham, 200 mixed 27s 3d; Mr. Parke, Pulham, 50 ewe 32s 6d, 50 wether 32s, 100 mixed 25s; Executors Mr. C. T. Norton, 200 mixed 31s 6d (top 100, 35s). Half-bred: Mr. G. H. Wilson, 300 mixed 30s (top 100, 34s); Mr. Biggs, Pulham, 200 mixed 27s 6d; Mr. Symonds, Thedveton, 200 mixed 25s 3d; Mr. Riches, Denham, 200 mixed 23s 7d; Mr. Riches, Mendham, 60 ewe 26s 6d, 60 wethers 27s 6d, 60 mixed 23s 2d; Mr. Leggett, Pulham, 150 mixed 31s 10d (top 100, 34s 6d); the Duke of Norfolk, 100 mixed 26s 6d; Mr. Fulcher, Finningham, 100 mixed 22s 3d; Mr. Davey, Wattisfield, 80 mixed 22s 6d.

Black-faced: Mr. T. W. Gaze, 50 wether 27s; 41 mixed 33s, Suffolk ram lamb 60s; Trustees Mr. E. C. Bailey, 180 ewe 28s 10d (top 60 32s 6d); 180 wether 28s (top 60, 32s); Mr. Jaggard, Thelnetham, 150 ewe 29s 6d (top 50, 33s 6d), 150 wether 28s 8d (top 50, 34s); Mr. Rash, Redgrave, 100 ewe 32s 3d (top 40, 36s 6d, the leading price for any pen of lambs), 10 wether 28s 3d (top 50, 32s 6d); Hon. Charles Hanbury, flock 268, 50 ear-marked ewe 34s, 20 26s 6d, 70 wether 28s; Mr. Westgate, Tibenham, 50 mixed 24s 6d; Mr. Ekins, Wortham, 41 mixed 23s 6d. Southdown lambs: Hon. A. E. Fellowes, M.P., 100 mixed 24s 3d (the only entry of this breed). Black-faced ewes: Mr. Wainwright, Botesdale, 50 maiden shearlings, 58s (top 20, 60s), 100 sucklers, nearly 56s (top 20, 60s); Mr. Wainwright, Ixworth, 50 maiden shearlings, 52s 9d (top 25, 57s), 90 sucklers from 51s to 47s; Mr. Sayer, Troston, 80 shearling 39s 9d; Executors Mr. Woodward, Old Newton, flock 132, 25 shearling 34s 6d. First-cross ewes: Mr. T. W. Gaze, 24 maiden shearling, 52s, 134 sucklers from 51s 6d to 46s 6d; Mr. Nurse, Pulham, 18 2-shear 38s, 80 3-shear 37s 3d; Executors Mr. Miles, Metfield, 80 2-shear 42s; Mr. Self, Tibenham, 80 3-shear 37s; Mr. Hammond, 68 shearling 47s 6d; Mr. Anness, Palgrave, 50 shearling 40s, 12 2-shear 36s 6d. Half-bred ewes: Mr. Sayer, Troston, 40 shearling 38s 9d; Mr. Fisher, Metfield, 68 shearling 41s 6d.

Dorchester.

The July sheep fair at Dorchester took place on Friday, and was the largest ever held at this time of the year, about 16,000 being penned, both of horns and Downs. There was an exceptionally large attendance. The scarcity of sheep in the country gave a considerable tone to the trade, and prices generally were in advance of those realised at Blandford, where the rates showed a rise of from 3s. to 5s. above last year's for the classes of sheep most in demand. Large consignments were bought to go into the neighbouring counties. Down sheep were most in request, although there was a good trade in horns. The top price for Down sheep was 51s. 6d. for a grand pen sold by Messrs. Duke for Mr. Symonds (Monkton), a general run being 36s. to 43s.; Down wether lambs, 27s. to 35s.; cross-bred chilver lambs, 28s. to 33s.; Down chilver lambs, 28s. to 36s. Horns made 44s. up to 50s. for best lots, the highest price being obtained at Mr. Ensor's auction by Mr. Kent (Afflington). Horn wethers, 37s. to 41s.; horn chilver lambs, 28s. to 32s.; horn wether lambs, 24s. to 39s.

Harling.

The annual sale of half-bred lambs held by Messrs. Salter, Simpson and Sons, at Harling, took place on Thursday, and last year's entry, which constituted a record, was exceeded by about 1,000, the numbers penned being some 20,400. So large a dispersal, of course, drew a big company, and a good demand was experienced throughout, the best lambs selling well, whilst for Suffolk ewes, of which there were a noteworthy consignment, there was a sharp competition, six score from Mr. John Symonds, Coney Weston Farm, making the satisfactory average of 60s. 3d. The top price of the sale for lambs was 39s., given for forty Suffolk ewes, bred by Mr. Clement Barker, of Wymondham, and, as regards half-bred lambs, the leading figure was 36s. 6d., at which 100 wether, from the Executors of Mr. P. K. Blofield, Quidenham, were knocked down. Other half-breds sold at prices down to 22s. 9d.; black-faced lambs, from 34s. 9d. to 20s.; Suffolk ewes, from 60s. 3d. to 39s. 6d.; and black-faced ewes, 56s. 3d. to 39s. 2d.

Ipswich.

Messrs. Robert Bond and Sons, on Tuesday, held their third annual lamb sale at Gippeswyk Park, Ipswich, when they brought into the ring 1,348 Suffolk, 694 half-bred, 120 first-cross, and 533 Southdown lambs. There was a very satisfactory attendance of buyers, and trade was somewhat more active than it has been for the past few weeks at Ipswich, prices showing a hardening tendency, especially for the wether lambs. We append details of the business done:—

Southdown lambs, from Mr. A. H. E. Wood, Sudbourne Hall (registered flock), 30 ewe 24s, 50 20s 6d, 30 wether 25s 6d, 150 24s 4d, 40 21s; Mr. W. E. Long, Hurts Hall, Saxmundham, 100 ewe 21s 6d, 100 wether 22s 9d; Mr. A. E. Dawnay, Colne Engaine, 33 wether 24s 6d.

Suffolk lambs, all registered flocks: Mr. W. Forrest, Bentley, 50 wether 24s 6d; Mr. C. A. Creasey, Walton, 100 ear-marked ewe 29s (best 50 31s), 45 21s 6d, 55 wether 27s 6d, 100 25s, 46 18s 6d; Mr. J. G. R. Smyth, Henley, 20 ewe 22s 6d, 50 wether 24s 6d; Mr. Wm. Long, Tattingstone Hall, 150 wether, 27s 2d (best 50 32s), 45 mixed 18s 6d; Mr. J. W. Brittain, Gifford's Hall, 50 ewe 25s, 49 wether 23s; Mr. J. Watkins, Claydon Hall, 40 ewe 35s 6d, 17 24s, 50 wether 30s 6d, 49 25s; Mr. S. Jackson, Kersey Priory, 35 ewe ear-marked 36s (the top price of the sale), 33 28s 6d, 80 wether 25s 6d; Mr. E. F. Quilter, Bentley, 40 ewe 28s 6d, 40 wether 22s, 25 mixed 16s 6d; Mr. C. H. Cordy, Walton, 40 wether 32s, 23 24s; Mr. T. N. Scarfe, Bildeston, 56 mixed 26s 6d; Capt. E. C. Moor, Bealings, 36 ewe, ear-marked, 29s 6d, 24 not ear-marked 21s 6d.

Half-bred lambs: Mr. Wm. Long, 50 31s, 50 26s 6d, 56 21s; Mr. J. A. Chalmers, Felixstowe, 150 23s 6d (best 50 27s 6d); Mr. W. Wilson, Baylham Hall, 150 24s 4d, 30 21s; Mr. R. L. Martin, Offton, 100 27s, 58 22s 6d; Mr. E. Gascoyne Whitaker, Branthan, 40 22s.

First-cross lambs: Mr. W. H. Waspe, Bentley, 80 26s; Mr. J. Fox Habbar, Burstall, 40 28s.

Newmarket.

Mr. George Blencowe's eighteenth annual lamb sale at Newmarket took place on the 29th ult. in sultry weather. The entry, well on for 4,500, was fully up to the average, and for the best lambs there was a perceptible improvement in the trade lately experienced, but for the other lambs the demand was of a dragging character. The consignment consisted almost entirely of Suffolk lambs, no fewer than fourteen of the registered flocks of which were represented. These and the respective prices were as follows:—

Lord North, Kirtling, 38 ewe nearly 24s, 42 wether 23s 6d; Mr. J. E. Clover, Ashley, best 20 ewe 50s 6d (the top figure of the sale), 30 45s 6d, 80 39s 9d, and 33 30s, 120 wether nearly 40s, 46 29s; Mr. Percy Eagle, Risby, 100 ewe over 39s 3d (best 20 43s 6d); Hon. W. F. D. Smith, M.P., Great Thurlow, 20 ewe 40s, 80 34s 6d, 100 wether 33s 3d; Mr. Whiting Staples, Moulton, 81 ewe nearly 27s, 129 wether from 28s 6d to 24s 6d; Mr. C. Morbey, Soham, 80 ewe 29s 8d, 90 wether from 29s to 25s; Mr. S. Taylor, Ashley, 150 wether 33s 2d; Mr. G. W. Slater, Weston Colville, 90 wether 34s 6d to 30s; Mr. E. M. Fyson, Higham, 80 wether 27s 9d; Mr. G. B. Robins, Moulton, 20 ewe 27s, 60 wether 24s 9d; Executors of Mr. H. E. M. Davies, Herringswell, 139 wether from 34s to 18s; Mr. W. V. Paley, Freckenham, 100 wether 25s; Mr. F. W. Cobb, Saxon Street, 60 wether 28s 8d, and Mr. S. A. King, Desning Hall, 100 wether 28s 6d.

Unregistered Suffolk lambs sold as follows:

Mr. G. Jillings, Dalham, 60 ewe, 35s 9d; 200 wether, nearly 29s; S. A. Taylor, Dullingham, 60 ewe, 34s 8d, 71 more from 27s to 20s; Mr. E. W. Bocock, Gazeley, 70 wether, from 28s 6d to 26s; Mr. G. J. Paine, Camois Hall, 70 ewe, from 24s 6d to 20s 6d; 49 wether, 20s 6d; Mr. W. Gardner, Worlington, 100 wether, 30s 6d, 100 ewe, 33s 2d; Mr. W. H. King, Denham, 100 wethers, 28s 3d; Mr. W. Westley, Babraham, 40 ewe, 26s 6d, 34 wether, 23s; Mr. J. F. Westley, Little Wilbraham, 45 wether, from 30s to 25s 6d; Mr. H. W. Day, Bottisham, 20 ewe, 35s 6d; Mr. E. Swan, Ousden, 40 ewe, 32s 6d, 30 wether, 28s; Mr. E. Lunnis, Stradishall, 50 mixed, 23s; and Mr. L. Ambrose, 20 mixed, 28s 6d.

First-cross lambs: Mr. H. B. Praed, Ousden, 150, 24s; Mr. W. Morley, Fordham, 130, from 25s to 17s; Mr. G. Jillings, Dalham, 40, 28s 6d; Mr. S. G. Howard, Kirtling, 100, 25s; Mr. A. Fordham, 30, 26s; and Mr. John Wade, Saxon Street, 50, 32s.

Half-a-dozen Norfolk shearling ewes from The Links, Newmarket, went at 30s 6d, and 20 Southdown lambs, from Mr. C. Morbey, Exning, at 21s.

Sheep Exportations.

Mr. George McKerrow, of Sussex, Waukesha County, Wisconsin, U.S.A., president of the American Oxford Down Record Association, also president of the Wisconsin State Board of Agriculture, has been in England the past nine weeks, with the exception of one week spent at the Paris Exhibition. During this time he has visited several of the largest farmers and stockbreeders, and has been studying English methods. He attended the meeting of the Sheepbreeders' Association at York on June 16th as an accredited delegate representing three American Associations—the Oxford Down, Shropshire, and Southdown. He has also visited six of our largest shows, including the Royal. During his stay he has purchased some choice Oxford Downs and good specimens of other breeds. He will sail from Avonmouth, near Bristol, on the ss. Degama on July 5th for South Quebec Quarantine Station, with seventy-five to ninety head of sheep. Among his purchases are five choicely-bred rams from Mr. James T. Hobbs, including his two-shear first prize Royal (at a long price), nine from the noted flock of Albert Brassey, M.P., four yearling rams, two yearling ewes, two ram lambs, and one ewe lamb. Mr. McKerrow thinks one of the yearling rams will be a hard one to beat, and paid a good price for him. He secured two ram lambs and three ewe lambs from Mr. Thomas W. Jeffery's flock. These, he says, will be winners on the other side; three ram lambs from Mr. John White, of Bampton, and two from Mr. F. J. Wilsdon, Wootton—quite good ones. From Mr. J. C. Eady, of Wellingboro', he secured one of his first prize ewes at Northampton Show, and from the flock of Miss Alice de Rothschild at Waddesdon Manor two yearlings, one two-year-old, two three-year-old ewes, and one yearling wether, which he believes will be among the American winners this fall. He takes out ten yearling ewes from Mr. William Arkell's flock for Mr. Henry Arkell in Canada, and from the flock of Messrs. John Bryan and Sons he gets four very useful well-bred rams, and remarks that some people may be surprised if one of them proves a winner in America. Mr. McKerrow keeps a small flock of Southdowns on one farm, and is taking from the Pagham Harbour Company some fourteen head in all for himself and other breeders in America. Of other breeds he has three Lincolns from Messrs. J. E. Dean and Sons, Dowsby Hall, Bourne; ten Dorsets from Mr. W. R. Flower, of West Stafford, Dorchester; two Hampshire rams from Mr. Joseph Dean, of Chittern, Codford, Wilts; and one Shropshire ram from Mr. R. P. Cooper, of Skinstone. The Shropshire and first prize Dorset ram are for the Wisconsin Agricultural College and Experiment Station with which Mr. McKerrow is officially connected. He says many of these sheep go to breeders to head their flocks or fill up their show pens. His own flocks of Oxford Downs and Southdowns will be represented at the leading American fairs, such as the State shows of Iowa, Minnesota, Wisconsin, Indiana, Illinois, the Great St. Louis Fair, and the International Show to be held at the Union Stock Yards, Chicago, in December. A son of Mr. Albert Brassey's shepherd goes out with him to look after his show flock. Mr. McKerrow, in speaking of Oxfords in America, says they are among the mutton breeds of sheep, and are fast coming to the front. The fact that the open championship at all the greatest American shows has been won by an Oxford has given them prestige. At the World's Fair at Philadelphia in 1876 Freeland, bred by Mr. A. T. Milton Druce and shown by Mr. T. S. Cooper, was champion over all. At the World's Fair in 1893 at Chicago, while there was no open champion prize offered, it was agreed, and so reported in the live stock journals, that Heythrope Prince 2nd, bred by Albert Brassey, Esq., M.P., and shown by Mr. McKerrow, was the outstanding champion of the show; and again at the Omaha Exposition of 1898 an Oxford bred by Mr. James T. Hobbs and shown by Mr. Stone won over all. Many breeders in America are using Oxford rams on grade Shropshire ewes to get more flesh, fleece, size, and square forms, and on long-wool ewes to close up the fleeces, shorten the legs, and produce earlier maturity. Thus the demands are fast increasing for good, thick-set, close-fleeced, and well covered Oxfords.

Wool Fairs and Sales.

Basingstoke.

Messrs. Hugh E. Raynbird and Sons held their twenty-third annual sale of English wool on Tuesday. Consignments of wool from about seventy of the local flockmasters were pitched in bulk in the sheds of their cattle sales yard. There was an increase in the number of fleeces offered for sale; the biddings were brisk for the best lots, but lacked animation for the ordinary ones. As a whole, however, the result of the sale was satisfactory, every lot being sold at the fall of the hammer, with an average advance of about one penny per lb. on the Hampshire Down and Southdown fleeces. Hampshire Down wool making 10d. to 10½d. per lb.; ditto, unwashed, 6½d. to 7½d. per lb.; Southdown, 11½d. to 11⅞d.; ditto, unwashed, 7½d. to 8d. per lb.; Down lambs, wool, 7d. to 7⅞d. per lb.; unwashed Scotch fleeces, 4d. to 4½d.; Exmoor, 5½d. to 5⅞d. per lb.; Dorsets, 7½d. per lb.; Kents, 6d. per lb.; Exmoor lambs, 8½d.; crossbred lambs, 7½d. per lb.

Blandford.

An unusually large company were attracted to Blandford on Saturday, on the occasion of the annual fair, at which over 100,000 fleeces were pitched, and large sales held by Mr. Ensor, Messrs. Duke and Son, and Messrs. Senior and Godwin. The wool here offered is always of great excellence, including, as it does, some of the best Down clips in the country, and also some very good character horses. Beautiful weather prevailed, and a very healthy, sound tone pervaded the business. Staplers paid particular attention to fine grown Downs, and prices were all

round a penny better than last year. Lord Alington (Crichel) made the top figure (12¾d.) for some very choice Southdown fleeces; a more general run for Down fleeces being 10¼d. to 12¼d., Down lamb making 9d. to 11d., and unwashed wools, 7d. to 7½d. In horns fleeces sold from 9d. to 10 l., even lamb making 9d. to 9½d., and unwashed lots 7d. to 7¼d. Everything was speedily cleared.

Chichester.

Mr. O. N. Wyatt, of the firm of Wyatt and Son, the well-known auctioneers, of Chichester, conducted the eleventh annual wool sale at the Corn Exchange, Chichester, on uesday, when there was an unusually large attendance of leading agriculturists from the surrounding district, while the buyers present included many engaged in the wool stapling trade. Owing, doubtless, to the success which attended the sale last year, there was a large increase in the number of entries, the fleeces brought under the hammer numbering about 32,000 (from some of the best Southdown, Sussex, and Hampshire flocks), as compared with 25,000 in 1899. In point of quality, too, the wool fully maintained the high standard always met with at Chichester, and in some cases an improvement in the general condition and cleansing of the fleeces was noticed. Taken all round another highly successful sale has to be recorded, some of the best of the lots fetching higher prices even than on the last occasion. In other cases, however, the amount paid was a little lower than before, so that, perhaps, on the whole, it would be fair to say that the average worked out much about the same as in 1899. The distinction of securing the top price of the day once more fell to the Duke of Richmond and Gordon, whose Goodwood clip from Southdown tegs sold at 1s. 0½d. per lb., and from the ewes and rams at 1s. per lb. His Grace's Lavant wool also realised 1s., while part of his East Dean clip fetched the same price and the other part 11½d. per lb. The Duke's Singleton and Charlton wool went for 11½d. (tegs and rams) and 11½d. (ewes) per lb., and his Selhurst Park fleeces for 11d. (tegs) and 10½d. (ewes). Mr. C. Stride, of Lavant, obtained 11½d. for the clip from his ewes, and General Godman, of Highden, a similar figure for his teg fleeces. The Pagham Harbour Company, Selsey, 11¼d. (ewes and tegs fleeces), Mr. John Harrison, Aldwick, 11¼d. (tegs), Mr. H. Neale, Lidsey, 11¼d. (Dorset tegs), and Mrs. E. H. Upton, Binstead, 11¼d. (tegs and rams). Other lots were sold at prices down to 9d. For unwashed fleeces from 6d. to 7d. per lb. was generally paid.

Glasgow and Leith.

There has not been much activity in the Scotch wool market during June. A waiting attitude is characteristic of both buyers and sellers, pending the opening of the London sales on Tuesday next, and also the result of the important fairs which will be held this month. The first sales of new wool were held in Leith on 6th June, before a smaller number of buyers than usual, and a fair quantity was disposed of, with little alteration in value from the May sales. At the Glasgow sales on 20th, the attendance of buyers was rather under the average, and a moderate amount of whitefaced wool was sold at prices rather in buyers' favour. In blackfaced there was very little done publicly, the rates bid for new hogg and wedder wools being too much under what brokers could accept. Some transactions took place privately afterwards on more reasonable terms, partly for America. There is not much new wool of this class forward yet, and there is no pressure to sell.

	Washed.		Unwashed.

* For Sutherland wool 2d to 2½ l more can be realised.

J. AND W. GREIG.

Bedford.

Bedford Annual Wool Fair took place on Tuesday at the Cattle Market, when, for some reason or other, the wool pitched was very small, even in comparison with several previous bad years. A distinct improvement in price was, however, a mitigating feature, for, against an average of 16s. per tod last year, the average given this year was 18s. 3d., the minimum price given being 17s., and the highest 19s. 6d. There were no long wool fleeces, but of half-breds there were 1,608 tegs, 32 wethers, and 1,890 ewes; whilst of Downs there were 183 tegs and 97 ewes; the total fleeces being 3,810, as against 9,573 last year, and 9,476 in 1897. There were 832 tods 23lb. in weight, as against 2,156 tods 13lb. last year, and 2,149 tods 13lb. in 1897.

Leighton Buzzard.

At this fair held on Friday there were more consignors, and a greater quantity of wool pitched than in the last two years. The fleeces numbered 16,000, as against 12,400 last year. The ruling price was 19s. per tod, but a few lots of choice Down made 20s. 6d. and 21s. The average rate showed an advance of 1s. per tod on last year.

Melton Constable.

On Monday Messrs. Ireland held their first annual sale of lambs at Melton Constable, when 2,750 excellent black faced and half bred were offered. There was a very large attendance of buyers, and business was very brisk, the trade showing an advance of from 3s. to 4s. per head on that experienced at Norwich Market on the preceding Saturday, breeders and flockmasters being well satisfied with the result. Half-bred lambs realised from 18s. 3d. to 42s., and black-faced Suffolk lambs 32s. Oxford ewes made 42s. and 45s., half-bred shearling ewes 46s., and Suffolk shearling ewes 46s. 6d.

Salisbury.

At this important annual fair, which took place on Friday, there was a large attendance of buyers, and the number of fleeces pitched was about the same as last year—viz., 120,000. The prices obtained were in advance of the last fair, in some cases quite a penny more being obtained. Washed wools realised on an average from 9¾d. to 11½d.; the top price was 11¾d. (two lots only). Unwashed wools ranged from 6 l. to 8¼d.

Stratford-on-Avon.

The seventeenth annual sale of English wool took place in the Agricultural Hall, Stratford-on-Avon, on the 30th ult., when about 26,000 fleeces, from most of the leading flocks in the neighbourhood were submitted to competition by Messrs. Hutchings and Deer. Buyers attended from Bradford, Halifax, Leicester, Kidderminster, and other places, and the prices showed an improvement on most of this season's sales. Compared with last year the average advance was 1¼d. per lb. Some of the best lots in Saturday's sale made 10¾d., others 9¾d. and 9½d., and 8d. to 8¾d.

Swindon Wool Sale.

The 25th annual sale took place on Thursday. There were 25,000 fleeces pitched, an increase of 2,000 on last year. Wool was in improved condition, and commanded an advance of ½d. to 1d. per lb., prices being 7d. to 11d. per lb. for Down wool and 7½d. to 8½d. for half-bred wool.

PIGS.

Sale of the Highclere Berkshires.

One of the best lot of Berkshire pigs that have been offered to the public during recent years were sold by auction on Friday last, when Messrs. John Thornton and Co. disposed of Lord Carnarvon's herd at Highclere, near Newbury. This famous herd is well known, many of the pigs having been exhibited with great success under the able supervision of Mr. W. T. Hall. The whole stock was in prime condition, and there was hardly a faulty lot in the sale. There was a large company present, most of the principal breeders being there or represented by their various agents. The gem of the sale was the sow, Hockey, who was purchased for Mr. R. W. Hudson for 28gs. The entire herd of ninety pigs realised £683 11s., being an average price of £7 12s. each.

We give below a sale list:—

	Gs.
Rightaway 6773, boar, f Sept., 1893, s Highclere Boy 4453 ..... Mr. E. Hayter	3
Stratton Lizzie 4th, 6226, sow, f Dec., 1894, s Stratton Natty 4483 ..... Mr C. Aldridge	4½
Holyrood 20th 6259, sow, f August, 1895, s Hornecastle 5616 ..... Mr. E. Hayter	6
Cairo 6918, boar, f Feb., 1896, s Dr. Jameson 5513 ..... Mr. E. Burbidge	3
Highclere Jean 6927, sow, f Jan., 1896, s Lord Windsor 4932 ..... Mr. E. Asbrey	6
Blenheim 5792, boar, f Feb., 1896, s Swansea 3751 ..... Mr R Swanwick	6½
Colleen 3rd 6169, sow, f August, 1896, s Chanticlere 5446 ..... Mr. J. E. Lawrence	8
Highclere 35th 6272, sow, f Sept., 1896, s Charles I A 5444 ..... Mr. E. Burbidge	5
Highclere Joan 6920, sow, f March, 1897, s Cricketer 5587 ..... Mr. E. P. Smith	4½
Calisto 6921, sow, f June, 1897, s Stratton Teddy 5860 ..... Mr. J. Lay	4½
Drogheda 6923, boar, f July, 1897, s Eastward Ho 6919 ..... Mr. E. Hayter	7
Kestrel 6924, sow, own sister to Drogheda 6923 ..... Mr. E. Asbrey	6½
Blackberry Jam 1925, sow, f August, 1897, s Blackham 5215 ..... Mr. J. Pilling	6½
Hemlock 7182, sow, f Oct., 1897, s Sir Visto 6789 ..... Mr. J. Bevan	6
Highclere Lizzie 6912, sow, f Dec., 1897, s Stratton Teddy 5860 ..... Mr. W. Sheen	5
Kinthury Gem 3rd 7183, sow, f Dec., 1897, s Haddington 6080 ..... Colonel Davison	21
Highclere 39th 6911, sow, f Jan., 1898, s Carrigboy 6269 ..... Mr. T. Chick	6½
Flying Fox 6910, boar, f Feb., 1898, s First Catch F 5925 ..... Mr. E. Burbidge	12
Highclere 54th 7184, sow, f April, 1898, s Magistrate 6175 ..... Mr. J. Lay	4½
Highclere 57th 7185, sow, f April, 1898, s Blenheim 5792 ..... Mr. R. W. Hudson	17
Highclere 52nd 7186, sow, f April, 1898, s Blenheim 5792 ..... Mr. J. Pilling	8½

Lot 86, elt, own sister to Lot 83 ..... Mr. Lucas	7½
Lot 88, boar, own brother to Lot 87 ..... Mr. E. Hayter	7½

Swine Fever in Cheshire.

The Cheshire authorities have been compelled to reinforce the Swine Fever Regulations in consequence of further outbreaks of fever in various parts of the county and the numerous districts which form the Sandbach and Middlewich division, and other divisions are declared infected areas. The regulations come into force to-day. All fairs and markets have again been stopped.

SHOWS.

Norfolk at Downham Market.

For their two-day summer show, the Norfolk Agricultural Association decided to visit Downham Market this year, and the exhibition took place there on Wednesday and Thursday. Downham Market is not very easy of access, but it is well within the important agricultural district of which Lynn is the centre. The town has been visited twice previously—in 1868 and again in 1880. The horses in 1880 were 202, against 320 this year; cattle 146, against 140; sheep 102, against 249; and pigs 34, against 49; whilst at Diss last year they were respectively—horses 277, cattle 127, sheep 273, and swine 53. The weather was bright and warm, and visitors were present in goodly numbers.

Horses.

The Shires always form an important feature in the heavy horse classes at the Norfolk Show, and the prizes were sufficiently liberal to entice contributions from not a few of the best known studs in distant parts of the country. The two-year-old stallions showed up well in point of quality, the first prize going to Mr. R. W. Hudson, Danesfield, Great Marlow, and the second to a grand bay by Royal Stamp V., belonging to Mr. Garrett Taylor, Trowse House, Norwich, the first named taking the five-guinea special offered by Mr. A. W. Soames, M.P., for the best stallion. Mr. F. W. Griffin, Boro' Fen, Peterborough, and Mr. John Rowell, Bury, Huntingdon, were the chief competitors in the yearling class, the former taking the first prize with a youngster by Blythwood Conqueror. Of brood mares we only had at first sight was a grand entry, and two yearling exhibitors competed for the first honour. Sir Walter Gilbey, Bart., who showed his grand mare, Sarah Kitty, and Mr. Fred Crisp, who sent Queen of the Shires, the latter being assigned the premier place. Mr. Arthur Ranson, Hitchin, was first and second in the foal class, one by Cyrano, Royal Harold taking the ten-guinea special offered by Mr. Michael Stock for the best Shire foal in the show. Of three-year-old fillies there were four entries, Mr. F. W. Griffin being first and Mr. R. W. Hudson second. The two-year-old fillies mustered in better numbers, a very choice

Blythwood Conqueror filly, belonging to Sir Walter Gilbey, bearing Mr. John Rowell's Bury Specie, by Yorkshire Ben. Mr. J. T. Cresswell, Aldeby Grange, Beccles, was reserved in this good class for Aldeby Pansy, a very promising filly by Markeaton Royal Prince, which carried off the ten-guinea special prize given by the patron of the society, H.R.H. the Prince of Wales, for the best mare or filly the property of a Norfolk tenant-farmer. It was also awarded the Shire Horse Society's ten-guinea gold medal for the best mare or filly belonging to a resident or occupier of agricultural land in Norfolk. The yearling fillies was about the best filled of all the classes, and the collection was altogether a very choice one, including, as it did, entries by Mr. Fred. Crisp, Mr. R. W. Hudson, the Prince of Wales, and other noted breeders. Mr. Fred Crisp's Girton Smile, by Marmion II., was first.

With regard to the lighter-bred horses, as usual there was a grand show. Of hunting brood mares there was only a small entry, but the quality was tip-top. Mr. Frank Smith, Estate Office, Sudbourn Hall, who was first at the Suffolk Show with his twelve-year-old bay, Blue, was this time beaten by Sir Walter Gilbey, Bart., whose well-known The Witch was assigned the first place. Of hunting mares or geldings there was a much better show. In the class equal to carry not less than 14 stone Mr. R. E. Walford, Ferry Farm, Woodbridge, took the premier position with Little Willie, which, though only second at the Suffolk Show, took the lead here in a strong class. To have beaten a noted shower like Mr. J. H. Stokes, Great Bowden, Market Harboro', may be regarded as a big achievement. Mr. Stokes, however, came to the front in the class for mares or geldings not equal to carry 14 stone, beating Earl Egerton of Tatton, who sent his Magic from the Stud Farm, East Harling. Mr. William Goodwyn's five-year-old, which took first at the Suffolk, was not noticed. The class for four-year-old mares or geldings was a rather weak one, Mr. S. H. Wood, Narford Hall, Swaffham, taking first, and Mr. A. Smith, Saling, Braintree, second with Longford, by Touchstone; while Mr. A. Woolf, West Dereham, was reserved; but the last-named took the Earl of Albemarle's five-guinea special for the best four-year-old hunter bred in Norfolk. Though the class for three-year-old fillies or geldings adapted for hunting was a small, it was an uncommonly good one. Mr. Philip M. Browne, Fornham All Saints, took first prize with his Music, a position taken at the Suffolk last year. Music also carried off the Hunters' Improvement Society's Silver Medal for the best hunter of either sex. There was a magnificent collection of Hackneys, Mr. W. B. Fryer, Browick, being first in two-year-old stallions, and Mr. Garrett Taylor second with Kirby Bedon Royal, by Royal Dane. The first and second prizes in yearlings went to Mr. A. Collen (Saffron Walden) and Mr. Joseph Morton (Stow Bardolph). There were ten entries of brood mares above 15 h.h., Mr. Harry Livesey, Rotherfield, being first, Mr. John Rowell second, and Mr. E. J. Johnstone (Rougham Hall) also taking Earl Egerton of Tatton's special for the best Hackney mare or filly bred in Norfolk, for a handsome chestnut, by Cadet, bred by Mr. Robert Makins, Litcham, and Mr. J. Rowell, the Hackney Horse Society's ten-guinea gold medal. Mr. Harry Livesey was first in the class for brood mares 15 h.h. and under, Mr. E. J. Johnstone second, while the Hon. Charles Hanbury, Beccles, was only reserved for his choice Marigold, by Cadet, first at Eye. Mr. H. Livesey was first with foals, and Mr. H. V. Sherringham, South Creake, second. Mr. E. C. Chapman took the lead in a big class of filly foals, and one shown by the Hon. Charles Hanbury, first at Eye, was highly commended. In the class for three-year-old geldings Mr. H. Livesey again took the lead, his entry taking the special offered by Mr. Geoffrey F. Buxton for the best Hackney mare. The first honours in the two-year-olds went to Mr. Joseph Morton, and he was also awarded the special offered by Mr. L. Hare, M.P., for the best Hackney brood mare or filly; Mr. E. J. Johnstone was second in the class. There was a fairly good show of riding horses, cobs, and ponies. In the class for ponies foaled prior to 1836, not under 13 hands, Mr. George F. Johnson, Woodbridge, was first with Lucy Glitters, by Lord Derby III., a mare of marvellous all-round action, and she was placed in front of Mr. E. Godsell's Jersey Lily, the first prize winner at Peterborough. The harness horses showed off remarkably well. Mr. George Johnson sent Silver King, sire His Majesty. In the double-harness class Mr. George Johnson's splendid pair, Brilliance and Searchlight, were first, but in the tandem class they were beaten by Mr. Godsell's first prize winner at Peterborough.

Cattle.

With respect to cattle, the shorthorns occupied the first place in the catalogue, the Red Polls, which belong especially to the county of Norfolk, being placed second. Some of the best and most prominent breeders of shorthorns in the Eastern Counties entered keenly competitive arena, including H.R.H. the Prince of Wales and Mr. D. Abbott Green. The [illegible] carried off most honours in the class [illegible] especially to go on their own [illegible] by Lord Lavender, beating the Prince of Wales's Pride of Collynie, the son, Lavender Yet, taking the five guinea special offered by Mr. E. R. M. Pratt, for the best shorthorn bull in the show. The pair, the Prince of Wales' exhibit and Mr. D. Abbott Green's Lavender Yet, met at the Bath and West of England Show, where the Prince's bull was first, but the tables were turned this time. In the yearling bull class Mr. J. B. Dimmock, Shotford Hall, took first prize, beating the well-known breeder, Mr. Fredk. Platt, of Barnby Manor, Newark. Mr. C. W. Brierley, Brimfield, was first in bulls calved this year, and to the fore in cows calved previously to or in 1896, in calf or in milk, beating Mr. Fredk. Platt. The latter gentleman had to take a second place in the class for two-year-old heifers, the chief honour going to Mr. J. Deane Willis, Bapton Manor, Cadford, who was also first in yearling heifers. The red polls showed up exceedingly well. Mr. James E. Platt took the lead in the class for bulls calved prior to or in 1897, Mr. R. Harvey Morson being second, and Mr. J. B. Dimmock highly commended. In two-year-old bulls the fight was between two good specimens of the breed, one sent by Lord Amherst of Hackney, and the other by Mr. Alfred J. Smith, of Rendlesham. The judges placed the former in the first position. H.R.H. the Duke of York was first in yearlings, and Mr. James E. Platt first with cows and heifers, Mr. Alfred J. Smith being also a winner in the class for two-year-old heifers. Mr. Platt's bull carried off Lord Hastings' special for the best red polled bull. The Red Polled Society offered prizes for the best cow in milk to be judged for the yield and quality of the milk, and the first prize went to Lord Hastings, and the second to Lord Amherst of Hackney, while Mr. Alfred J. Smith was reserved for his Wonder Pear. The Jerseys mustered well, the principal winners being the Earl of Cadogan, Mrs. McIntosh, and the Duke of Marlborough, the coveted Blythwood Challenge Cup, given for the best Jersey cow in milk, going to Mrs. McIntosh.

Sheep and Pigs.

The show of sheep was, on the whole, a creditable one, though there was a regrettable absence of those half-bred lambs which have been a rather striking feature at some of the other exhibitions. The Southdowns are generally pretty strong at the Norfolk Show, and the breed was on this occasion well represented. In the class for shearling rams, it was a close tussle between two grand exhibits, one belonging to Earl Cadogan and the other to H.R.H. the Prince of Wales, the latter being the winner. Earl Cadogan, however, scored against Mr. Jeremiah Colman in the class for three shearling ewes; and Mr. C. R. W. Adeane, Babraham Hall, was first in three ram lambs of the same flock, beating Col. H. M'Calmont, M.P. In the corresponding collection of three ewe lambs of the same flock the Earl of Ellesmere, Stretchworth Park, was the victor, Col. H. M'Calmont, M.P., Cheveley Park, being second. The Southdown Sheep Society's silver medal for the best male Southdown was awarded to Earl Cadogan, and his lordship also took the special offered by the same society for the best pen of female Southdowns. Messrs. S. E. Dean and Sons, Dowsby Hall, Bourne, were the chief prize-takers in long-woolled sheep, and Mr. T. Fulcher, Elmham, and Mr. James P. Case, Binham Abbey, in Oxfords. The black-faced Suffolk showed up exceedingly well. In the class for shearling rams the Earl of Ellesmere took both prizes, Mr. Herbert E. Smith being reserved, while Mr. Thos. Goodchild, of Great Yeldham Hall, was commended. In the first class for three ram lambs of the same flock Mr. Herbert Smith won with the pen which took first prize at the Royal, the second prize going to the Earl of Ellesmere, with his second prize-winners at the Royal, the York judgment being thus upheld. A third prize was awarded to Col. H. M'Calmont, M.P., who was awarded this extra prize on the ground of special merit. The Earl of Ellesmere took both prizes in the class for three shearling ewes of the same flock, the first prize pen being the Royal winners; Mr. Thos. Keeble was reserved. Pens of three ewe lambs of the same flock formed a specially good collection. Mr. Herbert Smith was first with the pen which were placed second at the Royal, but they were first at the Suffolk Show as untrimmed lambs. Colonel Harry M'Calmont was second with a specially good pen, and the judges awarded Mr. S. R. Sherwood a third prize on account of special merit. These were the lambs that were first at the Suffolk Show as trimmed lambs, and first also at the Royal, so that in this case there was rather a reversal of the Royal awards. The whole class was commended. Mr. W. N. Champion gave special prizes for five Suffolk ewe lambs, untrimmed excepting as to squaring tails, and once again Mr. Herbert Smith was to the front; Mr. S. R. Sherwood second, Mr. Thos. Goodchild third. Mr. D. Abbott Green reserved, and Mr. Thomas Keeble commended. The Suffolk Sheep Society offered a champion prize of £10 for the best pen of Suffolk sheep in Classes 77 to 81, and this was taken by the Earl of Ellesmere. Mr. E. R. M. Pratt offered a special five guinea prize for the best pen of not less than three lambs in the show. The contest was between Southdowns and Suffolks. The judges, one a Southdown judge and the other a Suffolk—could not agree, and he decided in favour of the Earl of Ellesmere's Southdowns, Mr. Herbert Smith's Suffolks being reserved.

There were but few pigs, nearly all the prizes going to Mr. J. Jefferson, Chester, and Mr. Sanders Spencer.

Judges.

HORSES

SHIRES: Mr. Henry Smith, Cropwell Butler, Nottingham; Mr. Joseph Topham, Thorney, Peterborough.

HUNTERS: Mr. Maxwell Angas, Wissendine, Oakham; Sir Gilbert Greenall, Walton Hall, Warrington.

HACKNEYS (Breeding): Mr. W. N. Saberton, Chatteris; Mr. Arthur Fewson, Hedon, Hull.

HACKNEYS (Riding and Driving): Mr. T. Mitchell, Eccleshill, Bradford; Mr. R. G. Heaton, Chatteris, Cambs.

CATTLE

SHORTHORN, RED POLLED, AND FAT CATTLE: Mr. A. D. Bruce, Elvetham, Winchfield, Hants; Mr. J. P. Terry, Berry Field, Aylesbury.

JERSEYS: Mr. H. C. Webb, Audley End, Saffron Walden.

RED POLLED MILKING CLASS: Mr. A. D. Bruce.

SHEEP AND PIGS: Mr. H. Penfold, Selsey, Chichester; Mr. S. W. Slater, Dotterel Hall, Balsham, Cambs.

Champion and Special Prizes.

HORSES

Five guineas for the best stallion in Classes 6, 7, and 8: Mr. R. W. Hudson (Danesfield Prince); r, Mr. Garrett Taylor (Right Metal).

£10 10s. for the best mare or filly, not exceeding five years old, the property of a Norfolk tenant farmer: Mr. T. J. Cresswell (Aldeby Pansy); r, Mr. John Riches (Magdalen Lass).

Shire Horse Society's gold medal, for the best mare or filly exhibited in the County Society's Shire Classes, bred by or in the possession of a resident or occupier of agricultural land in the county: Mr. T. J. Cresswell (Albeby Pansy); r, Mr. Garrett Taylor.

£10 10s. for the best Shire foal in the Show: Mr. Arthur Ransom; r, Mr. Arthur Ransom.

£5 5s. for the best four-year-old hunter bred in the county of Norfolk: Mr. A. Woolf (Rufus).

Hunters' Improvement Society's silver medal for the best hunter filly (by a thoroughbred horse or registered hunter sire), not exceeding three years old, and not having won the Society's medal in 1900: Mr. P. M. Browne (Music).

Hunters' Improvement Society's silver medal for the best hunter of either sex and of any age: Mr. P. M. Browne (Music).

£10 for the best Hackney brood mare or filly, the property of a Norfolk tenant farmer: Mr. J. Morton (Mord-Em'ly); r, Mr. E. C. Chapman (Alethorpe Olive).

£10 10s. for the best mare or filly, not exceeding five years old, the property of a Norfolk tenant farmer: Mr. J. Morton (Mord-Em'ly); r, Mr. J. Proctor (Countess Marsh).

£5 5s. for the best Hackney mare or filly bred in the county of Norfolk: Mr. E. J. Johnstone (Alert); r, Mr. J. Morton (Mord-Em'ly).

The Hackney Horse Society's gold medal for the best mare or filly entered, or eligible for entry in the Society's Stud Book: Mr. John Rowell (Bury Bale); r, Mr. E. J. Johnstone (Alert).

£5 5s. for the best Hackney mare in Classes 21, 22, 25, 26, 27, 28, and 29: Mr. H. Livesey (Welcome); r, ditto (Surprise).

CATTLE.

£5 5s. for the best Shorthorn bull in the Show: Mr. D. A. Green (Lavender Yet); r, H.R.H. Prince of Wales (Pride of Collynie).

£5 for the best Red Polled bull: Mr. J. E. Platt (Champion); r, Lord Amherst of Hackney (Redvers).

Red Polled Society's prizes for Dairy cows of the Red Polled breed: 1, Lord Hastings (Davy 87th); 2, Lord Amherst of Hackney (Wax Doll II.); r, Mr. A. J. Smith (Wonder Pear).

Blythwood silver challenge bowl, for the best Jersey cow or heifer, in milk, in any Classes, bred in Great Britain or Ireland: Mrs. C. McIntosh (Havering Moon III.); r, Earl Cadogan (Ladylike).

SHEEP.

Special prizes for five Suffolk ewe lambs, untrimmed except as to squaring tails: 1, Mr. H. E. Smith; 2, Mr. S. R. Sherwood; 3, Mr. T. Goodchild; r, Mr. D. Abbott Green; c, Mr. T. Keeble.

Suffolk Sheep Society's champion prize of £10 for the best pen of Suffolk sheep: Earl of Ellesmere; r, ditto.

The Southdown Sheep Society's silver medal for the best male Southdown in Classes 67 and 68, but is entered or eligible for entry in the Flock Book: Earl Cadogan, K.G.; r, Colonel H. McCalmont, M.P.

£5 5s. for the best pen of not less than three lambs in the Show: Earl of Ellesmere; r, Mr. H. E. Smith.

Class Prizes.

HORSES.

SHIRES.

Stallions, foaled in 1898: 1, Mr. R. W. Hudson, Danesfield, Great Marlow (Danesfield Prince); 2, Mr. Garrett Taylor, Trowes House, Norwich (Right Metal); r, Mr. P. A. Muntz, M.P., Dunsmore, Rugby (Dunsmore Sterling Harold).

Stallions, foaled in 1899: 1, Mr. F. W. Griffin, Boro' Fen, Peterboro' (Boro' Warrior); 2, Mr. John Jowett, Bargo, Huntingdon (Bury General White); r, H.R.H. The Prince of Wales, K.G., Sandringham (Premevilbar); hc, Captain W. H. O. Duncombe, Waresley Park, Sandy (Consul of Waresley).

Brood mares, with foals at foot, or certified to have produced a living foal subsequent to January 1st, 1900: 1, Mr. Fred Crisp, Girton Stud Farm, Cambridge (Queen of the Shires); 2, Sir Walter G. Gilbey, Bart., Lexham Hall, Essex (Saxon Kitty); 3, Captain W. H. O. Duncombe (Lottie Mabel); r, Mr. Garrett Taylor (Hindlip Lady); hc, Mr. F. W. Griffin (Boro' Style); Mr. Watson Failes, Tilney St Lawrence (Keste Freedom).

Shire foals: 1 and 2, Mr. Arthur Ranson, Hitchin; 3, Capt. W. H. O. Duncombe; r, Mr. J. Hunt, Coton; hc, Mr. F. W. Griffin; c, Mr. Richard Allen, St. Germans, and Mr. Alfred Rowell, West Raddon.

Fillies, foaled in 1897: 1, Mr. F. W. Griffin (Boro' Charm); 2, Mr. R. W. Hudson (Markeaton Wild Wave); 3, Mr. A. C. Fountaine, Narford Hall, Swaffham, Norfolk (Hutton Nymph); r, Mr. J. H. Fielding, Town Farm, Woodham Ferris (Mere Bessie).

Fillies, foaled in 1898: 1, Sir Walter Gilbey, Bart (Fenland Lady); 2, Mr. John Rowell (Bury Specie); 3, Mr. A. P. Muntz, M.P.; r, Mr. T. J. Cresswell, Aldeby Grange, Beccles (Aldeby Pansy); hc, Mr. J. H. Fielding (Woodham Bounce).

Fillies, foaled in 1899: 1, Mr. Fred Crisp (Girton Smile); 2, Mr. R. W. Hudson (Markeaton Vanessa); 3, Mr. Garrett Taylor; r, Mr. John Riches (Magdalen Lass); hc, H.R.H. the Prince of Wales, K.G. (Queen's Birthday); Mr. P. M. Muntz, M.P., and Mr. F. W. Griffin (Boro' Beauty).

HUNTERS.

Brood mares adapted for hunting, the property of and occupied to have produced a living foal subsequent to January 1st, 1900: 1, Sir Walter Gilbey, Bart. (The Witch); 2, Mr. Frank S. Smith, Estate Office, Sudbourn Hall, Woodbridge Market (Blue); r, Earl Egerton of Tatton, East Harling (Dora).

Mares or geldings adapted for hunting, equal to carry not less than fourteen stones: 1, Mr. R. E. Walford, Ferry

Farm, Woodbridge (Little Willie); 2, Mr. J. H. Stokes, Great Bowden, Market Harboro'; r, Mr. Abraham Smith, Saling, Braintree.

Mares or geldings, adapted for hunting, not equal to carry 14st.: 1, Mr. J. H. Stokes; 2, Earl Egerton of Tatton (Magic); r, Mr. S. H. Wood, Narford Hall, Swaffham (Silver Wave).

Mares or geldings, foaled in 1896, adapted for hunting: 1, Mr. S. H. Wood (Spartina); 2, Mr. Abraham Smith (Donsford); r, Mr. A. Woolf, The Abbey, West Dereham, Stoke Ferry (Rufus).

Fillies or geldings, foaled in 1897, adapted for hunting: 1, Mr. Philip M. Browne, Fordham All Saints (Music); 2, Exors. of Mr. P. K. Blofield, Quidenham, Attleborough (Mary).

Fillies or geldings, foaled in 1898, adapted for hunting: 1, Mr. C. Kelway-Bamber, Springfield Lodge, Chelmsford (Homely Lass); 2, Mr. A. Woolf (Warrior); r, Mr. Arthur Gayford, White House, East Harling (Playful Manners).

HACKNEYS.

Stallions, foaled in 1898: 1, Mr. W. B. Fryer, Browick Hall, Wymondham; 2, Mr. Garrett Taylor (Kirby Bedon Royal); r, Mr. E. C. Chapman, Stud Farm, Alethorpe, Fakenham (Alethorpe Basil); hc, Mr. Alfred Lewis (Heacham Prince).

Stallions, foaled in 1899: 1, Mr. A. Collen, Hackney Stud, Saffron Walden (Walden Royal Connaught); 2, Mr. J. Morton, Stow, Downham; r, Mr. F. Bedlam, Witchford, Ely, Cambs (Ely Marvel); hc, Mr. J. Rowell (Bury Danegelt); c, Mr. Smith Flanders, Burnt Fen, Soham (King Forest).

Brood mares, above 15 hands high, adapted for breeding Hackneys, with foals at foot, or certified to have produced a living foal subsequent to January 1st, 1900: 1, Mr. Harry Livesey, Rotherfield, Sussex (Surprise); 2, Mr. J. Rowell (Bury Belle); r, Mr. E. J. Johnstone, Rougham Hall, Suffolk (Alert).

Brood mares, 15 hands high and under, adapted for breeding Hackneys, with foals at foot, or certified to have produced a living foal subsequent to January 1st, 1900: 1, Mr. Harry Livesey (La Cigale); 2, Mr. E. J. Johnstone (Polly Ailsa); r, Mr. John Barker, J.P., The Grange, Bishop Stortford (Isoline); hc, Hon. Charles Hanbury, Brockles, Attleborough (Marigold).

Colt foals: 1, Mr. Harry Livesey; 2, Mr. H. V. Sheringham; 3, Mr. Joseph Morton; r, Mr. Joseph Proctor; hc, Mr. J. Proctor; c, Mr. F. Baldam.

Filly foals: 1, Mr. E. C. Chapman, Alethorpe Hilary; 2, Mr. J. Proctor; 3, Mr. J. Rowell; r, Mr. John Barker, J.P.; hc, Hon. C. B. Hanbury (Bame Daisy); c, Mr. E. J. Johnstone, Rougham Hall, Suffolk (Vivacity).

Mares or geldings, foaled in 1897: 1, Mr. Harry Livesey (Welcome); 2, Mr. J. Proctor (Countess Marsh); r, Mr. R. Hussey (Bog Myrtle).

Mares or geldings, foaled in 1898: 1, Mr. J. Morton (Mouldin'ly); 2, Mr. E. J. Johnstone (Qui Vive).

Fillies or geldings, foaled in 1899: 1, Mr. E. C. Chapman; 2, Mr. R. Hussey (Puzzle); r, Mr. C. G. Cooke (Litcham Merry Gal); c, Mr. A. Rowell.

RIDING HORSES.

Riding mares or geldings, above 15 hands high: Mr. F. J. Palmer, Tottenhill, Lynn (Conceit).

Riding mares or geldings, above 14 and not exceeding 15 hands high: 1, Mr. H. W. Jermyn, Silfield, Wymondham (Lent Lily); 2, Mr. Charles Waters, Postwick, Norwich (Postwick Ruby); r, Mr. E. C. Chapman (Alethorpe Pride); hc, Mr. J. Proctor (Sir Doughton).

COBS AND PONIES.

Cobs, weight-carrying, not less than 14 hands nor more than 15 hands high, adapted to carry at least 15st.: 1, Mr. F. J. Palmer (Rapture); 2, Mr. J. W. Pepper, Stamford, Gallihead.

Ponies, foaled prior to 1896, not under 13 hands, nor above 14 hands high: 1, Mr. G. F. Johnson (Lucy Glitters); 2, Mr. E. Godsell, Stroud, Gloucestershire (Jersey Lily); r, Mr. H. Humphrey, Weasenham Hall, Swaffham (Weasenham Molly).

Ponies, foaled in 1896, 1897, or 1898, not under 13 hands nor above 14 hands high: 1, Mr. H. W. Jermyn (Sylvia); 2, Mr. A. J. Christie (Little Bobs).

Ponies, not above 13 hands high: 1, Mr. F. Beldam (Polly); r, Miss A. L. North, Rougham Hall, Norfolk (Mimosa).

Hackneys, cobs, and ponies: 1, Mr. H. W. Jermyn (Lent Lily); 2, Messrs. Eland A. Baxter, Hutton Hackney Stud (Lady Nell); r, Mr. E. Godsell (Norbury Squire); hc, Mr. G. F. Johnson, Woodbridge (Lucy Glitters).

Mares or geldings, above 15 hands high, not exceeding five years old: 1, Mr. G. F. Johnson (Silver King); 2, Mr. H. W. Jermyn (Sir Joseph); r, Mr. J. M. Place, Barton Mills (Barton Girl).

Mares or geldings, above 14 hands and not exceeding 15 hands high, and not under five years old: 1, Messrs. E. and A. Baxter (Hutton Mimosa); 2, Mr. A. Lewis (Heacham Conqueror).

Cobs and ponies not exceeding 14 hands high: 1, Mr. G. F. Johnson (Lucy Glitters); 2, Mr. E. Godsell (Jersey Lily); r, Mr. H. Randall (Bret Harte); c, Miss A. G. North (Mimosa).

Champion Class (in single harness).—Hackneys, cobs, and ponies: 1, Mr. E. Godsell (Heathfield Squire); 2, Mr. G. F. Johnson (Brilliance); r, Mr. A. Lewis (Juggler).

Double harness: 1, Mr. G. F. Johnson (Brilliance, Searchlight).

Tandem teams: 1, Mr. E. Godsell (Norbury Squire and Heathfield Squire); 2, Mr. G. F. Johnson (Brilliance and Searchlight).

Mares or geldings that jump in the cleverest and best form: 1, Mr. F. V. Grange; 2, Mr. Stephen A. Coxon; 3, Mr. Lambert.

Mares or geldings that jump in the cleverest and best form: 1, Mr. A. Daking; 2, Exors. of Mr. P. K. Blofield; 3, Mr. Reynolds.

For mares or geldings that jump in the cleverest and best form, and that have been regularly hunted with hounds in the county of Norfolk: 1, Mr. Brereton; 2, Mr. Lambert; 3, Exors. of P. K. Blofield.

CATTLE.

SHORTHORNS.

Bull, calved previously to or in 1898: 1, Mr. G. D. Abbott, Fingringhoe Hall (Lavender Yet); 2, H.R.H. the Prince of Wales, K.G. (Pride of Collynie); r, Mr. Willis J. Deane, Bapton Manor, Codford (Silver Plate); c, Mr. James H. Fielding (Nottingham's Last).

Bull, calved in 1899: Mr. J. B. Dimmock, Shotford Hall, Harleston (Shotford Star); 2, Mr. F. Platt, Barnby Manor, Newark (Martyrdom).

Bull, calved in 1900: 1, Mr. Chas. W. Brierley, Brimfield, R.S.O., Herefordshire; 2, Mr. T. Stokes, Home Farm, Warmington (Prince of Roses III.); r, Mr. G. D. Abbott (Tendley).

Cow, calved previously to or in 1896, in calf or in milk: 1, Mr. Chas. W. Brierley (Autumn Queen); 2, Mr. F. Platt (Gay Baroness IX.).

Heifer, calved in 1897, in calf or in milk: 1, Mr. C. W. Brierley (Lavender Queen).

Heifer, calved in 1898: 1, Mr. J. Deane Willis (White Heather); 2, Mr. F. Platt (Scottish Waterloo Lass II.); r, Mr. Chas. W. Brierley (Queenly Duchess).

Heifer, calved in 1899: 1, Mr. J. Deane Willis (Victorine).

RED POLLED.

Bull, calved previously to or in 1897: 1, Mr. James E. Platt (Champion); 2, Mr. R. Harvey Mason, Necton Hall, Swaffham (Magician); r, Mr. James E. Platt (Red Knight); hc, Mr. J. B. Dimmock (Wigton).

Bull, calved in 1898: 1, Lord Amherst of Hackney, Didlington Hall, Brandon (Redvers); 2, Mr. A. J. Smith, Rendlesham, Woodbridge (Ready Ray); r, Mr. F. Hugh Eaton-Lake, Framfield Place, Framfield, Uckfield, Sussex (Framfield Prince); hc, Mr. J. Hammond (Davyzon 165th).

Bull, calved in 1899: 1, H.R.H. The Duke of York, K.G.; 2, The Hon. A. E. Fellowes, Hunmanby Hall (Ajax); r, Mr. J. B. Dimmock (Shotford Best Man); hc, Mr. R. Hervey Mason (Defiance); r, Mr. Alfred J. Smith (Eyke Don); hc, Mr. A. J. Smith (New Sirdar).

Cow, calved previously to or in 1896, in calf or in milk: 1, Mr. James E. Platt (Brinhild); 2, Lord Amherst of Hackney (Charmante); r, Lord Amherst of Hackney (Wax Doll II.); hc, The Hon. Charles Hanbury (Duplicate of Oddie).

Heifer, calved in 1897, in calf or in milk: 1, Mr. James E. Platt (Brant); 2, Lord Amherst of Hackney (Jessie Lindrum); r, Mr. James E. Platt (Dodo).

Heifer, calved in 1898: 1, Mr. James E. Platt (Red Lucy); 2, Mr. James E. Platt (Diamond); 3, Lord Amherst of Hackney (Didlington Dora No. 1); 4, Mr. A. J. Smith (Eyke Lily); r, Mr. A. J. Smith (Eyke Lily 1st); c, The Hon. Charles Hanbury (Dolly Dayborn).

Heifer, calved in 1899: 1, Hon. A. E. Fellowes (Ardenil); 2, Mr. James E. Platt (Miss Poppy III.); 3, Mr. James E. Platt (Tiara); 4, Hon. A. E. Fellowes (Aden); r, Hon. A. E. Fellowes (Anthea); hc, Mr. A. J. Smith (Eyke Dairymaid); c, Lord Amherst of Hackney (Pansy V.); and L. ad Hastings, Melton Constable (Midnight).

JERSEYS.

Bull, calved previously to 1899: 1, Mrs. Cyril E. Greenall, Walton Hall, Warrington (Golden Monarch); 2, Earl Cadogan, K.G., Culford Hall, Bury St. Edmunds (Havering Pride); r, Duke of Marlborough, Blenheim Palace, Woodstock (Dewey).

Bull, calved in 1899 or 1900: 1, Mrs. C. McIntosh, Havering Park, Essex (Why Not); 2, Duke of Marlborough (Crescent King); r, Earl Cadogan, K.G. (General Buller); hc, Mrs. C. McIntosh (Hilburton's Prince).

Cow, calved previously to 1897, in calf or in milk: 1, Mr. C. W. Armitage, Woodlands, Northaw, Potters Bar (Pilot's Legacy V.); 2, Mr. C. W. Armitage (Clementine); r, Mrs. Cyril E. Greenall (Berrestord Pride); hc, Earl Cadogan, K.G. (Ladylike).

Heifer, calved in 1897 or 1898, in calf or in milk: 1, Duke of Marlborough (Goldfinder); 2, Mrs. C. McIntosh (Lavish); r, Mrs. C. McIntosh (Havering Moon III.); hc, Mr. C. W. Armitage (Queen's Daughter); and Earl Cadogan, K.G. (Beatrice).

Heifer, calved in 1899 or 1900: 1, Mr. C. W. Armitage (Leylands Sylvia); 2, Earl Cadogan, K.G. (Lady Blucher); r, Duke of Marlborough (Bright Quack); hc, Mr. J. Carson, Crystal Brook Park, Theydon Bois, Essex (Crystal Brook Merry Maid); and Mr. C. W. Armitage (Belle of Leylands).

FAT CATTLE.

Steers, of any breed, not above three years and six months old: 1, Mr. W. Le Neve, Tunstead (Blue Boy); 2, Mr. R. J. Colman, Bracondale Woods, Norwich.

Steers, of any breed, not above two years and six months old: 1, Mr. J. B. Dimmock; 2, Mr. F. J. Palmer, Tottenhill Road, King's Lynn.

Cows, of my age, or heifers, not above two years and six months old: 1, Mr. W. E. Learner, Dilham Hall, Norfolk; 2, Mr. W. Le Neve, Tunstead, Norwich (Mayflower); r, Mr. A. G. Soorer, Flaxman House, Custom, Attleborough.

SHEEP.

SOUTHDOWNS.

Shearling ram: 1, Earl Cadogan, K.G.; 2, H.R.H. the Prince of Wales, K.G.; r, Mr. J. Colman, D.L., J.P., Gatton Park, Surrey; c, Mr. C. R. W. Adeane, Babraham Hall, Cambridgeshire; c (twice), Earl of Ellesmere, Sketchworth Park, Newmarket.

Three shearling ewes of the same flock: 1, Earl of Cadogan, K.G.; 2 and c, Mr. J. Colman, D.L., J.P.

Three ram lambs of the same flock: 1 and r, Mr. C. R. W. Adeane; 2, Col. H. McCalmont, M.P., Cheveley Park; c, Mr. G. Cortauld, Cut Hedge, Halstead, Essex.

Three ewe lambs: 1, Earl of Ellesmere; 2, Col. H. McCalmont, M.P.; r, Mr. G. Cortauld.

LONG WOOLLED.

Shearling ram: 1 and 2, Messrs. S. E. Deane and Sons, Dowshy Hall, Bourne.

Three ram lambs: 1, Messrs. S. E. Deans and Sons.

OXFORDS.

Shearling ram: 1, 2, and r, Mr. T. Fulcher, Elmham.

Three ram lambs: 1 and 2, Mr. James P. Case, Binham Abbey, Wighton, S.O.; r, Mr. G. Street, Maulden Ampthill.

Three ewe lambs: 1 and r, Mr. G. Street; 2, Mr. T. Fulcher.

HAMPSHIRES.

Three ram lambs: 1 and r, Mr. T. Fulcher.

BLACK-FACED SUFFOLK.

Shearling ram: 1 and 2, Earl of Ellesmere; r, Mr. H. E. Smith, The Grange, Walton, Ipswich; c, Mr. T. Goodchild, Great Yeldham Hall, Halstead, Essex.

Three ram lambs of the same flock: 1, Mr. H. E. Smith; 2, Earl of Ellesmere; 3, Col. H. McCalmont, M.P.; r and hc, Mr. Thomas Keeble; c, Mr. S. R. Sherwood, Playford, Ipswich and Mr. D. Abbott Green.

Three shearling ewes of the same flock: 1 and 2, Earl of Ellesmere; r, Mr. T. Keeble.

Three ewe lambs of the same flock: 1, Mr. H. E. Smith; 2, Col. H. McCalmont, M.P.; 3, Mr. S. R. Sherwood; r, Mr. D. Abbott Green; c, Earl of Ellesmere; Mr. T. Goodchild; Major E. W. Baird, Exning House; and Mr. J. W. Eagle, The Hall, Walton-on-Naze.

CROSS-BRED LAMBS.

Five half-bred lambs from a flock of not less than 100 ewes, lambed in the year 1900: 1 and 2, Mr. F. J. Matthews, Bircham, Lynn; r, Major E. W. Baird, Exning House.

PIGS

BERKSHIRES.

Boars, farrowed in 1898 or 1899: 1, Mr. E. J. Morant, Dilton, Boldre, Hants (Dome Jose); 2, Mr. J. Jefferson, Peel Hall, Chester (Peel Royal); r, Mr. J. Jefferson.

Breeding sows, farrowed previously to or in 1899: 1, Mr. J. Jefferson.

Three breeding pigs of the same sex, farrowed in 1900: 1, Mr. J. Jefferson.

LARGE OR MIDDLE WHITES.

Boars, farrowed in 1899 or 1900: 1, Mr. Sanders Spencer, Holywell Manor, St. Ives (Holywell Georgie); 2, Ditto (Holywell Radical).

Breeding sows, farrowed previously to or in 1899: 1, Mr. Sanders Spencer; 2, Mr. G. Manners, Trafalgar Park, Boys, St. Edmunds (Lady Kathleen).

Three breeding pigs of the same sex, farrowed in 1900: 1 and 2, Mr. Sanders Spencer; hc, Mr. George Manners.

TAMWORTHS.

Boars, farrowed in 1898 or 1899: 1, Mr. D. W. Philip, The Ashes, Whitmore, Bromsgrove (Knowle Harebell); 2, Lord Hastings (Melton Goldfinder).

Breeding sows, farrowed previously to or in 1899: 1, Mr. D. W. Philip (Whitmore Royal Empress); 2, Ditto (Whitmore Favourite III.); r, Lord Hastings, Melton.

Three breeding pigs of the same sex, farrowed in 1900: 1, Mr. H. C. Stephens, Cholderton, Salisbury; 2, Lord Hastings; r and hc, Mr. D. W. Philip.

Leicester.

The Leicestershire Agricultural Association's annual exhibition was held on Wednesday and Thursday on the Fremeaux Road Allotment Recreation Ground, and as proved to be in every respect one of the best which has taken place under the auspices of the association. The number of entries was a record, those for horses alone totalling 600, or 70 more than last year. Of the principal classes (Class VI.) entries were in respect of 56 pens in place of 51 on the year, the hunters numbering 117 against 98, the [illegible] 106 against 91, and the [illegible] 180. There were also 12 entries of cattle, as against of 36, and the 47 pens of pigs were 15 more than a year ago. In one department there was a falling off, and that was in the sheep section, there being but 56 pens as compared with 87, a decrease of 31. So far as quality was concerned a considerable improvement was noticeable in all departments. The weather was favourable, and the attendance of visitors exceptionally good.

Light Horses.

As is always the case at Leicester there was a very fine display of hunters, the high standard of previous years being fully maintained. Mr. Stokes, of Great Bowden, Market Harborough, had, of course, a strong team, and he proved well-nigh invincible in the classes in which he competed. With mares and geldings eight years old, up to 15st. and over, he carried off both the first and second prizes with Degas by Downy Bird, and King Bronze by Nimrod. Mayo (the latter, which is [illegible] horse for middle-weight hunters at the Royal. Mr. Skinner, of Desborough, Market Harborough, was second with Nimrod. In the class for hunters made prior to 1897, up to 13st. 7lb. and 15st., Mr. Stokes scored with Good Health, by Toastmaster, and seconded with Benedictine, by Wild Monk, Mr. Custance, of Oakham, dividing the pair with a bay by Jason Morgan. Mr. Stokes was in front in the light weight hunter class with Diamond, by Cedric, a beautiful bay, possessing all the necessary qualifications. Mr. Drage, of Chapel Brampton, Northampton, came second with a nicely set-up gelding by Prince of League, whilst Mr. Danby, of Offchurch, Leamington, was third with his smart Volunteer. The classes for four, three, and two-year-old geldings or fillies, as well as for yearlings, were limited to residents or occupiers of land within the Quorn, Mr. Fernie's, the Belvoir, the Cottesmore, the Atherstone, and the Pytchley Hunts. Mr. Stokes was again first and second in the class for four-year-olds, with Degas by Hanover Jack, and Diamond more. Among the three-year-olds Mr. Wall, of Coleshill, Birmingham was successful with Mastersman, by Master Maurice. At the head of the two-year-olds was a promising gelding by Louis XIII., by St. Simon, shown by Mr. Howkins, of Clifton, Rugby, whilst Messrs. Carr and Crawford, of Gunthorpe, Oakham, were second with Dicky Bird, by Downy Bird, another animal of the proper type. In the yearling class Mr. de Trafford, of Hothorpe, Teddingworth, Rugby, was winner with a beautiful filly by Wildfire, and Mr. Sanders, of Gilmorton, Lutterworth, was second with another quality chestnut filly by Spahi. Mrs. Wilkinson's Lady Grosvenor, from Edwinstone, Newark, continued her brilliant career upon appearing in the ring for mares. She was not beaten last season, and so far during the present one she has scored at Welbeck, the Royal, and Peterborough. In the [illegible] class Mr. Delville, of Houghton Grange, Leicester, was second with Yeoman, by Blinkney; Berry, from the same stable and by the same sire, being second, and the foal of Countess, by Emir, third. My Knight, of Langton, Market Harborough, was the reserve, with Blazer, by Mountain Dew, which was first at Peterborough last week. In a large class of [illegible] not less than 14½ hands, the judges had some trouble in selecting performers before them. They made a good selection in Mr. Stokes' beautiful dark chestnut horse Cherry, by Cherry Ripe, which has had a very successful career. Mr. Goodson's Royal winner, Heathfield Conceit, by Polonius, from Knutsford, had to be content with second place, and another well-known performer in Mr. Apperley's Nobleman, from Cheltenham, occupied the third place. In the class for animals under 14¼ hands, Mr. Foster, of Moseley, Birmingham, won with Mid Valley Queen, a dark chestnut, four years old, which was somewhat fortunate to defeat Mr. Day's Kenley Dagmar, from Crewe, for the latter was second at the Royal. Mr. Haines' Crystal Prince winner, Queen Bee, ridden by Miss Haines, was only able to get third place, but a pony class enabled that owner to win with Tommy Tittlemouse, a [illegible] pony, cleverly performed with them. Mr. Freeman's team, Dandy Dan was second, as he has failed to [illegible] at Royal and Peterborough. [illegible] Miss Haines' ponies reappeared and Mr. Hanbury won with Wee Agnes, [illegible] Mr. Woolf's pony, Fancyless, Pipestone and [illegible] Trevelyan from Bretton, Yorkshire, being second and [illegible] Mr. Godsell's Lord Roby and Duke of York, from Stroud, Gloucestershire, third. Mr. Franklin scored in the [illegible] class with Lord Lieutenant, Mr. Foster's Mid Valley Queen being second, and Mr. Day's Sunshine third.

Shires.

The display of Shire horses was considered to be the best ever seen at the show. The [illegible] was very strong, as the class for four-year-old stallions by [illegible] Royal champions, Heather Hallmaster, which was

however entered, Lord Llangattock supplied a formidable condidate in Hendre Champion by the same sire as the other—namely, Prince Harold. He has not been beaten so far this season, and he has been out at the Oxfordshire and the Bath and West of England Shows. He again got in front on Wednesday. Mr. Muntz was second with Dunsmore John O'Gaunt, by Dunsmore Masterman, a smaller colt, but well built; Mr. Everard, of Leicester, was third was Bardon Baronet, by Bardon Harold. There was a moderate class of mares, three years old. Mr. Parnell, of Rugby, won with Rokeby Judith, by Jeroboam, a very fine big filly, which thus followed up the successes she gained at the Royal and Peterborough. Mr. Smith Carington, of Ashby Folville, Melton Mowbray, was second with Rocks Madan, by Calwich Heirloom. Amongst a large number of splendid two-year-old fillies was Lily of the Valley, by Southgate Honest Tom, which did so well for her breeder, Mr. Goulding, of Whatton-in-the-Vale, last season. She now belongs to Mr. Yerburgh, M.P., of Blackburn. Another beautiful stamp of a filly was second in Mr. Eadie's Lockinge Mistletoe, by Lockinge Albert, from Barrow Hall, Derby. Another Royal winner came to the front in the yearling colt class, this being Lord Llangattock's Victor of Waresley, by Waresley Triumph. Mr. Parnell was second with Lockinge Lord, by Lockinge Albert, and Mr. Mumby third with the brown Dunsmore Combination. Sir W. H. Wills, M.P., headed the class for yearling fillies with Richford Lass, by Calwich Prince, which was first and gold medallist at the Bath and West, and also at the Royal Counties at Windsor, but was beaten at Peterborough by Lord Egerton of Tatton's Lockinge Athena. Mr. Eadie was second with Barrow Princess, by Harold, an animal of good make and shape, and Mr. Drackley, of Nuneaton, was third with a chestnut by Cotheridge Swell. Mr. Marsh, of Hitchin, scored in the class for mares with foals with Brookfield Bonny, by Ely Harold. She was purchased at Mr. Crisp's sale last September, and took a first prize and a medal at Northampton. Mr. Muntz's mare, Lady Franklin, which was overlooked at the Royal and was second at Peterborough, occupied a similar position on this occasion, whilst Mr. Smith Carrington was third with Hendre Crown Princess, which he purchased for 1,100gs. at Lord Wantage's sale. The foals were hardly such a fine lot as usual, being somewhat backward in condition. Mr. Muntz won in the colt foal class with a bay by Dunsmore Masterman, Mr. Everard being second with a bay by Bardon Harold, and Mr. Parnell third with a bay by Desford Vulcan Chief. In the filly class, Mr. Eadie took the first prize with a foal by Barrow Sir James, Mr. Everard the second with one by First Lord, and Mr. Muntz the third with one by Dunsmore Combination. The tenant farmers' classes were exceedingly creditable.

Cattle.

The whole of the exhibits of cattle were particularly good; in fact, it was described as one of the best exhibits ever made in Leicester, and would compare favourably with the best exhibits at many other big county shows. The local classes of cattle showed a vast improvement on previous years, and should encourage the Society to still continue these classes. Several grand animals paraded among the old Shorthorn bulls, and the judges were occupied for some time in deciding between the merits of the respective candidates. Mr. R. P. Cooper was eventually placed first for King Carolus, by North Star, a good class of Shorthorn bull, which has won several prizes. Second came Mr. Dudding with Prompter, a very thick, serviceable bull, which also has many previous successes to his credit. Yearling Shorthorn bulls were headed by Mr. Dudding's King Atto, an exceedingly neat bull of an excellent type, whilst Captain Duncombe had the second in Manor Victory, a useful and compactly-built bull. The Shorthorn Society's prize for the best bull in the counties of Leicestershire and Rutlandshire was competed for by only four animals, of which Darlington Ranger, a well-known bull from the herd of Mrs. Perry Herrick, Beaumanor Park, Loughborough, was deservedly given pride of place, one of the pair sent by Mr. J. P. Cross, Gerôme, being second. The class for Shorthorn cows was excellent, all the animals being of high quality, and the judges distributed commended cards with a liberality which was quite justifiable. Miss Alice de Rothschild was first with Miss Belladrum 6th, which won at the Royal Show at Maidstone last year, and which has recently won at Northampton and Peterborough. Mr. L. de Rothschild was second with Mayflower 3rd, a cow who counts among her previous successes Woodbridge, Oxford, and first and third at Bath and West. Mr. Henry Dudding scored another victory with Lady 21st in the class for Shorthorn heifers, beating Mr. Sherard Reeve's Heatherbill and Miss de Rothschild's Rose of Underley 6th. Of the yearling Shorthorn heifers, Mr. Jolliffe's Rosey Dawn, which was first, and Captain Duncombe's Ruby Robe second, while Mr. Dudding was reserve with Lady 24th. Some beautiful dairy cows turned out, and Mr. Fox's roan, which was first, was a charming specimen. The second, owned by Mr. Drackley, gave great promise of milk, but was lame, and so did not quite come up to expectations in her yield. Many thought that Mr. J. A. Scorror's Arnold Queen should have been placed higher, but as she had not calved, the judges were unable to satisfy themselves as to her milking qualifications, and so passed her over. Mr. Fox's cow was also first in the next class, with Messrs. Holm's Red Rose, a big, wide-framed animal, second. Mr. Drackley was first in the heifer class, with a beast of excellent milking capacity. Shorthorn bulls under two years old were headed by Pailton Lad, a bull of a useful, but ordinary, stamp, which was rather lucky in not having to face a very keen competition, neither Mr. James Sims's Major Morion nor Mr. Dewhurst's May King's Farewell being particularly striking. Pailton Lad had to give way to Mr. Sanders's admirable roan, Duke of Warlaby, in the next class, for Shorthorn bulls of any age. The pretty Channel Island breed was represented by a strong contingent. It was, in fact, stated to be the best class of Jerseys ever seen at Leicester. Mrs. Susannah Greenall was successful with her bull La Chasse Tauries, which was second at Northampton, and with the cow Longuville Brownie, which won at the same show. Mr. L. Gisborne took a second with a bull which occupied a similar position at Northampton, and the Hon. Mrs. Murray Smith, Lady de Rothschild, and the Duke of Marlborough were also among the winning exhibitors.

Sheep.

Although there was a considerable falling off in the entries of sheep, quality was well up to the average, especially in the Shropshire classes, many of the leading pens at the Royal and Shropshire and West Midland exhibitions being again in competition. In the class for pens of five shearling rams Mr. P. A. Muntz, M.P., Dunsmore, was first with the splendid pen of animals which gained premier honours at Shrewsbury and York. Mrs. Barrs, Atherstone, again came second with a good, matchy pen, and a strong pen took third prize for Mr. W. F. Inge, Thorpe, Hamworth. Mr. A. E. Mansell, Shifnal, headed the class for pens of two shearling rams with capital representatives, which caught the eye of the judges at York, and Mrs. Barrs was once more second, with Mr. R. P. Cooper, Lichfield, third. For pens of three theaves, Mr. W. F. Inge secured first honour with his Royal winners, beating, as at York, the smart pen entered by Mrs. Barrs, third prize going to Mr. P. A. Muntz, M.P. Mr. A. E. Mansell was first for pens of two ram lambs with the animals which gained a similar position at York. This time Mr. B. Wall, Coleshill, was second with well-grown representatives, Mr. R. P. Cooper's pen ranking next. The tenant-farmers' classes were a failure for some reason. Three classes attracted no entry at all, and Mrs. Barrs was practically the only exhibitor in the other classes, carrying off the whole of the prizes. For Lincoln-bred sheep Mr. H. Dudding was very successful, winning the championship with a pen of shearling rams.

Pigs.

The pig classes were greatly in advance of last year's exhibition, so far as the entries were concerned, an increase of fifteen being recorded. Neither was there anything to complain about in regard to quality, for there were some extraordinarily good pigs penned. The sows were particularly excellent. The judge would doubtless have found his labours simplified had not the practice of mixing the Large and Middle White breeds been followed. Separate classes for Large Whites and Middle Whites should in every case be established. In the old boar class the prize was given to a Middle White, simply because it was a better type of boar than any other in the class. Upon the merits of the case the first prize for sows might have been awarded to a Middle White animal, but there was such an extraordinarily good collection of Large White sows that the first prize went in that direction. The boar which was first at Bath and West and Nottingham was only placed second on this occasion. Sir Gilbert Greenall was first in the boar class with Walton Royal, while Mr. Sanders Spencer's Holywell Royalty II. came second. These two were easily ahead, and of the others Sir Gilbert Greenall's Walton Turk was thoroughly entitled to the reserve ribbon. Of the four entrants for boars of any breed Mr. J. Jefferson was first and second. There was a short show of Berkshires, and while boars were moderate, sows were good. Mr. Jefferson took the first prize for sows with a fine young animal, full of quality, and very well grown. The young classes were extremely good, but here again classification was sadly needed, Berkshires being sown side by side with Large Whites. The Berkshires never had any chance then. Mr. Daybell came in for the first prize with a splendid pen, which won at Nottingham. Mr. Thomas Diggle was second with a promising litter, and the Rev. T. J. Davis was at the head of affairs in the class for breeding sows.

Judges.

HUNTERS: Sir Bache Cunard, Nevill Holt, Market Harborough; George Mulcaster, Burghley Sands, Carlisle.
HACKS, DRIVING AND JUMPING: A. W. Hickling, Adbolton, Nottingham; T. H. Hutchinson, Catterick, Yorks.
SHIRE HORSES: C. R. Chamberlain, Riddings Farm, Alfreton; J. Paisley, Waresley, Sandy, Hunts.
SHORTHORNS: R. W. Hobbs, Kelmscott, Lechlade; J. Stratton, Broad Hinton, Swindon.
JERSEYS: T. H. Weetman, Rose Hill, Atherstone.
LONGWOOL SHEEP: R. C. Bemrose, Friston Green, Caythorpe, Grantham.
SHORTWOOL SHEEP: A. S. Berry, Pheasey Farm, Great Barr, Birmingham.
PIGS: John Barton, Borrowash, Derby.

Special Prizes.

The Shire Horse Society's Gold Medal, value £10, for the best Mare or Filly in the Shire classes, bred by and in the possession of a resident or occupier of agricultural land in the county: R. A. Yerburgh, M.P., Woodford Park, Blackburn.

"The Desford Challenge Cup," value 40 guineas, by Messrs. W. and J. Thompson (open to all England), for the best Shire Colt or Filly Foal, got by a registered sire and out of a registered mare, and bred by the exhibitor: J. Eadie, Barrow Hall, Leicester.

"The Leicester Advertiser Cup," value £25, by Mr. W. Penn Cox, for the best Shire Mare or Filly in any of the classes, the property of a bona-fide tenant farmer residing in or occupying not less than fifty acres of land in the counties of Leicester or Rutland: J. Bradley, Halstead, Tilton, Leicester.

"The Dunsmore Challenge Cup," value £20, by Mr. P. A. Muntz, M.P., for the best Shire Mare or Filly in the show, the property of a bona-fide tenant farmer residing in and occupying not less than fifty acres of land in the counties of Leicester, Northampton, or Warwick; not the proprietor of a stud of more than two Shire stallions over two years old which are kept or let for breeding purposes: Mr. Bradley.

"The Catthorpe Champion Cup," value £10, by Mr. J. P. Cross, for the best Shire Mare or Filly in any of the classes, open to the United Kingdom: J. Parnell, Rainsbrook, Rugby.

Class Prizes.

HORSES

HUNTERS.

Hunter gelding or mare, under eight years old, up to 15 stone or over: 1 and 2, J. H. Stokes, Great Bowden, Market Harborough; 3, G. W. Summer, Desborough, Market Harborough; r, T. Bradley, Uffington, Stamford.

Hunter, gelding or mare, under eight years, up to 13-7 to 15 stone: 1, J. H. Stokes; 2, H. Custance, Oakham; 3, J. Drage, Chapel Brampton, Northampton; r, W. Cheney, Gidding Grove, Peterborough.

Hunter, gelding or mare, under eight years old, up to 12 stone to 13-7: 1, J. H. Stokes; 2, J. Drage; 3, P. S. Danby, Church Farm, Offchurch, Leamington; r, W. Cheney.

Hunter, gelding or mare, the property of a tradesman or of a tenant farmer, or his son, living with him and following the same occupation, renting fifty acres of land or more in the county of Leicester, or within twenty miles of the Leicester Clock Tower: 1, J. H. Sedgley, Church Langton, Market Harborough; 2, F. W. Cowley, Braybrooke Lodge, Market Harborough; 3, J. Markley, Stapleford, Melton Mowbray; r, Mrs A. E. Barrs, Nailstone, Nuneaton.

Gelding or filly, four years old, adapted for hunting purposes, the property of a resident or occupier of land within the limits of the Quorn, Mr. Fernie's, Belvoir, Cottesmore, Atherstone, and Pytchley Hunts: 1 and 2, J. H. Stokes; 3, C. B. Clutterbuck, Allexton Hall, Uppingham.

Gelding or filly, three years old, adapted for hunting purposes, the property of a resident or occupier of land within the limits of the Quorn, Mr. Fernie's, Belvoir, Cottesmore, Atherstone, and Pytchley Hunts: 1, B. Wall, Hazlewood, Coleshill, Birmingham; 2, H. Rippon Roe, Cranoe, Market Harborough; r, G. S. Hanson, Kirby Cottage, Melton Mowbray.

Gelding or filly, two years old, adapted for hunting purposes, the property of a resident or occupier of land within the limits of the Quorn, Mr. Fernie's, Belvoir, Cottesmore, Atherstone, and Pytchley Hunts: 1, J. Howkins, Lilbourne Furze, Clifton, Rugby; 2, Carr and Crawford, Gumthorpe, Oakham; r, S. Marshall, Manor House, Hickling, Melton Mowbray.

Yearling colt or filly, adapted for hunting purposes, the property of a resident or occupier of land within the limits of the Quorn, Mr. Fernie's, Belvoir, Cottesmore, Atherstone, and Pytchley Hunts: 1, C. E. de Trafford, Hothorpe, Theddingworth, Rugby; 2, J. W. Sanders, Gilmorton, Lutterworth; r, R. L. Fenwick, Wymondham, Oakham.

Mare, calculated to breed hunters, with her foal at heels: 1, F. B. Wilkinson, Cavendish Lodge, Edwinstowe, Newark; 2, J. H. Sedgeley, The White House, Church Langton, Market Harborough; 3, F. Stapleton Brotherton, Wheler Lodge, Husbands Bosworth; r, S. Steward, Barrow, Oakham.

Foal, adapted for hunting purposes: 1 and 2, F. A. Belville, Stoughton Grange; 3, J. S. Steward.

HACKS, ETC.

Hack, gelding or mare, not less than 14½ hands: 1, J. H. Stokes; 2, A. L. Goodson; 3, E. K. Apperley; r, J. Gebbatt.

Hack, gelding or mare, not exceeding 14½ hands high: 2, A. S. Day, Berkeley Stud, near Crewe; 3, F. G. Haines, Seymour Place, Bryanston Square, London; r, H. Townsend, Loughborough Road, Belgrave.

Pony, gelding or mare, not exceeding 13 hands high: 1, Miss Violet Haines, Seymour Place, Bryanston Square, London; 2, G. E. Franklin, The Field, Derby; 3, C. H. Ravenhill Stock, Shotover Cottage, Headington Quarry, Oxon.

Tandem team, to be shown and driven: 1, F. J. Batchelor, Hopwood Stud Farm, Alvechurch, Worcester; 2, G. C. Waud, Fernichurst, Baildon, Yorks; 3, E. Godsell, Stroud, Gloucester.

Gelding or mare, shown and driven in single harness, under 14½ hands, and over 13 hands high: 1, G. E. Franklin; 2, W. Foster, Mel-Valley, Moseley, Birmingham; 3, A. S. Day; r, T. Turrell, Avenue Hotel, Kettering.

Pony, gelding or mare, shown and driven in single harness, not exceeding 14 hands high, the property of a resident in the county or borough of Leicester, or within twenty miles of the Leicester Clock Tower: 1, C. E. Dalby, Manchester House, Lutterworth; 2, A. W. Clarke, Crown Hotel, Uppingham; 3, Oliver Tyler, Quenby Hall.

Gelding or mare, considered by the judges as the best fencer: 1, J. T. Heap, Clarence House, Ramsbottom, Manchester; 2, J. Wheeler, Shakespeare Farm, Studley; 3, J. Waddington, Easby House, Easingwold, Yorks; r, Walter Grundy, Worcester.

SHIRE HORSES.

Entire Shire colt, two years old: 1, Lord Llangattock; 2, P. Albert Muntz, M.P., Dunsmore, Rugby; 3, W. T. Everard, Bardon Hall, Leicester.

Shire mare, three years old: 1, J. Parnell, Rainsbrook, Rugby; 2, H. H. Smith-Carrington, Ashby Folville Manor, Melton Mowbray.

Shire filly, two years old: 1, Robert A. Yerburgh, M.P., Woodford Park, Blackburn; 2, J. Eadie, Barrow Hall, Derby; 3, W. T. Everard, Barden Hall, Leicester.

Shire colt, one year old: 1, Lord Llangattock; 2, J. Parnell; 3, P. A. Muntz, M.P.; r, E. J. Wythes, Cropped Hall, Epping.

Open: 1, Sir W. H. Wills, Bart., M.P., Coombe Lodge, Blagdon, Somerset; 2, J. Eadie; 3, W. Drackley, Burton Hastes, Nuneaton; r, T. Burton, Medbourne Grange, Market Harborough.

Shire mare, with foal at heels: 1, C. Sheppard Marsh, Little Offley, Hitchin; 2 and r, P. Albert Muntz, M.P.; 3, H. H. Smith-Carington, Ashby Folville, Melton Mowbray.

Shire colt foal: 1, P. Albert Muntz, M.P.; 2, W. T. Everard; 3, John Parnell; r, W. Carter.

Shire filly foal: 1, James Eadie; 2, W. T. Everard; 3, P. Albert Muntz, M.P.; r, F. Farnsworth.

Foal, exhibited two months before the show with the County Live Stock Insurance Association: 1, Robert Crawford, Lowesby; r, Mark Firth, Wistow Hall.

TENANT FARMERS' CLASSES.

Cart mare, four years old or upwards: 1, Arthur Wheatle, Glen Parva; 2, Albert C. Newman, The Elms, Tur Langton; 3, Messrs. Holm, Carlton Curlieu and Tilton; r, John Powers, Barwell House, Hinckley.

Cart gelding, four years old and upwards: 1, Matthew Hubbard, Ivy House, Eaton, Grantham; 2, J. Parker Towne, High

Cross, Rugby; 3, E. L. Driver, Elmesthorpe; r, William Neale, Bacon's End, Coleshill, Birmingham, and Newton Harcourt.

Cart gelding or mare, three years old: 1, M. Hubbard, Ivy House, Eaton, Grantham; 2, Albert C. Norman, The Elms, Tur Langton.

Cart gelding or filly, two years old: 1, J. Bradley; 2, William M'Turk, Hallaton, Uppingham; 3, A. C. Norman; r, J. Parker Toone, High Cross, Rugby.

Cart gelding or filly, one year old: 1, J. Bradley; 2, W. Drackley; 3, T. Burton; r, A. C. Norman.

Cart colt foal: 1, W. Carter; 2, J. Houghton; 3, R. Crawford; r, M. Hubbard.

Cart filly foal: 1, J. Parker Toone; 2, F. Farnsworth; 3, M. Hubbard; r, A. C. Norman.

Cart mare, with foal at heels: 1, R. Crawford; 2, W. Tickle; 3, J. Parker Toone; r, J. Bradley.

CATTLE.

SHORTHORNS.

Shorthorn bull, calved previous to January 1st, 1899: 1, R. P. Cooper, Shenstone Court, Lichfield; 2, H. Dudding, Riby Grove, Stallingborough, Lincolnshire; 3, Charles W. Brierley, Brimfield, R.S.O., Herefordshire.

Shorthorn bull, calved after January 1st, 1899: 1, H. Dudding; 2, Capt. W. H. O. Duncombe, Waresley Park; r, R. P. Cooper, Shenstone Court, Lichfield.

Shorthorn Society's prize for the best Shorthorn bull in Leicestershire and Rutland: 1, Mrs. Perry Herrick, Beaumanor Park, Loughborough; r, J. P. Cross, Catthorpe Towers, Rugby.

Shorthorn cow, in calf or in milk, calved previously to or in 1897: 1, Miss Alice de Rothschild, Waddesdon, Aylesbury; 2, L. de Rothschild, Ascot House Farm, Leighton Buzzard; r, C. W. Brierley, Brimfield, R.S.O., Herefordshire.

Shorthorn heifer, in calf or in milk, calved in 1898: 1, H. Dudding; 2, J. Sherard Reeve, Leadenham House, Leadenham, Lincoln; r, Miss Alice de Rothschild.

Shorthorn heifer, calved in 1899: 1, C. H. Jolliffe, Goldicate, Stratford-on-Avon; 2, Capt. W. H. O. Duncombe; r, Henry Dudding.

TENANT FARMERS' CLASSES.

Dairy cow, in-calf or in milk: 1, Stafford William Fox, Humberstone; 2, W. Drackley, Burton House, Nuneaton; r, F. J. Stanhope, Alma House, Claybrooke, Rugby.

Dairy cow, the best milker: 1, S. W. Fox; 2 and r, Messrs. Holm, Carlton Curlieu and Tilton.

Heifer, in-calf or in milk, over two and under three years old: 1, W. Drackley; 2, S. W. Fox; r, Messrs. Holm.

Heifer, over one and under two years old: 1, S. W. Fox; 2, F. J. Stanhope; r, Exors. of the late J. C. Harrison, Pailton Fields, Rugby.

Bull of the Shorthorn breed, under two years old: 1, Exors. of the late J. C. Harrison; 2, J. Sims, Hoton Hills, Loughborough; r, Mrs. Ann Dewhurst, Shelford House, Nuneaton.

Bull of the Shorthorn breed, of any age, the property of an occupier of land in the county of Leicester, which has served not less than ten cows since January 1st, 1900: winner of the Shorthorn Society prize ineligible: 1, J. W. Sanders; 2, Exors. of the late J. C. Harrison; r, Mrs. M. Barrs.

CHANNEL ISLAND.

Jersey bull, over one and under two years old: 1, Mrs. S. Greenall, Walton Hall, Warrington; 2, Lionel G. Gisborne, Allestree Hall, Derby; r, Hon. Mrs. Murray-Smith, Gumley Hall, Market Harborough.

Jersey cow, in-calf or in milk: 1, Mrs. S. Greenall; 2, The Hon. Mrs. Murray-Smith; r, J. M. Pyke Nott, Middle Hill, Broadway, Worcester.

Jersey heifer, in-calf or in milk: 1, Lady de Rothschild, Aston Clinton, Tring; 2, Duke of Marlborough, Blenheim Palace, Woodstock; r, L. G. Gisborne, Allestree Hall, Derby.

SHEEP.

Lincoln shearling rams: 1 and the Lincoln Longwool Sheep Breeders' Association championship prize of £5, Henry Dudding; 2, R. and W. Wright, Nocton Heath, Lincoln; 3, H. Smith, jun., The Cottage, Cropwell Butler, Nottingham.

Lincoln theaves, under eighteen months old, intended for breeding purposes: 1, Henry Dudding; 2, R. and W. Wright.

Lincoln Longwool ram lambs: 1 and 2, R. and W. Wright; 3, S. E. Dean and Sons, Dowsby Hall, Bourne; r, Henry Goodyear, Austerby, Bourne.

Shropshire shearling rams: 1, P. Albert Muntz, M.P.; 2, Mrs. M. Barrs; 3, W. F. Inge, Thorpe, Tamworth; r, R. P. Cooper.

Shropshire shearling rams: 1, A. E. Mansell, Harrington Hall, Shifnal; 2, Mrs. M. Barrs; 3, R. P. Cooper; r, W. F. Inge.

Shropshire theaves, under eighteen months old, intended for breeding purposes: 1, W. F. Inge; 2, P. L. Mills; 3, P. Albert Muntz, M.P.; r, R. P. Cooper.

1, A. E. Mansell; 2, B. Wall; 3, R. P. Cooper; r, Mrs. M. Barrs.

TENANT FARMERS' CLASSES.

Shortwool ewes, suckled lambs season 1900: 1 and 2, Mrs. M. Barrs.

Shortwool theaves: 1 and 2, Mrs. M. Barrs.

Shortwool ewe or wether lambs, with or without ewes (the ewes not for competition): 1 and 2, Mrs. M. Barrs; r, J. T. Lord, Waltham, Melton Mowbray.

Boar of the Large White or Middle breed: 1 and r, Sir Gilbert Greenall, Bart.; 2, Sanders Spencer, Holywell Manor, St. Ives.

Boar, of any other breed: 1 and 2, J. Jefferson, Peel Hall, Chester.

Breeding sow, of the Large White or Middle breed: 1, Rev. J. Davis, Ratcliffe College, Leicester; 2, Sir Gilbert Greenall, Bart.; r, D. R. Daybell, Bottesford, Nottingham.

Breeding sow, of any other breed: 1 and 2, J. Jefferson; r, Sir H. F. de Trafford.

Breeding pigs (pen of three), of any breed, of one litter: 1, D. R. Daybell; 2, T. Diggle, Thorpe House, Ewersby, Sleaford; r, Sanders Spencer.

Breeding sow of any breed (tenant farmers' class): 1, D. R. Daybell; 2, Rev. T. J. Davies.

International Pony Show at the Crystal Palace.

A three days' International Pony Show was held at the Crystal Palace last week, but, unfortunately for the success of the enterprise, wretched weather prevailed, and the attendance on each day was disappointing. Those that did attend found things far from agreeable, for the stable-yard and the turf were reduced to the consistency of a quagmire. The total number of horses entered was between 120 and 130, but, owing to the fact of several of them being in two or more classes, this total was considerably exceeded, though in some sections the competition was by no means strong. Colonel A. Maclean and Sir Charles Wolseley were the judges of thoroughbreds and the riding and saddle classes, whilst Mr. James and Mr. A. E. Peat took the polo ponies, and the Rev. F. F. Vidal and Mr. R. Brydon the moorland, forest, and Shetland sections, the duties of the latter being extremely light, owing to the weakness of the competition.

The first class was for thoroughbred stallions not exceeding 14 hands 2 inches, first falling to Messrs. John Jones and Son, of Colwyn Bay, for the extremely good-looking Gownboy, which won second honours at Islington in the spring. On Tuesday, however, he easily won the championship award for thoroughbred stallions. Messrs. Baxter, of Brentwood, were the head in both the Hackney pony classes with Recruit IV. and Dandy Ribbons, the three entries by these gentlemen representing the entire strength of the competition. Recruit IV. was later in the day awarded the championship for Hackneys. As is usual, the Rev. D. B. Montefiore's Mootrub was the winner in the Arab class, his two opponents being very moderate, whilst the Misses Vesey, of Frimley, secured premier honours in Shetlands with the typical Lord Laughton, and Mr. H. M. Lloyd's Grey Starlight won in Welsh ponies, after a hard fight with Mr. Nuchold's Prince of Wales, and was also awarded the championship.

As was only to be expected, the mare classes were far better than those for stallions, Sir H. de Trafford scoring in the thoroughbreds with the good-shouldered Confidential; whilst in the polo pony brood mares Mr. John Barker, J.P., added another to the already very long series of victories obtained by his charming chestnut, Lightning, the Comte Jean de Madre winning in the mares without foals with the Hunt to Find, which inherits the beautiful fore-end of her grandsire Blair Athol. Later in the day she won the female championship. The three-year-old roan or gelding polo pony class had only two entries in it, and that for two-year-olds but one, the Keynsham Stud Company being successful in each. Shetland mares only numbered three, and the Ladies Hope took the first and second awards with the typical black Bretta and brown Vesta respectively. Six Welsh mares came before the judges, and they quickly pronounced Messrs. John Jones and Son's Welsh Diamond to be the best animal. This capital mare, which possesses a level back and plenty of substance and action, was reserved for the female championship medal, for which the winners in ten classes, all sizes, competed. The judges deliberated for some considerable time between her and the winner. Messrs. Jones considered Welsh Diamond to be the best Welsh pony they have ever exhibited, and their opinion is shared by many others. The second prize for eWlsh mares went to the Duchess of Newcastle for Clumber Tiny, her ladyship also taking reserve and v.h.c. card for Lady White and Hardwick Jenny respectively.

Riding ponies not exceeding 14 hands 2 inches were a very nice lot, Mr. Mounsey winning first prize with the powerful Elastic, which also scored in the polo-bred riding classes, whilst in the weight carriers Miss E. R. Platt was to the fore with her stylish chestnut Lady Molly, hard pressed by Messrs. Jones's level-built dun Welsh Norbury Squire. Another capital lot were ponies between 13 and 14 hands, to be shown in saddle, first here going to Mr. C. Williams's Shaving, with the Rev. D. B. Montefiore's speedy Zither next in order. The first mentioned secured the championship for riding ponies.

The harness classes were also good, Messrs. Baxter taking first and second prizes in the 14 to 14.2 class with Musk and Miss Howard, both of which are well known, whilst in the 13 to 14 class, and also in the under 13 hands, Mr. Foster was ahead with Mel Valley Novelty and Mel Valley High and Mighty respectively. The last mentioned animals won in the pairs under 13 hands 2 inches, whilst in the higher class Musk and Miss Howard had no difficulty in adding to their long sequence of similar victories, whilst they carried off the championship of the section. Mr. R. G. Heaton (Chatteris) was reserve with the stylish chestnuts Activity and Agility. In the jumping contests winners included Mr. Hugh Rainey's (Ballymena) Lady Rodgers, who won both the novice and open classes; Mr. Wilmot's Ranji, and Mr. A. Mansergli's Polly, the latter a remarkably clever jumper for her height.

Game Chicken, a six-year-old mare, owned by the Keynsham Stud Company (Bristol), a very clever pony, won the bending championship. Messrs. Jas. and E. A. Peat now took to the ring with the classes for polo ponies. The entry was not very high, and in the first section, for heavy-weight ponies up to at least 14st., and not exceeding 14.2 hands, the whole of the prizes were taken by the London Polo Club. Mr. A. G. Brown's Auntie was the best light-weight; and in the three classes for foreign-bred ponies all the prizes but one were again taken by the London Polo Club. The exception was His Nibs, a brown gelding owned by Mr. S. Gurney Sheppard (London). A class for "unmade" ponies brought out several promising ones, the pick, however, being Captain the Hon. Gore Langton's Shooting Star, who beat St. Moritz, owned by the Keynsham Stud.

Keighley.

Fine weather favoured the Keighley Agricultural Society's Show on the 30th ult. until near its close; then heavy rain fell during the judging of the leapers. The Society has been less fortunate on some former occasions, and the good "gate" this year will help to make amends for past losses. The amount offered in prizes was between £250 and £300. The entries numbered 1,043, which included 103 horses, 15 cattle, and 19 sheep. Last year there were only 993 entries, and in each of the three previous years just over 1,000. There was a parade of draught horses. Messrs. Prince Smith and Son's Duke took the premier awards in both the local and open classes. They were similarly fortunate with the same animal at last year's show. Amongst the hackneys Mr. William Sugden's Duchess of Connaught, with foal at foot, took the first prize in its class, and was awarded the silver medal given by the Hackney Society. Of the five animals in the class for the best groomed gelding or mare and gears four competed so closely that the judges had to pronounce them equal in merit. The hackney stallions made a most creditable show. The first prize and Mr. G. S. Knight's five guinea silver cup went to Mr. T. Hall's Langton Masher, which has a good record in the showyard. Mr. W. Sugden's Coldspring Duke, which was first at the Hackney Show at Islington, had now to take second place, the same gentleman's Coldspring Squire being put third. In ponies not exceeding 14 hands Mr. T. Hall's Majestic was awarded the premier award, but was afterwards disqualified on being measured. Amongst the cattle a Royal prize-taker—a dairy cow exhibited by Mr. W. Walsh was passed over in favour of the cow shown by Mr. John Gill, who also had a walk-over in the bull class with a famous winner bred and led by himself. There was scarcely any competition in the sheep section, but the quality was good, that of the lonks leaving nothing to be desired.

The following were the awards in the principal sections:—

HORSES.

DRAUGHT OR AGRICULTURAL.

Horse or mare (local): 1, Prince Smith and Son, Keighley; 2, T. Taylor and Co., Keighley.

Horse or mare (open): 1, Prince Smith and Son; 2, Old Royd Bros., Woodlesford.

Draught or agricultural entire: 1, Oddroyd Bros.; 2, A. W. Hainsworth, Patcley Bridge.

HACKNEYS.

Mare in foal, or with foal at foot, or having had a foal during 1899: 1 and medal, W. Sugden, Cullingworth.

Foals, colt or filly, foaled 1899: 1 and 2, W. Sugden.

Yearlings, colt or filly, foaled 1899: 1, R. M. Bairstow, Pudsey; 2, W. Sugden.

Foals or yearlings (age to be considered), the produce of Coldspring Duke H.S.B. 5137: 1, L. Fish, Bierley; 2, A. Ambler and Sons, Limited, Wilsden; 3, J. Booth, Silsden.

Pony, gelding or mare, not to exceed 14 hands, to be ridden: 1, T. Hall, Malton; 2, A. P. Robinson, Wakefield.

Gelding or mare, not to exceed 15 hands, to be ridden: 1, G. Tyson, Halifax; 2, N. Read.

Gelding or mare, any age or height, to be ridden: 1, G. Tyson; 2, Miss Edna England, Manningham.

Pony, gelding, or mare, not to exceed 14 hands, in harness: 1, A. P. Robinson; 2, N. Read; 3, G. Harrison, Wilsden.

Gelding or mare, not to exceed 15 hands, in harness: 1, G. Tyson; 2, N. Read; 3, W. Ryecroft, Barnley.

Gelding or mare, any age or height, in harness: 1, G. Tyson; 2, Miss England; 3, C. Hanson, Wilsden.

Best-groomed gelding or mare and gears (without vehicle): Equal, J. Cowling, for Messrs. Scott and Co., Ingrow, Keighley Industrial Co-operative Society; T. Taylor, Sir Titus Salt, Bart., Sons, and Co., Limited.

Hackney stallion: 1 and cup, T. Hall; 2 and 3, W. Sugden.

Hackney gelding or mare, in harness, price not to exceed £50: 1, E. Marsden, Colne; 2, H. Wilkinson, Keighley.

Horse or mare, any age or height, in harness (local): 1, Prince Smith, jun.; 2, W. W. Ryecroft.

Horse or mare, not to exceed 14 hands, in harness (local): 1, G. Hanson; 2, C. H. Foulds.

LEAPING.

Prizes divided between C. Tomlinson, Selby, and T. E. Lavin, Ripon.

CATTLE.

Cow, in calf or milk (open): 1, W. Tillotson, Colne; 2, W. Walsh, Bingley.

Cow for dairy purposes (local): 1, J. Gill, Silsden; 2, W. Walsh.

Two cows, in calf or milk (open): 1, W. Tillotson; 2, J. Gill.

Bull for service, under two years (open): 1, J. Gill.

Heifer for breeding purposes, under two years (open): 1, W. Walsh; 2, G. Bargh, Gargrave.

SHEEP.

Lonk or Mountain tup lamb (open): 1, S. Lund, Keighley; 2, E. Smith, Cowling.

Three Lonk ewes, to be suckling lambs (local): 1, G. Smith, Eastburn; 2, G. H. Bailey, Cullingworth.

Three Lonk gimmer lambs (open): 1, Smith and Bailey, Cowling; 2, T. Snowden, Cowling.

Lonk gimmer lamb (local): 1 and 2, E. Smith.

Three half-bred Lonk ewes or gimmer shearlings (open): 1, G. Smith, Eastburn; 2, W. Walsh.

Three half-bred Lonk gimmer lambs (local): 1 and 2, C. Smith, Howden.

Eye Colt Show.

A little over a dozen years ago a modest start was made with what was essentially a colt show at Eye. Of late years it has developed so satisfactorily that it is now a valuable addition to the local organisations of the county. It soon added other stock to its list of classes, and in comparison with displays in connection with kindred local societies, there is usually a superior show of neat stock and sheep. The fourteenth show took place on Monday, Mr. T. H. Peck again kindly granting the use of Langton Grove. The entries were about equal to last year, when there was an exceptionally good show. Eye being on the Norfolk border, horses other than Suffolk have usually been very much in evidence. This time the Suffolks were conspicuously stronger, especially in the horse classes, notwithstanding that the prominent and usually successful exhibitor, Mr. Edwin H. Preston, was not this year in the list of competitors. There were some uncommonly good colt foals, all the honours going to the property of Bowden Minstrel, owned by Mr. E. A. Cook, of Denningtons Lodge, a choice Suffolk stallion. The first honours

went to the exhibit of Mr. F. S. Stevenson, M.P., for a particularly choice youngster. It was a close fight between this and Mr. F. G. Cook's entry, another very good-looking colt out of an Eclipse mare. Mr. Stevenson's colt was the winner of the ten-guinea challenge cup, given by Messrs. Robert Bond and Sons, for the best foal in the yard, one of the conditions being that it must be won by the same competitor three times before it can be permanently held. This was Mr. Stevenson's first win. Mr. F. G. Cook, Saxtead Lodge, has won it twice, and this gentleman made a good try to win it the third time, but his exhibit had hardly the size of the one which carried off the trophy this time. Mr. Stevenson's younger virtually cleared the decks, taking also the silver medal offered by the Suffolk Horse Society, and the guinea special, presented by Mr. Edward Peck. As to the fillies, though a few in number, they were choice in quality. Here, again, the Border Minstrel foals came to the front, Mr. E. A. Cook taking first and Mr. Henry Pipe second, Mr. Cook's foal being reserved for the championship. With respect to the class for mares with foal at foot, there were several grand animals, and they looked none the worse for being sent into the ring only in good working condition. Here, again, Mr. E. A. Cook scored, showing a beautiful Saunterer mare, a typical Suffolk. The same gentleman also carried off the second with a very compact, well-made animal by Milo. There were only two entries of yearling fillies, the chief honour going to Mr. F. G. Cook's entry, champion last year as a foal. The two-year-old filly belonging to Mr. E. A. Cook was also by Border Minstrel, as was also the reserve in the same class, the second prize going to Mr. F. G. Cook for a very promising filly by Upstart.

The classes for horses other than Suffolk have for the last few years shown marked improvement in quality, and on Monday there was a very good display. As to this class of animal, it may be said generally that there has been a very marked improvement in the district since the Society was established. The class for colt foals was a large and uncommonly good one, Mr. George Symonds, Wortham, scoring with a heavy, big-boned bay by Nelson. This colt also secured the special presented by Messrs. Lawton, Warnes, and Sons, as the best cart foal other than Suffolk, Mr. Thomas Edwards, of Wetheringsett Hall, taking second with another choice bay by Nailstone Thunderer. The filly foals mustered equally well, the chief honour this time going to Mr. Geo. Symonds, of Thelveton, with a handsome daughter of Nailstone Blood Royal, a roan belonging to Mr. J. T. Woolsey, by Wonder of the Isle, being second. The mares with foal at foot fairly filled the ring, and looked uncommonly well, Mr. Henry Button winning with Wayland Princess, by Wayland Chief. There was only a small class of fillies. The chief honour went to Mr. George Symonds, Wortham, for a very nice filly by Orchard Conqueror, another bay, a daughter of Wayland Chief, belonging to Mr. Henry Button, being second. Some promising two-year-old fillies put in an appearance, there being entries from stables where choice Shire-breds are to be found. The contest lay between a daughter of Markeaton Royal Prince, belonging to Mr. Trenham J. Cresswell, Aldeby Grange, and a filly by the well-known Blythwood Conqueror, belonging to Mr. W. Dennis Wilson, Cretingham, the judges showing their preference for the former. Some strong, well-built animals were entered in the class for the best pair of plough horses, and it was a close fit between the entries of Mr. Wm. D. Wilson and Mr. J. A. Lankester, of Old Newton; but the former took the first honours.

There were but few entries in the section for Hackneys, but the quality was excellent. The coveted silver medal, presented by the Hackney Society, for the best Hackney in the yard, was taken by the Hon. Chas. B. Hanbury, with his Marigold, by the well-known Cadet, out of a Confidence mare. There were some very good Hackneys shown in harness, whose performances in the ring afforded much evident pleasure to the lookers-on. In the class above 13 hands, Mr. Norton B. Garrard showed his fine bay mare Mignon, which was deservedly awarded first prize. In the next class, above 14 hands, Mr. Percy Read showed his stylish goer, Tomato, and beautiful chestnut gelding, Agility. In the saddle class, Mr. G. W. Bendall sent his grey mare Grey Bee, which subsequently showed herself a good performer over the hurdles.

The judges of the cows and lambs had a very light task. A Red-Poll, showed by Mr. J. B. Chevallier, Aspall Hall, was the chief winner in the cow class, while as to sheep, Mr. J. B. Dimmock, Shotford Hall, was first for a pen of fine Suffolk ewe lambs, with some superior examples of the breed, Sir Hugh E. Adair, Bart., taking a like position with Suffolk shearling ewes, and Mr. E. B. Elsden with half-bred shearling ewes.

Malton.

The annual show of the Malton Agricultural Society took place on Wednesday. The entries have been getting less and less each year for some considerable time now, and this year there were only 451—335 horses, 48 cattle, 41 sheep, and 27 pigs; whereas in 1895 the total number was 661. The cause of this decrease may perhaps be accounted for in several ways, but we need not go into the question here. What Melton can really be congratulated upon is that, despite all odious numerical comparisons, despite a diminished amount of competition, the character of the stock brought into the field on Wednesday in no sense took from the high reputation which the district long ago won for itself. One may still find at the Malton show a thoroughly typical Hackney, a first-class coacher, a good galloping hunter, or a useful agricultural horse.

The total number of horses was less than for quite a quarter of a century past, but the quality was all that could be desired. Just over half a hundred agricultural horses—to take the order of the catalogue—comprised in eight classes, made a collection of the heavy breed of which Malton has no cause whatever to be ashamed. The winners were, for the most part, animals of substance, with excellent limbs and in nice feather. The care bestowed by Lord Middleton was again apparent. His lordship's brood mare Pratt's Dora had a high place of honour, and the very good second to her—Messrs. Davison's Elmfield Silver—showed a foal also by one of the Birdsall sires. First of a biggish group of yearlings was a Bishopthorpe-bred son of Nyn Hytchen Duke, one of Menestral's stock ranking next. Menestral was the sire, too, of the successful colt foal. The winning three-year-old, a powerful gelding belonging to Messrs Davison, was bred by Lord Middleton. Mr. T. A. Jackson, of Bridlington, was the breeder of the winners in the tenant farmers' classes. Two-year-olds were very few, but there was a good deal of merit about the first and second, namely, Mr. A. S. Benton's Orange Blossom and Messrs. R. and J. Davison's Welham Silver Queen. While the agricultural horses were about an average in numbers, the coachers were far below the totals of old days. The five classes contained thirty specimens altogether—a nice representative lot, though not so numerous as one had a right to expect to see here. The three-year-olds stood out above the rest for quality. It was a capital class, headed by the Royal winner, Courtier, from Deighton, with Mr. Connell's Selby winner second and the same exhibitor's Royal second in the third place. Mr. Kitching's Cawthorne, which led his class in the Cleveland Bay section at York the other week, received the recognition of h.c. The brood mares do not call for special remark; nevertheless, they were a good lot. Mr. John Kirby's Princess was much fancied, but she did not impress the judge sufficiently to attain the leading position, which was assigned to Mr. Lett's Lady Harum. Lady Harum had the reserve place at the Royal Show last month, and Mr. George Scoby's Princess Georgie was second. Here, however, Princess Georgie has been put down a step. Another instance of reversal of verdict occurred in the yearling class, where Barnaby's son Majestic, reserved at the Royal, was accorded the highest rank, and Rookbarugh Admiral, by Noble Prince, a third Royal winner, was given reserve only. As usual, there were no separate classes for the younger female stock, and the result was that the fillies did not get a look in at all; colts or geldings were prominent in every case. The best three young stallions were the same that attracted attention at York, only the order of the first and second was changed. Mr. Lett's Merryheart colt was awarded the first prize, which fell at the Royal to Mr. Connell's Albert.

The Hackneys were of quite the right sort; indeed, in several cases the quality was surpassingly good. An excellent show of foals embraced two of Rosador's produce in the leading positions, Mr. Buttle's chestnut colt, out of Elegance, by Royal Star, being first, and Mr. Robinson's chestnut filly, out of Wild Wave, by Wildfire, second. A Langton colt got the reserve number. The award in the yearling class was particularly interesting, involving as it did an upset of the London decision. Mr. John Atkinson's Absent Hero, one of the stock of Aristocrat 2nd, dam by Connaught, was the Malton judges' choice, and it was a popular verdict. Commerce won for Mr. Whitworth the second prize, and though lacking the best points of the first prize-taker is a valuable Hackney. A grand class of two-year-old hacks included in the front rank Mr. H. Moore's chestnut filly Marionette, by Conquest 2nd, bred in Kent, a daughter of Aristocrat 2nd coming next. Two other fillies by the last-mentioned sires were held to be worthy of special note, and there was high commendation for Lord Middleton's Rosador filly; indeed, the fillies had a rare time, both in this and the three-year-old class. Mr. Moore won again in the latter case, his Royal reserve medallist Lobelia once more proving her claim to consideration on the score of perfect action. The well-known Lady Connaught had a fairly easy victory over the other brood mares. Mr. Buttle furnished the most successful young stallion, a Rosador colt, bred, like the second winner, at Garton. Mrs. Fred Holmes registered another not too difficult win with the well-mannered Pickwick in the gentlemen's hack class; and the four-year-old mare Sunflower, bred by Messrs. F. J. and H. Grainger, was put at the head of the ladies' hacks. A nicely filled tenant farmers' class was a creditable feature.

As in the Hackney classes so in the case of the ninety hunters, Royal successes or commendeds met one at every turn. Not much, however, can be said of the brood mares, the best of which had only third place at York. The most distinguished class was that of three-year-olds, and, curiously enough, every one of the winners was Irish-bred. Messrs. T. and H. Ward's black gelding Blackthorne, a third prize-taker at the Royal, secured the premier position. The fillies were out of it; even the Royal first prize filly was passed over. Golden Ruby, shown by Mr. J. S. Darrell, however, attracted a commendation card. Mr. G. Marton won with one of each sex got by Spendthrift in a yearling class which might have been much stronger, but which, as it was, had some good qualities. Two-year-olds, a nice show, were more numerous, and the chief award was allotted to the Royal winner Eclat, by Dermod, one of Mr. Letts's. Irish-bred horses were ahead again in the well-filled four-year-old class, a Royal h.c., Lord Clare, standing at the top. Both this and the five-year-old class took a fair amount of judging, and in the latter case a Yorkshire-bred horse—Mr. C. E. Clark's Raby—was awarded the palm. The pony classes found Mrs. Fred Holmes's Love Letter invincible, and that lady also carried off the principal driving prize for Pickwick.

The display of cattle was the best that has been seen at Malton for some years. It contained fifteen more exhibits than a year ago, and was divided into six classes, all of which were well filled. In the class for Shorthorn bulls over one year and not exceeding two years and six months old Mr. Snowball's Western Grand Master, a son of the famous sire Look-a-head, was selected for first place. This is a fine roan yearling that has already been bought for emigration to South America. The Earl of Somerset, with which Mr. Boyes, of Ryton, Malton, took second prize, happens to be by the same sire. The reserve card was given for a shapely roan yearling to Mr. Strickland, of Brandsby, and a commendation ticket presented to the Countess of Carlisle for an exhibit in the same class. In the next section, that for Shorthorn bulls under twelve months old, Mr. Snowball carried everything before him with three sons of Look-a-head, the first prize going to a ten-months-old roan, the second to Crown Prince, while the reserve honour also went to the offspring of Look-a-head—Weston Chief. Lord Middleton had to be content with simple commendation for the representatives of the Birdsall herd, known as Bellman. The show of cows was numerous and above the average in merit. In the aged class there was a keen struggle between Mr. Strickland's Lady Derwent 3rd and Mr. Hebden's Jewel, the judges eventually giving preference to the former. In the yearling heifers Lord Middleton easily took first place with Birdsall Waterloo, by Golden Sceptre, while in the class for heifers under twelve months old Mr. Richardson's Queen of the Gwynnes had a popular victory, followed by more progeny of Look-a-head in the second prize and reserve number, the one shown by Mr. Hebden and the other by Mr. H. Weighell. The awards in the cottagers' cow class elicited interesting competition.

In numbers sheep were about the same as last year; in merit they were an improvement. The six classes into which the forty-one exhibits were divided consisted chiefly of shearling Leicester and longwool species, and in most instances both breeds were shown in the same classes. The section for shearling Leicester or longwoolled rams, which was led by Mr. Jackson, of Bridlington, and Mr. J. M. Strickland, of Brandsby, was an exceptionally strong one. An even stronger class, however, was that for tup lambs, Leicester or longwoolled. The best of sixteen exhibits was adjudged to be that of Mr. Jackson, of Bridlington, Mr. John J. Simpson, of Leicester taking second place. The show of pigs was the most satisfactory that has been seen at Malton since 1896. There was, too, a creditable display of dairy produce.

Market Weighton Horse Show.

The show of the Market Weighton Horse and Foal Society, held on Thursday, was undoubtedly the most successful ever held in the district, and was a striking testimony to the good work done by the Society during its thirty years of existence. True, the total entry fell short by twelve of last year's numerical record, but the catalogue containing 182 exhibits was much above the average. There were thirty classes, or an increase of three, with an average of six entries. The Society is fortunate in having so many willing patrons, whose financial support was reflected in the prize list. Of the total of £180 subscribed by the Society and its supporters, as much as £55 was set apart for the benefit of young stock. In accordance with the policy of the past, the whole of the classes, with one exception, were open, the breeders hereabouts not being afraid of competition, from whatever quarter it may spring. The inspection, both on the part of the judges and the visitors, the attendance of the latter being satisfactory, was made under fairly good meterological conditions, the one drawback of the day being a strong wind which for hours swept over the show ground.

As is invariably the case, Hackneys constituted the feature of the show. Colt foals were both strong on paper and in the ring. Mr. Thomas Hall's entry by Langton secured a special, and was put at the top of the class, his companions in honour being Mr. William Richardson's Bonwick Chocolate colt, Mr. J. Heppleston's bay by Gentleman George, and Mr. C. Scorah's chestnut, which is sired by His Majesty. The filly foals numbered eleven, or five less than the colts, and they formed a neat-looking

lot. The successful exhibits came from the studs of Mr. George Wilson, Mr. Charles Moore, Mr. J. Yates, and Mr. William Stather, and the sires represented were Revival, His Majesty, Acid Drop, and Star Fireaway. The progeny of Pomfret Performer were very much to the fore in the yearling class. Mr. G. A. Brown was first with a filly of beautiful quality, and Mr. Heppleston second with a chestnut showing a trifle better action than the leader. Mr. Henry Moore's chestnut, B. B. Marionette, soon found its way at the head of a select number of two-year-olds, and later in the afternoon gained possession of the Hackney Society's silver medal. Second in the class to Conquest's promising offspring stood Mr. John Wreghitt's chestnut Londesborough Lily, which boasts Sir Augustus as her sire. Lady Connaught was among the brood mares, and breeders will anticipate that her many excellent points again told. Mr. Heppleston obtained the second award with Countess Alice, also a previous prize-taker. A fair class of two-year-old stallions lined up before the judges. The sire first on the list was Mr. John Holdridge's unnamed chestnut son of Forest King. As at Malton, Mr. W. T. Young supplied the second winner. Two splendid yearlings turned up in Mr. Robert Whitworth's Commerce, and Mr. A. Kelsey's entry, a chestnut son of His Majesty. In the judging the advantage lay with the Londesborough stud youngster which was in every respect worthy of the front position assigned to him. Mr. Thomas Hall's Langton Masher—a type of sire which is wanted at the present day—has achieved notable successes at Islington, Edinburgh, and York, and on Thursday he was singled out for premier honours in a capital class, in preference to Mr. Henry Moore's good looking Bridlington, a sire of a different sort from the son of Garton Duke of Connaught. But the Burn Butts stud was not to be denied, for Mr. Moore produced the chief three-year-old in his brown Lobelia, whose praises have been sung at Islington, York, and Malton. A nice roan mare, owned by Mr. Robert Hornsey, came second, and the class was a good one. Past winners were likewise in evidence among the horses under saddle and in harness. Market Weighton is no exception this year to the rule of improvement at East and North Riding shows, in regard to draught horses, but the character of some of the exhibits on Thursday suggested the thought that the possession of two or three more good Shire stallions would be an acquisition to the district. Hunters filled about six classes, but there was a lack of competition among the youngsters. Geldings and mares of any age were numerically stronger, and the six animals which faced the judges had the hall mark of merit. Mr. John Hadland's five-year-old bay gelding was placed first; Mr. J. Y. Catton running second with his grand chestnut mare, Ladysmith. There was only a trio of three-year-olds though they were well grown. Mr. W. Blythe's chestnut gelding by Sherbrooke took the eye of the presiding authorities, next to the Huggate representative coming Mr. T. S. Brigham's bay gelding, a son of Dark Continent. The pick of the ladies' hacks was the Pocklington and Malton winner—Messrs. F. J. and H. Grainger's Sunflower, a chestnut with smooth action and nice manners. Mrs. Powell, of Pocklington, was second with a six-year-old chestnut mare.

Wickhambrook and South Suffolk.

The Wickhambrook and South Suffolk Colt Show Association's exhibition, which is more than a colt show, is a movable one, and the success of its operations has been most marked when the more populous places have been visited. Ickworth can hardly be placed within the category of a "populous place," but within a few miles is the county town of Bury St. Edmund's, while the attractions of Ickworth Park are so considerable that the executive of the Society were justified in accepting the kind offer of the Marquis of Bristol, Lord Lieutenant of the county, to visit his charming and delightful country home. The reception accorded to the Society on Wednesday was in keeping with the cordiality of the invitation given. The show itself was an exceedingly good one, both in respect to quality and number, the entries totalling up to 288, in comparison with 707 at Sudbury last year, but there was a class for neat stock, which was not included in this year's list.

In the majority of the Shire classes there were some uncommonly good animals, showing very considerable merit. In the class for mare with foal at foot Mr. J. Sturley Nunn's beautiful and well-known prize-winner Maud, by Magnus, was assigned to the position with which her name is now so intimately associated. She was first in her class, and secured the silver medal presented by the Shire Horse Society for the best Shire mare. Earl Cadogan was second in the class with a heavy mare in good natural condition. The foals were not, as a whole, much to boast of. Messrs. J. Gough and Sons were in the front in the horse foal class with a heavy, stylish filly, which was first at Ixworth; while Mr. Edward Jillings, Lavenham, was second with a very useful colt. The same gentleman took prizes for filly foals, both by Norman Chief. Mr. F. H. Jillings, Cockfield, took first prize in yearlings with a choice filly. As to the two-year-olds, Mr. F. Baldwin won easily with his Keddington Maggie, a fine young mare, second at the Suffolk Show. Mr. F. H. Jennings's Bloodstone, a prize-winner at several shows, was second. Mr. F. Baldwin sent his grand mare Suffolk Lass, but she went a bit lame, the result of an accident on returning from the Hadleigh Show, where she was first. Mr. Baldwin scored also in the three-year-olds with Yorkshire Ben, a nice filly, and well known in the prize ring.

The display of Suffolks was an exceptionally good one. In the class for mares with foal at foot Lord Braybrooke was first with a grand mare, Mr. George Courtauld being second with an animal doing credit to that gentleman's stud at Cut Hedge. Sir Cuthbert Quilter, Bart., M.P., was first in the horse foal class with a son of the well-known Prince Wedgewood, and the same gentleman took a like position with a filly foal by the same sire. The yearlings were exceedingly good, as were also the two-year-olds, Mr. W. R. Hustler taking the lead in the latter. Mr. E. F. Quilter showed his Bentley Belle, first at the Woodbridge Spring Show and second at subsequent exhibitions, which was, curiously enough, not noticed on this occasion. The three-year-olds produced the champion mare, Mr. E. F. Quilter's Bentley Duchess taking the silver medal as the best Suffolk mare. There were two mixed classes, one for a pair of mares and geldings of any breed, and the chief honour went to a pair of Shires belonging to Mr. F. H. Jennings, who sent a very choice Albert Edward mare. The other class was for a pair of van horses, and here the order was reversed, the judge giving the prize to a pair of Suffolks belonging to Mr. E. Le Heup Cocksedge, Mr. Byford contending that Shires could not be regarded as van horses.

The hunters were a small but good lot. Mr. S. Owen took the lead in mares with foal at foot, and also in foals; but in the class for yearlings this gentleman had to give place to Mr. L. G. Fisher, who had a very promising youngster in Marigold 2nd. Mr. W. Charters was first with his good-looking brown gelding Fitzjohn, and Mr. W. Harvey, Timworth, was second with a filly by Trayles, and Mr. C. K. Harvey was reserved for Mischief, which was first at Ixworth. Mr. D. W. Taylor showed an uncommonly good four-year-old in Sportsman, and he took second in the same class with Red Fox. As to the five-year-olds, there was such a large entry and a mixture of weight-carriers and light-weights that at the request of the judge the class was divided. Mr. P. M. Browne thereupon took the premier honour with his Melody in the heavy-weights, and Mr. D. W. Taylor's Peggy the like position in the light-weight division. Sir William Hyde Parker, Bart., presented a prize for the best three-year-old, the property of a tenant farmer. It was intended that this should be an open class, but owing to a little inadvertence it was closed, and several of the animals in the show were consequently excluded. This will, however, be remedied another year. Mr. P. M. Browne's Melody again came to the front.

The show of Hackneys was rather poor. Mr. E. J. Johnstone had a specially nice mare and a good mover, and she had a handsome foal by Duke of Connaught. With regard to the harness hacks 14 hands and upwards, Mr. F. H. Jennings had an easy win with his beautiful Chutney, a stylish brown gelding, and a beautiful goer all round. Mr. L. G. Fisher sent a pretty pony, Fairie Footsteps, of high quality. The Hackney Society's silver medal went to Mr. E. J. Johnstone's foal.

The sheep classes as a whole were about an average display, but the Suffolks were exceedingly well represented. The Marquis of Bristol was a most successful exhibitor, taking the silver medal presented by the Suffolk Sheep Society with his pen of three ewe lambs. There was a large entry of Suffolk ram lambs, and here again the Marquis of Bristol secured first and second, and the silver medal given by the Suffolk Sheep Society, as well as the silver cup which his lordship had generously presented for the best collection of Suffolk sheep by one exhibitor, Major Baird being reserved. Mr. J. T. Stockburn was a good third in the class. As to the Southdowns, Mr. George Courtauld took both prizes for shearling ewes, with choice pens, and first for ewe lambs, beating in the latter case the Earl of Cadogan.

East Kent.

After an absence of five years from Canterbury, the place of its inception, the East Kent Agricultural Society's show was last week again held within the confines of the city, the event taking place in Barton Fields on Wednesday and Thursday. The Society is really an enlarged substitute of the old Canterbury Fat Stock Show in its objects, and the annual shows take place at various centres within East Kent, thus causing interest in the Society to be spread over a wider radius than if the exhibitions were confined to one place. The exhibition was hardly up to last year's mark in size, a result no doubt of the war and the absence of the military element. At the same time there was no falling off in quality; in this respect the exhibition maintained its reputation.

Horses.

Of the horses agricultural breeds were most numerously represented. They were shown together without any separate classes for the different breeds, and altogether there were some three dozen good specimens shown. In the class for stallions a good brown colt of Mr. Greenwell's was first, with Revolution, a handsome six-year-old of Mr. T. Miles's, second; and the prize for mare and foal went to Lady Harry, one of Lords A. and L. Cecil's Clydesdales, to which a brown mare of Mr. Greenwell's was placed second. The East Kent tenant farmers' class for mare and foal was also won by one of the Lord Cecil's breeding, Cambridge Chimes, a nice bay mare, belonging to Mr. S. Swinford, Mr. Goodson's Saltfleet Gadfly coming second. There was a very strong entry for the premiums for mare or gelding foaled in or before 1897, no less than fourteen horses competing, and seven receiving mention. First prize was awarded to Messrs. T. and H. Simonds's Pansy, a splendid bay, which also took the Shire Horse Society's medal, and Mr. Greenwell and Messrs. J. and T. C. Robertson were second and third respectively. A brace of Mr. George Osenton's Shires won first and second prize in the class for fillies or geldings foaled in 1898, and another came in second in the class for fillies or coalts foaled in 1899, this class being won by Mr. Greenwell's young stallion; while in the same division a daughter of Saltfleet Gadfly won a third prize for Mr. Goodson. There were also three classes for hunters, and they were not over strongly filled. They included, however, some first-class animals. Mr. C. Hoare's bay, Milkmaid, won the premium for brood mares, Mr. J. C. Buckland took first and second with his bay geldings Sportsman and Royal respectively in the class for mares or geldings foaled in or before 1895 and up to 14st., and he also came in second in the class for mares or geldings up to 12st. with his grey gelding Duke, which was beaten for first place by Mr. Tice's bay gelding Prince. The Hackney classes were also not so well filled as usual, but some well-known show horses competed. Mr. Sidney Brunton took two firsts with Rosebery 2nd. and Worcester Ware, the first one of which also secured the Hackney Horse Society's silver medal for the best Hackney or pony stallion, and the second also won the Hackney Society's medal for the best Hackney or pony mare. Mr. C. T. Stanley's young chestnut, Rumwood, took first prize for stallions foaled in 1898, Mr. T. Smith came first in the 1897 foaled filly or gelding class with a pretty chestnut, which also won first in a class limited to East Kent, and Mr. J. C. Buckland's grey gelding, The Duke, won the premium for mare or gelding, open only to East Kent. In this latter class The Duke beat Mr. Tice's bay gelding, Prince, which was placed in front of Mr. Buckland's gelding in the hunter classes, the explanation of the seeming reversal being that though Prince was the best hunter The Duke was the best hack. In another class for Hackneys Mr. E. H. Goad won first and second place. A single class for Cleveland Bays was entirely filled by Mr. J. Finch's horses, and he won first and second prizes. In the classes for harness horses Mr. T. Miles was awarded a couple of firsts with Volatile, Mr. S. Brunton secured two first prizes, Mr. J. C. Buckland won a first with his brown gelding, Popgun, and Mr. E. H. Goad took first for pairs; while in the tradesmen's classes Messrs. Wagner, G. Stent, and T. Young obtained the three first prizes offered. Some capital jumping took place, one competition being won by Mr. H. Buckland on Mr. C. Buckland's Wood Pigeon, and the other by Mr. Jones's Tommy.

Cattle.

Shorthorns were the principal breed of cattle represented, and a fair share of prizes fell to local exhibitors. Mr. Joseph Thorley won two out of three first prizes offered, but the other was taken by the Executors of the late Mr. C. Collard, who also won a second as well as getting three h.c. cards. The Earl of Derby and the Hon. R. P. Nevill had the Sussex classes all to themselves, altogether only five of the entries coming to hand. They were, however, grand beasts, especially his Lordship's cow Mieux, which beat the Hon. R. P. Nevill's Birling Beauty 1st for first and second places in the class for cows. The Earl of Derby took both of the other first prizes, viz., for his young bull, Nero, and for his heifer, Dormouse. Some of the dairy cattle in the classes for Jerseys or Guernseys were of rare good quality. Of local prize takers Mr. H. Fitzwalter Plumptre was the most successful, taking a first and a second, while Mr. H. Hordern won a couple of seconds. All the other prizes went to Captain Fraser in Sussex. Mr. J. D. Maxted was the only exhibitor in the mixed breed class, and was awarded first prize for a very nice cow.

Sheep.

As usual, the competition in Kent sheep was of the keenest description, and the great feature was the marked levelling in type and character. Nearly all of the Kentish prize winners were represented, and a new exhibitor came to the fore in the person of Mr. G. Mount, who carried off the prize for ewe lambs. The shearling ram class numbered fourteen entries, with every one amongst them possessing admirable points. The first prize fell to a rare, lengthy and strong ram of Mr. W. Millen's, and other strong rams of Mr. C. File's and Mr. F. Neame's were placed second and third respectively. Mr. C. Fi[illegible] getting the r. and h.c. card for his second pen, was in the two-shear ram class he took another first with Mr. L. H. Page second, and Mr. W. Millen third and h.c. and h.c. The ewes were a very kindly looking lot all round. At the head of the class, which was for pens of three, was Mr. W. M[illegible] and Mr. H. F[illegible]

came in second, with Mr. C. G. Neame third, and Mr. C. File r. and h.c. Mr. Millen also won first place for his ram lambs, while a second pen of his took third prize, Mr. Frederick Neame coming in second. This class was a very strong one. So also was the succeeding one for ewe lambs, which, as before stated, was won by a new comer in Mr. G. Mount, who succeeded in beating Mr. W. Millen (second), Mr. H. Rigden (third), Mr. G. Farmer (r. and h.c.), and others. Southdowns were few, but of very high character. All the prizes but one went Chichester way, but Mr. T. Miles won second for a handsome pen of shearling ewes, and was also twice r. and h.c., once for ram lambs and once for ewe lambs.

Pigs.

Of the few pigs shown, Berkshires slightly predominated, and both for these and the Middle Whites competition for the most part rested between Mr. T. Miles, Messrs. White and Son, and Mr. G. T. Tomkin. For Berkshires Mr. Tomkin won two firsts and was h.c., Mr. T. Miles took a first, and Mr. W. P. Hampton a second. Messrs. White swept the board for first prizes in all three classes for Middle Whites, for which Mr. T. Miles was awarded a second, and Mr. A. Amos gained a first prize for a Big Black sow in the mixed class.

SOCIETIES.

Polo Pony Society.

Sir Richard D. Green Price, Bart. (President), occupied the chair at a meeting of the Council of this Society, held in the Royal Showyard, at York, on Tuesday, June 19th.

Finance Committee.

The secretary submitted the financial statement since the last meeting—viz., balance at bank, £112 12s. 4d., with £189 on deposit; receipts since the last meeting, £64 15s. 6d.; arrears of subscription, £40; accounts for payment, including the Society's contribution of £100 towards the Polo Pony classes at the Royal Show, £136 5s.

This report having been adopted,

Mr. Midwood called attention to the interest taken by the public in the Polo ponies exhibited at the Royal Show, as the judging-ring attracted a large number of visitors, and the ponies formed a most attractive item in the parade of horses. This Society had now been in existence seven years, their first volume of the Stud Book having been issued in 1894, and therefore they could claim 1901 for their Stud Book the recognition extended by the Royal Agricultural Society to all stud and herd books which had been in existence for not less than seven years. He would therefore move that the Council of the Royal Agricultural Society of England be respectfully asked to now place Polo ponies amongst the recognised breeds of horses in their future schedules.

Mr. Barker seconded the motion, which was unanimously carried, and the secretary was instructed to convey the representation to the Royal Agricultural Society of England.

Stud Book, Vol. VI.

Seven ponies were accepted for the Stud Book, having been inspected according to the rules. Suggestions with reference to future inspections were referred to the Editing Committee, while the Council accepted with many thanks two excellent photographs of herds of ponies which had been submitted for their inspection by Mr. J. Marshall Dugdale.

Measurement of Polo Ponies.

The secretary submitted to the Council the letter received from the Hurlingham Club intimating that their Polo Committee considered that the existing rules as to the measurement of Polo ponies met all requirements, and were universally approved of by all polo players.

The president pointed out that this reply brought the question of the measurement of Polo ponies to a deadlock. It was most important in the interest of breeders of Polo ponies that a definite height should be settled, and in the opinion of this Society 41 h. 2 in. was considered fair. They did not in any way wish to interfere with polo, but the Society could not let the matter rest, and he thought that the question should be referred back to their Measurement Committee with a view to securing the opinion of the country clubs.

Mr. Tresham Gilbey considered that the suggestions should be sent to the General Polo Committee of Hurlingham, as in the autumn of last year the Council were led to believe that any suggestions would be cordially welcomed, and he therefore thought that the proposals of the Council had not been seriously discussed.

The Rev. T. F. Dale agreed with Mr. Gilbey, and thought that it was most desirable that the General Polo Committee of Hurlingham should be made acquainted with the circumstances which induced the Council to offer the suggestions made by their Measurement Committee. He understood that it was thought that the Council of the Polo Pony Society were forcing the suggestions upon them, whereas the Council had been led to believe that such suggestions would be welcomed. The Council agreed to act on Mr. Gilbey's suggestion.

Arrangements for 1901.

It was resolved to refer to the Horse Show Committee the requisite arrangements for the next London show, and the offer of prizes and premiums at country shows for the Mountain and Moorland breeds. Mr. Midwood reported that Mr. William Stonebridge, a member of the Society, desired to offer a prize of £5 5s. at the next spring show to be awarded in any way that the Council might decide. The offer was accepted, and the secretary instructed to convey the thanks of the Council to Mr. Stonebridge.

Mounted Pony Corps.

Pursuant to notice the President moved:—"That in view of the acknowledged utility of the mounted infantry in the present war, the Government should in every way encourage breeders to supply the coming demand for horses of 14 h 2 in., and that the Society's shows in London and the country are excellent mediums for any scheme for giving effect to these suggestions.

The President, in moving the resolution, pointed out that the Society was interested in the production of riding ponies—in fact, he should like to see the title of the Society altered to the Polo and Riding Pony Society. The value of small horses, 14 h. 2 in., had been largely demonstrated in the present war, and the promotion and encouragement of their breeding was a matter which the Society ought to force upon the attention of the Government.

Lord Arthur Cecil seconded the resolution, urging the members to do all they could in the various districts to start mounted pony corps, as he understood the Government were favourably disposed towards such action.

Mr. Tresham Gilbey said that Sir Walter Gilbey, who was unable to be present, cordially agreed with the motion moved by the President, which upon being put to the meeting was unanimously adopted, and the secretary was instructed to convey same to the Secretary of State for War.

The Council then adjourned till Thursday, November 8th.

Large Black Pig.

At a recent meeting of the Eastern Counties District Committee of the Large Black Pig Society the following gentlemen were nominated as members:—Mr. A. H. E. Wood, Sudbourn Hall, life member; Mr. E. F. Quilter, Belstead; Mr. B. Posford, Falkenham; Mr. George F. Hempson, Ardleigh; Messrs. Spurling and Sons, Ipswich; Mr. Walter Wrinch, Erwarton; Mr. C. W. Haward, Wenham; Mr. Charles Cousins, Great Tey; Mr. D. A. Green, St. Andrews; Mr. F. M. Youngmman, Ashfield; Mr. Joseph Green, Fordham Hall; Messrs. J. and G. Stannard, Greenstead Hall, Colchester; Mr. C. H. Cordy, Walton; Mr. Felix Calvert, Furneaux Pelham, Herts; Mr. John Bourne, Mucklestone, Market Drayton; and Mr. W. Yeo, Priestacott, North Devon. The committee recommended that entries for registration in Vol. 2 of the Society's Herd Book should close on October 31st, 1900. The secretary (Mr. Ernest Prentice) reported a number of applications for export certificates for Large Blacks shipped to Russia and Canada.

Somerset County Agricultural Association.

The Finance Committee met at the Municipal Chambers, Taunton, on the 30th ult. There were present Mr. G. W. Walter (in the chair), Mr. James Cook, and Mr. T. H. Boys (secretary). The minutes of the last meeting were read and confirmed. The secretary produced certain accounts, which were now due for payment, and explained same, which the committee duly considered, and directed that cheques be drawn and signed therefor, namely, a grant of £100 for prizes that the Somerset County Association made to the Bath and West for its recent Bath meeting, and also £19 8s. 6d. for the purchase of members' second tickets according to arrangement. There were also certain prizes certified, the conditions having been fulfilled, also salaries and a small bill for solicitor's charges. The secretary produced a list of subscriptions in arrear, and stated that he hoped at the end of the financial year to receive the major portion thereof.

The General Purposes Committee met on the same day. Present: Messrs. A. B. James (in the chair), J. B. Lythall, Samuel Kidner, J. Kidner (Nynehead), T. Penny, E. A. Hardwick, F. J. Merson, H. Farthing, and T. H. Boys (secretary). The minutes of the last meeting were read and confirmed. The following gentleman were nominated and recommended to the Council for election to serve on committees for the ensuing year: Finance Committee: Lord Bath, Sir A. A. Hood, Bart., M.P., Messrs. James Cook, C. E. J. Esdaile, J. B. Lythall, J. T. Nicholetts, A. Peace, T. Penny, T. S. Penny, W. J. R. Poole, E. J. Stanley, M.P., V. Stuckey, and O. G. Walter. General Purposes and Emergency Committee: Messrs. James Cook, H. Farthing, E. A. Hardwick, J. H. Holloway, A. B. James, J. Kidner (Nynehead), S. Kidner, J. B. Lythall, F. J. Merson, T. Penny, T. S. Penny, A. Peace, W. Potter, A. C. Skinner and H. Stuckey. Sites and Showyard Works: Messrs. T. Chapman, E. A. Hardwick, A. B. James, J. Kidner (Nynehead), J. B. Lythall, T. Penny, T. S. Penny, T. N. Sully, and A. C. Skinner. Prizes and Judges Selection Committee: Hon. R. C. Trollope, Messrs. W. S. Beviss, J. H. Dunning, E. A. Hardwick, H. Farthing, F. J. Hayes, A. B. James, S. Kidner, A. E. Perkins, W. H. Smith, and H. Stuckey, and Colonel Helyar. Dairy Committee: Messrs. J. Burnett, A. Bowerman, F. H. Cheetham, C. L. Fox, J. H. Farrant, J. G. Haynes, E. Harden, T. F. Norris, and J. A. Tate. Poultry Committee: The Hon. E. J. Boyle, Messrs. J. G. Haynes, J. B. Lythall, T. F. Norris, T. Penny, A. G. Pitts, P. Percival, and C. F. Sampson.

The Council assembled on the same day under the presidency of Mr. Thomas Penny. There were also present Messrs. James Cook, O. G. Walter, A. B. James, S. Kidner, E. A. Hardwick, H. Farthing, J. B. Lythall, F. J. Merson, H. Stuckey, C. F. Sampson, W. S. Beviss, A. Bowerman, A. C. Skinner, J. G. Haynes, P. Percival, A. E. Perkins, J. H. Farrant, and T. H. Boys (secretary).

The minutes of the last meeting were read and confirmed.

The Secretary read a letter from Mrs. Elton expressing her fervent acknowledgment for the kind resolution of sympathy passed by the Council upon the death of her husband, Mr. Charles Isaac Elton, Q.C.

The Secretary read a letter from the Bath and West, acknowledging with thanks the resolution passed at the last meeting.

The minutes of the Finance Committee held that day were read, and on the proposition of Mr. Walter, seconded by Mr. Cook, such minutes were approved and adopted.

The minutes of the General Purposes Committee held that day were read, and on the proposition of Mr. James, seconded by Mr. S. Kidner, such minutes were approved and adopted.

On the proposition of Mr. S. Kidner, Mr. Robert Cornish, of Pixford, Bishop's Lydeard, was elected a member of the Association, and also a member of the Council in the place of Mr. J. F. Hall, who had with very great regret resigned that position.

Somerset and Dorset Horn Sheep Breeders.

A meeting of the Somerset and Dorset Horn Sheep Breeders' Association was held last week, Mr. F. Pope presiding. Half-a-dozen new members were elected, and the officers for the year were then selected. Mr. J. R. Blake (Isle of Wight) was chosen president; vice-presidents, Lord Eldon, Lord Bridport, Mr. E. J. Stanley, M.P., Col. Brymer, M.P., and Mr. F. Pope; treasurer, Mr. Thornton (Dorchester); solicitor, Mr. Huxtable; and secretary, Mr. Ensor. Messrs. S. Kidner (Milverton) and J. Chick (Dorchester) were chosen delegates to the National Sheep Breeders' Association. The Editing and Finance Committees were also elected. It was reported that, owing to the great increase in the number of members, Volumes VII. and VIII. of the Flock Book had run out, and it was decided to reprint them.

IN PARLIAMENT.

House of Lords.

Compensation to Farm Labourers.

On Friday Viscount Cross moved the second reading of the Workmen's Compensation Act (1897) Extension Bill, stating that its object was to extend the Compensation Act of three years ago in case of accident to farm labourers and those engaged in agricultural pursuits. The fears expressed on the passing of the measure of 1897 had not been realised, and the wisdom of the Act had since been established beyond doubt. That Act had worked most smoothly and most satisfactorily, and it was felt on all sides that the benefits might well be extended to agricultural labourers.

The Earl of Kimberley had no objection to the Bill, and could never understand why they were originally exempted from the principal Act. He was somewhat surprised at the very rosy views which the noble viscount took of the working of that measure. He had been under the delusion that there was very wide discontent with regard to it. The machinery was said to be unintelligible, while the wording of the Act had led to the most divergent and unsatisfactory decisions as to the meaning of the provisions. He was afraid that in this Bill the word "contractor" would also lead to much difficulty, but the measure itself seemed to fulfil the conditions of all Acts of Parliament, which was that they should not be intelligible to the lay mind. (Laughter.) He was glad, however, that the Bill had reached their lordships' House, but the agricultural labourers would have no reason to thank the Government for introducing the measure, as it was the work of a private member in the other House.

After remarks from Lord Camperdown, Lord Windsor, and Lord Stanley of Alderley,

Viscount Cross pointed out that the main points of the Act of 1897 had been finally determined by the House of Lords, and for the information of the noble

earl (Kimberley) he might state that the Act was now working so smoothly and so satisfactorily that the different insurance companies were asking much easier terms for insuring the risks under that measure than at first they were inclined to listen to.

The Bill was read a second time.

On Friday the Bill was again considered in committee and reported with an amendment to the House.

House of Commons.

Agricultural Holdings Bill.

This Bill as amended by the Standing Committee came up for consideration on Monday.

Mr. Channing criticised several provisions. He complained that the Bill did nothing to improve the status of the valuers and arbitrators, and that it did not go far enough to meet an essential difficulty, viz., the impossibility in times of depression for the tenant who had improved the land to obtain the sort of protection he needed.

Lord Willoughby de Eresby, while approving of many of the provisions of the Bill, insisted that the arbitrators should be compelled, both in the interest of landlords and tenants, to give some reasons for their decisions.

Mr. Long intimated that most of the points that had been raised would be dealt with by amendments standing on the paper and by new clauses. The main object in introducing the Arbitration Act procedure was to simplify and cheapen the machinery, and to enable the arbitrators to settle matters of fact once and for all, and allow appeal on matters of law only.

Earl Percy admitted the Government had done right in getting rid of the legal element as far as possible, but many new features of a debatable character had been introduced into the Bill. It was only right that the arbitrators should state the heads under which they awarded compensation.

Lord Hugh Cecil urged that the Bill should be made clear one way or the other, as there could be no object in passing an ambiguous measure. One system of law should be made to apply to a large area. He hoped the Government would not shut the door in the face of their own supporters in favour of hon. members opposite. (Laughter.)

The Attorney-General replied that all the Government were asking was that the Bill should be considered. Then all the points that had been raised could be dealt with in a proper way. The intention of the Government was that appeal on the question of law should be preserved, and if anything was needed to make that clear it would be considered on the report stage.

Mr. Humphreys-Owen hoped the Government would consider very carefully the suggestions that had been made.

Mr. J. Samuel suggested that the Bill should be suspended, and that a commission should be appointed to consider how the second clause would work if it became law.

Mr. T. G. Bowles said the Bill as it stood was a most remarkable example of referential legislation. It was a complete cryptogram. No one could understand it as it stood by itself, and to read it with anything like clearness one had to make oneself acquainted with no fewer than nine Acts of Parliament. The Bill was intended for plain men, and there was not a human being in the House who could understand it. Let them take the 10th section. What did it say? "Reference to the principal Act and to Sections 29, 30, 32, and 34 thereof shall be construed as reference to the Agricultural Holdings (Scotland) Act, 1882, and Sections 24, 25, and 30 thereof respectively." (loud laughter) "but reference to Sections 31 and 39 of the principal Act shall not apply." (Laughter.) Again, "Reference to the Arbitration Act, 1889, shall be construed as reference to the Arbitration (Scotland) Act, 1894, and reference to the Market Gardeners' Compensation Act, 1895, shall be construed as a reference to the Market Gardeners' (Scotland) Arbitration Act, 1897." The Bill was a complete puzzle. The Government knew what it meant, and why did it not say so? Let them put an end to this mischievous, false, deceitful, and dishonest system of coming to the House of Commons and asking it to pass Bills which did not say what they meant, but which only referred to clauses of other Bills. Such a system was neither creditable to the House of Commons nor to the country. (Opposition cheers.)

Mr. Heywood-Johnstone also complained of the trouble that was required for understanding the Bill.

Mr. H. C. Richards took exception to Clause 3, which in some cases substituted the Board of Agriculture as a tribunal for the county court. Was it intended, he asked, to hold a court at the offices of the Board of Agriculture? He was surprised that the Attorney-General should be satisfied with the provision which gave arbitrators power to "state a case." Legislation by reference was, he declared, unfair to the public, and he hoped Her Majesty's Government would endeavour to remedy the defects in the Bill which had been pointed out by several hon. members.

After a few remarks from Captain Sinclair, the motion that the Bill be considered was agreed to.

Mr. Channing moved the following new clause:—"Every contract of tenancy entered into after the commencement of this Act shall contain a scheduled record of the agricultural condition of the holding and its several parts, and of the buildings, fences, roads, and drains at the beginning of the contract of tenancy. At any time during a tenancy existing at the commencement of this Act, either party may require a record in similar form to be made by an arbitrator. Copies of all such records shall be deposited in the office of the registrar of the county court, and either party shall be entitled to inspect the same at all reasonable times, and to take copies thereof."

Mr. Long opposed the clause.

Lord Willoughby de Eresby and Sir William Wedderburn supported the amendment.

Sir J. Kinloch and Mr. Haywood Johnstone opposed the clause, the latter regarding it as unworkable.

The House divided. For the clause, 56; against, 142; majority against, 96.

The further consideration of the Bill was then adjourned.

Milk and Tuberculosis.

On the order for the consideration of the London Corporation Bill on Wednesday, Mr. Strachey moved the following clause:—"It shall be open to any local authority, dairyman, or person aggrieved by any such order, or withdrawal of such order, to appeal in a summary manner to a court of Petty Sessions having jurisdiction in the district in which the dairy is situate, and the court may either make an order requiring the dairyman to cease from supplying milk or may vary or rescind any order which has been made under this section. Pending the disposal of any such appeal the order shall remain in force."

A long discussion ensued, in the course of which Mr. T. W. Russell observed that in an appeal to Petty Sessions the corporation would have no voice, although their medical officer had reported that tuberculosis had been caused or was likely to be caused by the consumption of milk from a particular dairy. He believed in a court of appeal, but one of an independent character.

Mr. Hobhouse remarked that the court of Petty Sessions, which the hon. gentleman preferred to Petty Sessions, met only once every three months, and in the meantime a dairyman might be ruined.

Mr. T. W. Russell said he was willing to consult all the parties concerned, with a view to agreement upon a suitable court of appeal. The Bill, however, ought to be allowed to go through.

After further debate the House divided, and the numbers were:—For the closure, 98; against, 99; majority, 1. The result was received with laughter.

AUCTION SALES.

WOODCHESTER, near STROUD, GLOUCESTERSHIRE.

MESSRS. FULLER, HORSEY, SONS, and CASSELL will (unless previously sold as a whole) offer for SALE by AUCTION, in five lots, on the Premises, on TUESDAY, JULY 24th, at 11 o'clock precisely, the valuable FREEHOLD PROPERTY known as

THE SOUTHFIELDS AND CHURCHES WOOLLEN MILLS,

situated within two miles of Stroud, and containing an area of about 10½ acres, upon which are erected mill buildings, engine and boiler houses, manager's house, etc. At the same time and place will also be offered in lots in detail the

PLANT AND MACHINERY,

including a steam boiler, beam engine, 14 carding engines, eight picking and cleaning machines, Willey's and dusting machines grinding, balling, and spooling machines, etc., thread condenser, fire mules, two doubling frames, warping mills, 18 power looms, size mixing and sizing machines, brushing machines four Fuller's, hydro-extractor, dye copper and backs, tentering machine, hydraulic press and pumps, engine boiler, and other effects. May be viewed by orders and particulars of the property and catalogues of the machinery had of Messrs. SNOW, FOX, and HIGGINSON, Solicitors, 7, Great St. Thomas Apostle, Queen-street, London, E.C.; of Messrs. WINTERBOTHAM and SON, Solicitors, Stroud; and of FULLER, HORSEY, SONS, and CASSELL, Auctioneers, 11, Billiter-square, E.C.

ON FRIDAY NEXT, JULY 20TH, 1900.

60 DAIRY SHORTHORNS.

FOR MR. E. K. BICKLEY, AT THE FIELDS, ELLESMERE,

Adjoining Welshampton Station, on the Cambrian Railway, three miles from Ellesmere, eight from Whitchurch, and six from Wem.

ALFRED MANSELL AND CO. will SELL BY AUCTION, as above,

60 HIGHLY-DESCENDED SHORTHORNS, including a Grand Lot of Deep-milking Young Cows, the whole of the Beautiful Heifers, and six Splendid Young BULLS.

The Herd has been long and favourably known as producing some of the best bulls in the county, several having been sold for exportation at a high figure. The stock have not been prepared for sale, but are kept in their ordinary store condition, and will be found in a most satisfactory state as to breeding, of rich colours, with plenty of good hair and quality, and particularly good to buy. Exhibition has not been largely practised, but young animals have been sent to the county and local shows invariably with success: notably this season winning First, Second, and Third in the Class for Two-year-old Heifers at the Shropshire and West-Midland Show.

Conveyances will meet trains at Ellesmere and Wem.

Sale after 12 o'clock Luncheon.

Catalogues from ALFRED MANSELL AND CO., Auctioneers and Exporters, Shrewsbury, who will execute Commissions.

To Horsebreeders, Dairy Farmers, Investors, and others.

LINGFIELD, SURREY.—A compact Freehold Property, known as Sugham Farm, situate about one mile from Lingfield Station L.B. and S.C. Ry., whence London is reached within the hour, and about 4½ miles from East Grinstead, comprising capital homestead with range of farm buildings, together with about 57 acres of rich pasture land (five acres ripe for building), let to a good tenant at a rent of £120 per annum. Also arctorial tithe rent charge, commuted at £9 6s per annum, arising out of the foregoing property.

MESSRS. FAREBROTHER, ELLIS, EGERTON, BREACH, GALSWORTHY and CO. will SELL by AUCTION, at the Mart, Tokenhouse-yard, E.C., on Thursday, July 19, 1900, at Two o'clock precisely, the above valuable PROPERTY, in three Lots.

Particulars, with plan and conditions of sale, may be obtained of HERBERT SMITH, Esq., Solicitor, 43, Coleman-street, E.C.; at the Mart; and of Messrs. Farebrother, Ellis, and Co., 29, Fleet-street, Temple Bar, and 18, Old Broad-street, E.C.

TO FLOCKMASTERS AND OTHERS.

CHILWORTH, near GUILDFORD, SURREY.

Important Sale of a draft from the well-known Albury Park Flock of pure-bred Southdown Sheep, the property of His Grace the Duke of Northumberland.

MESSRS. HEWETT and LEE are favoured with instructions to SELL by AUCTION, in a Field near Chilworth Station, S.E.Ry.,

On TUESDAY JULY 31st, 1900, at Two o'clock precisely,

A selected draft from the Albury Park Flock of Pedigree SOUTHDOWNS, comprising:—

203 FLOCK EWES (all ages),
14 RAMS,
82 EWE LAMBS,
31 RAM LAMBS, and
65 WETHER LAMBS.

The Albury Park Flock enjoys an excellent reputation as one of the most noted pure Southdown Flocks in the kingdom. It has been established with great care by judicious selection from the best and purest strains in the country, and has invariably received favourable notice whenever exhibited in the showyards of the principal Agricultural Societies both at home and abroad.

Catalogues may in due course be obtained of A. PEEBLES, Esq., Estate Office, Albury, near Guildford, and of Messrs. HEWETT and LEE, Auctioneers and Estate Agents, Guildford, Surrey.

CHICHESTER ANNUAL SALE AND SELLING OF SOUTHDOWN SHEEP.

The above annual Sale will be held by

HOBGEN BROS.,

at their Repository in the Chichester Cattle Market, on Wednesday, August 8, 1900, at one o'clock precisely.

Entries for the Sale have already been made from the celebrated flocks belonging to His Grace the Duke of Richmond and Gordon, K.G., the Pagham Harbour Company, Messrs. Hugh Penfold, Alfred Heasman, and F. N. Hobgen.

The Catalogue will include several prize-winners at the various summer Agricultural Shows.

On view the morning of Sale.

Catalogues may be obtained of HOBGEN BROS., Auctioneers, Valuers, and Estate Agents, East Street, Chichester, and Midhurst.

BANBURY, OXON.

Freehold Flour Mills, together with modern Roller Plant and Machinery.

MESSRS. FULLER, HORSEY, SONS, and CASSELL are instructed to SELL by AUCTION, on the Premises, in one or more lots, on Tuesday, July 31, 1900, at 1 o'clock precisely, the valuable FREEHOLD PROPERTY known as the

GRIMSBURY FLOUR MILLS,

Banbury, fitted with a six-sack roller plant by Simon, of Manchester, with the necessary cleaning, dressing, and finishing machinery, steam and water power, etc.; also granaries and warehouses on wharf, fronting the Oxford Canal, extensive stabling, commodious family residence, five cottages, and outbuildings, and enclosures of rich meadow land, comprising in all an area of 56 acres 2 roods 37 perches. May be viewed by orders to be obtained of the Auctioneers, and particulars, plans and conditions of sale had of MESSRS. STOCKTON AND SONS, Solicitors, High-street, Banbury, Oxon; and of MESSRS. FULLER, HORSEY, SONS, AND CASSELL, 11 Billiter-square, E.C.

Note.—The above property will first be offered as a whole, and if not sold, the premises, fitted with motive power, suitable for any manufacturing purposes, residence, &c., separately, and the trade machinery in lots in detail.

BIBBY'S "CREAM EQUIVALENT" for CALVES.

An Ounce of Fact is worth a Ton of Theory.

A STRIKING FACT.

In our Spring number of "Bibby's Quarterly" we reproduced the photographs of two groups of Calves which are now being reared at the Hornby House Farm, Bedale, Yorks, by his Grace the Duke of Leeds.

One of the groups is being fed on New Milk and the other on Separated Milk and "Cream Equivalent."

We asked our readers to tell us which of these groups were fed on New Milk, and 707 Farmers, Farmers' wives, their sons and daughters competed for a small prize which we offered to those who guessed correctly.

445 selected the wrong, and 262 the right group.

We think the above striking FACT speaks volumes for "Cream Equivalent."

The "Cream Equivalent" can be had at 15s. per cwt., carriage paid to nearest station.

DEERING

IDEAL BINDERS, MOWERS, REAPERS, RAKES.

THE FIRST TO BE FITTED WITH ROLLER AND BALL BEARINGS ADOPTED IN 1891.

BEWARE OF WORTHLESS IMITATIONS. **Enlarged, Strengthened, much Improved. Further Reduced in Draught.**

THEY sweep to one side old style and imitation Machines with resistless force. Supplied to Lord Salisbury, Lord Rosebery, Lord Londonderry, Lord Moreton (Vice-president R.A.S.E.), W. Frankish, Esq. (Steward and many times Judge of Implements, &c., for the R.A.S.E.), Capt. J. C. Best (Steward of the Bath and West and Southern Counties Societies), the late Prince Bismarck, and most of the leading Agriculturists of all countries.

Strongest, Most Durable, Simplest,

Most Efficient, Lightest in Draught.

And **THIS IS WHY** Over 270,000 DEERING Machines sold in 1899 alone.

The LARGEST SALE in the World!

No Good Machines are Cheaper.

They have recently met and defeated Machines by all the leading Makers, including the Massey-Harris, McCormick, Harrison and McGregor, Adriance, Osborne, Plano, Wood, Johnston, Milwaukee, &c., &c.

10 First Prizes at International Trials in Europe in 1899, awarded to the Deering Machines.

Specially designed for British Crops, and every Machine Fully Guaranteed.

The DEERING HARVESTER CO.'S Chief Engineer visits this country every harvest with the intention of making the Deering Machines better adapted to the requirements of British Farmers than any others.

They *are* and *will always be* more up-to-date than any other.

Up to the present the Annual Sale of DEERING MACHINES in England and Wales since 1895 has been about double that of each preceding year.

THE AGRICULTURAL HOLDINGS BILL: THE REPORT STAGE.

During three days of the past week the House of Commons has given a portion of its time to the consideration of the Government's Agricultural Holdings Bill as it returned from the Standing Committee on Trade for the Report stage. Nothing now remains, as far as the Lower House is concerned, but the third reading, which, under the circumstances, can be but little more than formal. There may be some talking about some of the sections, but it is not likely that there will be any amendment. The House of Lords is likely to deal with the measure very shortly, and it is most likely that it will be passed as it stands, and with but little discussion. We are, therefore, in a position to consider the measure in the form in which it is more than probable that it will become law; but in doing so it is most important that we should also bear in mind the views expressed at the meeting of the Council of the Central and Associated Chambers of Agriculture, which was held on Tuesday last, for they show how far the new measure is likely to meet the views which are held by agriculturists in general—and by this term we mean both landlords and tenants. It will, however, be well in the first place, to sum up shortly what passed in the House of Commons, so as to appreciate the present position of the Bill.

The Standing Committee on Trade and Agriculture sent the Bill back to the House with a number of alterations, but what it did is now a matter of history, and really does not affect the matter, for apart from the fact that, after all, the work of the Committee is more suggestive than effective, we are more concerned with the present meaning of the measure than with the various metamorphoses through which it has passed. On Tuesday last, when the House of Commons first gave attention to the matter, after the measure came back from the Standing Committee, there were a large number of amendments to be dealt with. They were as numerous as they were futile. All the proposed new clauses came to nothing; but the right honourable gentleman who presides over the Board of Agriculture was persuaded to accept a new clause, which was moved by Mr. Hedderwick, and which, however, dealt only with Scottish tenancies, and which had as its object the reduction of expenses to the tenant. Mr. Long was quite right in accepting it, as it must be equally satisfactory to both landlords and tenants to the north of the Tweed. On Thursday, the third day of the discussion, Mr. Lopes moved to leave out clause 7 of the Bill. This section dealt with the law of distress in a somewhat drastic manner. Under the Act of 1883. the landlord's right to distrain for rent was apparently restricted to one year's rent; but when a case arose and came before the Courts, it was decided that the wording of the Act really gave him the right to issue a distress for rent for eighteen months past. The new Bill proposed to reduce this period to the twelve months originally contemplated. The Minister of Agriculture, however, saw his way to accept the proposal to leave out this clause; and we believe he was right in so doing, for to reduce the landlord's right to recover his rent is also to reduce the credit which he can allow to his tenant—and credit is much more to the farmer than to the trader; the former turns over his capital only once a year, and not once a month, or once a week, like the latter. It is, therefore, well that clause 7 was left out of the Bill.

And now it is time that we turned to the proceedings of the Central Chamber. There was a little breeze at the commencement of the proceedings which was perhaps not unnatural. It was complained that the meeting was convened at such a time that those members of the council who were also members of Parliament must either miss the discussion at the meeting or be too late to attend to the consideration of the Bill in the House of Commons. This was perfectly true, but the explanation of the chairman showed that any other arrangement was not possible under the circumstances; and the fact that his explanation was regarded as satisfactory was shown by the proposal for adjournment being generally declined. It was unfortunate that there was not more time, but time, like tide, will wait for no man.

The first objection raised by the meeting was as to the provisions of the measure relating to pastures. It was considered that that part of the Bill which deals with temporary pastures—as distinct from "permanent pastures"—ought to be made retrospective. With this view we agree, and we regret that Mr. Long could not make the concession. There is a great difference between a permanent and a temporary pasture. It may be very proper that the tenant should obtain the consent of his landlord to the making of the former; but that is no reason why he should lose upon the latter—as many will if the section remains as at present. The next point was as to the landlord's notice of counterclaim. Upon the motion of Mr. Lipscombe it was resolved that such notice should be given within seven days from the appointment of the arbitrator instead of within seven days from the commencement of the arbitration. This is reasonable and fair. It is right that the landlord should have a fair chance to make his counterclaim, but he ought to be in the same position as the tenant, and have to make it in proper time instead of springing it upon the tenant at the last moment as an underhand blow. We are sure that the majority of landlords adopt the same view that we do, and that they fully see that what is sauce for the goose is also source for the gander.

The next resolution which was carried was to the effect that the arbitrator should give particulars as to the sum which he awarded. This question is perhaps far more difficult than most people imagine. On the one hand it may be true that it implies distrust in the arbitrator to ask him for particulars—as the present Act, by the way, requires—but upon the other it is impossible for either landlord or tenant to discover whether there has been a mistake upon the part of the arbitrator unless they have some indication as to how he has arrived at his total. The Council was of opinion that particulars should be furnished; and we adopt the same view, although willing to admit that there is much to be said upon both sides.

We need not refer to motions which were not carried; and, therefore, the next point to which attention is needed is the question as to whether arbitrators (where not agreed upon by both parties) should be appointed by the Board of Agriculture, or by the local County Council. The opinion of the meeting was in favour of the latter. In other words, it was held that local valuers should be employed. There is much to be said for this view, but our own opinion is that no hard and fast rule can be made to work satisfactorily in such a case. Perhaps a reasonable compromise would be for the County Council to make a list of suitable arbitrators, but to leave the parties a right of appeal to the Board of Agriculture. The next resolution was proposed by Professor Long, and had reference to cake consumed by horses upon the holding. Its meaning was that all horses should be reckoned whether regularly worked upon the farm or not. From the legal point of view it was unnecessary; but it made matters clear, and ought to show farmers their rights, and remind them that there is a decision of the courts which says that horses are "cattle." A further resolution decided that it would be well that a record of the condition of the holding should be recorded at each change of tenancy. The only real objection to this proposal was that it would incur expense. We do not see that this would necessarily follow, and we are glad that the resolution was passed, and sorry that it is not incorporated in the Bill.

We have not, of course, dealt with every point raised at the meeting, but we have dealt with those which are of greater importance. Speaking generally of the measure we can only repeat what we have already said more than once: it is not all that we could have wished, but it is decidedly a step in the right direction. In these days when "politics" and "policy" are too often taken as meaning the same thing we must be thankful for small mercies.

HAYMAKING.

The welcome change of weather last week came, it is to be hoped, in good time to save the bulk of the meadow grass crop from being spoiled. Most of what had been attempted to be secured previously as hay suffered damage, but probably, with the exception of the arable cuttings, this formed no large portion of the hay harvest. The season is naturally late this year, and there has always been a disposition in the farming mind, when the skies are promising, to wait for settled weather before cutting any large quantity of grass.

The common custom of doing so does not, of course, recommend itself to scientific, or even rational teaching. Vegetable physiology discloses the fact that after any plant has bloomed its stalks rapidly harden, and are converted to woody fibre, the succulent juices being withdrawn to assist the development of seed. Science, then, advises that the meadow should be mown as soon as the bulk of the grass has arrived at the flowering stage, and that if there be any great delay afterwards there is serious deterioration. Seeing this to be the case, and bearing in mind that there is another way of converting grass into a good winter food for stock, besides making it into hay, the argument has been advanced that grass ought always to be cut at the proper period, before quality has become impaired, and that, in the event of unfavourable weather for haymaking, it should be stacked green for silage. The course taken by a North Wilts farmer some few years since, when it was a risky season for haying, has been highly approved. He provided horses, carts, wagons, mowing machine, and every other implement requisite at the disposal of his men, and after letting the entire harvesting to them at a fixed price per acre, left it entirely to their discretion, according to circumstances, as to whether the grass should be placed into an ensilage stack, or stirred about by the haymaker for hay.

If a similar course had been taken during the dripping June of this year by farmers generally we should have had no complaints of spoiled hay. The copious rains that fell would then have proved wholly beneficent, whereas there have been grievous mishaps from many districts by those who attempted to wage war against the elements while the skies dripped ruin upon their arable takes, at least. Our June drip, according to the observations of the Meteorological Society, proved the greatest experienced since 1890. Its record is 2·[illegible] inches, against 0·[illegible]

June last year, 0·95 in June, 1898, and 1·71 in June, 1897. The number of rainy days therein was registered as sixteen, against an average of twelve for the past thirty years. Should July continue to impart the amount of sun and heat experienced last week, the bottom moisture from these soakings will prove a blessing indeed.

Make hay while the sun shines is a very old proverb, and it must be admitted that it cost little labour or expense to convert grass into good hay last week. Those, however, who had the most labour-saving machinery were best off. The grass having been peeled from the meadow by the machine, a pony perpetually working the hay-maker would, in less than two whole days of burning heat, bring the fodder into fitting condition to be drawn into big whales by the horse-rake, when an excellent system was to make large cocks of it, and after clean raking the ground allow them to remain some days conditioning, should the weather keep fine, ere carting them to the stack.

At the stack itself, an elevator, worked by pony gear, saves not only an enormous amount of hand labour, but its severest strains on muscle. Farmers have ofttimes remarked that, loudly and bitterly as labourers have often declaimed against mowing and reaping machines for taking the bread out of their mouths, never has one of them ever been known to utter a single word against the elevator or stacker. But wages have, in the past, risen so very much in conjunction with the more general adoption of these machines for lightening field work and harvestings that it only seems most unreasonable for working men any longer to raise their voices against them.

One thing is perfectly certain, that should the scarcity of labour difficulty in the near future press much more severely than it does at present, means will have to be devised for bringing more of these machines into use, otherwise the grass is likely to rot on the ground for want of ways and means to deal with it. Our greatest need will soon be a wise, beneficent, National Co-operative Union, one of the leading objects of which should be the establishment of a depôt of labour-saving machines and implements in every rural district, to be for the hire of any and all requiring them. If such a revolutionary change could be brought about, it would prove the very salvation of the small class of farm occupiers, who have not the means to buy labour-saving appliances, and, if they had, would scarcely find it economical to do so. But how could the large sums of money be obtained which it would cost to establish these numerous depôts? The reply can be embodied in a single word—co-operation. The British farming community has but to copy a system which has been worked successfully in Germany and Belgium on a large scale for many years, and capital would flow into the coffers of the co-operative societies establishing such depôts, in whatever volume might be required. The system is known world-wide as the Raiffeisan, founded on the acknowledged principle that bankers and capitalists will lend tenfold larger sums to a number of farmers or traders banded together than they would lend to the same persons in separate small sums, single-handed.

Good haymaking requires skill, even in sunny, hot weather. Indeed, many old, experienced farmers say that it requires the exercise of quite as much art to equalise the drying under a burning sun, and secure the fodder in fit condition, not too scorched, and yet sufficiently moistureless not to take fire in the stack, as it does to keep hay from spoiling in the field in catching unfavourable weather. Hence the utility of conditioning by the cocking system.

Chester Cattle Fair.—This fair was held on Thursday, and was a quiet one. The supply was considerably in excess of the demand, which was restricted on account of the poor attendance of buyers. Very few sheep were on offer. Prices: Milch cows, £15 to £22; calvers, £14 to £20; barrens, £10 to £15; heifers, £8 to £15; stirks, £5 to £9; bullocks, £11 to £14; sheep, 24s. to 28s.

SAMPLES.

By a Man of Mark Lane.

The serious dearth of farm labour in Dorset, which promises to be acute this harvest time, is to be met in a novel way. The officer commanding the depôt at Dorchester has issued a public announcement that he will be prepared to give favourable consideration to applications for soldiers to help in the harvest. As many of the men at the depôt have been trained in field work they will probably respond readily to the appeal for their temporary assistance in a real emergency.

Mr. Buchanan has given notice to move the rejection of the Agricultural Holdings Bill on the third reading. Mr. Alfred Thomas has placed the following amendment on the paper to the same stage of the Bill:—"That this House, while recognising that this Bill effects desirable reforms in regard to the law relating to landlord and tenant, is of opinion that no Bill dealing with agricultural holdings in Wales which does not embody the recommendations contained in the unanimous Report of the Royal Commission on Land in Wales and Monmouthshire will afford an adequate remedy for the admitted grievances of Welsh agricultural tenants."

The Departmental Committee appointed by the Board of Agriculture to inquire into the conditions under which agricultural seeds are sold have held numerous sittings recently, under the Chairmanship of the Earl of Onslow. A considerable amount of evidence has been taken, and the Committee hope shortly to be in a position to close this portion of their work and to proceed to the consideration of their report.

This morning the *Daily Telegraph* has a series of reports from its own correspondents in various parts of England on the labour question in relation to the harvest. They show generally that there is great scarcity, made more pronounced than it would otherwise have been by the calling up of the reserves and the embodiment of militia regiments. In a few districts, however, the scarcity does not appear more intense than has been the case for some time. To questions whether the miltary authorities have given or can give help during the harvest, the replies indicate that little assistance can be found in this quarter, as the depôts generally contain but few men, and those only young recruits.

The receipts on account of Revenue from April 1st, 1900, when there was a balance of £3,517,047, to July 7th, 1900, were £26,775,935 against £29,199,890 in the corresponding period of the preceding financial year, which began with a balance of £8,919,173. The net expenditure was £47,121,476, against £33,097,922 to the same date in the previous year. The Treasury balances on July 7th, 1900, amounted to £3,008,305, and at the same date in 1899 to £2,981,861.

AGRICULTURAL POLITICS.

By a Lobbyist.

Mr. Walter Long has been suave, conciliatory, and practical in his attempt to guide the Agricultural Holdings Bill through the House of Commons; but he has by no means bought off Radical opposition. It will be renewed with all its virulence when the measure comes up for third reading, though Mr. Buchanan, who will move its reaction, is not a born leader of cohorts. He had an excellent academic training, and to-day he is academic in everything he does—in inspiration, in manner, and in speech. However, he will leave behind him a stout and solid phalanx, moved to all the more bitterness because of the attitude which Mr. Long felt compelled to assume towards certain suggested amendments. Had Mr. Long been able to accept Mr. Channing's suggested clause providing compensation for disturbance, the Radical temper would have been mollified. But Mr. Long comprehended that the Royal Commission had laid down that the tenants who have been compensated for disturbance cannot be compensated for improvements.

The Radical mind cares nothing for the Royal Commission. To them it was nothing but a well-manipulated device of Mr. Chaplin, aided by Mr. Long, to enable the landlords to escape their righteous obligations. Was it not the parent of the Act which relieves the agricultural ratepayer at the expense of the general taxpayer? To adduce the Royal Commission, therefore, as a justification for refusing the request was to accentuate the bitterness of the Radical opposition and to lend a toughened fibre to its backbone.

I fear me, too, that Lord Hugh Cecil did something to give an even more strident tone to the Radical opposition. Lord Hugh is a young fellow of remarkable originality of mind and tenacity of purpose. Great as is his father, I believe that Lord Hugh is entirely independent of the Premier's instruction and inspiration. However, the House, or, rather, the Radical section of it, sometimes persists in thinking otherwise. It believes that he gives expression to views which the statecraft of his father has led him to perceive it would be unwise for he himself to utter. Hence it was that when Lord Hugh deprecated the idea that the tenant, by the mere fact of his occupancy, has acquired a right over the owner's property, the Radical heather was in a moment on fire.

"The earth is the Lord's," quothed they very cynically, "and the fulness thereof." The tenants, in fact, ought to be thankful—so they maliciously proceeded, forgetting thus, what was the very purpose of the Bill—that they are permitted by their labour to add to the value of the soil. Moreover, they ought to be grateful for the knowledge that it is only by a landlord's mercy they are permitted to remain on that improved soil. These politicians, when they had renounced their cynicism, remembered their neglected Ricardo. "Rent," said that economist, "is that portion of the produce of the land which is paid to the owner for the use of the original and indestructible powers of the soil." It was with Ricardo the Radicals opposed Lord Hugh Cecil. Though they believed they had the dialectical victory, they were not entirely satisfied with it. It did not count in the division lobby.

The mere fact is, however, that had the Radicals been less stiff-necked, they might have found Mr. Walter Long even more conciliatory. Mr. Channing was sufficiently definite in the issue he raised, but when to this was added a rugged determination—I use the word "rugged" because the effort lacked proper discipline—to remove all limits to the improvements to which the Bill applies, then there was upon Mr. Long the duty of setting a stern face against the too-mathematical intentions of his antagonists. "Is agriculture," asked one of the most intelligent of the would-be amenders of the Bill, "in such an abundantly flourishing state that any improvement of the soil ought to be discouraged?" An excellent interrogation, were it not that landlordism is not in altogether so flourishing a condition that it can permit new limits to be placed upon its income, that it can allow itself to be oppressed by the fear that the bankruptcy court has been brought a little nearer.

The Radicals, indeed, overdid the whole business, and rendered it somewhat difficult for Mr. Long to express the sympathy he must sometimes have felt. That Mr. Long is not, as one of his asailants declared, "antediluvian even in his Toryism," was proved by the vigour of his antagonism to the effort which Lord Percy made to strike out a provision permitting a tenant to utilise a portion not exceeding one acre of his holding for garden, orchard, or osier-beds. By the way, there is something in the contention that the result of this provision may be that the landlord will not only have to pay compensation for improvements in this direction, but be landed with an adjunct to his property actually reducing its value.

However, Mr. Long sternly resisted the influence of this thought because of his evident conviction that the interests of the tenants were superior to it. I repeat that the Radicals were too impetuous, too far-reaching, too drastic in their purpose. They seemed to have forgotten that it was never the intention of Mr. Long and the Government to initiate an economic revolution. They only claimed to desire reform; and I do not know that they ever pretended their reform would be colossal in its influence, and at once bring smiling plenty on a visit of profit to a bereft land.

The one impression that I have caried away from the debates of this week is that the most perfervid protestations and the most florid professions, were inspired by insincerity. Members

made them with an eye on the electoral clock. Could you have laid bare the workings of their mind you would have seen the thought reflected as to how this or that idea would strike the elector at the General Election. Of course, there must be exceptions made to this general charge of insincerity. Men like Mr. Channing and Mr. Fletcher Moulton—whom, by the way, I would rather have seen giving what I may describe as a more scientific indication of the famous Callington platform—brought an element of practical value to the discussions. You might disapprove of Mr. Channing's compensation for disturbance proposal, but you could not but admire the strenuous common-sense he brought to its advocacy. Would that he could concentrate this common-sense generally upon agriculture in preference to diffusing it over every question, from debatable Dan to debatable Beersheba.

But, generally speaking, the whole of this protestation and perfervour was unreal. You were enabled already, with easy premonition, to prophesy that during the general election the tenant farmers would be told that this Bill, so far from seriously benefiting them, is a delusion and a snare, and intended only to postpone effective legislation, and to still further buttress the position of the landlords. The orators were—just as they were over the debate upon the Bill extending the principle of compensation for injuries to tenants—intent upon finding catch phrases and taking arguments for stump orators and pamphleteers.

"The agricultural constituencies will be reminded," said one of the Radical Parliamentarians, "that the Liberal Party voted for protecting the tenant from capricious eviction, and that the Conservative party voted against it." There you have the whole business in a nutshell. The nearness of the election—the fact that men already perceive its shadows athwart their path—is demoralising to the Parliamentary tone. Still, the Bill will pass. Its fate is assured. Mr. Long's moderation will be found to have conciliated the Lords.

PRACTICE WITH SCIENCE.

Road Material.

Engineering says that the desirable qualities for road-making and road-repairing material are hardness, toughness, and weather resistance. For heavy traffic the best materials are traps, basalts, green stones, syenite, quartzose grits, and cherty sandstones. For moderate traffic the harder limestones are sufficiently durable, and form smoother roads. Furnace slag is also a good material. Stone for road-making should perferably be hand-broken, and screened through a ring gauge of from 2in. to 2½in. diameter. Stone-breaking hammers weigh from 1lb. to 1½lb., with heads 5in. to 6in. long, and 18in. handles for use when sitting, or 3ft. handles for work when standing. For every ten such hammers there should be one weighing 2lbs. to 3lbs., 6½in. head, and 3ft. handle. An ordinary labourer can break from 1½cwt. to 2cwt. of soft, and ½cwt. to ¾cwt. of hard, stone per day. To find the area of surface that can be covered by one cubic yard of broken stone, when the thickness of the layer is given and the metal is not rolled, divide 36 by the thickness of the layer in inches; when the metal is rolled, divide 27 by the final thickness in inches; in either case the quotient gives the number of square yards that will be covered. Stone used in road repairs should be laid in layers not exceeding 3in. at a time. Cart ruts should be filled in, not with lumps, but with broken stone of moderate size.

Yorkshire Agricultural Show at Doncaster.—In connection with this important show the Great Northern Railway are making special arrangements for the conveyance of through vehicles with live stock and other exhibits. Information as to rates, etc., can be obtained from the company's agents or from the chief Goods Manager, King's Cross Station. The Great Northern Company will have an office on the show ground, and their representative will be in attendance. This company has a splendid service of express passenger trains to and from Doncaster.

Stackyard Destroyed by Fire.—A destructive fire occurred on Tuesday, at Corsbie Farm, which is situated within the burgh boundaries of Newton-Stewart. The yard was filled with five huge stacks of last season's hay, each containing several thousand stones. The fire was discovered almost immediately it broke out, but before any assistance could be obtained the whole place was in a blaze, and nothing could be done to save any part of the hay. As the farm is situated at the highest point reached by the gravitation water supply, the hose service was of no use, and nothing could be done beyond keeping the flames from reaching the adjoining farm buildings. The loss amounts to between £250 and £300. It is stated that two little boys set fire to the stacks.

THE GARDEN.

During the past week the weather has been much finer and drier, though with rather more of strong winds than we usually experience, or expect, at this season. The warmth and absence of rain have already benefited the potato crop considerably, having checked the too exuberant growth, and at the same time promoted the formation of tubers. These are now in many cases of very fair size (the earlier varieties of course), and are rapidly gaining in substance and flavour.

My old favourite the Beauty of Hebron is again to the fore, although I was unable (without sending too far afield) to obtain seed of the white variety, so had to be content with what I could get, which appears to be a kind of half-bred sort between the two, some roots being nearly white, others shaded and blotched with pink, and others altogether pink in colour. However, they have done exceedingly well so far, some of the rows being perfect pictures, and though planted from one to three weeks later than a good breadth of the Early Regent, are now yielding plenty of good-sized and well-flavoured tubers before the latter are ready. These, however, are apparently not the true variety, though very near it, and promising for an excellent crop presently. I did not like the look of the seed when planting, though obtained of a very respectable firm (local). It is a curious and very amusing fact, though strictly true—at least, in my own experience—that one can never depend upon anything of this kind when obtained from a local dealer, and as a matter of fact it is quite the exception to get anything at all true to name in this way. It is better in every way, as well as usually cheaper in the end, to obtain all one's supplies from a really good firm, with a reputation to maintain, even if it does cost a little more in the first place.

Scarlet runners are now rapidly climbing the sticks, and so far promise well. As soon as they reach their limit the point of each plant will be pinched out to promote the formation of lateral growths, on which the bloom and "fruit" is chiefly produced. The bulk of my rows of this crop occupies a well-sheltered and yet fairly open bit of ground sloping gently to the south-east, where they get the full benefit of the sun during the early part of the day, with a light shade from the late afternoon, while the subsoil is nearly always kept moist by the gentle trickling of water from some rocks hard by. These conditions appear to suit the plants admirably, and we anticipate a good crop.

Tomatoes in the open air appear to be doing well so far, but require a good deal of attention in removing all lateral growths, tying up the main stems to the sticks, and shortening the lower leaves lightly. My own plants, which principally occupy a very warm and sheltered position at the foot of a high south wall, with shelter on nearly every other side as well, are looking remarkably well, but though extremely healthy and vigorous, yet not at all rank, are not carrying as much fruit as I should like to see, so far—why I cannot explain.

Endive may be sown freely now, in an open and sunny position. There are two chief sections of this useful salad and garnishing plant—the curled and the Batavian, or Broad-leaved, the former being more suitable for early crops, and for garnishing, and the latter for the later sowings. The general treatment is very similar to that proper for lettuce, and the seed may be either sown in a nursery bed, and the seedlings transplanted in due course, or it may be scattered thinly in long drills where the plants can remain, merely thinning them out to 9in. or 10in. distance, by degrees, as they grow.

Finish thinning beet, also early turnips, and sow more seed of the latter. Plant out celery, celeriac, and leeks as fast as possible, and in cool or northern districts make a first sowing of cabbage, for the early spring crop, in the course of next week. For this batch I prefer Ellam's Early, Mein's No. 1, and the early Feltham, to any others.

Roses are flowering well, though late, and in good soil will probably continue in bloom for some time. Should dry weather set in, let the plants have a good soaking of water, or better still, weak liquid manure, once or twice a week, and a mulch of littery manure, not too fresh, or some similar material, will also benefit them considerably, especially on naturally light and dry soils.

Carnations, too, are in full bloom, and very beautiful, as well as fragrant, they are. Keep the plants duly supplied with water in dry weather, destroy earwigs, which are very destructive to these subjects, and commence layering as soon as possible. Seed of both carnations and picotees should be sown at once; even now the plants will be rather late in blossoming, but as they will come in after the bulk of the plants from layers are over, they will be very useful. Seed of hollyhocks, delphiniums, aquilegias, antirrhinums, pentstemons P. Torsoni), gentians, and others may be sown during the next fortnight or so with good results—the plants to flower next season, of course.

In the greenhouse plenty of both air and water are required now, with a light shade from hot sun. Seed of the herbaceous calceolarias may still be sown to afford small plants for next summer, and also cinerarias for late flowering. Get primulas potted off singly as soon as possible, and push them on rather quickly.

MILLING.

English Wheat and Bread.

At the recent conference of the National Association of British and Irish Millers, Mr. Mallett, of Exwick Mill, Exeter, read a paper on "English Wheat and Bread," which we think may be reprinted with advantage. He said,—Allow me to deal very briefly with the matter with which my name has been connected, as to the effort which the council of this Association has made in the matter of endeavouring to improve the quality—in so far mainly as strength is concerned—of English wheat. What your council has so far attempted has been delineated in the report which has been read to you, but I have pleasure in recording an effort made by my friend Mr. Rush. I allude to the circular sent out through the medium of the *Millers' Gazette*, in which he endeavoured to draw forth an expression of opinion from all the subscribers as to the quality of wheat now grown in this country. The somewhat limited number of replies he has received fully bear out my own ideas on this matter, which also coincide with many personal opinions that I have received. Out of eighty-six replies, fifteen are somewhat in this fashion:—

SUMMARY.

Quality.	Proportion able to use
1.—Poor for milling	None.
2.—Poor weak stuff	
3.—Poor weak stuff	None.
4.—Weak in ordinary year	50 per cent
5.—Lacking in strength	50 per cent
6.—	50 per cent. Fakenham.
7.—Millers finest, buy anything same price	
8.—Low percentage of gluten	10 per cent.
9.—Not so strong	
10.—First-class quality	
11.	33 per cent
12.—Add strength by foreign flour	
13.—Poor for gluten	50 per cent.
14.—Nondescript, glad to have better	
15.—Has introduced improved wheat	40 per cent.
16.—Weak	
17.—	50 per cent. Bedford
18.—Not glutinous	25 to 50 per cent.

That this consensus of opinion reflects the general view of the trade I am personally assured, and I trust it will sharpen the energies of the council of the Association to proceed in the path they have entered. But, gentlemen, in considering the question in all its bearings, which is incumbent on us, if any practical good is to come from our efforts, we must remember the conditions that have led to this state of affairs. Our farmers have not grown these wheats from choice, but from necessity. The inadequate returns from wheat growing in the past decade have compelled them to grow such wheats as will yield them some returns, at least, for their labour, and it is placed beyond doubt that these newer varieties of which we complain do yield better than the older sorts, the favourites of former and happier times in the East of England, such as long-berried Essex whites, the choice whites of Berkshire and the Midlands, and the old red Lammas of the West. And we must not create for ourselves a false position, for until we can get them wheats that will combine these yield-producing weather-resisting qualities with the strength that is now so much lacking, I, for one, would not set my hand to this matter at all. Now, can we do this? I have hopes, sanguine hopes, that we can, once let our seed growers know what we want, and I am strongly of opinion the scientific research which has already given our farmers quantity will give us quality, too. But they must know our wants. It is on this point that the action of our Association can be most useful. I have carefully perused the claims set forth by those growers to whom the agricultural interest is indebted for the improvements in yield so far effected, but in none of them can I discover any allusion, any attempt made, to improve the strength of the new wheats produced. Both they and the agricultural interest generally are ignorant of our requirements, and it is here that this Association can do much good by enlightening them. In some correspondence I have lately had with Dr. Voelcker, the Chemical Adviser to the Royal Agricultural Society, I find so eminent an authority is he, too, misses the point. He lays the blame much on us millers, on our roller system, on our not knowing definitely what we want, and hints that the introduction of modern methods of milling has depreciated the value of English wheat in so much that all our preference is given to foreign varieties as being more suitable for reduction by roller milling. Such being the opinion of the leaders in the agricultural world, we cannot wonder at the indifference as to quality produced that runs through the trade and public, and I want it now to go out from this Association that such is not the case that our true interest lies to a great extent with that of the English farmer, that our roller mills can grind anything he brings to us, but that we cannot put into his produce those qualities which did not exist there already, and which alone produce the wide difference in value between English wheat and foreign which we deplore as much as he. I assert therefore, this general meeting of the Association to confirm the efforts that our council has made, and so strengthen our hands in going on with this matter in such form and by such way as we deem best, and to help to bring about the consummation that the produce of our English wheat fields will no longer be neglected, but be sought after and become

once more an important factor in producing the food of the people.

At the close of his paper Mr. Mallett moved: "That this meeting confirms the action taken by the Council in endeavouring to improve the quality of English wheat, and trusts such action will be continued in such ways and by such means as may seem fit."

Mr. T. Birks: I have hitherto taken no part in this discussion because I believed my views were unorthodox. I am sorry I cannot think that it will ever be possible to grow any variety of English wheat that will be of much use to our miller as a "strong" wheat. As an East Coast miller and a user of native wheat in fairly large quantity, what we desire to have is wheat of good colour with a thin skin and a closely packed grain; this gives to our mixture exactly what we wish, viz., colour and flavour. If this Association can do anything to give us a larger supply of this wheat, it will benefit both the miller and farmer and will be a desirable object.

The resolution was seconded, and the discussion taken part in by Messrs. Cramphorn, Nicholls, R. Reynolds, sen., W. R. Voller, W. H. Yeatman, J. B. Whitworth, A. Baker, and the Chairman.

The resolution was unanimously approved.

Agricultural Imports.

The following is an account showing the quantities of certain kinds of agricultural produce imported into the United Kingdom in the week ended July 7, 1900, together with the quantities imported in the corresponding week of the previous year :—

	1899.	1900.		1899.	1900.

Failing to Report Glanders.—At Lambeth Police Court on Monday Stephen Sanger, of Old Kent Road, was summoned by the London County Council for having in his possession a horse affected with glanders and failing to give notification of the fact. There was a second summons against the defendant for causing a diseased horse to travel on a public highway. Mr. John Collman prosecuted, and Mr. W. H. Armstrong defended. On the 19th May Police-constable Murray, 115 P, saw a man in the defendant's employ working a bay gelding attached to a van loaded with hay. The officer noticed a sore on the horse's shoulder, and charged the carman with working it in an unfit state. The horse was in the possession of the police for some forty-eight hours, during which time it was kept in the greenyard, and on the 21st May it was brought to this court. It was then discovered that it was suffering from glanders and farcy. The police thereupon communicated with the Council's inspector, Mr. C. J. Humphrey, by whose direction the horse was slaughtered in the courtyard of the court. The present proceedings were then instituted by the Council. In support of the summonses Mr. Humphrey expressed the opinion that the symptoms of farcy must have been visible for from one to three days, and those of glanders for about seven days. From a post-mortem examination he came to the conclusion that glanders had been in the horse's system for about two months. For the defence evidence was called for the purpose of showing that neither the defendant nor his horsekeeper were aware that the horse was glandered, and Mr. Armstrong suggested that the disease developed quickly during the time the animal was in the possession of the police. Mr. Hopkins, whilst believing that the defendant did not know that the horse was glandered, was of opinion that the condition of the horse could and would have been discovered in a well-managed stable. He ordered the defendant to pay a penalty of £10 and £2 2s. costs.

BARLEY AND MALT.

By Hordeum.

Crop Prospects.

It is usually possible by the middle of July to form a fair idea of the prospects of the coming season. This year it is premature to take any definite view other than the rather gloomy one that it seems more than probable the new crop will fall far below the high standard of excellence we have of late years grown accustomed to.

The lateness of sowing has been followed by a backward spring and tardy summer so far as it has yet gone. Favourable conditions throughout June and July can do much to rectify any disadvantages caused by bad weather throughout winter and spring. The barley plant can be rapid in its growth, and with right conditions for ripening can sweep aside a variety of defects.

Unhappily thus far the outward and visible signs of such very necessary requirements of improved weather have continued persistently with us, so that one improvement will have to be general to be effective.

Good Farming

will tell its own tale more than ever as things now stand, for the conditions which will prove destructive to neglected or defective crops can be survived by areas which have received careful attention.

Were it not for the lateness of the season as compared with recent years we might still take a very cheerful view of the prospects of raising a good quantity of barley suitable for maltsters' use.

In any case it is too soon to take too gloomy a view of the position as it stands.

What purpose can be served by persistent crying down of our own crop it is not for me to define. Some of the leading writers in important journals can rarely find a single word of approval or praise. Take as an illustration the comments published this week by our leading newspapers. Careful observers in the various districts named may entirely confirm and approve of the views stated, but to visitors to some of the counties they appear

Strongly Pessimistic.

The references occur thus: "In Dorset the corn crops are about a month late." "In Somerset the barleys are often thin." "The cereal crops are not very flourishing in Hants." "In Berks, also, the barleys suffered from frost." "In Kent the short straw of the cereal crops is again a noticeable feature." "In the eastern counties the spring drought has left its mark upon the cereal crops in Essex." "In Suffolk the barleys are somewhat thin, mainly as the result of the cold spring." "In various parts of Norfolk the cereal crops cannot attain their normal height." "Cambridge has the prospect of a very short straw crop, but the corn looks like being of good quality; harvest will be three weeks later than last year." "No very cheerful reports of the wheat crop from Lincoln, and whilst barley is good on the chalk lands, it is poor elsewhere." "In Nottingham barley has suffered from drought." "In Northampton the cereal crops are much better on the strong than on the light lands." "In Bedford the cereal crops are mostly stunted." As a result of the dry weather in March, April, and May, the straw of the cereals is in some districts as short as it has been in any of the last twenty years." "In Oxon cereals have never fully recovered from the spring drought." "Straw crops still show the effects of late frosts in Warwick." "In Cumberland the frequent showers of rain have affected an all-round improvement." "From one district of Yorkshire it is reported that the cereal crops generally have not been so light for years; from another district, that, after the splendid showers, crops of all kinds are looking well." "In Anglesey the dry, cold weather of the spring exercised a retarding influence on all crops, so that the season is unusually late." Cereal crops promise well in Brecon, particularly barley." "In Carmarthen the cereal crops are a full fortnight later than usual." "In Aberdeen the barley is promising, the rains having arrived just in time." "A glowing report from East Perth states that all crops are looking better than they have done for the last twenty-five years." "In the 'Kingdom of Fife,' too, there seems to be little with which to find fault; barley and oats have seldom looked better." "In Mid-Lothian the corn crops are of good promise."

With Such a Report

it would seem that there is very little chance of much good arising later. Still that is all which appears in a long column of notes in which any reference is made even indirectly to barley. As oats and barley run very much together it will be only fair to say that Lancashire is mentioned—"the oat crops were much handicapped by the drought in the spring." All the following counties or districts are specifically named, but with no clue furnished as to the condition of barley. Wilts, Sussex, Stafford, Northumberland, Westmoreland, Denbigh, Merioneth, Cardigan, Radnor, Banff, Kincardine, Haddington, Dumfries, Kirkcudbright, Galloway, Ayr, Lanark, Southerland, Caithness, and Orkney.

In tabulated form the average condition of barley in every county is given in which as a rule very slight variation from last year is manifest, and as a final result of the whole country the index is 90.7 in 1900 against 89.3 in 1899. Further comment is needless.

FRANK RICHARDSON AND CO., successors to J. TOPHAM RICHARDSON BROS. AND CO., Importers of Selected Foreign Malting Barleys, 6, Duke Street, Southwark, London, S.E. Telegrams, "Escurgeon, London" Telephone, 787, Hop, London; and at Liverpool and Burton-on-Trent.—[ADVT.]

The Barley Crop in Germany.

Messrs. Weingart and Kaufmann, of Ludwigshafen and Rhein, have issued the following circular:—"We think it advisable to give a report concerning the prospects in the principal countries which produce barley for brewing purposes, as the harvest is near at hand.

Prospects are very favourable in Bavarian Pfalz and Hesse, on the left bank of the Rhine. The plant was checked in May by the continued cold, but the rain and sunshine which succeeded did much to improve the condition, so that we may expect a good crop as to quantity. It also promises well as regards quality in the formation of the grain, which is specially favoured by the cool weather which prevails, so that a good crop may be harvested. It has not been beaten down and is fairly free from weeds.

Reports from Alsace are equally good, and the condition of barley is very satisfactory as compared with the reports of May, when the plant was very backward. The fine weather of June did wonders. Franconia sends good reports, and hopes to reap a heavier crop than last year; the area under cultivation is larger, so that any deficiency will be made up as to quantity.

The unfavourable weather of early spring checked the growth of seedlings and the development was slow; the plant is, however, strong, and prospects are most favourable in the district of the Saale, Hanover, Anhalt, and Thuringia. There is every appearance of a good crop, both as to quality and quantity, providing the rain does not spoil it. The daily rain has not yet caused any damage.

We hear from Silesia that barley crops are looking very well indeed. They are specially good in the basin of the Oder, but not quite so uniform and short in the haulm on the high-lying lands. The plant has developed well during the favourable weather of June. The area cultivated has been slightly increased. If the weather continues favourable we may hope for a good yield, both as to quality and quantity.

We have received numerous reports from Austro-Hungary. Taken as a whole it is probable that the yield will be about 20 per cent. below that of last year. We must not, however, forget that last year's crop was most satisfactory as to quantity. The report from the Hungarian South Railway reads as follows:—"The development of barley was very backward owing to the cold weather of April and May, so that all hope was abandoned. Wonders have occurred during the last few weeks, and we now hope to gather in an average crop of 600 to 650 kilos per joch of 1,600 square metres. The ears are well developed, though they do not stand very thick, and the quality will be good. This is, however, not always the case, and the yield will most likely be 20 per cent. below that of last year.

Barley is not yet quite ripe in Slovakei. The early sown is well developed and promises a good quality, but 25 per cent. less than last year; later-sown crops are not so satisfactory in quality as well as quantity, owing to the tropical heat in the beginning of July; many fields which were still green were prematurely ripened. The rain falls of the last few days have done much to recover the condition, which is better in the valleys than in the high lying fields. Should the weather remain favourable till harvest, the quality will be good. All reports state that the yield will be 25 per cent. below last year.

We hear from the Wieselburg, Parndorf, and Zurndorf districts that barley is not in good condition, and the crop will be weak, about one-third of last year, but probably better as to quality. Harvest will begin about July 20th, weather permitting. Ipolysag reports favourably. The plant is still green, but in good condition, and the grain well developed. It is not beaten down, and promises a good yield as to quality and quantity. Barley was sown late in Upper Hungary, and harvest will not take place till the end of the month. The condition is at present fairly good, and the yield will probably be an average as to quality and quantity, but below that of last year. Moravia does not send good reports. Sowing was interrupted by heavy snow falls, and many of the fields were under water in April. About half the area cultivated promises a good yield as to quality and quantity. The other half recovered somewhat in June. As a whole, the crop is reckoned as only a poor average. In Bohemia the weather has been most favourable since barley was sown in early spring. Rain has been plentiful. The condition is more backward than that of last year. Early-sown sorts are in good condition, later sown not so good. Reports are not so satisfactory on the whole, but favourable weather may do much to improve matters. Harvest will not be taken in hand till the end of the month. A reliable report cannot be issued for about three weeks.

Home Notes.

In the Borough

the movements of hop buyers have evidently been to some extent affected by the "glorious summer" weather we have enjoyed during the past week. Business is quiet, and inquiries are mainly of a tentative character. But there is sufficient force in the under-current of uncertainty as to the prospects of the growing crop to save the market from any tendency to weakness. Therefore there is still some sign of life, quotations are kept up to recent currencies, and where business has been done full prices have been paid. Doubtless the marked improvement in climate will somewhat assist matters in the plantations, and tend to reduce the risks attendant upon the recent severe attack of aphis blight, but that all danger has not passed away is evident from the reports just to hand from most reliable correspondents, which are given in another place in this issue. Reading between the lines of these communications, as well as the lines themselves, we cannot fail to discern that anxiety as to the final results is prominent, and this feeling must be confirmed by a report published this week by a contemporary, in which it appears that the average condition of hops on July 1st this year was represented by the figure 71, whereas at the same date in 1899 it stood at 90. The present average figure is lower than the average for the five years 1895-99, which appears as 82.8, and the compiler remarks concerning it that as "hops are so far behind it seems hardly possible for so exacting a crop to attain anything approaching average condition this season." Many surprising changes have, however, previously taken place during the last two months of growth; it is therefore within the bare range of possibility for some extraordinary spurt to be made, which may bring the yield up to a normal weight. But the odds are manifestly against such a contingency; therefore I shall be astonished if our crop exceeds an average of 7 cwt. per acre.

Foreign Imports

show a great falling off in June when compared with the same month last year. The United States sent us 3,146 cwts., against 4,364 cwts. in June, 1899, and from other countries we only received 700 cwts., against 2,151 cwts. last year. Our total imports in June were therefore only 3,846 cwts. in place of 6,515 cwts. which were received in June, 1899, while during the first six months of this year our imports totalled 67,063 cwts. against 96,636 cwts. in the previous corresponding period, the chief deficiency being accounted for by the shortage from America.

Taking all the surrounding circumstances into consideration, there is therefore every reason to anticipate

A Further Advance in Values

of the stocks remaining for disposal in the interval which must elapse before the new crop can be gathered. I still believe that the control of the market is mainly in the hands of holders, and am glad to know that my views are shared by many of the Borough traders, as well as by some growers, who are firm in asking better prices, and whom I would exhort to maintain this attitude.

The organisation of the

Hop Competition

at the next Brewers' Exhibition is being considered by the managers, Messrs. Dale and Reynolds, with view of rendering it more attractive to English growers, and thus inducing a large increase in the number of entries. I hope soon to be able to announce that certain changes have been decided upon, which will make the competition completely representative of the best efforts of those engaged in our industry.

Foreign Notes.

Nuremberg.

The hop trade at this centre has been very quiet during the past week, the inquiries from consumers being only occasional, and the stocks being reduced to a merely nominal quantity, there is no desire on the part of holders to press sales. Values are, however, fully maintained, and, when business is presented, there is little or no difficulty in securing advanced prices, especially for lots which have any attraction in quality. The effect of the long continuance of unfavourable weather is still being felt in the reduced consumption of beer, and it is clear that a steady succession of sunny days will be necessary to enable brewers to bring their output to a normal point. Apparently summer has at last fairly commenced, and with the higher temperature the public thirst has increased, so that it is probable we shall soon hear of increased activity both in the breweries and in the markets whence their supplies of material are drawn.

**All official reports and notices of the National Association of English Hop Growers will be printed in the* MARK LANE EXPRESS, *which will also contain all current information likely to be of interest and benefit to the members of the society*

Concerning the Growing Crops,

it seems to be generally accepted throughout Germany, Bavaria, Alsace, and Burgundy, that, with few exceptions, the plantations cannot yield so well as they did last year. Though the present general aspect of the growth is not unfavourable, there are too many cases in which the plants are weak and poorly developed, having failed to recover from the retardation caused by the climatic conditions which attended their earliest life. Planters are generally slow to assist them by expenditure for cultivation. But the truth of the saying prevalent among Continental growers, that "hops are made or marred in August," has still to be tested, and it may be even at the last that present estimates will be changed as the season progresses.

In Belgium

the weather has been so unfavourable till within the last week that the outlook remains somewhat gloomy. The cold rains have checked and weakened the plants, which are consequently more susceptible to the attacks of insects, and these have persistently clung to the foliage, the danger therefrom being more manifest daily. The Poperinghe districts have suffered more severely than those of Alost, but the general result upon the course of trade is evident in the advanced prices which have ruled for some weeks, and are still upheld with great firmness, although the demand by consumers is just now limited to unimportant quantities.

The opinion of speculators in the future crop is marked by more tempting offers being freely made for contracts. Many transactions for autumn deliveries have gone through at 80 to 90 francs, and at the higher figure there are still plenty of buyers, with but few sellers.

America.

A few reports as to the condition and prospects of the hop yards are to hand, from which I extract the following:

ONTARIO.—Hops have made poor growth up to July 1st. Present outlook not over 60 per cent. of last year's crop.

COOPERSTOWN.—Acreage is a fifth less than last year, and old yards have not wintered well. The few new yards are looking more promising.

SCHOHARIC Co.—Hops not up to average, there being so many dead hills.

CHERRY VALLEY, OTSEGO Co.—The crop cannot be large, as old yards were badly winter killed. Young yards fairly good.

MALONE.—Present condition of yards fairly good, with no sign of insects. Acreage in this county (Franklin) smaller than last year.

ONEIDA.—Plants generally free from insect pests, with the exception of the hop grub, which is doing some damage. Acreage in this neighbourhood reduced.

HERKIMER Co.—Hops looking very flourishing, with a heavy and vigorous growth of vine. Under fair conditions we shall gather a full crop.

YAKIMA Co. (WEST COAST).—Area about same as last year. Vines in excellent condition and free from insect pests.

WASHINGTON.—Prospects are better than they have been for some years. Yards are in good condition, the vines are growing well, and picking will probably be early.

OREGON.—In Lane Co. hopyards are in good condition, being as a rule well looked after. The crop promises to be very fair.

The New York Market

remains *in statu quo*. Consumers' demand is only quiet, and dealers are following a hand-to-mouth policy. There is, therefore, no change in quotations, which are firmly maintained by the business, that about equals the supply. Stocks are quite moderate, and it is open to question, whether they will hold out till the arrival of the new growth. The consumption of beer in the U.S.A. is evidently increasing, as the revenue from fermented liquors for May last exceeded that for May, 1899, by nearly 500,000 dollars.

English Plantation Reports.

Special to the Secretary N.A.E.H.G.

PADDOCK WOOD.—On the whole I think the bine is fairly good and the cultivation better than one would have expected. Still, there are many complaints that the bine does not look up to growing more than a very moderate crop, and that the stocks appear to have been weakened by the strain of last year's heavy yield. There has not been a lavish use of manures, and it is quite on the cards that many gardens now looking fairly well may not grow out at the end of the season. Blight appears to continue generally.

SISSINGHURST.—The bine in many places is very slack, and vermin still sticks. It is very doubtful if half last year's crop will be grown.

THE SUTTONS.—Warmer weather has caused the bine where washed to grow fast, but fresh fly continue to come. No hops are clean, and mould is showing in most gardens. Cultivation is neglected owing to scarcity of labour. Prospects are unsatisfactory. The crop will be a short one even with favourable weather.

EAST PECKHAM.—With the warmer weather the best bines have improved, but the weakly pieces seem to have stopped growing. Bine in this parish is on the whole fairly good, but many gardens are still far from being cleared of lice in spite of repeated washings. Not much mould to hurt at present.

WYE.—Hops are growing fast, and washed ones keeping the bloom on them. More would have washed. Cultivation not a bad one. Looking very well.

CRANBROOK.—Hops on the whole look very well, the soil very kind, and will soon be a good bine where not washed. Where kept clean by washing and well cultivated, a fair crop. Fleas and mould in some places.

SANDHURST.—A great many of the hops in the district are slack of bine. The vermin very persistent, and washing has to be carried on to keep the bine from going back. There is room for a full crop, but it will be a small one.

BIDDENDEN.—Hops on best grounds, where well washed and cultivated, have done fairly well, but the warmer weather, but about half the acreage is slack of bine and very foul. Vermin and mould to be found in all grounds. The crop prospects are decidedly much under average at present time.

HARTING.—Hops, where well done in this district, are looking fairly well. There is still vermin, after two or three times washing, and I expect it will all have to be washed once or twice more. There are no signs of mould here. Cultivation is not generally good, as the wet weather a good time hindered the hops being kept free from weeds. Prospects of crop much below last year.

EATSHAM.—The condition of the growing crop is not been so much stopped at this time of year since 1882. The bine is very short and irregular, and we have heavy blight which washing does little to check. The leaves are covered with honeydew, and many pieces are going black. It looks like a 5 cwt. crop at the outside.

TENBURY.—Growth somewhat late, but not showing great deal of vermin. Where thoroughly washed the yards look satisfactory, but in no case can there be a large crop. Where the yards are neglected the prospect is bad.

HEREFORD.—The hops round this county are showing the effects of blight in many places, and some of the bine is exceedingly light. The weather has been hot since Sunday, and this will favour the strong yards, but is bad for the weak ones. Altogether, it does not look promising.

ASHPERTON.—Hops in this district are most irregular. Where strong and well washed they will grow an average crop. For every good-looking and promising yard there are three good for very little. Aphis blight most severe and continuous, and bine is generally short and weak. The present outlook is for half an average crop.

FROOME VALLEY.—Very few yards look really well, and I should say that many will hardly be worth putting a crib in. Vermin comes again as soon as washed off, and mould is on the increase. General lookout for ultimate crop about as bad as it can be, except in a few grounds.

LEOMINSTER.—Where hops are clean a few may be grown, but not half last year's crop under the best conditions. Bine is generally very short, and the outlook on the whole does not point to above one quarter of the yield of last year.

THE FARLEIGHS.—The late hot sun has done good to the stronger bine, but where they are weakly and hit hard with vermin they have not done much. In some grounds where subject to mould a good many spots can be found on the leaves. A good shower would do good just now to wash the honeydew off the leaves.

(*For Hop Market Reports, see pages* 79, 81).

The Prince of Wales and the Royal Agricultural Society of England.

The following letter has been addressed by H.R.H. the Prince of Wales to the secretary of the Royal Agricultural Society on the completion of His Royal Highness's year of office as President:—

"Marlborough House, Pall Mall, S.W.
"6th July, 1900.

"Dear Sir Ernest Clarke,—On the completion of my year of office as President of the Royal Agricultural Society for the fourth time, I am anxious to place on record my high sense of the valuable assistance and support given to me throughout the year by the Council and officers of the Society, and to express to them and to the general body of members my sincere thanks for the cordial goodwill and loyal attachment which all those connected with the Society have shown to me during my long association with it as a member of the Council. I remain, yours truly, (Signed) "ALBERT EDWARD P.

"To Sir Ernest Clarke."

A farm lad named [illegible] fourteen years, was ordered by the Richmond magistrates on Saturday to pay £4 compensation to George Lister, farmer, of Yarm, for killing [illegible] The boy's master had the lad at Darlington to get the half-year's wage due to him, but he refused to pay, and gave him 6d. in charity. The boy went home and never turned up. The Bench commented upon the seriousness of the offence, which they said was becoming too frequent, and ordered the lad to pay £4 compensation.

AGRICULTURAL LAW.

Damage to Crops by Sparks from Railway Engines.

£50 Damages against the G.W.R.

At the Berks Summer Assizes at Reading the case of Twinch v. the G.W. Railway Company was heard before Mr. Justice Day and a special jury. Mr. Jelrf, Q.C., and Mr. W. H. Clay were for the plaintiff; and the Hon. A. Lyttelton, Q.C., and Mr. Park Goff for the defendant company.

Mr. John Twinch, who claimed 50gs. damages (the amount not being disputed), alleged in the statement of claim that he sustained damage in the destruction of agricultural produce through the emission of sparks or burning cinders from a locomotive engine belonging to the company, alleging negligence in that such engine was not properly constructed, and also on the part of their drivers in not managing the engine properly. Defendants said they were a railway company with Parliamentary powers to run locomotives, that they were accordingly not liable if their locomotives were properly constructed, and that they had not been guilty of any negligence. They also denied that as a matter of fact any damage was caused.

Mr. Jelf, in addressing the jury, said the law in regard to the matter was now perfectly settled. Railway companies were not liable unless they could be shown to have been guilty of want of special care in the construction and the management of their engines. The point could not be better summarised than in the words of Mr. Justice Vaughan Williams, who said: "The company are bound to avail themselves of all the discoveries which science has put within their reach to prevent the emission of sparks, such as under the circumstances it is reasonable to require them to adopt." In other words, they were bound to do what was fairly reasonable and right under the circumstances in the avoidance of a danger to other people's property. The first issue in this case was whether in fact sparks from an engine of the defendant company did or did not produce the damage; and the second whether the company had been wanting in due skill and care in not protecting persons having land and property adjoining their railway by adopting the best known means of science that they could reasonably adopt in order to prevent such damage. In consequence of a series of fires in the neighbourhood of Slough caused in this way (most of them being promptly extinguished), Mr. Twinch on the 22nd July wrote to the Slough station-master asking that the company should employ special care, but apparently no notice was taken of that. On the 29th two witnesses who were passing over the line by a bridge leading in the direction of Farnham saw sparks coming from the foremost of two engines which were drawing a fast down train, which caused the fire. Mr. Twinch claimed damages, and after some interim correspondence the company wrote that they had completed their investigation, and had failed to find that the fire originated in the manner described, but that, even assuming such was the case, no liability whatever could be held to apply to the company in the matter, as they had taken every possible precaution against such occurrences by fitting their engines with the best modern appliances for arresting the emission of sparks. As a fact it was found afterwards that engine No. 3058, which was in front, and from which the sparks issued, had not at the time such appliances, but that the other engine, No. 3,009, had them. The learned counsel then lucidly explained to the jury, by means of models, the contention of the plaintiff as to what precautions might be considered proper and sufficient to prevent such damage, and said that if they found the engine which caused the mischief was not at the time fitted with the simple apparatus which was in the other engine he should claim their verdict on the ground that the defendants had been guilty of negligence. The following evidence was taken for the plaintiff:—

The plaintiff, of Cippenham Lodge, near Slough, a farmer, said in the early part of last July there were numerous fires along the railway line, and in consequence he wrote to the station-master at Slough, but nothing was done. On Saturday, July 29th, a fire broke out on his land, and destroyed six acres of oats in shock. Of late fires had been much more frequent than they were ten years ago. His loss was only partially covered by insurance.

James Groves, carman to Messrs. Duffield, ironmongers, Slough, said he saw the fast train approaching as he was on the bridge. Sparks came from the foremost locomotive, and he saw some blown over into Mr. Twinch's field, firing the corn. Witness and Thomas Hancock, of Chalvey, who was with him, tried to extinguish the fire, but were not successful.

Hancock corroborated.

Mr Percy Newton, 150, Queen's Gate, London, a mechanical engineer of twenty years' railway experience in various parts of the world, said he had examined the G.W.R. engines Nos. 3058 and 3009 at Swindon. The former was dismantled, but it was evident that it had had an ordinary smoke-box, which was not fitted with any arrangement for arresting sparks. In 3009 he found a modified form of the extended smoke-box, 3ft. 9in., instead of 3ft., and a horizontal plate, these being of considerable use in preventing sparks. A large number of the G.W.R. passenger engines had the more fully extended smoke-box. The use of an extended smoke-box, a mesh netting, and a deflecting plate, would considerably minimise danger from sparks, and would not interfere with the working of the locomotive. In Canada, the United States, on the Continent of Europe, and in Australia and Africa extended smoke-boxes were in general use for this purpose. Had there been the same protection on 3058 that there was on 3009 the extreme probability was, in his opinion, that the fire in question would not have occurred.

Cross-examined.—The great majority of the engines on British railways were according to the model produced, as to the smoke-box. The Midland Company had a great many engines with extended smoke-boxes, which they had bought from America.

Mr. William Poland (Poland and Co., Southwark), a gentleman with large experience in England and Canada, agreed with Mr. Newton.

By Mr. Lyttelton.—Some American railway companies were shortening the smoke-boxes to a reasonable length now; at one time they were excessively long.

Re-examined.—What he termed a reasonable length was considerably longer than in the engine 3058. He knew of no reason for the extended smoke-box except to prevent the emission of sparks.

For the defence Mr. Lyttelton urged that the company had used ordinary and reasonable precautions, and were therefore not liable. Almost all the engines in the kingdom were of the pattern 3009. The company had done everything they possibly could, in their judgment as reasonable men, to minimise such risks. They had recently, very cautiously and tentatively, introduced an experiment of a corrugated iron plate, not perforated, which extended right across, but not to the end of the smoke-box, and that was now fitted to ten per cent. of their engines, but at present they had not sufficient data to judge whether that was better than the old arrangement; they were giving it a full and fair trial. At present all the engineers in this country, whatever might be their views abroad, were in agreement with those of the G.W.R. Company.

The Court then adjourned until the following day.

Upon resumption, Mr. Waister, chief assistant running superintendent of the G.W.R., stated that the engine 3058—from which it was alleged the sparks were emitted—was of the ordinary pattern, and all the principal British railway companies used engines of the same model. It was fitted with a brick arch and a deflector plate, the latter being at such an angle that it caused the air to go slightly under the brick arch. He was not acquainted with any process more effective to secure complete combustion in the fire-box. Ninety per cent. of the G.W. engines now had the smaller, or ordinary size, smoke-box; about 10 per cent. were being tried with slightly longer smoke-boxes, but they had not yet sufficient data to determine which was the best. The fitting of engines with the enlarged smoke-box had been going on steadily for about six years. Diaphragms were first put in about four years ago. Neither of those features existed in the engine which it was alleged did the mischief in this case. He had never seen mesh-netting tried.

Mr. Drummond, chief locomotive engineer to several railway companies, and now of the L. and S.W.R., said, in his opinion, grids in smoke-boxes would soon be abolished. Engineers were constantly considering the problem of how to prevent the emission of sparks.

Cross-examined: He had never himself tried the extended smoke-box. He did not believe it tended to diminish the risk.

Mr. G. Whale, assistant locomotive superintendent to the L. and N.W.R. Co., also supported the contention of the defendants.

Counsel having addressed the jury on both sides,

Mr. Justice Day summed up. It was perfectly clear that the damage was caused by cinders escaping from the leading engine; and the question was simply, did that arise from want of reasonable care on the part of the company? They had nothing to do with the practice of English or Scotch railway companies: whether they were right or wrong was immaterial; but if the French or the American system was more effective, they ought unquestionably to use it. He attached the utmost importance to what was done in other countries, because if foreign countries did damage they had to pay for it, and so they were more likely to study everything which would protect their own pockets than English companies, which were worked under a certain system of protection. The time occupied by the G.W.R. in making the experiment of a partially extended smoke-box seemed to him utterly inordinate for any experiment. The defendant company had not called the drivers of the two engines, but he thought the jury must take it, as reasonable men, that one engine did answer and the other did not.

After a very brief consultation, the jury found for the plaintiff; and the judge certified for a special jury.

THE WEATHER.

Monday (July 9th).—Cloudy weather prevailed over nearly the whole country, and a warm and moist south-easterly wind was blowing. Heavy rain was measured in Scotland in the morning, as the result of the fall since Sunday, and the rain was continuing at the North Scotch stations. Sunday night was warm, the thermometer in many places not falling below fifty-five degrees, but the midday readings were still generally low. The weather was dull and warm in London, and in the afternoon the thermometer registered twenty-two degrees.

Tuesday (July 10th).—A cyclonic disturbance, skirting the northern coasts, brought considerable quantities of rain to Scotland and some parts of the north of England in the early hours of the day, when magnificently clear, sunny, and dry weather had already invaded the rest of the kingdom, the improvement spreading northward later. There were, however, signs along the western coasts in the course of the day pointing to the existence of further disturbances on the ocean, so that there was some uncertainty as to the stability of the more seasonable conditions, the barometer showing a downward tendency in all parts of the country. A decided increase of temperature took place, the records being the highest for four weeks past. Most of the night minima had not been lower than fifty-five degrees, and in the afternoon maxima above seventy degrees occurred, ranging up to eighty-three degrees in the metropolis.

Wednesday (July 11th).—Magnificent weather prevailed over our islands, and high summer temperatures were experienced in many parts of the country. Scarcely any rain had fallen since Tuesday morning in any part of Western Europe, and the weather continued quite dry in England and Ireland. The weather was very warm at the inland stations, the shade temperature in places touching eighty degrees, while in the sun's rays the heat was oppressive. The day was again very bright and fine in London, and the thermometer rose to eighty-five degrees.

Thursday (July 12th).—The weather continued very fine in most parts of England, but the temperature was not as high as on the two preceding days. A shallow disturbance had passed along our north-west coasts, and rain was measured in the morning, as the result of the fall since the previous day, at several places in the North and West, and in these districts slight rain again fell. The winds were light and variable, and the barometer was everywhere low for the season. There was brilliant sunshine throughout the day in London, and the air was very warm, although not oppressive, as on Tuesday and Wednesday.

Friday (July 13th).—The weather was very fine in the south and east of England, and high summer temperatures were experienced at the inland stations. The barometer had fallen considerably in the west under the influence of a shallow cyclonic disturbance which was approaching from the Atlantic. Rain was measured in the morning as the result of the fall since Thursday, at most places in the north and west, and the amounts were large in Scotland. Rain also fell again during the day in parts of Scotland and Ireland, where the sky was mostly cloudy, and the air much cooler than in England. The day was very bright and fine in London, and in the afternoon the shade temperature registered eighty-five degrees.

Saturday and Sunday (July 14th and 15th).—The weather was very fine over England on Sunday, and the midday temperatures were high, the shade reading touching eighty degrees at some of the inland stations. On Saturday the weather had become more cloudy than on several previous days, and in the morning rain was measured in nearly all parts of our islands, as the result of the fall since the previous day. On Sunday morning rain was again measured in Scotland and at a few places in Ireland and the West of England, but the amounts were small. In London no rain fell during the whole of the week. The highest temperature in the metropolis on Saturday was seventy-five degrees, but on Sunday the shade reading again touched eighty degrees.

The Cold Storage Trade.—*Fielden's Magazine* draws attention to the constantly growing traffic in frozen meat, and points out that there certainly will be a great increase of this trade between Australia, New Zealand, and the Cape, where preparations are being made for the building of cold stores in many towns. At present, as the magazine states, the cold storage business in that country is under a monopoly, but Mr. Rhodes has threatened to run cold stores in opposition to the monopolists, which will certainly have the effect of reducing the prices to a reasonable figure. Owing to the importance of the cold storage business, *Fielden's Magazine* will, it is stated, publish from month to month a record of the latest improvements in refrigerating machinery, which will be a valuable addition to the many excellent features of this eminent technical publication.

FARM PROSPECTS.

East Hampshire.

After a long period of rain, which has badly washed a good deal of our hay and caused farmers to make more ensilage than has been the case for several years past, we now have fine, hot weather. All crops—cereals especially—are luxuriating in the much-needed warmth, and look more promising than was the case a fortnight back.

Root Crops

are now doing well, though a very heavy percentage of the earlier sowings were absolutely destroyed by fly. At the present moment it is difficult to get the fast-growing swedes hoed, on account of the dearth of efficient labour. The recent

Wool Sales

have, upon the whole, been very satisfactory, last year's prices being everywhere maintained, and in many instances an advance has been obtained. The beef and mutton trade continues firm, and it is to be hoped that the fairs which take place during this month and next will show an improvement upon last season's prices for lambs and other store sheep.—G. S. M. (July 12th).

Middlesex.

In the Harrow district we are now in the midst of hay harvest, and with this glorious sunshine little labour is required (except with a few private gentlemen, who pride themselves on having good and properly made hay). It is not the fashion in this neighbourhood to employ labour, except to carry it home after it has lain about, and, perhaps, got half spoilt; hence it is that when the hay off these beautiful pastures used to take the top prices in the London markets, it has now to take a back seat and take the price for low qualities. Even now, the middle of July, not more than one-third is yet cut, the custom being to have all that grows in the season at one mown, as they have no stock of their own to consume the aftermath, which goes often to the poor, and in many cases, no doubt, the glandery cab horses of London.

The farmers were complaining that, owing to the cold spring, there would be no grass, but, lacking experience, they have, as a rule, yet to learn that cold springs are generally followed by good hay crops, because in the cold weather the grass is thickening on the ground, whereas in very mild springs it is drawn up to seed too soon; hence a thin but early crop. This year, notwithstanding the cold late spring, we have excellent crops, that is where they deserve them by manuring and good management, which is the exception rather than the rule. The weather of the last month must be suiting everything, notwithstanding the usual grumbling, and some even now grumble that mutton and lamb is not high enough, when I have never known it dearer. It is true that wool is down, and we have now no beef to quote.—F. K. (July 13th).

North Lancashire.

Farm prospects may, generally speaking, be considered bright. Up to the second week in June we were threatened by drought, with both poor hay and green crops, but since then we have had showers which have benefited the land all round, and averted the trouble, which was getting a very real one. We are far from having enough rain, and were it not that farmers are everywhere busy securing their hay, we could do with very much more moisture, and the hay crop secured, we shall have a great outcry for rain. We consider the hay crop to be

Rather Below an Average,

on the whole, but with present fine weather, it is being secured well, and will be in first-rate condition. Pastures are looking well, but need more rain.

The Grain Crop.

Oats have shot out on rather short straw, and complaints of wire-worm are getting more general. (It appears to us that this trouble grows year by year.) This crop we put down, so far as this district is concerned, as decidedly below the average. Wheat is looking pretty well, but will not be a heavy crop, and below an average. Turnips and mangolds, although very much better than last year, will also be below an average crop. Potatoes we consider to be looking very well, and should take up a full average.

Stock are all Doing Well,

and prices keep up for both beef and mutton, whilst lambs meet a very good market, and horse-breeders cannot complain; in fact, taken altogether, we consider farmers as a body should be very easy in mind, their position compared to what it was a few years back being very much more satisfactory.—R. S. (July 11th).

West Somerset.

The weather for the past ten days has been hot and dry, and hay is generally finished, good crops having been carried in good condition, although the early cuttings were more or less injured. No great quantity of rain has fallen at any time since the spring; the subsoil is dry, and steady rain would benefit all crops. Grass is fairly plentiful, but is now making little growth. Roots of all kinds are planted well, but all would benefit by rain. Corn is making rapid progress towards harvest, and with a continuance of the present weather

Some may be Cut this Month,

apart from winter oats, which will be ready within a week. Live stock of all kinds has done well since grass came, and prices are better than we have sometimes known them at this time of year. Thunder is in the air, and there has probably been a fall of rain not far from here, but it appears to have passed us by. Farm work of all kinds is well in hand, and with the harvest later than for some years arrears should be overtaken by its commencement.—S. K. (July 12th).

Foreign Prospects.

FRANCE.—The agricultural situation continues satisfactory, and the present weather leaves nothing to be desired. Expectations of probable wheat crop results are much more hopeful, but no one cares to formulate an estimate on the eve of harvest. It is predicated that, barring accidents, the grain will be of excellent quality.

GERMANY.—Up to last week the crops suffered from excessive moisture and low temperature, but better weather now prevails, and hope has revived that the harvest, although late, may yet be an average one.

ITALY.—The threshing of wheat has so far advanced that it may now be stated that the quality is good, but yield not very abundant. The rain of the last few days has been beneficial to the maize, which looks in splendid form.

RUSSIA.—Fine crop prospects have caused a quiet tone to prevail in Azov and South-Eastern markets, while the unsatisfactory outlook in South-Western governments made sellers in those regions stiffer.

UNITED STATES.—The *Cincinnati Price Current* says the maize is mostly doing well, but sections in Kansas and Nebraska are threatened with injury from lack of moisture. Wheat warrants the expectation of a yield of 550 million bushels—the Government figures are too low.—*Dornbusch.*

The Harvest Outlook in Ireland.

With a month of bright warm weather, the harvest should prove the best for a number of years. Almost without exception our correspondents' reports record a most encouraging outlook for crops of all descriptions, and in regard to oats, potatoes, and grass (the three "staple crops" of the country—the picture they present is particularly cheering. It is quite a number of years since we have been able to record such gratifying unanimity on the part of our correspondents in regard to the appearance of the crops as a whole, and if the hope which is so generally expressed in regard to the weather is only realised, there is every reason for looking forward to a justification of the anticipations of the most sanguine—those by whom the harvest is regarded as likely to prove the best with which the country has been favoured, since the dark days of the early eighties.

With regard to wheat, a cereal which was once very extensively grown in many parts of the country, but of which the area now under cultivation is so small as to have become an almost negligible quantity, a large number of our correspondents find it necessary to dismiss the crop with the brief but significant remark "not grown," while the few who are able to include it among the crops cultivated in their respective districts are obliged to refer to it as of restricted area. Small though the extent of land under wheat may be, however, it is satisfactory to note that this year the crop has done remarkably well, and, like all other grain crops, promises to bulk up satisfactorily alike as regards the yield of straw and grain.

Barley has long ranked in Ireland as a "local" crop, and as year follows year, its reputation in this respect becomes more and more pronounced. Up to the present the season through which we are now passing has been very satisfactory so far as this crop is concerned; but, like all other crops, it is now very much in need of bright, warm weather—even more so, perhaps, than any other crop, with the exception of potatoes.

It is years since the oat crop, the staple cereal in Ireland, has given such uniformly excellent promise at this stage of the season, and if present prospects are not sadly belied, the coming harvest should rank as one of the best experienced by oat growers for quite a quarter of a century. As in the case of the other crops, however, much will depend upon the weather of the next month. Except in a few districts in which the wire worm somewhat thinned the braird in the early part of the season, there is at present quite an exceptional luxuriance of straw, so that all that is now needed is an abundance of sunshine to facilitate the development of the ear and impart to the grain that fulness of kernel and uniformity of colour which always distinguish a high class sample.

Returns collected by the Flax Supply Association go to show that there has been a substantial increase in the area devoted to its cultivation this year, and in view of this fact it is satisfactory to learn that, so far as appearances go, the crop this season is much more promising than for several years past. We regret to learn that the fungoid diseases which have proved so destructive to the crop of late years have again been very much in evidence this season, and that they have been responsible in some localities for the infliction of considerable injury.

It is much to be feared that the worst is about to be realised in regard to the potato crop. Though only four or five of our reports make reference to the actual occurrence of outbreaks of the disease up to Saturday last, we have reason to know that during the past few days the dread fungus has made its malign influence felt in a great many districts, and the weather which is being experienced as we write is just the type specially calculated to still further its development and dissemination.

Already the prevalence of the disease has been reported from such widely separated districts as Londonderry, Galway, Westmeath, Clare, Cork, and Queen's County; and it is much to be feared that the next ten days will witness its existence in almost every county in the country.

The most unfortunate feature of the outlook for the crop at the present moment is the fact that owing to the wet weather recently experienced the spraying machine has been but sparingly employed in preparing it for resisting the attack of the disease. While the wet weather continued few cared to go to the trouble and expense of spraying with the prospect of finding the dressing applied one day almost completely washed away the next, and the result is that the fungus will now find thousands of acres of the crop in a specially favourable condition for its rapid development. Another regrettable feature of the outlook for the crop is the fact that the outbreaks of the disease already reported are not confined to attacks of the common leaf blight, Phytophthora infestans. Our advices from the west record the appearance among the crops there of the "root rot" fungus which has been attracting so much attention during the past few years.

Compared with the splendid promise given by oats and potatoes, the root crops are in some places a little disappointing. This applies in particular to turnips, the appearance of which is, as a whole, rather irregular. In some districts the crop is one of the best and most promising for a number of years, but in others it seems to be making very slow progress, and in addition to being very patchy it is distinctly backward for the time of year. For this various causes are being held responsible. In the first place the weather experienced during the greater part of June was so wet that on all but the very lightest soils great difficulty was experienced in getting the land ready for the crop in good time. Then again the fly made itself very severely felt in a number of places, and so serious were its devastations that in some localities fully 80 per cent. of the crop had to be resown. In addition to all this the crop suffered considerably in many parts of the north from late spring frosts, and where these frosts did not inflict any direct injury on the plants they so seriously checked growth that the condition of the crop generally is several weeks behind ordinarily good years. As a whole, however, the outlook for this crop is far more encouraging than this time twelve months, as very few "patchy" fields are to be seen, and there is still a possibility that a spell of fine weather may enable it to largely make amends for its comparative backwardness at the time of writing.

Taken as a whole, the mangel crop is this year particularly promising. Where sown in anything like good time it has made excellent progress up to the present, and finer fields than have come under our observation in the counties of Dublin and Wicklow during the past few days we do not remember to have ever seen. From some districts there are complaints of some damage having been caused by the grub of the mangel fly, but the crop as a whole seems to be of more than usual promise, and if it only realises present anticipations it should go a long way towards making up for any shortage that may occur in the case of turnips.

From the point of view of haymakers the season, so far, has proved one of the most unsatisfactory for a number of years. The heavy rains which continued to fall with irritating regularity during the second half of June rendered the work of saving early meadows particularly trying and tedious, but the closing days of last week and the early part of the current week brought about a welcome change in this respect and enabled large areas of early grass to be rickel in excellent condition.

A better season for grass has not been experienced for years. This is the unanimous verdict of our correspondents, and it goes to confirm the reports which had previously reached us from all parts of the country. In some places stock do not seem to have been putting on condition with quite so much rapidity as the abundance of grass would have led their owners to expect, but the reports upon this score are somewhat local and do not appear to represent anything like a serious crisis for the plant. Altogether the outlook is, as we write, with the single exception of the potato, encouraging in the extreme, and it is to be hoped that when the harvest comes to be gathered the results may be found to justify what may well be described as a brilliant midsummer prospect.—*The Farmers' Gazette.*

CORN MARKETS.

LONDON.

Mark Lane, Monday.—Malt: We continue to have a limited inquiry. Barley unchanged. Wheat 6d per qr cheaper. Oats remain steady. Maize advanced 3d per qr. Flour declined about 6d per sack on the week.—NIXON, GOWER AND CO.

Mark Lane, Wednesday.—Feeding stuffs engaged most of what little attention was given to cereals. Home-grown wheat gradually becomes in smaller compass, and is chiefly submitted on the country exchanges, while still in very good condition. Fine white, 32s; and good milling red, 31s 6d 63lb delivered. American descriptions unaltered. No. 1 Northern Spring, 33s ex ship; 33s 6d landed. Consumers of flour continue to work on their present holdings, and only buy for pressing needs but holders refuse concessions of any importance. Iron Duke, 22s 6d per sack ex store. Grinding barley, except Persian, continues in small supply and unaltered, oats remaining in sellers' favour, notwithstanding present existing slackness. American white clipped, 15s 6d ex ship and 16s ex quay. Maize maintained, and anything but plentiful. Mixed American held for 21s ex ship.

Mark Lane, Friday.—English wheat firm, and somewhat dearer on the country exchanges, the available supply remaining short and conditions excellent. Fine white held for 33s, and red of similar sample 32s 63lb delivered. American descriptions sparingly offered. White in restricted supply on spot. No. 1 Northern Spring 33s ex ship, 33s 6d landed. No. 1 hard Manitoba 34s 6d in the former position, and hard Duluth 31s ex ship, being nominal, landed. The flour market was again regulated by holders, and American brands are kept down. The London Millers' Association made no alterations in their prices at this afternoon's meeting. Town households 26s, and whites 29s per sack. American first patents quoted at 26s to 27s; second ditto, 24s to 25s. First bakers, 22s to 23s; and second, 20s to 21s. Hungarian up to 30s 6d per sack. Reverting to feeding stuffs, grinding barley retains firmness, and Persian still affords the main source of supply, Black Sea being unobtainable, and American very scarce. Persian, 17s 9d ex ship, 18s 3d landed. Oats tended rather better, and American continues scarce on spot. Mixed clipped quoted at 15s ex ship, 15s 3d ex quay; white clipped, in these positions 15s 6d and 16s respectively. Russian oats also fail in any quantity. St. Petersburg, 14s to 14s 3d ex quay, 38lb. Common Libau practically unobtainable. Sound Revals nominally 15s 6d to 15s 9d ex quay. Riga, 14s 3d and upwards, according to quality. Maize was also well maintained in view of a restricted quantity.

COUNTRY.

Ashford, Tuesday.—Wheat firm at last week's rates, white making 30s to 32s and red 28s to 30s. Maize is 1s dearer on the week for flat kinds, which commanded 23s 6d to 24s 6d per quarter. Other kinds of corn remained without practical alteration.

Aylesbury, Saturday.—Thin attendance and wheat firm at fully last week's prices. In barley, oats, and beans very little doing. Wheat, 29s to 30s per quarter.

Banbury, Thursday.—Wheat (white), 30s to 31s per qr; wheat (red), 29s 6d to 30s 6d per qr; beans (new), 30s to 32s per qr; oats (new), 21s to 23s per qr; oats (old), 20s to 21s per qr. Owing to a rise in America, wheat is fully 1s per qr dearer on the week.

Barnsley, Wednesday.—Only a small attendance, and little business. Wheat again showed an advance on the week, and quotations ruled at 11s 6d to 12s per load; white oats, 24s to 25s; black ditto, 23s to 24s per qr. Other values unaltered.

Bristol, Thursday.—There was again a very small attendance at our market to-day, farmers still being busy haymaking, and consequently the amount of English wheat offering was practically nil. Foreign was about 6d higher. Barley made last week's full prices. Round maize, 6d dearer. Flat maize and oats without change. Flour firm, but very quiet, warm weather checking the demand somewhat.—GRACE BROTHERS.

Cambridge, Saturday. — Farmers have been busily engaged during the week in getting the hay in. At this market to-day more wheat was offered, and trade was quiet at last week's prices. Wheat, red, 30s to 31s; and white up to 32s per 504lb.

Canterbury, Saturday.—Wheat a quiet trade. Oats firm. Ruling prices:—White wheat, 30s to 32s; red ditto, 28s to 31s; grinding barley, 20s to 22s; white oats, 18s to 21s; black ditto, 18s to 21s; peas, 30s to 32s; tick beans, 30s to 32s; mazagans, 28s to 29s; flat maize, 22s to 23s; round ditto, 26s to 27s per quarter.

Carlisle, Saturday. — Very small supply of oats in our market to-day; good demand at late rates, 22s to 23s 6d per 336lb.—THOMAS ROBINSON.

Chester, Saturday.—There was little business done in English grain, and no samples of English wheat were offered. Oats and beans continue to have a good demand. Quotations:—Wheat, white and red, 4s 4d to 4s 6d per 75lb; grinding barley, 3s to 3s 6d per 64lb; beans, 4s 10d to 5s 6d per 80lb. Oats, new, 2s 8d to 2s 11d; old, 2s 9d to 3s per 46lb. Indian corn, 11s to 11s 9d per 240lb.

Chichester, Wednesday.—Small supply of wheat, with a quiet trade at prices showing no material change from last week. Fair attendance.

Colchester, Saturday.—Very small supply of wheat here to-day; firm trade, and in some instances a slight advance on last week's prices was obtainable. Nothing offering in spring corn.—FRANCIS AND CO.

Devizes, Thursday.—With a very small supply to-day, the trade for wheat was firm at last week's prices. Other corn unaltered in value. Best wheat, 14s to 15s; secondary, 13s to 14s; grinding barley, 20s to 24s; oats, 18s to 23s; beans, 16s to 18s; fine flour, 24s 6d to 25s 6d; extra fine, 26s to 30s; best bread, 10d.

Dorchester, Saturday.—Owing to harvesting operations there was but a small attendance. Wheat ruled firm at late rates, a few specials samples of foreign commanding a trifling rise. Oats were worth 3d per quarter more, and barley was very firm. Round maize advanced 1s from scarcity.

Gainsborough, Tuesday.—Small show, and plenty of buyers for wheat. White wheat, 30s 6d to 31s; red ditto, 29s 6d to 30s 6d. Oats a good trade; white, 20s to 22s; black ditto, 18s to 20s; grinding barley, 23s; English beans, 30s; peas, 23s; small maize, 26s; flat ditto, 23s per qr.

Glasgow, Wednesday.—There was a thin attendance at our corn exchange to-day. Wheat and flour steady at last week's prices, with more inclination for business. Indian corn firm on spot, and 1½d to 3d per boll dearer on the week. Grinding beans and Canadian pease the turn dearer. Home oats steady at late rates, but demand small; Canadian and American about 3d per boll easier, owing to liberal arrivals. Barley steady. Oatmeal dull. Bran and thirds quiet and unchanged.—GIBSON AND CLARK.

Glasgow, Wednesday.—Wheat and flour steady at last week's prices, with more inclination for business. Indian corn firm on spot at 1½d to 3d per boll dearer on the week's grinding. Beans and Canadian peas are the turn dearer; home oats steady at late prices, but the demand small; Canadian and American about 1½d per boll easier owing to the liberal arrivals. Barley steady. Oatmeal dull. The market will be closed on Friday and Monday next for the fair holidays.

Hereford, Wednesday.—Practically no English wheat on offer, and in the absence of business prices must be written nominally unchanged since last week. Maize 6d per quarter dearer. No quotable change in other grains. Wholesale quotations: Wheat—white, 3s 6d to 3s 9d per bushel; red, 3s 5d to 3s 8d; barley, 3s to 3s 6d; oats, 2s 3d to 2s 9d; beans, 3s 9d to 4s; maize, 3s to 3s 3d; vetches—winter, 4s to 6s; and spring, 3s 6d to 5s.

Ipswich, Tuesday.—Small supply of wheat. Trade steady at fully last week's rates. White, 32s; reds, 29s to 30s per qr. Grinding barley firm. Oats unaltered. Maize rather dearer. Beans and peas steadier.

Leeds, Tuesday.—The wheat trade is firmer to-day. Holders are asking rather more money, but there is little response on the part of millers, who are not in a buying humour. Maize, beans and oats unchanged.—DUNNS AND CO.

Leeds, Friday. — The millers are still confining their purchases to meet pressing requirements, and for both English and foreign wheats the firmer prices of Tuesday are with difficulty maintained. Beans and American maize the turn dearer. No change in peas, oats, barley or flour.

Leicester, Saturday.—Fair attendance of buyers and dealers with moderate supplies of home-grown wheats, which sold more freely at 30s to 33s per 36 stone. Beans and oats firmer.

Lincoln, Friday.—Small supply of English wheat with a slow sale at 6d more money. Reds, 29s to 30s; whites, 30s to to 31s. Foreign wheats firm. Oats 6d dearer. Maize higher on the week. Beans and peas firm.

Liverpool, Friday.—Wheat quiet with a small business; white wheats ½d lower, red ½d dearer. Flour in very quiet demand. Foreign brands are mostly 6d per sack easier than last market day, but the Liverpool Association of Millers make no change in the minimum quotation for their "bakers" grade. Maize has met a fair demand for Mixed American, which sold at fully last market day's price and closed firm thereat. River Plate moves well into consumption at full prices. European quiet, unchanged, with the exception of Cinquantina, which yesterday were raised 1d per cental and are now firmly held at the advance. Barley firm for brewing, which are held rather higher. Other qualities steady at full prices. Beans in moderate demand with no quotable change in prices. Peas quietly steady at late rates. Oats have a fair demand for British, which are held at full prices; foreign steady, unchanged. Oatmeal firm but nothing doing. Oilcake had a moderate demand and is firmly held at fully late rates to some advance.—SEGAR AND TENNICLIFFE.

Louth, Wednesday.—There was a very poor attendance of farmers. Business all round was slack, and prices for all kinds of grain remained unchanged. The supply was very limited.

Maidstone, Thursday.—Quite the summer style of market to-day, attendance not large, and business restricted, any excitement not displayed. Wheat is very firm and in some cases 6d per qr dearer than last Thursday. Barley meets with much demand, and the previous values secured. English black oats are in request also good foreign, the small American sorts most approved in Kent. Maize exhibits an advance of 3d per qr. In other grain, etc., no change.

Manchester, Thursday.—English wheat has been in only moderate demand at the weekly market held to-day. Quotations are rather against the buyer compared with last Thursday, but here and there a buyer reports being able to get in at the previous currencies. Flour is slow at late rates. Indian corn is ¼d per cental up on the week. No change can be mentioned in oats, peas, beans, or barley.

Newcastle-on-Tyne, Saturday.—This week the weather has been, to use the term, droppy, but hay-making has not been delayed so far. To-day's market showed a falling off in the demand for wheat, and prices must be written 1s per quarter below last Saturday. Flour declined 6d per sack. Feeding stuffs maintain their values, with beans 6d per quarter higher and maize firm.

Newcastle-on-Tyne, Saturday.—Wheat steady at last week's prices, maize favouring sellers. Scotch oats firm, and 6d dearer. Foreign steady at late rates. Beans and peas 6d per 504lb advanced since this day week. Barley, none offering. Flour unchanged.—JOSEPH POLLARD AND CO.

Newport, Wednesday.—Wheat unchanged on the week. Maize firm and dearer. Barley steady. Oats of good quality advanced 1s per qr. Beans firm, and rather cheaper, and offals were dearer.

Northampton, Saturday.—Small market, few samples of wheat, and demand dull and inactive at about last week's prices. Wheat from 29s to 32s; grinding barley, 22s to 24s; oats, 19s to 24s; beans, 28s to 32s; and flour, 21s to 25s.

Norwich, Saturday.—Very little wheat offering to-day, with a firm trade, at an advance of 6d per qr on the week. Billiant hot summer weather has prevailed during the week, and hay harvest is in full swing. Wheat, red, 29s to 31s 6d per qr, weight 63lbs per bushel imperial. Corn inspector's return for the week ending 9th July, 1900:—Wheat, 565-5, 28s 6¾d.—J. ARTHUR MILLS.

Nottingham, Saturday.—Wheat, in small supply, meets a slow sale at previous rates. Oats and beans about 6d per qr more money and a fair consumptive demand at the advance.—ROBERT HUBBLE.

Oxford, Saturday.—Small market, very little wheat showing. A good demand at last week's prices for local mills, 30s to 32s. Oats and beans rather dearer.

Peterborough, Saturday.—The wheat trade has been rather quiet to-day, but there was very little offering, and good fresh samples made quite as much money as last week. All spring corn firm, and fully as dear.—THOMAS HILL AND SON.

Plymouth, Thursday.—Moderate trade and attendance at the market to-day. Prices of oats, wheat, and maize the same as last week, but barley is 21s 9d.—ORLANDO DAVIS AND CO.

Reading, Saturday.—The attendance here to-day was small. The supply of wheat proved scanty, and trade firm at the prices obtaining at last market; while English samples were sold at an increase of 6d to 1s per qr on previous quotations. The demand for other sorts of cereals was slow, and sales proceeded at late currencies.

Ripon, Thursday.—Owing to haymaking operations the attendance is small. Foreign wheat and oats hold firm, and prices have an upward tendency. Wheat, English, 29s to 30s; ditto forcign, 32s to 36s; barley, grinding, 24s to 25s; oats, 22s to 25s; round maize, 25s to 27s; flat maize, 23s 6d per qr; beans, 11¼d per stone.

Salisbury, Tuesday.—There was again a small attendance at the Corn exchange, the majority of farmers in the district taking advantage of the fine weather to complete their hay making. Wheat was in short supply, and sold slowly at last week's prices, 29s to 32s. Oats fetched from 19s to 22s; and beans were firm at 32s to 37s.

Sheffield, Tuesday.—The beautiful weather was responsible for the small attendance, the farmers being busy in the hayfield. A slow trade in wheat at last week's prices. Other articles unchanged. Quotations:—Wheat, white, 33s to 33s 6d per 504lb; ditto red, 32s to 33s per 504lb; oats, new white, 22s to 23s; ditto new black, 18s to 19s; ditto old white, 22s to 23s; ditto old black, 19s to 21s per 335lb; peas, grinding, 28s to 29s; ditto blue, 53s to 57s per 504lb; beans, Egyptian, 31s 6d to 32s; ditto, English (new), 31s 6d to 32s per 532lb; barley, grinding, 23s to 24s 6d; ditto malting, 27s to 35s per 448lb; Indian corn, small, 26s to 27s 6d; ditto American mixed, 22s 6d to 23s per 480lb.

Shrewsbury, Saturday.—The trade in wheat has been dull at unchanged prices. Oats, peas, and beans have remained steady at former rates. Flour has been held firmly, but sales have been restricted. Milling offals have moved freely into consumption, and for some qualities an advance of 5s per ton has been paid.—W. L. BROWNE AND CO.

Spalding, Tuesday.—A small market, and the value of wheat unchanged, the price being 30s to 30s 6d. Oats, 21s to 21s 6d per qr. All other articles in small supply, and trade quite as firm as the previous week.

Stockton, Wednesday.—There were only one or two samples of local wheat showing, owing to farmers being busy with their hay-making. In consequence of the brilliant weather the foreign wheat market has become very quiet, and there was hardly anything doing. Last week's prices were asked, but buyers held off. Oats and maize 6d per qr dearer.

Sunderland, Saturday.—Farmers being busy with their hay, there was little grain on offer, which sold at about last week's prices. Arrivals coastwise: Wheat, 200 qrs.; foreign nil.—E. AND F. RICHARDSON.

Taunton, Saturday.—Very small attendance. Only a little wheat offering, which was held for the full prices of last week. Barley and maize steady at previous rates.

Wakefield, Friday.—There is a firm feeling in wheats to-day, and we quote fully last week's prices for both English and foreign in the small business doing on our to-day's market. No alteration in feeding stuffs.—MICHAEL SANDERSON AND SON, LIMITED.

Wakefield, Friday.—The wheat trade continues in an unsettled state owing to the erratic movements of the American markets, caused by constantly varying crop reports. The tone on this side remains firm, although business is limited and prices are unchanged from last week. Maize, beans, and oats without change.—DUNNS AND CO.

Winchester, Saturday.—Wheat in very short supply, which met a slow but steady trade at last week's prices. Barley unaltered. Oats in good demand, and slightly dearer all round. Round maize made 6d advance. Flour 25s to 26s, with little inquiry.—FEAR, COLEBROOK AND CO., LTD.

Wisbech, Saturday.—A short supply of grain. Wheat firm at late rates. Red, 30s.; white, 31s. Oats, 20s to 24s. Beans, 30s to 33s.—JAMES FLETCHER.

Worcester, Saturday.—Small supply of English wheat, with a slow sale, at 6d per qr advance. Foreign firmly held. Oats made fully late rates. Grinding barley, maize, and beans 3d to 6d per quarter dearer.

Worksop, Wednesday.—Small attendance, and very little doing. The market had partially recovered from the decline of a fortnight ago. White wheat, 30s to 31s; red ditto, 28s to 29s 6d; white oats, 22s to 24s; black ditto, 20s to 21s per qr; beans, 33s to 34s for 38 stones; peas, 28s to 30s per qr.

York, Saturday.—Little wheat offering; fine white, 29s 6d to 30s 6d; red and mixed, 28s to 30s per qr of 36st. Feeding barley, 22s to 26s per quarter of 32st. Oats rather dear; white Tartary, 18s to 19s; black ditto, 20s to 21s; short oats, 22s to 24s per quarter of 24st.

FOREIGN.

The Antwerp wheat market has shown no change of importance. The harvest has now reached an advanced stage in the South of France, especially in the Bouches-du-Rhone, the Vaucluse, the Gard, the Herault, and the Var. In the district round Lyons most of the rye has been cut, and a commencement is being made with wheat, barley, and oats. Harvest is also about to be commenced in the Bresse, where wheat is a good deal laid. The feeling with respect to the French harvest appears to be rather more hopeful; the weather has been favourable of late, and the wheat yield is now expected to be better than had been at the time anticipated. Old wheat is being held with firmness in the French country districts. Last week's sales of wheat at Marseilles were only 3,250 quintals. Wheat has exhibited a quieter tone at Paris, and sales have been carried through with some difficulty. Flour for consumption has shown scarcely any change in the French capital. Disposable wheat has remained without variation at Dantzic. At Konigsberg wheat has shown a good tone. The British Government has completed a contract with millers at Buda Pesth for the supply of large quantities of flour to the troops in South Africa. A first cargo of 28,000 sacks has been loaded up at Fiume. Advices from Odessa report that rains have fallen in Southern Russia, but that they have not been of long duration. The crop outlook in Southern Russia is better than had been anticipated, especially along the Dneiper. This is not without importance, as the Dneiper district supplies large quantities of cereals for exportation.

Hamburg, Saturday.—Barley report: We have splendid fine weather here since the beginning of the week, and it looks quite settled. This will greatly improve our crops, and the prospects remain satisfactory. Barley will now ripen fast, and cutting in the Saale districts, Bohemia and Moravia, will likely commence end of the month in Hungary. Harvest is in full swing now, and the first samples will soon be shown. Tropical heat, followed by thunderstorms, have done some damage, but it was only locally in a few districts.—FRANCIS M. TH. DUHNE.

POULTRY AND PROVISIONS.

Smithfield, Saturday.—Supplies more plentiful, and trade slow. Quotations. Fowls: Yorkshire, 2s 3d to 2s 9d; Essex, 2s 3d to 3s; Boston, 2s to 2s 6d; Welsh, 2s to 2s 7d; Surrey, 3s 6d to 4s; Sussex, 3s to 3s 6d; Irish, 1s 6d to 2s; Aylesbury ducklings, 2s 9d to 3s 3d; country ducks, 2s 6d to 3s; goslings, 3s 9d to 4s 6d; Bordeaux pigeons, 10d to 1s; feathered ditto, 7d to 10d; Egyptian quail, 1s to 1s 4d; tame rabbits, 1s to 1s 6d each; Australian, 7s to 8s per dozen.

Glasgow, Wednesday. There were a few lots of grass cheese forward this week, and they were in demand at an advance of from 1s to 2s per cwt.; the full price was 58s. Fodder kinds were quoted from 50s to 54s per cwt. Americans claimed some attention. The sales effected were at steady prices.

Liverpool, Saturday.—Bacon continues a firm market, but the trading is of limited dimensions, dealers a trifle wary with caution. Irish cuts are strongly held. Hams are in steady demand at full prices. Lard is firmly held, following higher c.i.f. quotations. Beef quiet, and reduced in value. Pork without alteration on the week. Cheese.—There has been an improvement in the consumptive demand, and values are well maintained. We quote to-day, finest coloured States and Canadians, 48s to 49s; white, 47s 6d to 48s 6d; medium grades, full cream, sell from 46s to 46s, but lower qualities meet with a limited inquiry, offered from 40s to 45s per cwt. Butter.—The demand for finest qualities is almost wholly supplied with Continental and Irish, there being but little trade doing in Canadian and American, supplies of which are now more liberal. Importers, however, are firm in price for fancy Canadian, owing to rather strong reports [illegible]

Newport, Wednesday. A big supply and an average quality were on offer this week. Choice fine [illegible] cut [illegible] 42s to 58s per cwt.

BUTTER.

Tuesday. [illegible] 11d to 1s per lb. Bedale: 1s 3d to 1s 4d per roll of 2 oz. Cumberland: 11d per lb. Settle: 11d per lb. Sheffield: 1s 1d to 1s 2d per lb. Spalding: 10½ to 1s 1d per lb.

Wednesday. Driffield: 1s 1d to 1s 2d per lb. Hereford: 14 to 1s 2d per lb. Market Drayton: 11d to 1s per lb. Barnsley: 1s to 1s 1d per lb. Goole: 1s 1d per lb. Keighley: 1s 1d per lb. Knaresbrough: wholesale, 1s 3d to 1s 4d, retail, 1s 4d to 1s 6d per roll of 2 oz. Louth: [illegible] 1s 1d per lb. Market Weighton: 11d per lb. Masham: 1s 1d to 1s 2d per roll of 4 oz. Northallerton: 1s 4d to 1s 5d per roll of 2 oz. Stockton: 1s per lb. Whitby: 1s 1d per lb. Worksop: 1s to 1s 1d per lb.

Thursday. Barningham: 1s to 1s 2d per lb. Kidsmunster: 1od per lb. Devizes: Wholesale, 11d to 1s; retail, 1s 1d to 1s 4d per lb. Brigg: 1s to 1s 1d per lb. Driffield: 1s1d per lb. Penistone: 11d per lb. Pepper: 1s 4d to 1s 6d per roll of 2 oz. Scarborough: 1s 1d per lb. Bristol: Butter has been in moderate [illegible] and prices [illegible] last week. Irish creamery [illegible] Waterford [illegible] butters [illegible] Cork [illegible] and [illegible].

Friday. Derby: 1s 1d to 1s 2d per lb. Stratford-on-Avon: 11d to 1s 3d per lb. Wantage: 1s 1d to 1s 2d per lb. Seconds, 9d per lb. Sandbach: 1s 1d per lb. Chester: 1s 1d to 1s 2d per lb. Easingwold: 9d to 10d per lb. Leyburn: 1s 3d to 1s 4d per roll of 2 oz. [illegible] 1s 1d per lb. Otley: 1s 1d to 1s 2d per roll of 4 oz. Cardiff: The [illegible] for butt runs chiefly on Irish, of which large [illegible] time to come on to the market. Fresh [illegible] prime from 100s to 104s while choice [illegible] to 96s to 98s, and fine down to 90s. Dairy butters range from 84s to 90s. Welsh creameries are somewhat easier, finest at 96s, and lower grades down to 82s. Dorset butters bring 94s to 96s. A very sharp decline has taken place in Danish [illegible] at 110s to 111s, or 4s lower than last week; unbranded sorts are 2s less.

EGGS.

Tuesday.—Stone: 14 or 15 for 1s. Bedale: 14 or 15 for 1s. Gainsborough: 14 for 1s. Settle: 15 to 16 for 1s. Sheffield: 12 and 13 for 1s. Spalding: 15 for 1s.

Wednesday.—Dorchester: 11d to 1s per dozen. Hereford: 15 for 1s (wholesale). Market Drayton: 14 to 16 for 1s. Barnsley: 12 or 13 for 1s. Goole: 15 for 1s. Keighley: 12 for 1s. Knaresborough: 14 or 15 for 1s. Louth: 16 for 1s. Market Weighton: 16 for 1s. Masham: 16 and 17 for 1s. Northallerton: 14 or 15 for 1s. Stockton: 12 and 13 for 1s. Whitby: 14 for 1s. Worksop: 1s 3d per score.

Thursday. Barningham: 11 and 12 for 1s. Devizes: 15 to 18 for a shilling. Brigg: 16 to 18 for 1s. Driffield: 17 for 1s. Penistone: 15 for 1s. Ripon: 14 or 15 for 1s. Scarborough: 13 for 1s.

Friday.—Derby: 13 for 1s. Stratford-on-Avon: 1s to 1s 3d per score; duck eggs 1s 7d to 1s 8d per score. Whitchurch: Hen eggs 14 and 15 for 1s; duck eggs 10 and 11 for 1s. Stockport: 12 for 1s. Nantwich: 14 for 1s. Chester: 14 for 1s. Easingwold: 16 and 17 for 1s. Leyburn: 15 or 16 for 1s. Lincoln: 14 or 15 for 1s. Otley: 14 or 15 for 1s. Cardiff.—Eggs are 3d to 6d dearer. Welsh, 7s 3d to 7s 6d. Irish, 6s 6d to 7s 2d; Hungarian, 5s 8d to 6s 10d; Austrian, blues, 5s 4d to 5s 8d, and reds 4s 10d to 5s.

COLONIAL DAIRY PRODUCE.

London, Friday. Butter: The sale of Australian and New Zealand butter is now nominal, at prices ranging from 96s to 98s for choicest, with very small demand for finest. Arrivals during the month of June have been 1,085 casks from New Zealand and 2,340 from New South Wales. The only colonial butter now on the market is Canadian, which is growing in bulk week by week. The Copenhagen official quotation for Danish butter was 96 kroner at the date of our last report on this butter. It rose the following week to 92, and the next week to 95, which is the highest quotation at the end of June since 1883. During the first week of this month, it fell to 90 kroner, where it now remains. Cheese.—Trade at the present moment is dull, and prices for Canadian on the spot are 48s to 49s choicest, c.i.f, quotations are about the same value. The arrivals from Canada and the States this season have been large and are estimated at about 180,000 boxes in excess of last year, but are about the same quantity as arrived in the corresponding period in 1897.—W. WEDDEL AND CO.

FRUIT AND VEGETABLES.

Covent Garden. [illegible] and fruit met a good demand. [illegible] evidenced a fair supply. [illegible] 2s per bushel; parsley, 1s to 1s 6d per bushel; [illegible] 1s 3d; [illegible] Lisbon, 1s 3d per box; [illegible] Egypt, 1s to 1s 3d per box. Potatoes [illegible] Jersey, 1s 6d per lb. Bermuda, 1s per lb. Tomatoes [illegible] 1s to 1s 6d per lb. Cherries [illegible] 1s 3d per case. Fruit [illegible] 1s 3d per box; [illegible] 1s 3d per box. Bananas [illegible] 2s to 2s 6d per bunch. Pines [illegible] 2s per lb. Grapes [illegible] 1s per lb. Lemons [illegible] 2s per box. Melons [illegible] 1s to 2s each. Peaches [illegible] 1s 6d per dozen. Apricots [illegible] 1s per dozen. Nectarines [illegible] 1s 6d per dozen. Plums [illegible] 1s per dozen. Gooseberries [illegible] 1s per half-sieve. Currants [illegible] 1s per half-sieve. Raspberries [illegible] 1s per pottle. Strawberries [illegible] 1s per pottle. Cucumbers [illegible] 1s to 1s 6d each. Mushrooms [illegible] 1s per lb. Asparagus [illegible] 1s per bundle. Peas [illegible] 1s per lb. Beans [illegible] 1s per lb. Beetroots, 2s per tally; cauliflowers, 3s 6d per dozen; spinach, 2s per bushel; [illegible] 1s per dozen; [illegible] 1s per dozen; [illegible] 1s per dozen

Review of the British Corn Trade

DURING THE PAST WEEK

Written exclusively for the Mark Lane Express.

The thin plant and short straw of the wheat crop in the great wheat counties of Kent, Essex, Suffolk, Norfolk, and Lincoln practically place 1900 among the less satisfactory of harvest years. Bu as there are often fairly good crops on heavy lands, and the Midlands are more fortunate than the south and east and north of the Humber, including Scotland, there may still be average wheat crops. The season is fully a fortnight backwards, but if August prove fine we may have a good average quality and the bulk on the right side of twenty-nine bushels. The barley crop has not yet recovered from the untoward spring and from the ravages of wireworm. Like wheat, it is very short in the straw. The yield is not likely, either in quantity or quality, to equal an average. Oats show a really remarkable improvement since the wet June, and both beans and peas should yield well. Potatoes are coming on, and the root crops have also made a notable advance. There is, on the whole, a short yield of hay.

The Continental harvests look like being an average in all countries save France and Roumania. In the first the yield is put at 10 per cent. below the mean, while in Roumania "the largest wheat crop on record" is already spoken of. This report may be taken *cum grano*, for the Roumanians are an impulsive people, and after the deplorable crop of 1899 the fine yield of 1900 naturally seems extremely large. That sober view which an international trade has to take shows that even 20 per cent. above an average in Roumania would by no means balance a 10 per cent. deficiency in France.

In the United States the winter and spring wheat crops appear to have gone different ways. The Bureau report, published on the 12th inst., put the winter wheat at ·808 of an ideal crop, but the spring wheat at only ·552 of an ideal. The North-Western States were specially visited by a travelling inspector, whose independent testimony fully confirmed the advices received at Washington from the local Government reporters. A special estimate which reaches us from a good source puts the crops as follows:—

	Qrs.
Winter wheat	42,275,760
Spring ,,	20,050,560
Total	62,326,320

The yields of recent years have been officiall returned at:—

	Qrs.
1899	68,413,000
1898	84,394,000
1897	66,268,000
1896	53,460,000
1895	58,388,000

A private firm has received a cable putting the winter wheat at fourteen bushels and the spring wheat at nine bushels to the acre. The maize crop is of fine promise, and the colossal area of 83,309,000 acres has been devoted to its growth. This area, on the present aspect of the crop, should produce a yield of 249,927,000 qrs. Oats have fallen off in promise and so has barley.

The markets of the past week have been firm, if slow, and scarcely any English wheat has been parted with under 30s. per qr. The London average issued on the 13th inst. of 73 qrs. sold at the three previous markets for 26s. 7d. per 480lb., or say 28s. per 504lb., is amazing. The quantity placed on sale was 1,751 qrs., and there was a fair to good demand, so that probably 1,500 qrs. changed hands. The price probably averaged 31s. per 504lb. The Baltic lists quote *no* English wheat to be had under 30s., and leading vendors put their prices at 32s. for red and 33s. for white. Sales of 97 qrs. of oats at 26s. 2d. are about correct as to price, but 400 qrs. were offered, and it is probable that fully 350 qrs. were sold.

American wheat remains in good request, and prices from 31s. to 35s., according to quality, are obtained; 33s. 6d. would be a very fair average for all kinds. There is not a very good sale of Argentine, as so much of it arrives in a dirty state, and the milling fraternity have not yet become accustomed to the seven distinct types produced in a region covering a million square miles. Russian wheat is a dull trade, but supply is too small for such trade to be weak.

The imports of breadstuffs have been as follows:—

	Qrs.
Foreign wheat	365,000
,, flour	169,000
Breadstuffs	534,000
English wheat	77,000
Total supply	611,000

This is substantially in advance of requirements, and the stocks in granary on 14th inst. were accordingly estimated at 2,777,000 qrs.

The following are the quantities of wheat which were on passage to the U.K. on the 14th inst.:—

Wheat.	Qrs.
Russian	25,000
Turkish	15,000
Californian	1,060,000
American	395,000
Argentine	463,000
Australasian	220,000
Total	2,085,000
July 14, 1899	2,465,000
,, 1898	2,400,000
,, 1897	715,000

The figures for 1897 were the smallest ever known. About two and a quarter million is an average.

The quantities of other staples on passage thus compare with last year:—

	1900.	1899.
Flour	336,000 sacks	335,000 sacks
Maize	715,000 qrs.	810,000 qrs.
Barley	170,000 ,,	115,000 ,,
Beans	10,000 ,,	25,000 ,,
Linseed	135,000 ,,	172,000 ,,
Rapeseed	12,000 ,,	7,000 ,,
Cotton-seed	8,100 tons	6,000 tons

The reduced expectations of linseed and rapeseed more than balance the increase in cottonseed. The total of maize on passage is about an average, but that of barley is small, and would appear still more so but for the even greater reduction in supplies on passage which took place in July, 1899.

The imports of the United Kingdom last week included 151,100 qrs. of maize, 51,500 qrs. of barley, and 173,700 qrs. of oats. The first two items were small, but the third is above the mean. The market for maize and barley is, in consequence, firmer than that for oats. At this time of year, however, heavy and seasoned oats are in good request for horses, and for these kinds 21s. to 23s. is paid. The American visible supply of maize is cabled at 1,539,000 qrs. only against 1,513,000 qrs. a year ago and 2,667,000 qrs. in 1898. The exporters of maize only buy in small quantities at a time in periods of quiet business, but the visible supply is a valuable warning as to the accumulation of grain for the purposes of speculation. When we see maize stocks under three million qrs. we are thereby sure that no extensive manipulation is in progress, and we may take prices therefore as genuine. At New York 17s. per qr. has been averaged against 13s. 6d. per qr. for the like week in 1899. After paying "the ferrymen" and their satellites, insurance agents, lightermen, and so forth, 17s. per qr. at New York represents not less than 20s. 6d. per qr. at Mark Lane. The average price of linseed is 52s. 10½d. against 36s. 3d. last year. The late Lord Winchilsea, who tried so hard to reintroduce flax growing, would have rejoiced to see this average. Cottonseed averages £6 2s. 6d. per ton against £6 4s. last year. Thus the rise is not in oilseeds as a whole, and the coincidence of good linseed crops in any two out of the three great producers, Russia, India, and Argentina, would soon reduce that staple to a 40s. level in the lands of minor production, such as England, Holland, Germany, and France.

THE BALTIC.

The cargo trade for American spring wheat was at its best on the 11th and 12th, when 6s. 10d. per cental was paid for August delivery. Since the close on the 13th 6s. 9d. has not been exceeded. The ordinary wheat cargo transactions by the quarter embrace arrived, Californian at 31s., Walla Walla at 30s., and Argentine at 29s. 3d. A cargo of Australian is held for 31s. 6d., and another of Manitoba for 32s. 9d. per qr. For August shipment fine American spring has made 31s. 9d.; hard winter, 31s.; best old Duluth, 33s. 3d.; Argentine, 29s. 9d.; and New Zealand, 30s. per qr.

Barley cargoes have realised 19s. 9d. for Azoff, 18s. for Persian, 26s. for Californian brewing, 29s. 6d. for Chilian Chevalier, 26s. 6d. for Chilian brewing, and 21s. for American feeding. Maize has made 22s. 6d. for Roumanian, 20s. 6d. for mixed American, 21s. 9d. for Argentine, and 24s. for Odessa. Other cargo sales are No. 2 Canadian peas at 28s. 3d.; Saida beans at 28s.; Azoff rye at 24s. 6d.; white Libau oats at 15s.; and Smyrna dari at 23s. per qr.

Cargoes of linseed oil are offered for prompt shipment at £34 6s. 8d. per ton; of cottonseed oil, at £21 16s. 6d., and of brown rape oil at £28 15s. 6d. per ton. A cargo of poppyseed was sold on Saturday for 47s. 6d. prompt shipment from Bombay.

The arrivals of grain and seed-laden vessels at ports-of-call for the week were 12 wheat (1 Adelaide, 3 Buenos Aires, 1 Portland (O.), 3 Rosario, 4 San Francisco), 1 locust beans (Faro); total 13.

The sailings of grain and seed-laden vessels from ports-of-call for the period 7-14 July were 2 wheat (1 Antwerp, 1 Dublin), 1 beans (Greenock); total, 3.

THIS DAY'S MARKETS.

MARK LANE, MONDAY.

[FIRST REPORT.]

Some very fine 64lb. English white wheat has fetched 33s. 6d. per qr. Nothing is to be had under 29s. 6d. per qr. Fine red makes 31s. without difficulty. But the firmness of English is largely due to scarcity. Foreign wheat is firm for strong red sorts. Special wheat from the Winnipeg district is held for 34s. 6d., and the finest Duluth for 6d. above that. But ordinary foreign white wheat is 6d. cheaper on the week. Scarcely any Indian, Chilian, Roumanian, Polish, or ordinary Canadian wheat is to b had. The millers' choice of samples is certainly more restricted than usual. Maize has realised 26s. 6d. for very special Cinquantina, but a cable announcing 444,000 qrs. freshly shipped by the Atlantic ports stops the idea of advance for flat corn. Argentine is firmly held. Oats are firm for English, and steady for Russian, but American are weak. Barley shows a good demand for Persian, but most kinds are neglected. Other sales to-day include Russian buckwheat at 24s. per qr., Spanish lentils at 16s. per cwt., very fine Scotch tares at 68s. per qr., dun peas from Australia at 26s. 6d. per 504lbs., and Morocco dari at 23s. 6d. per qr.

CLOSE OF THE MARKET.

By Telephone, 2 p.m.

The market closed very stiff for feeding stuffs. Even flat maize was stronger at the close. The growing crops are naturally better spoken of than a week ago, but the trade is not materially affected by home news when the great American harvest is asserted to be more or less deficient.

THE FLOUR TRADE.

MARK LANE, July 16.

The market to-day was rather depressed, owing to the great heat and the indisposition of bakers to keep much flour by them with the temperature at ninety in the shade. Town Household flour made 24s. 3d. to-day, and country makes were irregular; 21s. to 23s. Of the finest American grades Pillsbury is selling from 25s. 9d. to 26s. 3d. per sack; Star, from 27s. 6d. to 28s; Gold Medal, from 26s. to 26s. 6d., and Minnesota Success, from 25s. per sack. The shipments freshly cabled are not over 150,000 sacks of all kinds, but the American market is not strong. Secondary American grades, serviceable household flour, are obtainable to-day at 20s. for Ceres, 20s. 3d. for Improved, Nicollet, 20s. 9d. for Iron Duke, and 20s. 3d. for Minnesota Stalwart. Hungarian flour was dull, but steady to-day. French was in scarcely any request at currencies. Australian flour makes 23s. for best, and 21s. for ordinary. There is but a small supply. Meal and milling offals had an upward tendency, but trade was the reverse of brisk.

LONDON TERM MARKET.

This market is held twice a day at South Sea House, and is open to elected members only. No business except for future delivery is done, and the smallest quantity that can be purchased is 1,000 quarters or 4,800 centals.

The name of the month stands for guaranteed delivery (if required) on or before the last day of that month, and the following have been the prices per cental recently made:—

Wheat.—	July.	Aug.	Oct.	Dec.
	s. d.	s. d.	s d.	s. d.
July 9 noon	6 9 .. 6 9	.. 6 11	.. 7 0	
4 p.m.	6 9 .. 6 9	.. 6 11	.. 7 0	
July 10 noon	6 9 .. 6 9	.. 6 11	.. 7 0	
4 p.m.	6 9 .. 6 9	.. 6 11	.. 7 0	
July 11 noon	6 9 .. 6 10	.. 6 11	.. 7 0

July 14 noon	6 8 .. 6 9	.. 6 10	.. 6 11	
To-day noon	6 7 .. 6 7	.. 6 8	.. 6 9	

Maize makes 4s. 3d. per cental for forward delivery, with 4s. 4d. asked.

The Term Market standard wheat is No. 1 Northern Spring American sold on the Duluth certificate. Other sorts of wheat can be bought at the above prices plus or minus agreed difference between the other sort and the standard quality. Quotations are by the "true hundredweight" or cental of 100lb. We do not give fractions of a penny per cental. Delivery is understood as being guaranteed on or before the last day of the month named in the quotation. The maize quoted on the Term market is flat grain from the United States.

SEEDS.

London, Monday.—Messrs. John Shaw and Sons, seed merchants, of Great Maze Pond, Borough, London, S.E., write that new English trifolium is now offering; as the new crop will probably be a large one, prices promise to open low; samples of new French seed, showing good quality, are also coming to hand. Cloverseeds, of all kinds, with but little business passing therein, are firmly held. Full rates are asked for mustard and rapeseed. Canaryseed, with a strong undertone, attracts increasing speculative attention; good sound hempseed meantime is 1s per qr. dearer. Blue peas and haricot beans find buyers on former terms.

HOPS.

London (Borough), Monday.—Messrs. W. H. and H. Le May, hop factors, 67, Borough High-street, London, S.E., report: There is still a considerable inquiry on this market for hops of all descriptions. Stocks are very light, and prices are firm. Reports from the plantations speak of a continuance of the aphis blight, fresh fly appearing daily.

GRAIN AND FLOUR FACTORS' REPORTS.

Under the influence of hot forcing weather the wheat trade has lost the animation apparent last week, and although the variations in values are slight, prices must be quoted generally in buyers' favour. Barley firm and unchanged, flat maize 3d. dearer, round unaltered.—W. P. Wood and Co., Mark Lane.

Flour: A very quiet trade at last week's prices.—T. S. Medill, Mark Lane.

The trade for town-made milling offals is strong, and prices of middlings have increased 2s. 6d. to 5s per ton. Bran and pollard firm, but country buyers still stand off. Rangoon rice meal is offering at 90s., rails.—Richard Doggett, Mark Lane

Our market is now very thinly attended, and the business doing in seeds is on a very small scale. Of old clovers of all kinds and of old trefoil, the offerings are unusually light, the holders of the small stocks existing not being willing to accept current values. New French trefolium is freely offered, but there seems no disposition to buy at the prices asked, the general opinion being that little will be sown this autumn. Canary seed continues dull. Mustard and rapeseed are in moderate request. Haricots and blue peas are pretty well cleared off.—John Picard and Co., Mark Lane.

Wheat: a quiet trade, prices 6d. lower. Flour unchanged. Maize 3d. per qr. dearer. Barley and oats maintain last week's prices.—Coventry, Mark Lane.

Many of the wholesale houses have contracted for bran for the summer months, and in consequence the demand from this class of buyers is rather quieter. Weather warm and favourable for hay-making, which has now become more general.—Greenhill Bros., Belfast, July 14.

Wheat quiet with a small business; white wheat ½d. per cental lower, red ½d. dearer. Flour in very quiet demand. Foreign brands are mostly 6d. per sack easier than last market day, but the Liverpool Association of Millers make no change in the minimum quotation for their "baker's" grade. Maize has met a fair demand for mixed American, which sold at fully last market day's price and closed firm thereat. River Plate moves well into consumption at full prices. European, quiet, unchanged, with the exception of Cinquantina, which yesterday were raised 1d. per cental and are now firmly held at the advance. Barley firm for brewing, which are held rather higher. Other qualities steady at full prices. Beans in moderate demand with no quotable change in prices. Peas quietly steady at late rates. Oats have a fair demand for British, which are held at full prices; foreign steady, unchanged. Oatmeal firm, but nothing doing. Oilcake had a moderate demand and is firmly held at fully late rates to some advance.—Ross T. Smyth, Liverpool, July 14.

THE BALTIC, Monday, 1 p.m.

State of Trade.

The wheat cargo market is better for red than for white descriptions. There is not very great energy in either branch. Maize cargoes are in good request at a further 3d. advance. Barley is firm, but oats and beans are neglected. Cargoes of oil seeds are selling well.

Business Done.

Wheat.—Californian, 31s 6d, arrived; Argentine, 29s 3d, arrived; No. 1 Northern, 32s, on passage; No. 1 Northern, 32s 3d, August shipment; Best Duluth, 34s, August shipment; Odessa Ghirka, 29s, October, shipment; Australian, 31s, prompt shipment.

Maize.—Roumanian, 21s 9d, prompt shipment; Argentine, 21s 9d, August shipment; American, 21s, September shipment.

Barley.—Nicolaieff, 19s, prompt shipment; Persian, 17s 6d, prompt shipment.

Peas.—Canadian, 27s 9d, prompt shipment.

Linseed.—Calcutta, 59s 6d, arrived; 56s, nearly due; 55s, September shipment; Bombay, 53s, prompt shipment.

Rapeseed.—Ravison, 29s 6d, September shipment; yellow Guzerat, 16s. 6d, prompt shipment.

Cottonseed.—Egyptian, £6 10s 0d, September shipment.

Arrivals of Grain.

Since January 1, 1900, the total arrivals have been 192 wheat, 13 wheat and barley, 6 flour, 8 maize, 1 maize and oats, 21 barley, 14 beans, 7 locust beans, 1 linseed, 2 canaryseed, 5 valonea; total, 270.

Last year during the same time the arrivals were 169 wheat, 8 flour, 3 maize, 6 barley, 1 barley and beans, 6 beans, 1 locust beans, 4 linseed, 4 canaryseed, and 7 valonea; total, 209.

Sheep	3 0 —	5 0 —	6 [illegible]
Lambs	5 6	5 10 ..	6 6

Milch cows, per head, £15 to £21 10s.

British arrivals include as follows:—Scotland, —; Eastern Counties, 144; Midland, Home and Western Counties, 1,082; Devon, 70; and Ireland 34.

Compared with last Monday the supply of beasts on offer showed an increase of 200 head due to large arrivals from the Midland Counties, whilst Norfolks were not 1 shorter. Trade for both prime and second quality was slow and rates easier. A clearance will not be effected. For fat cows and bulls there was a fair inquiry, with a light supply; rates in some places were firm. There was no demand for the few roughs that came on offer.

The following are top quotations per 8lb (sinking the offal):—

	To-day.	July 17th, 1899.
Herefords	4s 10d to 5s 0d	.. 4s 6d to 4s 8d
Norfolks	4s 6d to 4s 8d	.. 4s 4d to 4s 6d
Runts	4s 9d to 4s 11d	.. 4s 4d to 4s 6d
Lincolns	4s 4d to 4s 8d	— 4s 0d to 4s 4d
Irish	4s 4d to 4s 6d	.. 3s 10d to 4s 0d
Fat cows	3s 10d to 4s 0d	.. 3s 6d to 3s 8d

In the sheep market there was an increase of 1,200 in the number penned compared with Monday last, the supply including 240 Scotch, 420 Irish and 1,800 from the Eastern counties. Trade for both wethers and ewes ruled slower, a clearance having to be forced at a decline of 2d per stone, particularly with regard to the latter. For best quality lambs there was a steady demand, higher rates being obtained, but other qualities were difficult to vend.

Undermentioned quotations are at per 8lbs. (sinking the offal), and are for the best of each class penned:—

	To-day.	July 17th, 1899.
7½ to 8-stone Downs	6s 0d to 6s 2d	.. 5s 8d to 5s 10d
9-stone ditto	5s 10d to 6s 0d	.. 5s 6d to 5s 8d

5-stone Grass lambs	6s 4d to 6s 6d	.. 6s 2d to 6s 4d
6-stone half-bred ditto	— to —	.. 5s 8d to 5s 10d

Calf trade nominal.

FEEDING STUFFS.

London, Monday.—Linseed Cake: Market very firm and 2s 6d dearer on the week. Westerns and Russians are offered very sparingly for shipment. Decorticated cotton cake: Stocks small and prices firm. Cotton cake: 1s 3d up. Linseed steady; values as last.

English linseed cake	£8	0	0	to £8	5 0 ex mill
American Western linseed cake	7	7	6	to 7	10 0 ex quay
Russian oil cake	7	12	6	to 7	15 0 ex quay
Feeding cake, Samuelson's S.P.F. (10 to 12 p.c. oil)	None				ex warehouse
Decorticated cotton cake	6	12	6	to 6	17 6 ex quay
Decorticated cotton meal	6	10	0		ex quay
London made cotton cake (best)	4	7	6	to 4	10 0 ex mill
Egyptian cotton cake (in bags)	4	7	6		ex quay
Burton desiccated ale grains (bags included)	4	6	0		on rail, Burton
Rangoon Rice Meal	4	5	0	to 4	7 6 ex warehouse
Calcutta linseed in bags, per 410 lbs	2	15	6	to 2	16 0 ex warehouse

—Robt. and John Hewetson.

PROVISIONS.

London, Monday.—The arrivals from Ireland last week were 2,581 bales bacon, and from foreign ports 10,253 bales b con. The supplies of bacon were still in excess of the demand last week, but at rather lower prices all round; there was a better advance, market closing steady at 48s. to 56s. up to 68s for Irish; 46s to 56s up to 64s for Danish; and 50s to 52s up to 58s for Canadian. The butter market was steady, prices being high for the time of year. Danish, 108s to 108s; Irish, 92s to 102s. Canadian, 98s to 102s. Lard quiet: Irish, 44s to 50s; Danish, 44s to 46s; American, 36s to 37s.

LIVE STOCK AND MEAT TRADE REVIEW.

(WRITTEN SPECIALLY FOR THE "MARK LANE EXPRESS.")

Trade in London.

For fat beasts of both prime and second quality the trade at Islington, which was confined to Monday, though of a slow nature was firmer in regard to value, especially for the best, Herefords, which are now arriving in increasing numbers, taking the place of consignments from Norfolk, the season for which is now closing, whilst the Irish season is now beginning. Fat butchering cows and bulls, being in light supply and meeting with a steady demand, were more easily disposed of, even at an advance of 2d. per 8lb., a clearance being early effected. Very little demand for the few rough cattle on offer, owing to so many being lately condemned for tuberculosis. At the foreign cattle market there was a decrease of 957 in the number on sale compared with last week, owing to shorter consignments from the United States, in consequence of which trade was of a firmer nature, both in regard to tone and value, markets being held on Monday, Wednesday, and Saturday. The total number of beasts offered for sale on both markets was 4,175 (previous week 5,102), consisting of 1,120 British and 3,055 foreign, these latter comprising 1,920 from the United States and 1,135 from Canada. The following were the top rates paid per 8lb. (sinking the offal):—95-stone Herefords, 5s.; 105-stone ditto, 4s. 10d.; 90-stone polled Norfolks, 4s. 8d.; 100-stone Shorthorn ditto, 4s. 6d. to 4s. 7d.; 100-stone Loncolns, 4s. 6d. to 4s. 8d.; 110-stone ditto, 4s. 4d. to 4s. 5d.; 90-stone States, 4s. 6d.; 105-stone ditto, 4s. 3d.; 90-stone Canadians, 4s. 4d. to 4s. 5d.; 95-stone fat cows, 4s.; 100-stone fat bulls, 3s. 6d. On Monday the trade for sheep at Islington ruled firmer for both wethers and ewes, as was also the case with regard to lambs, these making 2d. per 8lb. more money, whilst on Thursday ewes were 2d. per 8lb. lower, wether sheep with difficulty holding their own, as also did the best quality lambs, but heavy ditto, as well as half meaty sorts, were more difficult to cash. At Deptford rates were firm at an advance of from 2d. to 4d. per 8lb. The total number penned was 13,417, consisting of 12,980 British (increase 190), and 437 Canadian (decrease 53). Best pens made per 8lb. as follows (sinking the offal):—7½ to 8-stone Downs, 6s. 4d.; 8-stone Scotch, 6s. 4d.; 9-stone Downs, 6s. 2d.; 10-stone ditto, 6s.; 10-stone half-breds, 5s. 10d.; 10-stone Irish, 5s. 8d.; 12-stone Lincolns, 5s. 6d. to 5s. 8d.; 8 to 8½-stone Canadians, 4s. 6d. to 4s. 8d.; 10-stone Down ewes, 4s. 8d. to 4s. 10d.; 5-stone fat grass lambs, 6s. 4d.; 6-stone ditto, 5s. 10d. Calves were shorter in number (100), and met a steadier trade in consequence, but cannot be quoted any dearer, the best making 5s. 4d. per 8lb. (sinking the offal).

Trade in the West.

All kinds of store stock, cattle as well as sheep, are showing improvement. Sheep are beginning to "boom," and we are looking with confidence to a still more marked rise in values, though the improvement which has already resulted within the last few days—a rise all round of from 2s. up to as much as 7s. a head— is very gratifying to flockmasters. An encouraging feature is that there are more buyers than sheep can be found for. The mutton and lamb trade keeps up unusually buoyant. Both veal and pork are firmer than might be expected.

Trade in Ireland.

A decrease of cattle in Thursday's Dublin market had the effect of stiffening prices and creating a slight advance on the best descriptions. Good bullocks for export were in active demand and sold briskly. Coarse cattle and dairy-fed cows were, however, hard to move. The sheep trade was slow and disappointing, possibly owing to the warm weather making butchers more cautious in their dealings. The trade for lambs was worse than last week, best being 2s. per head lower, while thin and lean descriptions were almost unsaleable, and a large number unsold. Veal without quotable change in price, but choice meeting with very active demand. Pigs were in moderate supply, and buying brisk, the advance in price gained last week being fully maintained, and an early clearance effected.

Trade in Scotland.

John Swan and Sons, Limited, give the following as their report on above for the current week:—The number of fat cattle on offer this week has been rather under the average, and a good trade throughout has been experienced and prices without quotable change. Sheep have been shown in larger number, the best qualities meeting a good inquiry at previous prices, but heavy weighted ewes were slightly cheaper. Exceptionally large numbers of lambs forward, the best selling well, but secondary and inferior making less money. There was an extra good show of calves, selling dear. Pigs also met a good trade. Very small supplies of store sheep of fair quality, and these met a quiet trade and a number of a secondary description unsold. Store cattle shown in moderate numbers, and less inquiry than of late, and several secondary lots left unsold. There were smaller numbers of milch cows, prices similar to last week; secondary classes more difficult to sell. Quotations: Top price best beef, 8s. 3d. to 9s. per stone. Best mutton, 8¾d. to 9¼d. per lb. Ewes, 5¾d. to 7½d. per lb.

LONDON.

London Central, Wednesday.—Supplies were only of fair extent, but trade ruled slow owing to hot weather. Beef: Scotch short sides, 4s 8d to 5s; long, 4s 2d to 4s 6d; English, 4s to 4s 2d; American Deptford-killed, 3s 10d to 4s; Liverpool, 3s 8d to 3s 10d; American refrigerated hindquarters, best, 3s 10d; seconds, 3s 4d to 3s 8d; forequarters, 2s 8d to 2s 10d; seconds, 2s 8d. Mutton: Scotch, 5s to 5s 4d; English wethers, 4s 8d to 5s; ewes, 3s 8d; English lamb, 5s 4d to 5s 8d. Veal; English and Dutch, 4s to 4s 4d per 8lb.

London Central, Friday.—Good supplies offered, but trade slow. Beef: Scotch, short sides, 4s 8d to 4s 10d; long, 4s to 4s 4d; English, 4s to 4s 2d; American, Deptford killed, 3s 10d to 4s; Liverpool, 3s 10d to 4s; American refrigerated hindquarters, best, 3s 8d to 3s 10d; seconds, 3s 6d; forequarters, best, 3s; seconds, 2s 8d to 2s 10d. Mutton: Scotch, 5s 4d; English wethers, 5s; ewes, 3s 8d to 4s; Canterbury, 2s 11d to 3s 2d; Wellington, 2s 10d to 3s 1d; Sydney and River Plate, 2s 7d to 2s 8d; English lamb, 5s 4d to 5s 8d. Veal: English and Dutch, 4s to 4s 4d per 8lb.

Islington, Thursday.—Beast entries were on a small scale, and although chiefly consisting of fat bulls and rough cattle, evidenced a very fair demand at steady rates. Good supply of sheep and lambs penned and a slow demand prevailed for both wethers and ewes, the latter being occasionally 2d per 8lb lower. 7½ to 8-stone Down wethers, 6s to 6s 4d; 9-stone, 5s 10d to 6s; 10-stone half-breds, 5s 8d to 5s 10d; 10-stone Down ewes, 4s 6d to 4s 8d, exceptionally 4s 10d; 11-stone half-bred, 4s 2d to 4s 4d. Lamb trade slow at about late rates. 5-stone fat Downs, 6s to 6s 4d. Calves met a fair enquiry, the best making 5s 6d per 8lb, to sink the offal.

COUNTRY.

Ashford, Tuesday.—Best beef, 12s to 12s 6d per score; secondary beasts fetched 11s to 11s 6d. Mutton in good demand. Down and cross-bred wethers, 5s 4d to 5s 8d per 8lb, and best small Kents 5s 2d to 5s 6d. Barrens about 4s to 4s 4d per 8lb. Lambs, 6s to 7s per 8lb. Veal, 5s to 5s 4d, and pork, notwithstanding the heat, sold well at last week's rates. There was very little store trade.

Basingstoke, Wednesday.—At Raynbird and Sons' sale-yard there was an average attendance of buyers, to meet a supply of 33 fat beasts, 76 calves, 530 fat sheep and lambs, 71 pigs, and 100 head of dairy and store cattle, for which the following prices were realised:—Fat beasts, £14 to £21 5s; fat calves, 75s to £5; small, 20s to 50s; fat wethers, 39s 6d to 61s 6d; fat ewes, 38s to 40s; fat lambs, 27s to 42s 6d; fat porkers, 26s to 45s; store pigs, 13s to 22s; dairy cows, £9 10s to £19 10s. The show of fat beasts was short in numbers, but good as regards quality, and included consignments of prime quality Shorthorn, Scotch, and Norfolk polls. Shorthorn stores reached £20 15s, heifers £19, and cows £12 10s; two-year-old polled Angus steers up to £18 10s, and heifers £15 10s; polled Norfolks up to £21 5s. A clearance made with a firm trade. Prime quality wethers and ewes were cleared at about last week's figures, but lambs were lower and part of the supply left the ring unsold, being held beyond the views of the buyers. The extreme heat has an adverse effect on the trade. Prime quality Hants Down wethers and ewes made 48s, 61s 6d, 47s, 44s, 41s, 40s, 39s 6d; Southdown, 46s 6d. 36s; Scotch, 44s; 18-months old Hants Down wethers and ewes, 52s, 41s 6d, 48s 6d, 43s, 42s 6d; 6-months old lambs, 33s, 38s 6d, 39s, 32s, 42s 6d, 42s, 33s, 35s 6d; 3-months old ditto, 31s 6d. Crossbred lambs, 26s 6d; ditto Southdown, 27s; black face Scotch, 18s, 15s; old ewes, 37s, 33s, 40s, 36s. 36s 6d. With a short entry of dairy cattle, trade for all best sorts of milch cows showed an improvement. Store cattle met a good demand at higher prices; fat calves with a moderate supply made more money; fat porkers met a better trade owing to a short entry and quicker demand; store pigs were cleared at late prices. Ruling values:—Best quality fat beasts, 7d to 7¼d; second ditto 6¾d to 7d; bulls, cows, and inferior beasts, 5½d to 6d. Best quality sheep, big lambs, 8½d to 9d; second quality ditto, 7¾d to 8d; old ewes, rams, and inferior sheep, 6d to 7d; 3-months old sucking lambs, 9d to 9½d per lb. Fat calves, 6d to 8d per lb. Fat porkers, up to to 10s per score.

Calne.—Present prices for prime pigs, in lots of not less than 10, on rail within 100 miles of Calne:—

Prime stores.	Thickness of fat in any part of the back.	Price per sc.
6 sc 10 lbs to 9 sc 10 lbs ..	2½ in. and under.. ..	9s 6d
Under 10 sc 10 lbs	Not exceeding 2½ in. ..	9s 0d
Under 11 sc 10 lbs	Not exceeding 2½ in. ..	8s 6d
Under 12 sc	Not exceeding 3 in. ..	—

Any pigs outside these limits at their value. Half truck, 12 pigs. Whole truck, 25.—CHARLES AND THOMAS HARRIS AND CO., Limited, Calne, Wilts.

Cambridge, Monday.—Beasts, 369; sheep, 1,282; pigs, 400; horses, 10. Beef, 7s 9d to 8s 3d; mutton, 5s to 6s; pork, 5s to 6s 6d. Small show store beast, trade slow. Fat beasts, a good number to hand, prices unchanged. Fat sheep, a good trade at late rates. Stores, a large show and trade dull. Fat pigs, very little alteration in the trade, prices a shade better. Stores, not quite so good as last week.

Canterbury, Saturday.—The supply was limited, but the demand was somewhat improved. Wethers were selling at from 37s to 38s, and a few exceptionally good tegs made 41s per head. There were only a few cows and calves offering. Yearlings sold at £5 to £6 10s apiece.

Carlisle, Saturday.—About 400 Irish store cattle formed the supply to-day. These were mostly heifers of a small and medium description, and a number of nice polled heifers were included. The attendance of buyers was affected by the hay harvest, which is now in full swing, and trade was quieter in consequence. Prices for the smallest beasts were from £6 10s to £8 10s; best sorts up to £14 10s; polled heifers, £11 10s. Young pigs were a small show, and changed hands as soon as brought into the market.

Chichester, Wednesday.—Fat stock, of which there was about an average supply, met with a fair inquiry, and trade was firm. Best Southdown mutton showed an improved tendency.

Derby, Tuesday.—There was a less animated demand for beef and mutton at to-day's market, and prices were easier. Beef, 6d to 7d; mutton, 7d to 8½d; lambs, 8d to 9d; pigs, 8s to 9s per score.

Doncaster, Tuesday.—Fair show of cattle, and fully an average supply of sheep, late prices ruling in both cases. Beef, 8s to 8s 6d per stone; mutton, 7½d to 8½d per lb for shearlings, and 5d to 6d per lb for ewes. Lamb cheaper, 9d to 9½d per lb; veal, 8d to 9d per lb.

Dorchester, Saturday.—By no means a heavy delivery of stock, and this gave a very firm tone to the trade. Milch beasts, for anything good, were exceptionally dear, making up to £22 each.

Dublin, Thursday.—A firmer tone prevailed in the beef market, and a good clearance was effected. Demand for prime qualities was good, and well maintained, with prices more in favour of sellers. Sheep of best quality for home consumption making late rates, all other sorts lower. Lambs quieter trade at prices favouring buyers. Cattle (best), 35s to 36s per cwt; exceptional for fancy crossbreds, 38s per cwt; other descriptions, 30s to 32s per cwt. Mutton, 5¾d to 7d per lb. Lambs, 17s to 36s each.—GANLY, SONS, AND CO.

Dumfries, Wednesday.—Beef again in good demand, best quality making about late rates. Quotations:—Blue-grey bullocks, to £19; heifers, to £15; horned bullocks, to £18; ditto heifers, to £15; polled bullocks, to £18; Galloway cows, to £15; calving cows, to £13. Sheep made late prices; Cheviot ewes, to 32s; blackfaced ewes, to 40s.

Edinburgh, Wednesday.—Supplies of sheep as last week, with slow trade, in favour of buyers. Half-bred hoggs, 34s to 40s; Cheviots, 20s to 28s; black-faced wedders, 27s. Cattle were small, and the supply short. Horned bullocks sold at £13 16s; stirks at £9 to £10. In the best classes of shorthorns, cows brought £24 to £26; Ayrshires, to £18 10s; crosses, to £19.

Glasgow, Wednesday.—Supplies shorter of cattle; something similar to last week for sheep and lambs. Trade quiet, owing to the holidays. Top mutton 9d to 9½d; secondary, 8d to 8½d; lambs, 9d to 9½d per lb. Top Scotch cattle, 68s to 70s; secondary, 62s to 64s; grass Irish, 60s per cwt. Dead meat a quiet sale, prices easier; best States beef, 5½d; home wedders, 8d to 8½d per lb.

Hereford, Wednesday.—Return of stock brought to the cattle market this day:—Bullocks and cows 486, calves 114, sheep 1,833, lambs 1,099, pigs (fat and sows) 9, sucking pigs 22, pigs (stores, not more than ten) 104, pigs (stores, more than ten) 49, horses 1. Prices of stock: Best beef, 6d to 7d per lb; wether sheep, 6½d to 8d per lb; ewes, 5½d to 6d per lb; veal, 7d to 8d per lb; lamb, 9½d per lb; pork, 4½d to 5d per lb; bacon, 4d to 5d per lb.

Ipswich, Tuesday.—Messrs. Robt. Bond and Sons report: The supply of fat cattle was good for the time of the year, and with the usual attendance of buyers, trade ruled firm without any alteration in values, the best animals making up to £21 15s. A larger supply of fat lambs, some of which were remarkably good, realising from 51s downwards. The number of fat sheep were shorter than usual, the best animals ranging from 55s 6d. Calves for weaning were again in strong demand up to 62s. Fat calves were scarce and dear making up to £5 2s 6d. Fat swine were fairly well represented, and prices ruled in favour of consignors. Stores were short and dearer. Thirty-six cows and heifers were forwarded, the best were sharply competed for and excellent prices were obtained. A polled cow and a calf made £19 10s. A half-bred Dutch from the same consignor made £16 10s, others ranging downward to £10 10s. Several lots of store cattle were offered and found buyers at rather more money. Numbers at sales and market:—Beasts, 642; calves, 44; sheep, 2,589; pigs 741; horses, 64.

Leicester, Saturday.—Fair supplies of home bred bullocks in good condition; trade active for choice qualities; inferior flat milch cows, £21 per head; bullocks, £12 to £18 per head. Young stock a slow trade.

Lincoln, Friday.—Owing to the heat, extremely bad market. Milch beasts, £12 to £21; two-and-a-half-year-old bullocks, £13; drapes, £8 to £11; and a few young beasts changed owners at from £4 10s to £8. Three lots of store sheep realised from 30s to 40s each. In pig department suckers sold at 15s to 21s; and stores at from 25s to 40s.

Newcastle, Tuesday.—Fair trade, prices steady. Numbers:—Cattle, 1,469; sheep and lambs, 7,823; calves, 92; pigs, 412. Prices (sinking the offal):—Beef, 5s 6d to 5s 9d per stone; pork, 5s to 7s 6d per stone; mutton, 6d to 9d; lamb, 8d to 9d; veal, 5d to 8d per lb.

Newport, Wednesday.—A short supply, but there was a very good business. The quotations were:—Best beef, 6¾d to 7d per lb; secondary, 6d to 6¾d; best wether mutton, 8¼d to 8¾d; ewes, 7d to 7¼d; lamb, 8d to 8¼d; veal, 7d to 8d; porker pigs, 10s to 10s 6d per score.

Norwich, Saturday.—The supply of store cattle was moderate here to-day, and many of the lots on offer were of a second-rate character. The best descriptions sold readily, at fully former terms, but other lots were dull, at barely previous rates. Fat beasts were firm at 7s 9d to 8s and 8s 3d per 14lb. Store sheep were in large supply: trade was quiet, at about former rates, lambs making 18s to 32s, and keeping shearlings 38s to 46s per head. Fat sheep, which were in moderate supply, were dull, at 9s to 9s 6d and 9s 9d per 14lb.

Preston, Wednesday.—Fair attendance, but trade was slow, and prices a shade easier all round. Rather small supply of cattle and good supplies of sheep and calves. Heifers and bullocks, 6¼d to 7¼d; cows and bulls, 5¾d to 6¼d; mutton, hoggs, 7¾d to 8¼d; tups and ewes, 5¼d to 7d; lambs, 8d to 8¼d; calves, 5¼d to 6¾d. At market—185 cattle, 2,730 sheep and 90 calves.

Romford, Wednesday.—There was a large supply of fat beasts, and trade was about the same. Best animals made 4s 6d to 4s 8d, and middlings 4s to 4s 2d per stone. Calves were in average supply, and trade was worse, at 4s 8d to 5s per stone. Sheep were in large supply, and trade was very slow. Best sheep made 5s 6d to 5s 8d, and middlings, 5s to 5s 2d per stone. Lambs were in average supply, and trade was slow, at 5s 8d to 6s per stone. There were very few store beasts on offer, and the demand was slow. The pig trade was bad, owing to the great heat.

Salford, Tuesday.—The supply of cattle was again larger. Trade ruled quiet, but sellers maintained late rates. There was a larger show of sheep and lambs. Choice quality of both met with a quiet trade at about last week's prices; medium and inferior grades were dull and much lower. A smaller display of calves, and a fair demand at late rates. Quotations: Cattle, 5½ to 7¼d; sheep, 6¼d to 9½; lambs, 8d to 9¼d; calves, 5¼d to 7¾d per lb. At market—Cattle, 1,657; sheep and lambs, 20,569; calves, 134; pigs, 36.

Sheffield, Tuesday.—There was only a small supply of milch beasts on offer, but a very fair trade was done, best quality making £18 to £23; secondary, £12 to £18.

Spalding, Tuesday.—A large supply of beef, making 8s per stone. Fair trade for store beasts at late rates. Milking cows and in-calvers dear. A small supply of sheep, which maintained their price, about 8d per lb being realised for mutton.

Stockton, Wednesday.—There were on offer 174 cattle, 5 calves, 200 sheep, 124 lambs, and 248 pigs. Only a slow trade for a small show of best cattle, prices ranging from 8s 6d to 9s; rougher kinds, 7s to 7s 6d per stone. Calves, 6d to 7d; young sheep, 8¾d; lambs, 9½d; ewes, 7d; tups, 5d to 6d per lb.

Taunton, Saturday.—Small supply and moderate attendance. The sheep trade was quiet, but cattle showed an improvement.

Thame, Tuesday.—There was a capital supply of stock at market, and the quality, particularly the beef, was considered the best that could possibly be found in any market. There was a large attendance of buyers, and trade was very fast at improved prices, and no less than ninety out of the ninety-five beasts offered were sold under the hammer. Mr. Bond's sale comprised 95 prime fat bullocks and heifers, 261 fat sheep and lambs, 46 fat and weaning calves, and 16 pigs. Bullocks made £17 to £21 15s; fat heifers £14 to £20 10s; fat wether sheep, 44s to 56s 6d; fat ewes, 36s to 48s; fat lambs, 31s to 42s; fat calves, £4 to £4 12s; cow calves, 25s to 56s; bull calves, 17s to 49s. Pigs were dearer.

Wakefield, Wednesday.—Larger supplies of all kinds, but trade quite at a standstill, the fine weather, no doubt, keeping farmers in hayfields. Prices had a downward tendency. Lambs, 8d to 9d per lb; wethers, 8d to 8¾d. Other kinds, 5¾d to 6¾d. Best beef, 7½d. Other qualities, 6¼ to 7d. Numbers at market: Beasts, 1,405; sheep, 4,914.

Wakefield, Wednesday.—The very sultry weather considerably interfered with trade, whilst hay-making operations affected the attendance, which was far below the average. There were 1,405 fat beasts on offer, against 1,387. The beef trade ruled very dull, but as choice lots were scarce prices

were well maintained for the best qualities; other sorts were a shade easier. Best beef, 7d to 7½d; useful lots, 6½d to 6¾d; rough sorts, 5½d to 6d per lb. There were 4,914 sheep and lambs, against 4,825 last week. Lambs and choice small sheep met with a steady demand, lambs selling at 9d to 9½d per lb, and small mutton at 8d to 8½d. Good strong sheep made 7d to 7½d, and fat and heavy ewes and tups were almost unsaleable at 5½d to 6½d per lb. Fat calves moved off slowly at 6d to 7½d per lb and breeding calves made 20s to 24s each. There was a big show of milch cows, but trade was dull and prices about £1 per head lower. Best milch cows, £18 to £22; inferior, £12 to £17.

Wolverhampton, Wednesday.—Large supply all round; trade slow. Best beef, 6d to 7d per lb; mutton, 6d to 8½d per lb; veal, 6½d to 8d per lb; lamb, 8d to 8¾d per lb. Milch cows a short supply; fair demand from £14 to £20. Bacon pigs, 9s 6d to 9s 9d per score; porkets, 9s 9d to 10s per score; sows, 7s 6d per score.

Worcester, Saturday.—Market well supplied in all departments, but trade ruled quiet. Best quality cattle sold well, but inferior sorts were neglected. Mutton slow trade, at rather easier rates. Calves made previous prices. Poor trade for pigs.

Worksop, Wednesday.—A very full market, with some excellent quality beasts and sheep penned, good prices being realised all round. Beef again made fully last week's prices. Best 8s to 8s 9d; secondary, 7s to 7s 6d per stone; best shearling mutton, 8d to 9d; ewes and other sorts, 5d to 7d; veal and lamb, 8d to 10d per lb.

York, Saturday.—Calves, 8d; small sheep, 8½d; large sheep, 8d; ewes, 6d to 7d; and lambs, 9d to 10d per lb; small pork pigs, 6s 3d; and large ditto, 6s 9d to 6s per stone.

FOREIGN.

Yorkhill, Monday.—A sale of United States and Canadian cattle was held in the afternoon, when there were penned in the lairages 994 animals. There was a very large attendance of buyers, both wholesale and retail, and trade was good throughout, last week's values being fully maintained. The dead-weight quotations were as follows:—Best States bullocks, 58s per cwt and for really choice up to 60s; secondary and heavier animals, 56s; bulls, 48s to 50s according to quality and finish; best Canadian bullocks, 56s, and for really choice up to 58s; secondary and heavier animals, 54s; best bulls, 50s; and secondary and heavier, 46s to 48s.

Yorkhill, Tuesday.—At the sale of United States and Canadian cattle held to-day there were offered 642 animals, 238 of which were left over from the previous day. There was another good attendance of buyers, but trade was rather slow, a fact due to the large supplies and the hot weather. The dead-weight quotations were as follows:—Best States bullocks, to 58s per cwt; current, 56s; secondary and heavier, 54s to 56s; best bulls, to 48s; prime, 46s; secondary and heavier, 44s; best Canadian bullocks, 56s; heavy prime, 54s; secondary and heavier, 53s; and bulls, 44s to 46s, all according to quality and finish. Taken all round, the trade was not so good as that ruling last week, values experiencing a drop of from 10s to 20s on those then ruling.

FEEDING STUFFS.

London, Thursday.—Linseed.—Owing to Calcutta seed offering by re-sellers, and with lower offers from Azov, the market has declined, but to-day, with more enquiry from consumers, prices are firmer. Linseed cakes are firm. London made £7 15s to £7 17s 6d. Russian, £7 7s 6d to £7 12s 6d ex dock. American Westerns at £7 2s 6d to £7 5s. Cotton cakes also firm. London made £4 5s to £4 7s 6d. Rapeseed is very quiet. Cottonseed.—Old crop to London there is a slow demand, on passage £6 5s is asked, and for August shipment £6 7s 6d without finding buyers, November-January there are buyers at £6 1s 3d. Hull—Spot, we quote £6 3s 9d, July £6 5s, August £6 7s 6d, October £6 7s 6d nearest value, November-January buyers £6 1s 3d. Cargoes, August could be bought at £6 12s 6d, for October sellers are asking £6 15s, November £6 3s 9d.—THE PRODUCE BROKERS COMPANY, LIMITED.

Mark Lane, Monday.—Linseed Cakes: Although there is at present very little consumptive demand, values still have an upward tendency in consequence of the small offerings both from the United States and Russia and the probability of light shipments for the next two or three months. Russians in warehouse are firmly held at an advance of 2s. 6d. per ton. Americans continue scarce, but small lots may be had at last Monday's prices. English move off slowly, and are unchanged in value. Cotton cakes meet a better inquiry, and with only a limited quantity of Egyptian in warehouse, holders ask rather more money. Decorticated offer sparingly, and needy buyers have to pay an advance of 2s 6d for cake, while meal is unchanged. Rape cakes: Quiet. Maize germ meal: American continues scarce and unaltered, but there is a fair business passing in English on slightly easier terms. Rice meal: Rangoon in warehouse sells quietly at last week's prices, while for July-August shipment 1s 3d per ton more money has been paid.

—PINNOCK BROS., Mark Lane.

Hull, Tuesday.—The market is fairly steady to-day for foreign wheat at last week's prices, while home-grown, from scarcity, commands rather over the rates of last Tuesday. No change in barley. Oats and beans maintain the full prices of last week. Flat maize, being scarce on the spot, is 3d to 6d per qr dearer on the week; round corn unaltered. Linseed has been dull and inactive, with scarcely anything to test values. Cottonseed.—A good clearance was made of spot seed at £6, and with scarcity of further sellers, value since improved to £6 2s 6d, which paid for small lots, and is the value to-day. Oil seed cakes, quiet at previous rates. Hemp, unaltered.—KEIGHLEY, MANSTED AND CO.

WATERLOO ROUND FEEDING CAKES, £6 12s 6d PER TON; WATERLOO ROUND 97 PER CENT. PURE LINSEED CAKES, £8 17s. 6d. PER TON; WATERLOO ANGLO SHAPE 97 PER CENT. PURE LINSEED CAKES, £8 15s. 0d. PER TON; WATERLOO 97 PER CENT. PURE EGYPTIAN COTTONSEED CAKES, £4 7s 6d PER TON. ALL F.O.R. HULL.

HAY AND STRAW.

Whitechapel, Saturday.—Short supplies, values steady. Best clover, 95s to 100s; inferior ditto, 65s to 75s; specially picked hay, 90s; good ditto, 80s to 85s; inferior ditto, 50s to 60s; mixture and sainfoin, 70s to 77s 6d, and straw, 25s to 30s per load.

Leeds, Tuesday.—There is a steady consumptive demand for hay and straw in the warehouses, and values remain firm and unchanged. Quotations: Meadow hay, 6½d; clover hay, 7d to 7½d; wheat straw, 5½d; oat straw, 5d; rye straw (retail), 7d per stone; green clover, 3½d per bundle.

FOREIGN HAY AND STRAW.

London, Saturday.—Owing to the continuance of the strike in Holland, no shipment can take place, and holders there will not make offers until they can see their way to ship. Canadian mixture is worth 80s; Dutch and French first cut clover, 82s 6d to 85s; good Dutch hay, 60s to 65s; inferior Dutch hay, 57s 6d to 60s; large bale French wheat straw, 38s; small bale French wheat straw, 44s 6d. All these prices are per ton delivered by barge alongside.—FULLER AND PRENTIS, 9 and 10, Great Tower Street, E.C.

WOOL.

London, Monday.—Three catalogues were brought forward at public sale this evening, and together totalled 6,587 bales, consisting of 2,540 New South Wales and Queensland, 1,073 Victorian, 1,308 South Australian, 14 Tasmanian, 1,505 New Zealand, and 204 Cape and Natal, also 6 Italian and 5 Jamaica. A full attendance of buyers was present, and spirited competition resulted, at fully late rates, the lower qualities of crossbred showing a hardening tendency. New South Wales—greasy combing, marked S and S over Burrowa Creek, sold 9½d to 11d; scoured ditto, C. F. and Co. over Connulpie Downs, 1s 4d; clothing of the same mark, 1s 3½d. Queensland—greasy combing, A. P. and Co., Warbreccan, 7½d to 9½d; lambs, 8d to 9½d; scoured combing, Mount Margaret, M. D. I. and Co., 1s 3d to 1s 4½d. Victorian—combing in the grease N.Z. and A. Land Co. over Till Till, 6¾d to 9d; ditto W. G. S. over Nareeb-Nareeb, 11½d to 1s 0¼d; Mokanger, 11½d. Tasmania—greasy combing, H. M. over Eastbourne, 8½d to 10½d; ditto C. B. G. over Strathroy, 9½d to 11½d; ditto W. G., 9½d to 11½d; and the mark W. G. over Barrowville, 10d to 1s. New Zealand—greasy crossbred, marked Rangatira, 5½d to 7½d; greasy lambs, 5½d to 7½d; ditto C.A. over T., 8½d to 11d; combing, marked Balvraid, 7½d to 8d.

London, Wednesday.—Messrs Charles Balme and Co. brought forward the total of 8,166 bales, comprising 3,806 New South Wales and Queensland, 848 Victorian, 520 South Australian, 1,884 New Zealand, and 1,108 Cape. A good attendance of buyers was present, and competition ruled brisk, full rates being realised. Queensland greasy combing, marked D.S.W. over Terrick sold 9½d to 10d; lambs, 9½d to 10½d; combing L D. in diamond 8d to 9d; ditto F.M.Y. over Northampton, 8¼d to 9½d; ditto of the mark, Albilbah, 9d to 10d; ditto, G.F. over Logan Downs, 9d to 10d; scoured combing, F.M.Y. over Northampton, 1s 4½d to 1s 5½d; and ditto Albilbah, 1s 7d. Port Philip—greasy lambs, F. in diamond, 8d to 1s. New Zealand—greasy combing, Maclean, 5¾d to 7¼d; ditto marked P.W., 6d to 7½d.

London, Thursday.—At public sale this afternoon, Messrs. Jacomb, Son, and Co. brought forward the total of 7,548 bales, comprising 3,097 New South Wales and Queensland, 837 Victorian, 737 South Australian, 1,043 Tasmanian, 1,818 New Zealand, and 13 Cape. Competition from a full attendance of buyers was of a spirited character, and resulted in firm prices being realised. New South Wales—scoured combing marked R. and P. over Oomoobah, sold 1s 7d; greasy ditto, D. R. Y. over N. S. W., 10¼d to 1s; clothing of the same mark, 1s. Queensland—greasy combing, Talgai West, 11d; ditto Waroonga, 10½d; and the mark Mount Abundance, 9¼d to 10d; scoured combing, marked Claverton, 1s 4d to 1s 7d; necks, 1s 4d to 1s 4½d; lambs, 1s 5½d; necks, Tolson Corinda, 1s 2d to 1s 4½d. Tasmanian — greasy combing, Downie, 10½d to 1s 1d; lambs, 6½d to 10d; combing, Y. B. over Newstead, 10d to 1s 0½d; clothing, 11½d; combing, G. H. B., 10d to 11d. Victorian—scoured combing, W. C. and Son over Barmutha, 1s 7d.

London, Friday.—At auction this evening two catalogues were offered, and together amounted to 12,374 bales, and the large proportion of 6,122 comprised New Zealand, the remainder consisting of 2,544 New South Wales and Queensland, 1,388 Victorian, 1,022 Tasmanian, and 4 South Australian. A large attendance of buyers was assembled, which resulted in spirited biddings at fully late prices. New South Wales—scoured combing, marked D Werrina, sold 1s 5d; clothing, 1s 5d to 1s 7d. Victorian—greasy combing, Killancola, 10½d to 11¼d; ditto, N. Z. and A. Land Co. over Bendure, 8½d to 10d; broken, 7½d to 8¾d. Tasmanian—greasy combing, Scott, 10d to 1s 0¼d; clothing, 10d; ditto, G. F. over Thirkell, 10¼d to 1s 1¼d; and the mark G. S., 1s. New Zealand—greasy combing, Teviotdale, 7¾d to 9¼d.

London, Friday.—Wool, English, per pack of 240 lb—Fleeces, Southdown hoggs, £8 to £11 10s; half-bred hoggs, £7 to £8 10s; ditto wethers, £6 10s to £7 10s; Kent fleeces, £6 to £7; Southdown ewes and wethers, £8 to £11 10s; Leicester ditto, £6 to £7. Colonial, per lb: Victorian, fleece, superior, 1s 6d to 1s 7d; scoured good, 1s 7d to 1s 8d; scoured average, 1s 5d to 1s 6d; greasy average to fair, 10d to 11d; New South Wales, scoured average, 1s 3d to 1s 4d; greasy average, 7¾d to 9d; South Australian, greasy average, 6¼d to 7d; New Zealand, scoured average, 1s 4½d to 1s 5½d; greasy average, 8d to 8¼d; Cape scoured superior, 1s 6d to 1s 8d; fleece average, 8¼d to 9¼d; greasy average, 6¼d to 7d; Natal, scoured, 1s 2d to 1s 3d; greasy average, 7¼d to 7¾d. Crossbreds, greasy, Victorian, good to superior, 9¼d to 11d; New Zealand fine, 8¼d to 9½d; ditto medium, 7¾d to 8¼d; ditto coarse, 6¾d to 7d.

London, Saturday.—At public sale this afternoon two catalogues were offered, and comprised 6,934 bales, being made up of as follows:—1,542 New South Wales and Queensland, 1,057 Victorian, 300 Tasmanian, 29 South Australian, 2,237 New Zealand, 128 Cape, 1,629 Punta Arenas, and 12 Italian. A good attendance of buyers was present, and a good competition prevailed, at full to dearer prices.

Bradford, Thursday.—Rather better tone to-day. Topmakers are asking a fractional advance, and although users do not freely pay it, some fair quantity of business has been done during the past week at about the lowest current rates. English wools are slow of sale, and fine classes are still 1d below the rates ruling at Southern auctions. In mohairs, values are rather weak.

Canterbury, Saturday.—There has been only a moderate amount of business doing during the week, but prices are at about as low a level as they well can be. Kent fleeces only realise 6d per lb and lambs' wool, 4d to 5d per lb.

MANURES.

Liverpool, Friday.—As a result of Dec. 1st [illegible] practically no demand for fertilisers. The trade in [illegible] sorts has been quiet for some time past, but [illegible] inquiry has been experienced, and fair sales are [illegible] at the subscribed rates. With reduced freights [illegible] has been known for years past, and other materials have [illegible] values advancing. Nitrate of soda best quality [illegible] terms 95 per cent., prime, in bags, £8 2s 6d per [illegible] East India bone meal, in bags, £4 5s to £4 10s per [illegible] kanir, prime 25 per cent. in bags, £2 5s to £2 7s 6d per ton; linseed cake, American, from oil-mills, fair to prime, in bags, £7 10s to £7 15s per ton; ditto, English, in bulk, £8 2s 6d to £8 5s per ton; ditto, decorticated, prime, in bags, £7 12s 6d to £8 0s per ton; ditto, English, ditto, prime, in bags, £7 7s 6d to £7 10s per ton; ditto, English, undecorticated, prime, in bags, £7 17s 6d to £8 per ton; ditto, American, from oil-mills, fair to prime, in bags, £7 10s per ton; rape cake, English, in bulk, £4 5s to £4 7s 6d per ton; cocoanut cake, prime, in bags, £5 10s per ton; cotton cake, prime, in bags, £5 15s per ton; cotton meal, English, in bags, £6 5s to £6 7s 6d per ton; maize germ meal, English, in bags, £6 5s to £6 7s 6d per ton; meal, Rangoon, as imported, in bags, £4 5s to £4 7s 6d per ton; Indian meal, coarse to fine grinding, prime, in bags, 11s 3d to 11s 9d per 280lb; linseed meal, undecorticated, in bags, £2 19s 6d to £3 per qr, 416lb; N.A. cloverseed, mixed, fair to good, in bags, per cwt. D.N.S. basic phosphate of lime, guaranteed, 25 to 27 sol., in bags; ditto, 20 to 24 sol., in bags, £11 per 75 to 76 [illegible] bags; basic slag, prime quality, guaranteed [illegible] per cent. phos., in bags; ditto, ditto, ditto, 35 to 40 phos., in cent. phos., in bags; ditto, ditto, ditto, 45 to 50 per cent. phos., in bags, finest quality guaranteed, 70 to 75 per cent. phos., in bags, per ton on rail. Hoyle's Lancashire [illegible] phosphate of lime, guaranteed, 25 to 27 sol., in bags; ditto, 20 to 24 sol., in bags, £11 per 75 to 76 [illegible]

LIVE STOCK.

OUR PLATE.

The subject of the plate given with this issue is the Red Polled heifer Charmante 10080, the property of and bred by Lord Amherst, of Hackney, Didlington Hall, Brandon, Norfolk. She is by Caister Spark 3413, out of Charm 2nd 7739, by Didlington Davyson 2nd 657. At the Bath and West Show at Bath Charmante was placed second in her class, but at the Royal Show at York she came out at the top, and won, in addition, the Red Polled Society's Champion Prize for the best Red Polled cow or heifer.

STOCK AND SHOW NOTES

By Herdsman.

Volume IX. of the Southdown Flock Book has now been published. The total number of flocks registered in this volume is 113 (comprising 37,300 breeding ewes), being an increase of seven on the year. There are 378 individual entries of rams, and 239 ewes, the total being 120 in excess of those in Volume VIII. Since the publication of the previous Volume, notice has been received of the dispersal of eight registered flocks, while fifteen new flocks have been accepted for registration, and are duly entered in Volume IX. For the first time there are illustrations, the animals portrayed being the first prize shearling ram and the first prize shearling ewe at the Royal Agricultural Society's Show at Maidstone.

Thursday, August 16th, is the date of the Denbighshire and Flintshire Agricultural Society's fifty-eighth annual Show, at Denbigh, for which a liberal prize schedule has been drawn up. There are numerous special prizes, but the major portion of the classes are open only to residents in the district. Entries close on July 26th, and at double fees on July 31st, with Mr. Thomas Welsby, Wellington Chambers, 5, Wellington Road, Rhyl.

The last day of entry for the Hackney Stud Book, Vol. XVIII., is August 1st, 1900 (with double fees to September 1st). The secretary will be glad to forward forms for the entry of stallions, mares and produce, on receiving an intimation as to the number required. His address is Mr. Frank F. Euren, 12, Hanover Square, London, W.

The latest intelligence from Argentina is, says the *Statist*, that the cattle disease is being rapidly stamped out in the province of Buenos Ayres; but it still remains in Santa Fé and Entre Rios. There is some fear that there may be a recrudescence. But if that fear is unfounded Buenos Ayres has been exceedingly fortunate in getting rid of the epidemic so quickly. Meantime one effect of it has been to give a great stimulus to arrangements for extending the trade in dead meat, and it is expected that there will be a very considerable increase in that trade before long.

The annual sale of pure bred Shorthorn cattle and Lincoln Longwoolled sheep belonging to Mr. Henry Dudding, will take place on Tuesday, the 24th inst., at Riby Grove, three miles from Stallingborough Station, Lincolnshire, the auctioneers being Messrs. John Thornton and Co., in conjunction with Messrs. Calthrop and Briggs. The valuable young prize winning animals to be sold without reserve this season, and the great excellence also of the young stock included, which have not been exhibited, make this year's sale an important event in the summer Shorthorn fixtures. About thirty choice young cows and very handsome heifers, as well as twenty young bulls, comprise what is thought to be the best selection ever shown at Riby.

For years Mr. Dudding has purchased some of the best animals offered at English breeders' sales, as well as in Scotland. The introduction of the blood of the Garne and other Gloucestershire Shorthorns proved very successful, and Mr. Deane Willis' bull Golden Robin 68718, purchased from Mr. Ecroyd in Cumberland, turned out a remarkably good sire. At the October sales in Aberdeenshire many good animals have been purchased for some seasons past, and some of these are included. From Mr. C. M. Cameron, Balnakyle, came several choice and highly bred Scotch Shorthorns, which have been successfully exhibited, some of which are by Fortune 70467, bred by Mr. W. S. Marr, a son of that well known sire Captain of the Guard 58596, and their dams are by Merlin 54715, bred by Mr. Cruickshank, used eleven years at Balnakyle. Other choice animals were selected from the first-class herds belonging to Mr. A. M. Gordon, of Newton, and Mr. John Wilson, of Pirriesmill, Aberdeenshire.

Many of the cows and heifers are served by Pride of Fortune 73240, bred by Mr. W. Duthie, his sire, Pride of Morning 64546, being the winner of the first prize, the Shorthorn Society's prize, and two medals at the Highland Show in 1894. Others are served by Shanghai 75618, a son of Mr. John Wilson's Sunflower 10th, first prize cow at Huntly in 1898. He was sold to go to South America at a high price. Sherborne Duke, bred at Sherborne Park, Gloucestershire, by Scottish Chief, a bull of good quality, has also been used, as well as Fisherman 74551, lot 49, bred by Mr. G. Freeman, winner of the Shorthorn Society's prize at the Gloucestershire Show in 1899. The handsome young bull King Alto, lot 54, winner of first and Champion prizes at the Oxfordshire Show at Oxford, this year, is included in the sale, in which there are ten prize-winning animals and others promising for exhibition.

The Lincoln sheep to be offered this year comprise fifty-two specially selected yearling rams, and about the same number of yearling ewes. The sheep this year are in admirable condition with dense fleeces of finest wool, and are considered the finest lot ever offered for public sale from the Riby flock. The grand ram, lot 1, winner of the first and champion prize this year at the Royal Agricultural Society's Show, as well as the first prize pen of five yearling rams at the same show, are all in this year's catalogue, and will be sold without reserve. As most of our readers well know the Riby Grove flock has been remarkably successful at the R.A.S.E. meeting at York, and other leading shows this season.

Messrs. Alfred Mansell and Co., of Shrewsbury, announced that they would be shipping, per the s.s. *Lakonia* (Donaldson Line), from Glasgow, on Saturday last, about 200 sheep, comprising most of the winners in the various breeds at the Royal Show. This firm are also shipping about sixty head of Scotch Shorthorns by the same boat, the whole being on account of Mr. Robert Miller.

Sixty Shorthorns belonging to Mr. Bickley, of Ellesmere, Shropshire, will be put up for sale by auction at The Fields, Ellesmere, on Friday next, the auctioneers being Messrs Alfred Mansell and Co., in conjunction with Messrs. Parry and Batho. Shorthorn cattle have been bred by Mr. Bickley in the neighbourhood of Ellesmere for about twenty years, and as a foundation, purchases have been made from the herds of Messrs. Thompson, Hobbs, Evans, Edmonds, Kendal, Chesters, Garne, J. Deane, Willis, and Tremaine. Several of the cows are of the Waterloo, Kirklevington, Graceful, and Countess tribes, and will be found large-framed animals, possessing substance with great dairy properties, and in healthy breeding condition. In founding the herd, and in subsequent purchases, Mr. Bickley has not been led away altogether by pedigree, but has always selected cows of practical utility as milk and beef producers, and great care has been taken to breed from high-class bulls, which on both sides emanated from deep-milking families. The herd has a great reputation in the Midlands and North Wales, and so far as bulls are concerned, the herd has been long and favourably known as producing some of the best bulls in the county, several having been sold for exportation at a high figure. Exhibition has not been largely practised, but young animals have been sent to the County and local shows invariably with success; notably this season winning first, second, and third in the class for two-year-old heifers at the Shropshire and West Midland Show.

On Wednesday, August 1st, Messrs. J. Thornton and Co. will dispose of about fifty head of pure bred Shorthorn cattle, the property of Mr. Edward Ecroyd, at the Low House Farm, Armathwaite, Carlisle. The herd has been judiciously bred and selected from many of the best herds in the country since the year 1880. The herd has now so considerably increased that it has become necessary to make a reduction, and the animals to be sold comprise virtually the whole of the produce of the past three years. The object in breeding has been to increase the size and substance and yet retain the style and quality as well as the milking properties of highly bred specimens of Bates blood, with the heavy flesh and constitution of the Scotch Shorthorn. An inspection of the herd will show that the object has been virtually achieved. There are a number of remarkably fine heifers and particularly choice lot of young bulls, most of which are fit for service or for exportation.

On the second day of the Tunbridge Wells Show (July 20th), Messrs. J. Thornton and Co. will sell by auction in a paddock opposite the entrance to the show ground, which adjoins the L. B. and S. C. railway station, the herd of pure bred Kerry cattle, the property of Mr. W. H. Mullens, of Westfield Place, Battle, Sussex, and some pure bred Dexters from the herd of the Countess De La Warr, at Bexhill-on-Sea. Mr. Mullen's herd has been bred in Sussex from some of the best specimens obtainable from Ireland and from purchases made at Messrs. Robertson's and other first-class sales in this country. The well known bull Blacksmith (318, R.D.S.), winner of first prize at the R.A.S.E. Show, at Leicester, in 1896, was obtained from Mr. Adeane and did good service. Another bull, Coco (384, R.D.S.), was obtained from the same breeder and introduced some of the blood of Blackamoor 246. Included in the sale are nine prize winners, among them being Empress, first at the Royal Counties and Tunbridge Wells Shows, in 1896; Dahlia, first and champion at the Dairy Show, in 1898; Vesta, first at Tunbridge Wells last year; Cowslip, first at the B.W.E. meeting at Cardiff, in 1898; Gloria, first at the same Society's meeting last year, and Sirdar 47, first prize bull at Tunbridge Wells last season. The cattle are naturally hardy and have been reared in a very healthy manner, running out regularly.

The Whalley Agricultural Association's annual Show will be held at Whalley, on Monday, August 6th, and the usual liberal prize list has now been issued. There are classes for light and heavy horses, cattle, sheep, pigs, poultry, dairy produce, etc., some of which are open to all England. The last day for making entries is July 30th. Entry forms, prize schedules, etc., can be had on application to the Secretary, Mr. J. Rawcliffe, Whalley, near Blackburn.

Acting on the suggestions received from exhibitors, the Horse Show Committee of the Royal Dublin Society have arranged that the thoroughbred yearlings are to be stabled in outside boxes at the coming Horse Show.

The English Jersey Cattle Society has just issued volume eleven of their Herd Book and Register of Pure Bred Jersey Cattle. It contains the pedigrees of 303 bulls, 1,112 cows, and the calves born up to December 31st, 1899, in 298 herds of members of the Society. At the end of the volume is given a list of members, as well as a geographical summary, whilst there is a full record of the events in members' herds during the year, and other information that will be useful and instructive to breeders generally.

The entire herd of pure bred Aberdeen-Angus cattle belonging to Mr. G. G. Littlejohn, Wellhouse, and a select portion of Mr. Cran's (Morlich) herd, will be sold by auction at Wellhouse, Alford, Aberdeenshire, on Wednesday, September 19th, by Messrs. Macdonald, Fraser, and Co., Ltd., of Perth. The reason of the disposal of Mr. Littlejohn's herd is that that gentleman has decided to retire from farming. The foundation of the present Wellhouse herd was laid by the purchase, nine years ago, from Mr. Anderson (the former tenant) of a few cows and heifers. Amongst these were Favourite Lass (a Ruth cow), Bee of Wellhouse, Blushing Bride, etc., from whom many of the present herd are descended. The stock is, and always has been, in a sound, healthy condition, and has not got any special preparation for the sale. Mr. Littlejohn has taken many prizes at the Alford Shows, and on the few occasions on which he has exhibited at the Royal Northern, he has also been successful. Most of this year's calves are by the prize bull "Evening Star of Advie," and are a good lot—the heifer calves specially so. Most of the cows and heifers in calf this year are early calvers.

Polled cattle have been bred at Morlich for over fifty years, and in the hands of Mr. Cran and

his father have proved highly successful, notwithstanding that some portions of the farm are about 1,000ft. above sea level. Mr. Cran has been particularly fortunate in the sale of his bull calves at Aberdeen, the prices obtained being exceptionally good. During recent years he has also been very successful at the show preceding the sale. Of the twenty females catalogued, thirteen belong to the Beauty of Morlich family, being descended from Beauty of Morlich 2072, a doughter of Windsor 202, which won the first prize as a yearling heifer at the show of the Royal Agricultural Society of England at Windsor, in 1851, and first prize as a cow at the Highland and Agricultural Society's Show, at Berwick, in 1854. There are also included in the sale list two representatives of the Miss Watsons (of Keillor origin) and a single member of each of the Erica, Pride of Aberdeen, Matilda, and Purity (of Wester Fowlis), and Duchess of Druminnor families. Mr. Cran has been most careful in the selection of sires for his herd. His principal stock bull, Rover of Craibstone 12948 (a Pride of Aberdeen), being of grand quality and constitution, has left excellent stock. He is descended through a Powrie prize-winning family, one of which, Pride of Powrie 5th 19819, won first prize as a three-year-old cow at the Highland and Agricultural Society's Show at Aberdeen, in 1894.

The fifteenth annual sale and letting of pure bred Hampshire Down sheep belonging to Mr. Lambert Brabraham, Cambridge, will take place as usual at Cambridge on Friday, August 3rd, in a field adjoining the Cattle Market. The sale will commence at two o'clock, and the catalogue comprises eighty grand rams and ram lambs. The auctioneers are Messrs. Chalk, 11, Alexandra Street, Cambridge, from whom fuller particulars, etc., can be obtained.

CATTLE.

Sale of Mr. P. Saillard's Sussex Cattle.

Messrs. King and Chasemore conducted a successful sale of pure-bred Sussex stock in Springfield Meadow on Wednesday week. The animals, which were presented in a capital condition, were sold by order of Mr. P. Saillard, of Buchan Hill, Crawley, a successful exhibitor and breeder of Sussex cattle. His herd having largely increased, a portion was in consequence disposed of. There was a large attendance of Sussex agriculturists, competition ruled keen, bidding was brisk, and highly satisfactory prices were realised.

Sale of Babraham Dexters and Kerries.

The eighth annual sale of Dexters and Kerries belonging to Messrs. Robertson and Sons took place on Wednesday. Mr. Jonas Webb, of the firm of John Thornton and Co., being the auctioneer. The extraordinary success that the herd has achieved this season at all the principal shows, and the announcement that Messrs. Robertson have decided not to exhibit at the breeding shows next year, in a measure accounted for the very successful result. An excellent luncheon was provided, Mr. Mullens being in the chair, and a large number of breeders and local friends attended the sale, nearly all those whose names are most prominent in connection with the breed being present. Among them were Messrs. N. Cookson, B. de Bertodano, Mr. and Mrs. J. Paisley, J. S. Snelgrove, T. Clayton, W. H. Mullens, Mr. and Mrs. Hope Johnstone, C. J. Cory, J. H. Dugdale, G. T. Barham, J. Thorley, H. Betteridge, F. H. Hordern, the steward to the Duchess of Newcastle, A. S. Gibson (representing the Hon. G. Drummond, of Canada), H. Webb, H. Lambert, and many others. La Mancha Nest Egg, the first prize cow at the Bath and West of England Show, was much admired, and Mr. Bertodano secured her for 70gs.; his opponent being Mr. J. Paisley. Beatrice exerted much competition between Mr. Gibson and Mr. Bertodano, the latter staying the longest and becoming her owner for 100gs., the highest price ever paid for an animal of the breed at a public auction. This record, however, was soon to be broken, for La Mancha Union Jack, the champion bull at the Royal Show at York, starting at 50gs., advanced by leaps and bounds to 135gs., at which price he joins Mr. Norman Cookson's herd in Northumberland. Mr. T. Clayton and Mr. Paisley were Mr. Cookson's principal opponents.

The following is a list of the principal prices realised, buyers' names, etc.:—

COWS AND HEIFERS.

Sale of Store Cattle at Shrewsbury.

On Friday, the 6th inst., Messrs. Alfred Mansell and Co. held their July sale in the Shrewsbury Smithfield, when 753 cattle of all breeds were submitted to a good meeting of buyers mostly from Warwickshire, Worcestershire, Gloucestershire, Cheshire, Staffordshire, Kent, Cumberland, etc. The recent sales have shown a steadily growing preference for animals of good breeding and in good condition, and well set up animals were in brisk demand at prices making from 32s. to 38s. 9d. per cwt., which is undoubtedly a satisfactory return for the season. The highest price realised was for nine pure-bred Hereford bullocks, viz., £29 10s. Irish Shorthorn bullocks were in good demand, the highest price being £17 5s., a choice lot forwarded by Mr. Hopkins, a well-known Irish breeder, other lots making £15 12s. 6d., £15 10s., and younger ones down to £11. The Black Polls were much admired, and made up to £15 7s. 6d. The sale opened, as usual, with the sheep, and a good trade was experienced. These sales will be resumed in the autumn, the first to be held on Thursday, September 6th, and on that date some of the best lots in the United Kingdom will be offered.

Transactions in Store Stock.

[*From the Irish Department of Agriculture and Technical Instruction.*]

The fair at Midleton, co. Cork, on Monday, was a large one. The demand was good for first-class cattle, but a good many second and third-class animals remained unsold. There was an average supply of sheep. Lambs more plentiful, and not so dear. Prices: Calves, first class, £3 17s. to £5; second class, £4; third class, £3 to £3 5s. Yearlings, first class, £7 10s. to £8 10s.; second class, £6 to £7; third class, £4 10s. to £5 10s. Two-year-olds, first class, £10 to £12 10s. Springers, first class, £14 to £15 10s.; second class, £12 to £12 5s.; third class, £10 10s. Lambs, first class, £1 6s. 6d. to £1 8s.; second class, £1 2s. to £1 4s.; third class, 18s. 6d. to £1 0s. 6d. Hoggets, first class, £1 12s. 6d. to £1 15s.; second class, £1 7s. 6d. to £1 11s.

There was a very small supply of stock at the fair at Hospital, co. Limerick, on Monday, and a brisk demand prevailed. There was a small supply of lambs, for which demand was good. Quotations:—Yearlings, first class, £8 to £9; second class, £6 5s. to £7 15s.; third class, £3 10s. to £5 5s. Two-year-olds, first class, £11 10s. to £13 15s.; second class, £9 5s. to £11; third class, £7 17s. 6d. to £8 Springers, first class, £15 10s. to £19 5s.; second class, £12 10s. to £14 10s.; third class, £9. Lambs, first class, £1 5s. to £1 8s.; second class, £1 1s. to £1 4s. Young pigs in strong demand, 21s. to 25s. each.

HORSES.

Sale of Hunters.

Mr. C. H. Martyn having relinquished the Mastership of the Quidenham Hunt, the horses were put up for sale at Tattersall's on Monday. Of the lots forming the stud, a grey gelding by Asterite, 6 years, bay mare by Poplar found ready customers at 210gs., whilst a chestnut by Chifnall went at 140gs. Mr. J. W. Christmas disposed of some valuable blue roans that had been regularly driven in a coaching team, and for Connoisseur, one of the wheelers, obtained 160gs.; Chancellor, a leader, made 115gs.; and Clover, a wheeler, 100gs. The Hon. George Allsopp, M.P., disposed of Huntsman, a brown hunter from the Meynell country, for 100gs., and Gendarme, a chestnut, for 95gs. Not one of the six hunters sent up by the Earl of Shaftesbury realised three figures, whilst the matched pair of brown harness horses belonging to Georgina Countess of Dudley were bought in at 340gs.

Sale of Hackneys and Harness at Peterborough.

Messrs. Sexton, Grimwade, and Bell held a special sale of Hackney and harness horses at the repository, Peterborough, on Friday. The top price (81gs.) was made for Roughton Lady Rose, a two-year-old filly from the stud of Mr. E. J. Johnstone, of Rougham Hall, Suffolk. Mr. Colman's Lady Steen, a daughter of Danegelt's, was withdrawn at 145gs. The principal prices realised were as follows:

[illegible]

Bess, black mare, 7 1833 ..... Mr

The property of a gentleman. Gs

SHEEP.

Lamb Sales.

Stowmarket.

Nearly a thousand more lambs (in all 4,500) were entered for the second annual sale at Stowmarket, held on the 6th inst., than at the initial auction, and, taking into consideration the fact that generally lower prices are prevalent this year, the auctioneers (Messrs. Spurling and Sons, with whom Mr. G. A. Woodward acted in conjunction), and those breeders who had entrusted their consignments to them had every reason to be satisfied with the outcome of the dispersal. The sale so far constituted a record for the year as regards the price for Suffolk ewe lambs, a pen of thirty from the registered flock of Mr. Samuel Scott, of Felsham, making 55s., whilst a score from the registered flock of the Executors of Mr. Thomas Woodward, of Old Newton, realised 50s. Other prices realised were as follows:—Suffolk lambs: Ewes from 24s. 6d. to 40s.; wethers, 22s. to 41s. 6d.; Suffolk ewes, 23s. to 47s.; half-bred lambs, 16s. to 30s. Blackfaced: Lambs, 24s. to 31s. 6d.; ewes, 43s. to 49s.; first cross lambs, 18s. 6d. to 24s.; ewes, 35s. 6d. to 45s. 6d.

Haverhill.

For their third annual sale of lambs and sheep at Haverhill on Monday, Messrs. Balls and Mr. C. S. Boardman, who were jointly concerned with Mr. Ernest Prentice (secretary to the Suffolk Sheep Society), recorded a very large entry, for, after some 5,500 had been catalogued, an additional 1,000 were attracted to the dispersal prior to its commencement. In these circumstances the company assembled on the meadow adjoining the railway, where the sale was held, was unusually large, comprising buyers from all parts of East Anglia. The prices all round showed an advance on previous sales in the district. The highest price was realised for thirty Suffolk shearling ewes, viz., 57s. 6d. per head. Messrs. W. and J. Gurteen, of Wilsey Farm, penned a remarkably good consignment of Suffolk lambs, mostly from Lord Ellesmere's tups. The best twenty ewes were purchased by Mr. Vaizey, of Halstead, at 50s. per head; the second fifty made 43s. 6d. per head, and the best twenty wethers 42s. per head. Mr. D. M. Gurteen also penned a good consignment of Suffolks; the best twenty ewes brought 48s. 6d. per head, and the best twenty wethers 43s. 6d. per head. Registered Suffolks by Mr. W. B. Gurteen, Smith Green Farm, realised 35s. to 26s. per head for ewes, and 33s. 6d. to 28s. for wethers. Suffolk ewe lambs, penned by the Hon. W. F. D. Smith, of Great Thurlow Hall, sold for 47s. 6d. to 35s. 6d. per head, ewes going at 34s. 6d. to 30s. The best ewe lambs, in a good consignment of Suffolks, from Mrs. Lowe, of Gosfield Hall, brought 42s.

Several very nice consignments of Suffolk sheep were also penned. These included shearling ewes from Mr. H. Wallis, of Wethersfield, which sold at 54s. and 47s. 6d. per head. Fifty shearling ewes consigned by Mr. W. H. Hall, of Six Mile Bottom, averaged 50s. 6d. per head; eighty two-shear half-bred ewes penned by Mr. Duchesne, of Camps Hall, averaged 50s.

Great Bentley.

Thursday witnessed the thirtieth annual dispersal of lambs under the hammer on Great Bentley Green, and Messrs. Sexton and Grimwade, the auctioneers, were as usual supported by a large company. The weather was hot and sunny, with a refreshing breeze. The number of lambs penned was about 6,000, a decrease on last year, and they were shown in such variable condition that one or two flocks which only a year ago were in a leading position at the sale were now easily displaced by others who were then competitors for breeders' favour. The celebrated flock of Mr. John Eagle, of Walton Hall, was a striking illustration of the decline which can occur when lambs are not shown, owing to the adverse circumstances of the lamb-rearing season, in the pink of condition and full of bloom. Last year his figure for the best pen of twenty ewe lambs was 80s., this year it dropped to 64s., whilst the flock of Mr. Thomas Nicholson, Great Clacton, was only down on the year 4s. a head on the best fifty, and only 6s. 3d. on 200; Mr. Thomas Lilley, Clacton Lodge, made 63s. for a pen of forty; and Messrs. Stanford Brothers, Beaumont Hall, 58s. for a score. Mr. Nicholson's flock also produced the best pen of wether lambs, which realised 41s. The previous highest price this season of Black-faced ewe lambs was 57s. 6d., at the Haverhill sale. Following the course of other lamb sales this season, there was not the animation in the bidding characteristic of a brisk demand, buyers putting in the opening bids with such slowness that it took about four hours to get through the 170 lots. The prices ranged as follows: Registered Black-faced lambs—ewes, 62s. to 27s. 6d.; wethers, 37s. to 24s.; unregistered Black-faced lambs—ewes, 29s. 4d. to 21s. 6d.; wethers, 20s. to 28s. 6d.; half-breds—lambs, 24s. 9d. to 30s.

Sutton.

The eighty-sixth Sutton lamb sale was held on Friday on the well-known ground near Wilford Bridge, Melton, in hot, dry weather, and there was a large company of buyers as usual. The entry (about 9,000) corresponded almost identically with that of last year, and no fewer than twenty-four registered flocks were comprised in the consignment, including the long-reputed one of Mr. Alfred J. Smith, of Rendlesham, which was established as far back as 1865, and when inspected this year by the judges appointed by the Suffolk Sheep Society was again classed A1 excellent in District A. Mr. Smith's best selected score ewe lambs now made 81s., at which they were purchased by Mr. A. H. F. Wood, as against 70s. at the Bentley Green sale on the preceding day, but, as was the case last year, he was surpassed by his son, Mr. Leonard Smith, of Hasketon, whose best pen realised 85s., being 15s. advance on the leading figure of the year at Great Bentley. These were knocked down to Mr. J. R. Grimsey. The keenness in the demand for the Suffolk breed of lambs experienced last year showed a falling off, and was in the early part of the sale even more apparent as regards the wether than the ewe lambs, but, as the sale progressed, and especially towards its close, the trade for wethers perceptibly hardened, as much indeed as half-a-crown ahead. Half-bred lambs, placed first in the catalogue, were distinctly cheap.

Wool Fairs and Sales.

Dorchester.

Dorchester Wool Fair, the largest in the West of England, took place on Monday in fine weather. Over 200,000 fleeces were pitched, and there was a good attendance of buyers. Trade was quite as good, and in some respects better, than at Blandford, 12¾d. being the top price. The general range of Down fleeces was 9¾d. to 11¼d. Down lambs sold at 8¾d. to 9¾d. Unwashed Downs, 6¾d. to 7¾d. Down tegs, 10¾d. to 11¾d. Horn fleeces made from 9½d. as a general run to 10½d.; horn lambs, 10½d. to 1s. Unwashed horn wools went at from 4½d. to 6½d.

Wallingford.

An unusually large company was attracted to Wallingford on Monday last, on the occasion of the annual wool sale conducted by Messrs. Franklin, Gale, and Newton, when upwards of 23,000 fleeces were pitched for sale, the whole of the Corn Exchange and the space under the Town Hall being packed with samples, while the bulk was deposited in the sheds in the Cattle Sale Yard. The sale itself was held in the Town Hall at one o'clock, and from the moment that the auctioneer commenced it was seen that the demand would more than equal the supply. Bids came sharp and brisk, and at times the auctioneer's powers were tried considerably in keeping pace with them. Some idea of the trade may be gathered when it is realised that 105 lots were sold in forty-six minutes. Prices were up on last year from ¾d. to 1d. per lb. Judging by the result of the sales by private treaty, which have recently taken place, and from the tone of the market, this advance came as an agreeable surprise, and tends to show once more how wise it is to take advantage of an open market competition. The prices realised at this sale were higher than any in the neighbourhood, nearly 2,000 Down fleeces, washed, making 10¾d., while a very large portion of the remainder made 10¼d. For unwashed wool 7½d. was the general price, a large part of this class of wool being sold for this sum. Lambs' wool was also in great demand, one consignment making 9¼d.

Marlborough.

Mr. T. Lavington had at his sale on Wednesday rather more wool than last year, the total number of fleeces being about 60,000. In comparing washed with unwashed there was an increase amongst the latter and a corresponding decrease in the washed wool. The attendance of buyers was not so large, and competition was perhaps not quite so keen as might have been anticipated from the enhanced prices given during the winter months. Buyers were, however, excepting in one solitary instance, ready to accept ruling prices. Although the merchants declared Mr. J. H. Hiscocks (Broad Hinton) the best lot and gave 11½d. for it, this price was surpassed by one of Mr. H. Wilson's lots at 11¾d. Prices realised for washed wool ranged from 11¾d. to 9½d., and the average 10½d.; for unwashed, from 8½d. to 6¼d., the average being 7d. One lot of clean tailing made 10¾d.

Aylesbury.

At Aylesbury Wool Fair, on Wednesday, 12,000 fleeces were pitched. There was a good attendance of buyers, and prices were slightly in advance of last year, some of the best making 1d. more per lb. The top price for Southdown was 11¼d. Hampshire Down made 10d., and halfbred 8¾d. per lb.

Devizes.

The wool fair at Devizes was held on Tuesday in lovely weather, and was attended by the leading north country buyers, as well as by the chief flockmasters of the district. The supply was larger than in previous years, the Corn Exchange and a large portion of the shambles being required to show the sample sheets. There were about 75,000 fleeces represented. The business was wholly transacted by auction, and every lot catalogued was sold. Mr. George T. Smith first mounted the rostrum in the Bear Assembly Room, and sold about 1,500 fleeces. He realised the top price, viz., 13¼d., which was given to Mr. Wayman for 107 fleeces of Southdown ewe and wether and forty-two fleeces of Southdown teg wool, the property of Mr. C. E. Colston, M.P., and which was a splendid sample of fine wool, well cleansed. The next best price was obtained by the same auctioneer, viz., 12¼d. for 128 ewe, forty-five teg, and one ram fleece, belonging to Mr. Duck (who realised the highest price last year). Eleven pence farthing was reached once, 11d. seven times, 10¾d. six times, etc. Unwashed wool from 7¾d. to 7½d. Mr. W. J. Rowden's best price was 11½d. once. Mr. T. Lavington sold 35,000 fleeces, his best price being 11¾d. times, 10¾d. eleven times, 10½d. seventeen times. Messrs. Tilley and Parry realised 11½d. once, and 10¾d. ten times. Unwashed ranged from 7¾d. to 7d. Lambs' wool fetched from 7½d.

Contagious Diseases of Animals.

Summary of Returns issued by the Board of Agriculture for the week ending July 7th, 1900:—

NOTE.—The figures for the current Year are approximate only.

Destructive Farm Fire near Colchester.—A large stack fire broke out on Friday afternoon at Mr. Edgar Cooper's, Little Bromley Hall, near Colchester. The fire was discovered about 2.30 by two men, named Jonathan Bennett and John Garrod, who were working in an adjoining field. The stack that first caught was a large one of red clover. Owing to a considerable quantity of hay that was lying about, within a quarter of an hour six other stacks, with a cow house and some piggeries, also caught alight. A large barn containing about 400 coombs of wheat was well soaked with water before the brigade arrived, and was saved from the fire. The stacks destroyed were one of rye grass, the produce of 17 acres, two of new red clover, the produce of 36 acres, 30 tons of old red clover, 30 tons of old hay, and about twenty tons of straw, in two stacks. A cow-shed and part of the piggeries were also completely destroyed, while two lambs and a calf were burned to death in the shed. The property is all insured. There is no suspicion of incendiarism, though no cause can be found to account for the outbreak.

SHOWS.

Lincolnshire.

The annual three days' exhibition of the Lincolnshire Agricultural Society was held at Spalding last week, opening on Wednesday. Though numbered among smaller towns of the county, Spalding is a very important one, the centre of a wide and rich tract of Fen country—fen only in name, for the one-time swamps are all reclaimed, and it is one of the pleasantest and richest agricultural districts of any we have. Only twice before has Spalding been favoured with a visit by the county society. The first visit was in 1872, the fourth show held by the Society, and the second visit was in 1887. On both occasions a great success had to be recorded, and the same may be said of this year's exhibition, the thirty-first annual show held under the auspices of the Society. Beautiful weather favoured the show each day, and the attendance of visitors was exceedingly good. The total amount offered in premiums for servants and labourers, and in prizes for cattle, sheep, pigs, horses, etc., was £1,534, which is rather less than last year at Louth, when the awards amounted to £1,617, but the entries bear very favourable comparison with previous shows. Grantham takes the lead in this respect, the show at that place in 1895 having brought together 1,748 entries, while at the same place in 1874 the entry reached 1,629, the second best record. Louth last year secured the third best record with 1,587. Last week Spalding claimed 1,547, against 1,154 at the same place in 1887, and 1,266 in 1872.

Cattle.

The display of Shorthorns was one of the best ever seen at this Society's show. With very few exceptions the entries were extremely satisfactory, and there was a gratifying feature in the uniformity displayed. The class for two-year-old bulls was a wonderfully level lot, three particularly good animals being placed at the head of this collection. The Prince of Wales took the lead with his Pride of Collynie, bred by Mr. W. Duthie, and sired by Pride of the Morning. This bull won the premier honours in a similar class at the Bath and West of England Show, and was second this year and champion last year at the Royal. The second place was given to Mr. Jonas Webb's Carlisle Wellington, which is another typical Shorthorn. He is larger in frame than the exhibit from the Sandringham herd, and was highly commended at the Royal Show. Mr. Henry Dudding's Prompter filled the third place. In the class for bulls not exceeding two years old there were eighteen entries, and a very creditable lot they were. Mr. Dudding's roan bull Martian secured the highest honour, and he obtained reserve for his well-known King Alto, the Oxford champion. Granite Chip, another roan from Mr. Dean Willis's herd, took the second place, and Mr. P. L. Mills's St. Swithin, which had a commended ticket at the Royal, won the third prize. There were not so many entries in the class for bull calves under a year old. Here Mr. Willis was first with Bapton Marquis, a nice, rich red, good in flesh. The second bull, Bellman, from Lord Middleton's herd, was another very good red, which was run close by Mr. W. J. Atkinson's Weston Favourite 2nd. In the county class for bulls Mr. Dudding scored with Martian and King Alto, which took first and second places respectively, and Lord Wild Eyes 8th, from Messrs. Dean's herd, was third. In the next class for the best Shorthorn bull in the county of Lincoln, King Alto came out at top. The cows formed a very creditable collection. Mr. C. W. Brierley's Autumn Queen, which secured the premier place among the four-year-olds, is a noted winner, and was an easy first on Wednesday. Mr. Evens's Burton Rose, the second-prize winner, is a very good cow of the dairy class, though rather thin for a Shorthorn. Messrs. Chatterton's Stenigot Buttercup took the lead in the next class. This cow comes from a very good stock, and well deserved the place, but found a close competitor in Mr. Evens's Burton Pansy. The class for two or three year old heifers was an extremely good one. There was some dissatisfaction, however, about the arrangement of the class, the young heifers having little chance against the older ones. Seventeen heifers were brought into the ring, and the first prize went to a grand specimen exhibited by Mr. Brierley, whilst the second place was given to Mr. Dudding's Lady 21st, which won at Leicester and Nottingham this year, and was reserve for the championship at the last-named place. The winner in the succeeding class was Mr. Willis's Victorine, a small heifer, which beat Mr. Dudding's Riby Jessy, a first prize winner at Nottingham. The heifer calves came out well, and the Lincolnshire red Shorthorn cattle made a capital show. They were typical of the breed, showing great similarity of colour.

Sheep.

A glance at the schedule of entries shows there has been a gradual decline in the sheep department during the past three years, but in 1897 the number of sheep exhibited at Sleaford advanced considerably compared with the entry in 1896 at Gainsborough. The total penned this year was exactly ten less than twelve months ago, but the quality was fully maintained. There were not many two-shear rams shown, but the whole lot formed an admirable collection. Mr. T. Casswell won the first place with a splendid specimen, and Messrs. Dean were placed second and reserve for two very creditable exhibits. The class for shearling rams alway brings together a heavy entry, and this year's display was no exception to the rule. No fewer than thirty-five were entered, and the majority were of such uniform merit that the judges experienced the greatest difficulty in making their awards. The first prize went to Mr. Dudding's Royal winner, a thoroughly good sheep, and the same exhibitor secured the third place and had highly commended tickets. Messrs. R. and W. Wright obtained the second and fifth prizes and one highly commended badge. In the class for three pens of five shearling rams, for which there were three firsts and three seconds, Mr. Dudding was disqualified from showing his Royal winners. Mr. T. Casswell brought some excellent specimens in this class and secured two firsts, the other first prize going to Mr. J. Pears, whose exhibits made a very creditable display. The class for the best pen of three lambs dropped in 1900 was a very strong one, and the first and second won the same positions at the Royal. Mr. Dudding came to the top again in the class for the best pen of shearling gimmers, carrying off the first and second prizes. The positions, however, were reversed from the judgment given at the Royal. The wether lambs formed a strong class, and the long-wools attracted considerable interest. The exhibits showed a great length of wool and splendid quality. Mr. Dudding won the Champion Cup for the best pen of female sheep exhibited. The cup offered last year in a similar class was won by him outright, and he has since presented a new trophy to the Society. Mr. Dudding also secured the first prize for wool for the fourth or fifth year in succession.

Pigs.

There was an admirable collection of pigs, the majority of the classes being strongly represented. Sir Gilbert Greenall, one of the most successful exhibitors at the shows this year, was first in the boar class, white breed, with Walton Royal, a fine animal with excellent top. Mr. Sanders came to the front in the class for the best pen of two boars, white breed, pigged in 1900, with two grand specimens. In the corresponding class for Berkshire boars Mr. Mills was first with a well-matched pair. Only two entries were received in the county class, but the sows, having had a litter this year or in pig at the time of showing, were much better represented. Here Mr. Daybell's Bottesford Queen thoroughly deserved first honours, though the class was of all-round excellence, only one exhibit out of seven failing to receive a mark of favour from the judge. The sows of the Berkshire breed brought a still larger entry, and a collection quite as creditable as the preceding class.

Horses.

Spalding being in the centre of a great Shire horse breeding district, it was only to be expected this section would form a strong feature of the show. In quantity and quality the Shires exceeded anything seen at the Lincolnshire Show during the past ten years. There were a great many Royal and county winners in the various classes, and the decisions of the judges were not always in accordance with those of previous shows. The brood mares both in point of quantity and class were exceedingly strong, as also were the two-year-old stallions and the foals. The Prince of Wales was among the first prize winners. The best of the Sandringham exhibits was Benedict in the class for two-year-old stallions. This is a hardly used animal, but it came out at the top in its class. It had not the size and massiveness of the second, Darcey Albert, which belongs to Mr. James Forshaw. Mr. P. A. Muntz, M.P., received the first honours in the Shire entire colt class. This animal has a lot of substance and good legs and feet, and seemed an easy winner. The second prize-taker, Borough Warrior, owned by Mr. F. W. Griffin, has a great amount of quality in the legs, but is not sufficiently lengthy in the back. In the succeeding class the Peterboro' decision was soon upset, Mr. Forshaw's Daisy being preferred to Lady Franklin, shown by Mr. Muntz. Daisy was an outstanding winner from the first, and it was only a short time ago that Lady Franklin secured the higher favours when shown in the same class with her. Mr. Forshaw's Tom's Flower, which came out first in the county class for the best Shire mare with foal at her heels, won the champion gold medal and silver cup at the Louth Show last year. Mr. Cartwright's foal was the favourite among the judges, but Mr. Ransome's was a close competition, and only lost the first place through being deficient in one or two minor points. There were no fewer than thirty-six entries in the class, and they made a grand show. Mr. Forshaw was third with a foal only eleven weeks old, sire Nailstone Cœur-de-Lion, dam Tom's Flower. The winner in the Shire filly class, Kathleen, shown by Sir Blundell Maple, recently fetched a large price. Whaplode Countess, the property of Mr. Foxshaw, gained prominence again in the three-year-old filly class. The judging of the hunters was watched with a great deal of interest by numerous spectators. There were several well-known prize winners brought into the ring, notably Mr. F. Wilkinson's Lady Grosvenor. This mare was again an easy winner in the class for breeding hunters with foal. In the foal class Lord Sandwich came [illegible] with a very promising brown foal by Old Con[illegible]. A chestnut filly by the same sire was first in the succeeding class, and the best hunting two year old [illegible] exhibited by W. J. Drakes. Mr. V. Stapleton obtained second place with Sindar, a very nice looking chestnut, which thoroughly deserved the prize. The three year old hunters were a grand lot, and it took some time before the judges could agree upon the positions. The first place was given to a well known prize winner, Mr. A. J. Brown's Richard the Second. There seemed to be some difficulty in the choice of the second and third places, but finally Mr. Stapleton's Monarch had to give way to Mr. Hoyle's Sindar. The other classes were strongly represented, with the exception of the tenant farmers' class, which was deficient in numbers and quality.

The Hackneys were on the whole a good lot, but they were not very numerous. In this section, Mr. C. E. Galbraith, Dumfries, was a prominent winner. None of the three other entries in the class for best stallions for Hackneys, one or two years old, putting in an appearance, Mr. Galbraith's exhibit took first prize. In the succeeding class, for breeding mares exceeding 15h. 2in., with foals, he was again to the fore, this time with a beautiful chestnut roan. Sir Walter Gilbey, Bart., could get no nearer than reserve.

Judges.

SHORTHORNED CATTLE: Mr. P. A. Evans, Sherlowe, Wellington, Salop; Mr. John W. Barnes, Aikbank, Wigton, Cumberland.

SHEEP: Mr. Wm. Rowe, Besthorpe, Newark; Mr. J. B. Nelson, Risby House, Market Rasen.

WOOL: Mr. J. Lancaster, Bradford.

PIGS: Mr. A. Hiscock, jun., Mereside, Shrewsbury.

HUNTERS: Mr. Thos. Wickham Boynton, Barton Agnes, Driffield; Mr. Geo. Molecaster, Burghwallis, Doncaster.

HACKNEYS: Mr. Frank Usher, Kettlethorpe, South Cave; Mr. C. Edward E. Cooke, Hunston Grange, Selby, Yorks.

SHIRE AND AGRICULTURAL HORSES: Mr. J. T. C. Eadie, Barrowcow-Trent, Derby; Mr. John Russell, Bury, Hunts.

Champion and Special Prizes.

Challenge cup, value 20 guineas, for the best Shorthorn bull: H.R.H. Prince of Wales (Pride of Collynie); r, Mr. H. Dudding (Martian).

Silver cup, value 10 guineas, for best team of cattle, in Classes 18 to 21: Messrs. R. and W. Wright; r, Mr. T. Casswell.

Challenge cup, value 10 guineas, for the best pen of Lincoln sheep: Mr. H. Dudding.

Hunter's Improvement Society's gold medal for the best Hunter brood mare in Class 40: Mr. W. Carter (Georgina); r, Mr. F. Wilkinson (Norah).

Hunter Improvement Society's silver medal for the best Hunter filly: Mr. A. J. Brown; r, Mr. F. B. Wilkinson.

The Hunter's Improvement Society's silver medal: Mr. J. Jonas Webb (Marquis).

Special prize for best Hackney pony mare, filly, colt, or foal, registered or eligible for registration in the Hackney Stud Book: Mr. H. Livesey (Welcome); r, Mr. C. E. Galbraith (Queen of the West).

Challenge cup, value 10 guineas, for the best mare or filly for breeding Hackneys: Mr. H. Livesey (Welcome); Mr. C. E. Galbraith (Queen of the West).

Challenge cup, value 20 guineas, for the best Shire stallion, for members residing or farming in the county: Mr. J. Drakard (Willow Holt King); r, Mr. A. H. Clark (Marquis of Columbus).

Challenge cup, value 20 guineas, for the best Shire mare or filly, not a foal (ditto): Mr. A. Ransome (Duchess of Bridgewater III.); r, Mr. J. Forshaw (Whaplode Countess).

Gold medal, value 10 guineas, for the best mare or filly in Shire Classes (Lincolnshire): Mr. A. Ransome (Duchess of Bridgewater III.); r, Mr. J. Forshaw (Whaplode Countess).

Prize List.

CATTLE.

SHORTHORNS.

Bulls, two years or upwards: 1, The Prince of Wales, Sandringham; 2, J. Webb, Melton Ross, Barnetby, Lincoln; 3, H. Dudding, Riby Grove, Stallingboro'; r, C. W. Brierley, Brimfield, R.S.O.; hc, J. E. Casswell, Laughton, Folkingham; R. and R. Chatterton, Stenigot, Lincoln; and J. Dean Willis, Bapton Manor, Codford.

Bulls, not exceeding two years: 1, Henry Dudding; 2, J. Dean Willis; 3, Philo L. Mills, Ruddington Hall, Nottingham; r, Henry Dudding; hc, S. E. Dean and Sons, Dowsby Hall, Bourne, and J. Evens, Burton, Lincoln.

Bull calves, under one year: 1, J. Dean Willis; 2, Lord Middleton, Birdsall House, York; 3, W. J. Atkinson, Weston, Spalding.

Bulls, not exceeding two years, the property of members of the Society residing or farming in the county: 1 and 2, Henry Dudding; 3, S. E. Dean and Sons; r, John Evens.

Best Shorthorn bull in the county, calved in 1899: 1, Henry Dudding; r, S. E. Dean and Sons; hc, J. Sherrard Reeve, Leadenham House, Lincoln.

Cows, over four years: 1, C. W. Brierley; 2, J. Evens; 3, The Marquis of Exeter, Burghley House, Stamford; r and hc, J. Evens.

Pure-bred dairy cows or heifers, exhibited [illegible] Coates' or the Lincolnshire Red Shorthorn Herd Book: 1, R. and R. Chatterton; 2, J. Evens; r, J. S. Patchett, Holbeach; hc, J. Evens; c, S. and J. Crawley, Hemington, Oundle.

Heifers, two or three years: 1, C. W. Brierley; 2, Henry Dudding; 3, J. Dean Willis; r and hc, J. Webb; hc, Henry Dudding and [illegible].

Heifers, one year old: 1, J. D. Willis; 2, H. Dudding; 3, The Marquis of Exeter; r, J. S. Reeve; hc, R. and R. Chatterton; c, F. Peet and [illegible].

Heifer calves, under one year old: 1, P. L. Mills; 2, The Marquis of Exeter; 3 and r, J. Webb; hc, W. J. Atkinson, Weston St. Mary, Spalding.

[illegible]

Bulls, two years old and upwards: 1, J. Langham, Hough Grange, Grantham; 2, J. W. Rowland, Fishtoft, Boston.

Bulls, not exceeding two years old: 1, J. Evens; 2, T. Diggle, Thorpe House, Ewerby, Sleaford; 3, J. W. Measures, [illegible]; r, [illegible] and S. and J. Crawley (2), Hemington, Oundle.

[illegible] Grange, Louth; 2, r, and hc J. Evens (2); hc, R. and R. Chatterton and W. J. Atkinson; c, W. J. Atkinson.

Heifers not exceeding two years old: 1, J. Walter, Hatton, Wragby; 2, R. and R. Chatterton; 3, W. J. Atkinson; r, A. M. [illegible]

by

Heifers, not exceeding one year and six months: 1, R. and R. Chatterton; 2, J. Langham; 3, W. J. Atkinson; r, Charles H. Stafford; c, W. J. Atkinson.

SHORTHORNED OR OTHER CATTLE.

Bullocks, not exceeding three years: 1 and 2, H. Casswell, Quadring, Spalding; 3, R. Palmer, Nazeing, Waltham Cross, Essex; r, G. Shillaker, Uffington, Stamford; hc, R. M. Mills, Bourne; c, R. Palmer.

Barren cows or heifers: 1, R. M. Mills; 2, C. H. Stafford.

SHEEP

LINCOLNSHIRE LONGWOOLS.

Two-shear rams: 1, T. Casswell, Pointon, Folkingham; 2, S. E. Dean and Sons.

Shearling rams: 1 and 3, H. Dudding; 2, R. and W. Wright, Nocton Heath; 4, J. E. Casswell; r, T. Casswell; hc, T. Casswell, Henry Dudding, R. and W. Wright, and John Pears, Mere, Lincoln; c, S. E. Dean and Sons and J. E. Casswell.

Three pens of five shearling rams (members of the Lincoln Longwool Sheep Breeders' Association): 1, Tom Casswell, J. E. Casswell, John Pears; 2, Henry Dudding, R. and W. Wright, and S. E. Dean and Sons; r, Frederick Ward, Quarrington, Sleaford.

Pen of three ram lambs, dropped in 1900: 1 and 3, R. and W. Wright; 2, John Pears; r and hc, S. E. Dean and Sons; c, W. B. Swallow, Barton-on-Humber.

Pen of three shearling gimmers: 1 and 2, Henry Dudding; 3, R. and W. Wright; r, John Pears; hc, S. E. Dean and Sons.

Three wether lambs: 1, William Hesseltine, Beaumontcote, Barton-on-Humber; 2, Henry Dudding, Riby Grove; r, W. B. Swallow; hc, Henry Goodyear.

Three she lambs: 1, R. and W. Wright; 2, S. E. Dean and Sons; 3, John Pears; r, William Hesseltine; hc, S. E. Dean and Sons.

Five Lincoln Longwool she hogs, lambed in 1892: 1, Henry Dudding; 2 and r, S. E. Dean and Sons; 3, William Hesseltine; 4, William B. Swallow; hc, T. Diggle, Ewerby, Sleaford.

Three shearling wethers, any breed: 1, William Hesseltine; 2 and 3, H. Dudding.

PIGS

Boars, white breed: 1, Sir G. Greenall, Walton Hall, Warrington; 2, Sanders Spencer, Holywell Manor, St. Ives; r and c, John Barron, Borrowash, Derby; hc, Sanders Spencer and F. Allmand, Wrexham.

Berkshire boars: 1 and 2, J. Jefferson, Chester; r, G. T Tomkin, Marden, Kent.

Two boars, white breed, pigged in 1900: 1, Sanders Spencer; 2, D. R. Daybell; hc, Sir Gilbert Greenall; c, C. E. Duckering, Kirton Lindsey; G. Manners, Farnham, Bury St. Edmunds.

Ditto, Berkshire breed: 1, P. L. Mills, Ruddington Hall, Notts; 2 and r, J. Jefferson.

Ditto, old Lincolnshire curly-hair breed: 1, H. Caudwell, Midville, Boston; 2, F. E. Bowser, Wigtoft, Boston.

Sows, white breed: 1, D. R. Daybell; 2, F. Allmand; r and hc, Sir G. Greenall; hc, Sanders Spencer, G. Manners, A. Duckering and Sons.

Sows, Berkshire breed: 1 and r, J. Jefferson; 2, Sir H. de Trafford, Market Harboro'; hc, T. Tomkin, G. T. Tomkin, and C. E. Duckering.

Two sow pigs, white breed: 1, Thomas Diggle, Ewerby, Sleaford; 2 and r, Sanders Spencer; vhc, D. R. Daybell, Bottesford, Nottingham, and Thomas Diggle; hc, C. E. Duckering, Kirton Lindsey, and A. S. Duckering and Sons, East Barkwith, Lincoln.

Two sow pigs, Berkshire breed: 1 and hc, J. Jefferson; 2, George T. Tomkin; r, Philo L. Mills.

Two sow pigs, Old Lincolnshire curly-hair breed: 1 and 2, Henry Caudwell; r and c, J. S. Leggate; c, J. W. Rowland.

Two sow pigs, any other breed: 1, Duckering and Sons; 2, Sanders Spencer.

HORSES.

HUNTERS.

Mares, for breeding hunters, with foals at heels: 1 and 4, F. B. Wilkinson, Edwinstowe, Newark (Lady Grosvenor and Norah); 2, W. Petchel, East Kirkby, Spilsby (Paleface); 3, W. Carter, Ailsworth, Peterboro' (Georgina); r, W. B. Swallow, Ulceby (Beatrice); hc, H. Martin, Wainfleet (Duty).

Hunting foals: 1, The Earl of Sandwich, Huntingdon; 2, H. Martin; 3, Wm. Petchel (Playful); 4, W. B. Swallow (Tugela); r, F. B. Wilkinson.

Hunting geldings or fillies, one year old: 1, The Earl of Sandwich; 2, H. Martin; 3, F. Bland, Wrangle, Boston (Pagrag).

Hunting geldings or fillies, two years old: 1, W. J. Drakes, Gringley-on-the-Hill, Bawtry (The Sirdar); 2, V. Stapleton, Market Deeping (Sirdar); 3, F. B. Wilkinson; r, Robt. Hall, Ruskington, Sleaford (Wild Tom).

Hunting geldings or fillies, three years old: 1 and hc, A. J. Brown, Doncaster (Richard 2nd and Evadne); 2, E. Hoyle, Morlands, Bacup, Manchester (Sirdar); 3, G. Shillaker, Uffington, Stamford (Monarch); r, Wm. Cheney, Gidding Grove, Peterboro' (Dick Dunn).

Hunting geldings or mares, three years old, the property of a member of the society: 1, 3, and r, A. J. Brown (Richard 2nd, Evadne, and Cork); 2, G. Shillaker (Monarch).

Hunters, four years old, up to not less than 14st.: 1, A. J. Brown; 2, W. Cheney (Cribbage); 3, H. Butler, Bulby, Bourne (Comet).

Hunters, four years old, not up to 14st.: 1, J. N. Gray, St. Bride's-Super-Ely, Cardiff; 2 and 3, J. H. Stokes, Great Bowden, Market Harborough (Treasure); r, J. A. Cheney, Luddington, Peterboro' (Dandy Dick).

Hunters, four years old and upwards, to carry not less than 13st.: 1 and 2, J. N. Gray; 3, T. Bradley, Uffington, Stamford; r, J. H. Stokes.

Hunters, four or five years old (foaled in Lincolnshire, and owned by tenant farmers), not less than 13st.: 1, F. Ward, Quarrington, Sleaford (Aswardby); 2, J. Evison, Ewerby Thorpe, Sleaford (Rufus).

Hunters, five years, up to not less than 14st.: 1, A. J. Brown; 2, C. Clarke (Raby); 3 and r, J. H. Stokes.

Ditto, not up to 14st.: 1, J. H. Stokes; 2, F. B. Wilkinson; 3, A. J. Brown; r, H. Custance, Oakham (Organ Grinder).

HACKNEYS.

Stallions, three years or upwards: 1, T. Balderton, Frithville (Maxim Fire); 2, A. H. Greatbach (Doncaster Swell); r, S. Campain, Deeping St. Nicholas (Choir Boy).

Ditto, one or two years old: 1, C. E. Galbraith, Terreglis, Dumfries (Arbiter).

Mares, exceeding 15·2, with foals at heels: 1, C. E. Galbraith (Queen of the West); 2, H. Livesey, Trulls Hatch, Rotherfield, Sussex (Surprise); r, Sir Walter Gilbey; hc, E. J. Johnstone, Bury St. Edmunds (Alert).

Mares, kept by or the property of a member of the Society residing or farming in the county: 1, S. B. Carnley, Alford (Vanessa); 2, S. Campain, Deeping St. Nicholas (Carte Blanche).

Hackney foals: 1, S. B. Carnley (Norbury Meteor); 2, H. Livesey; r, E. J. Johnstone; hc, C. E. Galbraith.

Hackney mares, two or three years: 1, H. Livesey (Welcome); 2, C. E. Galbraith (Atalanta); r, E. J. Johnstone (Qui Vive); hc, J. H. Dennis, Algarkirk (A Question Lady Cadet).

Ponies, not exceeding 14 hands: 1, A. S. Day, Crewe; 2, Messrs. T. D. Lee and G. Nixon; 3, G. E. Franklin, Derby; r and hc, H. T. Burke, Chorley, Lancs.

SHIRE AND AGRICULTURAL.

Shire stallions, three years and upwards, entered or eligible for entry in the Shire Horse Society's Stud Book: 1, J. Drakard, Moulton Eaugate, Spalding (Willow Holt King); 2, E. H. Cartwright, Keddington Grange, Louth (Waresley Albert); 3, R. N. Sutton-Nelthorpe, Scawby, Lincs (East Anglian); r, R. N. Sutton-Nelthorpe (Sherburn Harold).

Shire stallions, two years, ditto: 1, H.R.H. The Prince of Wales (Benedict); 2, J. Forshaw, Carlton-on-Trent, Newark (Darcey Albert); 3, P. A. Muntz, Dunsmore, Rugby (Dunsmore John O'Gaunt); r, A. H. Clarke, Moulton Eaugate, Spalding (Moulton Columbus).

Shire entire colts: 1, P. A. Muntz, M.P.; 2, F. W. Griffin, Boro' Fen, Peterboro' (Borough Warrior); 3, R. N. Sutton-Nelthorpe, J.P.; r, Henry Casswell, Quadring, Spalding.

Shire mares, with foal at heels: 1, J. Forshaw (Daisy); 2, P. A. Muntz (Lady Franklin); 3, C. Shepherd Marsh, Hitchin (Brookfield Bonny); r and hc, H. H. Smith Carington, Ashby Folville, Melton Mowbray (Hendrin Crown Princess); c, E. H. Cartwright (Bonny Lass); F. W. Griffin (Borough Model); Lord Middleton (Pratt's Dora); Sir Walter Gilbey (Saxon Kitty).

Shire mare, with foal at heels, for members residing or farming in the county: 1, J. Forshaw (Tom's Flower); 2, E. H. Cartwright; 3, F. W. Griffin (Borough Model); r, A. Ransome, Hitchin (Hitchin Pansy).

Shire foals: 1, E. H. Cartwright; 2, A. Ransom; 3, J. Forshaw; r and hc, F. Casswell, Dunsby, Spalding; hc, Lord Middleton; c, F. W. Griffin and P. A. Muntz.

Shire foals, for members residing or farming in the county: 1, E. H. Cartwright; 2, A. Ransom; 3, F. Casswell; r, F. W. Griffin; hc, A. Ransom and S. E. Dean and Sons; c, C. E. Andrew, North Fen, Bourne.

Shire fillies, one year: 1, Sir J. B. Maple, Bart. (Kathleen); 2, F. W. Griffin (Boro' Duchess II.); 3, P. A. Muntz, M.P.; r, J. S. Collins, Hoffleet Stow, Bicker (Victoria); hc, Lord Middleton (Birdsall Day Star) and J. S. Collins (Victoria); c, E. B. Proctor, Gosberton (Gosberton Gem and Gosberton Pride); W. Townend, Louth (Society Belle); Tom Bond, Ludboro', Louth (Ludboro' Queen); F. Casswell, Dunsby; and G. Freir, Deeping St. Nicholas.

Ditto, two years: 1, W. Jackson, Knottingley, Yorks (Holker R.I.); 2, G. Freir (Deeping Jewel); 3, P. A. Muntz, M.P.; r, Tom Bond (Ludboro' Movement).

Ditto, three years: 1, J. Forshaw, Carlton-on-Trent, Newark (Whaplode Countess), 2, F. W. Griffin (Boro' Charm); 3, A. Ransome (Hitchin Plum); r, F. Casswell (Dunsby Darling); hc, S. E. Dean and Sons (Dowsby Tartar Queen); c, W. J. Whitsed, Gedney Hill, Holbeach (Wild Blossom).

Cart geldings, two years (Lincolnshire tenant farmers): 1, R. C. Cooper Walthum, Melton Mowbray (Prince); 2 and 3, A. H. Clark, Moulton Eaugate; r, C. E. Andrews, North Fen, Bourne (Bourne Conqueror).

Draught horses, gelding or mare, not under three years (Lincolnshire members of the Society): 1, A. Ransome (Duchess of Bridgewater III.); 2, J. Forshaw (Whaplode Countess); 3, Sir J. B. Maple, Bart. (King Cup); r, J. Forshaw (Tom's Flower); hc, E. H. Cartwright, Louth (Pony Lass); c, S. R. Hand, Wainfleet.

Nortnumberland.

The Northumberland Agricultural Society, which was established in the year before Her Majesty the Queen ascended the Throne, held its annual show on Thursday at Alnwick, in the beautiful grounds at Hulne Abbey Park, for the use of which the Society was indebted to its President, the Duke of Northumberland. In ordinary course, the show would have been held at Alnwick last year, but, owing to the death of the Duke of Northumberland, the venue was changed to Morpeth. There is a proposal that Hexham, which, although outside the county, used to be in the show circuit, but which has not been visited for fourteen years, should receive another turn next year. The weather on Thursday was very warm and of the most favourable character for outdoor enjoyment, there being only a brief shower of rain towards the close of the show. There was, as usual, a large attendance from all parts of the country, although the drawings, amounting to £265, showed a decrease of £98 on the receipts of last Alnwick Show, six years ago. The display of stock was smaller than at any of the Society's shows during the last eight years, and there were fewer animals sent by Scottish exhibitors. The entries numbered only 711, as compared with 810 at Morpeth last year, and 830 at Alnwick in 1894. As regards quality, the show was a fair average.

Cattle.

As to the cattle, the competitions were, as usual, devoted almost entirely to Shorthorns and Black-Polled cattle, with the exception of a few feeding cattle and dairy cows. For the first time for many years, Scottish breeders were unrepresented. The Shorthorns were not very numerous, since they totalled, in the six classes, to only five-and-thirty; but the quality was high, and some recent prize-takers were again well to the front. There were five entries in the old bull class, and Mr. John Robson, Newton, was first with his four-year-old roan, Moonlight, a bull of great substance, which was first at Edinburgh last month when in the hands of its breeder, Mr. Christie, Dairsie Mains, Cupar. The Duke of Northumberland was second with the three and a half years old white bull, Highland Blizzard, which was third at the York Royal Show. Mr. Lambert, Errington Hall, got the third ticket for the three-year-old Royal Studley bull, Cornwallis. A good class of two-year-old bulls was headed by Mr. William Henderson's Errington Stamp, a thick roan of his own breeding. The second prize went to Mr. George Harrison, Gainford Hall, Darlington, for Favourite of Sanquhar, a compactly built white bull, sired by Lord James Douglas. Mr. William Bell, Ratcheugh, was third with a bull by Studley's Knight, but in the yearling bull class Mr. Bell was first with Baron Abbotsford, a roan of nice colour and with good hair. The Duke of Northumberland was second, and Mr. Harrison third. The cow class was small, but the quality made up for the want of numbers. Mr. Joseph Harris, Calthwaite Hall, Carlisle, was first with Empress 12th, a sweet three-year-old red cow, which was similarly placed at York, and Mr. Bell was second with Lady Clara 3rd, a four-year-old roan, which was third in the cow class at York, whilst Mr. George Harrison was third with his old cow Welcome. Mr. Harris was again first for two-year-old heifers with a neat roan, Pansy 2nd, which was second at York; Mr. Harrison being second with the Bright Archer heifer, Welfare. A capital class of yearling heifers was deservedly topped by a Scottish-bred animal belonging to Mr. Harrison. This was Village Queen, a stylish roan sired by Village Archer, and bred by Mr. Duthie, Collynie. Mr. George H. Proctor, Flass House, Durham, was second with Fairy Ring, a white heifer of his own breeding. There were less than a score of entries in the five classes of Aberdeen-Angus cattle, but although the numbers were smaller than usual, the quality of the north country blackpolls was well maintained. Competition in all the classes was rather limited, the chief honours being gained by the Seaton Delaval Coal Company and Mr. Clement Stephenson, Balliol College Farm, Newcastle. Of the three old bulls Mr. Bainbridge, Eshott Hall, Felton, had the best in Annesley, a four-year-old bred by Mr. Chalmers, Aldbar, sired by Enthusiast of Ballindalloch, and which was champion at Edinburgh and fourth at York. Two-year-old bulls were placed at a disadvantage in competing with aged bulls, but the Seaton Delaval Company were second with Golden Bar, a promising young bull of their own breeding. There were only three yearling bulls, and of these the Seaton Delaval Company had a clear first in Luminant, by Esmond of Ballindalloch. Only one of the three cows shown was possessed of outstanding merit, and she was at once awarded the premier place. This was Mr. Clement Stephenson's four-year-old Elite of Benton, which was first at York. Mr. Bainbridge was first for two-year-old beifers with Sabina of Haystoun, a nice type of heifer which was first at York. The second prize was given to Mr. Clement Stephenson for a very promising member of his Gipsey family, sired by Esmond of Ballindalloch. Mr. Stephenson was easily first for yearling heifers with Exemption, a neat specimen sired by the prize bull Best Man of Benton. The Seaton Delaval Company were second with Exploit, by Esmond of Ballindalloch. In dairy cows, the prizes went to Mr. Jno. Hunter, Kenton; Mr. Jas. Brown, Whittingham; Earl Grey, Howick; Mr. Ed. Weallans, Alnwick; Mr. R. Armour, Lesbury; and in feeding cattle to Mr. W. Bell, Alnwick; the Broomhill Coal Company, and Mr. Thomas Grey, Alnwick.

Horses.

One of the features of the show was the remarkably good display of draught horses; these having never been excelled in the Northumberland County Show. The northern breed of Clydesdales predominated, as usual; and it was regarded as exceedingly satisfactory that the prize geldings were all in the hands of tenant farmers. The Seaham Harbour Stud Company was, however, most successful in all the other classes for heavy horses. Brood mares with foal at foot were a numerous class, over a dozen being shown. The Seaham Harbour Stud Company were first with the five-year-old Holyrood mare, Necklet, a good stamp of Clydesdale bred by Lord Londonderry. Mr. Peacock, Low Newport, Silksworth, was second with the eight-year-old Queen of Gretna, the Earl of Durham being third with the nine-year-old mare Model. Some very neat foals were shown, the Seaham Harbour Stud Company being first for colt foals with one of Captain Alexander's produce, and first for filly foals with a get of Lord Stewart out of the first-prize mare Necklet. For brood mares in foal the Seaham Harbour Stud Company were again first with the five-year-old Sir Everard mare Essence. Mr. St. Clair Cunningham, Hedderwick Hill, Dunbar, was second with the four-year-old Prince of Carruchan mare Minnie of Walkinshaw; Mr. Peacock was third with Scottish Crown, a four-year-old out of his second prize mare Queen of Gretna; and Mr. St. Clair Cunningham was fourth with May Light. For three-year-old fillies the Seaham Harbour Stud Company were first with a nice, straight filly by Lord Stewart, the Earl of Durham being second with Young Model. In the class for two-year-old fillies, Mr. H. B. Howie, Fenwick Steads, Belford, had an excellent first in a Baron's Pride filly, Messrs. T. Smith and Sons, Derwent Crook, being second with a filly by Bumstaire Boy; and the Seaham Harbour Stud Company third with a Lord Stewart filly. Yearling fillies were a large class, Mr. Shanks, Brunton Farm, Wall-on-Tyne, being first with Lady Lucy, a chestnut filly by Crusader. The Seaham Harbour Stud Company were second with a Lord Stewart filly; and Mr. St. Clair Cunningham third with the Baron's Pride filly White Heather. The Hedderwick Hill stud supplied the winner in the yearling colt class with a youngster by Mains of Acres out of a Sir Everard mare; the Seaham Harbour Stud Company being second with one of Lord Stewart's produce; and Mr. Tom Cuby, Shiblaw, Coldstream, third with a colt by Premier Prince. There was an excellent display of geldings. Mr. Fred Usher, Norton Mains, Ryton, took the first prize for heavyweight hunters with his six-year-old gelding Cadger; and in the four-year-old class Mr. Cresswell, Abmouth, was first; Mr. Robertson, Morebattle Tofts, Kelso, second; and Mr. George Dove, Whitehouse, St. Boswells, third. In the Hackney classes, Mr. Eustace Smith, Benton House, Newcastle, was first for brood mares; Mr. David Mitchell, Millfield, Polmont, being second; and Mr.

Liddell-Grainger, Ayton Castle, third. Mr. Eustace Smith was also first for Hackney foals, Mr. Liddell-Grainger being second. For three-year-olds, Mr. David Mitchell was first, and Mr. Liddell-Grainger second; and for two-year-olds the Ayton Castle stud was first. For Hackneys in saddle, over 15 hands, Mr. Eustace Smith was first, and Mr. Liddell-Grainger second. Mr. David Mitchell was first for ponies above 13 hands with his four-year-old Marson; Mr. Smith was first for ponies under 13 hands, Mr. Cabry being second; and Mr. Cabry was first for ponies under 12 hands.

Sheep.

The sheep were but a moderate lot, and were unusually small in numbers, the entries showing a falling off in all the four breeds and being nearly sixty fewer than at Morpeth last year. Although classes were provided for the four Scottish breeds, only two exhibitors were present from the north side of the Tweed. The Border Leicesters were a capital lot in point of quality, the shearling rams being specially meritorious. In a strong class of shearling rams Mr. Clark, Oldhamstocks Mains, Cockburnspath, who was the only exhibitor from Scotland, showed three sheep, and they carried off all the prizes. Mr. J. E. Nicholson, Manor House, Lancaster, showed his second prize York ram, but it only got the fifth place. Mr. Nicholson was, however, first in the aged ram class with a strong specimen bred by Mr. Angus, Bearl, Stocksfield; Mr. Robinson, Snipe House, Alnwick, being second, and taking the special prize for the best ram belonging to tenant farmers in the county. Mr. Nicholson also carried off the principal prizes for both tup and ewe lambs; and Mr. Scott, East Lilburn, was first for ewes, Mr. Nicholson being second. The gimmer class was headed by a very fine and nicely matched pen from the Oldhamstocks flock. In the Cheviot section the judges' duties were comparatively light. The principal exhibitors were Mr. John Robson, Newton, and Mr. Jacob Robson, Byrness, and the former took the leading honours in all the five classes with some good typical North of England sheep of his own breeding, his brother securing one second and four third prizes. Mr. Smith, Mowhaugh, was the only exhibitor from the other side of the Border, and he had four entries forward. He was second in the old ram class and third for gimmers, but his shearling rams only got the fourth and fifth places. All the blackfaced sheep belonged to English exhibitors, the prize-takers being Messrs. Crawford Brothers, Cartington, Rothbury; Mr. John Robson, Newton; and Mr. Joseph Vickers, Elm Park, Tow Law. Halfbreds were few in number, and there was very little competition in any of the classes, although some well-bred sheep were shown. Mr. H. H. Scott, Alnham House, took all the prizes for shearling rams with animals of his own breeding, and he was also first for ewes. Mr. Scott, East Lilburn, had the best of the two aged rams shown; Mr. Morley Crossman, Goswick House, Beal, was the only exhibitor of gimmers; and Mr. Charles Perkins, Ross, Bedford, was awarded both prizes for ewe lambs.

Mid Kent.

The show of the Mid-Kent Agricultural Association took place at Maidstone on Wednesday. The show of hunters was scarcely so large as on some previous occasions, but the horses generally were the feature of the exhibition, the total number of entries being over 150. The sheep were also less numerous than usual, the entries being below twenty. Cattle numbered forty-three, but the competition was in some instances very keen. With Shire horses, Lord Hothfield, Mr. Cornwallis, and Mr. G. Osenton, of Westerham, were the principal winners. Lord Hothfield, who has not been a prominent exhibitor this season, gained a second with Xerxes, a stallion which received the reserve card at Maidstone's Royal, while Buscot Duchess, a filly foaled in 1897, was first in her class, and she secured two firsts at Tunbridge Wells in 1899. Mr. Osenton retained his reputation as a successful exhibitor. With hunters Mr. Buckland, Great Chart, figured prominently, and among light weights Mr. Cornwallis's Linton Dorothy came to the front.

Prominent among the Sussex cattle was Mr. Cornwallis's bull, Lord Linton, which got first prize at the Royal; here he again reigned without a rival. Mr. Gerald Warde, whose successes at all the principal shows are well known, obtained the chief prize with his Sussex cow, Tutsham Marguerite, this beast having been second at the Royal Show at York, and first at Maidstone last year. There were some pretty Jersey cows, although the entries were limited; while Mr. Grace, of Leybourne Grange, showed a splendid Shorthorn bull not for competition.

Mr. Frederick Neame carried all before him in the classes for Kent sheep.

The Judges.

Agricultural Horses: Mr. R. Barrow, Elm Grove Stud Farm, Brockham, Betchworth; Mr. R. King Simpson, Ringmer, Lewes; Mr. Robert Craig, Croudon Park, Stock, Essex. Hunters, Driving, and Jumping: Hon. R. P. Nevill, Birling Manor; Mr. W. E. Rigden, M.F.H., Faversham; Mr. A. Leney, M.S.H., Wateringbury; Mr. H. Bailey, St. Albans. Cattle: Mr. D. Swaffer, Kingsnorth, near Ashford; Mr. J. Noakes, Lamberhurst. Sheep: Mr. T. Powell, Lenham; Mr. Hugh Gorringe, Kingston-by-Sea.

Prize List.

HORSES.

SHIRE

Stallion, foaled in or before 1898: 1, F. S. W. Cornwallis, M.P., Linton Park, Maidstone (Linton Settling Day); 2, Lord Hothfield (Xerxes); r, George M. Style, Gore Court, Maidstone (Rising Light).

Mare, foaled in or before 1896, and foal: 1, F. S. W. Cornwallis, M.P. (Lady Vinolina); 2, George Osenton, Westerham (Dunsmore Heliotrope).

Filly, foaled in 1897: 1, Lord Hothfield (Buscot Duchess); 2, F. S. W. Cornwallis, M.P. (Miss Trustee).

Filly, foaled in 1898: 1, Lord Hothfield (Yashmack); 2, F. S. W. Cornwallis, M.P.; 3, George Osenton.

Filly, foaled in 1899: 1, Lord Hothfield (Zuyn); 2, F. S. W. Cornwallis (Linton Glade); 3, George Osenton (Eden Lily).

Yearling gelding or filly, by a sire registered in the S.H.S. book, the property of a tenant farmer in Kent: 1, George Osenton (Eden Lily); 2, Robert Veitch, Cossington, Aylesford; 3, Messrs. J. and T. C. Robertson, Cliffe, Rochester (Albert); r, Arthur Miskin (Dragon).

Special prizes for yearling gelding or filly, sired by either Linton Trimmer or Trustee: 1, Robert Veitch; 2, Arthur Miskin (Dragon); r, P. Law, Shenley Farm, Headcorn (Sunbeam).

Shire Horse Society's silver medal for the best Shire mare or filly foal: 1, Lord Hothfield (Zuyn); r, Lord Hothfield (Buscot Duchess).

CLEVELAND OR OTHER THAN SHIRE

Cart horse, stallion, foaled in or before 1898: Lords A. and L. Cecil (Prince Rupert).

Mare, foaled in or before 1896, and foal: Lords A. and L. Cecil (Lady Harry).

Filly or colt foal, foaled in 1899, sired by one of Lords A. and L. Cecil's Cleveledale stallions: A. Nettlefold (Wrotham).

ANY BREED.

Cart gelding, foaled in or before 1896: 1, Henry White and Son; 2, Messrs. J. and T. C. Robertson; 3, Lords A. and L. Cecil.

Cart gelding, two or three years old: 1, Messrs. J. and T. C. Robertson (Goldfinder); 2, Arthur Miskin (Prince); 3, Messrs. J. and T. C. Robertson (Nugget).

Cart mare, foaled in or before 1896, the property of a tenant farmer in Kent: 1, Messrs. T. and H. F. Simonds, Lovehurst, Staplehurst (Pansy); 2, G. Craib Allan, Southborough (Grove Biscuit); r, James Duncanson (Hether Bell).

Pair of cart mares or geldings, any age, the property of a tenant farmer in Kent: 1, J. and T. C. Robertson (Klondyke and Goldmine); 2, Henry White and Son; r, J. and T. C. Robertson (Goldfinder and Nugget).

HUNTERS.

Weight carrying hunter, up to 14 stone, foaled in or before 1895, to be ridden: 1, John C. Buckland (Sportsman); 2, John C. Buckland (Royal); r, Walter Winnis (Golden Dream).

Light weight hunter, up to 12 stone, foaled in or before 1896: 1, C. W. Sofer Whitburn, Addington Park, West Malling (Gamecock); 2, John C. Buckland (The Duke); r, W. W. Hubble, The Elms, Hunton (Chance).

Mare or gelding, two or three years old, likely to make hunters; confined to Kent: 1, F. S. W. Cornwallis, M.P. (Linton Dorothy); 2, W. W. Hubble (Jubilee); r, S. Lee Smith (Mermaid).

Hunter brood mare: 1, S. Lee Smith (Ladysmith); 2, S. Lee Smith (Miss Woodruff); r, Charles H. Hoarse, Sayndes, Staplehurst (Milkmaid).

JUMPING.

Hunters, confined to Kent, outside the Metropolitan area: 1, Capt. W. Dougall, Cavalry Depôt, Canterbury (Bantry); 2, J. C. Buckland, Goldwell, Great Chirt (Pantomime); 3, J. C. Buckland (Skylark).

CATTLE.

SUSSEX

Bull, calved previous to 1898: 1, F. S. W. Cornwallis, M.P. (Lord Linton).

Bull, calved in 1898 or 1899: 1, Hon. Ralph Nevill (Confidence H.); 2, George White, Hunton (Sirdar); r, Capt. R. Alexander, Cranbrook (Buckhurst H.).

Cow, in milk or in calf, calved before 1897: 1, Gerald Warde, Tutsham Hall, West Farleigh (Tutsham Marguerite); 2, Hon. Ralph Nevill (Birling Beauty 1st); 3, W. F. Winch, Cranbrook (Tilden Queen).

Heifer, calved in 1898: 1, Mrs. Ernest Hills, R. Heal, Penshurst (Penshurst Napier); 2, Major G. M. Best (Grace Darling); 3, Hon. Ralph Nevill (Alden Beauty); r, W. F. Winch (Tilden Mayfly).

Heifer, calved in 1899: 1, W. W. Hubble (Peony); 2, Major M. G. Best (Buckthorn); 3, Henry White and Son; r and hc, Gerald Warde (Tutsham Marguerite II.); hc, Mrs. Ernest Hills (Penshurst Bonette).

Special prize for the best animal in the first three classes: Gerald Warde (Tutsham Marguerite); r, W. W. Hubble (Peony).

ANY BREED OR CROSS BREED.

Dairy cow, in milk or in calf, calved previous to 1897, the property of a bona fide tenant farmer in Kent, or dairyman, in the borough of Maidstone: 1, Thos. Wetten, Bird's Oak, East Peckham (Fillpail); 2, A. G. Marshall, Hollingbourne (Primrose); r, George Dunk, Oakwood Road, Maidstone (Strawberry).

JERSEY.

Cow, in milk or in calf, calved previous to 1897, registered in the Jersey Herd Book: 1, Mr. Arthur Miskin (Cherry).

SHEEP

KENT

Shearling ram: 1, Frederick Neame, Macknade, Faversham; 2, George Farmer, Leeds Abbey.

Ram, two years old and over: 1, Frederick Neame.

Special prize for the best ram exhibited in the previous classes, registered in the Flock Book, the property of tenant farmer in Kent: Frederick Neame.

Pen of three shearling ewes: Frederick Neame.

Special prize, for the best ewe registered in the Flock Book, property of tenant farmer in Kent: Frederick Neame.

SOUTHDOWN

Shearling ram: 1 and r, Thomas Miles, Buckwell, Wye.

Ram, two years old and over: 1, R. J. Balston, Springfield, Maidstone; r, J. W. Grace, Leybourne Grange, West Malling.

Pen of three shearling ewes: 1, Thomas Miles.

Ripon.

The twelfth annual show of the Ripon and District Agricultural Society was held on the 6th inst., and proved very successful. The entries showed a substantial advance upon those of last year, the stock was well up to the average in point of quality, and the attendance throughout the day was quite satisfactory, notwithstanding that the weather was far from favourable. Numbering 973 as against 915 last year, the entries included 215 horses, a decrease of 25, 79 cattle against 95 last year, while sheep were about the same. Of the horses the Hackneys were decidedly the feature. The hunters were of good average quality, with here and there an animal standing well above its competitors, and perhaps they gave the judges as much trouble as any of the classes. All the three brood mares were favourable commented upon both for strength and appearance. The two-year-old filly with a [illegible] Mr. E. T. C. [illegible] Moor, took a [illegible] and should develop into a valuable [illegible]. Among the roadsters Messrs. J. Burton and Sons' Mr. Dewell was again prominent. There were [illegible] to choose between the two [illegible] moving with beautiful action; and Mr. Mark Peterson's well-known exhibit [illegible] by carrying off the prize for the best roadster [illegible]. There is little to be said on the agricultural [illegible] beyond that they were of good [illegible] quality. After two years' inactivity in this direction the [illegible] on his own [illegible] Orchard Prince [illegible] the Dragon, [illegible] the Ripon, Ripley, and Thirsk [illegible] some improvement in the Shire [illegible] on. The sheep were an excellent [illegible] of the [illegible] declining in his enthusiasm [illegible] animals at a local show for a long time past. The cattle, too, were [illegible]. In the [illegible] W. Frank's Welcome Captain, [illegible] at the Royal Show and was first at Otley, but the [illegible] but the second is also a good animal. Mr. J. M. Cresland's (South Stainley) white cow, was [illegible] the first card in her class, as a good [illegible] getter, but the winning heifer, owned by Mr. A. V. Hainsworth, particularly took the eye of the [illegible]. Some of the dairy cattle were so good that they might be shown with advantage at the county show.

Prize List.

HORSES.

FOR THE FARM OCCUPIED [illegible]

Agricultural brood mare, with foal at foot: 1, J. M. [illegible] land, South Stainley; 2, W. Gothorp, Hutton Conyers; 3, T. Kendall, Melmerby.

Gelding or mare, four years old and upwards: 1, 2, and 3, J. Theakston.

Three-year-old gelding or filly: 1, J. Theakston; 2, Exors. of the late R. Allison, Thornton Watlass; [illegible] E. Clarke, Crosthwaite.

Two-year-old gelding: 1, Mrs. Place, Bedale; [illegible] W. Stubbs, Baldersby; 3, J. Theakston.

Two-year-old filly: 1, J. W. Cawthorn, Plumpton Hall; 2, A. A. Parker, Snape, Bedale; 3, J. Spence.

Yearling colt or gelding: 1, J. Hebden, [illegible]; 2, J. Greaves; 3, T. Burton, Felskirk, Thirsk.

Yearling filly: 1, Exors. of the late R. Allison; 2, R. Stubbs; 3, A. W. Hainsworth, Pateley Bridge.

Pair of horses, any age, shown in [illegible] J. Theakston; 3, W. H. Imison, Dishforth.

The Shire Horse Society's medal, awarded to the best mare, filly, or filly foal, registered in the Stud Book: J. Theakston.

FOR THE FIELD (shown in hand)

Hunter brood mare with foal at foot: 1, T. Sowden, Busby Stoop, Thirsk; 2, Lord Greenway, Middleham; 3, G. Appleton, Thirsk.

Three-year-old gelding or filly: 1, H. Pearson, Pilmoor; 2, W. Jordison, Thirsk; 3, F. A. E. Samuelson, Thirsk.

Two-year-old gelding or filly: 1, E. T. C. Antrobus, Marton-le-Moor; 2, Rev. H. R. Hunter, Wath Rectory; 3, W. Whitaker, Beckhouse.

Yearling gelding or filly: 1, W. Jordison; 2, G. [illegible]; 3, F. A. E. Samuelson.

The Hunters' Improvement Society's [illegible] and bronze medal to the best Hunter [illegible] or with foal at foot by, a thoroughbred horse or registered hunter [illegible] medal or premium as a brood mare: T. Sowden, Busby Stoop.

FOR THE ROAD (shown in hand)

Roadster brood mare, with foal at foot: 1, J. Burton and Sons, Copt Hewick; 2, T. Watson, Sowerby; 3, W. Swales, Thirsk.

Three-year-old gelding or filly: 1, A. Parkinson, Kirby Hill; 2, W. K. Pickering, Rooker Hill; 3, J. E. Cawthorn, Plumpton Hall.

Two-year-old gelding or filly: 1, J. Burton and Sons; 2, Fleming and Son, Westgate; 3, W. K. Pickering.

Yearling colt, gelding, or filly: 1, F. R. Hebden; 2, R. Lemming, Studley; 3, H. Meadley, Harrogate.

The Hackney Horse Society's medal for the best pony mare, filly, or filly foal that is registered in the Hackney Stud Book, and [illegible] registration in the Hackney Stud Book: A. Lee Dawson and Sons; r, F. R. Hebden.

HUNTERS, ROADSTERS, AND PONIES IN DOUBLE HARNESS.

Hunting gelding or mare, [illegible] horse: 1, E. T. C. Antrobus, Marton-le-Moor; 2, G. Spencer, Ripley; 3, J. Slater, Braithwaite Hall.

Hunting gelding or mare, [illegible] W. Jordison, Thirsk; 2, J. Morley, Dishforth; 3, J. Stevenson, Bainbridge.

Hunting gelding or mare, any age, [illegible] Bedale Hounds during last season: 1, F. A. Rickaby, Easingwold; 2, W. Jordison; 3, E. T. C. Antrobus.

Roadster gelding or mare, any age: 1, M. Pearson, Harrogate; 2, J. Stevenson; 3, E. Handley, Skelton.

Lady's hack, any age: 1, J. Stevenson; 2, H. Pearson; 3, J. Hebden, Skipton.

Pony, not exceeding [illegible] hands: 1 and 2, T. E. Sowden, Ripley; 3, T. E. Lavin.

HORSES IN HARNESS.

Carter's single horse [illegible] have been [illegible] kept horse, confined to [illegible] Ripon; 2, A. Trees, Coltsgate Hill; 3, W. Wells and Sons, Ripon.

Pair, not exceeding [illegible] Harrogate; W. Fryer, Darley Hall; [illegible] Bedale; [illegible] 2, Mrs. W. T. Garnett, Sharow; 3, Mrs. Jordison, Thirsk.

[illegible] son; 2, T. L. Smailes; 3, T. E. Lavin.

Tradesman's or farmer's single-horse turn-out: 1, W. Jordison; 2, T. L. Smailes; 3, T. E. Lavin.

[illegible] the [illegible] angles and distances apart, time, pace, and style considered: 1, Mrs. Jordison; 2, Miss Handley, Skelton; 3, Mrs. M. G. Harrogate.

CATTLE.

SHORTHORNS

Best bull [illegible] Mrs. [illegible] House; 3, I. Oliver, Darley.

[illegible] Butler, Nidd Hall, Ripley; 2, W. H. Frank; 3, Rev. S. H. [illegible]

Best [illegible] 2, Mrs. [illegible]

Knaresborough; 2, I. Oliver; 3, J. M. Crosland, South Stainley.

Cow, in calf or milk, three years old and upwards: 1, J M Crosland; 2, W. H. Frank; 3, Hon. H. E. Butler.

Heifers, in calf or milk, above two and under three years old: 1, A. W. Hainsworth, Cliff Grange, Pateley Bridge; 2, I. Oliver; 3, The Bishop of Ripon.

Heifer, above one and under two years old: 1, J. Lister, Thirsk; 2, A. W. Hainsworth; 3, Sir Christopher Furness, Grantley Hall.

Heifer calf, under one year old: 1, Mrs. Cass; 2, Sir Christopher Furness; 3, A. W. Hainsworth.

CATTLE OF ANY BREED OR A CROSS.

Cow for dairy purposes, in milk: 1, W. Wells and Sons; 2, J. Goodrick, Harrogate; 3, J. Spilman, Haddockstones, Markington.

Channel Islands cow or heifer, any age: 1, Sir Reginald Graham, Norton Conyers; 2, The Bishop of Ripon; 3, R. Williamson, Sunnybank

Two bullocks, with all their calf teeth in: 1, W. Yeats, Baldersby; 2, J. Spence, Ashley House; 3, J. W. Taylor, Wath.

Two heifers, with all their calf teeth in: 1, C. Hammond, West Tanfield, Bedale; 2, J. M. Crosland; 3, L. C. Webster, Friars Hurst.

Pair of grazing bullocks, with not more than two broad teeth, must have grazed from June 1st: 1, W. Gothorp, Hutton Conyers; 2, C. Hammond; 3, M. Wood, Blois Hall.

SHEEP.

IMPROVED LEICESTERS (DISTRICT CLASSES).

Ram, two-shear and upwards: 1, Miss Warriner, Studley; 2, W. Yeats, Baldersby; 3, G. Weighill, Wath.

Shearling ram: 1, E. Clarke, Gristhwaite; 2, W. Yeats; 3, F. Clarke, Dishforth.

Ram lamb: 1, Miss Warriner; 2, W. Yeats; 3, J. T. Todd, Carlton Husthwaite

Pen of three shearling gimmers: 1, T. Clarke; 2, W. Yeats; 3, F. Clarke.

Pen of three ewes: 1, F. Clarke; 2, T. Clarke; 3, W. Yeats.

Gimmer lamb: 1, 2, and 3, T. Clarke.

WENSLEYDALE

Ram, two-shear and upwards: 1, W. Cleasby, Islebeck Grange; 2, J I'Anson, Howe; 3, F. W. Trotter, Low Ellington.

Shearling ram: 1 and 3, W. Cleasby; 2, T. Wilkinson, Cold Harbour, Easingwold.

Ram lamb: 1, J. I'Anson; 2, R. B. Wood, Low Ellington; 3, J. Hargrave.

Pen of three ewes: 1, J. Spence, Ashley House; 2, J. I'Anson; 3, W. Todd.

Three shearling gimmers: 1 and 2, W. Cleasby; 3, J. I'Anson

Gimmer lamb: 1, J. I'Anson; 2, T. Wilkinson; 3, F. W Trotter.

MASHAM SHEEP

(First cross from a Scotch ewe.)

Pen of three Masham ewes: 1, W. B. Pearson; 2, J. Spence; 3, W. Thompson.

Pen of three shearling gimmers: 1 and 2, P. C. Verity, Nutwith Cote; 3, G. Weighill.

Pen of three fat lambs, of any breed or a cross, bred by exhibitor: 1 and 2, W. Scorer, Skelton; 3, J. Hargrave.

PIGS.

(DISTRICT CLASSES.)

Boar, White, Large or Middle breed: 1, J. M. Crosland, South Stainley.

Sow, White, Large or Middle breed: 1 and 2, J. Spence; 3, C. Wells, Birkby Nab.

Gilt, White, Large or Middle breed: No entry.

Black or Berkshire boar: 1, The Marchioness of Ripon; 2, W. H. Frank, Marton-le-Moor; 3, M. Wood, Blois Hall.

Black or Berkshire sow: 1, J. Burton and Sons, Copt Hewick; 2, The Marchioness of Ripon; 3, Mrs. Watson Verity.

Black or Berkshire gilt: 1, W. H. Frank; 2, The Marchioness of Ripon; 3, M. Wood.

Cleveland.

The Cleveland Agricultural Society held its annual show at Middlesbrough on Wednesday, and it was favoured with splendid weather, so that the attendance of visitors was a big one, but unfortunately the entries were not so numerous as last year, being but 698 as against 774 at Saltburn in 1899 and 710 at Thornaby in 1898. The reason of this falling off is said to be the altering of the date of the show. All the same, it was a pity that at Middlesbrough, right in the heart of Cleveland, a better numerical display could not be made, more especially in the Cleveland Bay and coaching sections. Some consolation was, however, derived from the fact that the quality was of the right sort. The cattle occupied first position in the catalogue. As a rule, the animals were satisfactory, the youngsters showing considerable prominence. Mr. J. W. Harrison, of Lealholm, Grosmont, a brother of Mr. George Harrison, met with considerable success with his Shorthorns, taking four out of the five first prizes. Mr. R. Brunton, of Marton, took the other principal award, and the second and third honours were shared by Mr. A. J. Dorman, of Nunthorpe; Mr. T. C. Dobson, Kirby-in-Cleveland; Mr. J. W. Harrison; Mr. T. Petch, of Little Ayton; Mr. J. Hartley, of Loftus; and Mr. G. Mortimer, of Westerdale, Grosmont. As a flockmaster, Mr Harrison was also to the front, though Mr. J. Dowson, of Danby, scored one or two points more, whilst the remaining prominent exhibitors included Mr. H. T. Allison, of Stanghow, Guisborough; Miss Anne Pierson, of Kirby Bridge, Carlton, Northallerton; Mr. George Welford, of Loftus; and Mr. E. Anderson, of Rinswell, Stockton. The competition in the pig department was limited to five breeders, and the number of animals exhibited was ten. A valuable specimen of the Large White breed, the property of Mr. S. Boocock, of Danby, succumbed to the heat.

The northern breed of draught horses practically reigned supreme in the heavy section. The individual classes were not so well filled as they ought to be, and the quality was rather irregular. Brood mares were properly headed by Mr. J. J. Barker's unnamed daughter of Gert Sherry, the Coulby Manor representative having as prize companions Mr. T. Petch's black Violet and Mr. R. Dunning's Maid of the Mill. Mr. R. P. Petch furnished the leaders in the two succeeding classes—foals by Gay City and Chester, and colt foals—the Priestcroft Stud having fairly strong rivals in the entries of Mr. J. J. Barker and Mr. T. Hicks, of Wilton. The filly foal sent by Mr. James Ingledew, of Low Fields, Bedale, was greatly admired, as was also the yearling filly belonging to Mr. T. Petch. Mr. Ingledew's Mark topped the two-year-old gelding class, while Mr. Joseph Petch, of Marton, had the honour of winning with his two-year-old filly by Lord Wolseley. Carting geldings and mares came out well, and the two district classes were good. Hunters were excellent, so far as they went, but competition was limited. In a class of eight brood mares Mr. Thomas Swales's ten-year-old Lady Grey, the Royal winner, stood out from the rest. The second best was Mr. C. Codling's Bonny Girl, whilst the owner of Lady Grey took a third prize with an animal whose name was omitted from the catalogue. The youngsters were meritorious. Mr. W. Scarth, jun., won comfortably with Palm Saturday among the colt foals, and Mr. J. Dent's young filly by Andrassy triumphed over Mr. Swales's Crooked Pin foal. Messrs. T. and H. Ward, of Pinchinthorpe, Great Ayton, now entered the ring, and with the well-known two-year-old gelding Blackbird and the three-year-old filly Blackthorn swept away all opposition; but in the four-year-old gelding or filly class Mr. John Walton, of Guisborough, held sway, his handsome-looking and quick-moving chestnut gelding by Delight beating Lord Clare, from Pinchinthorpe. The Messrs. Ward were not, however, to be denied, for in the next class The Knight gained the coveted colours from Mr. David Smallwood's John Peel, and Mr. William Jordison's Mowbray Hunting. The same exhibitors also carried off the Cleveland Hunt prize with Lord Clare. To hark back, the chief two-year-old came from Ings Farm, Easington, the residence of Mr. T. Newton, while the pick of the three-year-old fillies was the choice Golden Ruby, belonging to Mr. J. S. Darrell, one of the most popular exhibitors and judges in Yorkshire.

The Cleveland Bays, in regard to quality, were quite up to the mark, though here again there was lament over the paucity of entries. In seven classes there were twenty-eight animals, or a class average of four. Three of the young classes, however, had only two entries—a falling away since the days when the average was twelve or more. Royal winners were present in the brood mare class. Mr. John Lett's Madame II. followed up her victories of the past by standing at the top of a strong class. Second prize went to Mr. Thomas Petch, of Skelton, for Blink Lady, and third honours to Mr. F. Wilson Horsfall, who was represented by Lady Salton. The Skelton Stud was more assertive in the colt foal class, but in the case of the filly foals, Mr. Skelton's entry had to give way to Mr. Lett's Lucky Hero filly. The exhibitors of yearling fillies were Mr. G. Allison and Mr. Thomas Petch, whose names figured in the prize list in the order named. Mr. Horsfall was without an opponent in the yearling colt or gelding class, while Mr. G. Scoby rose from second position in a young class to the first place in the two-year-old filly class, where his exhibit was the charming Beadlam Girl. Luck's All took for a second year the silver challenge prize. Brood mares shone in the coaching section. The class contained Mr. Horsfall's noted winner, Patience, whose most formidable opponents on this occasion were Mrs. Petch's Lady Lena and Mr. R. Brunton's Dairymaid. Foals numbered three, the prizes going to Mr. James McNeil, of Westerdale, Grosmont, and Mrs. Petch. The honours in the remaining classes were distributed among Mr. McNeil, Mr. G. T. Petch, Mr. Isaac Duell, of Hinderwell; Mr. R. Brunton, of Marton; and Mr. M. Porritt, of Danby. Several old favourites appeared in the Hackney and driving classes. They embraced Miss Derwent, the property of Messrs. J. Burton and Sons; Mr. H. Creaser's White Socks, Mr. Mark Pearson's Lord Lofty, Mr. T. Blackburn's Ladysmith, and Mr. H. Callender's Dewdrop.

Paris International Agricultural Congress.

Amongst the numerous meetings that have already been held in connection with the Paris Universal Exhibition, not the least interesting have been those organised during the International Congress, held from the 1st to the 8th instant.

This congress is the sixth of a series dating from the Paris International Agricultural Congress of 1889, when a Permanent International Agricultural Commission was formed for the purpose of instituting periodical agricultural congresses at different European capitals. Since 1889 congresses of this kind have taken place at The Hague (1891), Brussels (1895), Budapest (1896), and Lausanne (1898). If they have had no other result, they have done much to promote friendly relations between the leading agriculturists of the various countries represented, and disseminate much agricultural information, both scientific and practical, that would not otherwise have travelled beyond the borders of the country of its origin.

In view of the Paris Exhibition and the Agricultural Congress held in connection with it, the annual conferences of the Société des Agriculteurs de France partook largely this year of an international character, and the meeting of Saturday, June 30th, the day before the opening of the congress, was specially devoted to the reception of communications from the representatives of agricultural societies other than those of France. In his opening allocution, the president of the Société des Agriculteurs, the Marquis de Vogüè, referred to the Royal Agricultural Society of England as the mother of the National Agricultural Societies of both France and Germany, and spoke of the mutuality of purpose and solidarity of interest that existed between all the agriculturists of the world. Herr von Arnim having spoken upon the work of the German Agricultural Society, of which he is the chairman of the directorate, Mr. Ernest Godfrey, secretary of the Central and Associated Chambers of Agriculture, gave a brief review of the agricultural situation in England, and of the agricultural legislation of the present Parliament.

In the evening of the same day a soirée was given by the Société des Agriculteurs, at the Society's house, 8, Rue d'Athenes, the chief feature of which was an illustrated paper by Sir Ernest Clarke, secretary of the Royal Agricultural Society of England, on "British Breeds of Live Stock," a subject in which French agriculturists take a special interest. Sir Ernest had brought over with him from England lantern slides, showing selected specimens of each of the breeds of horses, cattle, sheep, and pigs in this country; and as an additional attraction, biograph views were shown representing in action several of the leading features of the parade before their Royal Highnesses the Prince and Princess of Wales of the prize animals at the recent meeting of the Royal Agricultural Society at York. The lecture, which was in French and largely impromptu, was followed with great interest by the company assembled, and the animated pictures created much enthusiasm.

The International Agricultural Congress, which has been held during the past week, under the presidency of M. Méline, formerly the French Minister of Agriculture, in the Palais des Congrès, near the Trocadero in the Exhibition, was divided into seven sections, dealing with (1) rural economy; (2) agricultural instruction; (3) agricultural science; (4) live stock; (5) agricultural industries; (6) southern cultures; and (7) useful and injurious animals, the sections being presided over by Frenchmen of high position, and the chief foreign delegates being appointed to honorary positions in the Bureau. Of the English delegates, Mr. R. A. Yerburgh was made a vice-president, and Sir Ernest Clarke honorary Secretary-General of the Congress; whilst Mr. F. S. Courtney, C.E., was nominated a vice-president of Section 5, and Mr. Ernest Godfrey one of the secretaries in Section 1.

The Tuesday evening of the Congress was the occasion of a very interesting international gathering at the Hôtel Ritz, which Mr. R. A. Yerburgh, M.P., and other English members of the Congress entertained at dinner the presidents of the sections and other distinguished visitors to the Congress, including the Marquis de Vogüé (France), Prince Georges Schoniach-Carolath and Herr von Arnim (Germany), Count Kolowrat (Bohemia), Viscount Arthur de Chezelles (France), Baron Arthur von Hohenbruck (Austria), M. Jules Develles (formerly French Minister of Agriculture and Foreign Minister), M. Louis Passy (Deputy and Secretaire Perpetuel of the Société National d'Agriculture de France, M. Henri Sagnier (Secretary of the Congress), Sir Ernest Clarke, Mr. Austin Lee, C.B., of the British Embassy, Mr. Rouse Orlebar, and Mr. Ernest Godfrey.

On Wednesday an official luncheon to the members of the Bureau was given by the Minister of Agriculture, and amongst those invited were Mr. R. A. Yerburgh, M.P., and Sir Ernest Clarke. In the afternoon the foreign delegates were invited to a séance of the Société National d'Agriculture de France. M. Méline presided, and speeches were delivered by M. Louis Passy on the scientific work of the principal European agricultural societies, by M. Berthelot, the eminent French savant, and by M. Duclaux upon the work of the Pasteur Institute.

On Thursday the members of the Congress were invited to Verrieres to witness the experimental plots of the old and famous firm of seedsmen, Messrs. Vilmorin, Andrieux, et Cie. The present head of the firm, M. Philippe Vilmorin, representing the fifth generation of its successive principals, entertained the members to déjeuner, and afterwards in an excellently conceived speech welcomed his guests in the name of his late lamented father, M. Henri Vilmorin, to whose genius the wonderful development of the firm had been so largely due, and whose recent death was a loss to agriculture throughout the world. The occasion was exceptionally interesting owing to the approaching marriage on the following Monday of M. Philippe Vilmorin, and the health of the future bride and bridegroom, proposed by Sir Ernest Clarke, was enthusiastically received. The party afterwards proceeded in automobile carriages to the neighbouring farm at Champagne for the purpose of witnessing the sugar beet installation and distillery of Messrs. Pettit.

The Congress was concluded by a banquet given under the presidency of M. Méline on Saturday evening at the Hotel Continental, at which M. Jean Dupuy, the Minister of Agriculture, gave the toast of the foreign delegates to the Congress.

SOCIETIES.

Proceedings of the Central and Associated Chambers of Agriculture.

Special Council Meeting.

A Special Meeting of the Council of the Central and Associated Chambers of Agriculture, called for the purpose of discussing the Agricultural Holdings Bill as amended by the House of Commons Standing Committee on Trade and Agriculture, was held on Tuesday, July 10th, 1900, in the Westminster Hall Grand Committee Room, at the House of Commons, Westminster, S.W.

There were present Mr. Victor C. W. Cavendish, M.P. (Chairman for 1900), in the Chair, Mr. J. Grant Lawson, M.P. (Vice-Chairman for 1900), and the following members:—

Representing the Central Chamber:—Mr. B. St. John Ackers, Mr. F. A. Channing, M.P., Mr. A. F. Jeffreys, M.P., Mr. W. Lipscomb, Mr. R. Jasper More, M.P., Mr. Clare Sewell Read, Mr. Jame Round, M.P., Mr. H. Stopes, and Mr. Ernest H. Godfrey (Secretary).

Representing Associated Chambers:—Mr. Henry Campion and Mr. H. Trustram Eve (Bedfordshire), Professor James Long (British Dairy Farmers' Association), Mr. W. W. Berry (Canterbury Farmers' Club), Mr. C. B. Davies (Cheshire), Mr. Joseph Beecroft (Chester Farmers' Club), Mr. C. Middleton (Cleveland), the Right Hon. James Lowther, M.P., and Colonel W. H. Wilson-Todd, M.P. (Darlington), Mr. T. Latham (Farmers' Club), Mr. A. Amos (Kent Federation), Mr. E. T. Learner (Norfolk), Mr. W. Fitzherbert-Brockholes (North Lancashire Farmers' Association), Mr. J. Bowen-Jones and Mr. Fred. Horne (Shropshire), Mr. J. T. Wilson (Stockton-on-Tees), Mr. Herman Biddell (East Suffolk), Mr. S. Kidner (Taunton Farmers' Club), Mr. F. Austen (Tunbridge Wells Farmers' Club), Mr. F. E. Muntz (Warwickshire), Mr. C. M. S. Pilkington (West Riding), Mr. M. D'Arcy Wyvill, M.P. (Wharfedale), Mr. T. Davies (Wirral Farmers' Club), Lord Herries and Mr. John Newton (Yorkshire Union of Agricultural Clubs).

Members of the Central Chamber:—Mr. F. S. W. Cornwallis, M.P., Sir John E. Dorington, Bart., M.P., Mr. A. Griffith-Boscawen, M.P., Mr. Laurence Hardy, M.P., the Right Hon. Sir John H. Kennaway, Bart., M.P., Colonel W. Kenyon-Slaney, M.P., Mr. Stanley Leighton, M.P., Mr. H. Y. B. Lopes, M.P., Mr. A. K. Lloyd, Q.C., M.P., Mr. G. Herbert Morrell, M.P., Mr. W. G. Mount, M.P., Mr. Herbert Samuel, and Sir Charles G. E. Welby, Bart., C.B., M.P.

There were also present from the Scottish Chamber of Agriculture, Mr. J. Biggar, Mr. Alexander Cross, M.P., and Mr. Andrew Hutcheson.

Election of New Members.

The following were elected members of the Central Chamber:—

DICKINSON, R. E., M.P., Combe Cottage, Lyncombe, Bath.
SANDYS, Col. T. Myles, M.P., Graythwaite Hall, Ulverston.
WARNER, T. Courtney T., M.P., Highams, Woodford Green, Essex.
WELBY, Sir Charles G. E., Bart., C.B., M.P., Denton Manor, Grantham.

Agricultural Holdings Bill.

The CHAIRMAN, in opening the proceedings, said he hoped that the Council would excuse him for not having arranged to hold the meeting at an earlier date. He had been surprised that the proceedings on the Bill in the Grand Committee had terminated so rapidly. He had been under the expectation that those proceedings would have lasted a day or two longer, and consequently he had delayed giving the necessary notice. He had seen no reason to alter the rule which required that a certain number of days' notice should be given before a meeting was held; and consequently it turned out that the meeting had been summoned for the day on which the Bill would come on for consideration by the House of Commons. He hoped that members would bear in mind, in any observations which they might have to address to the Council, the important fact that what they did that day would have to be put before the Members of the House of Commons in a very short time, as the Bill would so soon come on for consideration.

Mr. JAMES LOWTHER, M.P. (Darlington), said that, before they proceeded with the business, he should like to submit a matter which he thought ought to be considered. He was not going to throw any blame upon those persons who convened the meeting, but it happened that the first order that day in the House of Commons was the Agricultural Holdings Bill. Members of the House of Commons resembled other mortals in being unable to be in two places at one time. Mr. Speaker took the chair at three o'clock, and questions would begin at half-past three. The question list was shorter than usual, and before the present meeting had proceeded far those Members of the House of Commons who were at the meeting, and who intended to take part in the Agricultural Holdings Bill, would have to withdraw from the room and go to their places in Parliament. He would, therefore, suggest whether it would not be convenient to adjourn the present meeting.

Mr. CHANNING, M.P., differed from what had fallen from his Right Honourable friend. He thought that it would be rather unfortunate if they did not express some brief opinions on the Bill, so that the hands of Members of Parliament might be strengthened in dealing with the matter. Perhaps he might draw special attention to the first subsection of the second clause. He had understood from Mr. Walter Long that some concession might be made by Her Majesty's Government with regard to the provision which enabled a landlord to contract himself completely out of the Act. It seemed to him that the agreements which were mentioned there, and which, if they existed with regard to any holding, would at once and forthwith supersede the arbitration provided for by the Act, left no right either to landlord or tenant, unless they cancelled the agreement, of going under the Act. It seemed to him that that was prejudicial, and, in fact, practically destroyed the whole value of the Agricultural Holdings Act. He hoped that that view would receive some support in the meeting. Further, it seemed to him that, whether they secured compensation for permanent pasture or not, there certainly should be some protection of the rights of the tenant who had laid down permanent pasture himself at his own risk without consent, and that, if he did not receive compensation, he should still retain his property rights in that pasture, and be able to plough it up if he saw fit. He had some doubt whether that right was protected by the Bill as it stood. A third point to which he would draw attention was with regard to the setting off of manures against crops sold off. It seemed to him that the clause on the subject left it in the power of a landlord or an agent to introduce such agreements and such covenants into leases as would practically nullify the Act. And that was also the opinion of the Scottish Chamber of Agriculture. In these respects the Chamber would be wise in expressing an opinion with regard to the amendment of the Bill.

The CHAIRMAN said that he did not understand Mr. Lowther to have made any motion with regard to adjournment.

Mr. LOWTHER said that he was in the hands of the meeting. He rather wanted to gather what the feeling was. What he desired to impress upon the meeting was that any Members of Parliament who wanted to take part in the discussion in the House must leave that meeting within a few minutes. He submitted that they would be acting more in accordance with the convenience of the Chamber, and also better further their own cause, if they adjourned. He would move that the meeting be adjourned.

Mr. HARDY, M.P., formally seconded the motion on the ground that he had a certain amount of knowledge of the debatable points moved in the Grand Committee, because he was Chairman of that Committee, and had therefore had every amendment under his notice. Judging from what he had listened to in the Grand Committee, he must confess that he did not think that it would be practically possible at a large meeting like that to arrive at a conclusion upon the various points in the very short time that it was possible for Members of Parliament to give to the matter that afternoon. He thought that it would not be advisable to have a hurried discussion, and, therefore, although he admitted that it would be a very great inconvenience to many gentlemen who had come up from the country to attend the meeting, he felt that it would be better to adjourn.

Mr. JEFFREYS, M.P., pointed out that unless they held the meeting then, and came very quickly to a decision the Bill would be passed. The House was going to sit all day on the Bill until twelve o'clock, and then go on to-morrow or the next day. If the meeting adjourned, not only would Members be troubled to come up to London again, but the door would be shut against their proposals. He thought that the best thing that they could do was to go on as quickly as possible. He was sure that Members would not make long speeches.

Mr. GRANT LAWSON, M.P., wished to make a practical suggestion. Every Member of Parliament in the room knew that there was only one point upon which there would be a close division, and that was as to whether the arbitrator should be required to give particulars as he did under Section 19 of the original Act. Why should they not discuss that one point? He should like to hear it dealt with.

Mr. LIPSCOMB said that the Chamber had been working on this subject for six years, and they were unchanged in their opinion as to what they ought to ask. They only regretted that more of their modest suggestions had not been adopted in the Bill. With regard to the point which had just been brought before them, they were universally of opinion that for the sake both of landlord and of tenant the arbitrator should give particulars of his award. There was no difference of opinion. The objection had come from the valuers themselves. He did not hesitate to say that neither landlord nor tenant differed from the view of the Chamber as to the justice of requiring that particulars should be given. As to the question of adjournment, if they did not deal with the matter that day and the Bill was passed, where would they be? He wished to make one suggestion, and that was that the landlord's time for making his claim should be limited. That was [illegible]. He would therefore propose that the words "within seven days [illegible] arbitration being commenced [illegible]" "within seven days after the appointment of the arbitrator."

The CHAIRMAN thought [illegible] to dispose of the question [illegible] adjourn before entering into points which were to be [illegible] under the Bill.

Mr. LIPSCOMB suggested that if an adjournment should take place it should be only to the next morning. Members had come up specially from the country to attend the meeting.

The CHAIRMAN then put the motion for adjournment, and it was negatived by a large majority.

The SECRETARY reported the receipt of communications relating to the Agricultural Holdings Bill from the Bedfordshire, Cheshire, East Kent, and Scottish Chambers of Agriculture.

Mr. LIPSCOMB, as Chairman of the Agricultural Holdings Act Committee, who had met that afternoon, said that the proposal of the Grand Committee was that the landlord's claim should be sent in not later than seven days from the commencement of the arbitration. What he wanted to propose was that the claim should be sent in not later than seven days after the appointment of the arbitrator. As they were aware, the arbitrator might delay the commencement of the arbitration for a long time after his appointment. The unanimous desire of the Central Chamber and of the whole of the tenant farmers was that the landlord should not have a long time for the preparation of his claim, but that would be inconsistent with the proposal of the Grand Committee. No arbitrator that he had known of had ever done anything within seven days after his appointment. It was the unanimous feeling of the Committee which had been sitting before the meeting assembled that the time for the sending in of the claim should be limited to seven days after the appointment of the arbitrator. With regard to temporary pasture, the question had arisen, Would temporary pasture come under the title of permanent pasture? His own view was that the operation of the schedule would give the title either to one or to the other. The fact of the consent of the landlord having been obtained would make the pasture permanent pasture; and the fact of a tenant having only given notice would make the pasture temporary, so that the tenant would have at any time a right to plough it up.

Mr. MIDDLETON (Cleveland) said that they were all very glad that Mr. Jeffreys had carried the amendment with regard to compensation for two years' and older seeds; but it seemed to him a great pity that that provision should not be made retrospective, because there were many pastures which were of very considerable value, and it seemed a great pity that the tenant should plough up such pastures because he was not compensated for them. That would very much defeat the object for which the clause was added to the Bill. Therefore he should be very glad if Members of the House would give that point due attention, and endeavour to have the clause altered if necessary.

Mr. CLARE SEWELL READ moved that the clause which gave compensation for two years' and older seeds be made retrospective. He said that a great many of the things in the schedule were retrospective and must be so. The Act would apply to manures already used. He should think that a very small addition would be sufficient to carry out what he had proposed. Landlords need not be afraid of the alteration. The incoming tenant would have to pay the compensation.

Mr. KIDNER (Taunton Farmers' Club) seconded the motion.

Mr. JEFFREYS, M.P., said that if the meeting decided that the provision should be retrospective the words which Mr. Clare Sewell Read had suggested would be sufficient. The Attorney-General would have to put them in the right place. The Government had accepted the clause "laying down temporary pasture with clover, grass, lucerne, sainfoin, or other seeds." It was a very wide clause, and would take in all temporary pastures, and he thought that it would be very useful to tenant farmers. If the Council wished it to be made retrospective they could easily ask the Attorney-General either to amend Clause 8 or to amend the paragraph in the schedule so that the effect would be retrospective.

Lord HERRIES (Yorkshire Union) was of opinion that if the clause was to be made retrospective it ought to be limited to a certain number of years. There might be a difference of opinion as to the number, but he should not object to three years or five years. If it was to be unlimited he certainly thought that there would be a great objection to it.

Mr. GRANT LAWSON, M.P., said that as a matter of drafting an amendment should be made in Clause 8 so that the compensation with regard to temporary pasture should be retrospective. He suggested that the words "except with regard to the laying down of temporary pasture" be inserted after [illegible] this Act had not been passed.

The CHAIRMAN: Do you accept that, Mr. Read?

Mr. CLARE SEWELL READ: Yes.

It was then formally resolved [illegible] (28) in Part III. of the first schedule with regard to temporary pasture be made retrospective."

Mr. JEFFREYS said that as to the proposed amendment with regard to temporary pasture he

would take care to represent their wishes with regard to the operation of Clause 8.

Mr. LIPSCOMB moved: "That the landlord's notice in Clause 2 be seven days from the appointment of the arbitrator instead of from the commencement of the arbitration."

Mr. AMOS (Kent Federation) seconded the motion, and it was carried.

Mr. LIPSCOMB moved: "That particulars should be given of the award, as in Clause 19 of the Act of 1883, which is repealed in the Bill."

Mr. LATHAM (Farmers' Club) seconded the motion.

Mr. GRANT LAWSON, M.P., thought it was only fair to put Mr. Long's view before the meeting without saying whether he agreed with it or not. Mr. Long's view was that the more particulars that were given, the more rows there would be, and he was anxious to avoid such rows between landlords and tenants. He was supported in his view by Sir Edward Carson, the Solicitor General. It was thought that the fact of valuers giving particulars caused rows over small portions of the award. Mr. Long also said that when an arbitrator had to fix a price for taking land for public improvements he never gave particulars, but always gave a lump sum. The fact that arbitrators did not give particulars was strongly urged upon him (Mr. Grant Lawson) when he was in Yorkshire last week. He thought that it was only fair to point out these facts to the Chamber. Another consideration was that there were no appeals from the arbitrator on matters of fact, whether the parties were satisfied or not. He would therefore ask the Council to very seriously consider the question which had been raised as to giving particulars. If particulars had to be given of every single item, the work of the arbitrator would be increased enormously. Mr. Renshaw had suggested that the arbitrator might be asked to give particulars as to the part of the schedule which he went upon. He (Mr. Grant Lawson) was afraid that if they went straight for retaining the old 19th section, Mr. Long would oppose them with all the force of the Government upon that point.

Mr. KIDNER (Taunton Farmers' Club) said that, if rows had not arisen under the old 19th section, why should there be a danger of rows occurring in future in consequence of an arbitrator being asked to give particulars? There was an old saying that those who paid the piper should have a chance of calling the tune. He thought that the parties were entitled to know the items as to which an award was given. There was a strong feeling in his part of the country that particulars should be obtained from the arbitrator.

Mr. LOYD, Q.C., M.P., thought the object of the valuation was to ascertain what was a fair sum to represent the advantage which one man got from the other of having his premises left with certain benefits conferred upon them, and also what was a fair sum to award by way of compensation for deterioration. He did not believe that a valuer had any desire to cheat the parties, or to get away from fair dealing when he declined to specify items, such as £30 in one place and £60 in another, and £75 somewhere else. But when the valuer arrived at the final sum he knew that, if he mentioned the amount of a particular item in his award, fifty valuers might be called to say that it was not a proper sum. It seemed to him that the whole thing turned upon whether they were going to have valuers in whom they had confidence. The parties must take care not to appoint any man who, they thought, would either negligently throw over their interests or come to his work with a bias either towards the landlord or towards the tenant. Having gone into the matter very carefully, he did not think that they would get valuers to undertake the job if they were to give particulars so that their figures could be overhauled, as they could be, by any other valuer. It ought to be remembered that the Bill did not say that the valuers should not give particulars.

Lord HERRIES (Yorkshire Union) thought that the one argument which had been made use of was a strong argument in favour of the Act as it stood. It appeared that the 19th section was not operative, and that valuers did not put down particulars. If that was the case under the last Act, he did not know why it should not be the case under the present Bill. He knew that in his own case he had on several occasions gone to the valuers and had asked them to give particulars, so that he might take part of the expense upon himself, while the tenant paid the other part. He had gone to the valuers and asked them how much such and such an improvement had been put at, and the result was that they had given particulars. Under such circumstances it would be a very great advantage both to landlord and tenant that they should know how much they had to pay for each improvement. That had been the case hitherto, and it had worked very well in the past, and he did not see why it should not work well in the future.

Professor LONG (British Dairy Farmers' Association) said that he had only had one instance in his life of figures being given to him upon a valuation, and that was an unfortunate case. The valuers on his side and those on the other side were most excellent men whom anyone would trust, and they were known throughout the entire country, and he was enab'ed to get from his valuer the details of the valuation as a personal favour. The first thing he found was that a rather large sum in his favour was entirely omitted in consequence of some carelessness in the valuer's office. He would not say that that was at all a common case, but it showed that they had a moral right, as any business men had, to see the figures and check them.

Mr. AUSTEN (Tunbridge Wells Farmers' Club) pointed out that they should make the valuation as inexpensive as they possibly could. He spoke from a valuer's point of view. Valuers, at the particular time when claims were made, were particularly busy, and there was a great deal of extra routine office work to be done. To give particulars of all the items would be a work of much time and expense. If the parties put the matter into the hands of an arbitrator, surely they ought to be able to trust him to do what was right without requiring him to do the extra work which giving particulars would cause.

The CHAIRMAN then put the motion, and it was carried by a large majority.

Mr. HUTCHESON (Scottish Chamber) proposed that in Clause 1, sub-section 4, the words "the usage of good husbandry" be inserted instead of "the contract of tenancy." He thought that the present Bill was very much better than the original Bill, but at the same time his Chamber had a distinct objection to the sub-section as it stood. At present it read: "In the ascertainment of the amount of the compensation payable to a tenant in respect of manures as defined by this Act, there shall be taken into account the value of the manure required by the contract of tenancy or by custom." Putting such clauses into an agreement or into a lease as would make a tenant return so much manure to the land would render the Bill nugatory. There was another great objection which the Scottish Chamber had. Either the incoming tenant took the crop at a valuation, or the tenant sold it under the hammer. If they had to give compensation as proposed in this Bill, their last state would be infinitely worse than their first. The proposal would not suit agriculture in Scotland, where land was held under leases. He could quite understand that in England, where land was held in yearly tenancies, there might not be such a great objection. The Scottish Chamber would like an alteration made such as he had proposed. They did not want to cheat landlords, but they did not want to have to do more than had been the custom in the past. They did not want to be outwitted, so to speak. If the clause was carried as it at present stood in the Bill and the words "contract of tenancy" were put in, the Bill would be worse than useless, and instead of being a benefit to the tenants, it would be the very reverse.

Mr. WILSON (Stockton-on-Tees) moved and Mr. AMOS (Kent Federation) seconded a resolution that the words "the usage of good husbandry" be inserted in clause 1, sub-section 4, as proposed by Mr. Hutcheson.

Mr. GRANT LAWSON, M.P., said that Mr. Hutcheson had remarked that Scottish farmers did not want to be dragged into doing more than they had been accustomed to do. He assumed, however, that Scottish farmers had been in the habit of carrying out their contracts, and all that the sub-section said was that they should carry out their contracts. As a matter of fact, the Bill did not give the landlord anything extra beyond what the law gave him already. A landlord could now recover in the ordinary course of law for breach of contract.

Mr. HUTCHESON said that if the words "the usage of good husbandry" were inserted as he proposed, his objection would be met.

Mr. JASPER MORE, M.P., wished to ask whether the gentleman from Scotland was so weak as to sign an objectionable agreement?

Mr. HUTCHESON said that personally he was not. He would rather want land than do so.

Mr. JASPER MORE: Do shrewd Scotchmen sign such agreements?

Mr. HUTCHESON said that in Scotland there was such a demand for farms that he believed they would do so.

Mr. AMOS (Kent Federation) said that when a man was already in his tenancy he could be made to sign almost anything for the sake of the money which he had invested in his farm.

The CHAIRMAN then put the resolution, and it was immediately negatived.

Mr. CLARE SEWELL READ greatly regretted that the Committee in the House of Commons had not seen fit to carry out the recommendation that when there was a valuation between landlord and tenant at the expiration of the tenancy some statement should be made of the condition of the holding. He could not comprehend how landlords could object to this. They said: "We do not wish to put a new burden and a new expense upon the tenants." He apprehended that it was for the express purpose of benefit to the landlord that the statement should be made. The worst farmer in the world would not acknowledge that he was a bad farmer; and he never knew a man who, on leaving a farm, did not say that, when he went into it, it was in a bad condition; and he never knew a man who left a farm who did not say that, when he left it, it was not in a better condition than when he went into it. At present there was no chance of contradicting the wild statements that were made, or of proving the truth. But if a statement was made by two independent men as to the condition of the holding when it changed hands, that would be a very substantial feature as to the compensation that was to be paid when the farm was given up. It was said that there would be an additional expense to the poor tenant. But what would the expense be? He was sure that valuers would say that they had to go all over a farm in order to see the roots and seeds. What extra trouble would it be just to cast their eyes over the stubble and see whether it was foul or clean? They were bound to ascertain the condition of the premises to decide whether the tenant had carried out his agreement. What extra trouble or expense would it be for a valuer to say in what condition the premises were at the expiration of the tenancy? He was very sorry indeed that in the division which took place on Mr. Channing's amendment only eight members of the Committee upheld the most reasonable suggestion of the Central Chamber that a record of condition should be made.

The CHAIRMAN stated that this question had already been settled by the House of Commons, and he did not know whether it would be advisable to re-open the discussion of it. It would be practically ineffective, as far as the House of Commons was concerned.

Mr. CHANNING, M.P., asked whether he might move then, as he had to leave to go into the House of Commons, a resolution on the same lines as a resolution moved by Mr. Lipscomb, with regard to the 1st sub-section of the 2nd clause. He should like to move it in the words: "That Sub-section 1 of Clause 2 be amended so that agreements shall not supersede the arbitration procedure under the Act, if either party claims that arbitration shall be under the Act." He thought that that motion raised the point very distinctly.

Mr. KIDNER (Taunton Farmers' Club) seconded the motion.

Mr. T. DAVIES (Wirral Farmers' Club) also supported it.

Mr. GRANT LAWSON, M.P., said that this again was a question of carrying out a contract, or of whether farmers were capable of making their own contracts. There had been widely circulated a very sensible discussion which had taken place in the Bedfordshire Chamber upon this point. It was there said that all sorts of contracts would be forced on tenants; but one speaker said, and he seemed to carry the meeting with him, "Because some silly fool wanted to be protected, are all reasonable men to be deprived of the power to make contracts?" This was not a question of a man being able to contract himself out of the benefits of the Act. The only thing which he could contract himself out of was the particular method of arbitration to be employed.

Mr. MIDDLETON (Cleveland) said there were some scales of compensation drawn up perhaps 20 years ago, or before the passing of the Act of 1883.

Mr. CHANNING said that he referred to a totally different point from that. His resolution was entirely as to the form of arbitration. The form of the clause kept it open for an agreement to prescribe the actual way in which the whole arbitration should be carried out, and, in fact, to name the arbitrator.

Mr. AMOS (Kent Federation) said that when a man was in a tenancy a landlord could force him to sign almost anything he liked, and that was why some of the contracts were not reasonable. He took a farm, the landlord of which soon died, and different people came in. The new owners said that they would have their own agreements. It was a question of sign or go, and when it was a question of a thousand pounds to a tenant they knew what the tenant would do.

Mr. WILSON (Stockton-on-Tees) supported the motion.

Mr AUSTEN (Tunbridge Wells Farmers' Club) said that it must surely be best for the tenant himself to make arrangements with the landlord that he should be paid for certain things which came under the Act.

Mr. C. B. DAVIES (Cheshire) pointed out that Section 55 of the old Act was not repealed.

On a show of hands the motion was negatived by twelve votes to seven.

Mr. C. B. DAVIES (Cheshire) said that his Chamber had been considering the alterations made in the Bill, and, although they felt indebted to the Central Chamber for having proposed an Act which would be of some value to them, they observed that there was one point in the procedure which had not been dealt with by the Committee. It was a point passed in 1894, and his Chamber were particularly anxious that it should be brought under the notice of the Government. They wanted a stronger line with regard to the appointment of the arbitrator and the umpire under the Act. They wanted to have them appointed out of a list prescribed by the County Councils in the different counties in England. They thought that a local man would have a far better idea of the methods and customs in the particular county in which the arbitration took place than any stranger would have, and they were very anxious that as the Central Chamber had laboured so successfully to carry certain points, and did in 1894 pass a resolution that all umpires should be selected by County Councils in

the first place, and that the Board of Agriculture should nominate one out of the County Council list, that plan should be adhered to. He appealed to the Central Chamber to stick to their guns and ask Parliament to carry out the method which the Chamber had suggested. It seemed to him a very important point, especially from the experience which he had had in the county of Cheshire with respect to arbitration. In two or three cases that had occurred they had had strangers sent from other counties. They had been ordered by the Board of Trade to come and take arbitrations in Cheshire. What his Chamber wanted was that the arbitrators should be local men who thoroughly understood the local customs and the local methods of farming. He had been sent by his Chamber to express that view to the meeting to-day. He asked most earnestly that the Central Chamber, even if they did not go so far as his Chamber, and say that a clause should be inserted, would at least ask Parliament that an instruction be given by which somehow or other a list of suitable men should be nominated by the County Council in each county, and that the Board of Agriculture should be asked to nominate umpires and arbitrators from that list.

Mr. Beecroft (Chester Farmers' Club) supported the motion.

Mr. Lipscomb said that this was one of the recommendations which had not been accepted by the Government. It would be remembered that the recommendations of the Committee of the Central Chamber were that the County Councils should make a list and that the arbitrators should be nominated from the list by the Board of Agriculture, but that method of appointment was declined by Mr. Long. It was one of the many recommendations that had not been acted upon.

Mr. Clare Sewell Read said that if the Government did not accept the recommendation that was no reason why the Central Chamber should not stick to their guns. When he was on the Norfolk County Council they had a list of arbitrators, and he did not see why there should not be a list drawn up of what they considered to be the best arbitrators in the county.

The Chairman said that he should be sorry if the resolution was pressed. He thought that it was well to give the Board of Agriculture a wide hand to get the best men they could. He thought that pressure could be exercised upon the Board of Agriculture if they did not appoint proper arbitrators, but it would be a very great misfortune to tie the Board of Agriculture down to comparatively limited numbers, which there were bound to be if a resolution of this sort was acted upon. His part of the country was a remote corner of Lancashire, and if they were obliged to have arbitrators residing in the county of Lancashire they would lose the very great assistance which they had now from gentlemen around in Cumberland and Westmorland, who knew the country much better perhaps than persons residing in Lancashire. It was only by some wide area being taken in that they would be able to get the best men possible. He thought that they could fairly trust the Board of Agriculture to appoint the best men. If they failed to do that the question could always be raised in Committee of Supply.

Mr. Ackers did not question that the advice of the Chairman might be right, but the Committee desired not that the arbitrators should be confined to the county, but that they should be persons who had been approved by the County Council.

Mr. Grant Lawson, M.P., said that it was a bit out of the way of County Council work to appoint arbitrators. Some County Councils were not made up of farmers at all. In Durham the bulk of them consisted of mineowners. In some counties there was a very great suspicion of the County Councils among farmers.

On the motion of Mr. C. B. Davies (Cheshire), seconded by Mr. Latham (Farmers' Club), it was then resolved by thirteen votes to five: "That the Council desire to press their Recommendation of 1894, that the arbitrators appointed by the Board of Agriculture should be selected from lists prepared by the County Council of each county."

Mr. H. T. Eve (Bedfordshire) said that there was one question which he was surprised that the meeting had passed over without amendment, and that was the provision of a single arbitrator. There was a good deal of feeling about the country on the subject of the single arbitrator, and he thought that the Chamber should express its opinion. It was something very new and startling in the law of arbitration to make a single arbitrator compulsory at the wish of one party against the wish of the other. It was not so in the Arbitration Act of 1889, which was a very favourite Act with the lawyers, and had worked very well. Under that Act a single arbitrator could act if both parties agreed, but he could not see why a landlord or a tenant should have the right otherwise of appointing a single arbitrator to settle the whole business. He moved: "That clause 2 subsection (3), together with subsection (5) and the first rule of the second schedule, be so altered that the compulsory appointment of a single arbitrator be made impossible unless both parties are agreeable."

Mr. Austen (Tunbridge Wells Farmers' Club) seconded the motion.

Mr. Lipscomb said that it had never entered the minds of the Committee that it should be in the power of either of the two parties to make one arbitrator compulsory. If they both agreed that there should be only one arbitrator well and good, but to force one party to accept the nominee of the other did not seem to be according to usage or fair play.

Mr. Kidner (Taunton Farmers' Club) thought that the great object of the motion which Mr. Channing made just now was that either the landlord or the tenant should be able to make use of the arbitration clause of the Act and agree to arbitration. It was not suggested that a tenant should be able to call in an arbitrator and that the landlord should have no voice in the matter, but that, if they agreed to one, the Board of Agriculture should appoint one. He thought that that was the very best mode of proceeding. It would be open for them to have advocates on either side. So far as experience had gone in England the arbitrators were advocates and nothing else. A point to be considered was that a tenant might be capable of assessing his own claim, and yet he would be precluded under the old Act from acting for himself. There was no reason why he should not act for himself, as he could in a court of law. Three times out of four it always came to a third man to settle the questions.

Mr. C. B. Davies (Cheshire) held very strong views on this point. It seemed to him that under the new procedure tenant-farmers would be very much worse off than they were under the old Act. The old Act provided that each party to the dispute should have the power to appoint a referee, and the two referees could appoint an umpire, or, failing that, the Board of Agriculture should do so. But Part I. of the Second Schedule of the Bill said, "A person agreed upon between the parties, or in default of agreement, nominated by the Board of Agriculture on the application in writing of either of the parties, shall be appointed arbitrator." It was well known that before the parties came to this point they were in dispute with one another, and they would never agree to an arbitrator, and he believed that every case would come before the Board of Agriculture for an arbitrator to be appointed. In the case of a widow who had to leave her farm, it would be a difficult matter for the widow to explain to any umpire the circumstances of her case, and she would have to appoint some one to do it for her, and though some persons thought that this would be a cheap proceeding, he was inclined to think otherwise. He supported the view that they should still have power as Englishmen to appoint referees on both sides.

The resolution was adopted.

Professor Long (British Dairy Farmers' Association), in raising a question as to the consumption of corn by horses, condemned the Bill generally, and said that it was not what the farmers of England required. He moved: "That the words 'other than those regularly employed on the holding' be omitted from Subsection (27) of Part III. of the First Schedule." He asked why the horses on a farm, consuming corn as they did, should not be included in clause 27 instead of being excluded?

Mr. Horne (Shropshire) seconded the motion. He held that the manure from corn consumed by horses employed on the holding was certainly valuable, and quite as valuable as that from cows. It ought to be treated as an asset.

Mr. C. B. Davies (Cheshire) said that in the Bill as amended by the Committee horses were included, but in any cases the word "cattle" had been decided in the law courts as including horses. There was a case on the point. In his experience horses had never been excluded. Horses employed on the holding were included in clause 27 in the word "cattle."

Mr. Kidner (Taunton Farmers' Club) asked for the alteration of the clause on the ground that the words formed a trap for the unwary. Farmers would certainly purchase the corn for their horses in the last year. He thought that it would be found that a great many unwary farmers had overlooked the matter in the last year of their tenancy, and that they had been tricked out of compensation to which they would have been justly entitled. The clause showed a half-hearted way of putting matters. When the Bill had gone so far as clause 26 there could be no reason for putting in clause 27 in the form in which it appeared.

The resolution was adopted.

Mr. Clare Sewell Read said that he had been requested by a great number of gentlemen round him to test the opinion of the Chamber with regard to what he suggested at an earlier part of the meeting, namely, the keeping of a record of the state of the holding. He did not wish to force his own views upon them, but there were many of opinion that such a record ought to be provided for in an Agricultural Holdings Act.

Mr. Ackers seconded the proposal. This was a matter which had been unanimously passed over and over again by Chamber after Chamber and by the Central Chamber and its Committees. He did not think that they had ever had a serious division upon it. He would put a simple instance. Suppose that at the present time there was no record, and that a new valuer came who had never seen the place before. What would he know of the condition in which the farm was found when the tenant entered it? If, on the other hand, there had been a record, it would be fair to the tenant and fair to the landlord and fair all round. He earnestly hoped that whether the provision for a record was passed this session or not it would be one of those things which would be kept in view and which would eventually command assent to the Legislature.

Mr. Jasper More, M.P., asked whether the proposer had any idea of what the expense would be? The object of the Bill was to reduce expense. He had tried to discover what would be the ordinary expense of an arbitration, and he had been told that it would be £20. Could any one say what would be the probable expense of making a record?

Mr. Ackers thought it would be confined simply to the clerical work required, because if a valuer or an arbitrator did his work properly he would have all the particulars by him.

Mr. Austen (Tunbridge Wells Farmers' Club) considered that in the case of two tenant-farmers, an outgoing tenant and an incoming tenant, they themselves would never agree upon a record of the holding, and in all probability their valuers might not agree. Who was to prepare the record? A voice: "The arbitrator." That again would occasion more expense. He quite agreed with the proposal in theory, but it would be almost unworkable in practice. The valuer would have to go round every field and look at every ditch and every watercourse.

Mr. Clare Sewell Read: So he ought.

Mr. Austen said that if the valuer had a difficulty in making a record of the holding he would have still more difficulty in finding another valuer to agree with him. The whole thing was admirable in theory but unworkable.

Mr. T. Davies (Wirral Farmers' Club) supported the motion.

Mr. Kidner (Taunton Farmers' Club) said that he should like to make one remark as to the difficulty which had been raised by Mr. Austen. Having acted in the capacity of valuer sometimes he had been somewhat astonished to hear that it was a valuer's duty to go round and look at every ditch. That was not the way in which the matter was done in his part of the country, though he had acted with a co-valuer who had asked him to put down some small sum for every gap in a fence. Of course, the condition of every hedge and ditch and every field should be taken notice of, and when it had been taken notice of it would be a very little difficulty to record it.

It was then formally resolved, on the motion of Mr. Clare Sewell Read, seconded by Mr. Ackers: "That effect should be given to the Committee's recommendation of 1894 as to a record of the condition of the holding."

On the motion of Mr. Wilson (Stockton-on-Tees), seconded by Mr. Lipscomb, it was also resolved: "That the Council support Mr. Jeffreys' amendment to insert the words 'not later than two months' after the word 'month' in No. 10 of Part I. of Schedule II."

Subject to the operation of Bye-law 12, it was arranged that the resolutions adopted should be immediately communicated to the President of the Board of Agriculture as well as to the Prime Minister and the First Lord of the Treasury.

On the motion of Mr. Lipscomb, seconded by Mr. Latham (Farmers' Club), a cordial vote of thanks was passed to Mr. Cavendish for presiding and for securing the room for the purpose of the Special Meeting.

The proceedings then terminated.

Hereford Herd Book.

The annual meeting of the Hereford Herd Book Society was held on Wednesday, Mr. H. F. Russell (vice-president) presiding, in the absence of Sir James Rankin, M.P. (president). The Council reported that Volume 30 contained entries of 606 bulls and 2,670 cows, against which entries received for Volume 31 were 717 bulls and 3,107 cows. There had also been an increase in export entries, the number being 188, against 136 for the previous year. Of these 105 were for South America, 73 for the United States, four for Russia, three for Canada, and one each for France and Cape Colony. The accounts showed a net surplus on the year's working of £111, after making allowance of £53 for depreciation in the value of the society's investments. There were now on the register 251 life and 162 annual members, an increase in both cases. Congratulatory speeches were made as to the position of the Hereford cattle which had sprung up in America, and on the improved condition of the society. In place of retiring members of the Council the following were elected: Lord Coventry, Mr. S. Robinson, Mr. A. Rogers, Mr. J. W. Smith, Mr. W. Tudge, Mr. H. Haywood, Mr. R. W. Hall, and Mr. A. H. Morris Dewsall.

A special meeting of the members of the Scottish Chamber of Agriculture will be held in the Pavilion in the Highland Society's Show-ground, at Stirling, on Wednesday next, 18th inst., at 3 p.m. The business for consideration is the Agricultural Holdings Bill.

LETTER TO THE EDITOR.

The Income-Tax Puzzle.

Sir,—The correct rate at which income-tax should be deducted from income paid after April 5th has given rise to so large an amount of correspondence in the Press, and is of interest to so great a number of newspaper readers, that perhaps a short explanation from ourselves may be of value to your readers, as it will enable them to ascertain whether the rate at which income-tax has been deducted from their income is correct.

The simple rule to bear in mind is this: If the interest, rent, or dividend is paid out of revenue which has been assessed to income-tax at its source, as, for example, lands and house property in the United Kingdom, profits of businesses carried on in the United Kingdom, or by companies having their registered offices in the United Kingdom (although the profits may be earned abroad), then the correct rate is 8d. in the pound for that portion of such income which had accrued up to April 5th and 1s. in the pound for the portion accruing after that date. Income from any source not paid out of revenue so taxed at its source, as, for instance, interest and dividends on foreign bonds, foreign railways, etc., is chargeable under Schedule C of the Income-Tax Acts, under which schedule tax is payable upon the amount of the income at the rate current at the date the same is paid. Interest on municipal loans, although charged under Schedule D., paid wholly or partially out of rates or other sources not already charged to income-tax, is also liable to assessment at the rate of income-tax current at the date such interest is actually paid.—Yours faithfully,

THE INCOME-TAX ADJUSTMENT AGENCY, LIMITED,
W. J. ANDREWS, Secretary.
12 and 13, Poultry, E.C.

Railway Passengers' Luggage.

The Great Eastern Railway Company has been the first among the leading railways of Great Britain to realise the unfairness of recent exactions for excess luggage, and has decided to extend the limit. In future on the Great Eastern line first-class passengers will be allowed 150lb., instead of 120lb., as hitherto; second-class passengers 120lb., instead of 100lb.; and third-class passengers 100lb., instead of only 60lb. First-class passengers thus get an increased allowance of 30lb., second-class of 20lb., and third-class of 40lb.

This alteration will not apply to Continental travellers, in whose case the company are bound by the regulations of the Continental railways.

The Great Central Railway directors have issued a similar notification.

The concession will be welcomed by all who travel on these lines, and it ought to be immediately followed by similar concessions on other lines.

These alterations are made, in spite of the fact that the companies' Parliamentary powers entitle them to hold to the charges recently enforced.

The Midland Railway Company also announce that on the amount of luggage which passengers travelling between stations on the Midland Railway will be allowed to carry free of charge, will be increased to: First class, 150lb., and third class, 100lb. Excess luggage beyond the above weights will be charged for on the advertised scale hitherto in operation, but no excess charge will be made unless amounting to 6d. or upwards. It may be added that facilities for the collection, conveyance in advance, and delivery of passengers' luggage at 1s. per package will remain in operation on the Midland Railway. Conditions and further particulars may be obtained on application to the Company.

Watery Milk.—W. Sanders, farmer, of Packington Nook, Ashby-de-la-Zouch, was summoned at the Clerkenwell Police Court, on Friday, by the St. Pancras Vestry for selling milk containing 31 per cent. of added water. Mr. Ricketts prosecuted, and Mr. Symons defended. The milk in question was sampled by Inspector Augar, on June 8, on the milk platform of the Midland Railway, Phœnix Street, Somers Town, and was certified by the analyst to be adulterated by the addition of 31 per cent. of water. Another sample taken on the following day was adulterated with 18 per cent. of added water. The defence set up was a total denial of the offence alleged, Sanders swearing that he himself milked the cows which gave this milk, and delivered the consignment to the railway company without in any way tampering with it. Mr. Symons contended that the analyst arrived at this conclusion simply because there was an absence of non-fatty solids, and no account was taken of the poorness of the grass upon which the cows were fed. It simply meant that the milk was of a poor quality, and no more. The Board of Agriculture were trying to fix a milk standard, and very difficult was their task. Mr. Bros said he accepted the statement that the defendant himself did not water the milk, but it arrived watered, and he was responsible for it. He imposed a total fine of £15.

IN PARLIAMENT.

House of Commons.

The Agricultural Holdings Bill.

The Agricultural Holdings Bill, as amended by the Standing Committee, was further considered on Tuesday.

Mr. Channing moved a clause providing that the tenant should be compensated for disturbance in cases where he had not been compelled to leave for non-payment of rent, or had not persisted in committing or permitting waste, to the prejudice of the landlord, by the dilapidation of buildings or fences, or by the deterioration of the soil after notice from the landlord to desist from the particular waste specified in such notice.

Mr. Long hoped the House would not accept the clause, because the question involved in it had been very carefully inquired into by a Royal Commission, of which Mr. Channing was a member, and they had reported against it. If ever there was a time when such a proposal was justified, that time no longer existed.

Mr. Lloyd Morgan favoured the acceptance of the clause, which would meet the hardship imposed upon tenants turned out of their holdings owing to some petty dispute with their landlords.

The debate was continued by Mr. J. Lowther, Mr. H. Roberts, and Mr. A. Cross, the last-named hon. member asserting that cases had happened in Scotland in which the proposed clause would have acted as a deterrent.

Mr. H. Lewis believed that if the clause were passed the tenant would feel himself to be free and independent, owing no allegiance to the owner of the soil either in regard to religion or politics.

Lord Hugh Cecil expressed pleasure at hearing that the Government were unable to accept the amendment, which in principle went far beyond the limits of the Bill. The amendment introduced the principle of divided ownership.

After some remarks from Sir M. Stewart, who opposed the amendment, the House divided. For the clause, 111; against, 207; majority, 96.

Mr. Gordon moved the following clause:—That in the case of crofters or cottars in Scotland, as defined in the Crofters (Scotland) Holdings Acts, 1886, 1887, and 1888 (whose holdings are situated in parishes or counties to which these Acts do not apply), such improvements as are set forth in Part I. of the first schedule of the Act, which may have been executed or paid for by the crofter or his predecessor in the same family whilst under no written obligation to the landlord to make them, and prior to the passing of this Act, and which will add to the letting value of the holding, shall be compensated for on his leaving the holding, under the procedure provided in this Act, but for such improvements executed after the passing of this Act consent of the landlord will be required.

Mr. Long opposed the clause as too far-reaching, and said it would be impossible to apply it to a limited portion of the United Kingdom.

Mr. Buchanan said about two-thirds of the small tenants in the north-east of Scotland would be prevented under this Bill from obtaining compensation for their improvements.

General Russell asserted that the great bulk of the tenants in East Aberdeenshire were not crofters at all, and whatever improvements they effected, they were paid compensation for upon leaving their holdings.

Dr. Farquharson thought the mover of the clause had made out a strong case for a deserving class of people.

Sir W. Wedderburn also supported the small concession asked for.

Mr. Weir commented upon the ignorance displayed and admitted by the Minister for Agriculture upon Scotch matters, and said the Lord Advocate could give the House all the necessary information if he would only open his mouth. (Laughter.)

Mr. A. Cross supported the clause.

The House divided, and the figures were:—For the clause, 123; against, 196; majority, 73.

Mr. Hedderwick moved the insertion of the following clause:—"From and after the passing of this Act notice of termination of tenancy under Section 26 of the Agricultural Holdings (Scotland) Act, 1883, may be given in the same manner as a notice of removal under Section 6 of the Removal (Scotland) Act, 1886.

Mr. Long agreed to the new clause, and it was added to the Bill.

Mr. Buchanan moved an amendment to Clause 1 abolishing the limitation of improvements for which compensation may be obtained as indicated in Schedule 1 of the Bill.

Mr. Long declined to accept the amendment.

Mr. Channing supported the amendment, which was opposed by Mr. Jeffreys, who deprecated any interference with the schedules.

The House divided:—For the amendment, 91: against, 170; majority, 79.

Mr. Yoxhall moved to amend Clause 1 by inserting a provision that the tenant of a holding, being an allotment or cottage garden, shall be entitled to obtain from the landlord compensation in money for fruit trees, fruit bushes, drains, and for outbuildings, pigstyes, fowlhouses, or other structural improvement made by the tenant upon his holding to the extent of one-third of their gross value, provided always that this compensation shall not exceed ten pounds, and that the tenant shall have the right to remove such fruit trees, fruit bushes, outbuildings, pigstyes, and fowlhouses in addition to the right to the aforesaid compensation, and that if the tenancy be determined after notice given by the tenant no right to compensation in money shall exist. He stated that the improvements set forth in his amendment were often carried out without the sanction of the landlord, and in those circumstances the tenant had no right to compensation in law.

Mr. Long said under the Allotments Act every occupier holding less than two acres was entitled to compensation with respect to fruit trees and outbuildings providing he had obtained the consent of the landlord to the planting and erection of the same. The hon. gentleman suggested that that provision should be abolished, and that compensation should be given even if consent were not obtained, such compensation to be limited to £10. He further suggested that after compensation had been obtained the tenant should have the right to remove his fruit trees and outbuildings. The amendment was a remarkable one, which would not work equitably, and he could not accept it.

The House divided:—For the amendment, 76; against, 134; majority, 58.

Sir Chas. Welby moved to amend the clause by inserting a proviso that, in estimating the value of any improvement in Schedule I., there shall not be taken into account, as part of the improvement made by the tenant, what is justly due to the inherent capabilities of the soil.

Mr. Long was unable to see his way to accepting the amendment, which was supported by Earl Percy and Lord Willoughby de Eresby, but was opposed by Mr. Seale-Hayne.

Mr. John W. Phillipps hoped the Government would stand firm and resist the introduction of those words, otherwise the heart of the Bill would be taken out of it.

Mr. J. H. Johnstone strongly supported the amendment.

After remarks from Mr. Haldane, Mr. Vicary Gibbs, and Mr. Hemphill,

Mr. Bowles pointed out that the Bill was to be read in conjunction with the Act of 1883. The words in question were in the Act, and thus they would have the curious anomaly, if the advice of the Government was followed, that the words would remain in the Act of 1883 for legislative effect and they would be left out of this Bill for judicial purposes.

Colonel Pretyman opposed the amendment.

Lord Hugh Cecil said the words in the Act of 1883 had not produced any harm, and in leaving them out of this Bill the Government seemed desirous of relying upon the natural incapacity of the arbitrators.

Mr. A. Cross continued the debate.

The committee negatived the amendment by 185 to 24. (Ironical Opposition cheers.)

Mr. Haldane moved to amend the clause with a view to give the tenant a greater claim for unexhausted manures.

The amendment, after discussion and an assurance from Mr. Long, was withdrawn.

Mr. Channing moved an amendment to take into account in augmentation of the tenant's compensation any sum which might be found by arbitration under the Act to be due to him in respect of damage to crops by winged or ground game, or deer, during the last year of the tenancy.

Mr. Long, opposing the amendment, described it as extremely unfair to the landlord in the case of damage really done by somebody else. If damage was done, the tenant should be compensated by the owner of the game. (Hear, hear.)

On a division the amendment was rejected by 170 votes against 63.

A few minutes before twelve o'clock the debate was adjourned.

On Wednesday the consideration of the Bill was resumed.

Mr. Channing moved to omit words from Clause 2, with the object of reverting to certain provisions of the existing Act as to procedure. He did not wish to interfere with freedom of contract, but he objected to giving a landlord or his agent the power to set up their own particular form of arbitration, and to appoint their own arbitrator for an estate, and say to the tenants that they were to accept the lease subject to the improvements which they carried out being valued in this way, and by a particular man.

Mr. Long said that the words of the clause gave priority to any arrangement entered into between landlord and tenant in regard to the way in which their business should be settled. The Government believed in the arbitration system as provided by the Arbitration Act, but they also believed that the landlords and tenants should be free, if they so desired, to make any arrangement by which, if difficulties arose, they could be settled. If the Government had not adopted the course which they had adopted, the only alternative would have been to make the machinery of the Arbitration Act compulsory in all cases. He was sure that this would not be desired by the tenants themselves.

The House divided—For the amendment, 70; against, 168; majority against, 98.

Mr. Buchanan moved an amendment providing that arbitration should in all cases be before a single arbitrator.

The Attorney-General opposed the amendment, and advocated that greater freedom should be granted in the matter.

The House divided, and there voted—For the amendment, 77; against, 189; majority against, 112.

On Clause 3 (Land Charges), Mr. Buchanan moved an amendment with the object of exempting Scotland from the operation of the clause.

Mr. Long resisted the amendment.

The House divided—For the amendment, 71; against, 170; majority against 99.

Further consideration of the Bill was then adjourned until the following day.

On Thursday the consideration of the Bill was resumed with Clause 6 (penal rents and liquidated damages).

Mr. Fletcher Moulton complained that the wording was such as to leave it open to any conveyancing clerk to avoid the clause and make penal rents just as much enforcible as they were at present. He had only got to put it in the affirmative rather than in the negative, and by that turn of the sentence he could avoid the whole action of the clause. He moved the addition of certain words.

The Attorney-General was of opinion that the words in the section afforded adequate protection, but the Government would consider the arguments of the hon. and learned gentleman with a view to seeing whether the clause could be improved.

Mr. Moulton said he was quite satisfied with that expression of opinion, and withdrew the amendment.

Lord Hugh Cecil moved an amendment with the object of excluding existing contracts of tenancy from the operation of Clause 6, which abolished penal rents.

After further discussion, the amendment was withdrawn.

Mr. Lopes moved an amendment to omit Clause 7, which provided that it should not be lawful for a landlord to distrain for rent which became due more than one year before the making of the distress.

Mr. Long said the Government would accept the amendment, as since the clause had been introduced they had received representations from many quarters pointing out that the effect of the change in the law would be distinctly injurious to the tenants themselves.

The amendment was then agreed to, and the clause omitted.

Mr. Buchanan moved the omission of Clause 10, applying the Bill to Scotland, observing that it would make it more difficult and expensive for Scottish tenants and landlords to settle their differences. The clause was distinctly a step backward.

Mr. Long resisted the amendment, and pointed out that the Scottish Chamber of Agriculture did not share the views of the hon. member.

The House divided—

For the Amendment	105
Against	222
Majority against	—117

On the First Schedule, Part I. (improvements to which consent of landlord is required),

Earl Percy moved an amendment to omit the words "exceeding one acre," in reference to the making of gardens, thus providing that the consent of the landlord should be required for the making of gardens of whatever size.

Mr. Long defended the Government proposal, and pointed out that the landlord had the option of making the garden himself, and charging the tenant with the statutory rate of interest on the cost.

Mr. J. Lowther supported the amendment.

Mr. Jeffreys opposed the amendment, which was supported by Colonel Pretyman, Mr. Vicary Gibbs, and Mr. Hardy.

Mr. Perks was in favour of the Bill as it stood without the amendment in the interests of the tenant farmers of Lincolnshire, and he hoped the Government would remain firm and resist the amendment.

Lord Hugh Cecil could not congratulate the Government on the support they were receiving from their own side of the House. The right hon. gentleman in charge of the Bill admitted that all the arguments were against him, but with a strange perversity he strongly resisted the amendment.

After remarks from Mr. Philipps,

Mr. Grant Lawson suggested a compromise.

Mr. Heywood Johnstone thought that these concessions to the tenants had been pitchforked into the Bill without very much consideration as to how they would work.

The House divided—for the amendment, 53; against, 231; majority against, 178.

Sir W. Wedderburn pointed out that, according to the Schedule, a landlord would be able to veto all reclamation of waste land by a tenant. He moved an amendment to confine the veto to reclamations exceeding one acre in extent.

Mr. Long could not accept the amendment, although he sympathised with its object. It would be a mistake to encourage the reclamation of waste lands under any circumstances, therefore, it was wise to require the landlord's consent, as provided in the Schedule.

The House divided—for the amendment, 60; against, 126; majority against, 66.

Mr. Seale-Hayne moved an amendment giving farmers compensation for the erection or enlargement of buildings.

Mr. Long pointed out that this was provided for in another part of the Bill, and on a division the amendment was rejected by 112 votes to 45.

On the second Schedule (rules as to arbitration), on the first part, which deals with arbitration before a single arbitrator,

Mr. Johnstone moved to insert words to provide that "the award shall, so far as possible, specify the several improvements, acts, or things, in respect of which compensation is awarded, and the sum awarded in respect of each."

Mr. Long opposed the amendment as involving the risk of litigation. It was the desire as far as possible that the award of the arbitrator should be final. The Government proposed to accept the amendment of Earl Percy authorising the arbitrator to give details of his award should either party desire it. They also thought that there should be a limit as to the time within which the award should be paid, and they proposed that the award should be in such form as the Board of Agriculture prescribed.

The amendment was then withdrawn, and the amendments indicated by Mr. Long having been inserted, the Bill, amid cheers, was ordered for third reading.

LITERARY NOTICES.

In this year's "Journal" of the Royal Lancashire Agricultural Society there appears a short but capital account of Lancashire farming in 1900 written by Mr. H. S. Daine, M.R.A.S.E., F.H.A.S., etc., of Woolfall Hall Farm, Huyton, Liverpool. This paper, together with the judges' report on the first prize arable farm over 100 acres (Woolfall Hall Farm), has just been published in pamphlet form. Mr. Daine has not, of course, in such a short article as this, entered into a minute or an exhaustive description of Lancashire farming, but has briefly sketched the most important points and gives some hints that will, he hopes, lead to a better and more improved state of things than at present obtains.

New Agricultural Patents.

Specially compiled for the MARK LANE EXPRESS by Mr. G. D. Howard (Hughes, Son, and Co.), Patent Agent, 38, Chancery Lane, London, W.C., of whom all information relating to Patents, Designs, and Trade Marks may be obtained free of charge.

11,509.—Archibald John Irvine, London, for an invention of "Improvements relating to machines for harvesting turnips and similar crops."

11,631. John Dobbing, Stockton-on-Tees, for an invention of "An improved haymaking machine."

11,733.—The British Potato Harvester Syndicate, Ltd., and Charles Joseph Moulton, London, for an invention of "Improvements in potato digging machines."

11,780.—Alexander Stich, Glasgow, for an invention of "Improvements in and relating to grass cutting shears and like implements."

11,860.—Moritz Barwinkel, Berlin, for an invention of "An improved process for treating oil yielding seeds."

Patents Sealed.

5,101.—G. H. Coleman and A. R. Morton, Chelmsford, for an invention of "Improvements in cultivators."

5,133.—C. C. Caves and L. S. Caves, Iowa, U.S., America, for an invention of "Improvements in potato planters."

The Margarine Act.—At the Thames Police Court on Thursday, William Richardson, grocer and provision dealer, of 152, West Ferry Road, Millwall, appeared to answer two summonses—one for selling margarine in a plain wrapper, and one for selling adulterated butter. On the 8th ult., Mr. C. Foad, inspector under the Sale of Food and Drugs Act for the Poplar Board of Works, sent a man into the defendant's shop for half a pound of butter. The female behind the counter inquired, "What price butter?" and the purchaser replied, "Shilling butter." After the purchase had been completed, Mr. Foad entered the shop and told the woman the article was for analysis, when she said, "It is not sold as pure butter." It was served in a plain wrapper with no margarine label. The analyst's certificate showed that the butter was adulterated with 81.6 per cent. of foreign fat. The defendant was fined £10, or in default one month's imprisonment.

100,000 of each.—ECLIPSE CAULIFLOWERS, earlier than Veitch's, very fine sort, 4s. per 1,000; Veitch's Autumn Giant, 3s. 6d.; Dalkeith Brussels Sprouts, 3s.; Nonpareil and Enfield Market Cabbage, 3s.; Ormskirk Savoy, one of the best, 3s.; Drumhead Savoy, 3s.; Sutton's Giant Drumhead Cabbage, Scotch Drumhead, Flat Pole, and Thousand Head, all 2s. 6d.; Sutton's Early Sheepfold, 3s.; Cash with order; or 1,000 of the above, purchaser's choice as to quantities of each, packed and carriage paid, 5s.

REGISTER OF BRITISH LIVE STOCK BREEDERS.

HORSES.

HACKNEYS.

MOORE, HENRY, Burn Butts, Cranswick, Hull. — Pedigree Stud of HACKNEYS, including many prize-winners; yearlings, two years, and others.—Can be seen on application to Henry Moore.

HACKNEYS. — JOHN N. ANTHONY, Sedgeford, near Lynn, Norfolk, breeder of Pedigree Hackneys. On hand, Colts and Fillies by most of the leading sires.

LLOYD, WALTER, Heaselands, Hayward's Heath, Sussex.—Small but select Stud of PEDIGREE HACKNEYS, Mares, Fillies, and Colts of best blood, including stock by Champion Ganymede, Agility, Winnal Fireaway, Model II., and other noted Stallions, at moderate prices. Appointments to view the stud (which is 1½ miles from Hayward's Heath Station, L.B. and S.C. Railway) on application to the owner, as above.

CLEVELANDS

HORSFALL, F. WILSON, Potto Grange, Northallerton.—Breeder of pure-bred CLEVELAND BAY and YORKSHIRE COACH HORSES. This stud has won far more prizes than any other again this year, and has won twice as many as any other during the last fifteen years with Clevelands. Many Royal and Great Yorkshire prize-winners for sale. One of the Stud Horses is Champion Broomgrove Pride 1249—first and champion R.A.S.E. Show, Maidstone, 1897; first R.A.S.E. Show, Birmingham, 1898; first and champion Great Yorkshire, Leeds, 1898; only times shown; fee £5 5s. Also breeder of pure-bred Shorthorns. Bulls and heifers for sale. Amongst others added to this herd in 1899 were Daisy Perfection, Richmond Daisy, and Highland Daisy, all bought at the Duke of Northumberland's Sale, at 210 guineas, 72 guineas, and 72 guineas respectively. Also breeder of Sussex black pigs, and several breeds of white poultry.

SHIRES.

MUNTZ, P. ALBERT, M.P., Dunsmore, Rugby.—SHIRE-BRED STALLIONS, COLTS, MARES, and FILLIES. About a hundred of all ages. Prize-winners London and other leading shows. Also high-class Shropshire SHEEP, winners first prize at Royal Agricultural, 1886, second in 1887, and first in 1888.—Apply, THOMAS EWART, Dunsmore Farm, Rugby.

CONCHAR, JOHN, Wylde Green, Birmingham.—Breeder of SHIRES and HACKNEYS. Some good Colts and Fillies for Sale. Five minutes from Station.

TAUNTON, H. PERCY, Redlynch, near Salisbury, Wiltshire. Shire-bred STALLIONS MARES, FILLIES, and GELDINGS of the most fashionable breeding always for sale at moderate prices. The animals are kept entirely out of doors and in natural condition.

PONIES.

THE LARGEST STUD of SELECTED WELSH PONIES IN WALES — Dinarth Hall Pony Stud Farm, Colwyn Bay, North Wales. Over 120 Ponies now on hand, including forty Brood Mares of the pure Welsh type, and several high-class Ponies, great goers, with style and action. 150 prizes won in 1898 and 1899. Ponies purchased from this Stud have won first prizes at Manchester, Birmingham, and Maidstone Royal Shows; also first and medal Crystal Palace, 1899. Sale in 1899 included two Entire Ponies purchased by the Government for Cyprus, several to America and France. Stud Horse JULIUS CÆSAR II. 5666, sire of first prize two-year-old pony filly, the first of his produce exhibited, London Hackney Show, 1900.

MONTEFIORE, REV. D. B., Mursley, Winslow, Bucks.—POLO PONY STALLION "MOOTRUB" (Polo Pony Society 32); winner of many prizes; three times reserve champion; service fee, £3 3s., and 5s. the groom.—Particulars on application.

PONIES.

MILLER, W. S., Forest Lodge, Brecon, S. Wales, extensive Breeder and Exporter of the best class of WELSH MOUNTAIN PONIES and COBS. References and particulars on application.

CATTLE.

SHEEP.

LINCOLN LONGWOOL.

DUDDING, HENRY, Riby Grove, Gt. Grimsby, Lincolnshire, has always for inspection and sale a large flock of pure LINCOLN LONGWOOL SHEEP, including many prize-winners, having taken the leading prizes for many years at the Royal and other shows for both rams and ewes, including champion medals at both the Paris Exhibitions, Vienna, Amsterdam, Canada, Australia, New Zealand, and all the leading prizes at Chicago; also the first for the best collection of Lincoln fleeces of wool at the Royal Windsor Show, which proves the character of this flock, which is most famous for their great size and 125 years' good breeding. Rams from this flock made the highest average on record last year. Riby Grove is seven miles from Great Grimsby, and three from Stallingboro' Station. Telegrams, "Dudding, Keelby."

LINCOLN LONGWOOL.

HOYLES, GEORGE, Manor House, Skidby, near Hull.—Pure LINCOLN LONGWOOL SHEEP. Registered Flock 136. Sires used: Skidby Constitution 3069, sire Skidby Conservative 1346, g. sire Old Constitution 308; Skidby Tory 1583, sire Riby A 358; Leconfield Pride, sire Casswell (16) 1753; Skidby Friar, sire Abbot 1—from the celebrated flocks of Messrs. Henry Dudding, J. Casswell, Hy. Smith, jun., etc. Heavy-wool Sheep for export. Also prize and prize-bred Polled Angus, Shire Horses, and English Ponies for inspection and sale.

T. C. DIXON, Brandesburton, Hull.—Pure LINCOLN LONGWOOL SHEEP, of best blood. Wool a speciality, with quality and size combined. F.B. 69. Rams, Ewes, and Lambs for Sale. Inspection invited. Telegrams as above.

ANDERSON, JOHN, Chapel Farm, Barton-on-Humber, Lincolnshire. Breeder of pure-bred LINCOLN LONGWOOL SHEEP. Flock Book 106. These sheep are noted for having hardy constitutions, true character, and long, lustrous wool.— Telegrams: "John Anderson, Barton-on-Humber."

FIELDSEND, C. S., Belmont, S. Willingham, Lincoln. Flock No. 59. Pedigree RAMS and EWES for SALE.

HAMPSHIRE DOWN.

FLOWER, JAMES, Chilmark, Salisbury. Undoubtedly the leading flock of the day; in show yard records at all the largest shows, including the Challenge Cup at the Salisbury Great Prize Sheep Fair six years in succession; also highest average for same period for 100 ram lambs at annual sale, at Britford Fair, August 12.

The Flock is one of the oldest existing combining fine quality, strength, constitution, and true character.

"Fossil," sire of the highest-priced Hampshire Down Ram ever sold, was bred at Chilmark, and in service there last two seasons.

COLES, CARY, late C. and T., Manor House, Winterbourne Stoke, Salisbury.— Registered HAMPSHIRE DOWNS, prizewinners at the Royal, Bath and West, Royal Counties, and other shows. Sheep of all ages for sale; selections from 1,000.

SHROPSHIRE.

COOPER, WILLIAM, AND NEPHEWS, "Cooper's Dip" Works, Berkhamsted, England. Breeders and Exporters of pure Shropshire Sheep. First and Third Prize for Ewes, Royal Show, 1898. Five hundred breeding Ewes. The largest export flock of Shropshires in England. The sires used present season include 310 Guinea Champion "Royal Record," Two First, One Second, and One Third Royal Show Prize winners.

LIVE STOCK AGENTS.

INVERNESS, WEST HIGHLANDS.—JAMES ARNOTT, Scotch Live Stock Agent, Ellandonan, Inverness, established 1870, selects and supplies on commission all classes of SCOTCH STOCK. He attends all the leading markets to purchase Stock at lowest rates. References can be given if desired to customers who have been annually supplied. All orders are personally attended to. List of classes and approximate prices sent on application. Reference required; terms cash. Telegrams: "Arnott, Inverness." J. A. is now booking orders. N.B.—Polled Angus or West Highland Heifers for crossing or feeding, in truck loads, at moderate prices. Fat Stock of all classes also purchased.

LARGEST Live Stock Agency.— Practical farmers in 57 counties (whose testimonials will be sent on application) testify their complete satisfaction with the live stock with which they have been supplied by E. GOODWIN PREECE, who attends leading fairs and sales to buy on commission CATTLE and SHEEP, for feeding, dairy, or wintering. Personal buying.—Address, Portland House, Shrewsbury.

MISCELLANEOUS.

FARMS, ESTATES, MILLS, BUSINESSES, ETC. *(continued).*

TO BE SOLD OR LET, the CITY FLOUR MILLS, LINCOLN (freehold)

Six Sack Roller Plant recently fitted up in the most complete and substantial manner by one of the leading firms of Milling Engineers. It is admitted to be one of the best Mills in the Kingdom.

The buildings comprise—Mill and two Warehouses of five floors each, to hold 10,000 qrs. gram, Engine and Boiler Houses (detached), Offices, No. 3 Warehouse, Residence, Coach-houses, Stables, Wagon-shed, etc., and covering about 2,120 square yards of land, situated in the centre of the city, on the quay-side, close to four railway stations, good communication to all parts by rail or water, easy rates from Hull and Boston.

It is in a grand wheat-growing district, great quantities being delivered into mill direct.

For years a large and profitable trade has been done at it.

There are six good banks within a few hundred yards.

Most of the purchase money can remain on approved security at 3½ per cent. Possession September 29.

Further particulars address, C. S. Dickinson, Lincoln.

370 EWES AND EWE LAMBS of the usual flock ages, and
70 RAMS AND RAM LAMBS.

Mr. Toop established this flock in 1883 by purchases of Ewes and Rams from many of the leading Southdown Breeders; reduced in numbers by a public sale in 1895, its history has been a continuous and unbroken record of success.

A very large proportion of the Ewes, particularly the younger ages, trace back to "ROYAL CAMBRIDGE" (No. 1,450, Vol. IV.), by that wonderful old ram "WATERBEACH" (No. 304, Vol. I.), bred at Goodwood, winner of many prizes at the Royal and other shows, without ever having been beaten. A most impressive sire, who imparted to his descendants to an extraordinary degree his own marvellous constitution and fine quality.

During the past 17 years 244 PRIZES have been awarded to this famous flock at the various leading Shows, including Champions, Group Prizes, and Breed Cups, but not including R.N.'s, H.C.'s, or C.'s, or other minor distinctions, besides which many prizes have been awarded to sheep obtained therefrom at the chief foreign shows.

EVERY SHEEP OWNED BY MR. TOOP is included in the Sale, and every lot will be sold WITHOUT RESERVE.

Westergate is five miles from Chichester and one mile from Barnham Junction on the L.B. and S.C. Railway.

The flock is open to inspection at any time.

Luncheon at One o'clock. Sale immediately after.

Catalogues of Mr. TOOP, or of the Auctioneer (who executes commissions), Auction and Estate Agency Offices, 63, East Street, Chichester.

CHICHESTER ANNUAL SALE AND SELLING OF SOUTHDOWN SHEEP.

The above annual Sale will be held by

HOBGEN BROS.,

at their Repository in the Chichester Cattle Market, on Wednesday, August 8, 1900, at one o'clock precisely.

Entries for the Sale have already been made from the celebrated flocks belonging to His Grace the Duke of Richmond and Gordon, K.G., the Pagham Harbour Company, Messrs. Hugh Penfold, Alfred Heasman, and F. N. Hobgen.

The Catalogue will include several prize-winners at the various summer Agricultural Shows.

On view the morning of Sale.

Catalogues may be obtained of HOBGEN BROS., Auctioneers, Valuers, and Estate Agents, East Street, Chichester, and Midhurst.

AUCTION SALES.

UPPER WINCHENDON, AYLESBURY, BUCKS.

THE FORTY-THIRD ANNUAL SALE of about SIXTY OXFORDSHIRE DOWN SHEARLING RAMS, the property of Messrs. J. & S. TREADWELL, will take place on WEDNESDAY, AUGUST 1ST, 1900.

This year's sheep are dark in colour, close in wool, with lots of bone, and full of lean meat.

Prizes have been won at the Royal as usual this year, and most of the prize-winners at the Royal and Oxfordshire Shows were by Winchendon sires.

Special arrangements have been made with the Great Central for the fast Trains from Marylebone at 8.15 a.m and 4 p.m., and also the 8.0 a.m and 9.31 a.m. from Leicester, to stop at Waddesdon Manor Station to set down Passengers attending the Sale. Trains on the Metropolitan will also call at Waddesdon Manor to and from Baker Street every two hours.

Conveyances will meet the Trains at Thame, G.W. Railway, Aylesbury, L.N.-W., Great Central, and G.W., and at Waddesdon Manor Station.

Luncheon from Twelve o'clock.

Sale at Two p.m. sharp.

Catalogues, with Pedigrees, at time of Sale.

EDWARD BOND, Auctioneer.
Thame.

CIRENCESTER RAM FAIR.
TUESDAY, AUGUST 7TH, 1900.

FORTIETH ANNUAL SALE OF PURE-BRED OXFORD DOWN SHEARLING RAMS.

A. F. HOBBS will SELL by AUCTION, on the above day, in a field adjoining the Cattle Market, at 12 o'clock sharp, about

60 GRAND SHEARLING RAMS, bred by and the property of JAMES T. HOBBS, Maisey Hampton, Fairford, Gloucestershire.

The Maisey Hampton Flock this year has been awarded First Prize at the Royal Agricultural Show for the best Two-shear Ram, and First Prize for the best Shearling Ram; First and Second at the Bath and West of England Show; and First and Second at the Royal Counties Show.

In 1899 Two First Prizes were secured at the Royal Show, Maidstone.

The Rams to be sold are of immense size, dark in colour, and well woolled.

A brake will leave Fairford Station for Cirencester at 10.15 a.m., returning to meet the 6.40 p.m. train.

A train will leave Paddington at 9 a.m., arriving at Cirencester at 11.43 a.m.

WORCESTERSHIRE.

PORTER'S MILL, TAPENHALL, NEAR WORCESTER,
AND
HADLEY MILL, NEAR OMBERSLEY.

BENTLEY, HOBBS and MYTTON are instructed TO OFFER FOR SALE BY AUCTION, at the STAR HOTEL, WORCESTER, on SATURDAY, AUGUST 4, 1900, at 3 for 4 p.m., in separate lots, as follows:—

LOT I.—"PORTER'S MILL,"

comprising a FREEHOLD RESIDENCE (a portion including a famous and highly interesting Elizabethan half-timbered structure) with Carriage Drive approach, LAWN and GARDEN, KITCHEN GARDEN (partly protected by a very curious old Wall with apertures for Bees), FARM BUILDINGS, a substantially built WATER CORN MILL, with Two Wheels working Five Pairs of Stones, the whole complete and in good order; and

16A. 1R. 39P.

of PASTURE LAND, situate on the River Salwarpe and adjoining the Droitwich Canal, at Tapenhall, Claines, near Worcester, now in the occupation of Mr. J. A. Jackson as yearly tenant from Lady Day at £100 per annum. This rent also includes certain lands rented from the Droitwich Canal Company at £9 per annum and from Mr. Green at £1 per annum.

The Droitwich Canal Company pay a rent of £9 per annum for a supply of water and other advantages, and this rent will be included in the sale.

The property adjoins lands of Lord Sandys, Representatives of the late A. C. Hooper, Esq., and others. It is about four miles from Worcester, four from Droitwich, and about one mile from Fernhill Heath Railway Station.

REMARKS.

"Undoubtedly there was a Mill here before the Conquest, for in Domesday the Manor of Northwick was described as possessing three Mills on the Salwarpe, those of Mildenham, Hawford, and Porter's."

"Tradition says that Queen Elizabeth, in her progress from Hartlebury to Worcester, in August, 1575, visited John Porter at his house at Porter's Mill. This was the John Porter whose monument and recumbent figure have been restored and placed in the Chancel of Claines Church. He is there described as 'John Porter which was a Lawyer.'"

Lot 2.—HADLEY MILL, comprising an old established WATER CORN MILL working Three Pairs of Stones, DWELLING HOUSE adjoining, STABLE with Loft over, open Shed, Pigscots, etc., the whole containing 3a. 0r. 0p., in the occupation of Mrs. M. Harford as yearly tenant from Lady Day, at the yearly rent of £30. Mrs. Harford has occupied for thirty years.

Hadley Mill is situate in the parish of Ombersley, adjoining the Westwood Park Estate, and lands of Mrs. A. Gardner, Mr. Bickman, and others, about 2 miles from Ombersley, and 3½ from Droitwich. It is copyhold of the Manor of Ombersley, and the copyhold rent is £1 7s. 8d. per annum.

The Properties can be viewed by permission of the Tenants.

Particulars with Plans may be obtained of MR. J. H. YONGE, Solicitor, or the Auctioneeers, all of Worcester.

AUCTION SALES.

LYTHALL and WALTERS will conduct the BREEDERS' 68TH GREAT CENTRAL SHOW and SALE of SHROPSHIRE SHEEP at Bingley Hall, Birmingham, on THURSDAY NEXT, July 26th, when about 500 PURE-BRED RAMS AND EWES, including winners at most of the leading shows will be offered, from the Earl of Dartmouth, Captain Clive, Messrs. A. S. Berry, A. Bradburn, J. Brown, T. F. Cheatle, R. P. Cooper, D. Gibson, G. L. Foster-Harter, C. H. Jolliffe, E. Nock, H. C. G. Parker, F. W. Rudgard, H. Williams, M. Williams, etc.

Judging at 9.30. Sale at 11.30 o'clock.

Catalogues from the Auctioneers, Bingley Hall, Birmingham, who will execute commissions to purchase.

BIBBY'S "CREAM EQUIVALENT" for CALVES.

An Ounce of Fact is worth a Ton of Theory.

A STRIKING FACT.

In our Spring number of "Bibby's Quarterly" we reproduced the photographs of two groups of Calves which are now being reared at the Horuby House Farm, Bedale, Yorks, by his Grace the Duke of Leeds.

One of the groups is being fed on New Milk and the other on Separated Milk and "Cream Equivalent."

We asked our readers to tell us which of these groups were fed on New Milk, and 707 Farmers, Farmers' wives, their sons and daughters competed for a small prize which we offered to those who guessed correctly.

445 selected the wrong, and 262 the right group.

We think the above striking FACT speaks volumes for "Cream Equivalent."

The "Cream Equivalent" can be had at 15s. per cwt., carriage paid to nearest station.

SOLE MANUFACTURERS:—

J. BIBBY & SONS,

Exchange Chambers, Liverpool.

IS IT DISSOLUTION?

There is no need that Parliament should be dissolved at the present moment, but there is every prospect that it may be. There have been rumours and guesses without end, and it has been persistently suggested that we are on the eve of a general election. There seems to be some truth in these remarks. What may happen we do not pretend to know, but there is nothing improbable in the prognostications which are made. The war troubles are being gradually got over, but the temptation to the Government to dissolve now must be very great. We are within measurable distance of victory in South Africa, and the announcement of final victory would put the Government in such a position that the country would be likely to at once replace it in power. The exigencies of politics are perhaps more than are understandable by the "common herd," but unfortunately they do affect the people—and the farmers are part of such. A Government will naturally seize the most favourable moment for a dissolution, and it cannot be blamed for refusing to take any other course. Agriculture is not the only interest which the nation has—although it is the most important. Judging from past experience we are bound to assume that the farmer will again be driven into the background, and have to be thankful enough to accept promises, and not be so foolish as to accept performance.

The great question which arises is as to how far the farmer has to concern himself with the effects of the election. We are afraid that they are so serious that they cannot be dismissed in a few words, or even in a single article. The farmer has—as we have repeatedly pointed out—been neglected by every Government that we have had, and the time has come when he must assert himself. It has been his misfortune, as we have repeatedly pointed out, that he has taken far too little interest in what is going on in the political world. If he cannot be made to see that he possesses the power that he does, he must suffer for it. He is a power in the land, but he does not seem to be able to appreciate the fact. We use the word farmer; but, of course, we mean both landlord and tenant by it, for their interests are, after all, generally identical. It is quite time that the situation was carefully considered, for every candidate at the general election must be faced with a plain question, and must be asked to give a plain answer to it. The least deviation from this can only mean an uncertainty that must be dangerous. Our advice, therefore, is that every representative association, whatever its name may be, should at once give most earnest attention to the matter, so that the subject may have the fullest consideration.

SAMPLES.

By a Man of Mark Lane.

Mr. Walter Long, President of the Board of Agriculture, has been confined to his house for several days. The right hon. gentleman has undergone two operations for carbuncle.

Is the information in the following note of any use to a farmer? It reached me by post a few days ago:—

Sir,—As there seems to be a great dearth of farm hands at present, I would be glad to give what assistance I could with my family—eight in all—for three or four weeks in August. If you know of any farmer requiring such help and would put me in communication I would be greatly obliged.

The letter is written from the eastern portion of London. I do not know what the man or his family can do, but if any farmer who is hard up for labour thinks he would like to make inquiries as to whether the "assistance" would be of any use, I will send the address.

While the producing capacity of the country is at the present moment as fully occupied as most manufacturers could desire, and while all returns indicate great industrial activity, the future (in the view of *Engineering*) is full of uncertainty. The cost of fuel, of raw material, and of labour—all necessaries in manufactures—is becoming more and more prohibitive, and we have reached the stage when clients find it too hazardous to enter the market.

The receipts on account of Revenue from April 1st, 1900, when there was a balance of £3,517,047, to July 14th, 1900, were £29,366,400 against £30,480,890 in the corresponding period of the preceding financial year, which began with a balance of £8,919,173. The net expenditure was £50,713,604, against £34,572,922 to the same date in the previous year. The Treasury balances on July 14th, 1900, amounted to £5,666,642, and at the same date in 1899 to £2,787,861.

A Hayfield on Fire.—On Wednesday afternoon a field of hay which had been cut on Mr. Gregory's Parr Fold Farm, Walkden, was set on fire by a spark from a passing engine on the London and North-Western Railway. The flames quickly spread, and a considerable portion of the hay was destroyed before the men who were in the field succeeded in beating out the flames.

The large forage stores belonging to the Midland Railway at Ashchurch Station (Gloucester) have just been fitted up with a most powerful fixed steam engine by the Merryweather firm. The engine is of a new and greatly improved pattern, and takes up but little room. It is capable of being worked at night or during holidays when the boiler fires are damped down and there is only a steam pressure available of 20 to 30 lbs. It can thus be set to work at a moment's notice. For the fire protection of the Romford provender factory the Great Eastern Railway has acquired a "Hatfield" noiseless pump driven direct by a gas engine, and for the protection of its station at Spitalfields a "Greenwich" pattern manual fire engine has been provided. This activity on the part of our great railways in the question of protection from fire is as it should be.

AGRICULTURAL POLITICS.

By a Lobbyist.

The opposition in the Commons to the third reading to the Agricultural Holdings Act Amendment Bill was futile to the point of puerility. Nobody believed it would be effective; nobody regarded it seriously even as an assertion of antagonism. It was little more than an assurance of egotism. Now, the Bill is in the Lords, and, thanks to the wise suavity of Mr. Walter Long, its passage through the Upper House is assured. Of course, the small revolt against the measure which has been incensed by Lord Hugh Cecil might have serious consequences if pressed to a final issue; but I have reason to know that the policy which was given so resolute a check [illegible] in the Commons will not be persisted in. The Bill, in a word, is safe, and ere the House adjourns on the 10th, will have received the Queen's assent.

Mr. Long has been a little indisposed; and to this fact I attribute the weakness which he has exhibited towards his Liverpool electors. His resolve not to fight the constituency again means nothing more nor less than the triumph of the schismatic. We shall now have every little body of religious sectaries declaring that unless the candidate reflects their ism he must return into private life. It has been bad enough to know in the past that the politician was more or less in the hand of the faddist, but now to know that he may be in the hands of the religious zealot will be a thousand times worse. Heaven forfend that I should say anything against the religious zealot; but his sphere is religion and not politics. The Minister for Agriculture's attitude has distinctly encouraged him in his new assertiveness, and he has thus done something to introduce a very discordant element into our political life.

A Member of Parliament for one of the southern constituencies assures me that the most significant problem of the agricultural world is the labour problem. It is simply impossible to get sufficient hands in many districts for either haying or turnip hoeing. He says that in his own district 5½d. an hour has been offered, and that men were thus able to earn 30s. a week—or 10s. a week more than the [illegible] wages of [illegible] towns. Yet, if I may repeat this phrase, it is simply impossible to attract workers to the villages. What is more, those who are compelled to live in the villages are actually willing to accept a shilling a week less if they be given charge of teams of horses simply because of the prospect of occasional excursions to the towns.

Of course, the politician cannot grapple mathematically with this matter. Even the most scientific of State Socialists has never yet suggested the compulsory settlement of workers in certain specific districts according to the will of a martinet Minister. The real cause of the scarcity of rural labourers arises, in my view—and in this I am somewhat in antagonism to Mr. Rider Haggard—from the mere fact that the farmer cannot hope to pay the wages demanded. The man who has been earning 4s. or 5s. a day as a navvy thinks he should receive the same wage in the rôle of an agricultural worker, now the cost of living is reduced. He does not realise that there is a period of the year when rural labour is absolutely unremunerative. Be it remunerative or unremunerative, the pay of the navvy is elevated into his standard wage; and unless he can get it he drifts into the great urban army of unskilled labour.

Mr. Rider Haggard's paper on this theme has attracted a good deal of attention among legislators; but I am bound to say that there is not

one who does not regard the ethical remedy which he has suggested—the brightening of rural life and the offering of inducements to an enlarged interest in Nature—as a mere palliation, and not as a panacea. "I tell you what it is," said a Midland politician to me, "a grave change has come over the rural character. The labourer once took a decided interest in the fortunes of the farmer. It was this which induced him at certain periods of the year to work on from daylight to dark. Now, he leaves off regularly at six, let the turnips be hoed or unhoed."

Has not, however, machinery had something to do with this change in the rural character? Has not the displacement of men by an inarticulate labour-saving machine done something to rob workers of the personal element in their relations with their employers? Well, be the causes what they may this inability to secure rural labour constitutes a grave problem. It does not seem to be possible to deal with it by political methods. Yet the politician—the universal medicine man of our social and economic system—will soon have to give it a serious attention. We cannot, I am convinced, despite all that Mr. Haggard says, banish the danger by these ethical and sentimental methods. Yet what other method presents itself?

I have more than once referred to the excellent type of agrarian politician whom Mr. Herbert Gladstone is presenting to rural constituencies. Mr. Gladstone has, in fact, developed his method into a system that must compel the attention of the Conservative organisers. One of the latest of these politicians is Mr. Oscar Bowen, of Ladbrook Park, Tanworth-in-Arden, who in all probability will contest the Stratford-on-Avon division. Mr. Bowen is no mere reckless iconoclast, propounding a policy of spoliation; he is an intelligent agrarian reformer, with an admirable capacity of intelligent expression. "Mind this," said he to me in the lobby, "I think that much more encouragement should be given to the tenant, especially in the way of encouraging him to farm for future benefit; but at the same time I think that a landlord has a right to exist." The conversation was apropos of the Agricultural Holdings Act Amendment Bill. Mr. Bowen crystallised his purpose in an epigram: "Protection for the good landlord against bad tenants, and protection for the good tenant against a bad landlord."

"A platitude," may comment some people. Well, Mr. Bowen embodies his epigram in a policy. "I am," he added, "for the new Three F.'s—Fixity of Tenure, Fair Rents, and Full Compensation for Improvements." I asked him how he would secure fair rents. Was he in favour of the establishment of land courts? Well, he was, if fair rents could not be secured in any other fashion. However, he was not until other means had been tried in favour of calling into existence a great legal organisation, with the possibility of endless expense. "I don't want," he added, "the tenant to be compelled to spend a fortune in securing a fair rent. At the same time, I want fair rents to be secured by a somewhat more disciplined method than at present exists. A tenant may at this moment enjoy a fair rent, but it is not unseldom as the result of the charitable disposition of his landlord." Mr. Bowen's idea is the establishment of an official rent-fixing bureau, with a branch in each county. I think he is rather visionary in his anticipation of effective results from such a body. Still, he has a scheme which he believes would lend it a practical character.

My purpose, however, is not to give Mr. Bowen's programme; but to present him to my readers as the type of men Mr. Gladstone is securing as candidates. "Now," said he, "don't run away with the idea that I am a Ricardoite, who believes that the landlord's interest consists only in the indestructible elements of the soil—I am nearer Mill than Ricardo. My contention is that the mere fact that land has been made a marketable commodity has greatly enlarged his rights." At the same time, Mr. Bowen is such a tenant's man that he is whole-heartedly in favour of compensation for disturbance. Again, I repeat that this gentleman is a type of the new Radical candidate. Is Mr. Middleton, the Unionist Carnot, securing men of an equal intelligence to oppose to these politicians?

THE DAIRY.

Chester Cheese Fair.

Mr. Challinor, secretary to the Cheshire Dairy Farmers' Association, reports upon the fair held in the Market Hall on Wednesday as follows:—"There was a full average attendance of buyers, all the best known Cheshire cheese consuming districts being represented at the fair. Owing, perhaps, to some etxent on account of its being very hot, and the harvest offering great inducements to farmers to stay at home, the pitch for this time of the year was very small, being estimated at 35 to 40 tons, as against 55 tons last year. The market opened with a good show for business, buyers being on the alert and quick in doing business with the owners of the choicest lots, which were all cleared in good time at prices ranging from 52s. to 57s. 6d. Medium lots also found ready buyers at prices ranging from 50s. down to 43s. The quotations of the corresponding fair last year were 34s. to 50s. per cwt. While makers just now are very hopeful as to an improving market for their product, their spirits are somewhat damped by the certainty of an exceptionally small make. Good prices will be needed to make up the inevitable deficit of output.

IN PARLIAMENT.

House of Lords.

Compensation for Farm Labourers.

On the order of the day for the third reading of the Workmen's Compensation Act (1897) Extension Bill on Monday,

Earl Wemyss said he supposed the Bill was inevitable, but could anyone doubt that its principles would ultimately have to be extended to domestic servants? This kind of legislation was bound to reduce wages, and had already reduced employment, because in mercantile work no one would now employ anyone over sixty. They ought not to expect this kind of legislation from a Conservative Government. Where was the use of having a Conservative Government in power if they were to have it? For his own part he, for that reason, did not desire a Conservative Government. He should wish for a Liberal Government with a majority of one. (Laughter.)

Viscount Cross said the noble Earl admitted that the Bill was inevitable. There had been no complaints from the working classes as to the principal Act, and he did not apprehend that there would be any complaint as to the working of this supplement to it.

The Bill was then read a third time, and passed.

Agricultural Holdings Bill.

On Friday, among a number of Bills brought up from the Commons was this measure, to which Viscount Cross asked their lordships to give a first reading, intimating that the second reading would be taken on Tuesday.

The Bill was read a first time.

House of Commons.

Agricultural Holdings Bill.

On the motion for the third reading of this Bill on Thursday,

Mr. Buchanan contended that the passage of this Bill was a very long deferred and very inadequate redemption of the promises given by the Government and its supporters at election time. The Bill did not constitute an adequate remedy for the grievances which existed. It was an incomplete and insufficient measure. He moved "that the Bill be read a third time this day three months."

Dr. Farquharson seconded.

Major Rasch supported the third reading of the Bill, and thanked the Government for what they had done for agriculture in carrying out the report of the Central Chamber of Agriculture in 1894. Although the Bill was not perfect it went far to satisfy agriculturists.

Mr. Lambert regretted that the Bill was not more complete and more effective. It made confusion worse confounded, and anyone who wanted to understand it had to provide himself with a small bundle of Acts of Parliament to which reference was made in the measure.

Mr. Strutt expressed the hope that in a future session the Government would bring in a Bill to simplify and codify the law relating to the important question of tenant right.

Mr. Abel Thomas and Mr. Giles continued the discussion, the latter hon. gentleman asserting that the Bill would be welcomed by the tenant-farmers of England.

Mr. Brynmor Jones said the Bill might be welcomed by the English tenant farmers, but it wholly failed to satisfy the pledges given by supporters of the Government during the election of 1895 to the tenant farmers of Wales.

Mr. Channing criticised the Bill as one that represented a very large extension of the powers of the landlord in dealing with his tenant.

Colonel Kenyon Slaney, referring to the speech of Mr. Channing, remarked that the general opinion of agriculturists in this country, whether they were owners or occupiers, was that, inasmuch as the hon. member had no direct acquaintance with the subject, he was regarded as a mere agricultural phonograph whose opinions were not accepted. (Laughter.)

Mr. Lloyd-George asserted that neither Mr. Channing nor Colonel Kenyon Slaney understood the question from the point of view of the Welsh tenant farmer. Whilst the recommendations of the Commission which were favourable to the landlords had been made law almost before the ink in which they were written was dry, no step had ever been taken to act upon the recommendations favourable to the tenant farmers.

Mr. Humphreys-Owen said the Bill did not meet with the full approval of Welsh agriculturists.

The Attorney-General said all would regret the absence of the President of the Board of Agriculture. It was due to his unfailing tact and courtesy that the Bill had got through so far. The debate which had taken place that evening had brought out with clearness the fact that the Bill was a substantial step in advance. There had, with one exception, been a practically unanimous expression of opinion on the points of procedure and practice—the hon. member for East Aberdeenshire, whose criticisms were not in accord with the decision of the Scottish Chamber of Agriculture. The criticisms of other hon. members were entirely on matters of detail. It was said that Wales should be separately treated, because the rural population there was dwindling. He was sorry to hear that, but he could not recognise it as a valid reason for separate treatment, because that was also the case in other portions of the country. (Hear, hear.) He denied that all the recommendations of the Welsh Land Commission had been ignored, although some of them, for good reasons, had not been acted upon.

The Bill was then read a third time, without a division.

Selling Russian Eggs as Irish.

On Friday, Mr. Field asked the Vice-President of the Department of Agriculture for Ireland whether his attention had been directed to the importation of Russian eggs into Ireland and their subsequent exportation as Irish eggs to England; and whether he would cause inquiries to be made as to this system, and take steps to prevent its continuance.

Mr. Plunkett: The matter is being inquired into.

Mr. P. O'Brien: Will the right hon. gentleman see that none of these Russian eggs reach the House of Commons? (Laughter.)

Agricultural Imports.

The following is an account showing the quantities of certain kinds of agricultural produce imported into the United Kingdom in the week ended July 14, 1900, together with the quantities imported in the corresponding week of the previous year :—

	1899.	1900.		1899.	1900.

Adulterated Milk and Butter in Leeds.—The Leeds City Analyst (Mr. Thomas Fairley), in his quarterly report to the Leeds Corporation Sanitary Committee, states that he has examined 121 samples submitted by the Food and Drugs Inspector. Of 106 samples of milk, 3 were found to be watered, 1 deprived in part of its fat, 3 both watered and deprived of fat, and 32 poor or of low quality. Of 12 samples of butter 5 were adulterated with fat other than butter fat. The total percentage of genuine samples is almost the same as during the corresponding period of last year.

Rural Depopulation: Mr. Rider Haggard's Views.

Some interesting remarks on rural depopulation were made by Mr. Rider Haggard at the annual exhibition held under the auspices of the East Suffolk Prize Scheme, at Saxmundham, on the 14th inst. He said he had been requested to speak on the subject of "Reading the Book of Nature," but that book was so long and intricate that he should not attempt to read the whole of it that afternoon. (Laughter.) He would rather turn to a page or two such as occurred to him as being appropriate to that occasion. It was the greatest of all books. We ourselves were part of Nature. Our very substances were of the earth, and what reverence we ought to give to Nature, which was our mother, and would be our monument! To try to apply these great principles, and bring them home, one thing was obvious to all dwelling in the Eastern Counties, and that was, those who ought to love Nature were getting fewer and fewer day by day, for the reason that the country population was decreasing. It was unfortunately a fact which he did not think anyone would attempt to dispute, that a large portion—the finest and most vigorous portion—of our population was today crowding into the towns. They all knew the old adage that "God made the country"—and another personage the towns. (Laughter.) He would not, however, carry the thing so far as that, but he thought that there was something in it—he felt that to be healthy, to be strong, and to be wise, the race ought to be reared in the country, and not in the town.

The present haysel had demonstrated how difficult it was to find labour in the fields. Right through the country we saw what a large proportion of old and sickly men there were labouring there, and we looked in vain for the fine stalwart young men we used to see. Where were they? In London, and other large towns. What often happens in the towns when they got there? Only a few days ago we read in the newspapers of a poor man who committed suicide because at fifty-five years of age he was told that he was too old to be employed. In the country, on the contrary, you often saw men of eighty years trying to work. The towns required the best and most precious life blood, and as soon as they got the best they used it and then threw it aside like a sucked orange. (Applause.) What was the cause of all this? He maintained that the first cause was the question of wages. Men thought they could earn better wages in the towns, or, as Norfolk people would say, "at the far end" they would do much better." He very much doubted it. (Hear, hear.) Secondly, there was the love of gregarity, the love of getting together, and the love of amusement.

It was alleged, and violently alleged, in some quarters, that the spread of education was one of the reasons why people were leaving the country districts—that because people were educated they no longer wished to stop upon the land. He would ask those he was addressing to consider what was the meaning of the word "education." If taken from the Latin it meant a leading out. A leading out of what? You might divide it into three parts: education of the body, whereby you were made strong and healthy; education of the mind, whereby you were made able and clever; and, lastly, the highest of education, the education of the soul or the spirit, whereby you were also lifted up. What was it that gave you the highest education? Was it not, after all, the study of nature? He contended that it was. Mr. Haggard pointed to the frosted face of the earth in the far north and to the tropical forests and beauteous plants, and asked if there was not education throughout the whole of the face of nature in these distant climes. But it was not necessary to go to far-off countries. It was not everybody who had the opportunity of journeying east, west, north, and south, and witnessing for themselves some phenomena of nature. Then let them look at their own surroundings, at their own sunset, or in the winter time the rising of the glorious sun over the black cold earth. Was there not education in all this? And yet this was an education that was not popular. Rather than find pleasure and amusement from the wonders and beauties of nature, our inhabitants would stand in the music-hall and witness the antics of short-skirted performers, and listen to the music of possibly a raucous voice. (Hear, hear.)

When this was so there was evidently something wrong. He thought that that system as at present practised was more or less designed by towns for towns, and what was wanted was a system devised by country people that would keep the sons of the soil on the soil, so that they might not desire to go to the music-halls elsewhere. (Applause.) The end of all education was the teaching of the young, the middle-aged, and the old to live purely, wisely, and well. This was the end of education, and not that which was so loudly proclaimed at times, to teach men how to grow rich. No doubt wealth was a good thing, but there was something better than wealth, and that was happiness, that rational proper happiness which pervaded good and pure homes, and this happiness was best attained by those who did not rush into the various conflicts of a crowded town. We knew too well what were the surroundings of town life. The first generation was possibly all right, but walk through the streets, and look at the young people you saw there—sharp, puny people, and certainly not what their grandfathers and grandmothers were who came, say, from Saxmundham. (Hear, hear.)

What had been the lessons of the past? This was not the first time in the history of the world that this kind of thing had been witnessed. It had happened again and again. It had happened at Rome before Rome fell. Mr. Rider Haggard gave several examples, and said it was happening in the present day in our colonies. He himself returned home from Syria with some Australians, and they told him the same story, that the rural population was crowding into the towns. Our minds were turned just at the present time to the Cape, to South Africa. The same thing was happening there. The reason the English race had not made greater headway there was because of its tendency to rush into the towns. He had a letter from a South African statesman whom he had never seen, but who was good enough to write to him, and in the letter he pointed out that this was the case. He said, in effect, that the war we were fighting now was a war between town dwellers and country dwellers, and he added that it was fortunate for us that the country dwellers were so few.

He (Mr. Rider Haggard) lived in South Africa several years, and knew that men went out there with the intention of farming, and stopping on the land. They, however, perhaps heard of coal, and then they went after coal; next, of copper, and they left the coal, and went for that; then of silver, and left the copper to go for the silver; and next they heard of gold, and quitted the silver for the gold. So they were always pushing into the towns, and after greater wealth. This was to a great extent why the position was so serious. Whatever victories we won over the Boers, however much we might crush them, or triumphant we might seem to be, unless some means could be found of keeping the Anglo-Saxon people on the land of South Africa, the Dutch were almost sure to become predominant for this reason—that the Dutch, whatever their faults and failings, were country dwellers, and nothing but country dwellers. They hated the towns, and that was the reason they were so strong, and why they had been able, with such comparatively small numbers, to make such a desperate resistance against so mighty an army. (Hear, hear.)

With respect to our own country, what was likely to be the outcome of this depopulation of the country districts? He did not speak because he was a farmer. The farmers' difficulties in this respect would be overcome. If the labourers chose to leave, the farmers would have to employ machinery, lay more land down to grass, and find employment for such men as were left, some of the land possibly going out of cultivation—in some way the situation would be met. He was talking rather in the interest of the nation at large, than in that of the farming community. Some might think that they could extinguish the farmer, but how would the nation do if its rural population dwindled and dwindled. It has been said that man was more precious than the gold of Ophir. This was undoubtedly so, especially with a great country. (Hear, hear.)

In the present continual exodus of the rural population, he was apprehensive of grave trouble ahead. Many might say that the farming industry was of minor importance, contending that this was after all essentially a trading nation, and that the landed class was no longer to be reckoned as being of much account. But it must not be forgotten that it was the landed people and the people from the villages who made England great long before the traders became so conspicuous here, and if England was to remain great, the landed interest must continue a power in the country. The trade of which so much was made in the present day, sprung up fifty years ago, when steam was invented, and navigation had made great strides, and if coal were to rise 10s. a ton in price trade might be throttled. (Hear, hear.) From the villages came those who made the country, and if the villages were allowed to be depopulated, then he maintained that the country would be in great danger.

He asked what possible remedies there were. He considered that great responsibility rested upon those who were engaged in teaching the rising generations. Teachers might inculate a love of nature, and perhaps in this way promote a desire on the part of those who were the subjects of this teaching, a desire to stop where they might be in constant daily contact with nature. He rejoiced at the efforts which were being made in that direction. He saw by the displays on the bookstalls at that exhibition that many of the books were designed to teach nature. He noticed many books of this class on Messrs. Longmans' stand, but he would venture to suggest that it was not botany pure and simple that they wanted to teach so much as the love of the flower. (Hear, hear.) It was rather the glory of the evening sky they should teach their charges to admire than the optical causes which produced those glories to their eye. (Hear, hear.)

Mr. Rider Haggard proceeded to say that he knew that this subject of the decrease in the rural population was one upon which there was a good deal of indifference. People would pay little or no heed to it. The Press, generally, passed it by as of no account, but he maintained that it was really the most important question of the day. He considered that the Press had great responsibility in this matter, and so far as lay in his power he would endeavour, through the Press, to bring home to the nation the grave position in which we stood in consequence of the dwindling and weakening of our country districts through the best and the bravest men being absorbed in the towns. The future of the country depended upon maintaining the populations in the rural districts, and that was the reason he had ventured to speak so earnestly about the matter. The Government might be moved, through the agency of the Press, to do something: they might deal with the transfer of the land and invent means by which the yeoman class should be induced to re-settle upon the land, and thus the possibility of drawing a supply of young and strong people from the towns would be again re-established. This was a page in nature which opened to his sight, and that was a page we should read, study, and remember. (Applause.)

A Chard Seed Business Dispute.

In the Chancery Division of the High Court of Justice on Tuesday and Wednesday, Mr. Justice Farwell was engaged in hearing the case of Townsend v. Jarman. Mr. Younger, Q.C., and Mr. Buckmaster, instructed by Mr. J. Banks Pittman, appeared for the plaintiff, and Mr. Hughes, Q.C., and Mr. Kerley, instructed by Reed and Reed, represented the defendant.

In giving judgment, his lordship said on the facts proved before him he had no difficulty in finding in favour of the plaintiff. The injunction would be granted in the form asked for by Mr. Buckmaster, and he proposed to add that the injunction was not to restrain the defendant firm trading as Edgar James Jarman or E. J. Jarman. The next point was as to the interception of orders of money intended for the plaintiff. Evidence had been given of two instances, one of which seemed to him to be a very bad case. He had said sufficient to show that an injunction must go against the defendant, as asked, to prevent his intercepting orders and communications intended for plaintiff. Then there came the question of solicitation, as to which he had great difficulty, but, in his view, no sufficient proof had been made to grant any injunction. His lordship instanced the case of Tallin, who having met the defendant at the cattle show, and been told by him that he should be sending him on an order, afterwards sent him a catalogue of Jarman and Jarman. The customer might not have known that the company had changed, but even so, after the promise to send an order, it would not be unnatural to forward a catalogue; such sending of a catalogue could not be called solicitation. The injunction that would be granted would prevent the defendant from using these catalogues in future, because they represented a carrying-on of the business of the old firm. On the evidence, therefore, he found it impossible to grant any injunction as regarded the circulation of the circular. Then there was the counter-claim, which raised the question of a very ingenious and novel character, which he had never heard before. In the acts of partnership, the defendant having been antecedent trader, who took part in an assignment to a new company, made provision in the articles that either party might retire, and so on, provided only that Townsend, whether he should have withdrawn, etc., or by any other manner should not, within twenty-one years from the commencement of the partnership, either alone or in partnership with others, carry on business within a distance of four miles of Chard. Then the twenty-eighth clause provided that, in case of Jarman's death, Townsend might buy goods from the executors. Now it was said that the company which had bought the partnership business had no right to this covenant, and that it was no part of the partnership business. That conveyed nothing to his mind. The company bought the interest and good will of Jarman and Townsend, and by reason of that covenant there was something more in Jarman than Townsend, because the business was worth more to Jarman by reason of that covenant. But a covenant of that nature was necessarily incident to a business. It was, only, therefore, as incident to the business that the covenant came originally into existence. The defendant could not successfully assert that it was not necessary to his business to increase the value of the goodwill of the business, and the bargain had in terms assigned to the company the whole goodwill of Jarman and Co. Therefore, as far as that contention was concerned in the construction of the deed, he held that it was one of the incidents of the goodwill and that it was conveyed to the person who had it from Jarman to the company, and had passed by conveyance from the company, and so to Mr. Townsend. Then there was a curious question as to the name, E. J. Jarman. When he built the house there was built a large stone showing a representation of a globe with words across the globe, "Corn [illegible] the people's seedsman, Somerset," and the words across and at the top, E. J. Jarman. Mr. Jarman having built the house with those words on it still had a foothold with the words out on it. He had made a suggestion for the removal of the [illegible] but his lordship could not see that he had any such right.

Mr. J. Noble Jack, a distinguished student of the Agricultural Department of Edinburgh University, has been appointed vice-principal of the Agricultural and Horticultural College, Holmes Chapel, Crewe. He is also lecturer in agriculture, and has full charge of the college farm and experimental station.

BARLEY AND MALT.

By Hordeum.

Market Returns.

One of the very valuable and useful sets of tables furnished by the Board of Agriculture in the "Agricultural Returns" gives the weekly amount of grain actually sold each week separately, and the price as an average. The much more useful form of the highest and lowest price is returned for the yearly sales, but unfortunately these are simply the averages, so that we at present have no means of getting at the highest and lowest prices obtained, either in any given locality or for any particular grade or type of grain. As this is the season when the barley trade is at an utter standstill, it would be of great utility if a discussion could be started as to the best means of reforming the existing methods of making returns. We want them both more accurate and fuller.

It has often been pointed out in these columns how

Delusive Averages

are when applied to barley prices. That the quantities returned are also singularly inaccurate is shown in a season like the past. It is quite certain that in many districts the bulk of the barley grown was malted, and, as a consequence, was not fed off without being sold.

Yet the returns show that although the acreage under barley was over 2,150,000 acres, and the average yield was over 34 bushels per acre, giving a total yield of 9,300,000 quarters, the quantity returned as sold in all the principal markets and towns was only 3,300,000 quarters.

The averages, therefore, are based upon very little more than one-third of the crop.

Very few people scan these returns with sufficient interest to note the singular positions taken by many of the counties and markets where heavy growths of barley ought to be produced and sold. If we take all the counties containing markets wherein 50,000 quarters or upwards have been sold in the year, which works out only at an average of

1,000 Quarters a Week,

or say under 2,000 quarters a week during the season, we find the following:—

			Town.	Quarters Sold.
Essex	2	Markets	Colchester	74,000
			Chelmsford	58,000
Herts	1	do.	Bishops Stortford	52,000
Suffolk	2	do.	Ipswich	100,000
			Bury	86,000
Norfolk	3	do.	Norwich	266,000
			Lynn	103,000
			Fakenham	58,000
Lincoln	4	do.	Lincoln	210,000
			Louth	67,000
			Brigg	64,000
			Sleaford	54,000
Nottingham	1	do.	Newark	122,000
Northamptn.	1	do.	Peterborough	84,000
Wiltshire	1	do.	Salisbury	53,000
Stafford	1	do.	Burton	79,000
Yorks	1	do.	Wakefield	62,000

Of these ten counties, Lincoln heads the list with four towns, and one the second largest return in the country.

The Biggest Market

is Norwich, and Norfolk has two other towns trading in over the 50,000 quarter limit.

Why these two counties should return so much more freely is curious, but it is very creditable to them. The reverse must be said of many of the counties which obviously do not make honest or truthful reports.

Even if the limit of sales is reduced to as low a standard as 20,000 quarters, it only embraces a few more counties, and gives the following towns:—

	Town.	Quarters Sold.
London		69,000
Essex	Braintree	20,000
Herts	Hitchen	29,000
Bedford	Bedford	22,000
Suffolk	Sudbury	34,000
	Beccles	24,000
Norfolk	East Dereham	39,000
	Diss	24,000
Lincoln	Grantham	49,000
	Stamford	40,000
	Boston	23,000
Huntingdon	St. Ives.	23,000
Cambridge	Cambridge	44,000
Berkshire	Reading	38,000
Yorks (E.R.)	Hull	34,000
	Bridlington	23,000
Yorks (W.R.)	York	22,000
Yorks (N.R.)	Malton	40,000
Nottingham	Worksop	22,000
Northampton	Northampton	46,000
Oxon	Oxford	29,000
Wiltshire	Devizes	26,000
Stafford	Wolverhampton	23,000
Durham	Darlington	22,000

Such counties as Kent, Sussex, and Surrey have no town returning as much as 9,000 quarters, whilst even Bedford has only two markets, which collectively sell 29,000, and Hampshire has no market returning 12,000 quarters. Devon has only one such market (Kingsbridge), Somerset one (Taunton), Gloucestershire one (Cirencester), Shropshire one (Shrewsbury). Derby, Cumberland, Lancashire, Denbigh, Montgomery, and several others return under 2,000 quarters, whilst Westmoreland, Cheshire, Carmarthen, and Middlesex all return nil—which, as dear old Euclid used to observe, "is absurd."

MILLING.

The Treatment of Break Stock Previous to Purification.—II.

The market for wheat is not so firm as it was, and business is far from brisk. Flour, too, has gone down in price in most parts of the country in accord with the raw material, as well as on account of the large imports of American flour. After showing a steady decrease for some weeks past, the quantity of breadstuffs, of wheat as well as of flour, on passage to this country is now heavier, and this will not help the home millers. Harvesting has already commenced in France, where the sorts grown are much like our own, and, although there seems to be little complaint of the quality of the grain, there are reports of a decreased yield, a state of things which in all probability will be reflected in this country.

English farmers have been too busy to thresh wheat, and so there has been little on the markets; in fact, the supply has been so short that some small mills in my district have had to stop grinding. There is a fair quantity still to come, however, when the hay harvest is over and more labour can be spared for threshing. The sale of offals goes steadily on, and, in fact, owing to the hot weather, which is beginning to dry up the pastures, this class of goods is even making more money.

Strength in English Wheat.

Mr. Mallett's paper, which I read in the last issue of the MARK LANE EXPRESS, was interesting enough in its way, and no doubt the quality of much of the wheat grown in this country could be improved, even as regards flavour, but long experience with all sorts of wheat conclusively proves to me that strong wheats will never be grown in this country, simply because soil and climatic conditions, especially the latter, are against it. I do not say that it is impossible to secure stronger varieties, but the word "strong" as now used will never be applied to them as it is applied to those wheats which the miller uses to provide the quality. There are three things which affect wheat, no matter where it is produced: these are variety, soil, and climate. If any of these be varied the product will vary, and this is tantamount to saying that the seed may be improved. After a good harvest time English wheat is fairly strong, it is true, but its strength is entirely different in quality to some sorts.

Possibly something might be gained in strength by planting such wheats as Manitoban and Spring Americans, but the seed would need constantly renewing, as each year the wheat would grow softer, with less strength, until in the end it would approximate to English. In fact, it seems that the strong wheats of the world need soils which are exposed to very severe winters, with heavy snowfalls which cover the ground for a time, for their successful maturing. The climate in the case of all the strong wheats—Russian, North-West American sorts, Manitoban—certainly fits in with these conditions, although it must be said that the summers are very suitable for ripening. Let us grow as strong wheats as possible by all means, but we must not sacrifice the inestimable qualities of English wheat—colour and flavour—for mere strength.

Treatment of the Break Stock.

In my last article I noticed the points which could be advanced for and against the machines which are in use for the treatment—scalping, grading, and dusting—of the break stock. These, generally speaking, are sieves, either single or in combination with either rotary or reciprocal motions, centrifugals of modern and adjustable types, inter-elevator reels, and round hexagon reels. There is something to be said in favour of all, as well as things derogatory, but the rotary double sieve, if free from vibration, with a speed of from 160 to 200 vibrations per minute seems best to suit the first three breaks in a four-break system. These are usually made in sizes of from 3ft. by 2ft. to 6ft. by 4½ft., and for moderately fast sieves only a surface of from 1 to 1.5 square feet per sack per hour for each break is needed.

The method of clothing scalpers, so that the first is coarsest and the last finest, with intermediate gradations, is rendered necessary in the first place by the size and general character of the stock under treatment, and in the second by the number of flutes to the inch on the corrugated rolls which perform the work of the reduction of wheat and broken wheat. It is very evident that larger middlings can be made from the former than from the latter, and that the largest middlings will be obtained from the largest stock. Hence a graduated system of corrugations on the rolls and scalper covers. In other words, the number of flutes to the inch decides the size of the middlings, and so controls the scalper covers.

But it will be better to give an example. As it is necessary to have the middlings for the second break of as near a size as possible, it is always best where it can be done, to grade the wheat for the first break into two sizes. The first example taken shall give corrugations to scalper covers for the reduction of a soft wheat like English, and in a four-break system the former may be as follows:—First break, 8 and 10; second break, 12; third break, 16; and fourth, 24 to 26. The wire coverings for these flutes would be something like 14, 16, 20, and 28 threads to the inch, but as wire is apt to clog, many millers prefer zinc, and the corresponding numbers to the above, which, like silk numbers, are quite arbitrary, are 7, 6½, 5½, and 4½, but it would be better to employ wire after the fourth break. Zinc has not such a great sifting capacity as either wire or silk. Wire has a free sifting surface of about 50 per cent., well-perforated zinc about 45 per cent., and silk at least 10 per cent. more than the latter. In a third article the same subject will be again considered. MILLER-FARMER.

POULTRY.

Treatment of Pullets.

Early pullets, fed on too much stimulating food, shed their feathers the same as the hens in the autumn. They should be fed on wheat and dari chiefly; barley, French buckwheat, and maize should form but very small portions of their bill of fare. A hen can lay eggs and moult at the same time much easier in August than she can moult without laying eggs in October or November, on account of the weather. Those who want to moult their exhibition stock early should use a little roup powder in their food, whereas those who require them for laying purposes only should use the poultry powder, as this not only strengthens the body but acts upon the egg organs.

If late-hatched chickens are not doing well, give them a little biscuit meal, groats, and hemp seed. A change in their food will often give them a start. If they cough and sneeze, or run at the nostrils, mix a little roup powder in their food. This will soon put them right. If they do not eat be sure to examine the mouth to see if there are any white specks therein. If they are weakly ones and there are strong ones on the place, kill the affected ones off at once and bury them. If a person has only a few they can be got round all right with patience.

Do not attempt to bring up chickens on inferior corn, for the best is the cheapest in the long run. When buying corn see it is of good size and has no holes in it. If a few kernels look dark, crush them with a hammer. It will then soon be seen why the poultry have not done well, and the balance has been on the wrong side of the sheet.

Secrets of the Egg Trade.

A case of great interest to those engaged in the Irish egg trade and to all consumers of eggs was heard at the Liverpool County Court on Monday. Messrs. Hartley, Wilson, and Co., produce merchants, Liverpool, sought to recover from Thomas Carr, poultry farmer and egg dealer, Cabbage Hall, Liverpool, the sum of £6 15s. 6d., the price of two crates of eggs supplied in 1898. The defendant resisted payment on the ground that half of the eggs were bad and unfit for human consumption, whereas he had ordered fresh Irish eggs, and agreed to pay the highest price then ruling in the market.

Mr. Wilson, the principal of the plaintiff firm, stated that the eggs supplied to the defendant formed part of a consignment of fresh Irish eggs which had been received only a day or two before from a person in county Cavan, who regularly forwarded eggs to the firm, and always of the best quality. In cross-examination, the witness denied the suggestion that the eggs were Russian. He had heard there was a practice of sending Russian eggs to Ireland and then reshipping them to England as Irish eggs, but he had never had experience of such a thing.

The defendant stated that on receiving a complaint from a customer as to the eggs, he had several photographed by the electro-hydrogen process, which revealed them to be in various stages of decomposition, some of them very advanced. As to foreign eggs being sent to Ireland and afterwards shipped to England, he said it was well known in the trade that such a practice prevailed. Millions of eggs, he added, were sent from the Baltic to Belfast, and they were afterwards forwarded to England and Scotland as Irish eggs. He knew very well how the thing was done, but he did not want to give the secret away. He believed the eggs in question had originally come from Russia or some other place on the Continent.

His Honour gave judgment for the amount claimed on the ground that the defendant had failed within reasonable time to notify the plaintiffs that the eggs were bad.

During a thunderstorm at Holbeach on Tuesday two horses in different parts of the same field were killed by lightning. A man, also in the field, felt the shock of the electric current, but fortunately escaped unhurt.

HOPS.

By Lupulin,

Home Notes.

In the Borough

the business of the past week has been influenced by the improvement in the weather, and, as more sanguine impressions have prevailed concerning the prospects of the growing crop, the trade has somewhat fallen off. But, owing to the scarcity of choice hops, the tone of the market is steady, and recent values are fully maintained, although there is at present some relaxation of the tendency towards higher prices which was previously evident. It is, however, still open to question whether the sudden change to the extreme heat of the past few days is likely to be of general benefit, especially as the reports from the plantations show that the attack of fly and lice still continues, and that washing must be persevered in if the hops are to be saved. The usual beneficial effects of bright, hot weather have not yet been experienced, and in very many cases the weakness and irregularity of the growth have become more manifest. My own observations during a journey on Friday last showed me that a good deal of the bine looked thin and weak, although generally a healthy colour of the foliage presented a satisfactory picture. But I saw some gardens in the most fertile districts whose yellow, dropping leaves indicate failure from want of strength, and I hear that similar unfavourable symptoms are not uncommon elsewhere. We are therefore still uncertain as to the final results, and I am inclined to conclude that the change of temperature has arrived rather too late for permanent or general progress, and that, under the most favourable conditions, we cannot expect a crop exceeding at the uttermost half that of last year. Indeed, I shall not be surprised if the weight brought to market is considerably short of this estimate.

On Thursday and Friday last I attended the annual show of the Tunbridge Wells Agricultural Society, for the purpose of ascertaining if any of the exhibits were specially interesting to hop-growers, and was somewhat disappointed to find that hops and the appliances relating to them did not occupy so prominent a position in the show as I expected. The only exhibit of note in this section was

Blackie's Patent for Hop Drying.

Having previously described this apparatus, I need hardly again refer to its details, but there is no doubt that it is making its way with planters in their estimation of its ingenuity, simplicity, and practical utility. Mr. Blackie's stand was visited by numerous growers, not one of whom made any objection to the adoption of his arrangement, save on the ground of outlay, to which they are not encouraged by present unsatisfactory value of hops. Perhaps more important were the opinions expressed by many working hop dryers, who examined the boxes and noted the ease with which the hops could be turned upon the kiln, with much intelligent inquiry, and who, without exception, approved of the scheme, which was demonstrated by a full-sized plant suitable for the fitting of a circular kiln 17ft. in diameter. The merits of the invention were, I am glad to say, recognised by the judges in the novelty class, the first prize and silver medal being awarded to Mr. Blackie. I have great confidence in commending this improvement, which can be adapted to any existing kiln without structural alteration, to the further attention of my readers.

The "Drake" Portable Oil Engine

also deserves favourable notice, as being an economical and easily adaptable source of mechanical power for farmers. It uses ordinary commercial petroleum lamp oil, it is cheaper to run than either gas or steam engine, it is reliable in action, and can be managed by any labourer of ordinary intelligence; it will run an entire day with one charge of oil and water, and requires no attention during the whole time. A single cylinder engine developing 5 h.p. costs a comparatively small sum, and it is not difficult to foresee that such a machine will eventually become popular amongst advanced agriculturists. It is constructed, and was exhibited by Messrs. Doake and Fletcher, Kentish Engineering Works, Maidstone.

Recent intelligence from South Africa, brings the name and services of our president,

Colonel Brookfield,

into prominence. Being appointed by General Knox to the command of a cavalry brigade, he was despatched on June 22nd with his brigade and four guns to sweep round the flank of the enemy, who were attacking the garrisons of Katbosch and Honingspruit. The Boers were first engaged by the Highlanders and Buffs, and after some hard fighting their discomfiture was completed by Colonel Brookfield's force, which after firing 140 shells into them, drove them out of their position. Colonel Brookfield subsequently fell back on Katbosch, where his force bivouacked, and where a telegram was received from General Knox—"Very well done." I am happy to add that a wire from our president a few days ago, said he was then "all right."

Plantation Reports.

Special to the Secretary of N.A.E.H.G.

LAMBERHURST.—The bine is uneven, and the growth is constantly being checked by cold nights and scorching sun. Vermin still causes some anxiety, and there is a little mould at places. Some grounds will come under half of last year's crop. There are acres that will never reach the tops of the poles.

TENTERDEN.—Under the influence of hot weather the plants are making excellent growth, but there is a considerable increase of aphides, necessitating vigorous washing. There is practically no mould. Bramblings are beginning to show burr.

WINGHAM.—The hot sun and warm nights of the past ten days have done much good. I do not think there has been any fresh arrival of fly this week. Some gardens are nearly clean where washing was begun a month ago and persisted in, but where washing was delayed the blight has left its mark. There are many places where bine is slack and where it does not look like being fruitful, but with a continuance of favourable weather we ought to get an average crop, *i.e.*, about half last year's.

PEASMARSH.—The hops are looking better. About half of them look like growing a good crop, the rest are slack of bine.

PETERSFIELD.—The hops that have been thoroughly washed are growing very fast and look very well. The unwashed are going black.

CRANBROOK.—My gardens are looking quite well enough, although the lice are very difficult to get rid of, and but for repeated washing the fly attack must have been very serious. There are some gardens in this neighbourhood, which cannot produce anything like an average crop, despite the favourable weather we are having, and, on the whole, I cannot see that there is any possibility of more than an average quantity being picked.

MAIDSTONE.—Where the soil is shallow, the hot weather is doing more harm than good. Fly is still very persistent, and continued and expensive washing is necessary. In many gardens the pine is slack and weak, though in others good progress has been made.

MARDEN.—In the best cultivated gardens there is manifest improvement, but there are many unwashed grounds where the plant is yielding to the vermin, and is gradually and certainly going black. On the whole there is not much real improvement, and the general outlook is far from encouraging.

WORCESTER.—There is a great deal of very weak bine (I should say one-third) which, under any circumstances, can only produce very little. Where the hops are well cultivated and there is plenty of bine, they have improved the last week, in spite of most persistent blight. Washing is still going on; growers who are neglecting and not washing will reap a very bad harvest. A large acreage that produced last year from ten to fourteen cwts. per acre won't grow more than three or four cwts., if any, under any circumstances. This refers to some parts of Herefordshire as well as Worcestershire.

WORCESTER.—Growth has been made the last week, since warmer weather; nearly all short of bine, and still full of blight in spite of numerous washings.

WHITBOURNE.—Much vermin, which incessant washing does not seem to cope with. Outlook very unsatisfactory.

LEDBURY.—As a rule, the hops look bad, owing to want of cultivation, cold weather, and persistent blight. Even in the best yards, where the washing has been constant, they are very backward, and it does not look as if they would grow anything like an average crop.

THE FARLEIGHS AND DISTRICT.—The late tropical weather has suited the strongest pieces, but where they were not washed in time and weakly there does not seem so much improvement. Mould can be found on the leaves in most grounds, and many growers are contemplating sulphuring, but are afraid to begin, as there is still vermin hanging about, and it has been proved that sulphur has a great tendency to increase the vermin, as it is supposed to put fresh vigour in the plant. The crop cannot be large, and a rough estimate at present would be 7cwt. or 8cwt. per acre average. The bramblings are showing burr. The expenses this year have been enormous, and let us hope we shall see remunerative prices.—(July 21st.)

Foreign Notes.

Nuremberg.

Trade in hops has been active during the past few days, and probably heavy business would have been done had there been a better choice at the disposal of buyers; but stocks being so limited, purchases have not exceeded the necessities of the moment. The increased demand is directly traceable to the bright, hot weather, which has brought the whole population out of doors, and has induced an enormous consumption of beer. Should these conditions continue, the warehouses of hop dealers must be speedily cleared: and it is not unlikely that it will be necessary to seek for supplies in other markets, especially as it is generally calculated that the new crop will be at least fourteen days late when picking commences.

Reports from the Plantations

in Germany and Austria are generally [illegible] favourable, although the development and progress of the plant is slower than might be expected under present climatic conditions. Where the bine is strong and free from insect troubles, there is the greatest quantity observable in many of the grounds, and in many plants are showing vigorous growth and inspire confidence in a full yield. In the Hallertau district of Bavaria the most forward is in the first stage of growth, perhaps most evident, but there are other important localities from which similar reports are issued. It is possible that the prevalent weather will alter the complexion of affairs, but there are grounds which will rather suffer from than be benefited by the present high temperature. On the whole it appears very likely that the yield of last year will be surpassed, though perhaps it may be equalled.

Alsace and Burgundy.

The condition of affairs in these provinces is as yet undecided. The early growth being so backward, the gardens have not yet arrived at their normal point, and it is feared that under the most favourable circumstances they will hardly be able to advance sufficiently for the production of a satisfactory crop.

Belgium

The value of hops of 1899 growth is very firmly maintained at 60 to 70 francs per 50 kilos, and owing to the advent of real summer weather the demand by brewers has become more active. Stocks of native growths are now reduced to a minimum point, and imported hops have been arriving in fairly considerable quantities.

The Belgian Plantations

have suffered severely from [illegible] which, despite the hot sun of the past fortnight, still clings to the bine in most places. The grounds that have partially escaped are making fairly good progress, but, on the whole, there is much cause for dissatisfaction, as it is now almost too late to hope for full development, or a large yield. Speculators have been evidently impressed with the unfavourable outlook, as business has been done in futures (October-November) at 100 to 105 francs, and although a steadier tone now prevails, quotations still stand at a figure showing a considerable advance from those current three weeks ago.

America.

A change to hot weather has been experienced on the other side of the Atlantic, and its effect is being felt in the New York market, where more disposition to buy is shown by brewers, and considerable quantities of hops have been sold at full rates, giving a rather firmer tone to the trade. Very little new information about the growing crop is to hand, but, as far as I can ascertain, I should conclude that growth is fairly satisfactory, both on the east and the west coast, although there are no indications thus far of a yield in any district, which is likely to exceed a normal average.

(*For Hop Market Reports, see pages* 111, 113.)

New Agricultural Patents.

Specially compiled for the MARK LANE EXPRESS by Mr. G. D. Howard (Hughes, Son, and Co.), Patent Agent, 38, Chancery Lane, London, W.C., of whom all information relating to Patents, Designs, and Trade Marks may be obtained free of charge.

11,992.—Isadore Centennial Freud, Chancery Lane, London, for an invention of "An improved process for treating potatoes for food."

12,067.—John Rudge, Market Place, Dursley, for an invention of "Improvements in [illegible] for plant cultivation."

12,153.—Henri Ruperti, Chancery Lane, London, for an invention of "Improvements in [illegible] expressing water from turf or peat and such like materials."

12,207.—William Richard Bates, Pondes End, Middlesex, for an invention of "An improved apparatus for stacking hay, straw, and other [illegible] produce."

12,266.—William Hornsby and David Robert [illegible], South Street, Finsbury, London, for an invention of "Improvements in or connected with knife-driving mechanism for mowing, reaping, and harvesting machines."

Patents Sealed.

5,556.—J. H. Silley and W. W. Bacon, Sydney, New South Wales, for an invention of "Improvements in sheep, etc., shearing machines."

5,876.—H. H. Lake, Southampton Buildings, London, for an invention of "Improvements in reaping and harvesting machines."

There was a [illegible] storm in East Anglia early on Saturday. Several barns in the farm of Mr. J. W. Utting, of Stanninghall, were killed, and several stacks were fired in the neighbourhood of North Walsham. One of the barns was the property of Mr. J. W. Temple, of Edgefield, and other damage done is estimated at £10.

All official reports and notices of the National Association of English Hop Growers will be printed in the MARK LANE EXPRESS, *which will also contain all current information likely to be of interest and benefit to the members of the society*

THE GARDEN.

The present season has so far proved a much more growing one than we have had for several years, and at the present time vegetation is in a state of quite unusual exuberance. The soil hereabouts is decidedly poor and thin on the whole, and in dry seasons it is by no means an easy matter to get such things as lettuces, cauliflowers, etc., to make a sufficiently vigorous growth, but at the present time some subjects, including potatoes, are growing even too luxuriantly. What it must be on soils that are naturally fertile, rich, or that have been heavily manured I can only imagine. I fortunately used much less manure than usual this season, and with the exception of a small quantity of artificials of various kinds to part of the crop, none at all with the potatoes, and yet the growth is somewhat too luxuriant, as stated. But in a season like this the superiority in quality of such produce over that of ground that has been heavily manured is usually quite remarkable.

By the way, I see that that wonderful potato-producing island, Jersey, is becoming to some extent worn out for this purpose, the land having become what is termed "potato-sick" from having carried the same crop for so many years. The yield is rapidly falling off in the points of both quantity and quality, and even fair crops can only be obtained by the use of immense quantities of artificial manures. This is a pity for the island, which has profited by the industry enormously, but it was, of course, only to be expected sooner or later, and, in fact, the end was certain to come some day. It is probable that the raising of early potatoes on a large scale will be conducted in future near St. Malo, in France, where it appears that there is a very large area of land in every way adapted for the purpose.

Some new varieties of early potatoes that are undoubtedly worthy of attention are Very Early (Sharpe's), Ninety-fold, Ringleader, May Queen, the Major, and Pioneer. These have all proved to be excellent croppers, as well as being very early, and the three named first also recently received certificates or awards of merit at a trial of a large number of varieties that is being conducted at Chiswick this summer.

Turnips are doing remarkably well this season; there is no fly anywhere (as far as my experience and information go), and the plants are growing almost too rapidly and strongly. Begin thinning out the early-sown breadths or beds as soon as the plants can be fairly got hold of. When sown in drills a usual method is to strike out gaps in the rows with the corner of a hoe, leaving small patches about 6in. apart, which are afterwards reduced to one plant in each. But I think it is just as well to thin by hand, and gradually reducing the plants to 2in. or 3in. apart in the first place, and then gradually thinning them farther by pulling a root or two here and there, for use in the house, until they stand at a moderate distance. Of course when sown broadcast the thinning must be done by hand, but it is much easier to keep the ground clean (by hoeing) when the seed is placed in drills.

Make frequent sowings of turnips now and onwards until the beginning of September. Good kinds for present sowing are Veitch's Red Globe, the Red American Stone, and Orange Jelly; a litle later on sow the White Stone and the Black Stone (Chirk Castle), the last being a very hardy and excellent turnip for late crops.

No time should be lost in planting new strawberry beds. If left later than the end of this month they will do little or nothing in the way of fruiting till the second season, which means the loss of a twelvemonth. Of course plants from small pots may be successfully planted a month or so later, but in large numbers these come either very expensive or entail a lot of labour. Strong young runners planted out in May, June, or the early part of July will produce finer fruit as well as ripen it some days earlier than old plants, especially if afforded a sheltered and sunny position. For late supplies of fruit plant Eleanor, Waterloo, or the Elton Pine, on a northern slope, at the foot of a low wall with north aspect, or where lightly shaded by distant trees.

Get the main batch of plants for forcing into the fruiting pots as soon as possible, and stand them "pot thick" on a good bed of ashes in a sunny but rather sheltered spot. There is just time to put down a last batch of runners into small pots for late fruiting, or to plant out of doors a month or so later on, if necessary.

Roses will have to be budded rather later than usual this season, the wood being rather soft yet, and the buds not yet sufficiently prominent and firm. The weather at present is just right for this work, however, and unless dry weather sets in the stocks will probably work well.

Cuttings of pinks should be taken now, or very shortly, though in order to propagate the "common or garden" kinds it is much easier, and just as effectual, to simply pull a few old plants to pieces, and plant the divisions closely and firmly in a well-prepared bed of sandy soil in September. But now is the time for cuttings, which may be inserted either in a good bed of fine, light soil in a sheltered and half-shaded spot out of doors, or if of choice varieties preferably in a frame, or under handlights, and be kept moist and moderately close and shaded until callused.

The present is also a good time to sow seed of the charming Persian cyclamens; this sowing will afford fine flowering plants the winter after next. Sow in pans filled with a mixture of fine loam, peat, or leaf mould, and sand, and keep evenly moist in a frame or pit.

Highland and Agricultural Society.

General Meeting of Members.

The general meeting of the members of the Society was held on Wednesday, with Lord Balfour of Burleigh, the President of the Society, in the chair. There was a large attendance. After several votes of thanks had been proposed and acknowledged—

Sir Robert Menzies proposed:—"That the date at which the Highland and Agricultural Society permits the clipping of Blackface tups for exhibition at its annual show—viz., 1st January—is much too early, and should be altered." He said it was unnatural to clip Blackface sheep before 1st January. Those who were so clipped were starving and shivering all winter. Then the coat was grown, and they had only to look at the result at that show, where they would find them panting with heat. There was no necessity for doing it. If the sheep were clipped at the proper time, they would be in a much more healthy state than at present. It was said that if what he proposed were carried out, it might affect the ultimate sale of the sheep at the autumn sales; but if the sheep were clipped either in May or June, the sort of wool they would have by that time would show exactly what the coat would be.

Sir Alexander M. MacKenzie, of Delvine, seconded.

The Chairman said he thought it right to remind members of the action of the Society. He was asked to inform the meeting that in April of last year two questions were sent out to exhibitors of Blackface sheep:—"(1) Should there or should there not be any regulations as to the clipping of Blackface sheep to be shown at future Highland shows?" and "(2) In the event of your considering the continuance of clipping regulations desirable, what date should be stated as that after which all Blackface sheep exhibits must be clipped?" Those two questions were sent out to all exhibitors, thirty in number, who had exhibited during the past ten years at the Highland Society's show. Of these seventeen sent replies answering the first question in the affirmative, and sixteen out of the seventeen preferred the 1st of January in answer to the second question, and the seventeenth man proposed the 1st February.

Mr. John Craig, Innergeldie, moved as an amendment, that the clipping regulations be allowed to remain as at present. The motion would receive a considerable amount of sympathy from breeders, because there was no doubt that sheep which required to be kept on the hill must necessarily be kept under as natural conditions as possible during the rest of the year; but whether Sir Robert Menzies was taking the proper course in asking the Society to alter their clipping regulations was a different matter. It must be borne in mind that there must be a certain amount of wool on a sheep before the judges were able to distinguish whether it was of the proper quality or not. If exhibitors had less time in which to bring out sheep they would be put to more pressure, and that would be hurtful to the animals.

Mr. John Archibald, Overshiels, seconded the amendment.

On a show of hands, the motion was carried by sixty-five to fifty-nine votes.

The Chairman reminded the meeting that the motion did not settle the date at which clipping was to be arranged for hereafter. He supposed that would have to be remitted to the directors.

Sir Robert Menzies said he was going to propose that a committee be appointed to report to the next meeting of directors as to when clipping should take place.

The Chairman suggested that this was not a very suitable gathering for discussing these matters in detail, and that it would be better to leave this subject as it stood to the directors to settle the procedure for next show.

Sir Robert Menzies accepted the suggestion.

Mr. Charles Duncan, Little Kilmory, Rothesay, asked the reason why at an agricultural show of the importance of that held by the Highland and Agricultural Society there were only two milk cows exhibited. In his opinion, the cause of the small entry was the rule requiring the cows to be milked at a certain time, instead of allowing the exhibitor to milk his animal when ever he pleased. He had a complaint to make regarding one of his cows.

The Chairman expressed his sympathy with Mr. Duncan, but suggested that he should send in a statement of his complaint to the directors, who would consider it. He could assure Mr. Duncan that the complaint would receive the most careful consideration of the executive of the Society.

Rev. Dr. Gillespie said that in the particular case referred to by Mr. Duncan everything had been done in compliance with the regulations of the Society, under the supervision both of himself and of Principal Williams, the veterinary surgeon to the Society.

Mr. Robert Wilson, Manswraes, Paisley, was of opinion that there was a good deal of ground for Mr. Duncan's grievance. It was quite clear, he held, that if there was not something wrong there would be a better display of Ayrshires. These cattle comprised the best breed for rent-paying purposes, and they were treated worse than any other class. He did not see why exhibitors of Ayrshire cows should not be allowed to milk them at any time they pleased.

It was then agreed that the matter should be referred to the directors.

Mr. A. M. Gordon, of Newton, in proposing a vote of thanks to the chairman for presiding, said Lord Balfour was the first business man in Scotland, and so long as he held his present position every Scotsman might be sure that his interests would be thoroughly and well looked after. (Applause.)

The Chairman, in acknowledging the vote of thanks, said that when he heard that he was to be proposed for the office of president of the Society he felt that one of the greatest honours that could be conferred on any Scotsman had been conferred on him. He had had a very pleasant year of office, and he could assure them that the remembrance of it would be among his most pleasant recollections. (Applause.) They would allow him to read a letter of apology from his friend and colleague, Mr. Long, President of the Board of Agriculture, who wrote as follows:—"I am sorry that I shall not be able to attend your show this week. It is a great disappointment to me, and I hope you will be so good as to convey my regrets and apologies to the members. The cause is, of course, the state of Parliamentary business." (Applause.) He knew that Mr. Long intended to be present at the show. Three months ago Mr. Long promised to him that he would come if possible, and he knew that he would have fulfilled the promise had it been possible. Might he convey to the President of the Board of Agriculture an expression of deep regret on the part of the members at his absence, and the hope that he would be able to attend any future meeting of the Society? (Applause.) With reference to his year of office as president his Lordship only wished to say that one notable step had been taken—a step which not only concerned the Society, but also concerned him as vice-president of the Scotch Education Department. He was glad to think that during the past year they had managed to get the adhesion of all the south-western counties to a joint scheme under which an agricultural college had been established at Kilmarnock on a very liberal and hopeful scale. (Applause.) The state of that institution reflected the greatest possible credit on the energy and the good sense of the agriculturists in the south-west of Scotland, and he hoped that the examples which they had set would be followed in other parts of Scotland. If it were he could assure the agriculturists that they would receive the most hearty support of the Scotch Education Department. (Hear, hear.) They had given—might he say he had given?—out of a fund which came to them last year—a sum of about £35,000 which they devoted to higher education—£2,000 a year, which was set apart as a grant under that Act for these agricultural institutions; and they distinctly contemplated that move as forming a part of the scheme of operations under the Education Bill which he introduced into Parliament this last session. That Bill would without doubt become law in another session, and he believed it would do a great deal of good to agricultural education. They looked to such societies as the Highland Society to give them all the help they could, and he thought those who were interested in the management of the Society and others knew that after the meeting in the month of June with some friends of agricultural education they arranged the details of a scheme which, if carried into effect, would effectually prevent it being hereafter said that agricultural opinion in Scotland was being neglected in this matter of agricultural education by the Education Department. Although the Bill had not passed, that scheme remained binding upon both of them, and he hoped when the Bill did pass that it would be carried into effect and prove really successful.

LETTER TO THE EDITOR.

Manure for Bog Land.

Sir,—Will you or some of your readers say what is the most suitable artificial manure (to use on newly reclaimed partial bog land) for a potato crop? The land is to have a heavy dressing of lime in the autumn or early spring.—And oblige yours, A.

Considerable excitement prevailed on the Great Western Railway, between Garnant and Brynamman, South Wales, as the result of the down fast train being charged by a bull. In the impact, one of the coaches was thrown off the line and the engine slightly damaged, while the infuriated beast was cut to pieces. The passengers were greatly alarmed, but no one was injured. Another accident of a similar nature is reported to have occurred on Saturday near Resolven, South Wales, on the Great Western Railway, when a train dashed into some heifers which had strayed on to the line. One of the animals was killed. The train was promptly stopped, and it was found that the passengers had escaped unhurt.

FARM PROSPECTS.

Herefordshire.

We are suffering with the wave of heat, which appears to extend not only throughout Europe, but over a large area of the United States and other countries. So far as my memory serves me, it is quite unprecedented. Almost throughout May and June we were many days and nights shivering with cold, a fact which makes it the more trying to bear such an excessive heat. It has been

A Grand Time for Haymaking,

but the crops, with few exceptions, are extremely light. The same may be said of the corn crop—they are light in the straw and by no means bulky in the head. Live stock of the farm continue healthy where well cared for. We hear of some outbreaks of swine fever in distant counties, also of sheep scab in this, our border county, and we see no hope of the country being rendered free from it until

Compulsory Regulations

are enforced by a central authority. Both fat and store stock of prime quality sell at very satisfactory prices. The apple crop will not compare with last year, and pears are, as far as we know, a decided failure. The fly has been very troublesome with the roots, and, like the hops, they require a good fall of rain, or our position will be much worse than last year; a hot, burning St. Swithin induces the fear that it will be so.—E. F. (July 20th).

North Cornwall.

In consequence of the hot weather following heavy rains, farm crops generally have much improved, and with fine weather from now to harvest there will be heavy crops of corn and straw. Wheat is thick in the ground, and a good length; oats on well-farmed land look remarkably well, and promise abundance of grain and straw. Hay is a fair crop, and although the weather has been "catchy" for saving, I do not think much damage has been done. Mangolds are a good plant, and growing fast, but in consequence of the wet weather are very weedy and expensive to hoe. Swedes have been much punished by "the fly," but are a fair plant. Grass is very plentiful, and live stock of all kinds are doing well. Beef sells well at good prices, and there is a good demand for mutton and lamb at fair prices; good horses and pigs sell well. Wool is a wretched price, with but little demand. Winter oats are ripening fast, and some will be cut next week in this neighbourhood. Labour is scarce, and most of the corn in this district will be cut by the self-binding reaper.—R. S.O. (July 19th).

Shropshire.

Barometer lowering, sky darkening, thunders rolling, a breeze cooling. A double want:—Fine weather to carry hay, and soaking rain for parched land.—J. G. (July 20th).

West Derbyshire.

The weather has been very hot and forcing, but rather unsettled for the hay harvest. Mangolds and turnips are growing very fast and look promising. The wheat and oat crops will be some of

The Best We Have Had for Years.

Grass is very plentiful, so that young stock and sheep are growing well. Beef and mutton are fairly well sold. Dairy cows are milking well. Labour is very scarce and dear, and the harvest being a fortnight later than usual, makes it very awkward to keep up with the work.—C. C. M. (July 21st).

West Somerset.

I fancy we are experiencing a similar season to last year, not having had any ground rain since February. All cereal crops, say, wheat, barley, and oats, seem to stand it, and are looking well, but not a heavy burden of straw or corn. I should say 10 per cent. less than average. The hay harvest is about completed, and in most instances made well and an average crop, the weather more favourable after midsummer than the earlier part, stormy weather causing a little delay.

Root Crop Precarious.

Mangolds generally are a good plant and growing, but flag with the heat. The swedes and common turnips, sown on fallow land, are a plant and under the hoe, but the land after trifolium, etc., is too dry in its present state to get a plant or for a plant to live. Without a ground rain very shortly I look upon the root crop as being very precarious. The grass lands are becoming parched and burnt; the apple crop, although many are falling, bids to be a fair one. The live stock are healthy, but seek shelter from the sun and heat if it is possible to be found. We expect corn harvest to commence the first week in August.—A. B. (July 20th).

West Sussex.

Time of Cutting.

The present spell of hot, fine weather has made the end of the haying season much better than the beginning, and a fair crop has been secured in variable condition. There are signs of harvest now; winter oats will be cut the beginning of next week, and a few early pieces of wheat the week after on good land. Whea is well-headed on a short straw, but oats are a short crop. Mangolds, when put in early, look very well, and the roots are swelling fast. The late sheep fairs have been much duller than was expected.—(July 20th.)

Foreign Prospects.

FRANCE. The at times tropical heat recently experienced has brought forward the date of harvest, and wheat-cutting has already started in the departments near the metropolis, and will soon spread northwards. In most districts straw is short, but oats are heavy, and average results are hoped for. Barley looks well in the west and indifferent to ordinary in other parts; the quality is expected to be good.

SPAIN.—The wheat harvest in Andalucia and Aragon leaves something to be desired. In Castilla la Nueva it is only a medium crop. In Murcia crop conditions are bad, while in Las Riojas the ripening of the wheat is delayed by the prevalence of cold weather. Barley is almost all cut throughout the peninsula, and the yield is generally good.

HOLLAND AND BELGIUM. General expectations are for a good harvest, although thunderstorms and hail have occasioned damage here and there.

GERMANY. There is a marked improvement in the appearance of the crops, and hopes of fair results are brighter than they were a month ago.

HUNGARY. Although harvest operations have been delayed for some days by the weather, no complaints of any importance are heard respecting the wheat yield in any direction. Rye is not turning out so indifferently as was at first apprehended; while in the Pest environs a yield quite equal to last year's is in prospect. Good accounts are heard of barley, though recent rains may have affected the colour.

ROUMANIA.—The weather has been usually hot, and the wheat is said to have suffered a little therefrom, but in some parts maize is urgently in need of rain. Rye cutting is over, and will yield a medium crop. The reaping of wheat is also well advanced. Barley and oats will give good yields.

RUSSIA.—Crop reports from the principal grain producing districts continue satisfactory, the yield of barley and rye proving large in south and south-eastern governments.

POLAND.—Harvest prospects are bad in the extreme. Farmers state that for forty years the crops have never offered so deplorable an aspect as at the present time.

UNITED STATES.—The *Cincinnati Price Current* says the rains are giving important relief to maize, and a full average crop or even better is indicated. Wheat indications are maintained, and it is possible that there will be a surplus exceeding any year's exports.—*Dornbusch.*

Harvest Prospects in Scotland.

The report on the prospects for the season on the whole must be a favourable one. In the complete list of farm crops there is not one in which any serious deficiency has as yet been incurred, nor is there any present ground for expecting a future failure. The cereal crops will probably yield rather less than an average in grain, but any deficiency in fodder will be made up by a corresponding excess in the produce of hay, and a full supply of fodder for stock in the coming winter is therefore assured. The success of the cabbage and early potato crops is already visible, and the prospects of the other root crops are excellent. So far as concerns the produce of farm crops, the closing year of the century is going to be one of uneventful character and of moderate prosperity.—*Glasgow Herald.*

THE WEATHER.

MONDAY (July 16th).—Magnificent weather was experienced in most parts of England, and high summer temperatures occurred in the south-east of England. Rain was measured in the morning, as the result of the fall in the preceding twenty-four hours, in Scotland and Ireland, but there was none in England except at a very few of the western stations. The barometer had risen in most parts of the country, and the readings were uniform and fairly high. The winds were mostly southerly and everywhere light. Sunday night was very warm, the temperature over a large portion of England not falling below sixty degrees. The weather was exceptionally hot in London, the thermometer in the suburbs registering ninety-three degrees in the shade, which is the highest reading in July for about twenty years, and is higher than in any summer since 1893.

TUESDAY (July 17th).—Fine and very bright weather was experienced again in most parts of England, but there was a good amount of cloud at the Scotch and Irish stations. Rain was measured in the morning, as the result of the fall since the previous day, in the north and west, and thunderstorms had occurred in several places The temperature had risen in the northern and eastern districts, but it was not so high as on the previous day in the south-east of England. The day was very fine in London, and in the sun's rays the weather was oppressive. In the shade the morning was about 12deg. cooler than on Monday, but in the afternoon the difference between the two days was only about 5deg. The highest temperature in London was 84deg.

WEDNESDAY (July 18th).—Brilliant weather was experienced over the greater part of England, but there was a good deal of cloud at the Scotch and Irish stations. Scarcely any rain has fallen since Tuesday morning, and in parts of Kent no rain has occurred during the last sixteen days. A shallow cyclonic disturbance was passing along our north-west coasts, and the barometer was falling slightly over the entire kingdom, although the readings were still fairly high. The winds were mostly south-westerly, and they had gained in strength on our north coasts. The day was again warm, especially inland and in the east of Great Britain. There was continuous bright sunshine in London throughout the day, and the temperature in the early afternoon registered 86deg. in the shade.

THURSDAY (July 19th).—The weather was again excessively warm in most parts of our islands, and in many places the thermometer registered a higher reading than on any previous occasion during the present summer. In Westminster the shade temperature registered 90deg., while in the southern suburbs of London the thermometer rose to 92deg., which is precisely the same reading as on Monday, when the temperature was most exceptionally high for a July reading. No rain was reported from any part of England, and there was very little in either Scotland or Ireland.

FRIDAY (July 20th). The heat was again very great in London, the thermometer registering between 90deg. and 92deg. In Westminster, as well as in the suburbs, the temperature rose about as high as at any time during the present bright warm spell. The air was very warm throughout Thursday night, the temperature scarcely falling below 66deg. in any part of England. Thunderstorms were again reported from several places in the west, and rain was measured in the morning at many places in the north and west, being the result of the fall during the preceding twenty-four hours. The winds were mostly from between east and north. The weather was very warm over the inland parts of England, but in many parts of the country the midday temperatures were below 70deg., and they were below 60deg. on the north-east coast of Scotland.

SATURDAY AND SUNDAY (July 21st and 22nd).—Rain occurred at several places in our islands on Saturday, but the amounts measured were generally small, and the weather on Sunday was mostly dry and fine again. The temperature continued high over England, but owing to the prevalence of cloud on Saturday the thermometer stood rather lower than of late, although in many places the readings were between seventy-five and eighty degrees. On Sunday the temperature was again rather higher, but readings above eighty degrees were exceptional. In London the highest temperature on Saturday was seventy-eight degrees, and on Sunday it registered eighty degrees. No appreciable amount of rain has fallen in London for nineteen days.

National Memorial to the Duke of Westminster.—His Royal Highness the Prince of Wales recently presided at Marlborough House over a numerously attended meeting of the general committee which has been formed to promote a national memorial to the late Duke of Westminster. It was explained by the Bishop of London that the movement for the memorial originated in a desire on the part of the various associations and institutions which the Duke had helped, and in which he had shown a personal interest, to put on permanent record their debt of gratitude. It was soon found that the scope of the Memorial Committee would have to be widened beyond the area of any particular societies. Personal friends of the Duke wished to join in the movement, and representatives of the various causes which he supported desired to be associated with the memorial, though not especially connected with any one society. A small executive committee had been appointed for the purpose of reporting on the site and form of the proposed memorial, and after careful consideration it was concluded that, as the Duke was Lord High Steward of Westminster, there was no place more fitting for a memorial of him than Westminster Abbey. After consultation with the Dean and Chapter, and with the concurrence of the Duchess, it was decided to recommend that the memorial should take the form of filling the Rose window in the south transept and the twelve lights below it with stained glass of a more satisfactory character and more harmonious colouring than that which is now there. It was proposed, with the concurrence of the Abbey authorities, that the work shall be executed under the general direction of Mr. Bodley, A.R.A. The cost of the work would be, it was estimated, not less than £3,000. A report embodying the above ideas was unanimously carried. The hon. secretaries will be glad to receive at 1, Great College Street, Westminster, S.W., further contributions in order that the work may be put in hand without delay.

CORN MARKETS.

LONDON.

Mark Lane, Monday.— Malt: There has been rather more doing during the past week Barley rather dearer. Wheat about 6d per qr cheaper. Oats unchanged. Maize in some cases made 3d per qr more money. Flour quiet, without alteration in price.—NIXON, GOWER AND CO.

Mark Lane, Wednesday.— English wheat continues to come up in very restricted supply, and the little submitted is more on country markets than here, millers finding the former more remunerative. New wheat is expected up by about the end of the month. Fine white, 33s, and red of similar sample 32s, 63lb delivered. American descriptions depreciated in rate, with No. 1 hard Manitoba ruling nominal at 33s 6d ex ship. Consumers were indisposed to meet offers, even at a reduction of 6d per sack, but, with stocks and arrivals of American kept down, holders were not pressing. English patents, 26s to 27s; and roller, white, 23s to 24s; stone, 22s per sack. Town household, 28s 6d, and whites, 25s 6d per sack. Grinding barley unaltered, with Persian still in fair supply and furnishing wants.

Mark Lane, Friday.—New wheat is expected up by the end of the month, and cuttings have already commenced of rye and winter oats. Old home-grown wheat is now very scarce, with practically nothing submitted, either here or in the country markets. Fine white held for 33s, and red of similar sample 32s, 63lb delivered. Flour, only naturally, moves in conjunction with wheat, and again experienced an exceedingly poor following; but, although consumers were not forthcoming, sellers, on the other hand, were not anxious to treat, except at previous quotations, which, were, however, found difficult to sustain. Among feeding stuffs, grinding barley retains steadiness, and were it not for Persian, which is fairly plentiful at the moment, white supplying wants, the market would tend further against buyers. After declining fully 1s 6d on the week, flat maize ruled steady to-day, at the recession, round corn being lower.

COUNTRY.

Ashford, Tuesday.—Trade very quiet at last week's rates for all sorts of corn on offer, except, perhaps, flat maize, which was 6d dearer on the week.

Aylesbury, Saturday.—Wheat in small supply and trade rather quiet at last week's prices, viz., 29s to 30s per quarter. All other articles unchanged.

Banbury, Thursday.—Wheat (white), 30s to 31s per qr; wheat (red), 29s to 30s 6d per qr; beans (new), 30s to 32s beans (old), 20s to 21s per qr. Very small supply of wheat, which sells at barely last week's rates.

Barnsley, Wednesday.—There was only a moderate attendance. Wheat sold slowly at last week's rates, good samples making 12s per load of three bushels. Oats were disposed of at late quotations; white, 25s to 26s; black, 22s per qr. There was no change in other grain.

Bristol, Thursday.—The brilliant weather and the better crop report have tended to check business and make lower prices. English wheat at to-day's market was unaltered, samples being scarce. Foreign 6d to 1s lower. Grinding barley, round maize, and oats without change. Flat maize declined 9d. Flour—The continued hot weather prevents any disposition to buy.—GRACE BROTHERS.

Cambridge, Saturday.—During the week the wheat trade has been quiet, with little doing. At this market to-day there was a moderate supply of wheat, and prices were 6d cheaper. Wheat, red, 30s to 31s; and white up to 32s per 504lb.

Canterbury, Saturday.—A quiet trade. Maize tends easier. Ruling prices:—White wheat, 30s to 32s 6d; red ditto, 28s to 31s; grinding barley, 20s to 22s; white oats, 19s to 21s; ditto black, 19s to 21s; peas, 30s to 32s; tick beans 30s to 32s; mazagans, 28s to 29s; flat maize, 21s to 22s; round ditto, 26s to 27s per quarter.

Carlisle, Saturday. — Very small supply of oats in our market to-day owing to agricultural show being held here. There was a good demand at fully last week's prices, 22s to 23s 6d per 336lb. No wheat or barley shown.—THOMAS ROBINSON.

Chester, Saturday.—There were few samples of English grain offering. Wheat was 1d per bushel lower on the week, but oats were firmer, and commanding an advance of 1d per bushel. Quotations:—Wheat, old, 4s 4d to 4s 5d per 75lb; grinding barley, 3s to 3s 6d per 64lb; beans, new, 4s 10d to 5s; old, 5s 6d per 80lb; oats, new, 2s 8d to 2s 11d; old, 2s 10d to 3s per 46lb. Indian corn 10s 6d to 11s 6d per 240lb.

Chichester, Wednesday.—Thin attendance and very quiet market. Wheat was in small supply, and what business was done was at 1s per quarter advance on the week. Fair consumptive demand for feeding stuffs, which were mostly steady at late rates. Maize, however, was 6d down.

Colchester, Saturday.—Moderate supply. Wheat, steady trade at last week's prices. Beans and oats firm.—FRANCIS AND CO.

Dorchester, Saturday.—With but moderate offers of grain business ruled very slack at a general decline in prices, being quite 3d to 6d lower on the week, and in some cases more. The decline in barley was scarcely to the same extent, and oats were in some cases 3d to 6d cheaper. Maize suffered the great decline, some kinds being back nearly 1s.

Gainsborough, Tuesday.—Very small show of wheat. White wheat, 30s to 31s; red, 29s to 30s; white oats, 20s to 22s; black, 18s to 20s; grinding barley, 23s; English beans, 30s; peas, 23s; small maize, 26s; flat maize, 23s per qr.

Glasgow, Wednesday.—There was a small attendance at our Corn Exchange. Owing to the holidays there has been practically no business passing in wheat and flour, and values are nominally unchanged. Indian corn meets a slow sale at a decline of 1½d to 3d per boll on the week. Canadian peas and grinding beans steady at late rates. Barley and home oats steady, but quiet. Foreign oats dull and the turn cheaper. Oatmeal dull. Bran and thirds quiet and unchanged.—GIBSON AND CLARK.

Ipswich, Tuesday.—Very small supply of wheat, and trade dull. The top prices for reds was 30s per 504lb. Oats dull. Maize rather firmer.

Leeds, Tuesday.—The weakness in America, combined with the brilliant weather, makes the trade very stagnant to-day. English wheat being scarce, is held for last week's rates. Foreign is nominally 3d to 6d per qr lower, business being extremely limited. Maize slightly easier. Beans and oats fairly steady.—DUNNS AND CO.

Leeds, Friday.—The demand for both English and foreign wheats continues of a quiet character, the further lowering of prices from Tuesday's quotations failing to induce any speculation on the part of buyers. Best English oats the turn dearer; foreign rather easier. Beans, peas, barley, maize and flour all firmly held.

Leicester, Saturday. — Fair attendance, with moderate supplies of home-grown wheats, which met a slow sale at easier rates, prices ranging from 30s to 32s per 36 stones. Beans firm. Fine oats in good demand.

Lincoln, Friday.—Small supply of English wheat, Trade very flat at rather less money. Reds, 29s to 30s; whites, 30s to 31s. Foreign wheats also easier. Oats ruled firm, with little trade doing. Maize, peas and beans no change.

Liverpool, Friday. Wheat quiet with a small business at ½d to 1d under the prices of last Tuesday. Flour in very quiet demand. Home millers make no change from their recent quotation, but American brands are frequently 6d per sack lower than last Tuesday. Maize very quiet. Mixed American is 1½d per qr lower than last Tuesday, but met a fair demand at the easier rate. European quiet, but River Plate firm at full prices. Barley steady for brewing, and firm for grinding. Beans a moderate trade at late rates. Peas quiet, and occasionally ½d per cental lower. Oats very quiet for foreign, but steady for British, which are held at full prices. Oatmeal quiet, without change in prices. Oilcake quietly steady for ready parcels, but fairly brisk demand to arrive.—SEGAR AND TUNNICLIFFE.

Maidstone, Thursday.—The continuance of intense heat causes persons to be listless as to business. Wheat transactions were few, but were firm at about last week's rates. In other grain a very small trade at about former rates.

Manchester, Thursday.—English wheat is 6d per qr lower, and foreign descriptions 2d per cental. Flour is 6d to 1s per sack down on the week. Oats and barley are unchanged. Peas and beans are rather firmer than last Thursday; actual prices are, however, unchanged. Indian corn is a little irregular, some quoting rather higher rates, whilst others will take less money.

Newark, Wednesday.—Wheat a small show at last week's prices. Feeding corn firm at full prices.

Newcastle-on-Tyne, Saturday.—Wheat at our market to-day steady at last week's prices. Maize quiet, but not quotably cheaper. Scotch oats firm, and 6d per 336lb dearer. Foreign quiet, prices steady. Peas and beans firm at late rates. Flour steady, prices unchanged.—JOSEPH POLLARD AND CO.

Newcastle-on-Tyne, Saturday. — Small attendance at market to-day, the cause of which we put down to hay-making. Wheat and flour partially neglected, which means lower prices to sell. Feeding stuffs firm, with oats asking 6d per quarter advance for Scotch samples. Flat maize inclines cheaper.

Newport (Mon.), Wednesday.—Wheat, owing to the fine weather, was 6d to 9d per quarter cheaper on the week; maize 3d cheaper, good demand; barley firm and unchanged; oats firm and dearer, good qualities being very scarce; beans without change; flour (fines), 24s per sack; offals very firm.

Northampton, Saturday.—Very small market, with a small show of wheat; demand indifferent, at about last week's prices. White and red wheat from 29s to 32s. Prospects of next crops good.

Norwich, Saturday.—Wheat in small supply, with prices somewhat against sellers. The weather during the week has been very warm. Early this morning we had a severe thunderstorm, lasting two or three hours. Wheat, red, 29s 6d to 31s per qr, weight 63lbs per bushel imperial. Corn inspector's return for the week ending 16th July, 1900:—Wheat, 2,138, 28s 9d.—J. ARTHUR MILLS.

Nottingham, Saturday.—Wheat trade about at a standstill, declining to operate; quotations unaltered. Oats and beans both sparingly represented, and both made full rates.—ROBERT HUBBLE.

Oxford, Saturday.—Very quiet market; small attendance, and little stuff offering. Farmers reluctant to sell at 1s lower price bid them, making 29s to 31s.

Peterborough, Saturday. — A week of hot forcing weather has had, as usual, effect upon the wheat trade; prices to-day gave way 6d to 1s from last Saturday. Spring corn firm, but quiet.—THOMAS HILL AND SON.

Plymouth, Thursday.—To-day's market extremely dull, in sympathy with weather. Small attendance.—ORLANDO DAVIS AND CO.

Reading, Saturday.—Business here to-day proved extremely dull, the attendance being much smaller than usual. Wheat was in scanty supply, and experienced only a slow inquiry, the quotations being 6d per qr less than at last market. The demand for other sorts of corn varied but little from last week, and prices were practically the same.

St. Neots, Thursday.—The market was thinly attended, but there was a fair quantity of wheat on offer, for which the demand ruled quiet on about former terms, viz., 30s to 31s 504lbs.—ELGOOD AND SON.

Salisbury, Tuesday.—At the Corn Exchange to-day, wheat was in short supply, and sold slowly at 6d less on the week. Beans and oats were firm at late rates. Wheat, 28s to 22s; oats, 18s to 22s; beans, 32s to 36s.

Sheffield, Tuesday.—Owing to the farmers being busy with the hay there was only a moderate attendance, and a quiet trade. A particularly slow trade in wheat at last week's prices. Beans, oats, and small maize firm at full prices. Quotations:—Wheat, white, 33s to 33s 6d; ditto red, 32s to 33s per 504lb; oats, new white, 22s to 23s; ditto new black, 18s to 19s; ditto old white, 22s to 23s; ditto old black, 19s to 21s per 336lb; peas, grinding, 28s to 29s; ditto blue, 53s to 70s per 504lb; beans, Egyptian, 31s 6d to 32s; ditto, English (new), 31s 6d to 32s per 532lb; barley, grinding, 23s to 24s 6d; ditto malting, 27s to 35s per 448lb; Indian corn, small, 26s to 27s 6d; ditto American mixed, 22s 6d to 23s per 480lb.

Shrewsbury, Saturday.—The quantity of wheat offered on country markets has been extremely small, and former prices have been realised. Oats, peas, and beans have also been in short supply, and a limited business has been put through at unchanged rates. Flour has met with a dull trade at a reduction of 6d to 1s per sack. Milling offals have continued to move freely at steady prices.—W. L. BROWNE AND CO.

Spalding, Tuesday.—There was very little doing. Wheat was quoted at 29s to 30s per qr, a drop of 1s on the week. Oats were more inquired for, at 21s 6d to 22s, a rise of 3d to 6d per qr. Beans made 33s, an advance of 6d, and maize sold at the same price as last week.

Stockton, Wednesday.—There were not many samples of farmers' wheat showing, and these made 30s per qr. The hot weather seems to have been too much for the foreign wheat trade, and very little business was passing, buyers holding off in the hope of lower prices. Oats and maize made last week's prices.

Sunderland, Saturday.—Wheat in moderate supply, which sold in sellers' favour. Little doing in spring corn. Arrivals coastwise: Oats, 168 qrs.; foreign nil.—E. AND F. RICHARDSON.

Taunton, Saturday.—Small attendance; very little offering. Wheat about the same prices as last week. Feeding stuffs little doing.

Wakefield, Friday.—There is an easier tone in wheats to-day, and in the business passing on our market, which is merely nominal, 6d per qr reduction is accepted. No alteration in feeding stuffs. — MICHAEL SANDERSON AND SON, LIMITED.

Wakefield, Friday.—American crop advices and market movements are so changeable and contradictory that the trade on this side is utterly puzzled. Our market is thinly attended and business almost suspended. English wheat maintains its value; foreign is 6d to 9d per qr lower on the week. Very little passing in maize, beans, or oats at late rates.—DUNNS AND CO.

Winchester, Saturday. Wheat in short supply, which met a slow trade at barely last week's prices. Barley unaltered. Maize 6d to 1s cheaper. Oats firm, with fair demand at late rates. Flour quiet at 25s to 26s.—FEAR, COLEBROOK AND CO. LTD.

Wisbech, Saturday.—Very little grain offering. Fresh thrashed samples of wheat sold at fully late rates. Red, 30s.; white, 31s. Oats, 20s to 24s. Beans, 30s to 33s.—JAMES FLETCHER.

Wolverhampton, Wednesday. Proceedings were of a holiday character. English wheat was 13s 6d per 216lb; oats, 13s to 14s; beans (new), 13s to 14s; beans (old), 14s 6d to 15s 6d per 186lb; flat maize, 21s 9d to 22s 6d per 480lb.

Worcester, Saturday. — The corn crops have ripened rapidly during the week. There was a small attendance and slow trade to day, prices being generally easier. Wheat was 6d to 1s cheaper. Barley, maize, and oats all favoured buyers. Beans firm. Wheat: white, 28s to 29s; red, 26s to 28s per quarter.

Worksop, Wednesday.—Small attendance. Trade slow. Small show of grain. White wheat, 29s to 30s; red wheat, 28s to 29s; grinding barley, 26s to 28s; white oats, 21s to 23s; black ditto, 20s to 22s; flat maize, 23s 6d to 25s; round maize, 25s 6d to 26s 6d per qr.

York, Saturday.—With a small supply prices of wheat remain without change. The average prices of grain during the week, according to the official corn return, have been: Wheat, 28s 3d; barley, 23s 7d; and oats, 19s per quarter.

FOREIGN.

The Antwerp wheat market has ruled quiet, and prices have slightly fallen. The French harvest is being carried on under favourable conditions, and the yield is better than had been at one time hoped for. There is not expected to be any great amount of business passing in the French provincial markets until the new crop comes freely to hand. The Paris wheat market has been influenced by the weakness of American quotations; flour for consumption has been dull and weak in the French capital. The more favourable estimates now formed with respect to the French wheat crop are reflected in the fact that while two months since it was set down at barely 100,000,000 hectolitres it is now thought that it will amount to 110,000,000 hectolitres. Should this latter anticipation be realised, the crop of 1900 will nearly reach the average of the last ten years. Disposable wheat has shown scarcely any change at Dantzic; the Konigsberg wheat market has exhibited a quiet tone. A good current of business has been passing in wheat at Ibrail, but there has been less doing at Galatz. We further learn from Ibrail that the samples of new wheat thus brought forward have been of superior weight and quality. The quantity of wheat now en route for Europe is returned at 1,370,000 qrs. as compared with 1,360,000 qrs. at the corresponding date of 1899. The total of 1,370,000 qrs. representing the quantity of wheat now en route for the Continent is made up as follows:— France, 95,000 qrs.; Belgium, 425,000 qrs.; Holland, 372,000 qrs.; Germany and the North, 240,000 qrs.; and Italy, Spain, etc., 238,000 qrs.

Hamburg, Saturday.—Barley report: The fine sunny weather continues here, now and then interrupted by a thunderstorm, but this weather will surely suit our barley crop, which seems to become a very good one. Cutting in the Saale districts, Bohemia, and Moravia will now soon commence, whilst in Hungary harvest is in full swing, and samples are likely soon to appear.—FRANCIS M. TH. DUHNE.

Hamburg, Saturday.—With forcing, hot weather and intermittent showers the growing crops are making satisfactory progress, but the yield will not reach that of last year. In sympathy with foreign markets prices here have a downward tendency, which is likely to continue if the weather keeps fine. The imports during the week amounted to 8,449 tons wheat, 4,968 tons rye, 2,487 tons barley, 20,768 tons maize. Fine German wheat, being scantily offered, is held at 29s 3d to 30s 6d per 504lb f.o.b. River Plate on the spot and to arrive is offering at 26s 6d to 27s 9d; Hard Winter, No. 2, old crop, at 27s 6d; new crop at 28s 6d per 480lb c.i.f., Hamburg. Rye quiet; 9 10-15 South Russian prompt is offering at 22s 9d; September-October, at 22s per 480lb c.i.f., Hamburg. A few parcels of good Bohemian barley are still offering on the spot at 28s 6d to 31s per 448lb f.o.b. The growing crops have a highly satisfactory appearance in the Saal district and in Bavaria, while reports from Bohemia, Moravia, and Hungary are rather conflicting; it seems as if the quantity will be less than last year, while quality still depends upon the weather during the next few weeks. In some districts there are complaints about drought; in others they have too much rain. It is yet too early to form an opinion about the probable results. Feeding barley is not much altered in value, 60-61 Ko. South Russian on the spot is held at 18s 9d, Sept.-Oct. shipments 17s 3d per 400lb. c.i.f. Hamburg. Mixed maize met a better demand at the reduced rates, and closes firmer. July deliveries are selling at 19s, Aug.-Sept. are held at 19s 6d to 19s 9d per 480lb c.i.f. Hamburg. —JOHN TATLOCK.

POULTRY AND PROVISIONS.

Smithfield, Saturday.—Fair supplies were offered this morning, but the majority continue to arrive in bad condition. Quotations. Fowls : Yorkshire, 2s 3d to 2s 9d ; Essex, 2s 6d to 3s ; Sussex, 2s 6d to 3s ; Boston, 2s to 2s 6d ; Welsh, 1s 9d to 2s 6d ; Surrey, 2s 9d to 3s 6d ; Irish, 1s 6d to 2s ; Aylesbury ducklings, 2s 6d to 3s ; country ducks, 2s to 2s 6d ; goslings, 3s to 4s ; Egyptian quail, 10d to 1s 3d ; Bordeaux pigeons, 9d to 1s ; feathered ditto, 7d to 9d ; tame rabbits, 1s to 1s 3d each ; Australian, 6s to 7s 6d per dozen ; venison, haunches, 15s to 18s each ; forequarters, 4d per lb.

Liverpool, Saturday.—Bacon : The demand is disappointing, and values on the spot, notwithstanding the firm trade advices from Chicago, are somewhat easier. Hams meet with a good inquiry at advancing prices, especially for light weights. Lard in steady request at the quotations. Beef dull and easier. Pork quiet at recent values. Cheese.—The market has ruled quiet all week. The consumptive demand is reduced, and dealers hold off, anticipating lower prices. We quote to-day, finest-coloured States and Canadians, 47s 6d to 48s 6d ; white, 47s to 48s ; medium qualities, full cream, sell fairly well from 40s to 46s, but lower grades are neglected.—HODGSON BROTHERS.

Newport, Wednesday.—A good supply and business was quiet. The quotations were :— Caerphillies, 40s to 45s per cwt ; fancy dairies, 46s to 49s ; doubles, 50s to —s; and truckles, 52s to 56s per cwt.

BUTTER.

Tuesday.—Bedale : 1s 5d to 1s 6d per roll of 24oz. Gainsborough : 1s 1d per lb. Sheffield : 1s 2d to 1s 3d per lb. Spalding : 1s to 1s 1d per lb.

Wednesday.—Market Drayton : Best, 11d to 1s 1d per lb ; seconds, 10d to 1s per lb. Uttoxeter : 1s to 1s 2d per lb. Barnsley : 1s 1d to 1s 2d per lb. Colne : 1s 1d per lb. Goole : 1s 1d per lb. Keighley : 1s 1d per lb. Knaresborough : Wholesale, 1s 4d to 1s 6d ; retail, 1s 7d to 1s 8d per roll of 24oz.

Thursday.—Brigg : 1s 1d to 1s 2d per lb. Driffield : 11d per lb. Ripon : 1s 6d to 1s 7d per roll of 24oz. Scarborough : 1s per lb. Wetherby : 1s 2d to 1s 3d per lb. Liverpool : Danish, finest, 112s to 114s ; secondary, 108s to 110s ; Irish creameries, 100s to 104s, secondaries ranging as low as 90s ; Irish factories, 90s to 94s. Dairies, 98s to 99s. Bristol : Prices a little easier, but the demand is not of a very enthusiastic character. Cardiff : The market is very firm, and merchants are asking 2s more than last week for Irish creameries. Best Danish is firm at 114s to 114s, unscented varieties are 2d less.

Friday : Altrincham : 1s 2d per lb. Crewe : 1s 2d per lb. Chester : 1s 2d per lb. Easingwold : 11d to 1s per lb. Helmsley : 11d to 1s per lb. Leeds : Danish, 108s to 114s per 112lb ; Irish creameries, 100s to 104s ; York : Irish, 1s 2d per stone ; ditto long rolls 1½lb, 1s 3d to 1s 6d ; fresh butter in 1lb prints, 11d per lb. Leyburn : 1s 1d per lb. Louth : Lincoln : 1s 1d to 1s 2d per lb. Otley : 1s 2d to 1s 6d per roll of 24oz. Manchester : Danish and Swedish, 108s to 110s per cwt ; Irish creameries, superfine, 98s to 104s. Birmingham : A good demand for choicest quality, of which market is cleared at last week's prices. Secondaries move slowly, and large stocks left over. Nearly all the Danish has advanced 1s on the week and is now quoted at 112s to 114s per cwt. Glasgow : More liberal imports of Danish, and market well cleared at former values. Irish creameries in good request and prices rather firmer. Irish factories in fair demand at former values. Leith : In spite of rather limited demand very little really choice keep. Danish and Swedish creameries remains unsold. Prices are nominally unchanged. Hull : No change in Danish, but other descriptions move slowly at former rates.

EGGS.

Tuesday.—Bedale : 13 to 14 for 1s. Gainsborough : 14 for 1s. Sheffield : 12 or 13 for 1s. Spalding : 15 or 16 for 1s.

Wednesday.—Market Drayton : Hen eggs 13 to 14 for 1s ; duck eggs 1s 3d per dozen ; turkey eggs 6 on : for 1s. Uttoxeter : 1s 3d to 1s 5d per score. Barnsley : 12 and 13 for 1s. Colne : 1s 5d per score. Goole : 15 for 1s. Keighley : 12 for 1s. Knaresborough : 13 or 14 for 1s.

Thursday.—Brigg : 16 to 17 for 1s. Driffield : 16 or 17 for 1s. Scarborough : 12 for 1s. Wetherby : 14 to 16 for 1s. Liverpool : Supplies are liberal and the demand good ; old values to retain per locally unchanged. Cardiff : Eggs are very firm, best Irish selected being from 1s to 1s 1d each, to 6s 6d ; Welsh, 7s to 7s 6d ; foreign eggs are 6d dearer.

Friday.—Crewe : 12 and 13 for 1s. Leamington : 14 and 16 for 1s. Helmsley : 15 or 16 for 1s. Leeds : York Pure 8s 9d to 9s 3d per 120 ; Irish, 7s to 7s 6d ; Danish, 6s 6d to 7s 2d ; Austrian, blues, 5s 6d to 6s ; ditto, reds, 4s 7d to 4s 10d. Leyburn : 14 for 1s. Lincoln : 15 for 1s. Otley : 14 to 15 for 1s. Manchester : The market has been dull, but prices are 2d to 3d higher. Birmingham : Good demand for best sorts, but cheaper kinds move slowly. Extra Normandy, 7s ; best French, 6s 8d ; Danish, 7s 3d to 8s 6d ; Irish, 7s to 8s 6d. Newcastle-on-Tyne : Danish are steady at 6s 9d to 7s 6d per 100. Glasgow : A rather poor demand. Quotations are steady. Irish, 5s 10d to 6s 6d ; Danish, 6s to 7s ; Russian, 4s 3d to 5s. 3d. Leith : Prime Danish fresh have sold well at 6s to 6s 8d per 120 for 16lbs. Hull : Owing to great heat eggs have been quiet, and prices are the same as last week.

FRUIT AND VEGETABLES.

Covent Garden, Saturday.—Vegetables were in fair demand, and good supply. Good asparagus has ruled a good demand. Moderate arrivals of potatoes and onions. Cabbages, 3s to 4s per tally ; cauliflowers 4s per dozen ; beetroots, 5s per hamper ; peas, 2s to 3s 6d per bushel ; carrots, 4s ; turnips, 4s per dozen bunches ; horseradish 1s to 1s 6d per bundle ; English spring onions, 2s per dozen bunches ; Egyptian onions, 4s per bag ; Lisbon grapes, 9d to 2s 6d ; Belgian, 6d to 1s 3d per lb ; Tasmanian apples, 8s to 12s per case ; English cherries, 3s to 4s ; French, 4s to 8s ; red currants, 4s 6d to 6s ; black, 4s to 6s per half sieve ; strawberries, 3s to 6s per punnet ; peaches 6s to 8s per dozen ; Valencia oranges, 14s to 20s ; Messina, 12s to 16s ; lemons, 8s to 16s per case ; bananas, 4s 6d to 8s per bunch ; pineapples, 1s 6d to 4s each.

POTATOES.

Borough and Spitalfields, Saturday.—Supplies moderate, with prices lower. English Kents, Prentice, 5s 6d to 6s ; ditto Beauty of Hebron, 5s to 6s ; ditto Somersets, 5s to 6s ; ditto Early Regents, 5s to 6s. French Reds, 4s to 5s per cwt.

HOPS.

Canterbury, Saturday.—There are many acres which do not look like growing any hops, but where the gardens have been repeatedly washed and well cultivated the vines are looping nicely. The hot weather of the past week has caused the growth of laterals very noticeably, but the yield is expected to prove a very late average in point of quantity.

Worcester, Saturday.—Trade is quiet, and only two pockets of growers' hops passed the pickers' scales this week. There is no appreciable advance in values, although the plantation outlook points to a short crop. Where washing and cultivation have been thorough the bines are making good progress, but where neglected in any particular respect the plant is in a very critical state, and many stand to look like knocking up altogether.

Worcester, Saturday.—There has been very little doing in hops on our market, and not many pockets have been weighed at the pickers' scales this week. The bines are growing fine, but the pretty general complaint is that the plant still follows up the plant most persistently, and washing has to be carried on continuously. Prime YEO.

MANURES.

Liverpool, Friday.—Trade in fertilisers and feeding stuffs is very quiet, and the following are the current quotations, which in some instances are purely nominal, in consequence of business passing. Nitrate of soda, best quality, i.e., guaranteed 95 per cent. prime, [illegible] East India bone meal, in bags, £8 [illegible] Lancashire, prime 23 per cent. [illegible] Kainit, prime 25 per cent. [illegible] Sulphate of ammonia, [illegible] ton, basis of 24% per cent., in bags, £12 [illegible] bags, £7 7s 6d to £7 15s per ton ; ditto [illegible] bulk, £7 18s 9d to £8 5s per ton ; ditto, [illegible] in bags, £7 [illegible] Rape cake, N.A., decorticated quality [illegible] per ton. Linseed cake, [illegible] £6 17s 6d to £7 per ton ; ditto, English, undecorticated, prime, in bulk, £4 5s to £4 7s 6d per ton ; cottonseed cake, [illegible] £4 [illegible] per ton. Linseed meal, [illegible] £4 [illegible] per ton. Rapeseed meal, [illegible] £4 [illegible] per ton. Palm nut kernel cake, [illegible] £4 [illegible] per ton. Maize meal, [illegible] £4 [illegible] per ton. Locust beans, [illegible] £5 [illegible] per ton. Cocoanut cake, [illegible] £5 [illegible] per ton. Bean meal, [illegible] £5 [illegible] per ton. Bean flour, [illegible] £5 [illegible] per ton. Bran, [illegible] £4 [illegible] per ton. Middlings, [illegible] £4 [illegible] per ton. Pollard, [illegible] £4 [illegible] per ton. Maize, [illegible] £4 [illegible] per ton. Barley meal, [illegible] £4 [illegible] per ton. Oat meal, [illegible] £4 [illegible] per ton. Oat dust, [illegible] £4 [illegible] per ton. Beans, [illegible] £4 [illegible] per ton. Peas, [illegible] £4 [illegible] per ton. Locust beans, [illegible] £4 [illegible] per ton. Cocoanut cake, [illegible] £4 [illegible] per ton. Bean meal, [illegible] £4 [illegible] per ton. Bean flour, [illegible] £4 [illegible] per ton. Bran, [illegible] £4 [illegible] per ton. Middlings, [illegible] £4 [illegible] per ton. Pollard, [illegible] £4 [illegible] per ton. Maize, [illegible] £4 [illegible] per ton. Barley meal, [illegible] £4 [illegible] per ton. Oat meal, [illegible] £4 [illegible] per ton. Oat dust, [illegible] £4 [illegible] per ton. Beans, [illegible] £4 [illegible] per ton. Peas, [illegible] £4 [illegible] per ton.

Winsford (Cheshire), Saturday.—Current price [illegible] 35 to 36 sol., in bags ; basic slag, prime quality, guaranteed, [illegible] per ton.

THE STATIONERY PRINTING

Review of the British Corn Trade

DURING THE PAST WEEK

Written exclusively for the Mark Lane Express.

The heat wave which prevailed from the 10th to the 20th has now been modified by cooler currents, and the tropical characteristics, which had been forcing plant growth too rapidly for quality, have yielded to pleasant average summer weather. It is not yet known where a heat deficiency has been prevalent, for both the United States and Canada report extremely high temperatures. In France the mean temperature for the seven days ended Thursday, inclusive, was 77 deg., which, though nothing very excessive, is 7 deg. above the mean of fifty years. The Russian and German reports also announce hot weather. Harvest in England should now be fairly general by the 6th August, instead of the 13th, which was the date assumed a fortnight ago. The new wheat which has been shown at Toulouse, Bordeaux, and even as far north as Poitiers, is of good quality and fair weight. The European and English wheat crops should agree in attaining a full average strength in gluten and in a fair hardness of grain such as roller millers prefer. That the yield in bulk will be heavy nobody maintains, "nearly an average" is the opinion of all Europe west of the Vistula. Roumania, Bulgaria, and Turkey are the only countries giving over an average wheat crop this year; Russia and Poland expect a full average. The Russian harvests of recent years are stated to have been seriously overestimated, as the reserves are fifteen million qrs. less than they should in theory be. But there is another explanation which is worth consideration. The well-fed English and French farming classes do not eat more in a year of plenty than in a lean year, so that their total food wants may be reckoned at 73,000,000 qrs., and the yields being subtracted from that total, the imports needed are revealed. Can we say this of Russia? In a lean year a population of 120,000,000 manage to "hold the fort" on 40,000,000 qrs. of wheat, or 160lb. of wheat per *head*. But it seems to us a purely western idea to suppose that *therefore*, when 56,000,000 qrs. are grown there are 16,000,000 qrs. available for exportation. If, under the influence of prosperity, each Russian allowed himself 200lb. of wheat in the year instead of 160lb. the surplus named would be reduced to 6,000,000 qrs., a figure in accordance with actual exports. England eats 360lb. of wheat per *head*, France 510lb.; but Russia eats a large quantity of rye. The Russians, in fact, are great eaters, but they prefer quantity to quality. Their average yearly ration is believed to be 400lb. of rye and 160lb. of wheat, or 560lb. in all of cereals. But it is by no means unlikely that in a prosperous year the proportion of white bread eaten is increased by 20 to 25 per cent.

The British markets of the past week have been unable to stand up against the continued heat. At Manchester, where it is said to rain "if anywhere," Friday was a very wet day, but for the most part there was no break in absolutely torrid conditions before Saturday noon. The night temperature of Friday in London was 77 deg., but in the course of Saturday there was a fall to 71 deg. If the weather keeps at a fair summer heat, no more and no less, it will have the curious effect of simultaneously helping the crops and steadying the markets.

The heat from the 15th to the 20th was too forcing for proper development of the grain, yet it was treated by the Exchange as an invincible argument for lower prices. For one thing, great heat tells seriously against stocks of flour. The price of flour is quite 6d. lower at all markets. Wheat is too irregular for one quotation to be just. American sorts are 1s. down as a rule, and there is 6d. fall in Argentine, but Russian is steady for the most part, Chilian is scarce and dear, and English varies with local supply.

The prospect of a short yield of straw from all four cereals has made stores of 1898 and 1899 straw appreciate in value very notably; 3s. to 5s. a load rise on the fortnight may safely be quoted in wheat, rye, oats, and barley straws. Hay and clover are still rising in value, with a sustaining influence on feeding barley and pulse, but apparently little effect on maize or oats, both of which are to be bought at less money from the 16th. The fall in American maize is 9d. per qr., and there is 6d. fall in round corn. On oats and on yellow maize 3d. is the most that is at present conceded.

Corrected details of last October's maize crop show that there was a decidedly under average crop in Russia, Austria, Roumania, and Canada; but an over average yield in America, Spain, and Italy. In Hungary and France the yield was about an average. Owing mainly to the excellent American yield the world's production nearly reached 310,000,000 qrs. The large exports of 444,000 qrs. from America last month show that the surplus in that country is still considerable.

The sales of British wheat having been somewhat less than last season it will be seen that the moderation in buying foreign grain is emphasised. Value at our spot markets ought in fact to be firmer than it is. Last week's figures are:—

Wheat imports	293,000	qrs.
Flour "	126,000	"
Total "	419,000	"
English wheat	49,000	"
Total breadstuffs	468,000	"

Imports of breadstuffs since Sept. have been:—

Wheat	13,266,000	qrs.
Flour	6,172,000	"
Total	19,438,000	"
Last season	19,913,000	"

Stocks of foreign wheat in British ports on 21st July are the subject of the following return:—

1900	2,679,000	qrs.
1899	1,975,000	"
1898	1,100,000	"

The quantities of grain on passage to the United Kingdom at the present moment are not large enough to depress the markets for any staple.

The following are the quantities of wheat which were on passage to the U.K. on the 21st inst.:—

Russian	20,000	qrs.
Turkish	10,000	"
Californian	1,036,000	"
American	310,000	"
Argentine	490,000	"
Australasian	190,000	"
Total	2,056,000	"
July 21, 1899	2,540,000	"
" 1898	2,474,000	"
" 1897	810 000	"

The figures for 1897 were the smallest ever known. About 2¼ million is an average.

The quantities of other staples on passage thus compare with last year:—

	1900.		1899.
Flour	372,000 sacks	..	351,000 sacks
Maize	859,000 qrs.	..	762,000 qrs.
Barley	205,000 "	..	90,000 "
Beans	42 000 "	..	31,000 "
Linseed	170,000 "	..	149,000 "
Rapeseed	7,000 "	..	6,000 "
Cotton-seed	7,310 tons	..	2,750 tons

The imports of oats and peas into the U.K. have been up to a full average, but of barley very little is being imported, and the recent arrivals of maize have not been fully proportionate to the quantity on passage. The arrivals of linseed have been fair, those of other oilseeds small.

THE BALTIC.

Wheat cargoes are generally 6d. lower on the week. Prices made include 30s. 3d. for arrived Australian, 30s. for Californian on passage, 31s. 9d. for Manitoba prompt shipment, 30s. 3d. for No. 1 Northern nearly due, 29s. for Odessa Ghurka on passage, 28s. 3d. for Argentine on passage, 28s. for Argentine August shipment, 31s. for Russian Azima new crop September shipment, and 29s. 3d. for American No. 2 Red Winter August shipment.

Maize cargoes are 1s. lower for American, owing to the colossal shipments. Other sorts are affected by the great American supply. Prices accepted include 18s. 9d. for American, 22s. for Caucasian, 22s. 3d. for Roumanian, 21s. for Argentine, and 23s. for Odessa. Barley is 3d. cheaper, 25s. 6d. accepted for Californian and 18s. 3d. for Azoff.

Oats are lower for American and Russian, but not for other kinds. American for August shipment are very cheap at 13s. 9d., and four or five cargoes have been placed thereat. The best Canadian at 15s. 6d. are also a good bargain.

Other cargo sales of the week embrace Canadian peas at 28s., Saida beans at 28s., Azoff rye at 23s. 3d., and Smyrna dari at 23s., all per qr.

A cargo of Calcutta linseed arrived on Friday sold for 55s.; one of brown Cawnpore rapeseed on passage made 41s. per qr.

Rice cargoes remain firm. Quotations for cargoes, new crop—open charter—are as follows:—Rangoon, 7s. 9d.; Bassein, 7s. 6d.; Saigon, 7s. Cleaned rice continues in good demand.

The arrivals of grain and seed-laden vessels at Ports-of-Call have been six, as will be seen by the following table:—

Cargo.	Total.	Argentine Republic.	Cali. and Oregon.	Chili, Australia, and N.Z.	Total last week.	Total since Jan. 1, 1900.	Total same time 1899.
Wheat	6	2	3	1	15	209	180
Maize	—	—	—	—	—	6	3
Barley	—	—	—	—	—	32	6

Total	6	2	3	1	16	282	208

THIS DAY'S MARKETS.

MARK LANE, MONDAY.

[FIRST REPORT.]

The market was weaker to-day for all sorts of wheat on spot, and for delivery within a week. The term market, which at the noon call was 1d. to 2d. per cental lower for futures, exercised a depressing influence, which, coming on top of better news from the corn fields, was not to be denied. Barley was dull at currencies. Heavy Russian oats were not more than 3d. lower on the week, but lighter sorts were 6d. down, and all American descriptions were pressed on sale at a full 6d. decline. There is 1s. rise in buckwheat, 27s. being asked for Canadian, and 29s. for French. Maize was commonly spoken of as "all to pieces," the further heavy shipments from America brought value down 1s. per qr. Pulse (including beans, peas and dari) was unchanged. New English trifolium is on offer at 27s. to 28s., new French at about the same price. French millet at 45s. has a moderate sale. Some Torrified barley finds a sale at 23s. per 336lbs.

(*For Close of Market see foot of Column.*)

QUOTATIONS OFF STANDS.

JULY 23, 1900.

BRITISH GRAIN.

		s.	s.

CLOSE OF THE MARKET.

By Telephone, 2 p.m.

The market closed weak for all sorts of wheat and maize. Oats were very slow, and rather weak. Barley also slow, but not weak, as there is a genuine scarcity of spot supply.

THE FLOUR TRADE.

MARK LANE, JULY 23.

The flour trade was rather lower for London makes, but country sorts were simply dull at currencies. Made, as they are, from seasoned home wheat of the good 1899 crop, they should command favour. The finest American patents may be bought to-day for 25s. 6d., good buyers, and the secondary grades come at about 19s. 6d. for Gilt Edge, 20s. 3d. for Iron Duke, 19s. 6d. for Manhattan, and the same price for Improved Straight. The very best French flour, Renaux AA, etc., makes, 23s. 6d., but 21s. to 21s. 6d. is much more of a usual price. The finest bran from the country is quoted five guineas per ton.

LONDON TERM MARKET.

This market is held twice a day at South Sea House, and is open to elected members only. No business except for future delivery is done, and the smallest quantity that can be purchased is 1,000 quarters or 4,800 centals.

The name of the month stands for guaranteed delivery (if required) on or before the last day of that month, and the following have been the prices per cental recently made :—

WHEAT.—	July.	Aug.	Oct.	Dec.
	s. d.	s. d.	s d.	s. d.
July 16 noon	6 7 .. 6 7	.. 6 8	.. 6 8	.. 6 9

To-day noon	6 5 .. 6 6	.. 6 8	.. 6 8	.. 6 9

Maize futures made 4s. 1d. for August delivery.

The Term Market standard wheat is No. 1 Northern Spring American sold on the Duluth certificate. Other sorts of wheat can be bought at the above prices plus or minus agreed difference between the other sort and the standard quality. Quotations are by the "true hundredweight" or cental of 100lb. We do not give fractions of a penny per cental. Delivery is understood as being guaranteed on or before the last day of the month named in the quotation. The maize quoted on the Term market is flat grain from the United States.

PROVISIONS.

London, Monday.—The arrivals from Ireland last week were 2,669 bales bacon, and from foreign ports 9,683 bales bacon. The demand last week was rather better for Irish and Danish bacon, but Canadian was a shade quieter, prices ranging for Irish from 50s to 60s up to 68s; for Danish, from 44s to 58s up to 64s; and Canadian, from 48s to 52s up to 59s. The continued dry weather kept the butter market steady. Danish, from 100s to 112s; Irish, from 92s to 102s; French, 84s to 102s. The lard market was quiet with Irish from 43s to 54s; Danish, 44s; American, from 35s to 37s 6d.

FEEDING STUFFS.

London, Monday.—Linseed Cake: Market very firm and inclined to go dearer. Cotton cake unchanged. Decorticated 2s 6d to 5s up. Linseed steady on spot, 1s lower forward.

English linseed cake	£7 17 6	to	8 2 6	ex mill
American Calcutta linseed cake	7 15 0	to	—	ex quay
American Western linseed cake	7 7 6	to	7 10 0	ex quay
Russian oil cake	7 12 6	to	7 15 0	ex quay
Feeding cake, Samuelson's S.P.F. (10 to 12 p.c. oil)	None			ex warehouse
Decorticated cotton cake	6 12 6	to	6 15 0	ex quay
Decorticated cotton meal	6 10 0		—	ex quay
London made cotton cake (best)	4 7 6	to	—	ex mill
Egyptian cotton cake (in bags)	4 5 0	to	4 7 6	ex quay
Burton desiccated ale grains (bags included)	4 6 3			on rail, Burton
Rangoon Rice Meal	4 5 0		—	ex warehouse
Calcutta linseed in bags, per 410 lbs	2 15 6	to	2 16 6	ex warehouse

—ROBT. AND JOHN HEWETSON.

GRAIN AND FLOUR FACTORS' REPORTS.

Arrivals of wheat and flour are small. A small demand at prices of last Monday for both articles. Maize is 1s. and 1s. 6d. lower for flat, and 6d. and 9d. for round quality. Barley and oats unchanged in value.—COVENTRY, Mark Lane.

Flour: Trade to-day has been quiet, and prices are about the same as this day week.—T. S. MEDILL, Mark Lane.

We have experienced during the past week a spell of heat which is in favour of an early harvest, and wheat-cutting in the south and south-east of England will commence at the end of this week and beginning of next provided the fine weather continues. The quantities of milling offals made in London appear to be rather small, and with a brisk demand higher prices are asked and given. This applies more particularly to fresh-made middlings on the spot, also to pollards, which are sold at an advance of about 2s. 6d. per ton since Monday last. Some millers, however, are careless about taking orders till previous sales have been executed. Bran is very firm at fully previous prices, and stocks are small. Rangoon rice meal on spot is offering at comparatively low rates, without attracting much attention, but should fetch buyers at 87s. 6d. per ton ex wharf or docks.—RICHARD DOGGETT, Mark Lane.

American wheat finds a quiet demand at 6d. decline from last Monday. In other kinds there is practically no alteration in values. Maize is 1s. lower for American, 6d. for round descriptions. Barley 6d. down. Oats unchanged. Flour steady at last quotations. W. J. WOOD AND CO., Mark Lane.

Notwithstanding the warm and showery weather bran and offals are in a rather better consumptive demand. Prices a shade firmer. Supply and demand about equal.—GREENHILL BROTHERS, Belfast, July 21.

Flour: The market is quiet, and about 6d. per sack decline. To make sales in quantity, however, a further reduction would be required. Grain: The fall in corn reported this week from America has been 1s. 6d. per quarter. Fortunately the quantity on passage here is small, and spot price on that account has fallen only 4½d. Pease are 3d. easier. Beans quiet and unchanged. Oats continue depressed. Mill stuffs: There is no change in prices; the demand is fair.—MCKINNON AND MCDONALD, Glasgow, July 21.

Wheat quiet with a small business at ½d. to 1d. per cental under the prices of last Tuesday. Flour in very quiet demand. Home millers make no change from their recent quotation, but American brands are frequently 6d. per sack lower than last Tuesday. Maize very quiet. Mixed American is 1½d. per qr. lower than last Tuesday, but meets with a fair demand at the easier rate. European is quiet, but River Plate is firm at full prices. Barley steady for brewing and firm for grinding. Beans a moderate trade at late rates. Peas quiet and occasionally ½d. per cental lower. Oats very quiet for foreign, but steady for British, which are held at full prices. Oatmeal quiet without change in prices. Oilcake quietly steady for ready parcels, but fairly brisk demand to arrive.—ROSS T. SMYTH, Liverpool, July 21.

THE BALTIC, MONDAY, 1 p.m.

STATE OF TRADE.

There is a fairly good demand for the cargoes of Oregon, Californian, and Australasian white and yellow wheat now on passage near at hand, but 30s. to 31s. is the range of offerings, and some holders still hope for a better price. The cargoes of No. 1 Northern and other American sorts of wheat are 1s. lower on the week. Cargoes of spring corn are a trifle firmer from Saturday, but both linseed and rapeseed cargoes are 3d. lower from the close of the 21st.

BUSINESS DONE.

WHEAT.—Californian, 31s, on passage (sailed in June); Californian, 30s, on passage (sailed in March); Walla Walla, 29s, on passage (sailed in June); Australian, 30s 3d, on passage (sailed in March); Australian 31s, just shipped; New Zealand, 30s, August shipment; Argentine, 28s, July shipment; No. 1 Northern, 30s, prompt shipment; Manitoba, 31s 6d, prompt shipment; No. 2 Red Winter, 29s., September shipment.

MAIZE.—American, 20s, arrived; ditto, 20s 3d, to be shipped on or before August 11; ditto, 18s 9d, August shipment (not a whole cargo); Argentine, 20s 3d, September shipment; Odessa, 23s 3d, prompt shipment; Roumanian, 22s 3d, prompt shipment.

BARLEY.—Taganrog, 20s, prompt shipment; Persian, 17s 3d, prompt shipment.

OATS.—Libau Chastenol, 14s 9d, prompt shipment.

BEANS.—Smyrna, 27s, September shipment.

LINSEED.—Calcutta, 53s 9d, September shipment.

RAPESEED.—Roumanian, 39s 3d, August shipment.

HOPS.

London (Borough), Monday.—Messrs. W. H. and H. Le May, hop factors, 67, Borough High-street, London, S.E., report: The market continues firm, and consumptive orders keep coming to hand. Stocks are low, the 1899 crop being practically exhausted. The aphis attack is causing great anxiety, and only those gardens that have been washed many times have a chance to grow half an average crop.

CATTLE.

Metropolitan Market, Islington.

Monday, July 23rd, 1900.

	British.	Total, July 24th, 1899
Beasts	1,229	1,229 — 1,256
Sheep and lambs	5,290	5,290 — 9,390
Calves	10	10 — 5
Milch cows	70	70 — 50

Quotations per 8lbs (sinking the offal).

	ENGLISH. Inferior.	Second.	First.
	s. d.	s. d.	s. d.
Beasts	3 2 —	4 4 —	5 0
Sheep	3 0 —	5 4 —	6 0
Lambs	5 4 ..	5 8 ..	6 4

Milch cows, per head, £16 to £22.

British arrivals include as follows:—Scotland, —; Eastern Counties, 125; Midland, Home and Western Counties, 1,044; Devon, 20; and Ireland, 31.

In the beast market there was a decrease of 27 head compared with Monday last, most of which arrived from the Midland Counties, with a few Irish and Runts. Trade was of a decidedly slower nature; with a reduction of fully 1d per 8lb, a clearance could not be made. Fat cows were in greater demand, and rates firmer; while fat bulls made less money. For the few rough cattle on offer there was very little demand.

The following are top quotations per 8lb. (sinking the offal):—

	To-day.	July 24th, 1899
Herefords	4s 10d to 5s 0d	4s 6d to 4s 8d
Norfolks	4s 6d to 4s 7d	— —
Runts	4s 8d to 4s 9d	4s 2d to 4s 4d
Lincolns	4s 4d to 4s 6d	4s 4d to 4s 6d
Irish	4s 2d to 4s 4d	— —
Fat cows	3s 10d to 4s 0d	3s 6d to 3s 8d

There was a decrease of 380 head in the number penned in the sheep market compared with Monday last, the supply including about 190 Scotch, 760 Irish, and 1,710 from the Eastern counties. Trade both for wethers and ewes was extremely dull at a decline of fully 2d per 8lbs for the former and 4d for the latter. Even at this a clearance could not be effected. Best quality lambs were steady in price with a ready sale for other grades. Trade was slow at late rates.

Undermentioned quotations are at per 8lbs. (sinking the offal), and are for the best of each class penned:—

	To-day.	July 24th, 1899
7½ to 8-stone Downs	5s 10d to 6s 0d	5s 8d to 5s 10d
9-stone ditto	5s 6d to 5s 8d	5s 6d to 5s 8d
10 stone half-breds	5s 4d to 5s 6d	5s 4d to 5s 6d
11-stone Lincoln	5s 0d to 5s 2d	4s 10d to 5s 0d
10-stone Irish	5s 2d to 5s 4d	5s 0d to 5s 2d
10-stone Down ewes	4s 0d to 4s 2d	4s 0d to 4s 2d
11-stone half-bred ditto	3s 8d to 3s 10d	— —
5-stone fat Grass lambs	6s 2d to 6s 4d	6s 0d to 6s 2d
6-stone half-bred ditto	5s 6d to 5s 8d	5s 4d to 5s 10d

London Central, Monday.—Moderate supplies; trade very slow. Beef (carcases), 3s 11d to 4s; hindquarters, 4s 4d to 4s 8d; roastings, 4s 8d to 5s. Sheep: Ewes 4s 8d to 4s, wether, 4s 10d to 5s 2d; hindquarters, ewe, 4s 4d to 4s 8d; wether, 5s 8d to 6s. Pigs: Large, 2s 4d to 2s 8d; small, 3s to 3s 4d.

St. Ives (Hunts), Monday.—Beasts, 345; sheep and lambs, 2,681; pigs, 376; horses, 4. Beef, 7s to 7s 9d; mutton, 7s to 9s 11d; lamb, 8s to 10s; pork, 5s 9d to 6s 9d. Fat and store cattle, sheep, and pigs not quite so good trade. Milch cows fair show and trade; prices £14 to £22.

FOREIGN CATTLE.

Deptford, Monday.—Beasts 937. To-day's supply compared with Monday last showed an increase of 286, and consisted of 60 from the United States and 937 from Canada, both being below the late average in regard to quality, which alone prevents higher rates being quoted, as trade was certainly firmer, both in regard to tone and value, competition being sharp, with an early clearance. The best States beasts on offer made 4s 6d per 8lb to dress, 4s 6d per 8lb, offal given in, to dress about 720lb. Best Canadians (680lb), 4s 4d; Ranche ditto, 3s 10d to 4s. Sheep, 2,174, numbering 1,634 more than on Monday last, consisting entirely of Canadians, for which trade was very dull, and dragging sales being forced. Small sheep to dress about 64 lbs. made 4s; heavy ditto, 3s 8d per 8lbs. The following were the numbers on offer on the corresponding day last year, with the current top rates:—Beasts 1,856, 3s 8d to 4s per 8 lbs; sheep 2,520, 4s 2d to 4s 4d per 8 lbs.

SEEDS.

London, Monday.—Messrs. John Shaw and Sons, seed merchants, of Great Maze Pond, Borough, London, S.E., write that new trifolium is now offering freely, but at irregular prices; buyers meantime maintain an attitude of indifference. Samples of new trefoil cosh, are also coming to hand. There is a moderate inquiry for mustard and rapeseed, at steady quotations; and as regards tares stocks seem about exhausted. Canaryseed meets with increasing favour. Holders in view of the small and diminishing stocks, and the universally bad crop prospects, confidently anticipate a higher range of values. Hempseed is likewise a firm market. Blue peas and haricot beans find purchasers on former terms.

Mr. Walter Long, President of the Board of Agriculture, has informed the electors of the West Derby Ward, Liverpool, that he will not seek re-election. A meeting held on Friday night resolved to accept his decision.

LIVE STOCK AND MEAT TRADE REVIEW.

(WRITTEN SPECIALLY FOR THE "MARK LANE EXPRESS.")

Trade in London.

With a larger number of beasts on Monday, the majority of which consisted of consignmerts from the Midland counties, chiefly of Herefords and Lincoln Shorthorns, very few Runts as yet appearing, whilst Norfolks are gradually falling off, trade was practically confined to that day. Thursday's sales, being nominal, were of a fairly steady nature. Rates, however, inclined slightly in favour of the buyer. Fat butchering cows were in good request, mostly by country buyers, and were firmer in value. On the other hand, rough cattle from the south-western counties were difficult to cash, though the supply was small, this being due to so many being seized of late by the Islington Market's veterinary surgeon. Turning to the imports from abroad, I note a slight decrease. Trade, in consequence of the markets being held on off days, except one, was slow and rather disjointed; nevertheless, last week's quotations were upheld. The total number offered for sale on both markets was 3,498, consisting of 1,320 British and 2,178 foreign, these latter comprising 1,743 from the United States and 435 from Canada. The following were the top rates paid per 8lbs. (sinking the offal):—90-stone Herefords, 5s.; 100-stone ditto, 4s. 9d. to 4s. 10d.; 90-stone polled Norfolks, 4s. 8d.; 100-stone Lincolns, 4s. 8d.; 110-stone ditto, 4s. 4d.; 95-stone Irish, 4s. 6d.; 100-stone fat cows, 4s.; 100-stone fat bulls, 3s. 4d.; 90-stone States oxen, 4s. 6d. to 4s. 7d.; 95-stone Canadians, 4s. 4d. The sheep trade generally was slower, only the very choicest Downs and halfbreds of neat, handy weights maintaining last week's rates, other descriptions, both wethers and ewes, selling at a decline of 2d. per 8lbs., a clearance on neither market day being made. Lambs were firm on Monday and unaltered in value, and on Thursday, short in number, were dearer by 2d. per 8lbs. The Deptford business is not worth noting, so few being put on sale, others being withheld on Wednesday and Saturday. The total number penned was 14,030, consisting of 13,490 British (increase 510) and 540 Canadians. Best pens made per 8lbs. as follows (sinking the offal):—7½ to 8-stone Downs, 6s. 2d.; 9-stone ditto, 6s.; 8-stone Scotch, 6s. to 6s. 2d.; 10-stone Downs, 5s. 10d.; 10-stone halfbreds, 5s. 8d.; 10-stone Irish, 5s. 6d.; 11-stone Lincolns, 5s. 4d.; 10-stone Irish, 5s. 4d. to 5s. 6d.; 10-stone Down ewes, 4s. 6d.; 11-stone halfbred ditto, 4s. 2d.; 5-stone fat grass lambs, 6s. 4d. to 6s. 6d.; 6-stone ditto, 6s. to 6s. 2d. In the calf market the supply was larger, numbering 140 head, trade for which, confined to Thursday, as most usually is the case, was slower, there being a slacker demand; rates must in consequence be written from 2d. to 4d. per 8lbs. lower, the best on offer making 5s. per 8lbs. (sinking the offal). The few pigs (sixty) on sale were, owing to the extreme heat, difficult to cash; best small breeds made only 3s. 8d. per 8lbs.

Trade in the West.

A considerable volume of business has been passing both in fat and store stock throughout the western district since our last report, and, though there has hardly been a continuance of the "boom" in the sheep to which we last week referred, still prices are being well maintained. Milch beasts are much stronger than they were, some of the best heifers selling at markets this week from £17 up to £22 apiece. Young barreners are also in very brisk demand. Pigs were affected somewhat in point of demand, but holders decline to accept less than 9s. 6d. to 10s. for best weights, despite the adverse weather conditions.

Trade in Scotland.

John Swan and Sons, Limited, give the following as their report on above for the current week:—The supplies of fat cattle this week have been exceedingly short, and the quality fairly good. For best descriptions trade has been very brisk, and the extreme rates of the last few weeks quite maintained. Secondary cattle have been a little cheaper. Sheep and lambs have been offered in large numbers. With the South and London markets not so good, trade has been, except for the best class of shop sheep, rather stiffer. Ewes also made less money. Fat lambs, unless of the best quality, have sold at a shilling a head less money than last week. A large and exceedingly good show of calves sold slightly cheaper. A smaller number of pigs met a dearer market. In the store market there has been very little doing. Very small supplies of store sheep have met a fairly good demand at late rates. Only a small show of store cattle, and those of moderate quality, have been offered. Hardly any customers have been inquiring, and only some of the best lots have been sold, but these have made fair prices. A much smaller lot of milch cows met a dear trade. Quotations:—Top price best beef, 9s. to 9s. 3d.; current, 8s. 6d. to 8s. 9d. per stone. Mutton, 8¾d to 9½d per lb.

LONDON.

London Central, Wednesday.—Fair supplies were on offer, but trade remains slow owing to the hot weather. Beef: Scotch short sides, 4s 6d to 5s; long, 4s 2d to 4s 4d; English, 4s to 4s 2d; American Deptford-killed, 3s 10d to 4s; Liverpool, 3s 10d to 4s; American refrigerated hindquarters, 3s 6d to 3s 8d; forequarters, 2s 6d to 2s 8d. Mutton: Scotch, 5s 4d: English wethers, 4s 8d to 5s; ewes, 3s 6d to 3s 8d; English lamb, 5s 4d to 5s 8d. Veal: English and Dutch 4s to 4s 4d per 8lb.

London Central, Friday.—Supplies were on a good scale, but trade remains without alteration. Arrivals of beef included 60 tons Scotch, 800 Liverpool sides, 3,000 forequarters American refrigerated. Quotations:— Beef: Scotch, short sides, 4s 8d to 5s; long, 4s 2d to 4s 6d (passenger train), 4s 4d to 4s 8d and 4s to 4s 4d (goods train); English, 4s to 4s 2d; American, Deptford killed, 3s 10d to 4s; Liverpool, 3s 10d to 4s; American refrigerated hindquarters, 3s 4d to 3s 8d; forequarters, (best), 2s 8d to 2s 10d; seconds, 2s 4d to 2s 6d. Mutton: Scotch, 5s to 5s 4d; English wethers, 5s; ewes, 3s 8d. Canterbury, 2s 8d to 3s; Wellington, 2s 7d to 2s 10d; Sydney and River Plate, 2s 6d; English lamb, 5s 4d to 5s 8d. Veal: English and Dutch, 4s to 4s 4d per 8lb.

Islington, Thursday.—A fair demand was experienced, and trade ruled generally steady. Sheep supplies were of fair extent, but a quiet inquiry prevailed for both wethers and ewes, although rates remained without change. 7½ to 8-stone Down wethers, 6s to 6s 2d; 9-stone, 5s 10d to 6s; 10-stone halfbred, 5s 6d to 5s 8d; 10-stone Down ewes, 4s 6d to 4s 8d; 11-stone, 4s to 4s 4d. Lamb trade slow; 5-stone fat Downs, 6s to 6s 2d. Calves in heavy supply ruled slow, and prices easier. Top price 5s 4d per 8lb to sink the offal.

COUNTRY.

Ashford, Tuesday.—Good trade for beef up to 12s 6d per score for best small heifers and steers, and 11s to 12s for second quality. Mutton 2d per stone cheaper than last week, small Kent wethers making 5s to 5s 2d, and halfbreds 5s 2d to 5s 6d, with barrens at 3s 10d to 4s 2d. Veal very cheap, many calves selling at 4s per stone. Lambs met a fair demand at last week's figures, but pork was cheaper all round, small roasters making about 8s to 9s per score.

Basingstoke, Wednesday.—At Raynbird and Sons' saleyard there was an average attendance of buyers, to meet a supply of 45 fat beasts, 88 calves, 356 fat sheep and lambs, 142 pigs, and 87 cattle, which realised:—Fat beasts, £14 15s to £22 10s; fat calves, 80s to £5 2s 6d; small, 20s to 60s; fat wethers, 37s to 57s; fat ewes, 34s to 46s 6d; fat lambs, 25s 6d to 47s; fat porkers, 24s to 45s; store pigs, 14s 6d to 22s 6d; dairy cows, £8 15s to £21. The extreme continued heat has an adverse effect on the trade for all kinds of farm live stock. There was less animation in the biddings for fat beasts, but a fair clearance was made, the best lots making nearly last week's figures. The supply included some good Shorthorn and polled beasts and useful Devons. Shorthorn steers made up to £20, heifers £22 10s, and cows £15; pure polled beasts realised £22 10s, and ¾ fat young Devons £17, etc. The short supplies of fat sheep and fat lambs were mostly cleared, the fancy lots making an advance, other grades maintaining last week's figures. Prime Hants Down wethers and ewes realised 46s 6d, 36s, 57s, 50s, 42s, 52s; 19-months old ditto, 42s, 53s, 47s 6d, 48s, 40s; 6-months old lambs, 34s, 33s 6d, 45s 6d, 47s, 46s, 34s; 2-months old sucking lambs, 29s 6d, 29s, 25s 6d; old ewes, 34s, 36s, 35s 6d, 37s; rams, 50s 6d; Dorset ewes, 36s, 34s 6d; Scotch black face wethers, 30s 6d. etc. A good trade was made for all freshly calved cows and heifers. Store cattle, owing to the dry weather, showed a decline in prices. Fat calves of neat weights met a fair trade, heavy sorts realising less money. Fat porkers, owing to the extreme heat, met a dull trade. Store pigs were cleared at late rates. Ruling values:—Best quality fat beasts, 7d to 7½d; second ditto 6½d to 7d; bulls, cows, and inferior ditto, 5½d to 6d. Best quality sheep and big lambs, 8½d to 9d; second ditto, 7½d to 8d; old ewes, rams, and inferior sheep, 6d to 7d; 3-months old sucking lambs, 9d to 9½d. Fat calves, 6d to 8d per lb. Fat porkers, up to 9s per score.

Calne.—Present prices for prime pigs, in lots of not less than 10, on rail within 100 miles of Calne:—

Prime stores.	Thickness of fat in any part of the back.	Price per sc.
6 sc 10 lbs to 9 sc 10 lbs	2½ in. and under	9s 6d
Under 10 sc 10 lbs	Not exceeding 2¼ in.	9s 0d
Under 11 sc 10 lbs	Not exceeding 2⅜ in.	8s 6d
Under 12 sc	Not exceeding 3 in.	—

Any pigs outside these limits at their value. Half truck, 12 pigs. Whole truck, 25.—CHARLES AND THOMAS HARRIS AND CO., Limited, Calne, Wilts.

Cambridge, Monday.—The stock exhibited for sale at this market and the prices obtained were as follows:—Beasts, 215; sheep, 705; pigs, 472; horses, 18. Beef, 7s 3d to 8s; mutton, 4s 4d to 5s 8d; pork, 5s 3d to 6s 3d. Very few store beasts to hand. Fat beasts, a good supply and trade slow at less money. Fat sheep, trade not so good as last week. Stores, very few shown. Fat pigs, a fair trade. Stores, a good number to hand and trade better.

Canterbury, Saturday.—Supplies were small and trade quiet. Some good-toothed ewes made from 31s to 32s, and broken-toothed sheep from 14s to 18s 6d. Several lots of lambs were offered, the best of which ranged up to 20s 6d. There were, however, a few very poor specimens, which sold at from 6s 0d to 10s per head. Very few horned stock offering.

Carlisle, Saturday.—The supply of Irish store cattle was affected by Bellingham Fair, only about 100 small heifers being shown. The attendance of buyers was also smaller, and trade was quiet at £7 10s to £10 10s. Young pigs were a very small show and were difficult to dispose of at 21s to 22s each.

Doncaster, Tuesday.—Moderate supply of cattle, and fair trade; prices from 7s 9d to 8s 6d per stone. Fair supply of sheep and good demand; ewes, 5d to 6d; shearlings, 7½d to 8½d; lambs, 9d to 10d; calves, 7d to 8d per lb, and good trade.

Dorchester, Saturday.—Despite the torrid weather there were good deliveries of stock, for which a good demand prevailed, both for fat and store things, at prices showing but little perceptible change from those of the previous market.

Dublin, Thursday.—A generally dull and dragging trade for all descriptions of cattle, and best qualities barely maintaining recent rates. Other sorts, which were too plentiful, were difficult to cash. In sheep department prices showed a downward tendency and buyers secured their requirements on better terms. Best lambs unaltered, other sorts more difficult to place. Cattle (best), 33s to 35s 6d per 7cwt; other descriptions, 28s to 32s per cwt. Mutton, 5¾d to 7¼d per lb.—GANLY, SONS, AND CO.

Dumfries, Wednesday.—Beef again in good demand. Best bullocks, 39s per live cwt; polled bullocks, to £19; polled heifers, to £14; horned bullocks, to £17; ditto heifers, to £16; Ayrshire cows, to £13; ditto heifers, to £13; Highland bullocks, to £17. Sheep maintained late rates; black-faced ewes, to 34s; tups, to 46s each.

Glasgow, Wednesday.—Smallest market of the season, owing to holidays, and prices firm. Top hogs and wedders, 9d; secondary, 8d to 8½d; ewes, 6d to 7d per lb. Top Scotch cattle, 68s per cwt current, but extra choice, 70s; secondary, 62s to 64s per cwt; Irish nominal. Dead meat quiet; values steady; best States beef, 5¾d to 5¾d; secondary, 5½d; cows, 5d to 5¼d per lb.

Hereford, Wednesday.—Return of stock brought to the cattle market this day:—Bullocks and cows 377, calves 137, sheep 937, lambs 738, pigs (fat and sows) 9, sucking pigs 51, pigs (stores, not more than ten) 101, pigs (stores, more than ten) 17, colts 1. Prices of stock: Best beef, 6d to 7d per lb; wether sheep, 6½d to 8d per lb; ewes, 5½d to 6d per lb; veal, 9d per lb; lamb, 9½d per lb; pork, 4½d to 5d per lb; bacon, 4d to 5d per lb.

Ipswich, Tuesday.—Messrs. Robt. Bond and Sons report a shorter supply of fat cattle, the best of which realised rather more money; other descriptions sold without alteration, the best animals making up to £22 15s. The fat sheep pens were moderately filled, and prices ruled much the same as last week. Shearlings made up to 50s; ewes up to 53s. Fat lambs were in demand, the top price being 49s for Suffolks. In the store sheep department several lots of small lambs and ewes were penned; trade was dull at recent values. Several calves were forwarded, those of weaning continue dear, the best making from 58s to 38s. Fat calves slow and cheaper, from £5 10s to £3. A short supply of swine, which realised more money. Cows were in strong demand at very satisfactory prices. Roan cow in calf realised £23; polled cow in calf, £18 15s; shorthorn cow and calf, £17 5s; and polled cow, £14. A few lots of young grazing cattle were penned, the recent hot weather affecting the trade adversely. Numbers at sales and market:—Beasts, 491; sheep, 3,532; calves, 44; swine, 619; horses, 18.

Leicester, Saturday.—Fair supplies of stock in good condition; trade slow and prices easier. Bullocks, £13 to £16 per head; milch cows, £15 to £20 each; young stock a slow trade.

Lincoln, Friday.—Poor show of milch and store beasts. Trade confined principally to milch beasts, which made from £16 to £20 each; two-and-a-half-year-old beasts, £13 to £14; drapes, £8 to £11; young beasts, £4 10s to £8. A few sheep, which sold at 30s to 38s each.

Newcastle, Tuesday.—Fair business doing, prices well maintained. Numbers:—Cattle, 1,579; sheep and lambs, 7,984; calves, 61; pigs, 410. Prices (sinking the offal):—Beef, 5s 6d to 5s 9d per stone; pork 5s to 7s 9d per stone; mutton, 6d to 9d; lamb, 8d to 9d; veal 5d to 8d per lb.

Newport, Wednesday.—A bountiful supply, and there was a brisk business. The quotations were:—Best beef, 6¾d to 7d per lb; secondary, 6d to 6½d; best wether mutton, 8d; lamb, 8d; veal, 7d to 8d; and porker pigs, 10s to 10s 6d per score.

Norwich, Saturday.—The supply of store beasts here today was moderate. The quality was not very good in some cases, and trade was dull at former terms. Fat beasts, which were in moderate supply, were firm at 7s 9d to 8s and 8s 3d per 14lb. Store sheep and lambs were quoted at former terms; lambs made 16s to 22s per head; and keeping shearlings, 38s to 45s per head. Fat sheep, which were in moderate supply, were dull, at 8s 6d to 9s and 9s 6d per 14lb.

St. Ives, Monday.—The number of stock entered at this market was:—Beasts 375, sheep and lambs 3,800, pigs 482, horses 2. Beef, 7s 3d to 8s 3d; mutton, 7s 7d to 9s 4d; lamb, 9d to 10d; pork, 6s to 6s 6d. Fat beasts good demand, stores slow, fat and store sheep fair trade; fat and store pigs better trade. Milch cows, fair prices, £13 to £22.

Salford, Tuesday.—The supply of cattle was smaller and trade better. A few choice animals made 7½d per lb., but the general top price was 7¼d. There was a large decrease in the number of sheep and lambs on offer. A better trade was experienced for both, and last week's quotations were repeated for choice quality. The demand for calves was slow, and prices lower. Quotations: Cattle, 5d to 7½d; sheep, 6½d to 9d; lambs, 8d to 9d; calves, 5d to 7d per lb. At market—Cattle, 1,276; sheep and lambs, 18,654; calves, 138; pigs, 42.

Sheffield, Tuesday.—There was a fair show of milch beasts, and the demand was very good. The best lot made from £19 to £23; others, £11 to £15.

Shrewsbury, Tuesday.—Beef and cattle trade slower. Sheep and lambs and other stock fair with small supplies. Quotations—Lamb, 7d to 8½d; beef, 6d to 7¼d; mutton, 6d to 8d; and veal, 6½d to 8½d per lb. Porket pigs, 8s to 9s 6d; and bacons, 7s 6d to 9s per score. Cows, with calves, up to £19 2s 6d. Numbers offered—851 lambs, 460 cattle, 40 cows, with calves, 1,213 sheep, 75 calves, 19 fat, 94 porket, and 232 store pigs.

Spalding, Tuesday.—A good show of fat cattle, but rates were about 3d down, best beef making 7s 6d to 7s 9d per stone. A good show of saleable sheep, mutton making 8d per lb, the same as last week.

Taunton, Saturday.—Short supply. Small attendance. Very quiet trade.

Thame, Tuesday.—The market is getting larger every week, and the quality of the stock was first class. There was a numerous attendance of buyers, including some fresh faces from Reading, who were large purchasers. A clearance was effected with few exceptions. Mr. Bond's sale comprised 101, fat beasts and a few stores, 317 fat sheep and lambs and stores, 52 fat and weaning calves, 62 pigs. Fat bullocks made £17 to £21 12s 6d; fat heifers, £14 to £21 10s; fat wether sheep, 44s to 56s; fat ewes, 35s to 50s; fat lambs, 31s to 44s; store lambs 23s to 25s 6d; fat calves, £3 to £3 15s; cow calves, 26s to 60s; bull calves, 17s to 43s. Fat pigs 10s per score. Stores made late prices.

Wakefield, Wednesday.—Slow trade for both beef and mutton, butchers hesitating to buy owing to the extreme heat. Best beef, 7d per lb and other sorts, 5d to 6¾d. Small sheep made 8d; rougher sorts 6d to 7¼d. Lincolnshire and Irish lambs, 9d per lb. Numbers penned:—Fat Beasts, 1,411; sheep, 4,761.

Wolverhampton, Wednesday.—Good supply; bad trade all round. Beef, 6d to 7¼d per lb; mutton, 6d to 8½d per lb; lamb, 8d to 8½d per lb; veal, 6½d to 7½d per lb. Milch cows a fair supply; good trade and clearance. Bacon pigs, 9s 6d to 9s 9d per score; porkets, 9s 9d to 10s per score; sows, 7s 6d per score.

Worcester, Saturday.—Good supply of cattle and sheep, but trade slow all round. Fat cattle made previous prices. Sheep and lambs scarcely so dear. Calves sold well. Pig trade dull and prices lower. Beef, 7d to 8d; inferior, 5d to 7d; wether mutton, 6d to 8d; ewes, 5d to 6d; and calves, 7d to 8d per lb.

Worksop, Wednesday.—Very fair show. Beef made a good price; best, 7s 6d to 8s 6d per stone; inferior, 6s 6d to 7s 6d. Mutton showed an upward tendency; best shearlings, 7½d to 8½d per lb; ewes and other kinds, 6d to 7d.

York, Friday.—Calves, 8d; small sheep, 8½d; large, 8d; ewes, 7d; and lambs, 9d per lb; small pork pigs, 6s 3d; and large ditto, 5s 6d to 6s per stone.

FOREIGN.

Yorkhill, Monday.—At the sale of United States and Canadian cattle held in the afternoon, there were penned in the sheds 261 cattle landed by the Orthia (s), from Baltimore; 250 by the Siberian (s), from Philadelphia; and 299 ex Hibernian (s), from Boston. The cattle, as regards quality, were fully up to the average, many of the bullocks being prime beasts in a well-finished condition. Bulls were also fully up to the average, and all showed well. There was a large attendance of buyers, both wholesale and retail being well represented, and business during the sale was of a slightly better character than that ruling last week. The dead-weight quotations were somewhat higher than those ruling last week, and may be given as follows:—Best States bullocks, 6s per cwt, and for really choice up to 6¼s; secondary and heavier, 5¾s; best bulls, 5¼s; secondary, 4¾s to 5s; best Canadian bullocks, 5¾s, and for really choice up to 6s; secondary, 5¾s to 5¾s; best Canadian bulls, to 5s; and secondary, 4¾s to 4¾s.

Yorkhill, Wednesday.—A sale of United States and Canadian cattle was held in the afternoon, when there were penned in the sheds 67 cattle landed by the Hibernian (s), from Boston, and which were held over from Monday's sale, and 355 on the Amarynthia (s), from Montreal. Bullocks as regards quality were up to the average, many of them being handy beasts very suitable for the requirements of the trade. Bulls showed well, and they were fully equal to those exposed at the

previous sale. There was a good attendance of buyers, both town and country, and trade was similar to that ruling at Monday's sale, but values showed no improvement on those then obtained. The dead-weight quotations may be given as follows:—Best States bullocks, 60s per cwt; and for really choice up to 62s; secondary and heavier, 58s; best bulls, to 54s; secondary, 52s; best Canadian bullocks, to 58s per cwt; and for really choice up to 60s; secondary and heavier, 56s; and bulls, 48s to 52s, according to quality and finish.

WOOL.

London, Monday.—The joint offerings of the two catalogues brought forward at auction this evening amounted to 11,013 bales, and comprised of 3,815 New South Wales and Queensland, 1,484 Victorian, 5,522 New Zealand, 141 Cape and Natal, and 50 Spanish. Competition, from an average attendance of buyers, was of a spirited character, and the recent level of currencies was fully maintained. New South Wales and Queensland scoured combing, marked F M over Dundee, sold 1s 6d; clothing, 1s 6d; scoured combing, S and S over B in diamond, 1s 7d. Queensland scoured combing, Nonda, 1s 3d to 1s 4½d; pieces of the same mark, 1s 1d to 1s 3½d; greasy combing, Condamine Pains, 10d to 11d; ditto Dillalah, 9½d to 10d. Victorian, greasy combing, R in diamond over Waraten and Bulie, 10½d to 11½d; greasy lambs, Naringel, 1s 0½d; ditto D E S Moramong, 1s; and greasy combing, Netallie, 7½d to 8d.

London, Tuesday.—At auction this evening three catalogues were brought forward, which jointly totalled 10,168 bales, and comprised the following: 2,923 New South Wales and Queensland, 776 Victorian, 508 South Australian, 1,062 Tasmanian, 3,248 New Zealand, 275 Cape, and 1,370 Punta Arenas. A full attendance of buyers was present, and competition was of a spirited character, the recent level of currencies being well maintained. New South Wales greasy combing, marked Willeroo, sold 9½d to 10½d; Queensland greasy combing, P W over Kikiamah, 9½d to 10½d; scoured combing, A P and Co. over Burbah, 1s 4d to 1s 5½d; clothing, 11d to 1s 3½d; combing, P W Kikiamah, 1s 3½d to 1s 7½d; combing, Rockwood, 1s 6d; clothing, 1s 5½d to 1s 6d; Victorian, greasy comeback, Moyne Falls, 11½d; crossbred, 8½d to 11½d; Tasmanian greasy combing, A in oblong, 10½d to 1s 1d; clothing, 10½d; pieces, 7d to 9½d.

London, Wednesday.—Three catalogues were offered this evening jointly amounting to 11,891, and comprised 2,500 New South Wales and Queensland, 1,688 Victorian, 45 West Australian, 1,459 Tasmanian, 1,873 New Zealand, and 1,319 Falkland Islands. A full attendance of buyers were present, and competition ruled very brisk for all desirable parcels, the recent improvement in currencies being well sustained. New South Wales greasy combing, hoggets of the mark D and B, over Noorindoo, sold 9d to 10½d; scoured combing of the same mark, 1s 3d to 1s 4d; clothing, 1s 4½d; pieces, 10d to 1s 4½d. Queensland greasy combing, W C over Warkon, 9d to 10d; hoggetts marked Isis Downs, 10d to 10½d; pieces, 10d; lambs, 10d to 10½d. Victorian, greasy combing, N.Z. and A. Land Co. over Bendure, 8d to 11d; broken, 7d to 8½d; combing, Ware over Diamond and Minjan, 10½d to 1s 0½d; lambs, 10d to 1s 0½d; combing, P S over Ellerslie, 10d to 11½d; pieces, 8d to 9d; scoured combing, Thackaringa, 1s 4d to 1s 5d; ditto Western, 1s 5½d to 1s 6½d; clothing, 1s 5d to 1s 5½d. New Zealand—greasy combing, W.O.R., 8½d to 10½d; clothing, 9½d; piecos, 8½d; scoured combing, W.S. over Lawdon, 1s 6d to 1s 9d; pieces, 1s 4d; bellies, 1s 4½d.

London, Thursday.—At public sale this evening the joint offerings of two catalogues amounted to 14,725 bales, and comprised 7,431 New South Wales and Queensland, 2,213 Victorian, 905 South Australian, 67 Tasmanian, 3,318 New Zealand, 722 Cape and Natal, and 69 River Plate. With a full attendance of buyers, competition was again of a spirited nature, resulting in the recent level of currencies being well maintained. New South Wales greasy combing of the mark, Nigall Creek over New England, sold at 11d to 1s; clothing, 11d; pieces, 9d to 9½d; combing, J. C. M. over Phillip Creek, 10½d to 11½d; clothing, 1s to 1s 1d; scoured hoggets, A Tobin and Sons over Wingadee, 1s 8d to 1s 8¾d; combing, 1s 8¾d; broken fleece, 1s 4½d to 1s 5d; bellies, 1s 2d; clothing A Tobins and Sons over Lila Springs, 1s 5¾d to 1s 6¾d; combing, 1s 6¾d; super marked Moorland, 1s 8¾d to 1s 10½d. Queensland—greasy combing, Mount Abundance, 9d to 9½d; pieces, 6½d to 8½d; scoured combing, Cassilis, over J.B., 1s 3½d; hoggets, 1s 3d to 1s 4½d. Victorian—greasy combing, Yallum, 9½d to 11d; clothing 9½d to 10d; lambs, 7½d to 10d; combing, O Cox over Grubben, 10d to 10½d; clothing, 9½d; scoured combing, Clyde, 1s 4d to 1s 10d; clothing, 1s 5¾d; lamb, 8¾d to 1s 4½d; South Australian greasy combing, D.T.N., 8d to 9d; pieces, 7½d to 8d.

London, Friday.—Wool, English, per pack of 240 lb—Fleeces, Southdown hoggs, £8 to £11 10s; half-bred hoggs, £7 to £8 10s; ditto wethers, £6 10s to £7 10s; Kent fleeces, £6 to £7; Southdown ewes and wethers, £8 to £11 10s; Leicester ditto, £6 to £7. Colonial, per lb: Victorian, fleece, superior, 1s 6d to 1s 7d; scoured good, 1s 7d to 1s 7¾d; scoured average, 1s 5d to 1s 6d; greasy average to fair, 10½d to 11½d; New South Wales, scoured average, 1s 3d to 1s 4d; greasy average, 8½d to 9½d; South Australian, greasy average, 6d to 7d; New Zealand, scoured average, 1s 4½d to 1s 5½d; greasy average, 8½d to 9½d; Cape scoured superior, 1s 6d to 1s 8d; fleece average, 8½d to 9½d; greasy average, 6¾d to 7d; Natal, scoured, 1s 2d to 1s 3d; greasy average, 7¼d to 7¾d. Crossbreds, greasy, Victorian, good to superior, 10½ to 1s; New Zealand fine, 9d to 10d; ditto medium, 7¾d to 8¼d; ditto coarse, 6d to 7d.

London, Friday.—The fourth series of public sales of Colonial wool for the current year, which commenced on the 3rd inst. terminated this evening. 144,000 bales have been catalogued during the above period, and the part sold included 2,000 bales for American account. On an average, prices are on a par to 5 to 10 per cent. under rates current at the close of last sales. This evening's catalogues amounted to 11,042 bales, and comprised the following:—5,027 New South Wales, 940 Victorian, 17 South Australian, 172 West Australian, 1,310 Tasmanian, 551 Cape and Natal. New South Wales—Greasy combing, marked Gunnee, sold 9½d to 11d; pieces 9½d; bellies, 7½d; combing, Burlurgate, 9½d to 1s; fleece, 8½d to 10½d. Queensland—Greasy combing, G F over Logan Downs, 9d to 9½d; broken 9½d; pieces, 7d to 8d; bellies 6¾d; scoured combing, Toorak, 1s 3½d to 1s 7d; clothing 1s 4½d to 1s 5½d; necks, 1s 3d to 1s 4½d; pieces, 1s 2½d to 1s 5d. Victorian—Greasy combing, W. M'C., 9½d to 11d. Tasmanian—Greasy combing, J. J. W., 10d to 1s 1d; pieces, 8½d; bellies, 7¾d; combing, T. W. H. C., 10½ to 1s 3½d; ditto J. G. over Bellevue, 10½d to 1s 3½d.

London, Friday.—The fourth series of London sales of Colonial wool, which commenced on the 3rd inst., closed today. The net total available amounted to 280,000 bales. Of these 130,000 bales have been sold, 78,000 bales for home consumption, 50,000 bales to the Continent, and 2,000 bales to America, leaving 158,000 bales to be carried forward to next series. The sales opened with a decline ranging for Australian merino wools from 10 per cent. on good descriptions, to 15 per cent. on inferior and wasty lots, and for crossbreds from 5 per cent. on coarse to 10 per cent. on fine qualities. On this basis small catalogues were sold during the first half of the series. An improvement then set in, consequent upon the curtailment of the series, and the withdrawal of a large portion of the available supplies. The Continent began to buy much more freely, and under the influence of this increased competition and the generally better tone, prices recovered on the average about 5 per cent. The improvement was very decided in coarse and medium crossbreds, which at the close sold fully up to the best May rates; but it was comparatively slight in fine qualities which are still 5 to 10 per cent. lower than last series. Among Australian merino wools good grease rose fully 5 per cent. in the latter part of the series, while with heavy sorts the recovery was less decided and thorough going. Scoured improved also 3 to 5 per cent., especially the better descriptions. Cape wools were throughout heavy of sale at 10 to 15 per cent. decline, and no recovery took place in their case. The committee of wool importers decided to drop the sixth series for this year, and to commence the fifth, and therefore last, series on Tuesday, the 9th October, the new gross arrivals being limited to 250,000 bales. Deducting the transit wools, but adding the old stock, the net total available will amount to about 350,000 bales. This will represent the entire supply the London market will offer during the next six months. The commencement of the first series in 1901 has been fixed for Tuesday, the 15th January, the list of arrivals to be closed on the 7th January. HELMUTH SCHWARTZE AND CO.

Bradford, Thursday.—There is again a better spirit at this market, and as to fine wools, the turn has certainly come to be against the buyer. Topmakers are taking up a stronger position, and most of them will only do business at a slight advance on last week's rates. Low crossbreds and English wools remain very cheap. Export yarn trade quiet. Piece merchants, with the finer weather, have had some accession of business.

Canterbury, Saturday.—Kent fleeces continue to sell freely at 6d per lb, while lamb wool is making from 4d to 5d. Downs are in request from 8d to 10d, and half-breds at from 6½d to 7½d. Locks, 2d to 3d per lb.

FEEDING STUFFS.

London, Thursday.—Linseed.—The market is firm for spot seed at 55s 6d, but forward is quieter, and we quote July-August 54s 9d, August-September 54s 6d. Hull.—Linseed inactive, 56s nearest value spot and passage. Duluth, September-November 49s 6d. Azov, Black Sea, September-October 50s 3d asked. To the Continent, Bombay, March-May 47s 3d taken and sellers. Calcutta and Hamburg, June-July 56s, July-August 56s, August-September 56s sellers. The imports into London for the week have been 37 qrs, and since 1st January 370,502,, against 373,580 qrs corresponding time last year. Linseed cakes are firm. London made £7 17s 6d to £8 2s 6d. Russian, £7 7s 6d to £7 12s 6d ex dock. American Westerns at £7 5s to £7 12s 6d. Cotton cakes also firm. London made £4 5s to £4 7s 6d. Rapeseed.—To the Continent brown Calcutta passage Antwerp 12s 6d sellers. Cottonseed.—Old crop to London there is a slow demand, but market is better forward, on passage £6 5s is asked, and for August shipment £6 7s 6d without finding buyers. November-January there are buyers at £6 2s 6d. Hull—Spot we quote £6 5s, July £6 5s, August £6 6s 3d, October £6 7s 6d nearest value, November-January £6 1s 3d. Cargoes, August could be bought at £6 10s, for October sellers are asking £6 11s 3d, November £6 7s 6d.—THE PRODUCE BROKERS COMPANY, LIMITED.

Mark Lane, Monday.—Linseed Cakes: The demand during the past week has been less active, but with only small supplies of foreign values are fully as dear. Russians remain scarce on spot, and are only obtainable in limited quantities for shipment, while quotations are without change. Americans do not offer except in retail lots and are quite as dear. English are only in moderate request, but quotations remain unchanged. Cotton cakes.—Shipments have been on a more liberal scale, which meet a steady trade at prices somewhat in buyers' favour. Egyptian offer at rather less money, while English are unaltered. Decorticated.—The small quantity remaining on hand is firmly held at last week's prices. Rape cakes nominal. Maize germ meal.—American is scarce on spot, and quotations are steady, while there is a fair trade passing in English at the turn dearer. Rice meal.—Rangoon in warehouse sells quietly.

—PINNOCK BROS., Mark Lane.

Hull, Tuesday.—Linseed.—The arrivals are 52 qrs from Konigsberg, 3,003 qrs Petersburg; total, 3,055 qrs. The market is steady, but only quiet. Calcutta, 56s paid seed afloat to Hull. Black Sea and Azof, business done at 50s to 50s 3d, which latter figure is to-day's value. Petersburg, July-August 52s to 52s 6d, September-October 51s to 51s 6d. Riga and Libau offers at 48s 9d, autumn shipment American Duluth, 49s 6d to 49s 9d October-November. River Plate, nothing at the moment offering. Cottonseed.—The tone of the market has been steadier during the week, but not much business transpired in old crop, which improved to £6 3s 9d spot and July loading, whereat still sellers and same taken August. New crop sold for November-January at up to £6 1s 3d, but is easier again and £5 18s 9d reported taken to-day; October quoted £6 2s 6d. Oils.—Export for the week ending July 10th, 1900.—Linseed oil: 16 Belgium, 2 Germany, 15 Holland, 6 Norway, 2 Sweden; total, 41 tons. Cotton oil: 19 Belgium, 9 Denmark, 84 Germany, 29 Holland, 9 Sweden; total, 220 tons. The market closes quiet. Linseed oil: 34s 7½d spot, 34s 3d month, 33s 9d July-August. Cotton oil: 23s spot, 22s 7½d month, 22s 6d July-August, 18s 6d November-April. Crude, 21s 6d spot, 21s 3d July-August, 17s 3d November-April. Rape oil: Black Sea naked, 26s spot, first quality naked, 27s spot. Oil seed cakes.—A quiet trade at previous rates. Hemp.—Market very firm and prices rising.—KEIGHLEY MAXSTED AND CO.

WATERLOO ROUND FEELING CAKES, £6 12s 6d PER TON; WATERLOO ROUND 97 PER CENT. PURE LINSEED CAKES, £5 17s. 6d. PER TON; WATERLOO ANGLO SHAPE 97 PER CENT. PURE LINSEED CAKES, £8 15s. 0d. PER TON; WATERLOO 97 PER CENT. PURE EGYPTIAN COTTONSEED CAKES, £4 7s 6d PER TON. ALL F.O.R. HULL.

HAY AND STRAW.

Whitechapel, Saturday.—Short supplies, trade ruled steady. Best clover, 85s to 100s; inferior ditto, 60s to 75s; specially picked hay, 90s; good ditto, 80s to 85s; inferior ditto, 50s to 60s; mixture and sainfoin, 70s to 87s 6d; and straw, 25s to 35s per load.

FOREIGN HAY AND STRAW.

London, Saturday.—With short supplies the market has been much better this week, and prices have all round advanced. We quote Canadian timothy and clover mixture, [illegible] 6d to 75s; old Dutch and French, [illegible] new ditto, 55s to 60s; ditto, 60s; large bale French wheat straw, 38s; small ditto, [illegible] 6d; small bale French, [illegible] 6d; and prices as per ton, delivered to wagon at our premises, Land Lane, Upper Thames Street, E.C.

LIVE STOCK.

STOCK AND SHOW NOTES

By Herdsman.

The United Counties Agricultural Society's fifth annual show will be held at the Ystrad Meadows, Carmarthen, on Thursday, August 30th. The prize schedule which has lately been issued is a very respectable one, but the majority of the classes are confined to the counties of Carmarthen, Pembroke, and Cardigan. There are, however, one or two open events, among them being one for Shire mares or fillies, the first prize for which is £15, and the second £5, and there is a challenge cup for the best mare suitable for agricultural purposes. In the cattle department there are two classes open to the world. A prize of £15, and a second of £5, will be given for the best Shorthorn bull not exceeding five years old, eligible for entry in Coates' Herd Book; whilst the Shorthorn Society's special of £10, also a second prize of £5, are offered for the best Shorthorn cow in milk, of any age, eligible for or entered in the Herd Book. The entries close on August 11th with the secretary, Mr. D. H. Thomas, 5, Quay Street, Carmarthen.

At a recent meeting of the Herefordshire County Council a resolution to the effect that the Board of Agriculture should enforce such regulations that the flocks of the county may be rendered free from sheep scab, was carried unanimously.

Amongst the agricultural shows in the provinces which have more than held their own must be included that of the Sussex Agricultural Society, whose fourteenth annual show will be held at Preston Park, Brighton, on July 25th and 26th. At Eastbourne last year's show basked in the smile of patronage of royalty, and although no such distinction will attend it this year the entries number more than those received on any previous occasion. The classes for Jersey cattle, in particular, have been strongly supported, and some splendid animals have been entered, while in the classes for agricultural horses, hunters, and hacks, and sheep, which have been liberally patronised, competition is expected to rule very keen. The fine band of the Royal Marines has been engaged, and jumping competitions will take place each day. The secretary to the show is Mr. F. Burfield Dyer, of 2, St. Andrew's Place, Lewes.

A good lot of Shires and Hackneys, owned, and for the most part bred, by Mr. C. Ed. E. Cooke, of Hinxton, Cambridgeshire, will be offered for unreserved sale on August 2nd, at Lordship Farm, Hinxton, the auctioneers being Messrs. Sexton, Grimwade, and Beck. Mr. Cooke is so well known in connection with Hackneys that it is unnecessary to say more than that he is now selling all his stud with the exception of a few aged and barren mares. From those in the sale he has bred many winners and animals sold for very high prices. The foals are an exceptionally good lot, and the young stock are by sires of the highest class, and the mares are again well mated. As regards the Shires, Mr. Cooke has been getting together his present stud during his past ten years' residence at Hinxton Grange, principally making use of the services of sires at Elsenham, Waresley, and Stetchworth, and it was from the last-named stud that he purchased his stud horse Hinxton Albert by Potentate, out of a daughter of the great mare Princess Louisa. Hinxton Albert is a horse of great size with excellent feet and limbs, and, as might be expected from his breeding, a most impressive sire, the foals by him being very promising. All the Shire mares and fillies in the sale, three years old and over, are quiet and good workers, and have been worked on the farm.

Mr. Alexander C. Cope, the chief veterinary officer of the Board of Agriculture, has been unanimously elected president of the Royal College of Veterinary Surgeons, the degree-granting body for the veterinary profession in the United Kingdom.

The annual sale of Mr. A. E. Mansell's pure-bred Shropshire sheep will take place on Tuesday, the 31st inst., when there will be offered a little over forty rams, including the first and second prize shearling rams at York Royal Show, and other prize winners. The Harrington Hall flock is very well known, it having been so successful in the showyard, and the animals catalogued will fully maintain Mr. Mansell's reputation as a successful breeder. The rams possess great size and constitution with a good bone and perfection in wool, and lean flesh. Mr. Mansell will also sell some store cattle, comprising over twenty well-bred two and three year old Hereford and cross-bred Hereford mottle-faced bullocks in nice condition, suitable for finishing on grass or carrying on for prime Christmas beef. The auctioneers will be Messrs. Alfred Mansell and Co.

On Friday, August 3rd, the same auctioneers will conduct the annual sale of rams from Mr. John Harding's flock, at Norton House, Shifnal, Shropshire. The catalogue contains some twenty-five grand sheep, considered to be the most typical lot every offered by Mr. Harding. The rams include the two-shear ram, "Norton Adventure," 10449, winner of reserve number at the R.A.S.E., York; 2nd prize at the Herefordshire Show, at Leominster; the shearling ram Crested Grebe 10292, winner of third prize at the Leicestershire Show, 1898, and placed fifth at the R.A.S.E., York; and the highly commended pen of five shearling rams at the R.A.S.E., York. No shearling ewes will be offered at the present sale, as the entire lot has been sold for exportation to Canada and South America. The catalogue also comprises some practically pure-bred Hereford yearling steers, straight from the breeders in Herefordshire, four fresh Shorthorn bullocks, and one deep milking Shorthorn dairy cow, due to calve August 14th.

The prize schedule has just been issued for the annual show of the Cheshire Agricultural Society, which takes place at Congleton on Wednesday, August 29th, entries closing on August 8th, and post entries, at double fees, on August 15th. There are classes, mostly open only to residents in the county—for cattle, horses, sheep, pigs, and, of course, cheese. The class prizes are good ones, and there are several specials. The secretary is Mr. Thomas A. Beckett, St. Werburgh's Chambers, Chester.

The breeders' sixty-eighth great central sale of Shropshire rams and ewes will be held by Messrs. Lythall and Walters in Bingley Hall, Birmingham, on Thursday next, July 26th. £50 in prizes will be awarded in three classes, viz., for single shearling rams, five shearling rams, and thirty shearling ewes. An excellent selection will be offered, including several winners at the Shropshire and West Midland, Bath and West of England, Herefordshire, Oxfordshire, and Gloucestershire shows, and representing the well-known flocks of the Earl of Dartmouth, Captain Clive, Messrs. A. S. Berry, A. Bradburne, J. Brown, T. F. Cheatle, R. P. Cooper, D. Gibson, G. L. Foster-Harter, C. H. Jolliffe, E. Nock, H. C. C. Parker, F. W. Rudgard, H. Williams, M. Williams, etc.

There are few more pleasant places on our South Coast than the old-fashioned village of Aldingbourne, nestling as it does amongst the foothills of the Southdown Range, about midway between the crests of the Downs and the sea. Places of interest or of historical note abound on every side; Arundel Castle is but a short walk distant, Chichester Cathedral is clearly visible, while the timber crowned hills of Goodwood form a striking background to as fair an agricultural picture as any of our English counties can boast. Amid such surroundings as these an appropriate home is found for the wonderful flock of Southdown sheep which for nearly twenty years past has taken so many of the principal prizes in all the leading show yards; and the exhibits from which have so often formed one of the most distinctive features of the Southdown classes at the Royal, the Royal Counties, the Bath and West, and many other shows, as well as at Smithfield—perhaps after all the most reliable test of excellence of any.

On first seeing Mr. William Toop's flock at home, perhaps the most conspicuous feature is the extraordinary thickness, squareness, or "blockiness" of the sheep. No matter which age is taken, they are all alike wide, deep, thick through the heart, close to the ground, and with good legs of mutton. Another very noticeable point is the remarkable family likeness existing amongst the ewes; of course in every carefully bred flock or herd uniformity of type is expected; but something more than mere similarity is seen here, and upon making inquiry of the genial owner, it appears that all the ewes, with the exception of a few in the older ages, trace their descent in a more or less direct line from one ram, Waterbeach, No. 304, Vol. I., bred by his Grace the Duke of Richmond and Gordon. This ram won many prizes at the Royal, and other shows, and was never beaten during the whole of his career, being placed first wherever exhibited. He was a most impressive sire, and endowed his progeny with his own marvellous constitution in a most unusual degree.

This brings us to the most striking characteristic of Mr. Toop's flock, viz., the wonderful aptitude to make flesh and maintain condition on the most meagre fare evinced by the ewes of all ages. Last winter there were, practically speaking, no sound roots upon the farm. The ewe tegs could only be allowed their usual acreage to fold over, the deficiency of roots being made up by oat straw and water; yet such is their hardiness of constitution that a grander lot of shearlings does not exist than these same ewe tegs have now grown into. It is the same with the older ewes; after an almost entire failure of both roots and seeds, keep was so scarce at the time of the writer's visit (last week in June) that the ewes were actually being kept on thistles, obtained from a rough piece of land adjoining Mr. Toop's farm, a certain quantity being cut one day under the other to become withered; keep on which many a flock would actually starve, yet not one ounce of cake or other artificial food was being used, the shepherd saying that his chief difficulty—in view of the approaching sale, which takes place on August 7th—was not in getting them up, but in keeping them from becoming too good in condition, as being bred only from sheep specially selected for their feeding qualities, they could not be prevented from laying on flesh if allowed to obtain their fill of even the plainest fare.

Nearly all breeders of pedigree stock have some particular fancy or fad—one goes for size, another for quality, a third for colour, and so on. Not that they are blind to all other qualifications; but each regards that animal as the best which has that particular point most developed, which he himself favours, without being too short of other essentials. Others again are

satisfied with an animal which has no glaring defect; it need not have any striking characteristic on the one hand, but must be difficult to find fault with on the other; a kind of negative goodness. When Mr. Toop began breeding Southdowns he made up his mind to go further than this. Having had considerable experience in grazing stock, being fully alive to the difference between various animals of the same breed as regards feeding capacity, and power of converting their food into meat; and remembering the marvellous improvement which had been made in the quality, thrift, quickness of feeding, and earliness of maturity in other breeds, he determined, by careful selection, to develop to the utmost in the Southdown sheep that power and habit of quick feeding and early maturity which adds so enormously to the profit and value of all live stock.

The showyards of nearly every civilised country in the world have year after year borne eloquent testimony to the unparalleled success which has attended Mr. Toop's efforts. Pursuing the same system in breeding Southdowns which enabled the brothers Colling to so enormously improve Shorthorn cattle, and by means of which Bakewell practically evolved a new breed of Leicester sheep, his flock speedily became famous, and few men now living have done more for the improvement and popularity of any breed of stock, than has been done for the Southdown sheep by William Toop.

As there seems to be some misunderstanding in regard to the stabling of thoroughbred yearlings at the Royal Dublin Society's Horse Show I am asked to state these horses will be stabled in loose boxes inside the showyard. These boxes will, however, not be in the Paddock Hall as in former years. The boxes will, as usual, be available for stabling by day and night during the show.

The tenth annual sale of Southdown sheep at Cambridge, conducted by Messrs. John Thornton and Co., in conjunction with Messrs. Chalk, of Cambridge, will take place on Friday next, the 27th inst., in a meadow close to the railway station, the proceedings commencing at two o'clock. The catalogue comprises over 40 rams and 60 ewes from the flocks of eminent breeders, including the Earl of Ellesmere, Earl Cadogan, Colonel McCalmont, Mr. C. Adeane, Mr. George Courtauld, and Mr. Abel H. Smith.

At a meeting of the London County Council last week it was decided to urge the Board of Agriculture to take steps to prevent the spread of glanders among horses. During the past three years the Council had paid over £5,000 as compensation for horses slaughtered.

A correspondent of the *Standard*, who signs himself "Marcus," draws attention to a new form of cruelty to horses, namely, the obtaining of some powder from chemists which is rubbed on the corners of the mouth to create a sore, that the poor horse may give at once to the bit, whichever way the cruel driver chooses to drag him. He says: "One seems only able to act in cases of active cruelty, the sly hits of vicious drivers to their horses being generally disregarded by the public; but surely the fact I name is cruel enough to be strongly protested against by all lovers of animals."

On Wednesday in next week, Messrs. Sexton, Grimwade, and Beck will dispose of a number of pedigree Hackneys belonging to Mr. Walter Lloyd, at Heaselands, Hayward's Heath, Sussex. The catalogue contains forty-three lots, a few animals from the studs of neighbouring breeders being included, amongst them being the famous mare, Lady Lofty II., the property of Mr. Ernald Mosley. The whole of Mr. Lloyd's animals will be sold without reserve. Mr. Lloyd has spared no expense in the service fees of the mares offered, and amongst other sires represented are Goldfinder VI., Polonius, Agility, Conquest II., Doctor Syntax, Champion Ganymede, Royal Dane, Lord Hamlet and the Heaselands Stud horse, Danegelt's Pride 5955, whose stock are coming out wonderfully well. Many of them are carefully broken to harness and to ride, amongst them some certain winners in the show-ring. The sale will commence immediately after a 12.30 luncheon.

I have received a copy of the programme of the North-East Agricultural Association's three-day Horse and Sheep Show, which takes place this week at Balmoral, Belfast, opening on Wednesday. The first day will be devoted entirely to the judging, but on the two other days there will be parades of stock, driving, and jumping competitions, etc. The showyard opens each day at 9 o'clock, and closes at 6 p.m. If fine weather prevails there should be a very good attendance of visitors for the Society has arranged a most attractive exhibition.

CATTLE.

Sale of Mr. W. H. Mullens' Kerry and Dexter Cattle.

On Friday, in a paddock opposite the entrance to the show ground at Tunbridge Wells, Messrs. John Thornton and Co. disposed of the herd of pure-bred Kerry cattle (including all the prize-winning animals) the property of Mr. W. H. Mullens, of Westfield Place, Battle, as well as some pure-bred Dexter cattle, the property of the Countess De La Warr. Mr. Mullens' herd was bred in Sussex from some of the best specimens obtainable from Ireland and from purchases made at Messrs. Robertson's and other first-class sales. Among the animals were nine prize-winners, including Empress, first at the Royal Counties and Tunbridge Wells Shows in 1896; Dahlia, first and champion at the Dairy Show in 1898; Vesta, first at Tunbridge Wells last year; Cowslip, first at the B.W.E. meeting at Cardiff in 1898; Gloria, first at the same Society's meeting last year; and Sirdar 47, first prize bull at Tunbridge Wells last season. Excluding seven calves, sold at from 10s. 6d. to £2 2s. per head, twenty-three of Mr. Mullens' twenty-four cows and heifers were sold, the prices ranging from 5½gs. to 16½gs., and the total being 246½gs. The purchasers were the Duchess of Newcastle, the Countess De la Warr, Mr. G. T. Barham, Mr. Foster, Mr. Gray, Mr. R. T. Robertson, Mr. Stent, and Mr. G. T. Tomkins. Mr. Foster also bought a bull for 7½gs., and Mr. R. T. Robertson bulls at 3½gs. and 4gs.

Four of the Countess De la Warr's were sold for from 11gs. to 25gs., the total being 69gs., and the purchasers Mr. R. T. Robertson (3) and Mr. H. M. Lloyd, while Mr. Robertson bought a bull for 9gs. and Mr. Mullens a cross-bred Dexter-Shorthorn bull for 7gs.

Transactions in Store Stock.

[*From the Irish Department of Agriculture and Technical Instruction.*]

Kinsale Fair, co. Cork, was held on 18th July. Small fair, cattle mostly thin. Calves, second class, £3 7s. 6d. to £4. Yearlings, second class, £6 to £7; third class, £4 to £5 2s. 6d. Two-year-olds, first class, £10 to £12; second class, £7 to £9; third class, £5 to £6 10s. Springers, second class, £11. Average-sized sheep fair; demand slow. Lambs, first class, £1 2s. to £1 4s.; second class, 17s. to £1. Hoggets, first class, £2; second class, £1 5s. to £1 10s.; third class, £1 1s. to £1 2s. 6d.

Roscommon Fair was held on the 19th inst. Three-year-old cattle in forward condition sold well. Second class one and two-year-olds unsaleable. Springers dear. Calves, first class, £3 10s. to £6; second class, £2 5s. to £4 10s. Yearlings, second class, £6 10s. Two-year-olds, first class, £13 5s.; second class, £9 to £10 10s. Three-year-olds, first class, £14 5s. to £14 7s. 6d.; second class, £12 5s. to £13. Springers, first class, £17 15s. to £22; second class, £12 5s. to £14. Large supply of fat sheep and store lambs. Slow demand for lambs, many remaining unsold.—Lambs, first class, £1 6s. to £1 10s.; second class, £1 1s. to £1 4s. Hoggets, second class, £1 10s. to £1 14s. Two-year-olds, second class, £2 to £2 3s.

HORSES.

Sale at the Brookfield Stud.

The seventh annual sale of Mr. Burdett-Coutts's horses took place on Thursday at the stud farm in St. Alban's Road, at Highgate. Eighty harness horses in all were catalogued, but they did not attract that attention from buyers which is customary—a fact that was due more to its being the close instead of the commencement of the London season. Many of the earlier lots failed to find buyers at their reserves, but with Skirmisher and Scout, a well-matched pair of bays, coming to the hammer, there was some enthusiasm over a bid of 300gs. Yeoman and Hussar, two bays, made 220gs.; Blackberry and Mayflower, a pair of blacks, 180gs.; Peter Gordon, a brown gelding, 150gs.; Champs Elysees and Bois de Boulogne, bays, 325gs.; and Mrs. Cleveland and Lady Languish, a beautiful pair of chestnut mares, 460gs. In the aggregate forty-five lots produced 5,298gs., an average of 117½gs. per head, with which Mr. Burdett-Coutts seemed to be quite satisfied. Among the company were Lord Mostyn, Mr. C. J. Monk, M.P., Sir Walter Gilbey, Sir Gilbert Greenall, Capt. R. B. Barry, Capt. Quintin Dick, Mr. Horace St. G. Voules, Mr. W. B. Fernie.

SHEEP.

Sheep Fairs and Sales.

Horsham.

At Horsham July Lamb Fair, which was held on Wednesday, about 5,500 lambs were penned. This number, however, was not so large as in previous years. Among those who sent lambs were Lord Leconfield, Admiral Brand, and Messrs. E. M. Bethune, C. A. Bryant, Breach, Blackmore, Blackiston, Crow, D. S. Elliot, Harold Elliot, Godman, Grinsted, Graham, Golds, Gatley, Messrs. Harwood, Huxtable, Helme, D. Humphrey, John Kay, Lintott, Lee, Myram, J. Muggeridge, A. T. Morrin, Norman, Neale, J. Napper, Rice, Robinson, Smith, Stubbs, Spiers, Street, Striven, A. Stanford, J. T. Strong, Tomkins, Tupper, W. Thorn, and B. Weller. The weather was delightfully fine, and there was a good attendance. Business, however, was dull. There were some fine pens on offer by Lord Leconfield, and Mr. A. Lintott, of Guildford, bought 100 at 38s. 6d. and 80 at 38s. Another hundred were disposed of at 36s. to Mr. Pring, of Arundel. The other pens sent in contained some very good lambs, but the average was not so good as in previous years. The average price was about 38s. 6d.

Saffron Walden.

Mr. Cheffin held his twelfth annual lamb sale on the Common, Saffron Walden, on the 15th inst., when over 2,000 sheep and lambs were penned. The highest price made for lambs was 40s. for a pen of twenty-five Hampshire Down ewe lambs, from Mr. W. E. Duckworth, of Henham. These were bought by Mr. C. E. E. Cooke, of Hinxton Grange. The next, belonging to Mr. Duckworth, averaged 37s. 6d. each, and were all bought by Mr. George P. Piper. These lambs were excellent specimens of Hampshire Downs. Mr. W. Stide sent a good sort, his consignment of 120 averaging 33s., the top price being 37s. 6d. Mr. C. Ende's made up to 29s. 6d., Mr. Butterworth's up to 27s. 6d., Mr. W. Flack's 29s., Mr. R. J. Clayden's 31s. and 29s., Mr. Charles Clayden's 28s. to 33s. 6d., Mr. W. Spicer's 28s., Mrs. E. Smith's 27s., Mr. A. N. Myhill's up to 27s. 6d., Mr. W. Pallett's up to 29s., Mr. W. S. Norris's up to 29s. 6d., Mr. G. S. Scales's 33s. 6d., Mr. W. C. Emson's 24s., Mr. J. Burrell's half-breds from 26s. to 30s., Mr. T. Rush's up to 28s., Mr. F. Dennis's 27s. 6d., Mr. W. Smith's 28s., and Mr S. Hagger's from 28s. to 34s. Mr. James Wiseman's shearling Hampshire ewes made 49s. and 48s., Mr. A. Seabrook's shearling Suffolk ewes fetched 50s. and 49s. 6d., Mr. Q. H. Smith's shearling Hampshire ewes 46s. 6d., Mr. J. Middlehurst's ninety ewes made from 39s. to 49s. 6d., and various consignments of draft ewes were sold from 18s. to 32s. 6d.

Inverness.

The annual sheep and wool fair at Inverness took place on the 13th and 14th inst. The attendance of buyers and sellers and others was larger than it was last year, and in the fine, warm weather business was carried on pleasantly in the Station Square. It was slow and halting in the opening stages. Sellers were sure of a rise on last year's rates, they naturally wished to make as much of it as possible. Buyers were willing to concede some advance, but not to the extent proposed. Some of them had lost on their purchases at last year's market by having sold too soon. Those who waited until spring reaped a substantial profit. The upward tendency of prices for sheep and the splendid promise of a harvest with plenty of keep were pointed out to the more timid buyers, and when a start was made transactions were entered into with more readiness than had been the case for some years. It was found that the crop of lambs was pretty short in the Highlands, owing to the adverse circumstances of the early months of the year, and lambs sold more briskly than any other

class of stock. Wedders were also found to be in demand, and they sold well, like the lambs, at enhanced rates. Cheviot ewes found a good market, but blackfaced ewes did not come off so well, and cast ewes were taken at last year's rates. The average prices obtained, as compared with those of last year, were as follows:—Cheviot wedders, 1s. 6d. to 2s. up; blackfaced wedders, 1s. to 1s. 6d. up; Cheviot ewes, 1s. to 1s. 6d. up; blackfaced ewes, 1s. up; Cheviot and blackfaced lambs, 1s. to 1s. 6d. up.

Woolgrowers also expected a substantial rise in view of the increase of prices since last market. They did not get as much as they expected—and it could not be said they took an over-sanguine view of the somewhat gloomy situation—but the best clips of Cheviot wool from Sutherland registered a rise of from 6d to 1s. per stone of 24lb. over the prices of last year. Blackfaced clips had difficulty in finding a market at the old rates.

Salisbury.

Salisbury sheep fair was held in the Butts on Monday morning. The weather was exceedingly hot, and the attendance of buyers was somewhat smaller than usual. The number of sheep penned, however, was larger than in any previous year, numbering on this occasion about 24,000. The greater proportion of these were disposed of by auction. The sheep came to hand in excellent condition, and although trade was somewhat slow, it was stated in some quarters that prices were from 1s. to 2s. better than last year, and compared favourably with recent shows. The trade in ewes was slow, draft ewes fetching from 40s. to 45s. apiece, and making in some cases up to 50s. Two-teeth ewes made from 42s. to 52s., and wether lambs up to 40s. each.

The feature of the fair, however, is the department in which prizes are offered, and this year, owing to the exceptionally good quality of the animals shown, competition was exceedingly keen. The challenge cup, value 25gs., and a prize of 10gs. for the best pen of improved Hampshire Down ram lambs was won by Mr. Cary Coles, of Winterbourne Stoke, Mr. T. Palmer, of Berry Court, Wallop, running him a close second, with Earl Carnarvon third. In the other prize classes competition was very keen. The following were the prize winners:—

Class 1.—First prize of £5 for the best two-tooth Hampshire Down ram, Mr. J Flower, Chilmark; second prize of £3, for the second best ditto, Mr. T. F. Buxton, Ware, Herts.

Class 2.—First prize of £5 for the best Hampshire Down ram lamb, and second prize of £3 for the second best ditto, Mr J. Flower.

Class 3.—First prize of ten guineas for the best pen of improved Hampshire Down ram lambs, in the proportion of two to every one hundred ewes, kept and put to tup the previous year, and that not less than four nor more than eight lambs be exhibited from one flock, and a challenge cup, value twenty-five guineas, will in addition be handed to the winner of this prizes, the same, however, not to become his absolute property unless won at two consecutive fairs, Mr. Cary Coles, Winterbourne, Stoke; second prize of £5, for the second best pen of ditto on the same conditions as to the number of lambs to be exhibited, Mr. T. Palmer, Wallop; third prize of £3 for the third best pen of ditto, on the same conditions as to the number of lambs to be exhibited, Earl Carnarvon

Class 4.—Prize of £5 for the best pen of eighty wether lambs, bred by exhibitor, from any flock not exceeding 400 breeding ewes, or of 100 lambs from any flock exceeding that number, Mr. Quint Cole, Amesbury.

Class 5.—Prize of £5 for the best pen of eighty breeding ewes good on tooth, and having been at least six months in the possession of the exhibitor, from any flock not exceeding 400 breeding ewes, or 100 from any flock exceeding that number, Mr. A. F. T. Drake, Dogdean.

Class 6.—Prize of £5, for the best pen of 100 Hampshire Down two-teeth ewes, the same having been in the possession of the exhibitor for a period of at least three calendar months prior to the date of the fair, Mr. Quint Cole

Class 7.—Prize of £5, for the best pen of ten ewe lambs, the same having been bred by the exhibitor, Mr. T. F. Buxton

Class 8.—Prize of £3 for the best pen of 100 South or Hampshire Down wether sheep, Mr. F. Rawlins, Ablington.

Class 9.—£5 prize to the largest penner, Mr. F. Rawlins.

Class 10.—£5 to the largest purchaser of sheep from the actual penners, Mr. W. T. Stubbs, Alresford.

Messrs. Waters and Rawlence held their usual great sale by auction in the fair ground, the entry comprising upwards of 11,500 head, and although the best current prices of the fair were obtained, and about the same as last year, trade was slow, and a total clearance impossible, owners holding about 1,100 of the above entry unsold. Regular draft ewes made from 35s. to 47s.; draft ewes, 31s. to 36s.; two-teeth ewes, 35s. to 54s.; wether lambs, 26s. to 43s.; ewe lambs, 25s. 6d. to 32s.; mixed lambs, 22s. to 32s.

Overton.

In common with sheep fairs in different parts of the country the Overton Sheep and Lamb Fair, held on Wednesday, suffered to some extent in comparison with previous years in the number of sheep penned. The prices on the whole ruled about the same as last year, and there was no doubt that the recent dry weather has had its effect upon the sale and purchase of sheep. The number penned this year showed a falling off as compared with twelve months ago of about 2,000 sheep, and trade generally, either in the hands of the auctioneers or the dealers, could not be considered brisk. Altogether nearly 20,000 sheep were penned, the greater part of which were disposed of under the auctioneer's hammer, Messrs. James Harris and Sons, of Winchester, knocking down nearly 8,000, and Messrs. F. Ellen and Son, of Andover, some 2,500. The principal business was done in lambs, ewes being somewhat at a discount. Messrs. Frank and Sidney Rawlins were the highest penners outside the auction sales, and in that department also prices were rather below those obtained at Salisbury. Messrs. Harris and Sons were unable to command for the prize winning sheep nearly so high a figure as last year, Mr. Judd's 100 first prize draft ewes being knocked down at 44s. 6d., whereas twelve months ago 49s. was refused. It is not that the quality is not up to the average, but simply a general depression in the trade. Buyers from the Midlands and North were present in the usual strength, but they did not appear over anxious, and it is said that the lack of feed in those districts produced more than ordinary caution. For lambs the highest price obtained was for the 100 first prize wether lambs belonging to Mrs. Drake, of New Down, which fetched 48s. 6d. each—above last year—while the third prize wether lambs of Mr. Allen, of Popham, ran up to 43s. 6d., and the second prize lot, sent from Sir Richard Rycroft, brought 44s. each. The highest price for regular draft ewes was 47s., which was paid for 100 from the registered flock of Mr. H. Harris, of Steventon, while from Lord Ashburton's Chilton farm a similar number fetched 46s., the Northington Farm lot selling at 44s. 6d.; and a lot from Mr. T. A. Houghton, of Armsworth, at 45s. The lowest price for draft ewes was 27s. 6d. Two-tooth ewes ranged from 37s. to 53s. 6d., the latter price being given for twenty from Mr. George Judd; this was beyond the price obtained last year. Outside the show pens lambs showed a slight improvement on last year, the lowest price being 24s. 6d., as against 20s. a year ago, and for wether lambs from various registered flocks so high a price as 38s. 6d. was paid. Various prizes were again offered, and the judges were Mr. J. Stratton (Chilcomb), Mr. George Blake (Amesbury), and Mr. W. Cannon (Basingstoke). The following is a list of their awards:—

Class 1.—A piece of plate, value ten guineas, for the best pen of wether lambs, from a flock of any number, bred and fed by the exhibitor. The pen to be taken in the proportion of 10 in every 50 ewes kept by the exhibitor, but to consist of not less than 50 nor more than 100 lambs. The breeding flock to consist of not less than one-fourth two-tooth ewes: Mrs. Drake, New Down.

A piece of plate, value £5, for the second best as above: Sir R Rycroft, Bart., Kempshott Park.

A piece of plate, value three guineas, for the third best as above: Mr. W. Allen, Popham.

Class 2.—A cup, value ten guineas, for the best pen of full-mouthed ewes for breeding purposes, and bona fide for sale, the whole of which shall have been fed by the exhibitor from the 10th November, 1899. The pen to consist of not less than 50 nor more than 100, taken in the proportion of 10 in every 50 ewes kept by the exhibitor. The judges to have full power to determine the age. The breeding flock to consist of not less than one-fourth two-tooth ewes: Mr. George Judd, Cosham.

A piece of plate, value £5, for the second best: Mrs Drake.

A piece of plate of the value of three guineas, for the third best pen of ewes: Mr. George Judd

Class 3.—A piece of plate, value £5, for the best 100 two-tooth ewes: Mr. Frank Rawlins, Figheldean, Salisbury.

A piece of plate, value three guineas, for the second best: Mr Frank Rawlins.

Class 4.—A piece of plate, value £5, for the best pen of ram lambs of any breed. The pen to consist of not less than four nor more than eight, taken in proportion of two in every 100 ewes kept by the exhibitor; such ram lambs to have been bred by exhibitor: Mr. T Palmer, Berry Court, Wallop.

A piece of plate, value three guineas, for the second best pen of ram lambs: The Earl of Carnarvon, Highclere.

Oban.

The annual wool and sheep fair at Oban was held on Wednesday. There was about the usual attendance of south country dealers, but farmers were fewer than in preceding years. The general tone of the market was slack, and few transactions were effected till far on in the day. The trade in wool was exceedingly poor, and hardly any business was done. The average price in all classes was from 7s. 6d. to 8s. per stone, being about from 6d. to 8d. per stone down from last year. The demand for lambs was brisker, being 1s. and 1s. 6d. a head up from last year. Cross lambs sold at £17 clad score, and at 10s. to 16s. per head. Wedders were 1s. up, and in the case of good stock 2s. Two-year and three-year-olds sold at £24 per clad score, and 18s. to 23s. a head. Ewes were also up from 1s. to 1s. 6d. a head, the quotations ranging from 16s. to 18s.

Mr. Lyne's Hampshire Down Flock.

In consequence of Mr. Edward Lyne having decided to give up ram breeding, his old-established registered Hampshire Down flock was dispersed by auction on the farm at Compton, near Winchester, on Thursday by Messrs. Waters and Rawlence. A good business company assembled, most of the leading Hampshire Down flockmasters being represented, and before the sale commenced an excellent lunch was partaken of, the party sitting down in one of the large barns under the presidency of Mr. James Stratton. Mr. Rawlence, in a few words before the bidding was started, said he was sure intending purchasers must have satisfied themselves as to the condition of both the ram lambs and the ewes.

The sale commenced with eighty ram lambs of excellent quality and presented in the best of form; no extreme prices were realised for these, but an average of 8gs. was obtained, Mr. H. Warner (Faringdon) buying at 20gs., 17gs., 16gs., 11gs., 9gs., etc.; Mr Silvester at 20gs.; Mr. Homer at 21gs. and 18gs.; Mr. Matthews at 11gs. and 9½gs.; Mr. Lunn (for Lord Ashburton) at 13gs. and 12½gs.; Mr. Mitchell (for Mr. J. Bonham-Carter) at 17gs. Nine shearling rams fetched from 5gs. to 21gs., average 9gs., Mr. Homer buying at 21gs., and Mr. Goldsmith at 14gs. The 147 two-tooth ewes sold at an average of 58s., Mr. James Flower (Chilmark) taking the highest priced pen at 142s. 6d. each; Mr. Matthews buying at 76s., Mr. W. C. Young at 72s., Mr. Homer at 70s., etc. One hundred and fifty four-tooth ewes averaged 60s. 6d., Mr. Flower, amidst applause, buying at 150s., Mr. Matthews at 76s., Mr. Buxton at 68s., Sir Herewal dWake at 68s. and 60s., Mr. Falconer at 61s., Mr. Way at 61s., Mr. Preece at 62s., etc. Eighty six-tooth ewes averaged 55s., Mr. Matthews buying at 84s., Mr. W. C. Young at 74s., etc. Seventy full-mouthed ewes averaged 47s. 6d., Mr. Matthews buying at 60s., Mr. Goldsmith at 53s. The 150 ewe lambs, which were much admired for their beautiful type and quality, averaged 50s., Mr. Cary Coles buying at 82s., 70s., 66s., and 60s., Mr. Hall (for Lord Carnarvon at 70s. This concluded what was generally considered a very successful sale under the present prices of sheep generally. By an unfortunate coincidence Mr. Lynes's most valuable shep died on its back a few days before the sale.

Devon Longwool Ram.

(Property of Mr. F. White, Torweston, Williton. First prize at the Bath and West.)

Saxmundham.

Messrs. Flick and Son's thirty-third annual lamb sale at Saxmundham took place on Friday, when about seven thousand registered Suffolk and other breeds of lambs and sheep were sold. Trade opened a bit languidly, bidding being distinctly slow for the opening score or two lots, but there was more movement as the sale advanced, and, speaking generally, prices may be written down as about the same which prevailed at the last lamb sale in the district, that at Sutton a week previously. The details which are appended will sufficiently indicate the respective values of the various consignments:—

Registered Suffolk Flocks. Mr. R. Flick, Heathen Farm, 50 ewe lambs, 29s. and 30s.; 60 wether lambs, 28s. to 31s. 6d.; Mr. J. G. Hurrell, Tunstall, 100 ewe lambs, 32s. (cap 36s.

34s. 6d.); Mr. C. S. Sherwood, Hoo Hall, 50 ewe 35s. 6d., 100 wether 29s. 6d.; Mr. J. J. Creasey, Sibton, 20 ewe 34s., 50 wether nearly 29s., 20 shearling ewes 54s. 6d., 16 2 and 3-shear ewes 46s. 6d.; Captain Price, Carlton Hall, 60 ewe lambs 36s. 10d. top 40, 40s.), 60 wether 27s. 10d.; Mr. A. Chambers, Middleton, 50 ewe 42s. 6d. (top 25, 48s.), 20 wether 34s., 15 26s.; Mr. J. R. Grimsey, Dunwich, 150 ewe 32s. to 21s., 230 wether 30s. 6d. to 24s., 16 shearling ewes 50s. 6d., 20 full-mouthed 27s., 20 crones 21s.; Messrs. Miles and Chambers, Sweffling Hall (the entire flock), 80 2 and 3-shear ewes 49s. (top 50, 53s.), 22 ewes 23s., 60 ewe lambs 26s. 6d. (top 30, 32s. 6d.), 50 wether 25s. to 16s. 6d.; Mr. George Wigg, Flixton Hall, Lowestoft, 40 ewe 31s. 6d., 23 26s.; Mr. E. T. Barnes, Sudbourne, 30 ewe 24s., 20 wether 29s. 6d., 32 19s.

Black-faced: Mr. P. Rock, Hinton Lodge, 40 ewe 28s., 120 wether 21s. 4d.; Executors Mr. A. Lewin, Farnham Hall, 120 ewe 27s. 10d., 20 22s. 6d., 120 wether 28s. 6d., 20 22s.; Mr. James Hambling, Snape, 40 ewe 24s., 40 wether 23s. 6d., 20 mixed 19s.; Right Hon. Lady Rose, Upper Abbey Farm, Leiston, 80 mixed 24s.; Messrs. W. and G. Hambling, Friston Hall, 100 ewe 29s. 4d. (top 40, 35s.), 16 crones 23s.

Half-bred: Executors Mr W. Rackham, 20 wether lambs 28s., 20 mixed 24s.; Mr. T. C. Collen, Knoddishall, 100 shearlings 35s. 7d., 35 full-mouthed ewes 31s 6d. to 25s., 40 lambs 21s 6d.; Mr. F. Ling, Blaxhall, 320 22s. 1d.; Messrs. Repe, 280 23s. 5d., 20 crones 17s.; Right Hon. Lady Rose, 80 lambs 24s. 9d.; Mr. Wm. Chambers, Marlesford, 110 24s. 6d. to 17s.; Mr. J. Huson, Little Glemham, 200 24s.; Mr. J. E. Berry, Sibton, 60 19s.; Mr. H. G. Fairs, Rendham, 80 21s. 1½d.; Right Hon. the Earl of Stradbroke, 50 27s. 6d., 36 23s.

First-cross: Mr. J. R. Tyrrell, Leiston, 80 ewe lambs, 32s 6d. (top 40 34s.), 10 fat wether 40s., 80 wether 29s. 6d., 24 mixed 21s. 6d.; Mr. J. Western, Sudbourne, 100 ewe 22s. 9d., 100 wether 23s. 3d.; Mr. T. F. C. Vernon Wentworth, 100 ewe 24s., 100 wether 23s. 9d., 40 mixed 19s. 6d., 10 crones 15s. 6d.; Mrs. S. Wright, Farnham, 80 ewe lambs 27s., 80 wether 26s. 9d., 80 mixed 22s.; Mr. J. E. Berry, 100 shearling ewes nearly 44s. (top 20 47s.).

Wool Fairs and Sales.

Bristol.

On Wednesday, at the Bristol Cattle Market, Messrs. Geo. Nichols, Howes, Young, Alder, and Co. inaugurated a wool sale, which they intend holding annually, at the request of many farmers in the surrounding neighbourhood. Inasmuch as it was only announced to be held some three weeks ago, many had already disposed of their wool, and the entries were not so large as had been hoped. From between 3,000 to 4,000 fleeces were offered, all of which were sold at most satisfactory prices, the washed wool making 7½d. to 9¼d., and unwashed 6d. to 7½d. The largest buyers were Messrs. Fox, of Wellington, and Mr. Bevan, of Holt. All of the vendors who were present expressed a great satisfaction at the prices obtained, and foretold a successful future for the sale.

Ipswich.

At their second wool dispersal of the season, held at Ipswich on Friday, Messrs. Robert Bond and Son brought to the hammer another capital entry of consignments from well-known growers in the district, amounting in all to some 14,000 fleeces. The prices realised showed some falling off from the first sale this year—not an altogether unexpected contingency, and compared much more favourably with the figures at the June sale of 1899. A comparison of the figures for the sale of the present year reveals, indeed, a decrease at Friday's dispersal in all descriptions of wool, a fact which may be accounted for, perhaps, by the sale being the second of the season. Mr. Robert Bond conducted the sale, and with the bidding brisk, as before mentioned, the catalogue was got through in very expeditious fashion. The top price of the afternoon was 9½d., obtained for three sheets of black-faced ewe and hogget from Mr. D. Dickerson, a bag of black-faced ewe (unwashed) from the same consignor fetching 6¼d. Black-faced hoggets sent by the Earl of Stradbroke, Mr. T. L. Ashford, and Mr. G. A. Woodward, made 9¼d., and ¼d. less was obtained for the like breed of wool from Mr. W. Eastaugh, Mrs. Lowe, Mr. G. F. Goldspink, Mr. H. Rackham, and Mr. A. Blomfield. Southdown ewe from Captain E. G. Pretyman, M.P., fetched 8¾d., the unwashed variety sent by Mr. G. Westgate making 6¾d.; while Southdown hogget from Mr. W. F. Paul realised 6½d. The best price for black-faced ewe and hogget was 9d., a figure reached for consignments from Mr. A. Johnson, Mr. R. Westgate, and Mr. J. P. Knevett. A similar price was the highest in respect to black-faced ewe, 9d. being given in this case for wool from Mrs. Lowe, Mr. M. Wright, Mr. W. W. Hunt, the Earl of Stradbroke, Mr. G. Mann, Mr. A. Coe, Mr. C. Freeman, Mr. J. Ford, Mr. W. Reeve, and executors of Mr. T. Woodward. For the purpose of comparison, it may be mentioned that contrasted with the June sale there was a decrease of ½d. in respect to both black-faced ewe and hogget. The top prices for halfbred wool were:—Hogget 8½d. and ewe 7¾d., as compared with 8¾d. and 9d. respectively at the previous sale.

Bury St. Edmund's.

On Friday, Mr. Robert T. Simpson, of the firm of Messrs. Salter, Simpson, and Sons, conducted the annual wool sale at Bury St. Edmund's. There was extremely keen competition amongst the buyers. Of the 115 lots, the top price of the day was 11¼d. per lb., given by Mr. Schofield for Southdown hogget wool, consigned from the Duke of Grafton's Euston Home Farm. The next price was 11d. per lb., realised for Southdown fat shearling wool from the same farm. Some Southown ewe wool, also from the same farm, made 10½d. per lb. Mr. C. E. Simpson's Southdown hogget wool made 10¼d. per lb., Mr. C. Morbey's Southdown ewe wool was sold at the rate of 10d. per lb. Some Southdown ewe wool consigned from the Duke of Grafton's West Farm fetched 9¾d. per lb. At the rate of 9½d. per lb. was sold black-faced hogget wool, sent by Mr. G. H. Wilson, Redgrave Hall Farm, and similar wool from other farms, including those of the late Mr. J. F. Clarke's exors. and Mr. J. Saunders. Black-faced ewe wool, consigned by Mr. G. H. Wilson, of West Hall Farm and Redgrave Hall Farm, fetched at the rate of 9d. per lb.

Lewes.

This old-established fair was held on Friday at the Bear Hotel, Lewes. Upwards of 20,000 fleeces were offered for sale, but the prospects of a brisk trade were not very promising, the depressing effect which the war in China and other circumstances have already had on the cotton trade evidently making the merchants rather reluctant to launch out to any great extent. As a fact, only two sales were actually announced at the fair, but it was understood that several other lots changed hands privately at prices ranging from 10d. to 11½d.

Mr. Chaplin on Agricultural Legislation.

Mr. Henry Chaplin, President of the Local Government Board, delivered a speech at a Primrose League fête at Harkholme Hall, near Lincoln, on Saturday, and in the course of it made some remarks on agricultural legislation. He said that their opponents were pleased to call the Agricultural Rates Act a landlord's relief bill. On many occasions in the past he had proved by demonstration that that statement was absolutely false; that since the passing of the Act there had not been any general rise in rents, which was the only condition that by any means could have made it possible. He again challenged his opponents to say that even a tenth, twentieth, or fiftieth part of the relief which was given by the Act had ever gone except where it was intended by the Government it should go, namely, directly into the pockets of the tenant farmers themselves. (Applause.)

He said he did not pretend that the Agricultural Holdings Bill, now before the House of Commons, was of so much importance in that county, because they had always had a practice and principle of their own, embodied in the custom, which had the force of law, and upon which these very Acts were founded. But what the Bill did was all in favour of the tenant, and very shortly its effect would be to cheapen and simplify procedure in all differences between landlords and tenants. (Hear, hear.)

Mr. Chaplin also remarked that he must say a word upon a Bill so interesting to agricultural labourers, as the Bill giving them compensation for accidents. It did not hurt farmers, he was persuaded, because for every £100 paid in wages they could insure against accidents for 3s. 6d. They nearly all did more than that now, without law, and he was quite sure that if there were any who could not do it, their landlords would be perfectly willing to come to their assistance. (Applause.)

Contagious Diseases of Animals.

Summary of Returns issued by the Board of Agriculture for the week ending July 14th, 1900:—

Swine Fever.	Swine Slaughtered as Diseased or Exposed to Infection.	No.	253	981	876	602	12,3	20,043

Period: Week ended July 14 (this week); Corresponding week in 1899; Mean for the last 5 years; Corresponding period in 1899.

The figures for the previous week are approximate only.

THE YORKSHIRE SHOW AT DONCASTER.

The Yorkshire Agricultural Society's sixty-third annual exhibition took place last week on Doncaster Racecourse, opening on Wednesday, and continuing over the two following days. Brilliant summer weather prevailed for two days, followed by a thunderstorm, and the attendance of visitors was very disappointing and much below the average. Following so close on the exhibition of the Royal Agricultural Society at York, many had their doubts as to the success of the county show, and so far as the attendance of visitors was concerned their doubts have been realised. The number who have paid for admission was 20,173. This, although strong, is only 88 less than the attendance when the Society met in Doncaster in 1865. Only once since the Howden meeting of 1864, with its total of 12,827, has the show been so poorly patronised as the present has been. That was in 1868, when only 10,669 visitors paid. In the light of this year's experience the following figures will be studied with interest, the total average for the past ten years, it should be explained, being 60,458:—

1893—Dewsbury	[illegible]
1894—Beverley	37,1[illegible]
1895—Halifax	[illegible]
1896—York	51,0[illegible]
1897—Harrogate	[illegible]
1898—Leeds	67,[illegible]
1899—Hull	[illegible]
1900—Doncaster	20,173

No less discouraging is a survey of the financial position. On Friday only £166 3s. was taken at the gates, as against £553 5s. at Hull last year, and £603 17s. at Leeds in 1898, the average for the past ten years being £729 1s. The grand stand receipts were represented by a paltry £15 4s., as compared with a ten years' average of £57 8s. 6d. Not a penny was received on Friday for reserved seats on the grand stand. The total receipts for the three days—the money to be derived from the implement and other departments is not here taken into consideration—are £1,465 6s., the lowest amount since the Wetherby meeting of 1868. The annexed comparative table, covering the three days of each show, tells its own tale:—

—	—	Receipts at Turnstiles &c.	Receipts at Grand Stand.	Season Tickets, &c.	Total Receipts.
		£ s. d.	£ s. d.	£ s. d.	£ s. d.
1890	Harrogate	3035 10 6	345 19 0	142 16 0	4224 5 6
1891	Bradford	4782 5 6	372 0 0	48 16 0	[illegible] 2 0
1892	Middlesbrough	3894 12 0	189 2 0	26 15 0	[illegible] 10 0
1893	Dewsbury	3797 13 0	221 9 0	109 14 0	4128 17 0
1894	Beverley	2190 2 0	276 13 0	34 13 0	[illegible] 8 0
1895	Halifax	3660 3 0	277 17 0	108 3 0	4046 3 0
1896	York	3174 15 0	449 6 0	41 9 0	[illegible] 10 0
1897	Harrogate	3029 18 0	807 8 0	147 2 0	[illegible] 8 0
1898	Leeds	3996 5 0	720 5 0	25 3 2	4742 13 2
1899	Hull	3426 12 0	554 12 0	10 18 0	[illegible] 2 0
1900	Doncaster	1176 10 0	285 2 0	3 5 0	1465 6 0

The entries of stock, however, though below those of the last three or four years, were about an average, and the visit of the Royal seems to have had very little effect in this quarter. The prize money was not quite so large as last year, the total being £2,660, as against £2,850, and perhaps this accounts for the total number of entries of live stock being 943, as compared with 1,017 at Hull last year, and 1,037 at Leeds in 1898. There were several not unimportant items of declension, but there were also good set-offs. While the presence of forty-two fewer hacks was something to be sorry for, this loss is fully counterbalanced by thirty-seven extra Shorthorns. Aberdeen-Angus cattle were ten short, but Jerseys showed an increase of nineteen head, and quite atoned for the wise cutting out of Guernseys, of which only nine came forward in three classes at Hull. The collection of cattle outnumbered that seen at any Yorkshire meeting for over twenty years, Shorthorns naturally making the biggest show. Hunting horses were only twelve less than the muster at Hull; heavy horses put as many on the other side of the account. Sheep came well up to the average, shortness of numbers in one or two sub-divisions notwithstanding. In all there were 157 units of decrease and eighty-six items to the good; but, sixty-three points of decline must be deducted to bees, honey, and [illegible]. There was a little variation in the classification of the stock. Under the head of sheep, a class of Hampshires replaced two classes of Shropshires, Guernseys were struck out, and pen-reared lambs had to be six instead of five years old or more, and four or five years instead of four years of age, a change that equalised competition in the two classes.

Cattle.

Shorthorns.

The premier position in the catalogue was given to Shorthorns, and they were a magnificent lot, and were, on the whole, better than the collection seen at the Royal, notwithstanding that several famous animals were not here. In the aggregate there was a marked increase on last year's entry. It was caused chiefly by greater competition in the family class, and in the classes for cows and bull calves. Aged bulls and heifers were, on the other hand, by no means so numerous as twelve months ago. An entry of nine females was satisfactory, and [illegible]

with the four catalogued at Hull, and although no more than six put in an appearance, they made a capital show. Pride of place went to Mr. William Bell's nice Scotch-bred cow Lady Clara 3rd, and her produce, Baron Abbotsford and Baron's Pride. Queen of Hearts and her family, who won the prize last year for Mr. C. W. Brierley, were second this time. Good dairying qualities commend all the others in the class. When it came to the contest between individual cows, Ingram's Queen, the oldest of Queen of Hearts' produce, scored over Lady Clara 3rd, and thus repeated her Lincolnshire success and her earlier triumph at Hull. Autumn Queen, another Lincolnshire winner from Brimfield, and the redoubtable Welcome came next, and there was high commendation for the shapely Warrior Queen (a third Royal winner), the massive Morning Belle, and Mr. Battie-Wrightson's roan four-year-old Viola. That admirable cow of Mr. Joseph Harris, Empress 12th, was passed over, and she was the York Royal reserve champion. Last year only one animal entered the lists for the Shorthorn Society's prize, but last week there were close upon a dozen. Here the grand characteristics of Lady Clara 3rd again came to the front. She was seconded by Mr. Victor Cavendish's Lady Albreda, one of Mr. F. J. S. Foljambe's breeding. A stylish Scotch-bred heifer headed the younger class in calf or milk. This was Mr. Dudding's Lady 21st, a daughter of Idol, a Leicester winner. Following her were such notable examples of North-country blood as Mr. Willis's White Heather, Mr. G. Harrison's Welfare, and Mr. Joseph Harris's Pansy 2nd. The two-year-old heifers were equally satisfactory, the Lincolnshire first, Victorine, a very neat daughter of Bapton Victor (dam Vaseline), being the judges' choice, with Mr. Dudding's Riby Jessy, got by Golden Robin, second. Between Lord Middleton's Lady Waterloo B 2nd, a second Royal prize-taker, and Mr. G. Harrison's Village Queen, sired by Village Archer, there was not much to choose. There was nothing special to be said about the heifer calves. It was a near thing between the first and second—one a daughter of Lord Victor, bred at Waresley Park; the other one of the Duke of Clarence stock, bred by the owner, Mr. Battie-Wrightson. Only four aged bulls passed before the judges, so that it was not much of a victory for Alto, the Maidstone winner of two years ago. Mr. Ecroyd's Duke of Armathwaite was second, and the thick-fleshed Marvel, bred by Mr. James Midgley, of Stamford Bridge third. Two-year-old bulls were fewer than last year. The judge's preference was for Lavender Jet, a son of Count Lavender (dam Alexandra 1st), who got no more than simple commendation at York. Favourite of Sanquhar, who came next, is a nice class of bull, but not quite so even as the other. The bulls above one and not exceeding two years were the cream of the Shorthorn section. They were a magnificent lot, and took considerable time to judge. Whether Baron Abbotsford or William the Conqueror is the better of the top two it is difficult to say. Even the judges seemed puzzled. Good Shorthorn character, masculine head, and splendid lines are possessed by both. The former was sired by Baron Alnwick out of the successful Lady Clara 3rd, to which allusion has already been made. The latter is about three months older, a son of Matchmaker and Jessamine, bred in Lancashire. The third winner was Royal Lancaster, one of the Armathwaite herd, whilst a neat, well-bred roan son of Cornelius had the reserve number, and there were awarded no fewer than seven h.c. cards and two tickets of simple commendation. Martian and King Alto, rivals of the Lincolnshire Show, were here on a dead level of excellence. Bapton Diamond, a son of Augustine and Bapton Pearl, headed the bull calves between five and twelve months. He was, however, run very close by Golddigger, a symmetrical bull with beautiful hair and plenty of style. Mr. R. Stratton's two Highflyer calves are also excellent specimens. Mr. John W. Harrison's Morning Crown won the Shorthorn Society's prize for the best bull calved in 1899. His dam was Maid of the East by Prince Geneva. Another Yorkshire-bred one, Mr. Snowball's Crown Prince, sired by Look Ahead (dam Crown Jewel) is reserved. It will be seen that when the principal awards are reckoned up Yorkshire and Lincolnshire carry off but one apiece, Northumberland takes a couple, and the rest go far afield.

Aberdeen-Angus.

The six classes into which Aberdeen-Angus were divided comprised twenty-one exhibits, or about the same number as a year ago. The figure is more than satisfactory when it is remembered that this year's Yorkshire meeting clashed with the Highland Show at Stirling, to which many notable breeders on the other side of the border naturally sent stock that might have been seen at Doncaster. This also explains the absence of many Royal winners. Still, a representative lot was forwarded by breeders in England, and it is worthy of note that some of the principal prizes went to a Yorkshire herd—that of Mr. John McIntyre, of Bedale. Mr. Charles E. Hunter, of Gainford, Durham, was likewise singled out for distinction, as was Mr. L. A. Macpherson, of Walsall. When we state that Mr. Clement Stephenson was represented by specimens of his famous Benton herd, it will be understood that he was among the prizemen. In the aged bull class, Mr. Bainbridge, of Northumberland, had a walk over with a shapely four-year-old son of Enthusiast of Ballindallock. The same breeder was handed the reserve card in the class for bulls above two and not exceeding three years old, the winners in this class being Mr. Turnbull's Raven of Benton 2nd, the Seaton Delaval Coal Company's Golden Bar, and Mr. Macpherson's Burnaturn. For the well-outlined bull Withers, Mr. George Hoyles, of Skidby Manor, Hull, was highly commended. In a strong class of cows, Mr. C. Stephenson secured the lead with the compact, nicely-fleshed Elite of Benton. Mr. Macpherson's Pride of the Grove made a good second. Among the heifers not exceeding three years old, Mr. Stephenson led with Jipsey of Benton 5th, both second and third honours falling to Mr. McIntyre, of Bedale.

Jerseys.

Jerseys, though mostly having to journey from the southern counties, were stalled in larger numbers than has ever before been the case at the Yorkshire, while the merit was eminently satisfactory. Of the growing popularity of the Channel Islands breed no better proof can be afforded than the fact that this year's entries of Jerseys alone exceeded by about forty the total number of exhibits in both of the Channel Islands classes at Hull a year ago. The most coveted honour in this section, the Blythwood silver challenge bowl, offered by Sir James Blyth, Bart., was carried off by Mr. Armitage's Flora's Daughter, a handsome two-year-old, which stood at the head of her class for Jersey heifers not exceeding three years old—a class, by the way, which was so strong that, besides the second and third prizes, which were won by the Earl of Cadogan, the judges felt obliged to bestow no less than seven badges of merit. The reserve ticket for the championship was handed to Lord Cadogan's fawn two-year-old. She took second honours in her class. In the class for bulls above two and not exceeding three years old the honours were divided between the Earl of Cadogan and Mr. Phipps Pickering, of Kettering. The class for bulls above one and not exceeding two years old, which was headed by Mrs. Greenall's Bugler 2nd and the Duke of Marlborough's Convent King, was remarkable for the fact that Sir Reginald Graham, who at the Royal at York a month ago took a second prize with Dignity, a stylish whole-coloured sire of good shape, had now to be content with a high commendation card.

Sheep.

Leicesters and Border Leicesters.

The sheep, which followed the cattle in the catalogue, fairly well sustained Yorkshire traditions. Leicesters came first, and as a whole the shearlings were not so good as usual. On the other hand, the aged sheep and the lambs were particularly fine. The first prize in the shearling class was won by a sheep well woolled all over, and having wonderful loins, shown by Mr. Ernest F. Jordan, of Eastburn, Driffield, who bred him. The same gentleman also secured the third prize with another ram which well matches the first. Second place was given to the animal shown by Mr. George Harrison, of Gainford Hall, Darlington, which had a closer lock of wool. A nicely-coated sheep bred and shown by Mr. J. J. Simpson, of Pilmoor House, Hunmanby, got the reserve ticket in this class. Mr. Harrison, with the tup which carried off all the champion awards at York, won the white ribbon in the two-shear ram class. Mr. Ernest Jordan came second with a sheep which at the Royal did not pass the commendation stage; whilst a ram shown by Mr. Simpson, which was considered worthy of a second place at York, was relegated to the third position here. Mr. Watkinson, of Weaverthorpe, and Mr. Cranswick, of Hunmanby, two well-known East Riding breeders, were commended in this class, the latter receiving the reserve number. In the ram lamb class, Mr. Jordan came out first and second, with exhibits which were shown at York in a pen of three, but unsuccessfully. The third prize taker in this class—one of Mr. Simpson's—was reserved at the Royal. With three shearling rams, which were exhibited in public for the first time, Mr. Jordan was awarded the first prize in his class. In the three shearling gimmer section the judges were not in agreement with those of the Royal. The first-prize sheep here—a pen of Mr. Jordan's—were only placed third at York, whilst the first prize takers at the Royal had now to take the second position. These were shown by Mr. J. J. Simpson. Mr. Harrison's pen, which got a third, were second at York. Of Border Leicesters there was a small display, only seven pens being shown in two classes. This paucity was accounted for by the fact of the Highland Show being held on the same day; consequently the best sheep of the breed were to be found at Stirling. Those shown were good typical specimens, but without a history.

Lincolns.

The Lincolns claimed, as they always do, a good deal of attention. Out of a class of seventeen shearling rams Mr. Henry Dudding, of Riby Grove, Stallingborough, took the first prize with a grand upstanding, well-skinned sheep, which has been shown five times, and has won five firsts and four championships. The second prize sheep in this class, which was another of Mr. Dudding's, was awarded the third at the Royal. Only five were entered in the two-shear class. A big tup which the judges commended at York, and which was bred and shown by Mr. Strickland, of Bransby, Easingwold, was given the white ribbon, Mr. H. Smith, of Cropwell Butler, coming in second with a useful-looking ram. There was a good turnout of ram lambs, most of which looked like making useful sires. Mr. J. Pears, of The Mere, Lincoln, was successful in winning the first and third prizes, Messrs. R. and W. Wright taking the third ribbon and the reserve ticket. The last-named exhibitors ran out first in a pen of three, Mr. Dudding taking second honours. The judging of the shearling rams shown without grease or colouring excited considerable interest. The first award was given to a pen of three shown by Mr. Smith, jun., of Cropwell Butler, to which was also given the first champion prize of £10, offered by the Lincoln Longwool Sheep Breeders' Association for the best pen of the breed entered or eligible for entry in the Flock Book of the Association. The second championship prize of £5 fell to Messrs. Wright's pen that were successful in their class. The premier award in the three shearling gimmer section was a gift for Mr. Henry Dudding, whose exhibits were ahead of all others at the Royal, the Notts, and the Lincolnshire shows, amongst others.

Hampshire Downs.

The Hampshire Downs were confined to one class, namely, three ram lambs. When it is remembered that so recently as at the Royal there were five classes, all of which filled well, the scarcity may be a matter of surprise, but the advancement of the season is responsible for the falling-off, the best of the Southern sheep having been already disposed of for exportation. Mr. L. H. Baxendale, Newbury, took first prize and the champion award, Lord Rothschild taking second and reserve, and Mr. H. C. Stephens, M.P., the third award.

Wensleydales.

The Wensleydales were a specially good lot, but there were too few of them. Considering this fine breed of sheep belong to the county, a larger show might have been expected. In the first class drawn out, namely, shearling rams, the decision of the judges at the Royal was reversed. The first prize winner at York, a tup shown by the Exors. of the late Mr. T. Willis, of Manor House, Caperby, was here considered to be a bit too heavy in his staple, though a grand-looking sheep was placed behind a good-looking ram shown by Mr. Rhodes, of Stockeld, which at York was second in his class. The reserve number was given to the exhibit of Mr. Cleasby, of Isleback Grange. The any aged sheep were placed here as at York. The Exors. of Mr. Willis took the first with the Royal Champion, which is also the sire of a pen of gimmer lambs, Mr. Cleasby being second, and Mr. Rhodes third, with a particularly good sheep, which made his initial appearance in the show ring. The entry of this year's lambs was notable as proving how much they have improved by the genial weather which has prevailed since the Royal Show. The Exors. of Mr. Willis and Mr. Rhodes divided the honours between them. The gimmers were the best lot shown amongst the Wensleydales, but in this instance there was a reversal of the York judgment as regards the first and second pens.

Mountain Breed.

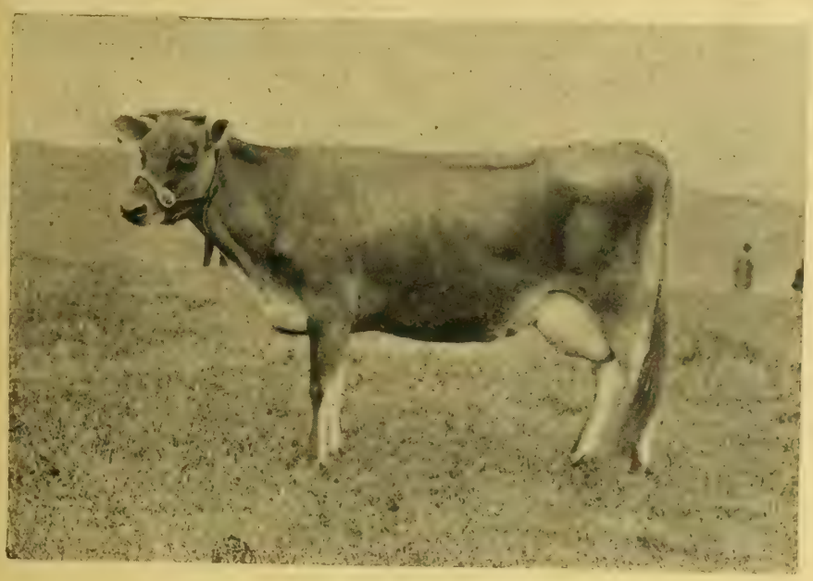
There are three classes of Black-faced Scotch Mountain sheep, the exhibitors of which are rarely absent from the catalogue of either the Yorkshire or the Royal Shows. With the exception of the shearling rams, where the Royal winner was relegated to the third place, and the second at York here placed first, the premier awards were the same, the executors of the late T. Dargue, of Kendal, and Mr. J. Vickers, of Elm Park, coming in for these honours.

Horses.

Hunters.

The show of hunters was generally acknowledged to be better than at York, and this applies to both quality and quantity, for they numbered 168, as against 154 at the Royal. Small in number but quite choice were the thoroughbred stallions. Five of the half-dozen entered faced the judges. In Red Eagle and Hindley Lord Middleton owns a grand pair. The former, who gained some success on the turf before going to the stud, is undoubtedly the better horse. His younger stable companion, a son of Minting, has good quality, but is lacking in depth in the fore ribs and might move a bit better in his walk. Brood mares were a nice group. Heavyweights were unfortunately light in number. A former verdict was upset by the placing of Mr. Swallow's Beatrice before Mr. Swales's Lady Grey. Light-weights were numerically strong, and a few good mares were among them. Lady Grosvenor, of course, sustained her enviable reputation, and did it easily. There was not quite the same certainty for second place. Some fancied Mr. R. Dixon's Princess, an old Yorkshire winner, but in spite of her shapeliness and good action, her years, which are eighteen, were no doubt against her, and she had to give way to Lord Middleton's Scornful, the seven-year-old daughter of Gordon, having with her a Red Eagle colt foal. The pick of the hunters were the heavy-weights of either sex. It was a grand lot of just a score that showed their paces round the splendid ring. They were soon reduced to about half the number. The judges found it difficult to award the prizes, and eventually called the Rev.

Cecil Legard to their aid. Colonel, the property of Mr. Nixon Gray, won the premier award, second going to Mr. Andrew Brown's Wexford, a well-known prize-taker. Mr. C. E. Clark's chestnut Staby was third. Light-weights were sufficiently numerous and even to give the judges pause. For first place, as in the last class, the contest lay between a Doncaster and a Cardiff horse; South Wales proved victorious, Mr. Nixon Gray's Bertram beating Mr. Andrew Brown's Foxhall, who, however, was preferred to a Newark representative, Mr. Wilkinson's Sportsman. Four-year-old geldings mustered well, but after the first winners there was hardly anything of special merit. The same may be said of mares of the same age. The first prize mare Miller's Maid, a Fitzgeorge mare, shown by Mr. F. A. Rickaby, had hardly left the ring before she was bought by Mr. R. B. Peirson, one of the stewards. Three-year-old geldings constituted one of the best classes. The fifteen entries included several animals of great merit; indeed, the entire class was commended. Half a dozen two-year-old geldings made up in quality for lack of numbers, five of them obtaining recognition of some kind, either substantial or commendatory. Eclat, Mr. Lett's successful showyard horse, did not stand so well in the ring as he might have done, but he is a well-built animal, and well deserved his first prize. The Lincolnshire winner, The Birdar (Mr. Drake's of that ilk, for there are many Birdars), was second, and Messrs. Ward's Blackbird third. Fillies of the same age, with eleven entries, showed up well. The defeat of Lady Meta, champion of the Royal this year and last, and the winner of a premier honour at Hull last year, was one of the surprises of the day. Mr. Wilkinson's Castaway, who lowered the colours of Mr. Richard E. Dixon's Yorkshire-bred daughter of Otterburn, got a third



Jersey Cow, "Sultane."

(The property of the Hon. Mrs. M. Smith, Grimley Hall, Market Harborough. Winner of the Blythwood Bowl at the Bath and West.)

at Peterborough, but nothing at the Royal. Third prize went to Jessie Skillan, who as a yearling had a successful career in the North, and at the Otley Show this season was placed second. Among the youngsters the fillies carried off the palm both in numbers and in general character. The two chief winners were Lord Middleton's chestnut son of Gordon and Mr. J. J. L. Irving's Thomasina, a daughter of Ivor, Mr. George Marton's Victoria being next in order. The Plunger, also bred and shown by Mr. Marton, headed the small group of yearling colts and fillies. Probably the colt gained some advantage from his size, but Mr. Darrell's second prize winner Conductor, who inherits his famous sire's name and many of his characteristics, was much admired for his beautiful outline and taking action. A Gordon colt from Birdsall House came in third.

Hackneys.

In a county that rivals Norfolk in the perfection of its Hackney material, it was only to be expected that the high-steppers would make a fine display. The only weak class was that for stallions, only three making their appearance in the ring. Mr. Hall's Langton Masher continued his successful career, and justified the good opinion formed of him when he was placed second in London. Forest King, who was placed second, has not been out before this year; and Mr. Scott's Copley Master, the third stallion, has made his mark at several West Riding shows. The two-year-old stallions were a splendid lot of pretty and promising youngsters, and made a noteworthy class. For the first time Mr. Buttle's Garton Sirdar met Mr. Hall's St. Thomas, and the contest was keen if not exciting. The judges failed to agree, and Mr. A. Morton, a Scottish breeder, was brought into the ring. He promptly gave the coveted ribbon to Garton Sirdar, and the verdict appeared to be a very popular one. The third place was assigned to Messrs. Cockayne Brothers' Paddock Rufus, a Sheffield-bred Hackney, which was placed second this year at the Crystal Palace. It was taken as a matter of course that Mr. C. E. Galbraith's four-year-old chestnut mare should top the excellent class of brood mares and foals. She was the champion at London, and now defeated Mr. Livesey's Orange Blossom, which was first at the Royal and is the holder of the Bath medal. Mr. John Ireland's Lady Connaught, which had a brilliant run as a three-year-old, and which this year stood third at the Royal and second at Islington, was placed third. Yearling colts or geldings made a fair class. Mr. Atkinson's Absent Hero, a very useful youngster, looking like making a good sire, secured the premier ticket, and so repeated the Malton success. The second colt, Commerce, from the Londesborough stud, looked rather light and feminine beside the Driffield colt. The commended ticket went to Mr. Hart's Londesboro', which was first at the Royal, where there happened to be little competition. Only three yearling fillies turned up. Mr. Sparkes' Oldfield Rosalind was first, being placed before Paddock Princess, which won at Sheffield. The two-year-old geldings in the prize list were all very useful, well-favoured Hackneys. Mr. Galbraith's superb chestnut, a son of Danebury, made his first appearance at the Highland Show last year, and was placed second. This is his second experience in the ring, and one could not but be struck with the fact that he looks like developing into a grand harness horse. The Leven Q.C., bred by Mr. Iveson, fared better at Doncaster than at Beverley, where he was not so highly appreciated. Mr. Moscrop's Rufus took third ticket. There was a comeliness about the turn-out of the two-year-old fillies which was particularly striking. Mr. Moore's B. B. Marionette managed to pass Lord Middleton's famous prize-taker Birdsall Daisy Belle.

Mr. Creaser's White Socks, which has fine limbs and a pretty action, was put third. In a nice class of three-year-old geldings Sir Walter Gilbey's bay Bright Spark, the Royal winner, was placed at the top. Messrs. Harrison's Donald, which was second at York, got no further than the reserves. The three-year-old fillies came out well. Mr. Henry Moore's typical brown mare Lobelia came out on top, and her supremacy was unquestioned. Mr. Livesey's Welcome was placed second. The class of geldings and mares ridden in the ring and equal to carrying 15 stone made a dashing display. No mistake was made in placing Mr. Batchelor's five-year-old chestnut mare Wild Agnes first. Mr. Irving's chestnut gelding, Featherby Squire, was second, and Mr. Fewson's Lady Lottie was third, the latter having the same place at the Royal. Mr. A. L. Goodson's chestnut mare Heathfield Conceit, bred by Lord Londesborough, which was first at the Royal, topped the class for Hackneys carrying 12 stone. He is a noted prize-winner, and was selected as reserve for the championship. Mr. Fewson's four-year-old black mare Lady Venice was second, and a practically unknown bay gelding, the property of Mr. Tyson, third. Mrs. Fred Holmes's chestnut gelding Pickwick, which was second at the Royal, only got a reserve. The Hackney Horse Society's gold medal was awarded to Mr. Galbraith's handsome chestnut brood mare Rosadora. She showed to great advantage in the ring, and there was no hesitation on the part of the judges in bestowing upon her the championship honours.

Coachers.

The cream of Yorkshire coachers met in competition, and the brood mares were better than anything seen at the Yorkshire for many a year. They were the feature of the section. The Malton winner, Mr. Lett's Lady Harome, who was only reserved at the Royal, was put at the top of a class which included more than one Royal winner. The stallions were quite worthy of the show. Specularity, another of Mr. Lett's stock, here went from the second to the first place among the two-year-olds, repeating the performance held at Malton, where he defeated Mr. Cousen's Albert, his victor at the Royal. As at York, Mr. John White's Master John secured the champion prize offered by the Yorkshire Coach Horse Society for the best stallion or colt. The corresponding distinction for mares and fillies went to Forget Me Not, a stylish daughter of Lord Rosby, exhibited and shown by Messrs. E. and R. Dutton. Messrs. Bolckow Brothers' three-year-old Courtier, from Deighton, Lost at the Royal, here sustained her unbeaten record.

Clevelands.

There was a slight decrease in the entries of Clevelands, but the show was a meritorious one. Welling on obtained the male championship for Mr. H. C. Stephens, M.P., as he did at the Royal, reserved to him being Mr. Stericker's Potto Baron. Both these animals, in separate classes at York, took premier positions. The best of the brood mares was Mr. Lett's Madam II., bred by Mr. Stephens, and in putting the latter exhibitor's Miss Welcome next to her the judges showed their agreement with the York award. Madam II., a beautiful mare, carried off the championship for females, the reserve number being a promising youngster, Lady Jane, owned by Mr. George Allison, jun., who in the yearling class beat three representatives of the Cholderton stables.

Shires and Agricultural Horses.

The Shires were one of the distinguishing features of the show. They came from all points of the compass, and included a satisfactory sprinkling not only of showyard celebrities but also of stock that may still further improve the breed. Mr. James Forshaw's Burgeon stood out prominently from among the aged stallions, whilst Lord Egerton's Tatton Victorious, a thick, compact colt of nice quality, topped the two-year-olds. He was second at the Royal, and met several worthy competitors here, including Mr. Forshaw's D'Arcy Albert, a son of Iron Chancellor, which was placed second. In a grand lot of brood mares and foals Mr. Forshaw's bay mare Daisy, bred at Retford, was placed before his bay mare Tom's Flower, which was third at the Royal, the third ticket going to Mr. V. Cavendish's Saxon Empress. Lord Middleton's Malton winner Pratt's Dore had to be content with a reserve ribbon. The judges supported the Royal decision in the yearling filly class by placing Lord Egerton's well-bred Lockinge Athena first and Mr. Eadie's weighty bay Barrow Princess second. Mr. W. Jackson's Holker R.I., the Royal winner, was placed behind Mr. Yerburgh's Lily of the Valley, and in this instance the verdict at York was reversed. No doubt Mr. Yerburgh's filly, which was first in London, has superb proportions and fine bone; there is, however, not much to choose between her and Holker R.I., which has engrossed a good deal of attention of late, and took the Shire Horse Society's medal. In the class for three-year-old fillies Lord Egerton's Tatton Godiva was preferred by the judges to Mr. Forshaw's powerful bay Whaplode Countess, which was second only at the Royal to Victor's Queen.

There were only two classes for agricultural horses, which were well up to the average, and compared well with the York Show. In fact, seven out of eight entries in the class for three-year-old geldings were Royal exhibits, the one exception being Mr. Turner's bay Sir Roger, which took the first position. Messrs. Davison's powerful brown gelding, Birdsall Clansman, the Malton winner, had, to the surprise of many, to give way to Mr. Eadie's Barrow Sam and Mr. Lowe's Barrow Excelsior, two good-looking horses of great substance, placed second and third respectively. The first in a grand class of four-year-old geldings was Mr. Davies' weighty bay Midlands Rattler, a most useful animal, the second horse being a fine, well-set animal bred at Grantham, the property of Mr. R. C. Cooper.

There was a large tent for the exhibits of butter and cheese, of which there was a good display. The collection of bees and honey was fairly good; and of the other minor sections mention may be made of the shoeing competitions, which once more aroused a great deal of interest.

The gentlemen who officiated as judges were:—

Cattle.—Shorthorns: William Drabble, Tuxford, Notts; Joseph Scarth, Wick House, Spalding; Richard Evernden, The Temple, West Wycombe, Bucks. Jerseys: W. E. Bridges, Headley House, and the Hon. A. F. Parker, Dorrable, Reigate. Devons: Wm. Yeo, Angas: Samuel Druce, Bath House, Bath. Aberdeen-Angus: Simpson, Dell House, Bath.

Sheep.—Leicester: H. Hand, Wyville, Grantham; Joseph Burgh, and J. J. Maggess, Dorrington, Lincoln. Southdowns: Walter Potter, Burpham, Arundel, Sussex; Lincoln: R. Davy, Wragby, Lincoln; Robert Kirkham, Bishop Burton, Beverley. Hampshire Downs: Thomas Franks, Pewsey, Wilts; Richard Brown, Newbury, Berks; Wiltshire: J. O. Deane, Hungerford, Berks; Mountain: John Wood, Lancaster; Kerry Hills: Phillip Edwards, and Hugh Jones, Llanidloes, Montgomeryshire; Herdwick: Wilson Rawlinson, Broughton-in-Furness, Lancashire; Exmoor: George Cox, Winsford, Somerset; Cheviot: J. F. Hall, Hexham, Northumberland; Blackfaced: J. Marshall, Rothbury, Northumberland; Hackneys, Ponies, and Harness Horses: Robert Bevan, Cheltenham, Gloucestershire; Dorset Horns: Thomas Buckett, Dorchester, Dorset; Polled Angus: Donald Watson, Montrose, N.B.; Devon and South Somerset Show and Agricultural Association: Joseph Smith, Dunkeswell, Honiton, Devon.

THE HIGHLAND AT STIRLING.

Stirling was last week visited by the Highland and Agricultural Society, this making the sixth occasion on which the great Scottish show has been held at this historical town. The first exhibition took place in 1833, and then the prizes amounted to £633, but last week the total sum was about £3,000, a figure which has only once been exceeded in the history of the Society, and that was on the occasion of the centenary exhibition at Edinburgh in 1884. A further comparison reveals the facts that the entries in cattle have increased from 273 in 1884 to 321 this year, horses from sixty-seven to 288, sheep from sixty to 369, and implements from twenty-two to 2,095. Pigs, however, have declined from forty to twenty-eight, while poultry, which were not exhibited till the second Stirling exhibition, have gone up from eighty-four to 457. Dairy produce shows an increase of one entry since the previous Stirling meeting nine years ago, the numbers being sixty-six. Although the statistics of this year fell short of the Edinburgh figures, which were exceptional, they were far above the average. The aggregate entries were 1,553, as compared with 2,036 in Edinburgh, 1,302 in Kelso, 1,461 in Glasgow, and 1,193 in Perth—the four previous years. The numerical difference between the present meeting and last year's show was spread over all the departments with the exception of wool, these exhibits being twenty-four as against fourteen. Taken all round the show was one of which the Society have every reason to be proud. Fine weather was experienced on each day, and the attendance of visitors was a most satisfactory one. It was not expected that the splendid financial result of last year would again be attained, but when the reckoning up is made it will in all probability be found that the takings were quite up to, if not above, the average. The spectators had much to interest them, there being the usual parades of stock each day, jumping competitions and some good music, whilst the Scottish Automobile Club had a good display of motor-cars.

As usual on the day following the judging, when exhibitors have a few hours of comparative leisure on their hands, a number of meetings were held in the pavilion in the yard. These included a general meeting of the Highland and Agricultural Society and a special meeting of the directors of the Scottish Chamber of Agriculture, at both of which matters of considerable importance to agriculturists were under consideration.

Cattle.

Shorthorns.

The Shorthorns, if less numerous than on former occasions, made a fairly creditable show. There were 73 animals forward, as compared with 112 at Edinburgh, 58 at Stirling in 1891, and 77 at Glasgow. As at the Royal Show at York, the Queen sent a number of competitors from the Shaw Farm at Windsor, and it was a notable feature of the exhibition that Her Majesty won three first prizes and carried off the championship honours. In a small class of aged bulls Mr. C. H. Graham-Stirling, of Strowan, was first with his massive white Sportsman, a four-year-old, bred by Sir John Gilmour, of Montrave. Next in order was placed the Earl of Rosebery's Villager, a red three-year-old, which is of fine quality, if somewhat lacking in substance. Mr. John Handley's second prize winner at the Royal Show was relegated to third place. Two-year-old bulls were headed by the Queen's Royal Duke, which thus repeated his performance at the Royal Show and at Dublin, and the judges had no difficulty in awarding him the president's champion medal, the prize given by the Shorthorn Society, and the silver medal for the breeder of the best bull. Mr. Graham-Stirling was awarded the second ticket for his roan Bright Star, Waterloo Ensign, a white, belonging to Mr. George Shepherd, Tarves, being third. Yearling bulls were topped by Mr. D. Mackellman's Lord Lovat, a Beaufort-bred roan by Royal Star, Colonel Murray's Consul, a Rosehaugh-bred roan, being second, and Mr. Robert Taylor's Bold Archer third. There was a small class of aged cows. Lord Rosebery earned leading honours with his Dalmeny Nonpareil III., a white Dalmeny-bred four-year-old which was sired by Sittyton Seal. A rich roan five-year-old, Flood, sired by Violet Chief, and owned by Mr. David Hume, Barrelwell, Brechin, was awarded the second card, and Mr. Graham-Stirling's four-and-a-half-year-old roan, Strowan Buttercup 12th, was placed third. In a large and good class of two-year-old heifers, the Queen, as at the Royal, was an easy first with Rose of Sharon, a beautiful roan sired by Prince Victor, out of Rose of Scotland. Mr. Duncan Stewart, of Millhills, was second with Lady 22nd, and the Earl of Rosebery third with Countess 3rd, a roan bred by the executors of the late Mr. John Law, New Keig, Whitehouse, Aberdeen. Mr. Henry Dudding's Lady 21st, which was third at the Royal and second at Bath, was unplaced. Yearling heifers were numerous, and again, as at the Royal and at Dublin, the Queen was awarded first honours for Maritana, a symmetrical white sired by Liberator, out of Maid of Denmark 3rd. Mr. David Hume was second with Floradora, a nice roan bred at Barrelwell, and sired by Bruiach, and Mr. James M'William, Stoneytown, Keith, was third with Hilda, a red-and-white sired by Pride of Fame.

Aberdeen-Angus.

This breed was numerously represented, but it cannot be said that so many cracks were present as have appeared at the annual gatherings of the Highland Society. In the first class for aged bulls Mr. Adamson repeated his Royal English victory with Diaz, which has had an unbeaten record at the Highland Society Shows. The second award went to Mr. Whyte's Jipsey Baron, a first prize winner at the Highland Show as a yearling, and purchased for 240gs. at the Perth sales. Her Majesty took third place with Juryman of Whitelums, a compact, even-fleshed bull, by Mainstay of Aberlour. In the two-year-old class Mr. Dyson Perrins had an easy win with Rosador, third in the aged bull class at the Royal. The second winner, Mr. Bruce's Egmont of Pitpointie, is a fleshy, compact bull; whilst Mr. Fletcher's Enterprise of Aberlour is a straight, good bull, but rather plain in his bone. In the yearling class, which was represented by a mixed lot, Mr. Bolden was the winner with Pundit of Preston, the second winner being Mr. Johnston's Buttress; the third was Mr. Sharp's Klondyke of the Burn. In the aged cow class Her Majesty carried off premier honours with Princess Irene. Mr. Smith was second with Stumpie 29th, a cow of nice character, Mr. Willsher's Black Victoria being third, but appeared to be lucky, many preferring Mr. Ferguson's Rose Bruce. In the two-year-old class Sir George Macpherson Grant had an easy win with Ellipsis. She was followed by Mr. Bainbridge's Sabrina of Hayston, a heifer of greater substance, but lacking the quality of the winner. Mr. Thomas Smith of Powrie was third with Witch of Endor 36th. In a numerous class of yearlings the Earl of Strathmore made a clean sweep of the first three prizes. The class was a strong one, and the judges issued about a dozen commendations. Mr. Adamson annexed the championship with his well-known bull Diaz, with Mr. Perrin's Rosador reserve. Mr. Adamson also carried off the championship prizes for the best-bred animal in the section with Diaz. The Ballindalloch Champion Cup fell to the Queen with Princess Irene 6th.

Galloways.

The collection of animals of this breed was perhaps the best seen in the history of the show. The first prize for aged bulls was won by Messrs. W. and R. Clark, Culmain, with their Cedric 4th of Tarbreoch, which was bred by Mr. James Cunningham, Dalbeattie, and bought at Castle-Douglas as a stirk for £39. The second prize also went to the Stewartry, the exhibitor being Mr. Robert Wilson, Kilquhanity Farm, Dalbeattie, who showed Macdougall 4th of Tarbreoch, bred by the late Mr. James Cunningham, Tarbreoch. The third prize went to the Duke of Buccleuch for his Barossa. The three-year-old bulls were headed by Mr. Robert Graham, Kirkconnel, with Gay Stanley, a very level, well-fleshed bull of good size, and the second prize fell to Mr. William Parkin-Moore, Carlisle, with the bull which was first as a yearling at Edinburgh last year. In the two-year-old class the first prize was won by Mr. David Brown, Lower Stepford, Dumfries, with his Camp Follower of Stepford. The second prize was won by Messrs. Thomas Biggar and Sons, Dalbeattie, with a bull of extra quality. The classes for females were well filled. First prize in the aged class was won by Nancy Lee 3rd of Castlemilk, a three-year-old cow belonging to Sir Robert Jardine. This exhibit also secured the champion medal as the best Galloway, and the success was all the greater because the cow was shown nursing a calf. The winner of the second prize in the class was an animal belong to Mr. Robert Wilson, which was got by Camp Follower, out of a gold medal cow. The first premium in the three-year-old heifer class was won by Mr. Robert T. Scott, Drumhumphry, Dalbeattie, with Bell 13th, which was reserve for the championship. The second prize winner, also shown by Mr. R. T. Scott, was second at Castle-Douglas this year, and third at the Royal Show. Sir Robert Jardine led the way in the two-year-old heifer class with Lady Lee of Castlemilk, which has never been shown before. There was a close competition between this animal and the second prize winner, belonging to Mr. Robert Wilson—Maggie of Kilquhanity—which was first at York.

Highland.

There has rarely been seen at any show finer examples of this most picturesque of breeds, not even at the great show of last year, though on that occasion the numbers were undoubtedly greater. Last year in the aged bull class the Duke of Atholl was first with Calum Riabhach 2nd, this year his lordship again carried off a premier award and the champion and breeders' medals with a two-year-old bull, another magnificent animal, Calum Buidhe of Atholl. Ben Dianabheg, a two-year-old shown by the representatives of the late Mr. John Stewart of Ensay, Obbe, which had never before been exhibited, was awarded a blue ticket. In the aged bull class Mr. T. V. Smith, of Ardtornish, began a series of successes with a handsome animal, Victor 16th, a black bull of handsome figure. The second prize-taker was the Rhu-na-Scarbh of the late Mr. John Stewart's representatives. There was an excellent show of yearling bulls, and the Duke of Atholl's Ossian Riabhach of Athole, which was sired by the champion bull of last year, was accorded the chief award, the Melfort-bred Dundonald coming next, though not at an appreciably long interval. One of the Ardtornish Victors came third, although at the Royal Show at York, where he made a first appearance, he was thought worthy of the leading ticket. Of the cows with calf at foot, Mr. Bullough's Rhouma was an easy first. Mr. Smith, of Ardtornish, showed the second animal, which has not been in winning form since the Kelso Show; the third was a cow of the well-known Ensay breed, while the Dowager-Countess of Seafield came fourth with an animal that was second at the Edinburgh Fat Stock Show last winter, and in the same position at the Inverness Show this year. Her ladyship was also awarded an orange ticket for a brindled three-year-old heifer which was first at Inverness, but in this class Mr. Smith, of Ardtornish, was easily first and second with two well-bred animals. The first, Sgiathach 24th, was first and reserve for champion at last year's Highland Show; the second gained the chief prize in her class at the Royal Show this year. Mr. J. S. Blair was to the front with a two-year-old heifer, Moay of Belfort, the quality of the Victor 5th, stock being shown by the further award of a very highly commended. Two of the leading awards, however, the second and third, went to Ardtornish, the former for a black, shapely animal, which has never previously entered a showyard, and the latter for May Queen 5th, which gained a fourth place at York. There was a lot of bullock stirks shown, the two principal awards going to Colonel Cheape, of Wellfield, Gateside.

Ayrshires.

The display of Ayrshire cattle was not quite so large as at the Edinburgh Show, though the number of entries—forty-three—exceeded that of the show of 1898, when thirty-seven representatives of the breed were entered for the Kelso Show. There was, on the other hand, no falling off in quality, and keen competition was the rule. Three aged bulls were forward, the winner being Commander, a big, thick, Southwick-bred bull belonging to Mr. Andrew Mitchell, Barcheskie, and sired by the famous First Choice. Mr. Robert Wardrop's Darnley, bred by Sir Michael Shaw Stewart, Bart., and sired by Duke of Mauchline, came second, the third ticket going to Mr. William M'Queen, Kippen, for The Provost, a brown and white of his own breeding, got by Daniel. Four two-year-old bulls were in competition. Strongbow, now the property of Mr. Robert Wardrop, Garlaff, Cumnock, was brought out in good form and maintained his position. He was closely followed by The General, the Mischief Maker bull from Monkland, belonging to Mr. Thomas Barr. Mr. James M'Farlane, Buchlyvie, was third with Governor of Palmerston; and Mr. Duncan Fraser, Dalmally, came fourth with Sirdar of Netherhall. Yearlings formed the largest class among the bulls. After a close comparison of Mr. Fergusson-Buchanan's Prince Imperial bull Prince George and Mr. James Howie's Go Ahead of Hillhouse, the former was preferred for first place. The third, Not Likely, also owned by Mr. James Howie, was favourite with the onlookers for a much higher position. General White, owned by the Crichton Royal Institution, Dumfries, was placed fourth; and a nicely coloured bull belonging to Mr. Thomas Barr, Viceroy, was fifth. The cows in milk made a small display, but what was wanting in numbers was compensated in great measure by the extra good quality of the prize winners. The aged class in milk was headed by White Rose 2nd, a daughter of Sloth Boy, and owned as well as bred by Mr. William Howie, Burnhouses, Galston. As was generally anticipated, she was also awarded the President's medal for the best Ayrshire. Beauty, by Knockdon, and owned by Mr. John M'Kay, Rothesay, was the second aged cow in milk. In a fair class of three-year-olds in milk, Mr. Alexander Cross, Knockdon, was first with Sonsy 2nd, by Prince; Mr. Charles Duncan second with Snowdrop, by Avondale; and Mr. Charles Kay, Gargunnock, third with Lady-smith. One of the strongest and best classes in the female section of the department for Ayrshires was that for three-year-olds in calf, several previous prize-takers being forward. Mr. William Reid's Dandy of Titwood, which was first at Paisley, was selected for the premier position. Mr. Robert Dawson's fine, red cow, bred at Mid-Ascog, was second; Mr. John M'Kay was third with a splendid commercial cow; and a beautifully coloured, gay cow, Martha of Old Graitney, belonging to Mr. Abram Kerr, was fourth. Although there were only four exhibits in the class for two-year-old heifers, yet the competition was very keen. In the end, Mr. Fergusson-Buchanan's Snowdrop of Auchentorlie was placed at the top of the list. Mr. Robert Wardrop's Heather King heifer, Ellen Terry, was second, and Mr. Andrew Mitchell's Traveller's Heir heifer, Mary, came third. In a very level class of quey stirks, Mr. James Howie furnished the winner in Queen Jessie, a recent purchase from the Messrs. Hunter, of Foulton, the breeders, Wyndham of Foalton being the sire. Mr. Barr's beautiful stirk, Pandora, by White Cockade, was second; and big, useful, thick stirks by Mischief Maker, and named respectively Queen Vashti and Queen Esther, belonging to Mr. Andrew Mitchell, were third and fourth.

Jerseys.

In point of numbers the exhibits in this section fell below the records of some previous years, and English exhibitors were conspicuous by their absence. In fact, except Mrs. Graham, of Airthrey Castle, who showed the second prize bull, the whole of the leading awards were divided between the Earl of Hopetoun and Mr. T. R. B. Elliot, younger, of Clif-

ton Park, Kelso, who furnished more than two-thirds of the classes. Notwithstanding the restricted show the quality was good, especially in the three-year cows, and it was this class which procured the honour of the President's medal, Mr. Elliot's Daisy, a whole fawn animal in fine condition, being reckoned by the judge the best Jersey in the yard. Of two-year-old cows there was only one on view, Mr. Elliot's Pansy, but the judge was thoroughly justified in according her the first prize. The bull class comprised only four exhibits, and none of last year's Highland Show winners were to the fore. Lord Hopetoun's Beresford Hope thoroughly deserved the premier position, albeit Mrs. Graham's Sailor King offered no mean opposition. Mr. Elliot was third with Golden Ray, a son of Golden Cloud, the gold medallist at Kelso. In the heifer class Lord Hopetoun was to the front with Beresford Fairy, which is out of Fiona Beresford, last year's first prize cow.

Horses.

Clydesdale Horses.

In this section there were some good classes. The first prize among stallions went to Messrs. Montgomery for Prince Thomas, a five-year-old bred by the Marquis of Londonderry. Mr. Herbert Webster came second with Lord Fauntleroy, which has a very creditable career. The third ticket went to Mr. John Crawford for Casabianca, a four-year-old, bred by Mr. David Dunn, Roxburgh, and sired by Baron's Pride. Mr. Walter S. Park was fourth with Lothian's Best, and very highly commended tickets went to Messrs. Montgomery for Elator, a horse sired by Baron's Pride, and to Rozelle, bred by Mr. Wm. M'Turk, Dalry, Galloway, still another of the Baron's Pride progeny. The same exhibitors were also commended for Lord Forester, after the same sire, and bred by Mr. David Hunter, Whithorn. Two-year-olds made a very creditable exhibition. There was a fair competition between Mr. Herbert Webster's Baron's Crown and Mr. Wm. Clark's Pride of Blacon. The first-named took premier honours. Messrs. Montgomery were third and fourth with Concord and Baron Mitchell respectively. The former was sired by Montrave Sentinel, and bred by Mr. Robert Paterson, Carnwath; and the latter was bred by Mr. Andrew Mitchell, Barcheskie, the sire being Baron's Pride. The very highly commended ticket went to the Seaham Harbour Stud Company for Pearl Oyster, bred by the Marquis of Londonderry, while the highly commended and the commended tickets went respectively to Messrs. Montgomery for Pride of Morning and Sir Everest, the latter bred by Mr. M'Intyre, Dunallan, Rothesay, and sired by Sir Everard. Yearling colts were a fairly good, though not specially numerous, class. Here the Messrs. Montgomery came to the front with another of the Baron's Pride strain. This is an exceedingly promising animal, bred by the late Mr. Lumsden. The second ticket went to Mr. James Kilpatrick, Craigie Mains, Kilmarnock, for Lord Dundonald. Mr. David Mitchell, Millfield, came third with Baronson, still another of the numerous progeny of Baron's Pride. Mr. Robert Macfarlane, Invergordon, was fourth with Kildonan. The very highly commended ticket was easily carried by Messrs. Montgomery for a bay colt, bred by Mr. Wm. Hood, Borgue, while Lord Strathmore was commended for another bay.

There was an interesting competition in the class for aged draught geldings, Messrs. Hastie and Sons, Blantyre, coming in first with Johnnie, a four-year-old, by Prince of Cathcart. Mr. Wm. Clark had to be content with second place for Wattie, the same exhibitor's Confidence being placed third. For three-year-old geldings Mr. Clark was first with Perfection, the second ticket going to Messrs. Hastie and Sons for The Wanderer. There was a very small show of two-year-old geldings, and Mr. Wm. Clark had very little difficulty in carrying off the first prize with Gallant, Messrs. Hastie again being second with Peter.

The female classes were fairly represented, one of the best being that for brood mares. The competition was very keen, although there was no doubt as to the merit of Mr. Holwes's Lady Raffan. Messrs. J. and W. Meiklem were second with Lady Summit, bred by Messrs. Meiklem, and sired by Summit. Mr. William Park came in third with Lady Rose, bred by Mr. Clark, Old Meldrum; and the fourth ticket went to the Seaham Harbour Stud Company for High Tide. Mr. Smith was very highly commended for Orphan Princess. The highly commended ticket fell to Mr. Andrew Dewar, Port of Monteith, for Arnprior Queen, a bay by Royal Gartly. Yeld mares were a very fair collection, but there was no great competition, Sir John Gilmour's Balmedie Queen Mab seeming to take the fancy of the judges. She was, however, followed closely by Mr. Smith's Belle of Fashion. The Seaham Harbour Company came in third with Essence. The fourth ticket went to Sir John Gilmour for Montrave Rowena, a full sister of the 1,000gs. mare Queen of the Roses. Mr. St. Clair Cunningham was very highly commended for Minnie of Walkinshaw, which was third at Glasgow in the spring. There was a very representative lot of three-year-olds, and Mr. Thomas easily came to the front with Jeannie Deans. Lord Rosebery was second with Princess of Glasnick, a mare which has not hitherto been prominent at any of the leading shows, but which may come to the front in the future. Mr. St. Clair Cunningham was third with Maggie Holmes, a daughter of Lord Colum Edmund, bred at Glenshinnoch, Bishopton. Mr. Robert Paterson, Hill of Drip, Stirling, was fourth with Lady Garnet, and Mr. James F. Murdoch was very highly commended for Lady Roberts, while Mr. John Weir secured a highly commended ticket for Baron's Queen. Two-year-old fillies were an exceedingly creditable class. Here Mr. Alexander Guild was an easy first with Jopsy Pride, a well-known animal at the principal Scottish showyards. She was bred by Mr. Alexander Williamson, Sypland, Kirkcudbright. Mr. Sinclair Scott came next with Scottish Baroness. Mr. Smith was third with Cerdic Princess, a filly of his own breeding, and Mr. William Clark, Kirkcaldy, was fourth with Beauty's Queen. Yearling fillies formed one of the most interesting classes in the show. Lord Rosebery was first with Pomona, another daughter of Baron's Pride, and bred by Her Majesty the Queen. Placed next to her in order of merit was Mr. William Dunlop's Nancy Young, a filly of his own breeding, and sired by the highly-priced horse Montrave Mac. Mr. St. Clair Cunningham was third with White Heather. The fourth ticket went to Mr. James Gray for Baron's Blossom, while Mr. W. T. Malcolm, Larbert, was very highly commended for Princess Gertrude.

Berkshire Boar, "Jack of All Trades."
(*Property of Mr. R. W. Hudson, Danesfield, Great Marlow. First prize at Peterborough.*)

By the victory of Mr. Herbert Webster's Clydesdale mare Lady Lothian, the Cawdor Cup for the best female of the breed has now been won outright for the second time, the previous winners of the same owner having been the present champion and the Macgregor filly Lady Victoria. The first Cawdor Cup for Clydesdale females was won by Sir John Gilmour with the celebrated mare Moss Rose, which carried off the trophy twice, and her daughter, Montrave Maud, finally secured the plate for her spirited breeder. The competition for the championship lay between Mr. Webster's exhibit and the Earl of Rosebery's beautiful Baron's Pride filly, Pomona, which was champion at Edinburgh, and which was given the reserve ticket for the Cawdor Cup.

Light Horses.

The exhibition of hunters was somewhat disappointing, the winners in several classes meeting with little opposition. The only large turnout was in the yearling class, where Mr. J. Harling Turner, Cessnock, was placed first with Cessnock, a gelding sired by Kilmarnock, which was easily the best in the class, the other prize-winners being a good way behind him. Mr. Turner also headed the two-year-old class with his well-known Crossburn, a useful chestnut gelding. Mr. J. Stewart Lyon, Kirkmichael, was second with his winning Dumfries gelding. The three-year-old made a rather weak class, though [illegible] Lang Girl, belonging to Mr. D. Deuchar Wark, is an animal of considerable merit, and won the Hunters' Improvement Society's medal for the best filly. The heavy hunters are headed by Countess, a mare with beautiful action in the gallop, and belonging to Mr. E. Hoyle, Bingley. She carried off the champion medal of the section. A fine gelding belonging to Mr. William Taylor, Park Mains, showing signs of wear, was placed second. The [illegible] the light weight hunters were a [illegible] gs own by Mr. F. Cuthbert, which was [illegible] champion. There were only two animals in this class but both were of great merit. The brood mares formed quite an [illegible] class.

In the Hackney section the numbers were small, but several noted names were included in the various classes. Mr. Charles E. Gilbraith, Terregles, was a prominent exhibitor. He was first in the class for brood mares over fifteen hands with Vivandière, the Glasgow champion this year. He also was placed first in the class for brood mares under fifteen hands with Trilby, a mare of his own breeding and a noted winner. The three-year-old yeld mares or fillies were also headed by Mr. Galbraith with his well-known Atalanta, which was first at Glasgow last year. Mr. David Mitchell, of Millfield, was awarded the red ticket in the two-year-old filly class for Roberta, a chestnut of his own breeding, which was first at Kilmarnock this year, Mr. Galbraith's Lady Katharine being second. The Glasgow order was reversed in the case of these two animals, Lady Katherine carrying off the premier honours of the Glasgow show this year. The Hon. Mrs. Vernon, Auchans, Kilmarnock, was placed first in the yearling filly class with Rossette, a get of Rosador. In a small class of stallions under fifteen hands, Mr. G. R. Watson, Parkhead Cross, won with Hedon Sensation, the Glasgow champion, which was reserve for the medal. Mr. Galbraith's Athana, the winning two-year-old entire colt, was awarded the championship of the section.

Turning to the pony section, one of the largest classes was that for stallions not exceeding 10½ hands, foaled before 1898. Here Mr. Mackenzie, Earlshall, Leuchars, led with his dark-brown five-year-old Rattles, which was followed by a brown five-year-old, Danch, owned by Mr. Patrick Graham, Mrs. W. H. Johnstone, Edenbridge, Kent, coming third with her black five-year-old, Sanballat, which was fifth at Edinburgh. In the class for mares not exceeding 10½ hands, with foal at foot, Mr. John F. Cassels's Sweetie came first, Mr. R. W. R. Mackenzie's dark-brown seven-year-old Belle of Bressay, second, and Mr. T. R. B. Eliot's Berry Beauty, a bay four-year-old, third. The largest class in the section is that for yeld mares, fillies, or geldings, not exceeding 10½ hands, foaled before 1898. The leading ticket fell to Mr. W. H. Johnstone's Emerald, a seven-year-old, which also secured the President's medal for the best Shetland pony; the Ladies E. and D. Hope were second with Sea Serpent, a black four-year-old, and third with Vementry II., a brown eight-year-old. The class for yearlings and two-year-olds was headed by the Countess of Hopetoun's Dulcemona, Mr. G. A. Miller's Virginia coming second.

In the leaping competition for horses, Mrs. Blockley, who rode her own chestnut gelding, was awarded the first prize, Mr. David Carnegie, East Pitcorthie, Colinsburgh, being second with a black gelding; and Messrs. Thompson and Wheeler, Studley, were third with a chestnut gelding. The pony competition for animals 14.3 hands and under was won by Mr. William Riddick, Crookdale Hall, Cumberland, Messrs. Thompson and Wheeler being second, and Mr. James Nodwell, Dumfries, third.

Sheep.

Sheep make a large and most attractive display. As usual at the Society's meeting, black-faced sheep are a feature of this section of the yard. In this case the leading honours fall to Mr. Charles Howatson, of Glenbuck, who has achieved a notable series of successes. These began in the aged ram class, where he was first with A 1, to which was given the championship. The second prize aged tup is Shamrock, belonged to Messrs. Cadzow, Borland. Mr. Mitchell, Hazelside, was third. Shearling rams are a well-filled class of capital merit. The Glenbuck flock is again in evidence, the competition lying between sheep belonging to and bred by Mr. Howatson. Mr. Howatson's second prize winner is a Crossflat sheep. The competition between this and the other animal was very keen, both having many strong points in substance and quality. Aged ewes are a small display, but the quality is admirable. Mr. Howatson heads the list with a five-shear sheep of his own breeding, which was an outstanding winner. In this class he achieved the distinction of carrying off all the money prizes as well as the [illegible] For shearling ewes or gimmers, Messrs. Cadzow, Borland, led the way with a nice specimen of the breed.

For Cheviot sheep, Mr. John [illegible] Hindhope achieved much the same success that fell to Mr. Howatson in the [illegible] section, and that, too, in strong company. [illegible] his well-known sheep Jock's Joy, which was placed at Edinburgh in June and first at the Royal at York. To this animal was deservedly awarded the championship of the breed. The second [illegible]

the aged ram class went to Mr. John Robson, Newton. Mr. Johnstone, Archbank, was third with a sheep bred at Newton. The shearling ram class, which is one of great merit, produced the champion of the breed. This class saw an upturning of the decisions at the Edinburgh Show. A particularly fine ram, bred by Mr. Elliot, and shown by him, which was second at that meeting, was given premier position, and was awarded the championship. The same exhibitor was second in the class with the ram that was first at Edinburgh and at York. For third and fourth positions there was again a reversal of the Edinburgh awards—Mr. John Robson being third with the sheep which was fourth then, and Mr. Elliot fourth with the tup that stood third on that occasion. In the ewe class—above one shear—Mr. Elliot secured the two principal tickets. In the shearling ewe or gimmer class, the honours fell to Mr. John Robson, who gained first and second awards with animals that occupied corresponding places at York.

Border Leicesters are admirably represented, and for aged rams, Mr. M'Intosh, Balquharn, Brechin, secured the "blue ribbon" with a three-shear sheep, Mr. Nicholson, Lanchester, Durham, being second. Among shearling rams the competition was so keen that the judges were unable to agree, and Mr. William Ferguson was called in to decide matters. He gave the preference to the sheep belonging to Mr. Clark, Mr. A. J. Balfour, M.P., being second with the animal which was the first prize winner at the Royal. To Mr. Clark's ram was also awarded the Tweeddale gold medal for the best male of the breed shown. For ewes above one shear, Mr. A. J. Balfour gained the two principal awards. In the young ewe or gimmer class was found the champion animal, the successful exhibitor, for the second year in succession, being Mr. David Hume, Barrelwell, Brechin. In the class Mr. Hume's gimmer was closely followed by a nice animal shown by Mr. John Sharp, Ewingston.

The exhibition of half-breds was fair, the feature being the superiority of the aged rams. First prize was given to the two-shear tup Baden Powell, the property of Mr. William Elliot, Raecleugh Head, Dunse. Mr. L. Morley Crossman, Beal, Northumberland, came second, and Mr. Alexander Crosbie, Upper Keith, East Lothian, third. Mr. Elliot also won the breeders' prize for the best half-bred tup. In shearling tups, Mr. Elliot won first prize, and Mr. James A. W. Mein, Hunthill, Jedburgh, second and fourth. In ewes above one shear, of which there was a very good show, Mr. Dickinson led. Shearling ewes or gimmers were fair all over, but L. Morley Crossman's first prize winner, which also carried off the president's champion medal and the breeders' prize for the best half-bred ewe or gimmer, deservedly received honours.

In Shropshires the championship and first place was won by Ashlyns' Knight, the property of Richard P. Cooper, Berkhamsted, Herts. Mr. Buttar, Couper-Angus, won second prize, and Mr. Wm. Mortimer, Old Keig, Whitehouse, was third. In the shearling tup class Mr. Buttar won first, third, fourth, fifth, and sixth, leaving the second to Mr. Cooper, of Herts. In the class for ewes above one shear, again, he won third and fourth, while Mr. Cooper carried off first and second; and in the class for shearling ewes or gimmers he won first and fourth, Mr. Cooper winning second and fifth, and the Earl of Strathmore third and sixth.

In Oxford Downs Messrs. J. and S. Treadwell, Aylesbury, won first prize, and also second and third prizes and the championship medal for best pen of Oxford Downs, the Right Hon. A. J. Balfour, M.P., coming fourth. In shearling ewes or gimmers, however, Mr. Balfour came first and second, with Mr. Walter Elliot, Galashiels, third and fourth.

Suffolks numbered nine, all from England. The quality, however, was first class, the judges passing various commendatory remarks as they examined the animals. The Earl of Ellesmere won first prize with a sheep of great substance and fine frame. He also won second prize, leaving the third to Major E. W. Baird, Newmarket. In shearling ewes or gimmers the Earl of Ellesmere was again first and second and Major Baird third, while in the class for three ewe lambs he was first, and Major Baird second; the Earl of Ellesmere also won the championship medal for the best pen of Suffolk sheep.

Pigs.

There were only twenty-eight pens of pigs, but they were about an average show, both in number and quality. Only three Large White boars were shown, and here the first prize was deservedly taken by a fine boar shown by Mr. Sanders Spencer, of Holywell Manor. The second prize winner belonged to Mr. Lockhart, of Colinton Mains, who exhibited the boar which won first at the Maidstone Royal in the hands of his breeder, Sir Gilbert Greenall. An immense boar, also bred by Sir Gilbert Greenall, and owned by the Messrs. Walker, was third. Only two Large White sows were shown—Messrs. Walker's Lady Tichborne, which was first at Edinburgh and Ayr, and a new one shown from the Earl of Rosebery's piggeries. The East Craigs sow maintained her Edinburgh position, although the other was a good commercial pig. As many as six pens of breeding pigs were forward. The judge had some difficulty in allotting the prizes, but he eventually selected a pair of yelts of superb form and quality from the Holywell herd for first place. Another pen of the same stamp, also bred by Mr. Spencer, were reserve. Mr. A. E. Todd, Stoneybank, Musselburgh, was second also with a pen by one of Mr. Spencer's boars, out of a sow bred by the Messrs. Walker. The classes for pigs of other White breeds were sparsely filled. Mr. Spencer sent his boar Holywell Rosador, which has done so well in the showyard lately, and it won first prize. Messrs. Walker took the second prize with East Craigs Prince, and also headed the sow class with East Craigs Beauty, first at the recent Edinburgh Show. This sow afterwards got the President's medal as the best pig. Mr. Spencer was awarded the second prize for Holywell Middlesbro' 2nd, a smart, young sow. The pens of three showed even a greater variety of development than the Large Whites. Mr. Jefferson, Peel Hall, Chester, secured first with a nice seven-months'-old pen, and Messrs. Walker second. There was scarcely any competition in the Berkshire classes, Mr. Jefferson taking all the prizes.

Judges.

Shorthorn Cattle: Arthur S. Gibson, The Elms, Ruddington, Nottingham; D. C. Bruce, Byres, Fochabera. Aberdeen-Angus: Andrew Mackenzie of Dalmore, Alness, N.B.; Daniel Robertson, Mains of Fordie, Dunkeld. Galloway: John M'Cormick, Lochenkit, Dalbeattie; Andrew Montgomery, Netherhall, Castle-Douglas. Highland: John Campbell, Calvine Farm, Calvino, Perthshire; John Macphail, Auchnacraig, Craignure, Isle of Mull. Ayrshire: Alexander Y. Allan, Croftjane, Thornhill; Robert Woodburn, Holehouse, Galston. Jersey: T. H. Weetman, Rose Hill, Atherstone, Warwickshire. Stallions, Colts, and Draught Geldings: Richard Dunn, Udston, Hamilton; John Morrison, Hattonslap, Old Meldrum. Mares and Fillies: John Kerr, Red Hall, Wigton, Cumberland; A. M'Robbie, Sunnyside, Aberdeen. Hunters: George Dove, Whitehouse, St. Boswells; J. W. J. Paterson, Terrona, Langholm. Hackneys: Alfred Craggy, North Newbold, Brough, Yorks. Ponies: R. Brydon, The Dene, Seaham Harbour. Shetland Ponies: Gavin Hadden, Dalmunzie, Murtle, Aberdeen. Blackfaced Sheep: Alexander Cowan, Spittalhill, Fintry; W. J. Murray, Heriot House, Heriot; Robert Watson, Culterallers, Biggar. Cheviot: John Murray, Parkhall, Douglas; John Scott, Newton, Hawick. Border Leicester: James K. Smith, Leaston, Upper Keith; Matthew Ridley, Peelwell, Haydon Bridge. Half-bred: Andrew Dun, Laidlawstiel, Galashiels; William Hindmarsh, Ilderton, Alnwick. Shropshire: Alfred Tanner, Shrawardine, Shrewsbury. Oxford Down: J. H. Topin, Musgrave Hall, Skelton, Penrith. Suffolk: S. R. Sherwood, Playford, Ipswich. Fat Sheep: Robert Thomson, 29, Port Street, Stirling. Swine: Robert Wallace, Auchenbrain, Mauchline.

Stowmarket.

The Stowmarket and Central Suffolk Farmers' Club's twenty-seventh annual show was held on Friday, on "King's Meadows," a convenient site beside the Finborough Road, which has been used for some years past. The total number of entries in the catalogue showed a slight falling off, but this was entirely due to the striking out of the classes for pigs; in other and more attractive sections, the numbers were larger than usual. This was especially the case with regard to Hackneys and Hunters, which included many well-known winners in other parts of the country. The weather was very much of the character that has prevailed during the past week or more, but the heat of the sun was tempered to some extent by a cooling breeze. The attendance of visitors was a very good one.

With respect to the stock exhibits, the Suffolk horses showed up fairly well, but the foals in both classes were somewhat weak. Mr. W. R. Hustler was first in the horse foal class, and Mr. Leonard Smith first in that for fillies with a handsome and promising daughter of Golden Grain. The mares with foal at foot looked uncommonly well in the ring. Mr. R. Edgar sent his handsome mare Hurricane by the well-known Rattle, and she was placed first, though she had a rather sharp tussle with Mr. John Symonds's Dido. The yearling fillies included some smart animals. Mr. E. J. Johnstone's Amazon, by Conquest, and Mr. John Symonds's Rhoda, by Scottish Chief, were the best of the collection, the latter being half-sister to Rosa, the winning filly in the two-year-old class, and belonging to Mr. W. R. Hustler. Of the three-year-old fillies there was but a small entry. Mr. A. H. E. Wood's well-known Sudbourne Queen of Diamonds went into the first place, and she was picked out as likely to be the champion; but this honour was allotted to a stable companion, Sudbourne Matchett, and the latter took the ten-guinea challenge cup, presented by the town of Stowmarket, and the silver medal for the best Suffolk mare registered in the Stud Book. Mr. A. H. E. Wood's Sudbourne Queen of Diamonds being reserved. The ten-guinea challenge cup, presented by Mr. A. H. E. Wood, for the best Suffolk foal, bred and exhibited by a tenant farmer not having more than 200 acres of land, was awarded to Mr. H. Turner for a nice youngster by Queen of Diamonds. Agricultural horses, other than Suffolks, made a good show. In the horse foal class, Messrs. J. Gough and Son showed the foal by Normoor Chief, which took first at Ixworth. There was a better entry of filly foals. Mr. T. J. Cresswell was first among the horse foals, with his Aldeby Juno, by Lincolnshire Boy II. The second honour was awarded to Mr. J. R. Keeble for a young foal out of his well-known mare Brantham Pole Star. With regard to the class for mare with foal at foot, it was a fight between Mr. J. R. Keeble's Brantham Pole Star and Mr. J. Sturley Nunn's prize-winning mare, Maud. The former, a very choice mare, possessing more size, was undoubtedly entitled to be placed in front of Maud. Brantham Pole Star thus became the champion, and she carried off the special, presented by the Shire Horse Society, for the best Shire mare registered in the Stud Book, and the ten-guinea challenge cup for the best mare or filly of any age, Maud being reserved for the former, and Mr. F. Baldwin's Kedington Maggie for the latter. Mr. Baldwin's exhibit was first in her class, a position which she has taken on previous occasions. Mr. T. J. Cresswell was second with Aldeby Pansy, a gold-medal mare at the Norfolk Show this year. It may be mentioned that there were as many as four gold-medal mares entered in the classes at Stowmarket. Mr. Baldwin was also first in the competition for three-year-old fillies with Suffolk Gem, and winner at the county and other shows. Amongst the geldings were some very useful working horses, Mr. J. A. Lankester taking the lead in a strong collection of Shire geldings any age, Mr. Walter Noble's Ruler being second.

There was, as usual, a goodly array of nag horses. Hunters were well represented. In the two-year-old mare or gelding class, Mr. C. H. K. Harvey's Mischief, by Trayles, was placed in the first position. In the three-year-old class Mr. Phil. Browne's Music, by Cobbler, was once more to the front, a position in which she has always been found at the Royal and other shows. There was a four-year-old class for a Suffolk tenant farmer, and here Mr. D. W. Taylor took the lead with his Molly. The lightweights formed about the best collection in the show. Mr. P. M. Browne's choice mare Melody, by Cobbler, was the winner in grand company, though there were some outside the ring who had rather a fancy for the Earl Egerton of Tatton's Magic. As to the heavyweights, this class, too, was well filled, there being a number of animals that looked like going across the country. Mr. R. E. Walford's Little Willie was singled out by the judges, thus taking the place given her at the Norfolk Show, the second going to Messrs. J. Gough and Sons' Black Malt. Mr. Washington Charter's bay gelding, five years old, a real heavy weight carrier, looked like winning, but she did not pass the vet., who considered him wrong in the wind. Mr. Washington Charters, feeling confident that no fault of the kind could be laid upon his fine gelding, thereupon secured the certificates of four veterinary surgeons, who certified that the gelding was sound in his respiratory organs, but the Society's veterinary surgeon held to his opinion. Mr. P. M. Browne's Melody took the prize offered for the best mare or gelding, the property of any tenant farmer, being a member; and the same mare was first also in the new and attractive class for the best mare or gelding that had been regularly ridden with the Suffolk Hounds, the prize being presented by Mr. Eugene Wells, the popular Master of those hounds. The Hackneys included several choice animals, especially those shown in harness, amongst them being Mr. George Johnson's celebrated Searchlight and Brilliance, which won easily in their respective classes, the second prize going to Mr. F. H. Jennings's choice Hackney Chutney, in the class under 15 hands; while Brilliance, in the 15 hands class, had as an antagonist Mr. William Miles's Gay Lad, a grand mover. Of cobs and ponies, too, there was a nice show. Mr. George Johnson's Lucy Glitters was the winner in the class for under 14 hands, but a very taking mare turned up in Kitty, shown by Mr. A. Warne, of Ipswich. There was a fairly good entry of weight-carrying cobs, the judges giving the chief prize to Mr. W. P. Burton's stylish Nameless.

The cattle, taking them altogether, were only a moderate lot. There was really only one good class, that for red-polled heifers. There were several absentees in the other classes, the hot weather being assigned as a reason why their owners did not send them. The Hon. C. Hanbury was the chief winner in the red poll heifer class. The sheep, on the other hand, were very good. There was a large entry of Suffolk ram lambs; the four prize-winners were grand lambs, three of them, belonging to Mr. Herbert Smith, being winners at the Royal and other shows. The Suffolk ewe lambs were also choice examples of the breed, Mr. S. Traylen being first, and these carried off the £5 challenge cup as the best Suffolk ewe lambs. The shearling ewes made a particularly fine show, Mr. Herbert Smith being again to the fore. This gentleman was awarded the challenge cup, presented by the Marquis of Bristol, for the best Suffolk ram lamb.

Tunbridge Wells.

The Tunbridge Wells and South-Eastern Counties Agricultural Society's annual two-day show opened on Thursday at the Agricultural Ground, Tunbridge Wells, and was altogether a successful event. Last year the show suffered somewhat on account of it coming shortly after the Royal at Maidstone, and the Sussex County at Eastbourne, but in the present instance it suffered no such disadvantage, and there was consequently a larger number of entries in the most important departments of the show. The prize money totalled altogether £1,725, the major portion of the additional amount being given to the horse, cattle, sheep, and pig classes, where, in the majority of cases, the entries showed a marked increase upon those of a year ago. Particularly was this so in the Channel Islands cattle classes, where the increase was remarkable. A year ago the Jerseys made a total head of animals of 84. This year there were no fewer than 126, which is but eighteen fewer than the total Jerseys shown at the Royal Show at Maidstone in 1899. In one class—1899 heifer—there were no fewer than thirty-five entries, which is be-

lieved to be a record for the Tunbridge Wells Show. The Guernseys went up from 39 to 55 entries. The Sussex cattle classes, unfortunately, showed a falling off, viz., 39 entries against 52 last year; the Shorthorn classes were also weaker, and while the Kerries showed an increase of six, the Dexters had decreased a dozen. An entirely new section for Aberdeen-Angus cattle showed by 33 entries the popularity of the Scotch breed in the south-eastern counties. The horse classes, generally speaking, remained about the same strength as previously. The Clydesdales fell off, Shires increased 15, hunters numbered 81 against a total of 56 in the hunters and hack classes in 1899; Hackneys grew from 55 to 62, and the ponies from 24 to 37. Sheep neither gained nor lost, both the Southdowns and Romney Marsh breeds remaining at 42 and 28 respectively.

The quality of the exhibits was excellent all round, a great many of the prize winners having been shown at the Royal, and also at other shows this year.

That important factor, the weather, was all that could be desired, but the attendance of visitors was not so good as usual. There was quite a distinguished company present on the first day, including, amongst others, the Marquis of Abergavenny, the Marquis and Marchioness Camden, Lord and Lady Henry Nevill, Lord George Nevill, Earl de la Warr (who was the observed of all observers, and looking very brown and well on his return from the front, although still walking with a limp from the effect of his wound), Earl Derby (this year's president of the show), Lord Pirbright, Lord George Pratt, and Sir George Stirling.

Interest in the show ring was chiefly centred in the new feature, namely, the Aberdeen-Angus cattle classes, and in this division Mr. F. Crisp was considered by the judges to be quite up to championship form. The heifer class, mustering no fewer than fourteen, was also so good that the judge awarded an extra prize, and the president, Lord Derby, ensured a strong representation of Sussex cattle. There were some very useful animals in the cow classes, and the champion at the Royal Counties' Show at Winchester was again given the premier award. The Jersey and Guernsey cattle were also a strong lot, and the Countess De la Warr was again successful with Dexters. Coming to the horses, the success of Sir Walter Gilbey, a new exhibitor, was welcomed; and his celebrated stallion maintained its premier position, as did Mr. H. Livesey's Surprise, which was champion at the London show. The sheep, if not numerous, were very fine, specially the Kent breed, and the ram of Mr. C. Files was ahead of everything else. The lambs were weak and wool rather small. The horse-shoeing competitions were again an interesting feature, and the County Council competitions revealed increased excellence in the work of local smiths.

The Judges.

CLYDESDALE: Mr. W. Greig, Leatherhead.
SHIRES: Mr. William Richardson, Eastmoor House, Dobbington, Cambridge.
ANY AGRICULTURAL BREED: Messrs. W. Greig and W. Richardson.
HUNTERS: Colonel R. W. Chandos Pole, Radbourne Hall, Derby, and Sir Henry Simpson, Gordon House, Windsor.
HACKNEYS AND PONIES: Mr. Alfred Rowell, West Rudham, King's Lynn, Norfolk.
HARNESS: Mr. Henry Frisby, 14, James Street, Buckingham Gate, S.W., and Mr. Adrian Hope, 55, Princes Gate, S.W.
JUMPING: The Marquis of Camden, Bayham Abbey; the Lord Henry Nevill, Eridge Castle, and Mr. Whitmore.
SHORTHORNS: Mr. J. W. Cruickshank, Coombe Head, Haslemere, and Mr. Hugh Gorringe.
SUSSEX: Mr. Henry Rigden, Queen's Road, Ashford, and Mr. Alfred Stanford, Eatons, Steyning.
ABERDEEN-ANGUS: Mr. William Reid, 160, Central Meat Market, E.C.
JERSEY: Mr. G. C. Knight, Baldhorn's Park, Rusper, Sussex, and Mr. Ernest Mathews, Chequer's Mead, Potter's Bar, Middlesex.
GUERNSEY: Mr. H. J. Gibbs, Milford, Salisbury, and Mr. D. Michie, Estate Office, Tichborne Park, Alresford.
KERRY AND DEXTER: Mr. F. N. Webb, Babraham, Cambridge, and Mr. G. T. Barham, 40, New Oxford Street, W.C.
JERSEY AND GUERNSEY: Mr. T. W Hammond, 7, Princes Street, Hanover Square, W., and Mr. L. J. Craufurd, 7, Princes Street, Hanover Square, W.
SOUTHDOWN: Mr. C. O. Newman, Charlton, Singleton, Chichester.
KENT OR ROMNEY MARSH: Mr. Arthur Finn, Westbroke, Lydd, Kent.
WOOL: Mr. Rowland Stagg, Tunbridge.
GOATS: Mr. H. S. Holmes Pegler, Dunstans Hern, Honor Oak, S.E.
BERKSHIRE AND ANY OTHER PURE-BREED PIGS: Mr. J. Treadwell, Upper Winchenden, Aylesbury.

Prize List.

HORSES.

CLYDESDALE.

Stallion, foaled before 1898: 1, Lords A. and L. Cecil, Orchardmains, Tunbridge.

Stallion, foaled in 1898 or 1899: 1 and 2, Lords A. and L. Cecil; r, Robert Veitch, Aylesford, Kent.

Mare or gelding, foaled in or before 1897: 1, 2, and r, Lords A. and L. Cecil; 3, L. Deadman, Brockhampton Stud Farm, Havant.

Mare and foal: 1 and 2, Lords A. and L. Cecil.

Filly, foaled in 1898: 1, Alex. Holm, Betchworth, Surrey.

Gelding or filly, foaled in 1899: 1 and 2, Lords A. and L. Cecil; r, Alex. Holm, Betchworth.

SHIRE.

Stallion, foaled before 1898: 1, Lord Hothfield, Hothfield Place, Ashford; 2, Percy A. Willett, Newhaven; r, C. Czarnikow, Effingham Hill, Dorking.

Stallion, foaled in 1898: 1, R. W. Hudson, Great Marlow, Bucks; 2, Lord Hothfield; r and he, Max Michaelis, Tandridge Court, Surrey.

Stallion, foaled in 1899: 1, George Osenton, Westerham; 2, Walpole Greenwell, Woldingham, Surrey; r and hc, L. Deadman.

Mare and foal: 1, C. Sheppard Marsh; 2, Percy A. Willett; hc, L. Deadman, and C. Czarnikow; vhc, Leopold Salomons, Dorking.

Mare or gelding, any age: 1, C. Sheppard Marsh; 2, R. W. Hudson; vhc, E. S. Stock; hc, Percy A. Willett and Lord Hothfield.

Filly, foaled in 1897: 1, Lord Hothfield; 2, Leopold Salomons.

Filly, foaled in 1898: 1, Lord Hothfield; 2, George Osenton; vhc, R. W. Hudson; hc, G. J. Drummond, Pembroke.

Gelding or filly, foaled in 1899: 1, Walpole Greenwell, Marden Park, Woldingham; 2, Lord Hothfield; vhc, R. W. Hudson; hc, George Osenton and Leopold Salomons.

ANY AGRICULTURAL BREED.

Mare in foal: 1, Alex. Holm, Betchworth, Surrey.

Mare or gelding, any age: 1, Alex. Holm, Betchworth; 2, John and Thomas C. Robertson, Manor Farm, Clutton, and H. F. Simonds, Lovehurst, Staplehurst.

Mare or gelding, foaled in 1897: 1, Alex. Holm; 2, John and Thomas C. Robertson.

Mare or gelding, foaled in 1898: 1, John and Thomas C. Robertson; 2, Alexander Holm.

Colt or filly, foaled in 1899: 1, Robert Veitch; 2, Alex Holm.

HUNTERS.

Thoroughbred stallion: 1 and r, Wm. Wilson; 2, L. Deadman.

Brood mare, open to Kent, Sussex, and Surrey only: 1, C. Kelway, Bamber, Bromley; 2, W. H. Johnstone, Skeynes, Edenbridge; 3, D'Arcy Reeve, Matfield, Paddock Wood; 4, T. H. Wood, Swanley; r, S. L. Smith, Maidstone.

Foal, sired by a thoroughbred, entered in general stud book: 1, Mrs. A. F. Perkins, Holmwood, Surrey; 2, W. H Johnstone; r, S. L. Smith.

Mare or gelding from 13 stone 7lbs. to 15 stone: 1, J. H. Stokes, Market Harboro'; 2, Thomas Rodmore, Cheam; r, R. Bertram Pott, Bentham Hill, Tunbridge Wells; c, A. A. Gorham, Lewes; Marquis Camden, Bayham.

Mare or gelding from 12 stone to 13 stone 7lbs.: 1, J. H. Stokes, Market Harboro'; 2, E. and A. Baxter, Brentwood, Surrey; r, J. Blake; hc, R. Bertram Pott.

Gelding or filly, foaled in 1898: 1, C. Kelway, Bamber; 2, A. Gorham; r, W. W. Hubble, Hunton, near Maidstone.

Gelding or filly, foaled in 1899, the property of a resident, and bred in the counties of Kent, Sussex, or Surrey: 1, S. L. Smith; 2, E. Delmar Morgan; r, Mrs. A. T. Perkins.

POLO AND RIDING PONIES.

Stallion, not exceeding 14-2 hands high: 1, Sir Walter Gilbey, Bart., Elsenham Hall, Essex; 2, Rev. D. B. Montefiore Winslow, Bucks; r, Lords A. and L. Cecil.

Mare with foal at foot, not exceeding 14-2 hands: 1, Dumbar Kelly, Bromley, Kent; 2, H. Kelway Bamber; r, John Barker, J.P., Bishop Stortford, Herts.

Mare or gelding from 13-2 to 14-2 hands: 1, Thos. S. Greenway, London; 2, Lord H. Nevill, Eridge Castle; r, J. Stevens, South Norwood.

Mare or gelding, under 13-2 hands: 1, Rev. D. B. Montefiore; 2, W. F. Makings, Chelmsford, Essex; r, Thos. Henry Church, Crawley Down.

Gold medal of the Polo Pony Society for the best polo pony, stallion, mare or gelding: Dumbar Kelly.

Stallion, any age: 1, Harry Livesey; 2, Sir Walter Gilbey, Bart.; r, G. W. Burrows, Orpington.

Stallion, foaled in 1898: 1, Harry Livesey, Rotherfield; 2, E. S. Stock, Manningtree; r, Messrs. Brinckman and Madge, Leatherhead; hc, Mrs. A. H. Temple, Leyswood, Groombridge.

Entire colt, foaled in 1899: 1, William Oppenheimer, Thames Ditton; 2, Fredk. Wm. Page, Cowfold, Sussex.

Brood mare, 15-2 hands and over: 1, Harry Livesey; 2 and 3, Mrs. A. H. Temple, Groombridge; r, Benjamin Oakes, Hildenborough Stud.

Brood mare, under 15-2 hands: 1, H. Livesey; 2, James Wallis, Beddington, Surrey; r, Mrs. A. H. Temple; r, Major Wm. Duncan.

Brood mare, for tenant farmers only in Kent, Sussex, or Surrey, or tradesmen in Tunbridge Wells Borough: 1, A. Boddy, Hever; 2, Dumbar Kelly; 3, H. J. Symonds; r, E. H Brown

SHETLAND PONIES.

Stallion, not exceeding 10-2 hands: 1, The Misses Vesey, Frimley, Surrey; 2, The Ladies E. and D. Hope Sevenoaks; r, T. W. Talbot, Frimley Green, Hants; hc, Lords A. and L. Cecil.

Mare or gelding, not exceeding 10-2 hands; 1 and 2, The Ladies E. and D. Hope; r, T. W. Talbot.

Harness mare or gelding, under 14-2 hands: 1 and 2, E. and A. Baxter; r, Major W. Duncan; hc, E. H. Goad; W. F. Makings

Harness mare or gelding, any height: 1, E. and A. Baxter; 2, Miss E. K. Cunliffe; r, Major W. Duncan; hc, Mrs. Hartley G. Pott.

PAIRS HARNESS.

Pair of horses, not less than 14 hands, driven in double harness: 1, E. and A. Baxter; 2, Miss E. K. Cunliffe, Leatherhead; r, Mrs Hartley Bett, Paddington; hc, Edwin H. Goad.

Best tandem: 1, E. and A. Baxter; 2, Mrs. Hartley Pott; r, Edwin H. Goad.

JUMPING.

Mare or gelding, the property of a member of the Tunbridge Wells Farmers' Club: 1, F. W. Henderson, Petworth; r, J. C. Buckland, Great Chart.

Mare or gelding, not exceeding 15 hands: 1, J. C. Buckland, Great Chart; 2, A. N. Smith, Redhill.

CATTLE.

SHORTHORN.

Bull, calved in 1896 or 1897: 1, J. Thorley; 2, W. E. Balston, Potters Bar.

Bull, calved in 1898: 1, John Little, Trowbridge; 2, J. Thorley; r and hc, Arthur Hiscock, jun., Motcombe, Dorset.

Bull, calved in 1899: 1, Col. Makins, Henley-on-Thames; 2, W. E. Balston, Cranbrook; r, D'Arcy Reeves.

Bull, any age, the property of a tenant farmer residing in Kent, Sussex, or Surrey: 1, Exors. of Charles Collard, Canterbury; 2 and r, John Joyce Frowd, Hassocks, Sussex.

Shorthorn bull, located in Kent or Surrey, calved in 1899: 1, D'Arcy Reeves; r, John Joyce.

Cow or heifer in milk, calved in or previously to 1897: 1, Colonel Makins; 2, John Little, Trowbridge; r, Henry Still, South Norwood.

Cow in milk, any age: 1 and 2, John Little; r, George Taylor, Cranford.

Heifer, calved in 1898: 1, Arthur Hiscock; 2, D'Arcy Reeves; r, Walpole Greenwell, Waldingham, Surrey

Heifer, calved in 1899: 1, J. Thorley; 2, Sir Mark W Collet, Bart.; r and hc, Arthur Hiscock, jun.

SUSSEX.

Bull, calved in 1896 or 1897: 1, P. F. R. Saillard; 2, The Earl of Derby, Witley, Surrey; r and hc, F. S. W. Cornwallis, M.P., Linton Park, Maidstone; hc, W. Ford.

Bull, calved in 1898: 1, The Earl of Derby; 2, P. M. R Saillard; r and hc, Hon. Ralph Nevill, Maidstone; hc, Ernest Edward Braby, Rudwick, Sussex.

Bull, calved in 1899: 1 and c, The Earl of Derby; 2, P. F. R. Saillard; hc, W. Ford; c, Captain Alexander.

Bull, any age, the property of a tenant farmer residing in the Eridge, Burstow, or West Kent, Hunts: 1, William Ford, Ticehurst.

Sussex Breeders' Subscription Champion Prize of £10 [illegible]

[illegible]

Cow, in milk or in calf, calved previously to 1897, the property of a tenant farmer residing in Kent, Sussex, or Surrey: 1, W. [illegible]

Heifer [illegible]

Alexander, Cranbrook; r, Francis James Maitland, East [illegible]

Heifer, calved in 1899: 1, W. W. Hubble, Hunton, near Maidstone; 2, Mrs. [illegible]

P. F. R. Saillard

Champion prize [illegible]

the [illegible] P. F. R. Saillard; [illegible]

Sussex Breeders' Subscription Champion Prize of £10 for the best Sussex heifer [illegible] W. W. Hubble, Hunton, Maidstone.

ABERDEEN-ANGUS.

Bull, any age: 1, C. W. S. Whitburn, West Malling; 2, Fred. Crisp, New Southgate, N.; r, John H. Bridges, Horley, Surrey; hc, George Osenton, Westerham; hc, Captain Alexander.

Cow, any age: 1, Fred. Crisp; 2, Charles W. Schroeder, Basingstoke; r, [illegible]

Heifer calved [illegible]

R. W. Hudson, Great Marlow, Bucks; 3 and r, Charles W Schroeder; hc, [illegible]

Champion prize of £10 for the best animal in Classes 76, 77, and 78: Fred. Crisp; r, C. W. S. Whitburn

DEVON.

Cow, in milk, calved previous to or in 1896: 1 and 2, Charles W Schroeder, Basingstoke; r and hc, [illegible] Farnsworth, Surrey; c, [illegible]

Sussex; vhc, Mrs. A. F. Perkins, Holmwood, Surrey; hc, Lady de Rothschild, Tring; [illegible]

Alexander, Miller Hallet, Chelsfield, Kent; Lady Brassey, Normanhurst, Battle; Pickering Phipps, Esq.

Heifer, calved in 1897: 1 and 2, Mrs. [illegible] 3, J. Carson; r, Charles F. Young; hc, A Miller Hellett, Mrs. A. T. Perkins

Heifer, calved in 1898: 1 and 2, Mrs. [illegible] Havering Park, Essex; 2, Lady de Rothschild; 3, J. Carson, Theydon Bois, Essex; r and vhc, Mrs. A. F. Perkins; hc, Charles M. Armitage, Potters Bar; vhc, Captain A. R. S. Fraser, Worthing.

Heifer, calved in 1899: 1 and 2, Mrs. A. F. Perkins; 3, Captain A. B. S. Fraser; r and vhc, Mrs Charlotte McIntosh; vhc and hc, Pickering Phipps; vhc, Charles W. Armitage; hc, Lady de Rothschild, F. Freeman-Thomas, Esq.

Bull, calved in 1896, 1897, or 1898: 1 F. Freeman-Thomas, Wellingden, Sussex; 2, Admiral the Hon. T. S. Brand, Lewes; 3, Mrs. A. F. Perkins; r, hc, and c, Lady Brassey, Normanhurst, Battle; hc, Lord Hillingdon, Seal.

Bull, calved in 1899: 1 and c, Captain A. B. [illegible] near Hastings; 3, Captain A. R. S. [illegible] J. Spencer Evans, Horsham; hc, Julius C. Drew, Wadhurst Hall; Lord Hillingdon; c, Mrs. A. F. Perkins; vhc, Her Grace Lily Duchess of Montrose; hc, Mrs. [illegible] McIntosh.

GUERNSEY.

Bull, calved in 1896, 1897, or 1898: 1 and 3, Mrs. Montefiore, Crawley; 2, E. A. Hambro; r and hc, Earl of Ashburnham; c, W. A. Glynn, J. D. Toogood Parsons.

Bull, calved in 1899: 1, Earl of Ashburnham; 2, W. A Glynn; 3, E. A. Hambro; r and hc, Frank Hargreaves.

Cow, in milk, or calved previous to or in 1896: 1 and 3, Hon. Mrs. A. Bailie, Ringwood, Hants; 2 and c, E. A. Hambro, Hayes, Kent; r and hc, H. FitzWalter Plumptre, Dover; hc, W. A. Glynn, Isle of Wight; c, J. D. Toogood Parsons, jun.

Heifer calved in 1897: 1, E. A. Hambro; 2, H. FitzWalter Plumptre; 3, Frank Hargreaves, Shipston-on-Stour, Warwick; 4 and hc, J. D. Toogood Parsons.

Heifer, calved in 1898: 1 Mrs. [illegible] 2 Earl of Ashburnham; 3, W. [illegible] Tunbridge Wells; r, Frank Hargreaves, Shipston-on-Stour, Warwick

Heifer, calved in 1899: 1 and 3, E. A. Hambro; 2, W. A. Glynn, Isle of Wight; r, F. Hargreaves; c, J. D. Toogood Parsons, jun., and Mrs. Montefiore.

JERSEY.

Bull, calved before 1899: 1 and 3, W. H. Mullens, Battle; 2, Her Grace Duchess of Newcastle; r, Her Grace [illegible] Newcastle; 2 and 3, W. H. Mullens.

Cow or heifer, in milk or in calf, calved in or before 1897: 1, J. Thorley, Faringdon, Berks; 2 and c, Her Grace the Duchess of Newcastle, Worksop; 3, 4, and hc, and c, W. H. Mullens, Battle; r, J. Hammond, Uckfield, Sussex.

Heifer, calved in 1898: 1, W. H. Mullens; 2, r, and hc, Her Grace the Duchess of Newcastle, Worksop.

Heifer, calved in 1899: 1, Her Grace the Duchess of Newcastle; 2, 3, r, and hc, W. H. Mullens; c, J. Haymen Joyce.

Challenge cup [illegible] either sex ever [illegible] Cattle Society, J. Thorley; r, Her Grace the Duchess of Newcastle.

DEXTER.

Bull, calved before 1899: 1, F. [illegible] Sydney Snelgrove, Knowle; 2, The Countess de la Warr, Boxhill-on-Sea.

1, Countess de la Warr; 2, J. Sydney Snelgrove.

Cow or heifer in milk, [illegible] Baldowero de Bertodaro, Malmesbury, Wilts; 2, Countess de la Warr; hc, J. Sydney Snelgrove.

Heifer calved in 1898: 1, Countess de la Warr.

Heifer, calved in 1899: 1, J. [illegible] Warr; r, J. Sydney Snelgrove

Challenge cup [illegible] of the best Dexter [illegible] show of either sex [illegible] Kerry and Dexter Cattle Society, Countess de la Warr.

SHEEP.

SOUTHDOWN.

Ram, [illegible] 1, W. Toop, Chichester; 2, [illegible] W. Toop.

Shearling ram: 1, W. Toop, Chichester; 2, Pagham Harbour Co.; 3, [illegible] Pagham Harbour Co.; r and hc, [illegible] Toop; r and hc, Charles N. Hodgen; c, Francis N. Hodgen; c, Sir Thos. Barret-Lennard, Bart., Belhus, Aveley.

Ewe [illegible] 1, W. Toop; 2, Pagham Harbour Co.; r and hc, Thos. Miles.

Pen of three ewe lambs, [illegible] 1, W. Toop; 2, Hugh Penfold; 3, [illegible] R. M. Clayton.

Pen of three ewe lambs, untrimmed, the property of a tenant farmer [illegible] 1, [illegible] Miss Fagg.

Silver medal offered by the Southdown Sheep Society for the best male Southdown: Pagham Harbour Co.

Silver medal offered by the Southdown Sheep Society for the best pen of female Southdowns: W. Toop.

Champion Prize—The Blythwood challenge bowl, offered by Vice-President Sir James Blyth, Bart., for the best animal male or female, from any pen in the Southdown classes: Pagham Harbour Co.

KENT OR ROMNEY MARSH.

Ram, dropped in 1898: 1, Charles File, Canterbury; 2, William Miller, Faversham; hc, F. Neame, Faversham.

Shearling ram: 1 and hc, Charles File; 2 and hc, William Miller; r and hc, H. Rigden.

Pen of three ewe tegs, dropped in 1899: 1, F. Neame; 2 and hc, Chas File; r and hc, Wm. Miller.

Pen of three ewe lambs, dropped in 1900: 1, F. Neame; 2, Chas. File; r and hc, H. Rigden.

WOOL.

Three fleeces, Southdown (tegs): 1, Earl of Ashburnham; 2, Thos. Miles, Battle.

Three fleeces, Southdown (ewes): 1, Thos. Miles; 2, Earl of Ashburnham.

Three fleeces, Kent or Romney Marsh (tegs): 1, H. Rigden, Hythe; 2, A. Finn, Lydd, Kent.

Three fleeces, Kent or Romney Marsh (tegs): 1, H. Rigden, Hythe; 2, Arthur Finn.

GOATS.

She goat, horned or hornless, over two years, and winner of one or more first prizes before the 20th June, 1900: 1, R. Walker, Ponders End; 2, Mrs. A. F. Perkins; c, H. C. Stephens, M.P., Wilts.

She goat, horned or hornless, over two years of age, that has not won a first prize before 20th June, 1900: 1, R. Walter; 2, H. R. Harrild.

Goatlings, over two years of age: 1 and 2, R. Walter; hc, H. R. Harrild.

Kid, male or female, under twelve months: 1, R. Walter, Ponders End; 2 and hc, H. R. Harrild, Sydenham.

PIGS.

BERKSHIRE.

Boar, farrowed in or before 1899: 1, R. W. Hudson; 2, Arthur Hiscock, jun.; r and hc, George T. Tomkins, Marden, Kent.

Boar, farrowed in 1900: 1, Earl of Ashburnham; 2, Arthur Hiscock; r and hc, R. W. Hudson.

Sow, in or with farrow: 1 and hc, R. W. Hudson; 2, Mrs. Hepburn, Chorley, Sussex; r and hc, Geo. T. Tomkins; hc, Arthur Hiscock, jun.

Two sow pigs, farrowed in 1900: 1, Geo. T. Tomkins; 2, R. W. Hudson; r and hc, Arthur Hiscock; c, Mrs. Hepburn.

ANY OTHER BREED.

Boar, any age: 1 and 2, Arthur Hiscock; r and hc, Henry White and Sons, Wateringbury.

Sow in, or with farrow: 1 and 2, A. Hiscock, jun.; r, hc, and c, Henry White and Sons; c, John William Warwick, Speldhurst.

Two sow pigs, farrowed in 1900: 1, r, and hc, Arthur Hiscock; 2, Henry White and Sons.

Halesworth Horse Show.

Thursday was a festive day at Halesworth. It always is on the occasion of the pitching of the tents of the Halesworth Horse Show. There was a record entry, there being forty more than last year. This increase was chiefly in the Shirebred and Hackney classes. The harness class was also an improvement upon previous years. There were certain new classes, including one for tradesmen's turnouts, and this is a feature at local shows which invariably excites much interest. Thanks to the generosity of Mrs. Egerton, another new class was introduced this year, that for tandems, which added largely to the attraction of the show yard.

The judges of Suffolks were Mr. Robert Edgar, Knight's Hill, Cockfield, and Mr. Arthur Pratt, Sproughton Hall, Ipswich. These gentlemen had not a very difficult task, owing to the paucity of the entries. Messrs. F. G. and E. A. Cook, however, did quite their part in bringing the collection of Suffolks up to something like respectable proportions. The former gentleman sent his nice horse foal by Border Minstrel, which was second at Eye, but it failed to do more on this occasion than retain that position, a son of the same well-known sire, belonging to Mr. Jas. Rose, Laxfield, took the leading place, while yet a third foal by Border Minstrel, shown by Mr. E. A. Cook, was fourth. The champion foal was found in the filly class, a particularly choice foal by Captain B. The youngster was awarded the champion, presented by Messrs. Richard Garrett and Sons, Limited, for the best foal. It also carried off the silver medal given by the Suffolk Horse Society. Mr. Samuel Balls also carried off the second prize in the class with a daughter of the celebrated Wedgewood, hailing from the Rendlesham stud, Mr. E. A. Cook's choice filly by Border Minstrel, first at Eye, having to be content this time with third honour. The beautiful champion filly was purchased at a good figure by Mr. Alfred Smith to add to the Rendlesham Stud. The yearlings formed only a small class, Mr. F. G. Cook taking first with his Maude, a position she took at Eye. In the two-year-olds Mr. F. G. Cook was first with Leader, only placed second at Eye. Mr. S. Balls was first in the mare class with foal at foot, but in the class for gast mare or gelding Mr. S. Stanford took the lead with a choice mare which secured the Earl of Stradbroke's champion prize for the best Suffolk mare in the yard, Mr. F. G. Cook's Leader being reserved.

The judges of Shire or cross-breeds were Mr. Jno. W. Eagle, Walton Hall, and Mr. Roland Partridge, Aldham Hall, Hadleigh. Here, as at other shows this season, the cross-breeds have been out of it, the true-bred Shires taking the lead. The classes were much better filled than the Suffolk. There were, for instance, fifteen horse foals, and Mr. Herbert Broom the new hon. secretary of the Society, had the honour of taking the lead in a very fine collection with a promising son of Lincolnshire Boy III., beating a good exhibit by Messrs. Thos. Durrant and Son, Saxmundham, Mr. Broom's first prize winner taking the special offered by Mr. S. H. Foster, M.P., for the best foal. The filly foals were more numerous, but they were not, on the whole, quite so good. Another Lincolnshire III. youngster, belonging to Mr. J. Trenholm, Cresswell, was first, but in the competition for the champion prize for the best Shire-bred foal, eligible for the Shire Horse Stud Book, it had to give place to Messrs. Thos. Durrant and Son's Sirdar horse foal, second in that class. With respect to the yearlings, Mr. Herbert Stanford sent a filly which promises to grow into a good mare. In the two-year-olds, Mr. Thos. L. Ashford showed an exceptionally grand roan, very big for her age, and of nice style, and she carried off the champion for the best Shire or cross-bred mare in the yard and the Shire Horse Society's medal. There was a large entry of brood mares with foal at foot, Messrs. Thos. Durrant and Son's Violet taking the chief prize, and she was reserved for the championship. The pairs of plough horses showed up remarkably well, amongst them being some grand farmers' horses.

With regard to the riding horses, these came before Mr. Arthur Gayford, White House, East Harling, and Mr. John C. Dawson, Nacton Hall. The president of the Society, the Earl of Stradbroke, was a strong and most successful exhibitor in the various classes. His Lordship showed a very nice hunting foal by New Orleans, and a good hunting mare with foal at foot, but she was beaten by Mr. George Read's mare Lion. The Hackneys above 15 hands made a good show, Mr. C. F. Egerton sending a choice bay mare, Spick, which was awarded the silver medal given by the Hackney Society for the best Hackney, a Hackney filly sent by Mr. J. H. Coker, first in its class, being reserved for the medal. The class for Hackneys not exceeding 15 hands was the strongest in point of numbers, Mr. William Ling scoring with a beautiful six-year-old bay mare. In the pony class Mr. John Munnings showed his brown mare Trilby, which quickly caught the eye of the judges, being stylish and a fine mover. The Earl of Stradbroke took the lead in the heavyweight and lightweight classes. The feature of the light horse department was the tandem competitions for the prize given by Mrs. C. F. Egerton. Mr. George Johnson, Woodbridge, was first with his splendid and now renowned pair, Brilliance and Searchlight, driven by himself. The judges occupied a longer time in deciding where the second honour should go, to Mr. C. F. Egerton's Spick and Span, or to Mr. William Miles's Bar of Gold and Golden Penny. The former were two specially fine movers, and, in the opinion of lookers-on, the pair ought to have been reversed, the leader being placed in the wheel. The judges, however, eventually gave them the second prize. The tradesmen's turnouts also attracted a good deal of attention. They were most creditable and exceedingly well horsed.

Evesham Horse Show.

The annual horse show at Evesham took place on Wednesday, and was held in the field adjoining the Crown meadow. The show was one of the best yet held, the classes for light horses being remarkably strong. The entry of agricultural horses was not large, but the classes contained several animals of high merit. In a local class for agricultural stallion, Mr. H. S. Rimell (Throckmorton) was first with Invincible, a very useful horse, and Mr. M. Crump (Childswickham) second with Hawarden Boy. In an open class for Shire mare with foal, Mr. G. E. Shirley (Ettington Park), was first with a big-limbed mare with a good foal, and Mr. W. Lidsey, jun. (Leamington, Moreton), second with Honest Bonny. A similar local class was a strong one, Mr. W. Lidsey's Heroine of Batsford was first, and Mr. E. B. Wynne's (Welcome Bank) White Foot second. In a class for sucking colt or filly by horses in the district, first honours were awarded to Mr. F. Smith, of Childswickham, and second to Mr. J. Riddell (Dumbleton Mill). In a restricted class for colt or gelding, Mr. W. Darlington, of Clevelode, Malvern, was an easy winner with Clevelode Royal Albert, a beautiful colt, and Mr. F. Skinner, of Norton, was second. Four good yearling fillies were shown in the next class, chief honours being awarded to Mr. J. S. P. Camden, of Aston Magna, for Bankvue Hilda, while Mr. A. W. Ashton (Newbold-on-Stour) was second with Armscott Credit; and reserved with Armscott Wine. Mr. W. Darlington took first and second prizes in the class for two-year-old fillies, with Cleveland Melody and Clevelode Harold's Darling. Mr. A. W. Ashton's two-year-old gelding Charter was an easy winner in the next class. Mr. W. P. Pope, of Leigh, Worcester, took chief honours in the class for three-year-old fillies, and Messrs. L. and J. Horne (Campden) were second with Leasebourne Polly. The class for three-year-old geldings was a good one. Mr. S. Phelps, of Birmingham, Pershore, was first with Norman, and Mr. S. Bennett (Spetchley) second with Bandit. For cart mare or gelding Mr. S. Phelps also took the chief prize with Duke, and Mr. H. G. Hiorns (Cleve Prior) was second with Boxer. For teams of three horses attached to a wagon or trolly, Mr. S. Phelps was first, and Mr. John James (Whitchurch) was second and reserved. There was an entry of ten in the class for hunter mare with foal. The prizes were given by Captain Stacey, M.F.H. The first went to Mr. A. B. Freeman Mitford, C.B. (Batsford Park) for Mattishal. Mr. J. S. Wilkes, of Tredington, Shipston, was second with an excellent brown mare. There was a grand class of eighteen heavy-weight hunters, many splendid horses being included. Mr. C. L. Kendall, of Snitterfield, was first with Omdurman, and Mr. J. W. Coren, of Guyscliffe House, Gloucester, was second with Carlow. Messrs. R. Cottrill and Holmes's (Droitwich) Cronje was reserved, and Mr. E. R. Apperley's (Cheltenham) Jorrocks was highly commended. The light-weight hunters were a good lot, and Mr. J. W. Coren's Electricity was first and Mr. E. R. Apperley's Sporting Life second. The prizes given by the Hon. Henry Coventry, M.F.H., and Mr. G. D. Smith, of Strensham Court, for hunters up to 13st., the property of farmers in the Croome Hunt who do not use barbed wire during the hunting season, were won by Mr. R. W. Lidsey's (Bishampton) Borneo, and Mr. L. W. Curnock's (Rous Lench) Ladysmith. There was a good class for yearling gelding or filly likely to make a good hunter. Mr. E. Nichols (Worcester) was first with Flying Fox, a colt of splendid quality; and Mr. H. S. A. Sandford (Broadway) was second with a very promising filly. Another very promising colt Jeddah gained the first prize for Mr. E. Nicholls (Worcester) in a class for two-year-old gelding or filly. Mr. E. B. Wynn, of Welcombe Bank, was second with a filly of beautiful quality. Mr. J. S. Wilkes, of Tredington, easily took first prize with a good three-year-old bay filly, and in the same class Mr. W. J. Rogers, of Aston Magna, was second. In the class for gelding or filly under four years, Mr. R. Jackson (Allesboro, Pershore) was awarded first prize, and Messrs. R. Cottrill and Holmes's Chloe second. It was an exceptionally good class for cobs under 14.2 shown in saddle. Messrs. Wooliams Brothers (Adlestrop) were easy winners with Daintv, and Mr. J. E. Rubery (Alvechurch) second with Bride Cake. The driving and jumping competitions as usual attracted great interest.

COMING SHOWS.

Royal Lancashire Society's Rochdale Show.

On Thursday next, July 26th, and the two following days, the Royal Lancashire Agricultural Society's annual exhibition will be held at Rochdale, and the exhibition promises to be a great success. The Rochdale Local Committee have co-operated most energetically to ensure a successful exhibition, and have raised upwards of £1,200 towards the prizes and expenses. Many of the sections will rival in quality the Society's last year's record show at Liverpool. The implement and machinery-in-motion department will be a very large and important one, and will comprise the principal agricultural implement and machinery makers of the United Kingdom.

The Mayor of Rochdale will formally open the showyard at 11.30 a.m. on the first day, the ceremony taking place at the pavilion in the centre of the yard. The challenge cups will be presented to the successful competitors at the grand stand at 3.15 p.m. on the first day by Mrs. C. M. Royds, wife of the president for the year, Colonel C. M. Royds, M.P.

The leaping over hurdles and water, which is always a very great attraction at the Society's exhibitions, has secured an excellent entry, and includes two well-known lady riders. There will be parades of prize horses and cattle, also numerous lectures and demonstrations, and butter-making competitions in the working dairy on each day of the show. On Saturday, July 28th, there will be an exhibition of local live stock. The animals competing for the prizes will enter the showyard at ten o'clock a.m. on that day.

The Besses-o'-th'-Barn, Lancashire Military, the Rochdale Borough, and the Rochdale Old Town bands have been engaged to provide the instrumental music. The railway companies will run numerous excursion and special trains to Rochdale in connection with the exhibition, and, if favoured with fine weather, the Society's first visit to Rochdale will undoubtedly be in every way a great success.

The entries in the different sections are as follows:

Cattle	179	Pigeons	30
Light Horses	247	Honey	42
Shire, etc., Horses	96	Eggs	31
Local Exhibits	137		
Sheep	101		2,162
Pigs	90	No. of Implement and Machinery Stands	169
Cheese	54		
Butter and Working Dairy	119	Total	2,331
Dogs	148		
Poultry	613		

Damage estimated at £15,000 was caused by a fire at Ipswich which on Monday destroyed a large quantity of malt owned by Messrs. R. and W. Paul, and stored at the quay. The fire is supposed to have resulted from spontaneous combustion in some petroleum barrels on the quayside.

Chester Horse Fair.—At this fair on Thursday there was only a small show of horses, and fewer buyers than usual. High-class animals were in keen demand at satisfactory prices, but in other classes business was dull and prices irregular. Best dray horses, £60 to £75; good cart horses, £40 to £50; and trap horses, £16 to £30.

SOCIETIES.

Herefordshire and Worcestershire.

An adjourned general meeting of the Herefordshire nd Worcestershire Agricultural Society was held at Worcester on Monday, the chair being taken by the resident (Mr. H. J. Bailey). The Council reported hat they had accepted the invitation of Evesham to old the show there next year. The Earl of Coventry vas elected president for the year, and, acknowledging the appointment, assured the members of his very warm interest in agriculture generally, and n the work of the society. Messrs. Proctor Vernon Vadley and W. E. Britten were elected vice-presidents, the ex-president referring to Mr. P. V. Vadley's successful efforts on behalf of the Evesham Horse Show, and of Mr. Britten's great practical experience in agriculture, and more particularly in the breeding of Herefords. The retiring president was heartily thanked for his services as the head of the society, and for his successful inauguration of the Leominster local fund.

Scottish Chamber of Agriculture.

A special meeting of the directors of the Scottish Chamber of Agriculture was held on Wednesday, at which Mr. G. W. Constable, Traquair, presided.

The secretary (Mr. Connell) said that since the meeting at which the directors resolved that sub-section 4 of section 1 of the Agricultural Holdings Bill shou'd be amended, he had been in communication with Mr. Long through various channels, and with Mr. R. B. Haldane, M.P., hon. president of the Chamber, with the view of carrying out the resolution of the directors. He submitted correspondence on the subject, from which it appeared that on 7th July he wrote to Mr. Haldane asking if he would kindly arrange to have the best effort possible made to amend sub-section 4 of section 1 of the Bill. The Chamber, he pointed out, objected to the sub-section in the present form because (1) it permitted conditions to be enforced which would practically defeat a tenant's claim for unexhausted manures, and the purpose of the Legislature as embodied in the Act of 1883; (2) it removed a limitation which exists in the corresponding sub-section of the Act of 1883, that limitation being that only the value of the manure that would have been made by consumption on the holding of crops sold off is to be taken into account in reduction of the tenant's claim; (3) it practically, and in a most material manner, nullifies section 36 of the Act of 1883, and has struck at the principle of the Act; and (4) it encouraged landlords to impose penal conditions of a nature which would not be cut down under the proposed clause affecting penal rents and liquidate damages. Mr. Haldane on 11th July wrote as follows to Mr. Connell:—

My Dear Sir,—As the result of the debate to-night, I think we have arranged with the Government a satisfactory modification of clause 1 (4) to be made in the House of Lords. Mr. Long appreciates the objection of the Scottish Chamber that the insertion of the words, "by the contract of tenancy," reintroduces the possibility of penal provisions. He points out with truth, in my judgment, that, on the other hand, the class of tenants which, by the terms of their leases, are entitled to free sale of the way-going crops, will be better off under the clause than under the old law, inasmuch as in such a case the deduction for equivalent manure cannot be made. I rather think that his new clause (and, in the promise of an attempt at one in such a form, I withdrew amending words which I had, after consideration, devised and prepared) will assume this form, that he will strike out the words referring to the contract of tenancy and make the clause measure the value of the manure, according to custom or the rules of good husbandry in every case excepting those in which, by the contract of tenancy, the tenant has the right to sell off his crop free from the obligation to give credit for a less amount of manure than custom or the rules of good husbandry would require to be returned to the holding in respect of the way-going crop. To the best of my judgment, this will meet the difficulty you have pointed out, and at the same time improve the law. The matter is intricate, and further consideration may disclose to Mr. Long and his advisers difficulties which did not occur to us to-night in the course of the debate. But I am pretty confident that in some such shape as this the Government will introduce the promised new words in the House of Lords.

In a subsequent letter Mr. Haldane wrote that he had arranged with Mr. Long a draft of the proposed new clause.

The Chairman said he thought the directors should express their satisfaction that Mr. Long had seen his way to agree to modify the clause. The Chamber of Agriculture might be congratulated on the action it had taken, which would result in the Bill becoming a better measure than when it was introduced. He moved that they express cordial approval of the action of Mr. Long, and thank Mr. Haldane for his assistance.

The Secretary intimated that he had received a letter from Mr. Alexander Russell, secretary of the Glasgow Agricultural Society, which was affiliated with the Chamber, stating that the Council of the Glasgow Society had resolved to invite Mr. Long, Minister of Agriculture, to Glasgow on 9th October, and asking that the Chamber should send representatives to the meeting.

The Chairman said he was sure the directors would be ready to do everything in their power to co-operation with the Glasgow Society with the view of promoting the success of the meeting. He thought it would help to make the Chamber more popular in the West if they joined the Glasgow Society in connection with Mr. Long's meeting.

Mr. Glendinning said the least thing they could do, looking to the national character of the Chamber, and the heartiness with which the affiliated societies, of which the Glasgow Society was one of the most prominent, co-operated with them, was to accede to the request contained in Mr. Russell's letter.

Mr. John Speir, Newton, remarked that this request had originated with Mr. Bine Renshaw, M.P. If the autumn meeting of the Chamber were held in Glasgow rather than in Edinburgh it might help the Chamber as well as the cause they had in view.

Mr. Andrew Hutcheson, Beechwood, gave an account of the evidence given by him and Mr. James Biggar before the Purity of Seeds Commission as the representatives of the Chamber. They afterwards attended at the House of Commons, and heard the debate on the Holdings Bill. A great many of the Scottish members were absent. He was a voter in six constituencies, but he did not see very many of his representatives in the House during the debate. He only saw one of them. Mr. Haldane and Mr. Cross deserved the best thanks of the Society. It struck him that Mr. Long had a very difficult position to fulfil, and he held a balance very well.

Mr. Alexander Cross, M.P., said he sincerely hoped that the visit to the West would be in every way successful. Mr. Long was very desirous to keep in touch with agriculturists in all parts of the kingdom. As farmers, the members of the Chamber could probably devise a better Bill, but no one [illegible] them upon the pro[illegible] made and the [illegible] they had had in dealing [illegible] to pass through Parliament in the course of the next few days. That Bill established a great many principles which were a vast [illegible] regarded the rights of the agricultural tenant. He did not consider what they had got as concessions but as the rights of the farmers; and they showed that the Government were appreciative of the best [illegible] that there would never be that large influx of capital into the farming industry of the country which alone could sustain [illegible] without giving that capital such reasonable security as the Chamber had for so long advocated. Mr. Haldane had been of great service to the Minister of Agriculture and to all the members of Parliament interested in the subject during the discussions in the House. Applause.

On the motion of the Chairman, a vote of thanks to Mr. Cross was passed for the assistance he had given the Chamber in connection with the Bill.

Royal Agricultural Benevolent Institution.

On Wednesday, the 15th inst., this Society held its annual general meeting at the "Criterion," Piccadilly Circus, to receive the annual report of the Council for the year ended 31st December, 1899, and for the election of officers and pensioners. In the absence abroad of the Earl of Northbrook, the chair was taken by Mr. W. B. Parsons.

In presenting their fortieth annual report, the Council desire to announce that there are now on the books of the Society 296 married pensioners (148 couples), costing £5,920 per annum; 252 male pensioners, costing £6,552 per annum; and 652 female pensioners, costing £12,640 per annum. To this number will be added, at the present election, fifteen married couples, ten males, and twenty-five females, whereby the annual charge for the maintenance of pensioners, exclusively of octogenarians and grantees, will amount to £26,472. The subscriptions, donations, and church collections for the year ended December 31st, 1899, amounted to £21,746 3s. 8d. As the charge under the head of pensions alone considerably exceeds the total income of the Society, it is obvious that for some time the election of new pensioners must be restricted, unless, as was pointed out in the report of last year, the subscriptions and other sources of revenue are substantially increased. In normal times—when the imperative claims in connection with the war are satisfied—the Council may confidently appeal to the public for increased support, and a fuller recognition of the work in which they have been engaged for the last forty years. During that period the Royal Agricultural Benevolent Institution has expended £415,413 in permanent pensions, and has maintained no fewer than 3,153 persons. The trustees of the Queen Victoria Gifts Fund have again intimated their intention to give twenty-five grants of £10 each to five male, five married, and fifteen female unsuccessful candidates who shall poll the highest number of votes, and are not in receipt of grants from any other source. After the election the Council will allot octogenarian and other grants to such candidates as are qualified to receive them, but in no circumstances are they empowered to make grants, temporary or otherwise, outside the rules of the Society. Lord Wantage, the Rev. Henry Trethewy, and Messrs. Long, Smith, and Wyatt, retiring mecbers of the Council, were re-elected. A vote of thanks to the chairman having been carried, Messrs. E. B. Jay, Francis Parsons, and T. Freston West were appointed scrutineers, and the election was proceeded with.

AGRICULTURAL EDUCATION.

UNIVERSITY COLLEGE OF NORTH WALES, BANGOR.

A constituent College of the University of Wales
AGRICULTURAL DEPARTMENT. IN-COLLEGE COURSES. 1. A complete course in theoretical and practical Agriculture extending over two years, and suitable for farmers and land agents. 2. Advanced course for a third year in Agricultural Chemistry. 3. Short course of eleven weeks, commencing in October, and consisting of Agriculture, Chemistry, Book-keeping, and Land Surveying. The degree of B.Sc. in Agriculture of the University of Wales may be taken by students who pursue a three years' post matriculation course of study at the College. LLEDWIGAN FARM (360 acres) has been taken by the College for teaching and experimental purposes. Diploma (two years) and Degree (three years) students will in future follow courses for at least one year at the farm under the supervision of the Professor of Agriculture. Special arrangements will be made to take farm pupils for practical instruction only. The College is recognised by the Surveyors' Institution as a place of approved professional instruction for land agents. The cost of board and lodging, with tuition fees, varies from £30 to £40 for the College year. The Scholarship examination will commence on September 18.
Prospectus, with full particulars as to Scholarships and Diplomas, may be obtained from
JOHN EDWARD LLOYD, M.A.,
Secretary and Registrar.
July 17th, 1900.

THE DURHAM COLLEGE OF SCIENCE, NEWCASTLE-UPON-TYNE.

Complete courses of instruction are provided in Agriculture and the Allied Sciences.
Course for the degree of B.Sc. in the University of Durham. Average Composition Fee, £21 per annum.
Winter Course for the College Certificate and for students preparing for the N.D.A., etc. Composition Fee, £3 per session.
For particulars regarding Scholarships, etc., apply to the SECRETARY.

AGRICULTURAL EDUCATION.

ROYAL VETERINARY COLLEGE,

Incorporated by Royal Charter.
Principal and Dean:
Prof. McFADYEAN, M.B., B.Sc., M.R.C.V.S.

SESSION 1900-1901.

The SESSIONAL COURSE OF INSTRUCTION will commence on TUESDAY, OCTOBER 2nd. The chair will be taken by ROMER WILLIAMS, Esq., and the INTRODUCTORY ADDRESS delivered by PROF. McFADYEAN M.B., B.Sc., M.R.C.V.S., at 12 o'clock.
Students are required to attend Four Complete Courses of Instruction in order to be eligible for examination for the Diploma of the Royal College of Veterinary Surgeons.
The College Entrance Fee is Eighty Guineas, the payment of which confers the right of attendance on Four Years' Lecture and Collegiate Instruction. The Fee may be paid in four instalments, viz., Twenty Guineas on Entry, Twenty Guineas at the end of the first period of Study, Twenty Guineas at the end of the second period of Study, and Twenty Guineas at the end of the third period of Study. The first instalment must, with a Fee of One Guinea towards the Library and Reading Room Fund, be paid prior to entry, and a further Fee of 10s. 6d. to this Fund will be charged annually.
The Matriculation Examination will be held at the ROYAL VETERINARY COLLEGE, CAMDEN TOWN, N.W., on the 4th, 5th, and 6th of September.
The Obligatory Subjects will be English, English History or Geography, Arithmetic, Algebra, Euclid (Books I., II., III.), Latin, and either a modern Foreign Language or Greek.
Candidates are required to forward their names, together with the Examination Fee of Twenty-five Shillings, to the Secretary of the College, not later than August 25th.
Four prizes of the value of £20 each, to be called "Centenary Prizes," will be awarded annually to the most efficient Student in each of the Four Classes. Prizes of £5, £3, and £2 respectively will also be given in Each Class for Proficiency in Practical Knowledge. Besides the Coleman Prize Medals, Class Medals and Certificates of Merit are given in each division of the Students' studies.
Certificates of Distinction are conferred on Students who pass a Special Examination for the Diploma of the Royal College of Veterinary Surgeons.
The College Calendar will be forwarded on application to
RICHARD A. N. POWYS, Secretary.
July, 1900.

ROYAL (DICK) VETERINARY COLLEGE, EDINBURGH.

SEVENTY-EIGHTH SESSION.

Trustees: The Lord Provost, Magistrates, and Council of the City of Edinburgh. An Examination in General Knowledge will be held on July 5, 6, and 7, and September 18, 19, and 20, 1900.
Next SESSION commences TUESDAY, OCTOBER 2ND.
Further particulars will be given on application to PRINCIPAL DEWAR.

REGISTER OF BRITISH LIVE STOCK BREEDERS.

HORSES.

HACKNEYS.

MOORE, HENRY, Burn Butts, Cranswick, Hull. — Pedigree Stud of HACKNEYS, including many prize-winners; yearlings, two years, and others.—Can be seen on application to Henry Moore.

HACKNEYS. — JOHN N. ANTHONY, Sedgeford, near Lynn, Norfolk, breeder of Pedigree Hackneys. On hand, Colts and Fillies by most of the leading sires.

LLOYD, WALTER, Heaselands, Hayward's Heath, Sussex.—Small but select Stud of PEDIGREE HACKNEYS, Mares, Fillies, and Colts of best blood, including stock by Champion Ganymede, Agility, Winnal Fireaway, Model II., and other noted Stallions, at moderate prices. Appointments to view the stud (which is 1½ miles from Hayward's Heath Station, L.B. and S.C. Railway) on application to the owner, as above.

CLEVELANDS.

HORSFALL, F. WILSON, Potto Grange, Northallerton.—Breeder of pure-bred CLEVELAND BAY and YORKSHIRE COACH HORSES. This stud has won far more prizes than any other again this year, and has won twice as many as any other during the last fifteen years with Clevelands. Many Royal and Great Yorkshire prize-winners for sale. One of the Stud Horses is Champion Broomgrove Pride 1249—first and champion R.A.S.E. Show, Maidstone, 1897; first R.A.S.E. Show, Birmingham, 1898; first and champion Great Yorkshire, Leeds, 1898; only times shown; fee £5 5s. Also breeder of pure-bred Shorthorns. Bulls and heifers for sale. Amongst others added to this herd in 1899 were Daisy Perfection, Richmond Daisy, and Highland Daisy, all bought at the Duke of Northumberland's Sale, at 210 guineas, 72 guineas, and 72 guineas respectively. Also breeder of Sussex black pigs, and several breeds of white poultry.

SHIRES.

MUNTZ, P. ALBERT, M.P., Dunsmore, Rugby—SHIRE-BRED STALLIONS, COLTS, MARES, and FILLIES. About a hundred of all ages. Prize-winners London and other leading shows. Also high-class Shropshire SHEEP, winners first prize at Royal Agricultural, 1886, second in 1887, and first in 1888.—Apply, THOMAS EWART, Dunsmore Farm, Rugby.

CONCHAR, JOHN, Wylde Green, Birmingham.—Breeder of SHIRES and HACKNEYS. Some good Colts and Fillies for Sale. Five minutes from Station.

TAUNTON, H. PERCY, Redlynch, near Salisbury, Wiltshire. Shire-bred STALLIONS MARES, FILLIES, and GELDINGS of the most fashionable breeding always for sale at moderate prices. The animals are kept entirely out of doors and in natural condition.

PONIES.

THE LARGEST STUD of SELECTED WELSH PONIES IN WALES.—Dinarth Hall Pony Stud Farm, Colwyn Bay, North Wales. Over 120 Ponies now on hand, including forty Brood Mares of the pure Welsh type, and several high-class Ponies, great goers, with style and action. 150 prizes won in 1898 and 1899. Ponies purchased from this Stud have won first prizes at Manchester, Birmingham, and Maidstone Royal Shows; also first and medal Crystal Palace, 1899. Sale in 1899 included two Entire Ponies purchased by the Government for Cyprus, several to America and France. Stud Horse JULIUS CÆSAR II. 5666, sire of first prize two-year-old pony filly, the first of his produce exhibited, London Hackney Show, 1900.

MILLER, W. S., Forest Lodge, Brecon, S. Wales, extensive Breeder and Exporter of the best class of WELSH MOUNTAIN PONIES and COBS. References and particulars on application.

PONIES.

MONTEFIORE, REV. D. B., Mursley, Winslow, Bucks.—POLO PONY STALLION "MOOTRUB" (Polo Pony Society 32); winner of many prizes; three times reserve champion; service fee, £3 3s., and 5s. the groom.—Particulars on application.

CATTLE.

SHORTHORNS.

DALMENY PARK SHORTHORN HERD, the property of the Earl of Rosebery, K.G. Bulls and Heifers of the choicest breeding always for sale at moderate prices.— Apply, MANAGER, Home Farm, Dalmeny Park, Edinburgh.

LANGFORD HOUSE ESTATE HERD of pure and highly-bred SHORTHORN CATTLE, the property of Mr. Sidney Hill, J.P. All bred from the best and leading herds in the Kingdom. JERSEY.

HEASELANDS HERD of PEDIGREE JERSEYS, COWS and HEIFERS of the best blood at moderate prices.—Pedigrees, etc., on application to the owner, WALTER LLOYD, Heaselands, Hayward's Heath, Sussex.

ILMINSTER HERD PEDIGREE JERSEYS. — Choice about 100 finest quality Cows and Heifers, in profit and calving all seasons; prices moderate; inspection invited; shipper to all parts.—R. WHEADON, Ilminster.

BLACK POLLED.

BLUNT, H. LAYTON, Orton Longueville, Peterborough.—Breeder of Black Polled Cattle. BULLS and HEIFERS for sale, also GRAZING STEERS.

PIGS.

BERKSHIRE.

SMITH, C. C., Kingstone Common, Wantage.—Pedigree Berkshire BOARS and GILTS for Sale. Eligible for Herd Book.

BURBIDGE, EDWARD, Wraxhall, Bradford-on-Avon. Pedigree Berkshire Pigs, bred from Royal and Bath and West Champion blood. Acknowledged one of largest type of Berkshires in England. Purchasers met by appointment.

YORKSHIRES.

WALTON HERD of PEDIGREE PIGS, owned by SIR GILBERT GREENALL, Bart., Walton Hall, Warrington; unsurpassed for purity of breed, size, and general excellence, as proved by the numerous championship and class prizes won at all the leading shows. Large, Middle, and Small White Yorkshires. A choice selection of Boars and Sows for sale. Stock carefully shipped. For particulars, apply to the Manager, J. HALLAS, Higher Walton, Warrington.

DALMENY HERD OF LARGE WHITE PEDIGREE PIGS, the property of the Earl of Rosebery, K.G. YOUNG BOARS and SOWS of the very best quality and choicest breeding for SALE at moderate prices.—Apply MANAGER, Home Farm, Dalmeny Park, by Edinburgh.

NEWNHAM HALL HERD of Improved Pedigree Yorkshire Pigs is one of the largest Herds of pure-bred Pigs in the United Kingdom. Boars and Gilts at moderate prices.—NEVILLE J. HINE, Newnham Hall, Baldock, Herts.

DEWHIRST, A., Ryecroft Farm, Dudley Hill, Bradford, pedigree LARGE and MIDDLE WHITE PIGS. Also few BERKSHIRES for sale. All bred on farm. 200 to select from. One champion, 28 firsts, 24 seconds, 15 thirds won this year.

PEDIGREE TAMWORTH PIGS. A few young boars and gilts from prize-winning strains, for sale.—Apply, Farm Bailiff, Middlewood Hall, Barnsley.

STORE PIGS.—R. D. GARRATT, Barton, Ampthill, can deliver *from Free Districts* any quantity good white, black, and crossed; between 18s. and 35s.; also selected breeders. Write for circular of particulars, with hundreds of latest testimonials from all parts of Great Britain, waste consumers, farmers, gentry, etc., etc.—Author of "Practical Pigkeeping" posted 1s. 2d. from above address.

OWTRAM, HERBERT H.—NEWLAND HERD OF PEDIGREE LARGE WHITE YORKSHIRES; all pigs entered or eligible for entry in Herd Book; choice, well-grown young boars and sows of the best strains always on sale. — Apply, BAILIFF, Newland Hall, Ellel, near Lancaster. Station: Bay Horse.

SHEEP.

LINCOLN LONGWOOL.

DUDDING, HENRY, Riby Grove, Gt. Grimsby, Lincolnshire, has always for inspection and sale a large flock of pure LINCOLN LONGWOOL SHEEP, including many prize-winners, having taken the leading prizes for many years at the Royal and other shows for both rams and ewes, including champion medals at both the Paris Exhibitions, Vienna, Amsterdam, Canada, Australia, New Zealand, and all the leading prizes at Chicago; also the first for the best collection of Lincoln fleeces of wool at the Royal Windsor Show, which proves the character of this flock, which is most famous for their great size and 125 years' good breeding. Rams from this flock made the highest average on record last year. Riby Grove is seven miles from Great Grimsby, and three from Stallingboro' Station. Telegrams, "Dudding, Keelby."

FIELDSEND, C. S., Belmont, S. Willingham, Lincoln. Flock No. 59. Pedigree RAMS and EWES for SALE.

LINCOLN LONGWOOL.

ANDERSON, JOHN, Chapel Farm, Barton-on-Humber, Lincolnshire. Breeder of pure-bred LINCOLN LONGWOOL SHEEP. Flock Book 106. These sheep are noted for having hardy constitutions, true character, and long, lustrous wool. — Telegrams: "John Anderson, Barton-on-Humber."

HOYLES, GEORGE, Manor House, Skidby, near Hull.—Pure LINCOLN LONGWOOL SHEEP. Registered Flock 136. Sires used: Skidby Constitution 3069, sire Skidby Conservative 1346, g. sire Old Constitution 308; Skidby Tory 1583, sire Riby A 358; Leconfield Pride, sire Casswell (16) 1753; Skidby Friar, sire Abbot 1—from the celebrated flocks of Messrs. Henry Dudding, J. Casswell, Hy. Smith, jun., etc. Heavy-wool Sheep for export. Also prize and prize-bred Polled Angus, Shire Horses, and English Ponies for inspection and sale.

T. C. DIXON, Brandesburton, Hull.—Pure LINCOLN LONGWOOL SHEEP, of best blood. Wool a speciality, with quality and size combined. F.B. 69. Rams, Ewes, and Lambs for Sale. Inspection invited. Telegrams as above.

HAMPSHIRE DOWN.

FLOWER, JAMES, Chilmark, Salisbury. Undoubtedly the leading flock of the day; in show yard records at all the largest shows, including the Challenge Cup at the Salisbury Great Prize Sheep Fair six years in succession; also highest average for same period for 100 ram lambs at annual sale, at Britford Fair, August 12.

The Flock is one of the oldest existing combining fine quality, strength, constitution, and true character.

"Fossil," sire of the highest-priced Hampshire Down Ram ever sold, was bred at Chilmark, and in service there last two seasons.

COLES, CARY, late C. and T., Manor House, Winterbourne Stoke, Salisbury.— Registered HAMPSHIRE DOWNS, prizewinners at the Royal, Bath and West, Royal Counties, and other shows. July 16th, at the Salisbury Great Prize Sheep Fair, this Flock won the challenge cup for pens of ram lambs, beating the Royal, Bath and West, and Royal Counties' prize winners of this year.

Annual Ram Sale on the premises, Friday, August 3rd.

SHROPSHIRE.

COOPER, WILLIAM, AND NEPHEWS, "Cooper's Dip" Works, Berkhamsted, England. Breeders and Exporters of pure Shropshire Sheep. First and Third Prize for Ewes, Royal Show, 1898. Five hundred breeding Ewes. The largest export flock of Shropshires in England. The sires used present season include 310 Guinea Champion "Royal Record," Two First, One Second, and One Third Royal Show Prize winners.

LIVE STOCK AGENTS.

SUSSEX.

STOPHAM, near PULBOROUGH.

TO LET from Michaelmas, 1909, the MANOR FARM, with fine old-fashioned Farmhouse, substantial and well-arranged Farm Buildings, and about 163 acres Arable and 153 acres Meadow and Brookland. Rent £300.—Apply, W. B. HOY, Stopham Estate Office, Pulborough.

TO BE LET, from Michaelmas, 1909, a valuable SHEEP and DAIRY FARM, known as Sutton Hall in the County of Suffolk, containing thirteen hundred and twenty-seven acres two roods and eighteen perches, of which five hundred and sixty-three acres two roods and two perches are permanent pasture marshes, and heath land, and seven hundred and sixty-four acres and sixteen perches arable.

There is a first-class residence with bailiff's house, several sets of farm buildings, all in good and substantial repair.

The whole of the land is in a high state of cultivation, having been farmed by the late owner for many years; the pasture land, together with the marshes, is very rich grazing ground, and the heath land is a healthy sheep run.

The farm is within four miles of Melton Station on the Great Eastern Railway and has its own quay on the river.

For further particulars, apply to PETER HAY, Bawdsley Estate Office, Woodbridge, Suffolk.

MANCHESTER.—TO BE LET, FIVE FLOOR WAREHOUSE, with good loading and electric light, suitable for provision trade; also two cool cellars suitable for cheese, eggs, or butter. The whole of these premises are centrally situated in Hanging Ditch, with valuable frontage opposite Corn and Produce Exchange. Apply ISAAC NEILD and SON, 19, Chapel Walks.

SITUATIONS, AGENCIES.

WANTED, AGENTS for the SALE of ICHABOE GUANO, the highest Ammoniacal Guano, also for high-class Chemical Manures. All analyses and dry condition guaranteed.—Apply to DANIEL DE PASS and CO., 1, Fenchurch Buildings, Fenchurch Street, London, E.C.

SITUATIONS, AGENCIES, ETC.

FERTILISING AGENTS. — An agricultural landowner in Lombardy (Melegnano, Italy) desires an agency for nitrates, superphosphates, and all kinds of raw material for chemical manures. Apply to G. GIBELLI, care of Agenzia Manzoni, 11 St. Paolo, Milan. References: The Committee of Agriculture of Milan and Bâle, and Edwards Agricultural Machines, Milan.

WANTED, SITUATION as Help or Farm Bailiff to a Gentleman or large Farmer; well up in farming; highest references given.—Address, C. G. MUNDEN, Silver Street, Ilminster, Somerset.

20 WELL-BRED STORE CATTLE, viz., 16 Pure-bred HEREFORD YEARLING STEERS, 4 Fresh SHORTHORN BULLOCKS; and

1 DEEP-MILKING SHORTHORN COW, due to calve August 14th.

Catalogues from ALFRED MANSELL AND CO., College Hill, Shrewsbury.

COMMISSIONS FAITHFULLY EXECUTED.

ON THURSDAY, AUGUST 9 (2 o'clock).

REGISTERED SHROPSHIRE SHEEP.

MR. T. S. MINTON'S ANNUAL SALE.

ALFRED MANSELL AND CO. will SELL BY AUCTION, at MONTFORD, four miles from Shrewsbury,

40 GRAND SHROPSHIRE RAMS.

Catalogues from ALFRED MANSELL AND CO., College Hill, Shrewsbury.

FRIDAY NEXT.

MR. LAMBERT'S HAMPSHIRE DOWNS.

THE FIFTEENTH ANNUAL
SALE AND LETTING
OF
PURE-BRED RAMS AND RAM LAMBS
(from this celebrated Flock)
WILL TAKE PLACE AT
CAMBRIDGE, as usual, on FRIDAY next,
AUGUST 3rd, 1900,
in a Field adjoining the Cattle Market, at 2 o'clock, when
80 GRAND RAMS AND RAM LAMBS
Will be offered.

For many years the Auctioneers have had the pleasure of drawing the attention of Flock Masters to these famous Hampshire Downs, and the Rams will be found this year to possess the size, substance, and colour for which Mr. Lambert's Flock is so noted, and for true Hampshire Down character no better blood can be obtained.

For several years Mr. Lambert has given up Showing, it being found that excellence could be better maintained by keeping the Flock in a healthy breeding condition; but, prior to giving up showing, nearly £2,500 had been won in prizes at the leading Agricultural Shows, including the Smithfield Club's 50-Guinea Cup and Gold Medal.

Catalogues may be obtained of
MESSRS. CHALK, Auctioneers,
11, Alexandra Street, Cambridge,
and Linton, Cambs.

OXFORD DOWNS, 1900.

THE KELMSCOTT FLOCK, the property of ROBERT W. HOBBS, Kelmscott, Lechlade.

RAM LAMBS
or
SHEARLING RAMS

from this old-established flock will be SOLD by AUCTION at the undermentioned Fairs:—

OXFORD, AUGUST 8th.
IPSWICH, AUGUST 22nd
CIRENCESTER, SEPTEMBER 3rd.
BURY ST. EDMUNDS, SEPTEMBER 4th.
KELSO, SEPTEMBER 7th.
NORTHAMPTON, SEPTEMBER 19th.

Yearling ewes for sale at home privately.

Prizes won by lambs from this flock this year are four firsts and four seconds at the Royal, Bath and West, Royal Counties, and Gloucestershire Shows.

AUCTION SALES.

TO CORN MERCHANTS, MALTSTERS, MILLERS, MANUFACTURERS, and Others.

ECCLES BRIDGE, NORFOLK,

On the G.E.R., within one mile of Eccles Road Station.

IMPORTANT MERCANTILE PROPERTY, Connected with the G.E.R. main line by a Railway Siding, and Immediate Possession can be arranged.

It comprises

THREE EXCELLENT SUBSTANTIALLY ERECTED GRANARIES,

measuring respectively 120ft. long by 21ft. wide, 95ft. long by 23ft. wide, and 86ft. long by 18ft. wide, each containing two floors, the top one of wood, the bottom one of asphalte.

COAL SHED, 70ft. long by 20ft. wide.

CONVENIENT RESIDENCE,

Originally forming a Double Dwelling House. Three Offices, STABLES, OUTBUILDINGS, and GARDENS.

As occupied by Richard Bryant and Sons during the last fifty years, which

SALTER, SIMPSON, and SONS are favoured with instructions from the Trustees under the will of the late Mr. W. Bryant, to SELL BY AUCTION, at the Board Room, Agricultural Hall, Norwich, on SATURDAY, AUGUST 18th, 1900, at 12.30 p.m. punctually.

The Auctioneers have every confidence in soliciting the attention of corn merchants and maltsters to the sale of this valuable property, which is situated in the centre of a fine barley growing and good agricultural district. The granaries are so placed and built that if desired they could be easily and inexpensively converted into excellent maltings. Its disposal also affords an exceptional opportunity to manufacturers seeking trade premises and others requiring large store accommodation in a good position on the G.E.R. main line.

Possession can be had on completion of the purchase.

Further particulars may be obtained of the Auctioneers, Attleborough, Norfolk, and Bury St. Edmund's, Suffolk, or of Messrs. STEVENS' MILLER, and JONES, Norwich and Kenninghall, Vendors' Solicitors.

WESTERGATE, ALDINGBOURNE, CHICHESTER, SUSSEX.

TUESDAY, AUGUST 7TH, 1900.

UNRESERVED SALE AND FINAL DISPERSAL of one of the MOST NOTED AND SUCCESSFUL PRIZE-WINNING SOUTHDOWN FLOCKS in existence, Registered No. 9 in Southdown Flock Book.

MR. WILLIAM TOOP, having decided to relinquish Sheep Breeding, has favoured MR. C. STRIDE (of the Chichester Auction Co.) with instructions to SELL BY AUCTION, on the Farm, without reserve, on

TUESDAY, AUGUST 7TH NEXT,

THE WHOLE of his FAMOUS REGISTERED trade-marked SOUTHDOWN FLOCK, consisting of about

370 EWES AND EWE LAMBS of the usual flock ages, and
70 RAMS AND RAM LAMBS.

Mr. Toop established this flock in 1883 by purchases of Ewes and Rams from many of the leading Southdown Breeders; reduced in numbers by a public sale in 1895, its history has been a continuous and unbroken record of success.

A very large proportion of the Ewes, particularly the younger ages, trace back to "ROYAL CAMBRIDGE" (No. 1,450, Vol. IV.), by that wonderful old ram "WATERBEACH" (No. 304, Vol. I.), bred at Goodwood, winner of many prizes at the Royal and other shows, without ever having been beaten. A most impressive sire, who imparted to his descendants to an extraordinary degree his own marvellous constitution and fine quality.

During the past 17 years 244 PRIZES have been awarded to this famous flock at the various leading Shows, including Champions, Group Prizes, and Breed Cups, but not including R.N.'s, H.C.'s, or C.'s, or other minor distinctions, besides which many prizes have been awarded to sheep obtained therefrom at the chief foreign shows.

EVERY SHEEP OWNED BY MR. TOOP is included in the Sale, and every lot will be sold WITHOUT RESERVE.

Westergate is five miles from Chichester and one mile from Barnham Junction on the L.B. and S.C. Railway.

The flock is open to inspection at any time.

Luncheon at One o'clock. Sale immediately after.

Catalogues of Mr. TOOP, or of the Auctioneer (who executes commissions), Auction and Estate Agency Offices, 63, East Street, Chichester.

THE ELEVENTH ANNUAL CHICHESTER SALE AND LETTING OF SOUTHDOWN RAMS AND RAM LAMBS.

The above annual Sale and letting of pedigree Southdown Sheep will be held by

HOBGEN BROS.,

at their Repository in the Chichester Cattle Market (five minutes' walk from the main station), on Wednesday, August 8, 1900, at one o'clock precisely, comprising about

85 specially selected Rams and Ram Lambs from the celebrated flocks belonging to His Grace the Duke of Richmond and Gordon, K.G., the Pagham Harbour Company, Messrs. Hugh Penfold, Alfred Heasman, and F. N. Hobgen.

Included in this sale will be several champion sheep and first prize winners at the Royal, Royal Counties, Sussex County, Oxford, and Tunbridge Wells Shows.

On view the morning of Sale.

Catalogues may be obtained of HOBGEN BROS., Valuers, and Estate Agents, East Street, Chichester, and Midhurst, who will execute commissions.

AUCTION SALES.

UPPER WINCHENDON, AYLESBURY, BUCKS.

THE FORTY-THIRD ANNUAL SALE of about SIXTY OXFORDSHIRE DOWN SHEARLING RAMS, the property of Messrs. J. & S. TREADWELL, will take place on WEDNESDAY, AUGUST 1ST, 1900.

This year's sheep are dark in colour, close in wool, with lots of bone, and full of lean meat.

Prizes have been won at the Royal as usual this year, and most of the prize-winners at the Royal and Oxfordshire Shows were by Winchendon sires.

Special arrangements have been made with the Great Central for the fast Trains from Marylebone at 8.15 a.m and 4 p.m., and also the 8.0 a.m and 9.31 a.m. from Leicester, to stop at Waddesdon Manor Station to set down Passengers attending the Sale. Trains on the Metropolitan will also call at Waddesdon Manor to and from Baker Street every two hours.

Conveyances will meet the Trains at Thame, G.W. Railway, Aylesbury, L.N.-W., Great Central, and G.W., and at Waddesdon Manor Station.

Luncheon from Twelve o'clock.
Sale at Two p.m. sharp.
Catalogues, with Pedigrees, at time of Sale.
EDWARD BOND, Auctioneer.
Thame.

ON TUESDAY NEXT, AUGUST 7TH.
CIRENCESTER RAM FAIR.

FORTIETH ANNUAL SALE OF PURE-BRED OXFORD DOWN SHEARLING RAMS.

A. F. HOBBS will SELL by AUCTION, on the above day, in a field adjoining the Cattle Market, at 12 o'clock sharp, about

60 GRAND SHEARLING RAMS, bred by and the property of JAMES T. HOBBS, Maisey Hampton, Fairford, Gloucestershire.

The Maisey Hampton Flock this year has been awarded First Prize at the Royal Agricultural Show for the best Two-shear Ram, and First Prize for the best Shearling Ram; First and Second at the Bath and West of England Show; and First and Second at the Royal Counties Show.

In 1899 Two First Prizes were secured at the Royal Show, Maidstone.

The Rams to be sold are of immense size, dark in colour, and well woolled.

A brake will leave Fairford Station for Cirencester at 10.15 a.m., returning to meet the 6.40 p.m. train.

A train will leave Paddington at 9 a.m., arriving at Cirencester at 11.43 a.m.

WORCESTERSHIRE.

PORTER'S MILL, TAPENHALL, NEAR WORCESTER,
AND
HADLEY MILL, NEAR OMBERSLEY.

BENTLEY, HOBBS and MYTTON are instructed TO OFFER FOR SALE BY AUCTION, at the STAR HOTEL, WORCESTER, on SATURDAY, AUGUST 4, 1900, at 3 for 4 p.m., in separate lots, as follows:—

LOT I.—"PORTER'S MILL,"

comprising a FREEHOLD RESIDENCE (a portion including a famous and highly interesting Elizabethan half-timbered structure) with Carriage Drive approach, LAWN and GARDEN, KITCHEN GARDEN (partly protected by a very curious old Wall with apertures for Bees), FARM BUILDINGS, a substantially built WATER CORN MILL, with Two Wheels working Five Pairs of Stones, the whole complete and in good order; and

16A. 1R. 39P.

of PASTURE LAND, situate on the River Salwarpe and adjoining the Droitwich Canal, at Tapenhall, Claines, near Worcester, now in the occupation of Mr. J. A. Jackson as yearly tenant from Lady Day at £100 per annum. This rent also includes certain lands rented from the Droitwich Canal Company at £9 per annum and from Mr. Green at £1 per annum.

The Droitwich Canal Company pay a rent of £9 per annum for a supply of water and other advantages, and this rent will be included in the sale.

The property adjoins lands of Lord Sandys, Representatives of the late A. C. Hooper, Esq., and others. It is about four miles from Worcester, four from Droitwich, and about one mile from Fernhill Heath Railway Station.

REMARKS.

"Undoubtedly there was a Mill here before the Conquest, for in Domesday the Manor of Northwick was described as possessing three Mills on the Salwarpe, those of Mildenham, Hawford, and Porter's."

"Tradition says that Queen Elizabeth, in her progress from Hartlebury to Worcester, in August, 1575, visited John Porter at his house at Porter's Mill. This was the John Porter whose monument and recumbent figure have been restored and placed in the Chancel of Claines Church. He is there described as 'John Porter which was a Lawyer.'"

Lot 2.—HADLEY MILL, comprising an old established WATER CORN MILL, working Three Pairs of Stones, DWELLING HOUSE adjoining, STABLE with Loft over, open Shed, Pigscots, etc., the whole containing 3a. 0r. 0p., in the occupation of Mrs. M. Harford as yearly tenant from Lady Day, at the yearly rent of £30. Mrs. Harford has occupied for thirty years.

Hadley Mill is situate in the parish of Ombersley, adjoining the Westwood Park Estate, and lands of Mrs. A. Gardner, Mr. Hickman, and others, about 2 miles from Ombersley, and 3½ from Droitwich. It is copyhold of the Manor of Ombersley, and the copyhold rent is £1 7s.8d. per annum.

The Properties can be viewed by permission of the Tenants.

Particulars with Plans may be obtained of MR. J. H. YONGE, Solicitor, or the Auctioneers, all of Worcester.

AUCTION SALES.

SALES OF SHIRE HORSES, HACKNEYS, AND HARNESS HORSES,
BY
SEXTON, GRIMWADE, & BECK.

AUGUST 1ST.—Sale of 42 of Mr. W. LLOYD'S HACKNEYS, at Heaselands, Hayward's Heath.

AUGUST 2ND.—Sale of 45 of Mr. C. E. E. COOKE'S SHIRES and 25 HACKNEYS at Hinxton Grange, Cambs.

Catalogues and further particulars of the Auctioneers, Peterborough.

OXFORD GREAT ANNUAL RAM FAIR.
WEDNESDAY, AUGUST 8, 1900.

MESSRS. PAXTON & HOLIDAY will hold their usual important AUCTION SALE of OXFORD DOWNS in the above fair, commencing at 10.15 o'clock punctually.

The present entries consist of

350 specially selected OXFORD DOWN SHEARLING RAMS and RAM LAMBS, being consignments from the following noted flocks:—

Mr. Edward Gillett, Cote House, Bampton.
Mr. John Warley, Brize Norton, Faringdon.
Mr. Geo. Adams, Royal Prize Farm, Wadley, Faringdon.
Albert Brassey, Esq., M.P., M.F.H., Heythrop Park, Chipping Norton.
The Right Hon. the Earl of Camperdown, Weston Park, Shipston-on-Stour.
Messrs. J. Bryan and Son, Southleigh, Witney.
Messrs. T. W. Jeffries and Son, Black Bourton, Faringdon.
Mr. H. W. Stilgoe, Adderbury Grounds, Banbury.
The Hon. R. Hardinge, South Lawn House, Burford.

70 pedigree OXFORD DOWN EWES and THEAVES, being drafts from the well-known flocks of Albert Brassey, Esq., M.P., M.F.H., Her Majesty's Commissioners of Woods and Forests, and Messrs. J. Bryan and Son.

The sheep may be seen at any time by appointment with the respective owners, of whom catalogues with pedigrees may be obtained; or of F. D. HOLIDAY AND SON, Auctioneers, Valuers, and Estate Agents, Bicester, Banbury, and Chipping Norton.

MANOR FARM, WINTERBOURNE STOKE, WILTS.

Four miles from Wishford Station, six from Wilton, and nine from Salisbury.

100 RAM LAMBS,
from the choice
HAMPSHIRE DOWN FLOCK
Of Mr. CARY COLES, of Winterbourne Stoke, registered in the Hampshire Down Flock Book.

TO BE LET AND SOLD BY AUCTION BY

WATERS AND RAWLENCE, on the PREMISES, on

FRIDAY, AUGUST 3RD, 1900.

All Flockmasters visiting the leading show yards of the season have been greatly impressed by the excellence of the exhibits from the Winterbourne Stoke Flock. A very large proportion of the Ram Lambs to be offered at the Annual Sale are by the same sires as the show animals and possess the same beauty of feature and symmetrical form, and together will comprise the best selection ever placed before the public by Mr. Coles. As a proof of the great merit of this year's Ram Lambs, a pen of eight was awarded the twenty-five gs. Challenge Cup at the great Ram Lamb Show at Salisbury, against the strongest competition.

LUNCHEON AT 12.30 AND SALE AFTER.

Catalogues may be obtained of the Auctioneers, Canal, Salisbury.

Conveyances will meet all trains until midday, at Salisbury, Wilton, and Wishford.

OXFORD GREAT RAM FAIR,
AUGUST 8, 1900.

34 SHEARLING RAMS,

80 BEAUTIFUL SHEARLING EWES.

Breeders will find several valuable and impressive Sires, and some exceptionally good pens of Ewes at this Sale, and the general farmer in want of big, strong, lean-fleshed Rams will meet with his requirements.

The auctioneers having examined the flock have pleasure in thoroughly recommending the sheep as being members of a flock of great merit with the best attributes and characteristics of a high-class flock of Shropshires, bred on sound practical lines, and combining quality of wool and mutton with size and good bone.

The Prince of Wales' Challenge Cup for the best pen of Wethers at the last Smithfield Club Show was secured by representatives from this flock, the prizes secured on that occasion amounting to the value of £258, and this year's successes are again notable.

Catalogues from—

ALFRED MANSELL AND CO.,

College Hill, Shrewsbury.

SUTTON, SUFFOLK,
four miles from Melton and five from Woodbridge Stations.

ON WEDNESDAY, 8TH AUGUST, 1900,
At 2 o'clock precisely.

GARROD, TURNER and SON, in conjunction with Mr. ERNEST PRENTICE, Secretary to the Suffolk Sheep Society, will SELL by AUCTION, by direction of the EXECUTORS of W. N. WALLER, Esq., deceased, the Estate having been sold.

THE SUTTON HALL FLOCK OF SUFFOLK SHEEP (Registered No. 168),

COMPRISING:—

550 SUFFOLK EWES, various ages.
119 CHOICE SHEARLING EWES.
800 EWE and WETHER LAMBS.
12 RAMS.

Sutton Hall has long enjoyed a reputation as the home of a high class breeding flock, which was established by an ancestor of the late Mr. W. N. Waller, in 1790, and is the oldest flock in existence of pure-bred Suffolk sheep.

Catalogues of the AUCTIONEERS, Ipswich.

DUNSMORE SHEEP SALE.

MESSRS. LYTHALL AND WALTERS are instructed by P. A. MUNTZ, Esq., M.P., to SELL, at DUNSMORE, ON AUGUST 31ST,

50 SHROPSHIRE RAMS
OF IMMENSE SIZE,

Including the FIRST-PRIZE WINNERS at the Royal Show, Shropshire and West Midland, Leicester, Notts, and Newport.

Also
60 BEAUTIFUL SHEARLING EWES.

TENDER.

GREAT WESTERN RAILWAY.

The Directors of this Company are prepared to receive TENDERS for the supply of:—

10,000 Quarters of OATS.
1,300 ,, ,, BEANS.
1,300 ,, ,, MAIZE.
700 Tons of HAY—Upland Meadow.
700 ,, ,, HAY—Broad leaf Clover and Rye Grass.
600 ,, ,, WHEAT STRAW.
150 ,, ,, STRAW for PACKING.
220 ,, ,, BRAN.

Forms of Tender (upon which alone Tenders will be received) may be obtained on application to the undersigned, by whom Tenders, marked outside "Tender for Provender," will be received on or before Tuesday, the 7th proximo.

The Directors do not bind themselves to accept the lowest or any Tender.

BIBBY'S "CREAM EQUIVALENT" for CALVES.

An Ounce of Fact is worth a Ton of Theory.

A STRIKING FACT.

In our Spring number of "Bibby's Quarterly" we reproduced the photographs of two groups of Calves which are now being reared at the Horuby House Farm, Bedale, Yorks, by his Grace the Duke of Leeds.

One of the groups is being fed on New Milk and the other on Separated Milk and "Cream Equivalent."

We asked our readers to tell us which of these groups were fed on New Milk, and 707 Farmers, Farmers' wives, their sons and daughters competed for a small prize which we offered to those who guessed correctly.

445 selected the wrong, and 262 the right group.

We think the above striking FACT speaks volumes for "Cream Equivalent."

The "Cream Equivalent" can be had at 15s. per cwt., carriage paid to nearest station.

The Only English Journal devoted exclusively to Agriculture.

MONDAY, JULY 30, 1900.

Correspondents are requested to address all communications for the Editorial Department to THE EDITOR, "Mark Lane Express," 1, Essex Street, Strand, London, W.C.

Advertisements, Subscriptions, and business communications should be addressed to THE PUBLISHER, "MARK LANE EXPRESS," 1, Essex Street, Strand, London, W.C.

IMPORTANT NOTICE.

TO CONTRIBUTORS & ADVERTISERS.

In consequence of next Monday being Bank Holiday, the MARK LANE EXPRESS will be published on SATURDAY MORNING, August 4.

All communications for that issue, whether for the Editor or Orders for Advertisements, must reach this office not later than the first post on FRIDAY MORNING, August 3.

MORE LABOUR-SAVING MACHINES WANTED.

Travellers by road or by rail must have been very profoundly impressed of late with the conviction, either that farmers in numerous districts of the southern half of the kingdom are bad haymakers, or that there is an urgent want of fifty times as many haymaking machines and horse-rakes in rural districts as there are now. Ever since the advent of our brilliant, scorching July summer, the scene presented to view has been the same everywhere, with the exception of a farm here and there, where the occupier is the possessor of a haymaking machine and a horse-rake—the grass cut down, but lying about untouched, scorched on one side by the sun, and being allowed to make itself.

Rural close observers, disposed to cynicism, have often declared that more hay is spoiled in an over-fine season than in a moderately indifferent one, and if by being spoilt is meant the complete abstraction of all sap by the fodder becoming virtually sunburnt, there is a great to justify the assertion. Besides which, whenever hay is allowed to make itself, there is sure to be uneven, no less than injurious drying. The operation of carting to the stack takes place while there is yet a great deal of green amid the over-scorched. This leads to severe heating in the stack, with the frequent result of spontaneous combustion.

The potent sunshine and excessive heat of July have already brought us the corn harvest for such crops as rye, winter oats, and winter barley, and the wheat is rapidly assuming a golden hue in many districts. Labour scarcity is likely to be just as severely a despoiler of the bounty of Providence in regard to the grain ingathering as it has already proved itself in the haying season. Those who have self-binding reaping-machines are all right, for the crops stand up admirably this year, and these invaluable implements slash down and sheave the corn so rapidly that by their instrumentality harvesting can be effected in one-fourth the time it formerly occupied, and where twenty pairs of hands were necessary a single pair performs the work far more effectually. But scarcely one farmer in a hundred who has corn to cut and harvest is the possessor of a self-binding reaper. Indeed, it would only pay the owner of a large acreage of corn to buy a costly implement for only about a fortnight's use during the year. But for large occupations they have been known often to save labour pay sufficient, even in that short space of time, to defray at least half their cost.

Clearly, then, what is wanted is an implement depôt in every corn growing district, from which a self-binding reaper could be hired. This would place the little men on the same vantage ground as the larger occupiers, who find it advantageous to purchase them. And not only for one class of implements is there this urgent want, but for all labour-saving mechanical appliances, for the evil of insufficient manual labour is increasing so rapidly that the interests of British agriculture itself are becoming vitally imperilled. What, then, can possibly be of more urgent importance in the present state of things than setting on foot a movement throughout the length and breadth of the land for the formation of clubs whose object would be the establishment of such depôts? Rightly managed, getting them would be perfectly easy. Bankers presumably would advance the wherewithal even on the personal security of the co-operating members of clubs of the kind. They have been in the regular habit of doing it for a considerable number of years in Bavaria and other parts of Germany to the incalculable advantage of the peasant farmers, whose personal security would be nothing like so good as that of even the humbler sections of English farmers.

According to Mr. Vansittart, of Her Majesty's Legation at Munich, "The strength of the Raiffeisan associations consists in unlimited liability. Their safety is so trusted that bankers have declared themselves ready to grant the associations credit merely on the ground of their unlimited responsibility, and without asking for any other guarantee."

These Raiffeisan associations are very numerous on the Continent and have effected an immense amount of good. Although chiefly made instrumental for the distribution of loans to needy members, there are precedents of depôts of implements having been established by their means, the capital for the purchase of the machines being wholly obtained from the outside on the credit of the association which established the depôt. Reasonable is it, that if bankers will do as Mr. Vansittart states when the large sums advanced are distributed in many loans to impecunious members, they would be still more ready to advance when the co-operating borrowers were not only a less needy class, but when there would be the whole stock of articles bought with the money to be held in actual possession by the managers and committees of the borrowing associations.

Such labour-saving machines as self-binding reapers, mowing and haymaking machines, stackers, drills, steam and gang ploughs, thrashers, chaff-cutters, milking-machines, etc., if hired out to the co-operating members, would soon pay for themselves, so that it would only require good organisation to make parochial or district associations of the kind of the greatest possible value to both small and large farmers. Such institutions have been made extensive use of in France for the purchase of manures, seeds, and articles of which all the members require small quantities, and by buying which wholesale in bulk may not only be had cheaper but of pure guaranteed character. Many English farmers also do this now through the agency of their farmers' clubs and local chambers of agriculture, which proves that English farmers are not so averse to co-operating when any real advantage is obtainable by their so doing.

Moreover, any general spread of a movement grounded on the basis above indicated could not but excite mechanical genius to invent fresh labour-saving machines and implements for other objects than those at present served. There is an article even now, calculated very materially to lighten the labours of the hayfield, which only very few farmers know anything about. A loader at the rear of the wagon is worked as the wagon is drawn forward to take up the hay itself and carry it up a plane by the endless band system. One farmer found by its use he could save the labour of three hay men, four horses, and two drivers per day, but he could not get his men to continue using it, and his experience as to the objection is not unique.

SAMPLES.

By a Man of Mark Lane.

A report from the agricultural correspondent of the Labour Department gives the changes in the wages of ordinary farm labourers from June, 1899, to June, 1900, in the Midland, Eastern, and Southern and South-Western Counties respectively, as shown by returns from 134 Poor Law Unions altogether. Out of a total of 231,655 agricultural labourers in the districts covered, the wages of 91,469, or 39.5 per cent., remained stationary; while those of 140,186, or 60.5 per cent., rose from 6d. to 2s. per week. In the Midland Counties the advance was 1s. to 2s.; in the Eastern Counties, 1s. to 1s. 6d.; and in the Southern and South-Western Counties, 6d. to 2s. Altogether, out of 148,186 labourers who had an advance, 8,939 received an increase of 2s., 25,552 an extra 1s. 6d., 102,002 a rise of 1s., and 3,693 an increase of 6d.

Nearly 73 per cent. of all the men who have received an advance are in the Eastern Counties, in some of which there was plenty of room for a rise. In Suffolk even now the rate for day labourers is only 12s. to 13s. a week, though this does not represent nearly all their earnings, and men with horses and other stock get more money. In Norfolk the usual rate is 13s., and in Lincolnshire it is up to 16s. 6d. for ordinary labourers in many districts where it was 15s. last year. In parts of the South, as in Sussex, wages range from 15s. to 18s. a week, though these rates are not named in the return. No figures were obtained from the North of England, because most of the men are hired by the year or half year; but it is stated that near the Scottish border 16s. to 18s., with free lodging, potatoes, and other advantages, are the usual wages.

According to a Reuter's telegram from Paris on Tuesday, the official estimates of the French crops, based upon the reports made by agricultural experts, state that winter wheat is very good in one Department, fairly good in twenty-two, fair in seven, and mediocre in one. Spring wheat is very good in one Department, good in twenty-four, fairly good in twenty-one, and fair in three. No spring wheat was grown in the other Departments.

In the final report on the wheat crop of the Punjab for 1899-1900, issued by the Punjab Department of Land Records and Agriculture, on May 28th, it is stated that, generally speaking, the insufficiency of rains at the time of sowing and the consequent want of moisture in the ground have greatly contracted the unirrigated sowings, while the people in some districts have increased the sowings on irrigated lands by sinking kutcha wells called dhenklis. The total area under wheat as finally returned is 6,366,500 acres, as compared with 7,729,200 acres last year. Thus the area this year is 17.6 per cent. below last year's area, and 15.6 per cent. below the quinquennial average. The area estimated at the first and second forecasts was respectively 4,925,100 and 5,469,100 acres, while the actual area as finally reported and as anticipated is 6,366,500 acres, showing an increase of 22.6 and 14.1 per cent. over the forecasts. This improvement in the final returns, as compared with the anticipation in the forecast reports, is due to the fact that the irrigated area under wheat in the Jhang and Gujranwala Districts on the Chenab Canal was decidedly underestimated, while on unirrigated lands fresher sowings after the January rains have increased the area under wheat in Gujrat, Kangra, Hoshiarpur, Shahpur, Jhelum, and several other districts. The autumn-sown crops on the whole were not successful, and if they did not fail entirely, they yielded but a scanty fodder supply or a very light harvest of wheat.

The irrigated crop this year bears the very

high proportion of 63 per cent. of the whole crop; last year the irrigated crop was only 50 per cent. of the whole. An increase in the total area sown compared with last year is observable in only four districts, chiefly in Lyallpur of the Jhang District. In this district the increase is as much as 59.6 per cent, owing to the extension of cultivation on the Chenab Canal. The total area of wheat in this district this year was 659,700 acres against 413,300 acres last year. There is a decrease in all other districts.

The total outturn of wheat this year is estimated at 1,823,182 tons against 1,977,777 tons, of 7.8 per cent. less than last year. The average outturns of the preceding five and ten years have been 2,163,908 and 2,042,523 tons respectively. The yield of the present year shows a decrease of 15.7 compared with the quinquennial and of 10.7 per cent. compared with the decennial average. The average outturn of all classes of soils taken together comes to 7¾ maunds per acre against 7 maunds last year. This increase is due to the fact that the proportion of the irrigated crop is much larger than it was last year. The outturn on irrigated lands in Ludhiána and Gurdáspur is reported to be excellent, poor in Dera Gházi Khan and the Salt Range and Bár (Shahpur), above average in Muzaffargarh, and average or below average elsewhere. On unirrigated lands it is nowhere reported to be good or even above average. In most places it is said to be bad, poor, and below average.

The same Department also issues its final report on the rapeseed crop of the Punjab for the year 1899-1900. In it they state that the season has been notoriously bad for agriculture of all kinds. The early cessation of the monsoon and the dry autumn months and late commencement of and deficiency in amount of the winter rains has had the natural result of diminished sowings and short outturns. In one respect, however, the report now presented shows a considerable improvement over the second forecast report of the rapeseed crop issued in February last, viz., in regard to the increase in the area sown after the rain which fell in the third week in January. The late rains also caused a good deal of self-sown tára míra in the Jhelum District to germinate, which, though stunted, gave a fair yield. The total area now reported as actually sown with this crop, including the self-sown tára míra, is 397,500 acres against 582,600 acres in the previous year. This shows an increase of 158,700 acres over the second forecast, but is still 31.8 per cent. below the final results of last year. The proportion of irrigated area sown with this crop has increased, viz., from 26.9 per cent. in the last year to 30.4 in the year under report.

The total outturn is estimated at 26,761 tons against 50,041, or 52.2 per cent. less than in the preceding year, and a decrease of 69.8 and 68.7 per cent. respectively in comparison with the averages of the preceding five and ten years. The outturn in Ludhiána is said to be nil, as the irrigated crop when green was consumed by the people as vegetables, and the unirrigated crop was a failure, while in Gujránwála, and probably in some other districts, too, a portion of the crop was cut, when green, and used as fodder for cattle. Taking the area and the yield together, the rapeseed crop this harvest may be said to be 50 per cent. of the normal crop.

The receipts on account of Revenue from April 1st, 1900, when there was a balance of £3,517,047, to July 21st, 1900, were £31,752,435 against £32,517,363 in the corresponding period of the preceding financial year, which began with a balance of £8,919,173. The net expenditure was £53,934,104, against £36,216,422 to the same date in the previous year. The Treasury balances on July 21st, 1900, amounted to £4,932,177, and at the same date in 1899 to £3,180,834.

Henry Boughen, farm servant, of Deeping, St. Nicholas, was charged at Spalding on Wednesday with setting fire to stacks of oat and wheat straw and pulse, on the farm of Mr. R. C. B. Watts, at Littleworth. Defendant was employed about midday carting manure near the stacks, which were fired, and he told a policeman that some matches fell from his pocket, and, striking on a cart wheel, were ignited. The magistrates thought defendant had acted with great carelessness, but as there was no evidence of wilful misconduct he was discharged.

AGRICULTURAL POLITICS.

By a Lobbyist.

The Duke of Devonshire is surely not wise in attributing to the farmers of England a malicious motive in their refusal to be exuberantly enthusiastic over the modern developments of the educational system. It it fair or just to assert that this conduct on the part of the farmers is due to a desire to prevent the mental development of the child and the consequent anxiety to work out their destiny in the towns? Is his Grace even wiser in attributing to the farmers a desire to educate their own daughters for anything rather than for the position of farmers' wives? Both accusations sound like an echo of the tub-thumping charges familiar to Radical platforms.

It is another rendering of the old-time assertion that English farmers are selfish, have no sympathy for the men and women who delve on their farms—why not, your Grace, imitate Mr. Chamberlain's old method, and dub them "helots"?—and are possessed by a worldly arrogance which is little to be differentiated from conceit. For the life of me I cannot see why the Duke of Devonshire should go out of his way to lisp this caricature of the farmer, even though the occasion of the burlesque be a secondary education festival.

I am assured that this war will result, unfortunately, in a new seductive influence being applied to the rural districts in the hope of attracing the labourers away. One of the lessons of the war—and I am speaking with authority in making this assertion—is that the soldier who can withstand the fever-provoking conditions which prevail in South Africa are those who have been recruited from the villages. The men who have come from the towns—and, of course, certain regiments have of recent years been almost entirely recruited in towns—have fallen ready victims. I do not stop to inquire why this should be so. An explanation will probably be found in the fact that the rival worker has been exempt from the vitiating conditions which prevail in the towns, and thus possesses an armour with which to meet the inroads made ordinarily upon the physique by the unwonted life of the veldt.

"Give me an army of agricultural labourers," said a distinguished general at the front but a few weeks ago, "and I then shall permit myself the luxury of indulging in the hope that I may escape the effect of enteric." "Give me agricultural labourers as patients," said a well-known Army medical officer, "and I shall have reason to hope that I may rescue many from the effects of the epidemic." Which two declarations provide a bad look-out for the farmers. They mean a more fascinating recruiting crusade in the villages.

Will Mr. Chamberlain or the country gentlemen element be uppermost in the party triumph? This is the question which now chiefly concerns the House of Commons. That Mr. Chamberlain is still striving strenuously to secure an early general election is undeniable—he is using every intriguing machinery of which he has command to achieve this purpose. Now, what operates against his scheme—and his cuteness is too apparent to need demonstration—is that there be men who think that an early general election would also be a manifest act of chicanery. A grave charge has been made against the Government. It is averred to have brought either death or anguish to thousands of brave fellows who had gone fearlessly to battle for their country's sake by its maleficent administration. An inquiry has been instituted into this charge, and is being at this moment conducted. To go to the country whilst this charge is still uninvestigated, and until the Commission has delivered its verdict, is to be guilty of the offence of the remanded prisoner let out on bail who levants because of his fear to meet the jury.

Now, the old-fashioned politicians, with their old-fashioned instincts, still rebel against this policy. Will they succeed in their rebellion? Surely they ought to, seeing that they are led by Lord Salisbury. What is more. The dissolution is not a matter for the Queen and the Cabinet, but for Her Majesty and Lord Salisbury alone. At all events, that an election will take place in October is by no means certain.

I am glad to hear that a movement is on foot in Wiltshire to induce Mr. Walter Long to accept the candidature of one of the county constituencies. It is meet and fitting that a Walter Long should represent Wiltshire in the House. It is in harmony with the county history and traditions. There was a time, but this was before Niagara was shot—in other words, before the flood-gates of the democracy were opened—when the representation of the county was invariably divided between a Sotheron-Estcourt and a Walter Long. The severance of that association by the iconoclastic electors of the Devizes division came as a veritable shock to the political student. It seemed like pulling up a deep and cherished family affection by the very roots. That Walter Long, of Rood Ashton, should have been beaten in Wiltshire induced a gasp of astonishment. I believe none regretted their disloyalty more than the Devizes electors themselves. It was not always the method of the men down 'Vizes way to deride a Long. Well, their offence is now to be condoned. A Walter Long will sit for what I could almost describe as "Walter Long country."

"Is there any prospect of the farmers uniting in the way the Editor of the MARK LANE EXPRESS has suggested?" I asked a well-known Conservative Parliamentarian who has taken a keen and practical interest in agricultural questions. "Well," was his reply, "if they do not unite they will have missed the lesson of this Session. Do they know that they were within an ace of losing the amendments of the Agricultural Holdings Act? Do they know that it was finally introduced after a delay of four years, not because of the desire to redeem a Ministerial promise, but because of the resolve of Mr. Walter Long to redeem his personal pledge? Had Mr. Long been less insistent the present Bill would never have been introduced. And why should Ministers have troubled themselves about the matter—a matter which was bound to breed temper and dispute—when the farmers themselves scarce went out of their way to pass a pressing and determined resolution?" These be potent words, messieurs of the farming interest; and they strikingly emphasise the importance of the point upon which the MARK LANE EXPRESS last week so admirably and editorially insisted.

Overland Parcel Post to Australia.—Parcels can now be sent to Australia (including British New Guinea) viâ Marseilles, Brindisi, or Naples, arriving a week sooner than if sent all the way by sea. Parcels intended for the overland route must be posted in London not later than Tuesday afternoon, and in the country in time to reach London not later than midnight on Tuesday. The postage to be prepaid on parcels weighing not more than one pound is 2s., and for each additional pound, or fraction of a pound, 6d. Such parcels addressed to New South Wales, South Australia, Tasmania, or Victoria, can be insured for any sum not exceeding £20, under the usual conditions; but no compensation is given for the loss or damage of liquids, semi-liquids, perishable or fragile articles.

St. Boswell's Fair.—This annual border gathering took place on Wednesday, and was a good deal smaller than usual, a reason for this probably being the Highland Show at Stirling. The business of the fair is now mainly confined to horses and wool. In the horse department fully 700 animals were stanced, considerably fewer than in previous years, and except for the very best class trade was dull. Mr. Dan Kennedy, Kelso, presented thirty head, all of a good class. He sold draught horses at £50 to £70, and harness horses at £30 to £40. Mr. Rush, Carlisle, was represented by an excellent string of fully fifty. He effected sales of work horses at prices ranging from £10 to £76; while harness horses brought him to £42 and ponies to £25. Mr. Arthur Forster, Parkhouse, Carlisle, and one or two other well-known dealers bought and sold at similar prices. Mr. James Scott, Softlaw East Mains, Kelso, sold twenty-five horses at £16 to £60, and Mr. C. Douglas, Kelso, disposed of a dozen at prices ranging from £10 to £50. Mr. Johnston, Dumfries, had thirty head on offer. He sold horses for the draught at £35 to £52, and harness horses at £24 to £42. Mr. Elliot, Middles, Lilliesleaf, sold a number of work horses to £58, and harness horses to £32. Business in the wool market did not begin until afternoon, and a considerable number of those interested congregated in the usual stance. As usual, the market was in great part of the nature of a feeler, a good trade having been experienced at Inverness, and with enhanced values for fat stock farmers naturally looked for a substantial rise on the quotations for the past few years. The dealers, however, though willing to give a certain advance, would not concede all that was demanded, and few transactions took place. Farmers generally are expecting a rise of fully 1s. per stone, while others, particularly the holders of large fleeces, are disposed to hold out for 1s. 6d. to 2s.

THE DAIRY.

Protected Milk.

Few businesses have been quite so sorely tried during this outburst of hot weather as the retail dairy trade; and few consumers have been quite so frequently put out of their reckoning as their customers.

Milk depends, first, upon the quality and health of the cows, and the nature of the herbage; second, upon means employed to preserve it; third, upon its treatment during transit.

First, there is no doubt that cows suffer, as most mortals do, through a long continued spell of extreme heat, and they suffer also through the drying up of their pasture land through continued drought. But farmers themselves know the value of shady corners, and of good watering places for their cattle in summer.

Second, various preservatives have been tried among milk dealers, but all of them have some disadvantage, if not to the dealers, to the consumers. All of them are liable to penalties under the Adulteration Acts, and some of them, such as formalin, ought to receive the attention of the Excise and other departments. Most delicate palates detect the admixture, all delicate digestions suffer eventually from the continued use of any preservative, for all are more or less deleterious. Therefore an unprejudiced arbitrator would unhesitatingly pronounce against the short-sighted use of so-called preservatives.

Third, there is much more to be said upon the ordinary travelling experiences of milk. Farmers send their produce to town in metal churns, suitable enough in shape and material to convey such liquids as water; but when they are used for such an unstable fluid as milk, they are about as unpractical as could well be devised. Metal not only rapidly absorbs heat rays, but conducts and radiates them rapidly. If fresh milk be boiled it remains sweet for a considerable period. Even if it approach the critical stage rapid boiling may freshen it. But to expose milk during the relatively long time taken up in transit to the low degrees of heat transmitted through a metal churn, with or without a linen jacket, is too severe a test even for the best of milk When to the heat is added the constant series of shakes and jolts in continuous railway travelling, and the bangs and jolts at the stations, the danger is intensified. On its arrival at shops it is frequently poured out into messenger cans, which are driven jolting over stony streets, with apparently as much determined hostility to the preservation of the precious fluid as is possible even for a boy.

Now a certain degree of science and commonsense might be applied even to the milk traffic, and thereby might be secured not only a saving of money on both sides, but a saving of the health of infants and animals dependent on the supply. The unexpected failure of usable milk is a serious cause of domestic annoyance.

In the first place, instead of planting the churns flat on the railway truck bottom they might be slung hammock-wise, so as to diminish the jolting. A double rim at the lid might be constructed to hold a little ice, which would keep the temperature materially down. Railway officials *might* be educated into banging about their milk consignments less dangerously, if they saw purveyors taking *real care*. They might even have the milk truck roof whitewashed, and carry in each a small quantity of ice. But the most radical improvement would be an entire change in the material used for churns, from that now at present in use, so dangerous in hot weather. The best receptacle for milk is, no doubt, glazed earthenware, but that is too brittle for railways; wood is not easy to keep perfectly clean; but the new and improved manufacture of papier-maché makes it possible to construct new and improved milk churns from that material. It has all the qualities that are necessary. It is light, yet no brittle, and it does not readily absorb, transmit, or radiate heat. A solid internal glaze would make the surface as easily cleaned as china. In short, papier-maché combines so many advantages that milk travelling in churns made of that material would be *well-protected milk*. The diminution of clatter would not only be a relief to passengers at a station, but would remove a temptation from the ordinary railway porter, so that the milk might not be so much churned, even in stations. The initial cost would be about the same, and if the cost of the linen jackets be added to that of the metal, it would probably prove the papier-maché the cheaper. The durability would depend upon the treatment.

I must say I should like to see a papier maché company take up the manufacture, and allow me a suitable royalty for the suggestion on every churn they sold.

URSA MAJOR.

IN PARLIAMENT.

House of Lords.

Agricultural Holdings Bill.

On Tuesday, Viscount Cross moved the second reading of the Agricultural Holdings Bill, the object of which, he said, was to simplify procedure under the Agricultural Holdings Acts, and to remove friction, so far as it could be removed, between landlord and tenant. The measure of all compensation no doubt was the value of the improvements made by the outgoing tenant to the incoming tenant, and this had been the standard adopted in the Bill.

Lord Burghclere said that in so far as the measure fulfilled the main objects of its introduction, it would be welcomed by the House generally, but there were details in the Bill which would require some consideration in committee. The Bill was a purely permissive measure, and the principle of contracting out was retained throughout. He thought that the clauses relating to arbitration ought not to be dealt with in this way, but should be compulsory. This Bill and the Agricultural Ratings Act represented the whole of the legislation by the Government in favour of the agriculturists. It was a very poor performance considering the large promises which heralded the advent of the Government to power. He could not help thinking that this Bill would be productive of bitter disappointment when its real character came to be known.

The Earl of Camperdown had no doubt the principle of the Bill would be discussed in detail. The words "inherent capabilities of the soil" were to be left out in considering the value of the tenant's improvements. They were told that the words meant nothing, but their express omission might mean a great deal in a court of law. Their lordships would probably have something to say to the power which the tenant was to have to break up an acre of his holding. It appeared to him that there was to be no limit to this breaking, and that each successive tenant could break up his acre.

Lord De Ramsey thought the successful stand which the Minister for Agriculture had made in favour of stamping out foot-and-mouth disease was worth several Agricultural Holding Bills. (Cheers.)

The Bill was read a second time.

On Friday the House went into Committee on this Bill.

On Clause 1, which deals with the right of a tenant to compensation for improvements,

Earl Grey moved an Amendment providing that in estimating the value of an improvement there should not be taken into account, as part of the improvement made by the tenant, what was justly due to the inherent capabilities of the soil.

After some discussion, the Amendment was carried, on a division, by 50 votes to five.

Lord Windsor moved an Amendment to Part 1 of the first Schedule. The Bill provides that improvements to which the consent of the landlord is required shall include the making and planting of osier beds (exceeding one acre). The Amendment was for the omission of the words "exceeding one acre."

Viscount Cross opposed the Amendment.

On a division, the Amendment was carried by twenty-two against fifteen.

The Bill then passed through Committee, and the House resumed.

House of Commons

Electricity and Potato Growing.

Mr. Austin asked the Vice-President of the Department of Agriculture for Ireland if he could now state what were the results of the inquiry promised regarding certain experiments made by Mr. O'Sullivan, of Athea, county Limerick, in the improvement of the potato crop by the introduction of electricity through lightning conductors distributed through the crops by means of wires, by which it was stated that an increase of 80 per cent. was shown.

Mr. Plunkett said a departmental inspector had made inquiries as to experiments in question, but they were too limited to warrant any conclusion. Similar experiments on a larger scale were in progress this year, and they would be watched with interest by the Department.

A thunderstorm of a very severe character broke over the Isle of Wight last week. Ten fat steers, a pedigree Jersey bull, and a pedigree Jersey heifer, grazing in Godshill Park, were struck by lightning and killed.

The Duke of Devonshire on Education and Agriculture.

The Duke of Devonshire, Lord President of the Council, on Wednesday afternoon attended the annual prize distribution at the Countess of Warwick's Secondary and Technical Science School and School of Agriculture at Bigods, Dunmow, Essex.

In the course of his address, the noble Lord said: Education is a subject which at the present moment is exciting a great deal of attention in all parts of the community of this country. It is not altogether unsatisfactory to see the rivalry which is going on amongst different local authorities on the subject of education; but I am afraid that one aspect of the question—the fear of losing the influence and authority that they already possess, and the desire of obtaining more—tends more and more in our educational discussions to obscure the question of what are the real interests of education. I understand the managers of this school recognise the County Council of Essex as their supreme local authority, and I believe the County Council of Essex, which has distinguished itself in many ways in the promotion of education, take a warm interest in the welfare of the school. This is an experiment of a most interesting character, being one for the establishment of a secondary and technical school, which is also a school of science, in the very heart of an agricultural district, and a district which, I am afraid, is deplorably agricultural indeed. Rural districts are not generally credited with an over great zeal in the cause of education. Most of you are personally acquainted with the Vice President of the Council, Sir John Gorst. (Laughter.) I think he has paid more than one visit to the school. Sir John Gorst is a statesman who takes a very deep and a very warm interest in the subject of education. (Laughter.) I do not think he is at all indifferent to the interests of the agricultural community, whether of the landowner, the farmer, or the labourer. But Sir John Gorst, not very long ago, got himself into very hot water by a statement which he made in the House of Commons, that the squire and the farmer were not, generally speaking, friends to education. Well, there is a French proverb which says, "Every truth is not a good one to speak," and, perhaps, Sir John Gorst might have been more desired if he had concealed his sentiments and opinions. (Laughter.) But there is, I am afraid, a good deal of foundation for what Sir John Gorst said, and it is very little good abusing him for his outspoken opinion, or abusing the farming class, if there is any foundation for the assertion he made. It is more useful to consider, if it be the case, what is the reason that it should be so. Is there any reason why farmers, speaking of farmers as a class, should be very warm friends of a system of education as it has been carried on up to the present time? (No.) People's friendships and sympathies generally coincide to a great extent with, at all events, do not diverge very far from—their interests, and what has the effect of education been, so far as we know at present, upon the interest of the farming class? The farmers generally see that

The Effect of Education

which is given in our rural elementary schools is to induce the cleverest, the brightest, and the most energetic of our boys and girls to leave their villages in the country and to seek for other occupations in the great towns. My own experience in my own part of Derbyshire is that all the best boys, when they leave school, want to go into the service of a great railway company, and that all the girls want to go to be dressmakers and milliners in the great manufacturing towns of Lancashire. I have nothing to say against railway service, which is a great and noble service, and I do not wonder that many of our best boys should want to obtain the opportunities for advancement which that service affords them; but I do think that a great many of our best educated girls would do a great deal better to remain at home and qualify themselves to be farmers' wives, or to take part in the management of the dairy, the garden, and the orchard, than to mew themselves up in stuffy workshops in great manufacturing towns. (Cheers.) I have no doubt your experience in this purely agricultural county has been very much the same as mine. The rural elementary school has been chiefly instrumental in depriving the farmers of those whom they might have expected to be their best and most competent assistants. Recently a very important and influential Committee has been formed, consisting of members of Parliament and others interested in the cause of education, whose object is to give the education a new direction, which shall tend to counteract this tendency, and the object of which is to make the instruction in elementary schools more suited to the wants of an agricultural population. At the instigation of this Committee, and partly upon the initiative of Sir John Gorst, the Board of Education have recently issued a long minute upon the subject of the curriculum of rural schools, and giving suggestions and hints how it might be modified so as to adapt the instruction there given more to

The Needs of the Agricultural Community.

The circular is a very excellent one, and contains a great deal of good advice, but it has been exposed to the obvious criticism, and I am afraid to the well-founded criticism, that it comes to the poor who

are capable of giving this new direction to our elementary instruction, and that our existing training colleges are situated mostly in the centre of large towns, and do not give to the teachers that course of instruction which would qualify them for this new direction of education. I turn for a moment from Elementary to Secondary education, and I ask the question—What has Secondary education yet done for the practical farmer? There, I am afraid, I cannot altogether acquit the farming class of some remissness, some negligence in this matter. I do not say that farmers are indifferent to the advantage of sending their children to the best Secondary schools which they can find, but I do say that they have been too much in the habit of sending them to those schools, not for the purpose of making farmers or farmers' wives of them, but for the purpose of fitting them for some other occupation which has nothing whatever to do with farming. It is now recognised—late, but, I hope, not too late, though later than in other countries—that a sound system of Secondary education, with technical education superadded, is the necessary condition of complete success in any industry. (Cheers.) Our Secondary schools in every part of the country have been, and are, in course of reorganisation with the object of supplying these wants. But still this truth, which has been recognised by every other industry, has still found the farming classes indifferent. It may be that, perhaps, we have not yet succeeded in discovering the right class of Secondary schools to meet the necessities of the agricultural interest. I am afraid also that our farmers have not yet realised that discoveries in Science, in Chemistry, Physics, and Physiology, and, above all, intelligence developed in the mind of the student, are just as important to the agricultural industry as to any other industry. We ought not to relax those opportunities which we have made and are still making to so organise our system, both elementary and secondary, as to make it attract rather than repel a part of the best and most intelligent of the rising generation to what is, after all, the largest, the most ancient, and not the least honourable of the industries to which any of our people can aspire. (Cheers.) Holding these views, I need not say that the Board of Education welcome cordially the appearance of this new competition in the field of technical education which has been started with so great prospects of success by the active and intelligent founder, Lady Warwick. (Cheers.)

Agricultural Imports.

The following is an account showing the quantities of certain kinds of agricultural produce imported into the United Kingdom in the week ended July 21, 1900, together with the quantities imported in the corresponding week of the previous year :—

Killed by a Horse.—An inquest was held at Chelmsford, on Tuesday, on the body of Charles Frederick Ashton, a veterinary surgeon and trainer. The deceased, who till recently assisted Mr. Alfred Poole, a well-known owner of steeplechasers and hunters at Chelmsford, was a frequent rider at steeplechase meetings in the eastern counties. He rode at the Tunbridge Wells Horse Show last Friday, and in the evening was violently kicked in the abdomen by a horse at Tunbridge Wells station. Notwithstanding that he received serious internal injuries, he travelled back to Chelmsford in a horse-box, where, on arrival, he was removed to the infirmary, and expired the following day. A verdict of "Accidental death" was returned.

BARLEY AND MALT.

By Hordeum.

Weather Influences.

The effect of the hot, dry, ripening weather just at the edge of harvest is usually good for barley. A good deal has been said and written of late years about the character given to barley when malting, and some part of it has been called by the undesirable or ugly name "maturation." The mode of reaching maturity, and the actual condition left in the grain depends primarily upon the weather, but also, to a very large degree, upon the skill or otherwise with which the ripe grain is cut and garnered.

Probably the weather is alone responsible up to the actual cutting, and as in many districts harvesting will not begin just yet, the time for human intervention has not arrived. But it will very soon be with us, and the exceptionally fine, bright, sunny weather has already produced a fine crop of croakers. Because on a few poor, hungry spots of ill-cared for light sand and gravel soils the grain has gone off too quickly, we already see in the papers alarming notes of

Harm to the Barley Crop

and other nonsense.

Now, it has to be a very strange summer that just suits every crop on every soil. It is almost inevitable that we have some places unduly favoured, whilst others have some of the crops ruined. Even in single counties there are commonly some districts very differently placed to others only a short distance away. It is not unusual to find the barley in East Suffolk looking very unlike that grown in the Western division, whilst it very rarely happens that both the East and the West sides of our Islands are equally lucky. Very few living men have seen a season approved of and liked equally by growers or maltsters in Norfolk and Somerset.

The former county promises thus far to do better this year than it has done for several seasons past. On good land the heat has done nothing but good, and the rains have descended in a nice way just at the right time to make it possible for our premier barley county to

Win Back Its Reputation

for superfine malts. Everyone may rejoice if this should prove true, and, in any case, it is absurd to suppose that we shall not see this year some very fine sample of home-grown grain.

Careful and intelligent handling of grain in mow and stack will make a very material difference to the final result, whilst intelligent appreciation of the beautifully seasonable weather we have enjoyed in a very critical fortnight will do much to keep the market criticisms within bounds.

Already we have seen far too many gloomy predictions of evil, but it is never good to meet such troubles half-way. Interested parties to whom bad reports mean reduction in prices can make mountains out of molehills just as readily as hop merchants in the good old days could start a score in the Borough with three flies on a hop-leaf.

But the bulk of our barley land is

In Good Heart,

and it should put growers into god heart, too, to see that for another season at least we can escape complaints of want of sun.

There are sure to be some people complaining of immature ripening, and the consequent harshness or steelyness of the malt produced. Much of this mischief, which is by no means all imaginary, can be obviated by proper action. Perhaps the most important point of all is for growers to refrain from premature cutting, and still more from rushing the unsweated and crude grain into market. The tendency has rapidly grown of late to snatch the better prices with which the seasons have opened. Nothing is so well calculated to give a firm tone to the markets and improve the credit and character of our grain as a little judicious care not to thresh this side of Michaelmas.

Where money is urgently needed the temptation to hurry is great, and unhappily men can be found who should, and in some cases do, know better, contending that

Kiln-dried Barley,

is just as good or nearly so as other similar grain duly sweated in barn or rick.

What actually happens by this particular process has not yet been clearly defined, and no one really knows but it is not rational and does not seem common sense to suppose that a few hours, even if of just the right temperature, can exert the same influence as the steady development of glow in a rick and its long continuance. Putrid game, decaying in a close, hot pantry is a very different thing to well-hung carcases in a suitable place, and still greater difference exists in sound, mellow grain properly conditioned in rick, or when sweated on a single-floor kiln with an outlet ten times too big.

He is a bad friend to British agriculture who does anything to hasten supplies to market with undue haste. Just so he is no friend to the grower or maltster who tries to disparage or deprecate unduly our growing grain. Already our fields are taking on the sweet golden hue that indicates more surely than anything else the prime condition that tells on the quality of our nut-brown October, and brewers make a big mistake against their own interests in trying to send down the price to an unremunerative point of such grain as we seem destined to see once more around us.

THE WEATHER.

MONDAY (July 23rd).—The weather was very fine over the southern portion of England, where the temperature was again high. The sky was, for the most part, overcast or cloudy in the northern and western districts, where slight rain was measured in the morning as the result of the fall in the preceding twenty-four hours. Fog or mist was also prevalent in the west. The temperatures were generally rather lower than on the preceding day, except in the south of England. In London, Sunday night was exceptionally warm, the thermometer at Greenwich not falling below 67.6deg., which is apparently the warmest night in the past fifty years.

TUESDAY (July 24th).—The weather was again very fine in the south and east of England, and the temperature was higher than on any day since last Friday. The sky was generally cloudy in the northern and western districts, and fog or mist occurred at several places on our west coasts. Rain was measured in the morning, as the result of the fall in the preceding twenty-four hours, in the north and north-west, but the amounts were small. The winds were mostly light from the south-west. The temperature in London did not fall below sixty degrees during the night, and during the day the shade reading registered eighty-eight degrees.

WEDNESDAY (July 25th).—The heat was very great again in London, the thermometer registering ninety-three degrees in the shade in the southern suburbs, which is as high as any reading during the present hot spell, and is the fourth day on which the shade temperature has exceeded ninety degrees. The sun was shining continuously throughout the day, and the heat was intense in the sun's rays. In parts of Scotland the midday temperatures failed to touch sixty degrees, and over the northern portion of England the weather was by no means hot. Tuesday night was again very warm in London, the thermometer for the sixth night in succession keeping above sixty degrees; in parts of England the night was even warmer. Rain had again fallen at several places in the north, and fog was still prevalent on our west coasts.

THURSDAY (July 26th).—The weather was still very fine over the greater part of our islands, although, as so often of late, the conditions were less settled in the north than in the south. There was, generally, more cloud than of late, and the air was cooler, although the temperature was still high for the season. Rain was measured in the morning in Scotland as the result of the fall in the preceding twenty-four hours. Wednesday night was very warm, the thermometer in many parts of England not falling below sixty degrees. The midday temperature in London was eighty-one degrees, which is twelve degrees cooler than the previous day, but the daily mean temperature was ten degrees in excess of the average.

FRIDAY (July 27th).—A sharp thunderstorm occurred in London in the afternoon, and it occasioned a considerable fall of temperature. The highest temperature was seventy-eight degrees, at noon, and in about four hours the thermometer stood ten degrees lower. The storm was very prolonged, and was accompanied by rain, which is the first appreciable fall for twenty-four days. The weather was generally cooler than of late in other parts of the country, and it was only in the Midlands and in the South of England and Ireland that the thermometer touched seventy degrees. Rain was again measured in the morning, as the result of the fall in the preceding twenty-four hours, at some of the northern stations, but elsewhere the weather had continued dry. Thunderstorms occurred at several places in the South of England. The wind was easterly in England and Ireland, and it was blowing freshly on our south coasts.

SATURDAY AND SUNDAY (July 28th and 29th).—The weather continued somewhat unsettled, and the temperature was generally lower. The heaviest rainfall accompanying the thunderstorms at the stations in England reporting to the Meteorological Office occurred in London, and the fall in different parts of the Metropolis varied considerably. The rainfall measured on Sunday morning for the preceding twenty-four hours was not heavy, and it was not general. Thunderstorms were experienced again on Sunday in the east and south-east of England. In London Saturday was fine, but slight thundershowers occurred on Sunday afternoon and evening. The highest temperature in London touched seventy-six degrees on both days.

HOPS.

By Lupulin.

Home Notes.

In the Borough.

The business of the past week provides but little material for comment, as although there is a fairly steady demand for hops of last year's growth, values have not improved to any noteworthy extent, and the position of affairs remains about the same, as I have several times reported. Some critics profess to be able to discern a little tendency towards weakness in prices, attributing this to the action of certain growers, who are now more willing to sell than they previously were. But I am not able to confirm this view, as I am informed that such transactions as have been completed are settled at rates fully on a par with previous quotations. Of course, the attention of all concerned is concentrated upon the plantations, and estimates are now being put forward as to the probable yield of the new crop, these varying from £150,000 to £200,000 old duty. In support of these various ideas, the somewhat contradictory report received from the country are confidently quoted, but from what I can gather, I believe the opinions of the most careful and experienced observers tend towards a higher average than 7 cwt. per acre, or a total of about 350,000 cwt. If this be realised it will not be much below the average given in the official returns for the ten years preceding last year, and considering all the circumstances of the situation, it appears likely that the final results will not be very different to this anticipation. At any rate there is sufficient uncertainty in all estimates based upon present prospects to induce a pause in the course of business, and many of our traders and their clerks are taking advantage of it, in absenting themselves from their offices and enjoying their holidays amidst more attractive surroundings than the Borough can furnish.

Signs of mourning during the past week gave evidence of the universal regret with which the tidings of the death of Mr. Alexander Horsley had been received. The deceased gentleman was the senior member of the well-known and much respected firm of hop merchants whose place of business has been established for many years in the Borough High Street. He had suffered from a very painful affliction for many months, and passes from his career of active integrity amidst the sorrow of all his comrades in the trade.

The Progress of the Growing Crop

can, I think, be accepted as being as favourable as the exceptional circumstances which have characterised the season will allow. There is no doubt that plantations provided with deep soils, which have been studiously cultivated and in which the bine has been persistently worked, have benefited by the spell of hot weather, and that such growths (if nothing unforeseen occurs) will grow out and will produce fairly fruitful crops. But I fear these are in the minority, and that too many will be found at the finish to be sadly deficient, having been enfeebled by the cold spring, by want of usual attention, and having, therefore, become an easy prey to the exceptionally severe attacks of aphis blight, by which all are more or less damaged. "St. James's day has come and gone"; there will be hops and there will be none, according to the condition of each garden. In this there is so much and so marked variety that it is very difficult to generalise the actual position. But we may safely assume that we have now arrived at the period when for good or evil the final issue is practically decided. The burr is now generally breaking out, the extent of the lateral growth can now be valued, and no further material change can take place, except, perhaps, in the direction of deterioration, which we all trust may be avoided.

Mr. W. H. Tompsett, of Tonbridge, writing to the *Worcester Journal*, takes a very pessimistic view of the prospects in Kent. He objects to the glowing reports which have appeared in two of the leading dailies, describing them as "false and misleading," and he says that "where washing was not resorted to early the grounds are now in an utterly hopeless condition. Many a one will not get a bin put in them," adding that the bulk of the gardens are slack of bine and have no vigour, and that he estimates that his district, which is one of the finest for cropping, will hardly grow more than one-third of last year's yield.

There is much truth in Mr. Tompsett's remarks, and although they may be counterbalanced to some extent by the more satisfactory experience of growers in other districts, it cannot be denied that there are too many plantations whose present condition would justify the banishment of hope concerning even a moderate average crop.

I have not yet heard what have been the results of the thunderstorms which have visited every part of the country during the last three days. The heavy downfall of rain which we have welcomed in London and the suburbs has doubtless been also experienced in the hop growing districts. I suppose it cannot fail to have been beneficial, unless it has been accompanied by hail, of which we have had some symptoms. I trust I shall be able to report favourably next week of the effect of this important atmospheric change, hoping also that all the advantages climate can give may be at the disposal of planters during the remainder of the season of growth, and that remunerative quantity and excellent quality will ultimately reward their anxiety and their exertions.

Foreign Notes.

Nuremberg.

Business in 1899 hops is sufficiently active to uphold the firmness of the market, although the small amount of arrivals and the reduction of stocks necessarily limit the volume of trade. Slowly but surely values are advancing; therefore present quotations are only nominal, and consumers are beginning to look anxiously forward for the arrival of the new crop, early samples of which will soon be forthcoming if the hot weather continues.

Approximate Prices

at Nuremberg are as follows for best available qualities:—Marktwaare, 90s. to 100s.; Hallertaus, 112s. to 120s.; Wolnzach, 120s. to 130s.; Spatt, 125s. to 130s; Saaz, 145s. to 155s.; Wurtemberg, 110s. to 120s.; Baden, 105s. to 115s.; Alsace, 95s. to 100s.; Polish, 95s. to 100s. Lower selections in proportion.

The Crop Reports

vary somewhat according to the districts from which they emanate, and are generally favourable in Bohemia, Wurtemberg, Baden, Russia, and Poland, while the prospects are very uncertain in some of the principal Bavarian centres, and in Alsace and Burgundy. Progress in growth is generally evident, and it does not appear that any serious hindrances exist to the further development of the plant, but the consensus of opinion with respect to the final results seems to have decided that anything approaching the yield of last year can hardly be expected. The period of ingathering is now so near that very little material change in general conditions can take place. The well-cultivated and strong grounds will continue to develop to the fruiting, if no unforeseen accidents occur, but the weaker districts will have no opportunity for recovery, and the growers must perforce be content with but small crops.

Belgium

The condition of the plantations has not generally improved to any important extent. The fly attack has not been entirely dissipated by the hot weather, and although some progress is evident throughout the Alost districts, the reports from Poperinghe are far from satisfactory. Grounds that have not been washed are looking very sickly, and can only produce a very poor crop, and taking a review of the probable Belgian yield as a whole, it is not anticipated that more than half of an average harvest will be finally available.

The effect of these reports and estimates upon the market is not so evident as might be expected. Important contracts have been concluded for 1,900 growths as high as 105 francs, but growers have since become less exacting in their demands, and some have recently come forward with offers to contract for October-November delivery at 85 francs. The future is, therefore, still open to speculation, but the trade in the small stocks remaining from last year is already at 65 to 70 francs, at which rates a fair business is passing.

America.

The American Agriculturist says that "inquiries made in every important hop-growing county of New York and the Pacific Coast point to an unquestionable shortage in the acreage now growing, and fair but not brilliant crop development. On the Pacific Coast vines as a rule are healthy and in excellent condition, but there is some complaint of insect pests, particularly in Oregon. In New York State growth of vines is uneven, in some yards heavy, in others poor and not arming well; considerable complaint of insect pests, but not enough to jeopardise the crop as a whole. The hop area in N.Y. State is considerably less than last year, reports ranging from 15 to 30 per cent. perhaps averaging 20 per cent. reduction."

The *Waterville Times* says:—"The showers this week have brightened up the yards very much, and the vine is doing well. The recent wind storm did not do very much permanent damage about here, and everything is so far favourable for a small crop of good quality hops."

Of the outlook in Schoharie the *Index* says:—"The fine promise for hops, in form of thrifty vines and long and abundant arms, has now been somewhat disturbed by the storms, which have rendered much damage in some sections."

Observations in Western Washington bring reports that the crop will be much lighter than in 1899. The current prices for contracts range on the Pacific Coast from 9 to 11 cents, and some transactions have gone through in New York State at 12 to 12½ cents. These figures appear to suggest a much better market when new hops are available than is found at present. In the meantime dealers are holding their stocks firmly at unchanged rates, which are represented by 13 to 14½ cents for choice, and lower qualities in due proportion. Home demand is comparatively slow, and export trade from New York is reported

Plantation Reports.

Special to the Secretary N.A.E.H.G.

WATERINGBURY.—Bine [illegible] generally improved last week. Blight [illegible] and in some gardens mould.

DITTON.—Bine generally good, but now growing well. Continuous washing [illegible] but there are still some lice. A good deal of mould showing in some plantations. Crop not [illegible]

EWHURST.—Gardens that have not been washed are still full of vermin, and only a few of the best grounds show an improvement.

BURWASH.—The bine has certainly made some progress during the week in the best cultivated gardens, and where washing has been persevered in. Vermin still infests badly cultivated places, and the unwashed grounds are going black, so that very few hops can be grown in them. The crop will be short even in the best gardens.

CANTERBURY.—The hot weather has relieved some quantity of vermin, but it is difficult to find a garden perfectly clean. Fresh depredations at the top of the poles and strings, so that constant washing is essential. Growth has improved except in neglected grounds, in many of which the bine is turning black. Many acres are quite hopeless, although the laterals are coming strong and healthy in the better gardens, the general outlook indicating about half of last year's crop.

BRENCHLEY.—In well cultivated gardens hops have improved lately, but plenty of grounds are short of bine. Not much mould, but vermin [illegible] hard, and washing still going on. The general outlook is indifferent.

FAVERSHAM.—Hops growing fast with few lice and little or no mould, the weather just suits them, but too much heat without rain will probably bring some red spider. On account of slack bine the crop must be much less than last year.

BIDDENDEN.—The best gardens are making progress, and laterals are coming out well, though we have some grounds that once gave good promise that are now going back owing to the persistent lice. The poor grounds cannot recover. Red spider has appeared, and the parish generally looks like producing from five to six cwts. per acre.

ASHFORD.—The hops in this district have been very backward and much troubled with vermin, and where not relieved soon enough are practically gone. The outlook for them is not more than three cwt., as leaves are all dropped. Vermin and red spider abound, and we are obliged to keep washing. In my opinion, based on thirty years' experience, the general crop cannot exceed five cwt. per acre if, indeed, it will reach this point.

WADHURST.—Our hops are still suffering from the damage done by vermin. Where well washed and cultivated, plantations look fairly well, but the reverse is found where there has been any neglect. Earlies are showing burr; rain would be very welcome.

MAIDSTONE.—Many of the gardens have been much improved by the hot weather, but though the bine has grown the vermin are still to the fore. Laterals are coming on fairly well, but washing must still be continued or we should soon see a backward movement.

SHOREHAM.—Where the bine has been left too long without washing it is turning yellow and looking very sickly. Grounds that were washed early and constantly are improving under the influence of the hot weather, but in most gardens the vermin clings to the tips of the laterals. The general prospect for the crop is not encouraging.

MIDHURST.—Hops hereabout are in a more critical condition than I can remember at this period of the season. Even the washed hops may yet be lost, and the unwashed are already hopeless.

ROBERTSBRIDGE.—It is rather difficult to give a correct description of the condition of the plantations in this district, as these [illegible] so varied. Some of mine are looking well, while others are far from satisfactory. I think there are gardens in the neighbourhood which will be hardly worth picking, and others will give a [illegible] yield. We cannot get rid of lice and the [illegible] red spider. Our average [illegible] small.

THE FARLEIGHS AND DISTRICT.—The [illegible] have freshened up the bine, but the hailstorm did some mischief, and some grounds were quite strewn with leaves. By constant [illegible] the vermin is less, still aphis may be found and may yet get into the hop later on and do mischief. Mould on the leaves can be found in most grounds, but in the Bramblings, now [illegible] many mouldy burrs [illegible] Picking will commence about the usual time. Some [illegible] be about the date unless the [illegible] should continue; [illegible] in some grounds has been very much neglected in consequence of the [illegible]

LEDBURY.—The [illegible] most of the [illegible]

**All official reports and notices of the National Association of English Hop Growers will be printed in the* MARK LANE EXPRESS, *which will also contain all current information likely to be of interst and benefit to the members of the society*

badly attacked by blight in spite of repeated washings. A good many grounds are in a hopeless condition, and only those growers who have persisted in washing and cultivating will grow a crop. No mould has yet appeared, and I should say that what hops are grown will be free from mould.

LEDBURY.—The condition of our hop plantations has undergone an unfavourable change, owing to the unprecedented attack of blight, which, according to the observation of many, is the most persistent that has been known for twenty years. Unless a change for the better takes place soon, the crop must be much under an average.

WORCESTER.—The great heat has tried the stability of all the badly cultivated yards, and they have been also deprived of vitality by the persistent blight. Many of them must be a total failure. The best yards are doing well, blight having been banished by washing, and burr is appearing on the earlies. The crop on the whole will be disappointing.

(*For Hop Market Reports, see pages* 143, 145.)

Kent and Sussex.

Sir,—I hope none of your readers are misled by the reports which the "learned ignorance" of certain so-called correspondents induces them to send to some of the daily papers. One day last week I read in a morning paper (which shall be nameless) a glowing forecast of the coming crop, for which it was declared the prospects are excellent. Seeing that the hops are only just coming into burr, this optimism seems "a little too previous." I once heard a large grower and a judge of exceptional experience and knowledge say he never attempted to form any judgment about the hop crop till the first or second week in August, and it would be well for newspaper readers in general to bear this in mind, and avoid being led away by delusive reports, which may either be written for a purpose or because the writers don't know better. It is quite true that during the recent forcing weather hops have made good progress, but even now they are not exactly in an ideal condition. They have had to struggle against adverse weather during the greater part of the growing season, besides having to resist virulent and persistent attacks of fly and lice, to say nothing of the various other ills to which the plant is well known to be subject. Despite repeated washings the insect pests are still far too much in evidence. Though there are exceptions, in most grounds there is a slackness of bine, and in not a few cases this failure is strongly marked; and, moreover, in many instances the general appearance of the plants is not as healthy and vigorous as could be desired. Nevertheless, there is certainly more promise of a crop than at one time appeared probable, and *if* all goes well till picking time a fair yield may be gathered; but this "if" should be writ large, as there are many contingencies that yet have to be faced. A good soaking rain would now be welcome, as would also a thunderstorm, provided it is unaccompanied by a damaging torrent of ice such as reports tell us has fallen in some parts of the country and inflicted very serious injury to the growing crops. The outlook is undoubtedly better than it was a month ago, but growers are by no means "out of the wood" yet, so it would be well to suspend the shouting a little longer. In the meantime I think it would be well not to indulge in anticipations of anything beyond an average crop, even if the average should be reached. But, as I have already remarked, it is yet too early to venture on the expression of a confident opinion. Picking will probably be a week or two later than usual. MID-KENT.

July 24th, 1900.

COMING SHOWS.

Wirral and Birkenhead.

The fifty-eighth annual show of the Birkenhead and Wirral Agricultural Society will open on Friday next, and will continue over Saturday and Monday (Bank Holiday). Although, in consequence of the show extending over Sunday, many classes have this year been deleted, the exhibition will be thoroughly representative. The stock section will eclipse anything previously achieved in the annals of the society; the liberal increase made in the prize list account for this, as many leading exhibitors, who have hitherto never patronised the show, have this year signed entry forms. Some nine entries from Ireland have been received for the horse-leaping contest, besides the champion leapers of this country. Many of the finest exhibits at the Royal Lancashire Show, held this week at Rochdale, have been entered for Birkenhead's exhibition, the Hon. Victor Cavendish, M.P., Earl Egerton of Tatton, the Marquis of Anglesey, and the names of several other noted Shire horse breeders being included in the list of entrants. At the yard the arrangements are now well-nigh completed, and the ground is in the very best condition. A field of considerable size adjoining the show ground has been acquired, and this increased area will tend to prevent the unpleasant crushing which has sometimes taken place in the past, and where the old dining saloon formerly stood a large stand for the accommodation of cycles will be fixed, as well as an additional parcels office. In this newly-acquired part of the show ground, the sheep, horticulture, honey, dogs, poultry, and pigeons exhibits will be staged, and in the centre of this piece of land the dining tent will be erected. The ladies' tea tent and cloakroom have been considerably enlarged, and close to the bandstand a fruit stall has been built. Around the bandstand chairs will be arranged for the accommodation of visitors, and numerous garden seats will be provided at suitable intervals of distance throughout the yard.

Figures about the Birkenhead show are always interesting, and those which follow are no exception to the rule. It should first of all be mentioned, however, that whereas there were last year 743 classes, this year there are only 444. This decrease of 300 classes has mainly taken place in the dog, poultry, and pigeon sections, and in consequence thereof the total entry is 3,250 against 6,100 last year. The fact that on account of the prevalence of swine fever there will this year be no class for pigs should also be noted. The following are the entries in the various sections as compared with 1899:—

	1900.	1899.
Sheep	62	36
Cattle	110	108
Horses	515	491
Pigeons	963	1680
Poultry	559	1223
Dogs	242	1547
Cheese	17	58
Butter and Eggs	90	114
Honey	79	115
Stand	105	99

On Friday, the first day, the show opens at 9.30 a.m., and from then until 6 p.m. the price of admission will be 2s. 6d., after 6 and until 8 o'clock the charge will be 1s. The admission to the grand stand will be 2s. 6d., and to the open stand 2s. Throughout the day on Saturday and Monday the price of admission will be 1s. On the Saturday the charge for the stand is 2s., and the open stand 1s. 6d., and on Monday the admission to the grand stand will be 1s. 6d., and the open stand 1s. Season tickets for the grand stand (available for each day) are 4s. 6d., and the open stand 3s. 6d. Season admission tickets to the show (available for each day) are 4s. Children under twelve years of age will be admitted at half-price. Tickets and any further information may be obtained from the secretary, Mr. Arthur H. Edwardson, 6, Hamilton Square.

Contagious Diseases of Animals.

NOTE.—The figures for the current Year are approximate only.

The Grimsby borough justices on Thursday, fined Violet Snowden, a butcher, of Fulstow, £30 for exposing bad beef for sale in the Central Market on June 9th. There were three previous convictions against the defendant, who was warned that if he offended again he would be much more severely dealt with. Wm. Bennington, who was found selling meat from the same carcase on the 9th June, was fined £5.

"Mark Lane Express" Diary.

August.

1. Adlington (Cheshire) and District Agricultural Society's Show, at Adlington Park.
1. Bridlington Agricultural Society's Show.
1. Burton-on-Trent and District Shire Horse Society's Show, at Burton-on-Trent.
1. Wadebridge District Agricultural Association's Show, at Wadebridge.
1. Sale of Mr. E. Ecroyd's Shorthorns, at Low House, Armathwaite, Carlisle.
1. Sale of Hackneys, the property of Mr. W. Lloyd, at Heaselands, Hayward's Heath.
1. Sale of Suffolk Ewes and Ewe Lambs, at Gippeswyk Park, Ipswich.
1. Sale of Oxfordshire Down shearling Rams, belonging to Messrs. J. and S. Treadwell, at Upper Winchendon, Aylesbury.
1. Ilsley Sheep Fair.
1. King's Lynn Horse and Foal Show.
2. Alford and District Horse and Foal Show.
2. Sale of Mr. C. E. E. Cooke's Shires and Hackneys, at Hinxton, Cambs.
2. Penrith Agricultural Society's Show.
2. Sale of Suffolk Rams, at Gippeswyk Park, Ipswich.
2. Vale of Conway Agricultural Society's Show, at Llanrwst.
2. Shrewsbury Sheep Show and Sale.
2. Letting of Long-woolled Rams, the property of Mr. T. Thornton, at Cavenham House, Wereham.
2. Lytham Agricultural Show.
2. Belper Horse Show.
2. Sale and Letting of Hampshire Downs, the property of Mr. G. Judd, at Concum Farm.
2. Sale of Devon Cattle, Exmoor Horn Sheep and Large Black Pigs, belonging to Mr. C. N. Skinner, at Marsh Farm, Wratton, N. Devon.
3. Cranswick Horse and Foal Show.
3. Lincoln Long-wool Sheep Breeders' Association's Sale of Rams at Lincoln.
3. Kintyre Agricultural Society's Show, at Campbeltown.
3. Sale of Suffolk Lambs and Ewes, at Sutton, near Melton Station.
3. Sale and Letting of Hampshire Down Ram Lambs and Rams, belonging to Mr. Cary Coles, at Winterbourne Stoke.
3. Sale of Shropshires, belonging to Mr. J. Harding, at Norton House, Shifnal.
3. Sale and Letting of Hampshire Down Rams and Ram Lambs, the property of Mr. J. Lambert, at Cambridge.
3. Sale of Mr. J. A. Fielden's Upper Hare Park Flock of Suffolk Sheep, at Upper Hare Park.
3, 4, and 6. Wirral and Birkenhead Agricultural Society's Show, at Birkenhead.
4. Lees Agricultural Society's Show.
4. Huddersfield and District Agricultural Society's Show, at Almondbury, near Huddersfield.
6. Tutbury Shire Horse and Meynell Hunt Society's Show, at Rolleston Hall Grounds.
6. Stamford Horse Show.
6. Chepstow Agricultural Society's Show.
6. Chatteris Shire Horse and Hackney Society's Show.
6. Eccleshill Farmers' Club's Show, at Hillsboro' Park, Sheffield.
6. Gainsborough Agricultural Society's Show, at Gainsborough.
6. Tyneside Agricultural Society's Show, at Hexham.
6. Border Union Agricultural Society's Show, at Friar's Park, Kelso.
6. Waltham Cross and Three Counties (Essex, Herts, and Middlesex) Horse and Foal Society's Show.
6. Ludlow Agricultural Society's Show, at Ludford, Ludlow.
6. Whalley Agricultural Society's Show.
6. Brentnor and Lydford Pony Society's Show, at Lydford Junction.
6. Oxted and Godstone Agricultural Association's Show.
6. Lutterworth and District Agricultural Society's Show.
6. South Brent Pony and Sheep Society's Show, at South Brent.
6. Sale and Letting of Mr. W. C. Young's Hampshire Down Ram Lambs and Rams, at Stratford Sabcastle, Salisbury.
7. Blackpool and District Agricultural Society's Show.
7. Sale and Letting of Mr. Dibden's Hampshire Down Ram Lambs and Rams, at Market House, Salisbury.
7. Sale of Shropshire Sheep belonging to Mr. P. L. Mills, at Ruddington Hall, Notts.
7. Sale of Mr. W. Toop's Southdown Flock, at Westergate, Aldingbourne.
7. Sale of Devon Cattle, belonging to Rev. E. Hensley, at Banghurst House, Basingstoke.
7. Chichester Ram Fair.
8. Badminton Farmers' Club Show, at Badminton Park.
8. Crook Agricultural Society's Show, at Crook.
8. Sale of Sir James Blyth's Southdown Sheep and Jersey Cattle, at Blythwood, Stansted, Essex.
8. Sale and Letting of Southdown Sheep, at Colchester Cattle Market.
8. Astwood Bank Horse Show.
8. Oxford Great Ram Fair.
9. Keele Agricultural Society's Show, at Keele Park, Keele, Staffs.
9. Macclesfield Agricultural Club's Show, at Macclesfield Court.
9. Paddham Agricultural Society's Show, at Pathma.
9. Market Bosworth Agricultural and Horticultural Society's Show, at Market Bosworth.
9. Warrington and District Agricultural Society's Show, at Walton Park, near Warrington.
9. Tring Agricultural Society's Show, at Tring Park.
9. Holderness Agricultural Society's Show, at Hedon.
9. Harrogate Horse Show.
9. Sale of Shropshire Sheep, the property of Mr. F. S. Menton, at Montford, Shrewsbury.
9. Sale of Mr. J. A. Hempson's Southdown Sheep, at Erwarton Hall, Ipswich.
10. Ridgmontshire Agricultural Society's Show, at Deighton.
10. Bovingdon Agricultural Society's Show.
10. Sale of Oxford Down Lambs, belonging to Mr. C. S. Fisher, at Kettering Manor.
13. Britford Fair.

Messrs. Richmond and Chandler, Limited, Manchester, agricultural machine makers, have declared a dividend of 6 per cent. per annum on 6 per cent. preference shares, making 6 per cent. for the year, and 7½ per cent. per annum on ordinary shares for the year. They have also added £500 to depreciation, £500 to reserve.

Smith's Advertising Agency, who have for some time past been experiencing the inconvenience of having two addresses, viz., Nos. 132 and 82, Fleet Street, have secured No. 100, Fleet Street, where they will be able to transact the whole of their ever growing business, to the greater benefit of their clients as well as themselves.

FARM PROSPECTS.

Devon (North).

The country generally looks well. We have just finished hay harvest, the crop having been a good one, and well saved; trifolium hay had the showery weather, and was rather damaged. Wheat, barley, and oats all look promising in this part of Devon, and harvest will soon come on.

Winter Oats have already been Cut

in some places. Roots vary a good deal. Mangold about average where not damaged in the earlier stage, some fields are very luxuriant; swedes fair, common white turnips only lately come up; both would be benefitted by a shower of rain. Grass keep has been plentiful for weeks past, but now the pastures on hilly land are looking parched, and rain is wanted for them as well as for the roots. Stock is healthy on the whole, but lambs are suffering from the husk and attacks from the maggot fly. Apples in the orchards are very plentiful.—L. B. G. (July 26).

Somerset.

The hay harvest is practically over; heavy crops have been gathered in splendid condition. Grass for feeding has been plentiful, but on account of the very hot, dry weather for the last three weeks or a month keep is now getting very dry and short. The corn harvest will be in full swing in about a week's time. Some pieces of oats are already cut. Wheat and beans are about an average crop, although some pieces of beans are badly rusted; barley very fine, oats poor. The dry weather has told a good deal on the potatoes, which are not likely to be a heavy crop. Apples, which at one time looked likely to be a fine crop, are, on account of the blight, quite a failure. Cattle and sheep have on the whole done very well, and dairy produce is about the average of past years. There is a capital plant of roots, but in some cases rain is wanted badly. Looking at the season as a whole, it bids fair to be quite an average one.—J. B. July 27th).

Somerset (North).

Well, haymaking is all over for this year, and a good job it is so, for with the thermometer at near 100 it has been hot and thirsty work. Fortunately, cider is plentiful, and that has helped the men to keep going. The crop is an average one and the condition first-rate, so we are secured for some good fodder in the winter. This forcing weather is turning the colour of the corn crops from green to golden, and harvest will be general with us ere this month is out. Root crops hold on wonderfully; it is true they don't grow much, but they mostly hold their own by recovering in the night the flagging leaves of the day before. In this respect kohl rabi growing alongside with swedes, the former shows a marked superiority. These hot winds have fairly taken all the freshness out of the pastures and, as a consequence, dairy produce has fallen off sadly. Enough butter cannot be made to supply the regular customers, and even that has to be made with the aid of purchased ice from the town. We are receiving a better price for this butter and no trouble to sell it, but against this is the reduced quantity and the bill for decorticated cotton-cake, which leaves us worse off than before.

Fruit Trees and Blight.

Fruit trees and bushes of all kinds are covered with blight, and the fruit is falling off in quantity or shrivelling up. We have been strongly advised to go in for a Strawson pump and start washing or spraying with some insect-killing moisture, but, meantime, Mr. Bear's article on fumigation appears in the Royal Agricultural Society's journal, and now we hesitate between the two systems. Should any of your correspondents have had any practice in either of these or other insecticides, it might save endless trouble and expense to have their experiences, so that growers could start fair with the best and cheapest means of combating an evil which must be tackled sooner or later if we mean to keep to the front in quality and quantity.—R. B. (July 27th).

Worcestershire (South).

The intense heat of the past fortnight has done a lot of harm to the crops in this district. The barley has turned off before it had fully matured, and as a consequence will be an indifferent sample. The same may be said of the oats. Wheat is looking well and has every appearance of being a good crop. Beans also, have done well, winter beans and oats are now being cut. A fair crop of hay has been saved in splendid condition, but the pastures are now burnt quite brown and keep is becoming scarce. Apples and plums are falling in huge numbers, swedes are turning blue, and it a standstill, potatoes are dying off, hops are full of blight, and unless rain comes quickly it is a poor lookout ahead.—F. W. K. (July 27th).

Wiltshire.

The very hot, dry weather is much against farm prospects. Roots, according to present appearance, are likely to be a failure except mangels, and they are badly wanting rain. The outlook for sheep farmers is not at all promising, keep being very scarce, and without change in the weather prices will go down. Wheat is the only crop doing well; it is ripening a beautiful colour, but thin on the ground, and will be scarcely an average in this district. Cutting will commence about Monday next. Barley is ripening much too fast; without rain very soon the quality and yield will not be satisfactory. Winter beans fairly good, spring sown not more than half a crop. Oats very poor. Dairy and grazing farmers have had a fairly good season so far, but the prospect is bad, grass being nearly all dried up. Milking cows will require a liberal supply of cake to keep up anything like a fair quantity of milk, which is a serious extra expense. T. P. (July 27th).

Wiltshire.

At present it is most difficult to come to any reasonably definite idea as to the prospects of the present season. The excessive heat and sunshine of the past three weeks has come as a surprie to most of us, and there can be no doubt that it has been of very great value to all corn crops, strengthening the plant, developing the grain, and making the prospect of an early harvest more assured than could at one time have been deemed possible. There is, however, reason to fear that the sun has been too powerful for barley and oats, causing premature ripening. Some oats gathered to-day indicate this. Speaking generally, corn is looking well, but far from a heavy crop. Wheat-cutting will commence in about a week. Rye, winter oats, and barley are now being cut.

Root Crops are Trembling in the Balance.

There may be a good crop, for notwithstanding the determined onslaught of the fly, there is a fairly level and strong plant. There has been great difficulty with the hoeing. The charlock being strong and troublesome, one realises more and more what a pest it is. If it was not for the charlock, vigorous horse hoeing down and across the drills would suffice fairly well for summer roots such as rape and turnip. As it is, much of the sheep feed presents an appearance far from pleasant to the farmer accustomed to seeing crops clean and well hoed. Cattle and sheep are doing remarkably well. Prices are mysterious. Bread 10d. and 11d. per gallon loaf, with wheat at an Imperial average of 29s. per quarter. Mutton and beef sell well, yet stock sheep at Salisbury Fair realised from 1s. to 2s. per head only over last year's very bad prices. One feels, however, that unless the drought becomes very persistent the trade in store sheep must improve. As to hay, some of it is fairly good; a great deal very middling, none very bad. Altogether the only thing possible to say as to agricultural prospects is, "There is a prospect." Let us hope for satisfactory fulfilment.—J. B. (July 27th).

Worcestershire.

The grass crops in this part are about an average, and gathered in good condition when cut in time, but a considerable quantity is still to cut, and has gone brown, being over ripe, and will make very indifferent hay in consequence.

Root Crops

are not at all good, having been sown two and three times over, and the weather being so dry the fly was too much for them; soaking the seed seemed of very little use in preventing the fly from eating them.

Not Much Corn.

The oats and barleys are thin, the wireworm being so destructive, and the spring being so dry nearly cleared some fields. The wheat is the best crop, probably, but straw is rather short all round, and corn will be under the average.

The Hops

vary much; some are fairly good, but the bulk are very light in bine, and the average will not be more than a third of last year just around here, and this very hot weather is too much for the weak growth; some showers may help them should we get them at once.—W. H. (July 26th).

Foreign Prospects.

FRANCE.—The wheat harvest, being practically concluded in the south, is now in full blast in the central and metropolitan departments; consequently the markets are deserted and will remain without interest until new samples can be shown in appreciable quantities. The quantity of the crop will be much under that of the last two seasons, but the quality is expected to be fine, and suitable weather has certainly added to the output.

SPAIN. According to an official report a big wheat crop is expected this year. Last season's yield amounted to about 11,700,000 quarters, but this year the estimate exceeds 14,700,000 quarters.

ITALY.—According to the estimate of the Minister of Agriculture, this year's wheat crop will possess an import of 3,000,000 to 4,000,000 quarters of wheat, or about the same quantity as in the previous year.

BELGIUM.—Weather continues hot and fine cutting of rye and barley is being carried on in suitable conditions, and that of wheat will quickly follow.

HOLLAND.—Nearly all the barley and rye have been cut, and some injury to the grain was caused by thunderstorms and heavy rain. Wheat presents a favourable appearance. Pease appear to have suffered from hail and insects.

GERMANY.—The prevalence of very hot weather having naturally improved the crop outlook. It now appears from the Government returns for mid-July that present conditions of all cereals and of potatoes, too, compare favourably with the estimate of former years at this date, but it remains to be seen how quantities will work out.

HUNGARY.—The very warm and dry weather has been propitious for harvest work, and cutting for the most part may be considered as ended. The grain has been rather rapidly carried as farmers after the heavy storms of the previous week were anxious to place their cereals in security.

AUSTRIA.—Harvest is in full swing and in the south, the winter wheat gives satisfactory results. Barley has suffered from too much moisture. Oats stand very well, and maize promises a favourable yield.

RUSSIA.—In the aggregate, advices respecting the harvest are mainly favourable, but efforts will not be made with confidence until the crops have been safely carried and put beyond the reach of damage.

UNITED STATES.—The *Commercial Price Current* says, excepting in portions of Kansas and Nebraska, maize gives excellent promise, indicating a full average out-turn or better for the entire crop. Wheat harvesting and threshing are interrupted by rain, but indications support an estimated yield of 550 million bushels with Pacific States included. *Broomhall.*

North Scotland.

We give to-day our usual review of the condition of the crops between the Dee and the Orkneys, an area comprising nine northern counties in Scotland. Not for a number of years have we been in a position to present an account of prospects so bright as are at present in the experience of farmers in the north of Scotland, the leading fact of the position being that in the case of not a single crop can anything be said but words of brightness and thankfulness. To give an idea of the respective importance in the different counties of the various crops the following table, which refers to 1899, may be useful:—

	Brly. & Bere. Acres.	Oats. Acres.	Potatoes. Acres.	Turnips Acres.
Aberdeen	29,415	184,478	7,446	90,003
Banff	10,504	46,874	1,099	22,059
Elgin	14,432	[illegible]	1,677	15,656
Nairn	3,447	5,491	317	4,252
Inverness	7,502	30,051	5,946	[illegible]
Ross	12,853	29,[illegible]	7,559	16,183
Sutherland....	1,387	7,[illegible]	1,071	3,088
Caithness	1,257	33,758	1,724	13,864
Orkney.....	4,600	33,[illegible]	2,722	14,591

Barley will be a full average crop. By heavy rains some of it has been lodged which may affect the quality of a small portion of it, but all over the crop must be described as excellent and promising at present a full return. In some high-lying districts there seems to be a smaller breadth under the cereal than has been the case for some years. The same language has to be used in describing the oats. The crop is at present healthy and vigorous and shows the fine dark and wide blade which speaks of its entirely promising condition. Some reports say, "Oats never looked better," and when that is said by practical farmers—and almost the whole of the reports are from such—the lay reader may gather that under present conditions a bountiful return is expected. After lea the crop is exceptionally good and is somewhat ahead of the crop after turnips, that condition being experienced all over the North. Owing to the cold and droughty spring, harvest is expected to be about a fortnight later than last year, but that will, of course, be governed largely by future atmospherical conditions. Potatoes, which are grown only to a small extent for the market, promise well, although they are somewhat late. Turnips offer a great contrast to their fortunes of last year. Certainly there was in some cases resowing through drought and the attacks of "fly," but that experience was quite uncommon as compared with a year ago, and the crop is now in vigorous health, many fields of turnips showing nothing now but an expanse of green. Of this very important crop in the economy of farming in the North there promises to be a bountiful yield, which, with the abundant return of straw that will be enjoyed, practically ensures a profitable feeding season. During the past month or so grass has greatly improved, and a better grazing season than has been enjoyed during that time has not been experienced for years, pasture being most luxuriant, and cattle thriving on it greatly. It is "everywhere knee deep" is the tenor of many reports. The rains have made up the hay crop considerably from the bottom, and on the whole there will now be an average yield, and the aftermath promises to be exceptionally plentiful. *Banff Journal.*

The annual Wool Fair at Kelso took place on Monday in fine weather. There was a considerable number of wool buyers in attendance, and several transactions were reported. Lambs clips sold at an advance of [illegible] per lb., and hogg clips 1d. and rather more per lb. Many [illegible], however, are still disposed to hold out for better terms. A clip of 180 ewes to 40 hogg sold at 14s. 6d.; another of [illegible] ewes to [illegible] hogg [illegible] 6d.; and another of [illegible] ewes to 120 hogg sold at 14s.

CORN MARKETS.

LONDON.

Mark Lane, Monday.—Malt: The slight improvement in the demand noticed last week, is maintained. Barley unchanged. Wheat quiet, without alteration in price. Oats steady. Maize about 1s per qr lower for flat and 9d per qr for round. Flour dull.—NIXON, GOWER, AND CO.

Mark Lane, Wednesday.—Old home grown retains steadiness, and the supply becomes more and more reduced, but country millers respond to the few offers made (chiefly on the local markets) without inducement. Fine white, 32s, and red of similar sample 31s 6d (63lb.) delivered. American descriptions rather easier. No precise deviation occurred in the market for flour, but to treat consumers found no difficulty in naming reasonable terms. The present hot weather, however, only naturally relaxes trade. At this afternoon's meeting the London Millers' Association decided on keeping prices same as Monday last. Town household, 25s 6d ; and whites, 28s 6d per sack. Grinding barley unaltered. Black Sea and American being out of supply, and Persian supplying wants while named at 17s 9d ex ship, 18s ex quay. Inquiries were not too readily entertained respecting American oats, and, apart from excessive arrivals, the tone continued favourable to sellers during most part of the day. Flat maize lost the improvement of Monday last, being, in fact, distinctly lower. Mixed American 19s 3d ex ship, 19s 9d ex quay,

Mark Lane, Friday.—Old home-grown wheat remains in very small supply, and a little new may be submitted next week, quotations being in sellers' favour. An early English harvest is expected this year. Fine white, 32s ; and red of similar sample, 31s 6d (63lb.), delivered. American descriptions about steady at last week's decline. Flour was scarcely mentioned, but while presenting that same listlessness as of late, the market manifested no weakness, although being in favour of consumers. The London Millers' Association made no alteration at this afternoon's meeting Town households, 25s 6d ; whites, 28s 6d per sack. American first patents quoted at 25s 6d to 26s 6d ; second ditto, 23s 6d to 24s 6d. First bakers, 21s 6d to 22s 6d ; and second, 19s to 20s. Australian first patents, 21s 6d to 22s 6d (280lb), ex store. Among feeding stuffs, grinding barley unaltered, with Black Sea and American being unobtainable. Although the demand for oats was again poor, sellers were not inclined to make concessions, apart from the week's heavy arrivals, these having been mostly discounted. Flat maize held for 1½d to 3d advance, the enhanced rates, however, not being maintained. Mixed American quoted at 19s 3d to 19s 6d ex ship, 19s 9d to 20s ex quay.

COUNTRY.

Ashford, Tuesday.—The attendance was small, and not much business was done. Prices generally were about the same as last week, except in the case of flat maize, which gave way about 6d per qr.

Aylesbury, Saturday.—Thin attendance and short supplies on offer. The wheat trade was firm and the business transacted was at late rates. Little or nothing doing in other articles. Wheat, 29s to 30s per quarter.

Banbury, Thursday.—Wheat (white), 29s to 30s 6d per qr ; wheat (red), 28s 6d to 30s per qr ; beans (new), 30s to 32s ; beans (old), 21s to 23s per qr. Very small supply of English wheat, which sells at barely last week's rates.

Bristol, Thursday.—There has not been much trade since our last. At to-day's market there was only a small attendance. Very little English wheat offering, for which more money was asked. Foreign dull at about 6d decline. Barley and maize 3d lower. Oats unaltered. Flour—The continued hot weather affects the consumptive demand.—GRACE BROTHERS.

Cambridge, Saturday.—The wheat trade has been showing a backward tendency during the week, and to-day was about 1s per quarter lower on the week, 29s being the top price. There was a fair attendance at market, but the supply was small. Some new wheat is expected to be on offer next week.

Canterbury, Saturday.—Wheat, limited supply, trade slow. Barley unaltered. Oats firm. Ruling prices :—White wheat, 30s to 32s 6d ; red ditto, 28s to 31s ; grinding barley, 20s to 22s ; white oats, 19s to 21s ; black ditto, 19s to 20s 6d ; peas, 30s to 32s ; tick beans, 30s to 32s ; mazagans, 28s to 29s ; flat maize, 21s to 22s ; round ditto, 26s to 27s per quarter.

Carlisle, Saturday.—Small show of oats in our market to-day. Good demand at last week's prices, 22s to 23s 9d per 336lb. No wheat or barley shown.—THOMAS ROBINSON.

Chester, Saturday.—There were few samples of English grain offering. Wheat remained unaltered, but oats had a good demand, and better prices were asked. Quotations :—Wheat, white and red, 4s 4d to 4s 5d per 75lb ; grinding barley, 3s to 3s 6d per 64lb ; beans, new, 4s 10d to 5s ; old, 5s 6d per 80lb ; oats, old, 2s 8d to 3s per 46lb. Indian corn, 10s 6d to 11s 6d per 240lb.

Chichester, Wednesday.— Fair attendance and quiet market, with little or no alteration in prices.

Colchester, Saturday.—Moderate supply. Wheat quiet trade at last week's prices. Nothing offering on spring corn.—FRANCIS AND CO.

Dorchester, Saturday.—Extremely limited business. English wheat at about last week's prices. For foreign wheat quotations showed but little change on the week. Barley quiet. Feeding stuffs were generally dull.

Glasgow, Wednesday.—There was a small attendance at our Corn Exchange to-day. Wheat and flour continue dull at a decline of about 3d to 6d per boll and sack on the week. Indian corn steady at last week's prices. Grinding beans quiet, but unchanged. Canadian peas, owing to liberal arrivals have declined about 6d per boll on the week. Foreign oats quiet and the turn cheaper. Home oats and oatmeal steady. Barley firm, but quiet. Bran and commonthirds quiet and unchanged. Fine thirds the turn dearer.—GIBSON AND CLARK.

Hereford, Wednesday.—Small attendance. Fair samples of English wheat on offer. Millers were unwilling buyers at last week's prices, and in some instances 1d less was taken. Quotations : Wheat—white, 3s 6d to 3s 10d per bushel ; red, 3s 6d to 4s 8d ; barley, 3s to 3s 9d ; oats, 2s 3d to 3s ; beans, 3s 10d to 4s ; maize, 2s 8d to 3s 2d ; vetches—winter, 4s to 6s ; and spring, 3s 6d to 5s.

Ipswich, Tuesday.—Fair supply of wheat, without alteration in values. Red, 30s per qr, little white being shown. Scarcely a sample of barley was on offer. Oats, slow. Maize, firm. Peas and beans slow. Crops are ripening fast under this forcing weather.

Leeds, Tuesday.—The weather continues very hot. Wheat is steadily held for last week's prices, and there is rather more inquiry, but suitable offers are not plentiful and business is restricted. Maize 3d to 6d lower. Beans and oats, steady.—DUNNS AND CO.

Leeds, Friday. —Little demand for either English or foreign wheats without any change from Tuesday's easier prices, which for ordinary runs were barely maintained. Maize the turn lower. No change in flour, barley, beans, peas, and oats or other feeding stuffs.

Leicester, Saturday.—Fair attendance, with small supplies of home-grown wheats, which met a steady trade at 30s to 33s per 36 stones. Fine oats in good demand, and prices firm.

Lincoln, Friday.—Fair supply of English wheat, Trade slow, at 6d decline. Reds, 28s 6d to 29s 6d ; whites, 29s to 30s. Foreign wheats quiet. Small supply of oats, which made full money. Maize, peas and beans, firm.

Maidstone, Thursday.—Trade to-day very slack ; the oppressively hot weather causes a disinclination to pay much attention to samples or the prices thereof. Wheat moved off in small lots at a little under last week's rates, but holders do not press much, not fearing that any serious decline will occur. Barley of good quality is firm at former cost. Oats a trifle easier, and maize rather cheaper than last Thursday. No change in value of other grain.

Manchester, Thursday.—English wheat can be purchased at a decline of 6d per qr on last Thursday's rates ; whilst foreign descriptions are ½d to 1d per cental cheaper. Flour keeps dull of sale, quotations pretty much as last week, though tending in buyers' favour. Indian corn is easier by ½d per cental. No change is reported in oats, peas, beans, or barley.

Newcastle-on-Tyne, Saturday.— The heat wave here has ended, this morning opening with nice cooling rain showers. To-day's market was poorly attended. Wheat and flour closed inactive, and sales were limited. Flour, 6d per sack down. Feeding stuffs generally repeated late prices.

Newcastle-on-Tyne, Saturday.—At our to-day's market wheat ruled firm at late rates ; Maize steady at last week's prices ; Scotch oats, 6d to 9d per qr. dearer ; foreign steady, with a good demand. Barley, beans, and peas unchanged ; flour easier. —JOSEPH POLLARD AND CO.

Newport, Wednesday.—Wheat rather slow sale, and a little cheaper on the week, owing to fine weather. Maize, 6d cheaper. Barley, oats, and beans unchanged. Flour (fines), 23s 6d per sack.

Northampton, Saturday.—Very small attendance; sellers and buyers alike indisposed to do business ; demand most inactive at about last week's prices. Red and white wheat, 29s to 32s per qr. Oats, beans, and barley very quiet at last week's quotations.

Norwich, Saturday.—Wheat more freely offered to-day, with prices about 6d per qr lower. The weather during the week has been very hot. Harvest operations will be general in about ten days' time. Wheat, red, 29s 6d to 30s 6d per qr, weight 63lbs per bushel imperial. Corn inspector's return for the week ending July 23, 1900 :—Wheat, 1,099, 29s 2d.—J. ARTHUR MILLS.

Nottingham, Saturday.—Wheat in small supply. Trade ruled slow at previous currencies. Oats and beans sparingly represented, and prices in sellers' favour.—ROBERT HUBBLE.

Oxford, Saturday.—Very little wheat offering, and quiet trade at about last week's prices.

Peterborough, Saturday.—A very small market and trade quiet all round, with prices about the same as last week, both for wheat and spring corn. Harvest will begin pretty generally during next week in the district.—THOMAS HILL AND SON.

Plymouth, Thursday.—To-day's market was quiet. Prices for wheat and maize 6d cheaper Barley and oats unchanged from last week.—ORLANDO DAVIS AND CO.

Reading, Saturday.—The exchange was very well attended to-day, and business proved fairly good. The quantity of wheat on offer was larger than at last week's market, but prices did not undergo any material variation from the figures then obtained. Other descriptions of corn sold steadily at late rates.

Ripon, Thursday.—During the week wheat has been very flat, practically nothing being done. Wheat, English, 29s to 30s ; ditto foreign, 31s to 35s ; barley, grinding, 24s to 25s ; oats, 22s to 25s ; round maize, 25s to 27s ; flat maize, 23s per qr ; beans, 11½d per stone.

Romford, Wednesday.—A slow trade at last week's prices. Red wheat made 30s to 31s, and white wheat 31s to 33s per qr. Only a small supply on offer.

Sheffield, Tuesday.—There was again a small attendance, owing to farmers being busily employed in the hay fields, and trade was quiet. No change in the price of wheat, and flat maize rather cheaper. Small Indian corn 6d per qr dearer. No English oats on offer. Quotations : —Wheat, white, 33s to 33s 6d ; ditto red, 32s to 33s per 504lb ; oats, old white, 24s ; ditto old black, 22s per 336lb ; peas, grinding, 28s to 29s ; ditto blue, 53s to 70s per 504lb ; beans, Egyptian, 33s ; ditto, English (new), 31s 6d to 32s per 532lb ; barley, grinding, 23s to 24s 6d ; ditto malting, 27s to 35s per 448lb ; Indian corn, small, 27s to 30s ; ditto American mixed, 22s 6d to 23s per 480lb.

Shrewsbury, Saturday.—A few fields of barley and oats in the earlier districts have been cut during the past week, but the heavy thunder-storms of Friday night will delay further work in this direction. The barley and oat crops have been beaten down in places, but as the grain is now developed—but not ripe enough to be damaged by wet—the good done by the storms to the growing crops generally will outweigh the points scored against them. Markets have been badly attended, and trade has been quiet. No change in the prices of grain has taken place. Flour has moved to a fair extent at a decline of 6d per sack. Millers' offals have experienced an active demand, and a general advance of 5s per ton has to be recorded.—W. L. BROWNE AND CO.

Southampton, Saturday.—Wheat in very short supply, which commanded a firm trade at fully late rates. Barley and maize quiet, unaltered. Oats in fair demand, and the turn dearer. Flour, 24s to 26s. Wheat cutting will be general in this district next week.—FEAR, COLEBROOK, AND CO., LTD.

Spalding, Tuesday.—There was a small supply of all grain. Wheat, 29s to 29s 6d per qr, being fully 6d lower on the week. Oats maintained their price, and beans were slightly dearer. No peas on offer, and there was very little business doing.

Stockton, Wednesday.—There were no samples of English wheat showing. The trade in foreign wheat keeps exceedingly dull on account of the brilliant weather and lower advices from America. Prices were 6d to 9d lower on the week. Maize 6d cheaper. Oats unchanged.

Sunderland, Saturday.—Small show of grain at this day's market. Wheat quiet at late rate. Spring corn unaltered. Arrivals coastwise : Wheat 490 qrs. ; foreign nil.—E. AND F. RICHARDSON.

Taunton, Saturday.—Wheat in very small quantity and prices firm at last week's quotations. Feeding stuffs very slow. Wheat cutting has commenced, and the prospects are fairly good. Barley very good prospect.

Wakefield, Friday.—The weather continues all that can be desired, and the wheat trade remains correspondingly quiet, but there is a steady undertone of firmness, and on the business doing late rates are maintained. Maize, beans, and oats very slow.—DUNNS AND CO.

Wakefield, Friday.—A small attendance at our market this morning. Very little business doing. English wheat rather easier than last Friday, whilst foreign maintains about last week's rates. Maize 6d per quarter lower, other feeding stuffs unaltered.—MICHAEL SANDERSON AND SON, LIMITED.

Wisbech, Saturday.—A small market and little doing. An odd sample or two of wheat sold at about late rates. Reds, 29s to 30s ; white, 31s. Oats scarce and rather dearer, 20s to 24s. Other articles unchanged —JAMES FLETCHER.

Wolverhampton, Wednesday.—There was a very small attendance, and business nil. The following were the quotations :— English wheat was 13s 6d per 216lb ; oats, 13s to 14s ; beans (new), 13s to 14s ; beans (old), 14s to 15s 6d per 196lb ; flat maize, 21s 6d to 22s 6d per 480lb.

Worcester, Saturday.—Harvesting operations have commenced, and a considerable acreage of oats and barley is already cut. The market was thinly attended, and trade very quiet. English wheat, prices nominal. Foreign quiet at steady rates. Barley and maize favoured buyers. Oats and beans unchanged. Wheat, white, 28s to 29s ; red 27s to 28s.

Worksop, Wednesday.—Small attendance and slow trade. White wheat, 28s to 29s ; red ditto, 27s to 28s ; grinding barley, 26s to 28s ; white oats, 21s to 23s ; black ditto, 20s to 22s ; flat maize, 24s to 26s ; round ditto, 26s to 27s 6d per qr.

York, Saturday.—A few samples of Yorkshire wheat offered, which sold slowly at last week's prices. Oats firm. The official average prices of the sales of grain for the week have been :—Wheat, 28s 3d ; barley, 23s 7d ; and oats, 19s per quarter.

FOREIGN.

The Antwerp wheat market has been somewhat inactive Wheat has ripened rapidly in the French country districts in consequence of the extremely hot weather of the last few days. Upon the whole the ears present a good appearance, and the crop will be a better one than was anticipated a few months since. The outlook has also improved in Belgium, Holland, and Germany, but a certain amount of damage has been occasioned in Austria and Hungary by violent storms. A good yield of wheat is anticipated in Bulgaria and Roumania ; the Russian wheat crop is not expected, however, to be at all above an average. The French country markets have been rather thinly attended, farmers having been a good deal occupied with field work. Wheat quotations have been nearly maintained, but the tendency has been slightly downwards. A fall of 2½d. per quintal has been noted in wheat at Paris. Flour has also exhibited a dull tone in the French capital. The supplies brought forward upon the Russian provincial markets have been comparatively limited of late ; on the other hand, millers have shown no eagerness to make purchases. The tone of business has been rather dull in the Baltic ports ; the wheat trade has also been inactive at Odessa and the southern Russian ports. Holders of wheat have not abated their pretensions at Braila ; on the other hand, buyers have shown a disposition to await the delivery of new wheat, as they consider that when it makes its appearance more freely, they will be enabled to secure better terms. The quantity of wheat now en route for Europe is returned at 1,360,000 qrs. as compared with 1,330,000 qrs. at the corresponding date of 1899. The total of 1,360,000 qrs. is made up as follows : — France, 76,000 qrs. ; Belgium, 432,000 qrs. ; Holland, 385,000 qrs. ; Germany and the North, 240,000 qrs. ; and Italy, Spain, etc., 228,000 qrs.

Hamburgh, Saturday.—Barley report : Weather remains fine, although the abnormal heat has abated a little, and prospects of our crops remain generally very satisfactory, consequently markets have turned dull. Cutting :—The Saale districts will soon commence, and people speak in high terms of the outlook, but things have often been disappointing when the first samples appeared. From Hungary a few samples have been shown, and quality seems to be appreciated. In another fortnight it will be possible to form an opinion about the general outturn.—FRANCIS M. TH. DUHNE.

Hamburg, Saturday.—With forcing, hot weather the growing crops are making quick progress towards maturity. Samples of new rye show fine quality. Market quiet ; buyers restrict their purchases to immediate requirements. The imports during the week amounted to 9,411 tons wheat, 4,555 tons rye, 3,012 tons barley, 9,873 tons maize. Wheat neglected. Fine red Holstein and Mecklenburg is offering at 29s 3d to 30s per 504lb f.o.b. Fine River Plate on the spot and old Hard Winter, No. 2, 26s 6d to 27s ; Hard Winter, No. 2, new crop, July-August, 28s 3d per 480lb c.i.f., Hamburg. Rye quiet ; 9 10-15 South Russian on the spot is offering at 22s 9d ; September-October shipment at 21s 9d per 480lb c.i.f., Hamburg. The barley crop in Germany is making satisfactory progress, and also from Bohemia and Moravia there are now better reports, while Hungary, it seems, will remain deficient, both in quality and quantity. A few parcels of good old Bohemian barley are still offering at 30s to 31s per 448lb f.o.b. Feeding barley in better demand. Spot parcels of South Russian are selling at 19s to 19s 9d 60-61 Ko. Aug.-Sept. shipment at 17s 3d per 400lb. c.i.f. Mixed maize for prompt delivery and Aug.-Sept. shipments are selling at 19s 3d to 19s 6d per 480lb c.i.f. Hamburg, but the demand is not brisk.—JOHN TATLOCK.

POULTRY AND PROVISIONS.

Smithfield, Saturday.—Fair supplies were offered this morning, and cleared at better prices. Quotations. Fowls: Yorkshire, 2s 6d to 3s; Essex, 2s 3d to 2s 9d; Welsh, 2s to 2s 6d; Boston. 2s to 2s 6d; Sussex, 2s 6d to 3s; Irish, 1s 9d to 2s 3d; Surrey, 3s to 3s 9d; Aylesbury ducklings, 2s 6d to 3s 3d; country ducks, 2s 3d to 2s 9d; goslings, 4s to 5s; Bordeaux pigeons, 10d to 1s; feathered, 7d to 10d; tame rabbits, 1s to 1s 4d each; Australian, 6s 6d per dozen; venison, haunches, 18s 6d to 20s 6d each; ditto forequarters, 3½d per lb.

Liverpool, Saturday.—Bacon: The consumptive demand rules moderate, and in the absence of local buying the market generally has an easier tendency, holders being ready sellers. We quote to-day choice Cumberland cut, 20lb to 22lb, 40s to 44s; 26lb to 30lb, 39s to 43s; 32lb to 38lb, 37s to 42s; long middles, rib-in, 18lb to 22lb, 41s to 45s; clear bellies, 14lb to 16lb, 41s to 45s; 18lb to 20lb, 41s to 44s; Stafford shire cut (lean on), 35lb to 40lb, and Birmingham cut, 33lb to 38lb, 42s to 43s; clear Staffords (lean off), 40lb to 44lb, and Yorkshire cuts, 40lb to 45lb., 40s 6d to 42s; singed Wiltshire Canadian, 45lb to 55lb, 50s to 56s; American, 40lb to 50lb, 42s to 45s; short clear backs, 12lb to 16lb, 39s 6d to 42s; 16lb to 20lb, 39s to 41s; fat backs (export), 37s to 38s 6d; long clear middles, 35lb to 40lb., 42s 6d to 44s; 40lb to. 50lb. 41s 6d to 43s; short clear middles, 45lb to 50lb, 38s to 39s; short middles (rib-in), 18lb to 23lb, 44s to 46s. Shoulders—Square cut, 12lb to 14lb, 38s 6d to 41s; 14lb to 16lb, 37s to 40s; New York cut, 11lb to 13lb, 36s to 37s per cwt. Hams rule steady; the enquiry for light weights is still brisk, but heavy weights are rather more freely offered. We quote choice long cut, 8lb to 12lb, 49s to 53s; 14lb to 16lb, 48s to 52s; short cut and A.C., 10lb to 12lb, 52s to 56s; 12lb to 14lb, 50s to 55lb; 14lb to 16lb, 48s to 54s per cwt. Lard is in moderate request at the quotations. We quote pails and kegs, 36s to 36s 6d; prime western (in tierces) 34s 9d to 35s per cwt. Cheese.—There has been a fair consumptive demand, and values on the week are about unaltered. We quote to-day finest coloured Canadian, 48s to 48s 6d; States, 47s 6d to 48s; finest white, Canadian or States, 47s to 48s. Fine cream seconds sell steadily from 40s to 45s, but there is little doing in lower qualities—offering from 12s to 32s per cwt. Butter.—The market generally is firmer, and with lighter supplies and higher quotations for Continental and Irish, buyers are now making more inquiry for Canadian. We quote to-day finest fresh-made Canadian creamery, in boxes, 98s to 102s; States, 92s to 96s; finest ladles, imitation creamery and Canadian dairy, 78s to 85s; finest Danish, 100s to 112s. Irish creamery, 96s to 106s; Cork firsts, 90s; seconds, 89s; thirds, 88s per cwt. HODGSON BROTHERS.

Newport, Wednesday.—Good supply; quiet trade. Caerphillies, 35s to 40s; truckles, 50s to 56s; Cheddars, 50s to 52s.

BUTTER.

Tuesday.—Bedale: 1s 8d to 1s 9d per roll of 24oz. Gainsborough: 1s 1d per lb. Leeds: Danish [illegible] to 112s per 112lb; Irish creameries, 100s to 104s; York lump, 12s to 12s 9d per stone; ditto long rolls, 1s 1d to 1s 2d, fresh butter in 1lb prints, 11d per lb.

Wednesday.—Barnsley: 1s 1d to 1s 2d per lb. Coine: 1s 0½d per lb. Goole: 1s 2d per lb. Hereford (fresh): 1s to 1s 2d per lb. Keighley: 1s 2d per lb. Kirbym[illegible]: 1s to 1s 2d per lb. Knaresborough: 1s 7d to 1s 8d per roll of 24oz. Louth (wholesale), 1s per lb. Market Drayton: 1s 1d to 1s 2d per lb. Market Weighton: 1s per lb. Masham: 1s 5d to 1s 6d per roll of 24oz. Northallerton: 1s 4d to 1s 6d per roll of 24oz. Stockton: 1s to 1s 3d per lb. Uttoxeter: 1s to 1s 2d per lb. Whitby: 11d to 1s per lb. Worksop: 1s 6d per lb.

Thursday.—Brigg: 1s 1d to 1s 2d per lb. Birmingham: 1s 1d to 1s 2d per lb. Devizes [illegible]: 1s 0s to 1s 1d per lb (retail), 1s 1d to 1s 2d per lb. Driffield: 1s per lb. Kidderminster: 1s 2d per lb. Penistone: 1s per lb. Ripon: 1s 10d to 2s 3d per single roll of 24oz. [illegible]: 1s 1d to 1s 2d per lb. Wetherby: 1s 3d to 1s 6d per lb. Bradford: A fair trade is noticeable all round but the continental shipments are greater—steamers to Bristol and ports th. Canada [illegible] sailings.

Friday. Crewe: 1s 7½d to 1s 8d per lb. Derby: 1s 1d to 1s 2d per lb. Grimsby: Choice Danish [illegible] to 1s 2d per lb; loss to [illegible] Dutch [illegible] to 1s 1d per lb. Retford: [illegible] to 1s 1d per cwt. Helmsley: 1s 2d per lb. Leeds: Danish, 108s to 114s per 112lb; Irish creameries, 100s to 104s; York lump, 12s to 12s 9d per stone; ditto long rolls, 1s 1d to 1s 2d, fresh butter in 1lb prints, 11d per lb. Leyburn: 1s 1d to 1s 2d per roll of 24oz. Lincoln: 1s 3d to 1s 4d per lb. Manchester: Stocks easily cleared at an advance of 1s to 2s per cwt on the week. Otley: 1s 8d to 1s 10d per roll of 24oz. Sandbach: 1s 4d per lb. Stockport: 1s 3d to 1s 4d per lb. Stratford: 1s to 1s 4d per lb. Whitchurch: 1s 3d to 1s 4d per lb.

EGGS.

Tuesday. [illegible]: 12 for 1s. Cambridge: 14 for 1s. Leeds: Yorkshire, 8s 9d to 9s 3d per 120. Irish: 7s to 7s 6d. Danish: 6s 6d to 7s 2d. Austrian blues, 5s 6d to 6s; ditto reds, 4s 8d to 5s. Settle: 14 for 1s. Stockton: 14 for 1s. Spalding: 15 for 1s.

Wednesday.—Barnsley: 13 and 14 for 1s. Coine: 13 to 14 per score. Goole: 14 for 1s. Hereford: 15 for 1s. Keighley: 12 for 1s. Kirbymoorside: 15 or 16 for 1s. Knaresborough: 13 or 14 for 1s. Louth: wholesale, 16 for 1s. Market Drayton: 13 to 15 for 1s. Market Weighton: 16 for 1s. Masham: 13 or 14 for 1s. Northallerton: 11 or 12 for 1s. Stockton: 11 to 13 for 1s. Uttoxeter: 1s 5d to 1s 6d per score. Whitby: 16 for 1s. Worksop: 1s 8d per score.

Thursday.—Brigg: 14 to 15 for 1s. Devizes: 15 to 17 for 1s. Birmingham: 11 to 12 for 1s. Driffield: 16 for 1s. Kidderminster: 12 for 1s. Penistone: 12 for 1s. Ripon: 12 for 1s. Scarborough: 12 for 1s. Wetherby: 12 or 13 for 1s.

Friday.—Altrincham: 10 for 1s. Derby: 14 for 1s. Grimsby: Re-selected Austrian [illegible] 5d to 5½d; selected 5d Danish, 6s 10d to 8s per 120. Helmsley: 15 or 16 for 1s. Leeds: Yorkshire, 8s 9d to 9s 3d per 120. Irish, 7s to 7s 6d. Danish 6s 9d to 7s 6d. Austrian blues, 5s 6d to 6s; ditto, reds, 4s 8d to 5s. Leyburn: 13 for 1s. Lincoln: 15 for 1s. Manchester: Eggs are in short supply, and the turn dearer. Otley: 13 to 14 for 1s. Runcorn: 10 for 1s. Stockport: 10 or 12 for 1s. Stratford: 1s 3d to 1s 5d per score. Whitchurch: 13 or 14 for 1s.

FRUIT AND VEGETABLES.

Covent Garden, Saturday.—A good supply of vegetables evidenced a slow demand. Arrivals of potatoes were moderate, but sold slowly. Good supplies of fruit were offered, and met a good demand. Cabbage, 3s 6d to 4s per tally; beetroots, 3s per dozen bunches; cauliflowers, 4s per doz. sprouts, 2s per bushel; parsley, 1s to 2s; leeks, 2s 6d per dozen bunches; peas, 5s to 6s per bushel; broad beans, 3s per bag; horse-radish, 1s to 1s 6d per bundle. Egyptian onions, 4s to 5s per bag. Potatoes:—English white Beauty, 4s 6d to 5s; Beauty of Hebrons, 5s 6d; Snowdrops, 5s 6d; early Regents, 4s 6d per cwt. English grapes, 9d to 2s 6d; Belgian, 6d to 1s 3d per lb; Tasmanian apples, 8s to 10s per case; English cherries, 3s to 7s; French, 4s to 7s per half-sieve; red currants, 2s to 2s 6d per handle basket; black, 4s to 6s per half-sieve; peaches, 3s to 9s per dozen; Valencia oranges, 14s to 20s; Murcia, 12s to 16s; lemons, 8s to 16s per case; pineapples, 1s 6d to 3s 6d each; bananas, 4s 6d to 8s per bunch.

POTATOES.

Borough and Spitalfields, Saturday.—The arrivals have been moderate at this market, and the demand has been slow, with prices lower for all samples. English Beauty of Hebrons, 3s 6d to 5s; early Rose 3s 6d to 4s 6d; white Hebron, 4s to 5s; early Puritans, 4s to 5s; Snowdrops, 4s to 5s; French rounds 3s 3d to 3s 9d; Dutch ditto, 3s to 3s 3d, ditto Kidneys, 3s to 3s 3d per cwt.

HOPS.

Canterbury, Saturday.—The extreme heat has had variable effect on hop plantations. Where the plant has been well farmed and thoroughly washed it has made good development, and there is a fair show for an average crop. But where vermin have been allowed to remain the foliage is dripping with honeydew, and black blight threatens seriously. There is still some mould to be found in places.

Worcester, Saturday.—Trade is very quiet in this market, and no new hops passed the scales this week. There is no alteration in values. The hot weather has been beneficial to all the thoroughly washed and well cultivated plantations, and the earlies are just coming into burr. Where neglected or only casually washed the bine has been so weakened by vermin that it has been unable to bear the great heat, and some pieces look like knocking up altogether.

Worcester, Saturday.—The weather continues favourable for the hops, especially in the best [illegible] grounds. There is still plenty of blight on the plant, but the heavy washing has reduced it a great deal, and the prospects are more favourable. Trade is very quiet, but holders of last year's hops are not disposed to accept lower prices at present.—E. EVANS & Co.

WOOL.

London, Saturday.—Wool, English, per pack of 240 lb—Fleeces, Southdown hoggs, £8 to £11 10s; half-bred hoggs, £7 to £8 10s; ditto wethers £[illegible] to £[illegible]. Kent [illegible] £6 to £7; Southdown ewes and wethers £5 to £6 10s. Leicester ditto, £6 to £7. Colonial, per lb: Victorian fleece, superior, 1s 6d to 1s 7d; scoured good, [illegible] to [illegible]; scoured average, 1s 3d to 1s 5d; greasy average to fair, 10½d to 11½d. New South Wales scoured [illegible] 1s 3d to 1s 4d; greasy average, 8½d to 9½d; South Australian greasy average 6d to 7d; New Zealand, scoured average, 1s 1d; [illegible] greasy average, 8½d to 9½d; Cape scoured superior, 1s 6d to 1s 8d; [illegible] average [illegible] greasy average, 6½d to 7d; Natal, scoured, 1s 2d to 1s 3d; greasy average, 7½d to 7½d. Crossbreds, greasy, Victorian, good to superior, [illegible] New Zealand fine, 9½d to 10½d; [illegible] 9d to 8½d; ditto coarse, 6d to 7d.

Bradford, Thursday.—Unprecedented [illegible] maintained, and although buyers [illegible] into the market to satisfy immediate requirements, they [illegible] small advance on the [illegible] Tops [illegible] best breds there is a steady [illegible] Noils [illegible] Mohair is a little [illegible] [illegible] pursue a waiting policy.

Canterbury, Saturday.—Trade is not parti[illegible] but since [illegible] are still quoted at 6d, and lambs' wool at from 4d to 4½d.

Leicester Saturday [illegible] but in the yarn trade [illegible] and there is an [illegible] free sale for fancy and lambs' wool yarns.

Review of the British Corn Trade

DURING THE PAST WEEK

Written exclusively for the Mark Lane Express.

Perfect weather for the wheat has brought harvest to our doors while yet July is with us. This seemed impossible a month ago, but the wonderfully high temperature, both by night and by day, for the last four weeks has worked marvels. The lighter sorts have clearly suffered; the wheat has ripened prematurely, and fields show the oddest streaks of colour, the plant going off to a sickly yellow where stinted of moisture, while developing well where the long roots had succeeded in finding humidity in the subsoil. On the heavy land some great crops will be secured. The cutting of wheat, rye, and winter oats will begin from to-day in the Isle of Thanet, in Sussex, and in parts of West Middlesex; while some winter oats and rye are already in sheaf in Essex and Hertford. The barley has come on well in East Anglia, but will be very irregular. Oats have seldom had enough moisture, but they were sown late, and the worst counties have a fortnight before them in which heavy showers may do much to plump out the grain. Straw will be short. Farmers are buying and hiring machinery on an almost unprecedented scale; it is a busy season with the implement sellers. Labour of the purely agricultural sort is very scarce, but with machinery a few skilled men supply the place of many inferior workmen. There is not much dodged or twisted corn this year, and the machines will be able to "go straight ahead" on most farms. The root crops are coming in well, and this includes potatoes. The good rainfall of June laid the foundation for the subsequent rapid growth of vegetation and plant life both above and below the soil. But for this nourishment the tropical heat of July would have been too much for most plants and crops.

Of the French wheat crop we have now two new and important estimates:—

	Qrs.
Le Marche Français	35,065,000
L'Echo Agricole	37,502,000

The mean of these two estimates will be found to be 36,283,500 qrs., and this may fairly be accepted as the yield in France for 1900—pending the Government figures in the autumn. This yield thus compares with previous years:—

	Estimate Official.
1900	36,283,500 qrs.
1899	44,700,000 „
1898	45,060,000 „
1897	30,500,000 „
1896	42,000,000 „
1895	41,120,000 „

The German wheat crop is officially returned slightly over an average, but no exact figures will be available for some months. Austria-Hungary has secured an average, but by no means a bumper wheat yield.
